Germany does not allow prisoners employed in fortifications, trenches or transports to communicate with their families because of the knowledge derived in the course of their work. Owing to this obligatory silence imposed on the prisoners it now happens that many officially reckoned as dead are claiming to be reinstated as living citizens. In the cases of bachelors such official errors are not of much consequence and as regards the married prisoners in most cases their wives remained unmarried, but some cases have occurred where wives have remarried and, suddenly modsied, decorated, amputated or maimed husbands turned up.

Charles Legoffic, author of the well known account of the Dixmude fighting calls attention to the case of a glorious French prisoner who returned maimed and utterly disfigured and who out of a sentiment of delicacy to avoid a meeting with his family, refuses to disclose his identity, and repeats, "I am dead."

The wise small boy laughs best when the teacher laughs.

From Erin's Green Isle

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irishmen.

A cock-fight between Carlow and Dublin birds was watched by several thousand persons near the Curragh.

Dublin Corporation, with a few dissenting voices, passed a resolution demanding the immediate withdrawal of martial law.

Dublin Metropolitan Police are agritating for a substantial increase of pay as well as a war bonus, to date from the outbreak of the war.

At the meeting of Athy Board of Guardians, it was stated that there were twenty patients in the Fever Hospital from Stradbally suffering from enteric fever.

All business was completely suspended recently for five minutes in Belfast in honor of the men of the Ulster Division who lost their lives in France the previous week.

The fruit crop in the orchard districts about Loughgall, Richhill and Kilmore will be, on the whole, a failure this year. In many orchards scarcely an apple is to be seen.

About fifty young men who were deported from Ireland as suspects in connection with the Sinn Fein rising, recently arrived at Kingstown. They were chiefly from County Galway.

On the arrival of the s.s. Corbet, a collier belonging to Belfast, it was reported that the master, Captain Hugh Montgomery, a native of Islandmagee, had disappeared during the voyage.

Through the brakes failing to act, an excursion train at Ennis, Limerick, crashed into two wagons and carried away the supports of an iron bridge before being brought to a standstill.

The heavy and regular import trade in German peat-moss litter to the United Kingdom having been in abeyance since the beginning of the war, the Bog of Allen is now coming into its own and is doing a tremendous business.

At a meeting of North of Ireland agriculturists, held at Belfast, a resolution was passed calling upon the Government to give to farmers in Ireland a price for their hay equal to that given to other farmers of the British Isles.

No settlement of the dispute between Dublin coal merchants and their employes has yet been reached, and coal for the poorer classes is said to be costing $12 per ton, and the closing of factories for lack of fuel is threatened.

The Registrar-General's return of the number of natives of Ireland who emigrated from Irish ports during the month of April last shows that the number was 482 (125 males and 357 females), as compared with 824 in the same month last year.

Under the Defence of the Realm (Consolidation) Regulations, General Sir John Maxwell, commander-in-chief of the forces in Ireland, has made an order to come into force immediately in Ireland, prohibiting the carrying of firearms, except by members of His Majesty's forces.

Some times a man avoids a lot of worry by having a poor memory

It's easier to agree with the average man than it is to convince him.

"Binks"—A Dog's Tale

"And mind, now, you must keep your eyes skinned and your wits about you, an' watch that there slope as if them bushes was all blanky Turks."

So saying, the sergeant cautiously crawled away, followed by the remaining three sentries yet to be shown their posts. And Private Wilkins watched him go with some misgiving.

Night outpost is no picnic at any time, but when one's post is a shallow revetment, lately an enemy trench, on a milewide plateau covered with dwarf oak, and with the enemy trenches only a bare hundred yards away, it becomes a duty almost too imprssive in its importance.

Private Wilkins watched the sergeant's party disappear, crawling through the bush, and a faint and unaccustomed feeling made itself evident somewhere near the buckle of his Webb equipment belt. He was not afraid, he was sure of that, but his responsibilities were beginning to tell on him.

He had barely had two hours' sleep in thirty-six, and here he was on one of the most nerve-racking duties that the Army offers. Ten times rather would he have crept out, as indeed he had that morning, and "listened" for an enemy mine which was coming uncomfortably near one of our machine-gun emplacements.

Such hectic escapades had an element of sport over for a tired man, and Wilkins was tired.

A thin, drizzling rain began to fall, and the night set even darker. Wilkins buttoned the chin-strap of his greatcoat, and from a sadly depleted haversack took out half a biscuit and a small chunk of bully-beef. He munched slowly and appreciatively, and for a while felt less lonely.

Suddenly a large calibre shell came shrieking overhead, to burst down near the beach, and then came another and another.

"Help me if it ain't Annie come back!" mused Wilkins. "I was afraid they'd started yer, Annie."

Asiatic Annie was a gun from one of the forts across the Narrows, and the men had got to look for her nightly "hate" as something that helped to pass the time. Hence Wilkins' joy at her apparent resurrection. But even this interest was short-lived.

Carefully he laid his rifle on the parapet and gazed at the ground in front of him through the dusk. There was one particular bush, on which he fixed his attention. Was it moving? Cautiously Wilkins drew his butt to his shoulder and lowered the safety-catch, taking careful aim. But the bush did not move from the barley-corn of his foresight, and presently he relaxed again.

Beside him was an empty ammunition-box, up-ended. There could be no harm in sitting down. He could still see ahead, for the parapet was quite low and the trench shallow. He sat down and fell to thinking of home.

Just about this time last year—autumn in his Antipodean country—he had been "padding the hoof" from Westport to Christchurch, across the South Island of New Zealand. On just such a night as this he had curled up under a manuka bush, after a scanty supper of bread and tinned meat.

He had slept soundly then; pity he could not sleep now. He tried what it was like to close his eyes. His head fell slowly forward, and he came to himself with a start. A sleep-starved man takes just about three seconds to get well into the land of dreams.

"Blime, you're a blinkin' idjit!" he told himself, and determined resolutely that he was not a bit sleepy, just as a yawn forced itself out and gave the lie to his thoughts.

That bush seemed to move again, and the one to its right was surely changing its position.

"Must be my eyes," he thought, and closed them tight—"just to rest them," he told himself.

Slowly his head and shoulders bent forward, and Private Wilkins made himself comfortable, automatically pillowing his dirty face on the earth of the parapet.

Dreams came to him, and he stirred uneasily. He had crawled beneath a tarpaulin on the railway-track. Way back in Lyttleton. It was a rainy night, and the water trickled through a rent in the oiled canvas, and Wilkins felt it cold on his cheek.

He woke with a start, to find a dirty yellow dog with its wet nose against his face. The enormity of his lapse was lost in his delight at seeing the dog, and the dog seemed pleased, too.

They were old friends. Wilkins had found the pup in the camp at Zeitoun, near Cairo, and by dint of much hard work, hard thieving, and harder lying, had managed to keep him safe and alive all the way to Anzac. Suddenly alarm dispelled his pleasure. A dog like this was a dangerous companion on night outpost, for Binks was not undemonstrative as a rule. His pedigree was more than doubtful, and his manners were those of a border-thief.

Wilkins, seeing an advertisement for table delicacies, "Binks' varieties," had dubbed his protege accordingly, for as he said, "You've sure got 57 kinds of dog in your make-up."

Binks crawled on to Wilkins' lap, and shortly was asleep. Wilkins took one more look at the doubtful bush, and slowly again his head dropped, an inch at a time, until he was breathing heavily, and back in New Zealand again. Binks was as tired as his master, and presently the breathing of the little yellow dog and the sentry kept time.

Again the tired man took up the thread of his dream, and he imagined himself curled up on top of the unpressed wool bales. In his dream he was awake, and heard stealthy footsteps on the tared wood-blocking of the wharf. A big hand dragged him from his nest, and Constable Murphy the wharf policeman, caught him a cuff over the ear, filling the black night with stars.

But what was it that Murphy was saying? He could not understand his whiskered sentences, and no wonder, for Private Wilkins gradually awoke to the terrifying fact that he had been knocked sideways from his cartridge-box, and was now effectively gagged by a large hand, which covered most of his face.

The Turk is a fatalist, but the two that had "bagged" Wilkins took no chances. One with a hairy face knelt on his chest and searched him, while the other methodically removed the cartridges from his rifle and threw the bolt far away into the bushes.

Then something happened suddenly. Indeed, several things happened at once. A small, hairy, yellow shape materialised from the surrounding blackness and threw itself bodily at the throat of the Turk who held Wilkins' rifle. At the same time, Wilkins bit into the hand that covered his mouth, grabbed the long sword bayonet from the belt of his captor, and stabbed upwards hard.

He scrambled from beneath the body to see the other man busily engaged in tramping on the neck of his beloved Binks. Now, Wilkins was a small man, and the Turk was big even for a Turk, but in the dusk the Tommy saw the dog's appealing eyes and heard the half-strangled breath as it was gradually crushed from the poor, thin body.

With an almost beast-like cry he flung himself at the man, and the two rolled back into the trench, Wilkins on top.

Two minutes later the sergeant and three relieving sentries disentangled a small dog, a large Turk, a bayonet, and a row altoget unconscious Tommy, and sorted them into their proper order. The bayonet was removed with a wrench from the Tommy's shoulder, where it was buried hilt deep; the Turk was trussed with one of his own grey puttees, and a weird procession set off down the slope which led to the beach and the dressing-station.

Two men carried Wilkins down the steep slope, there followed the Turk, the sergeant—with a fixed bayonet—and a small yellow dog, walking very stiffly.

The shirt-sleeved surgeon at the dressing-station examined the wound humderdie.

"Worse than it looks," he said reflectively. "Send him straight off!"

While time on a stretcher, and fortified with a stiff infection of morphia, Wilkins left for the hospital-ship via Hell Spit, Headquarters Beach, and a ship's lifeboat forming one of a tow behind a warship's pinnace.

At the last moment unseen, Binks, who loathed an open boat, dropped quietly down on to the inwards beside the stretcher and laid his muddy little head on Wilkins' chest.

At the ship's side he was put—stretcher, dog, and all—into an iron cage-cot, and an uneasy steam derrick hoisted him to the deck. The ticket on his torn tunic meant a thorough trip to the operating theatre, and there, under an anæsthetic, a clever-fingered surgeon patched together the several torn pieces, and, still unconscious, Wilkins was put out on the promenade-deck on one of a long line of stretchers.

A zealous hospital orderly, passing his inert form, looked reverently at the white face, and drew the blanket over it.

"E's finished;" he remarked to Wilkins' next door neighbor.

"Poor beggar!" said the latter, now no stranger to death.

Precisely half an hour later Private Wilkins, very pale, sat up and removed the blanket from his face.

"Where's my dog?" he asked aggressively, nudging the dozing man next to him.

"Oh, my Gord!" said the latter feebly. "You passed out 'arf an hour ago."

And he gazed at the resurrected Wilkins with a wild eye.

Then round the corner of the wheelhouse trotted Binks, sniffing each bandaged figure. Wilkins' feeble whistle seemed to galvanize the dog into life, and he sat on the latter's lap with much noisy whining and a cinematographic wagging of his apology for a tail.

A tired-eyed surgeon, stepping through the recently dead, paused to look at the pair, and a light of comprehension came into his eyes.

"Your dog?" he asked Wilkins.

"My cath!" said the latter, emphatically, and the surgeon lifted the yellow mongrel and passed him.

He was a great man, this surgeon, with most of the alphabet after his name, and most of fashionable London after his services when he was at home.

It was he who had mended Wilkins so successfully, and during the operation he had listened for half an hour to the tale of the latter's failure and Binks' saving act, for casualties loosen a man's tongue.

"I wonder," said the surgeon, reflectively, addressing the dog in his arms—"I wonder what the General would say if he knew what we know? Anyway, you've done your bit, pup, and court-martials are unsatisfactory things."

Then the surgeon passed on to snatch an hour's sleep out of the long night, leaving a very much bandaged Tommy weeping unmanly tears over a very grubby yellow dog.

And, with another friendly pat on the dog's grubby hide, he laid the animal gently down beside the wounded soldier, and a glance full of meaning passed between the two men, so far apart in the world's reckoning, yet with but one object in life—the glory and defence of the Motherland.—London Answers.

THE DOGGER BANK.

The Dogger Bank has long been carefully protected, because in the shallow waters that surround it there is the finest fishing that is to be found anywhere near the English coast. The wide stretch that shelves down to a depth of only 120 feet is the largest sand bank in the North Sea, and in bygone times it was claimed by both Holland and Denmark. The name has nothing to do with the geological formation of which the sand bank is composed. "Dogger" is a sandy, iron impregnated stone that is well known to the geologist. But this bank took its name from the two-masted fishing boat that has been used by Holland for several centuries in the herring and cod fishing in the North Sea. The dogger is similar to the ketch, but adapted for fishing, especially in the shallow waters surrounding the Dogger Bank.

An Officer—Not Yet.

Sergeant: "Do do you think you are? A lofficer?
Raw Recruit: No; of course I'm not an officer.
Sergeant: Then don't talk like a bloomin' idjut!—The Tatler.

VERDUN COURIERS A BAND OF HEROES

MUST BE AN ATHLETE AND HAVE A STOUT HEART.

Keeps Up Communications Between The Trenches and Generals in the Rear.

Unexampled conditions of fighting before Verdun have developed a new type of soldier called "the couriers of Verdun," says a despatch from Paris to the New York Tribune. They are the men who maintain communication between the troops in the midst of the melees and officers commanding from the rear. The battlefield into which they dart with orders or after information is a desolated zone where nothing but thick smoke, sometimes black, sometimes white, gives appearance of life. Except during the brief period of an infantry attack, it is to all appearances deserted; the sharpest eye discovers no movement of humanity. The earth is everywhere furrowed by freshly-stirred earth, but no one sees the hand that stirred it.

Telephones Destroyed.

Occasionally a form is seen going over this desert land something after the manner of a rabbit, bounding into sight out of the herbs and above uneven ground to disappear again; leaping from obstacle to obstacle, from ditch to ditch, from shell hole to shell hole as it approaches the front line, at times smiling at others crawling, and sometimes kept motionless for considerable periods by showers of projectiles sent over from the other side of the line for his personal benefit. This is the passenger of modern battle; he was never more needed nor more useful than at Verdun and the type will probably bear the name for years to come of "the courier of Verdun." Not a telephone line can resist the incessant bombardment that digs up the soil and levels all field work along the whole line in front of the fortress; consequently to assure communications between the front and the rear is a difficult problem. Communications by courier pigeons are very uncertain, and optical signals are insufficient for various reasons. Nothing is certain except the man himself, and to transmit information and orders across that beaten field requires something extraordinary in the way of man. He must be an athlete, with good lungs, and, above all, he must have a stout heart.

Dodging Drumfire.

The courier of Verdun is unable to use the communicating trenches, where he would be out of sight of the enemy, because that line is crowded always with soldiers going to or from the front line, with wounded being carried back, with men of the commissary department carrying provisions to the men on guard. That is too slow a route for the courier of Verdun; he must take his chances being sighted and hit—above ground. The first formidable obstacle to pass is the zone that is beaten by "drumfire," where 58cm., 24-inch and 42-inch shells are bursting with formidable explosions, sending showers of shrapnel over the whole zone. In going through this the courier sees everywhere the spectacle of death, stumbles over corpses, sometimes runs into a cloud of poison vapor before he has crossed it; once through, he is within range of the smaller German guns and the quick-firers. For the whole distance of a mile or two miles, according to the position, he nerves are at the highest tension, with his mind on the end of his mission and at the same time on the obstacles that are multiplied each instant in his path. Some of these couriers get through untouched, some crawl back to the starting point brtuised or maimed. Some never return to tell the story of their heroic effort.

A Memory of Ratisbon.

The couriers of Verdun maintained communication from the rear with the heroic troops under the orders of Commandant Raynal—who held the Fort of Vaux several days against overwhelming numbers of assailants. They were all volunteers, selected from a considerable number of men who offered themselves for the dangerous mission. One was a boy of the contingent of 1916, of childish aspect, who every time volunteers were asked for was the first man to the front.

"He had scarcely returned from one of these perilous missions," said his captain, "when he pleaded to be sent out again."

Another, literall, riddled by fragments of a shell that had burst to his path, had dragged himself back, although unable to rise to his feet, saluted his colonel and said: "Colonel, I am done for, but I have got enough left in me to give an account of my mission." He made his report, and that was the end of his service for his country.

The "Urgent" Envelope.

The risks are so great for these messengers that they are generally sent in couples; if one is hit, the other may get through. Two of these men from the commanding post of a brigade crossed the Fumin Woods; they were almost at their goal when the shell of a German three-inches struck one of them full in the chest. His comrade stopped and searched the body for the message, but found nothing; the shell had carried away the pocket and the paper that was in it. He made his way back to the post, seemed almost ashamed not to have executed his mission, and asked: "Colonel, give me a duplicate of the message!" He received a pint or water, which was in those days the courier's greatest recompense, and started off again.

One courier presented himself at the commanding post of a colonel, panting, covered with mud, and bleeding freely. He had passed through the zone of a "drum fire" that ploughs up the ground, yard by yard, methodically. He held out the envelope containing the message. "However did you get through?" asked the colonel. "Colonel," was the reply, "I don't know: I only noticed that the envelope was marked 'urgent.'"

"SOMEWHERE IN FRANCE."

Song is the Soldier's Never-Failing Charm at All Times.

Song is the amulet of the soldier; the never-failing charm he carries with him to beguile the first day's fatigue or the last moment's plunge into a be hing tornado of destruction. The songs in the new armies until it is claimed as a strictly personal prerogative; then it is resented. No; we sing. "Good-bye, Virginia," its admiranly the rhythm of a scrubbing brush on a latrine floor; in fact, it is almost a deodorizer. While, as for scouring greasy bacon pans with mud and cold water, all the pathos of it seems concentrated in that plaintive "Long, long trail that's leading * * *." And what means all this, pray, but the contempt of the soul for mere disreputable matter, its laughing immunity from the grime of the hands, articulate in song?

Then the route marches...*...*. Not only do we sing to proclaim the soul's triumph over physical fatigue; over the caprices of an officer with a suburban tendency to follow the tramlines; over the wistful appeal of the rising sun that dawns for us in vain and the Crown and Anchor, where not even the perspiring sergeant major may indulge a moment's harborage; over blisters, and drawing feet, and that blighter in front who persists in blinking he is the only man who can step. Our singing is positive as well as negative. We sing the intoxicating rhythm of feet and the body's proud strength and endurance, unwavering as a tuneful engine. We sing the delicious languor that creeps into the brain from the limbs' consistent motion, the blood's warm surging, the streaming sunlight, the hazy, brooding countryside. We sing the gayety of marching through pleasant villages so intimately responsive to our "Here we are again!"—the whimsical conceit of marching through the town, with its attentive crowd and deferential traffic.

All these things we sing, chorus following chorus until our repertoire is exhausted, and we have to concede the beauty of those tunes our fathers marched to: "John Peel," "There is a Tavern in the Town," "The Minstrel Boy," "Boys of the Old Brigade," and so on.

In prekhaki days it may have been our idiosyncrasy to mumble odd excerpts from Wagner, Grieg, Schubert, Rachmaninoff. Now anything from "Gilbert the Filbert" to "My Home in Tennessee" will do.

People who think before they speak seldom say much.

WAR MAKES LOVE-LETTER WRITERS

WHEN THE WOUNDED SOLDIER RECEIVED HIS LETTER.

Lovers Find Relief From the Pangs of War in Putting Thoughts on Paper.

O, keep him safe where'er he be,
And bring my true love home to me.

The old fashioned air floated out into the garden with a plaintive cadence and mingled with the music of summer.

The garden gate clicked, feet crunched the gravel, the song in the house suddenly ceased, there were running footsteps, and then a quietness settled down.

Up the short lane I watched the post-girl continuing her round, and saw her turn in by the little church that nestles on the edge of the wood, writes an English correspondent.

Behind the quaint gray stone, ivy-clad church there was a glimpse of a white-robed woman, on whose breast was emblazoned the Red Cross. But the post-girl did not make toward the Red Cross matron. She went instead toward the great white cross which stands in the garden, sharply defined against the dark greenery of the ancient trees. And she handed a letter to a blue-garbed maid reclining there at the foot of the cross—a sun-burned, tanned young man, temporarily broken in the wars.

The Soldier's Letter.

Down the hill went the post-girl, and the soldier was left there with his letter. It must have been a long letter, or maybe it was a short letter that he read many times, for he kept it in his hands longer than is usual, and afterward he did not slip it into the ample side-pocket of his coat, but laboriously he undid the coat and safely laid that letter in his inner pocket, sheltered beneath his battered arm, and the side on which he laid it was the side we like to think is nearest the heart.

The song of the girl within the house had started again, but now it had a different cadence—the plaintive tone had gone. The melody was wafted over the meadow and reached the ears of the young soldier beneath the cross in the sunny little churchyard. He placed his hand where the letter lay.

Both the girl in the house and the soldier in the garden had received what to them was a possession to be desired above all others in these war days—a love-letter.

The ships which pass to and fro across the Channel are laden with letters—nearly all of them contain messages of love for some one, but the great majority are real love-letters.

Lovers who in the old days found their thoughts so hard to express on paper, and who were rarely satisfied with their finished efforts, now sit down in trenches, in billets, in Y. M. C. A. huts, in hospitals, in camps, and in the ships that carry them away from the home land, and the words that were so reluctant to express their sentiments in other days now trip off the pen—more often pencil—with a fluency that often surprises the writers themselves.

Exquisite Love-Letters.

They, being men, do not always realize that their former lack of success often lay in the fact they tried to think of something poetical and lover-like to write, whereas now they sit down and just write the blunt truth.

They say "I love you," and that is all a woman ever wants to hear.

But some rise to more eloquent heights than others—two years of war, two years of the pain of parting, have given to the girls of to-day some of the most exquisite love-letters that have ever been penned.

Many a lover who resorted to subterfuge in order to escape writing the conventional love letter now finds relief in putting his thoughts on paper; many a husband who thought that for him the days of romance were over now writes love-letters to his wife.

There are few women in Great Britain to-day who do not cherish love-letters of the Great War—they have never had so many love-letters in their lives. Women for generations past have not received the homage that the girl of to-day receives—in writing—and women love to see it in writing.

Why Watches Are Irregular.

The reason for variations in the timekeeping qualities of a well-regulated watch have been the subject of investigation by scientists recently. The popular theories that are that magnetism and bodily temperature are causes are denied by investigators. Rather, different rhythms of movement as well as the angle at which a watch hangs are given as real causes for irregularities.

It's good thing to have a temper if you know how to handle it.

GERMANS SEARCH ALL TRAVELERS

EXAMINE MEN AND WOMEN WITH GREAT CARE.

An Alcohol Bath Provided to Remove Any Wraps on the Skin.

Everyone who leaves Germany today via Warnemuende for Denmark is stripped to the skin, writes a Copenhagen correspondent. Ears, nose, teeth, and toes are examined to see that no information or plans for the enemy are being carried out. Relishing members, wife of officials, correspondents and laborers are treated the same. An American crossing the border recently remarked that before long it would be necessary for the inspection station to be built into the Baltic sea so that the travelers could undress on the German border, walk into the water and swim to a waiting station near the ferry and wait for the clothes and baggage to be examined and forwarded by canoe. When travelers leave the train they enter a small wooden shed, resembling in many respects a temporary bath house at an American beach. Here the passports are taken away and shoved into an enclosed room where they are examined. The holders are given numbers. When the passport of a traveler is finished he is called to another room where he is questioned about the objects of his journey. From here the wayfarer goes to a large room when the baggage is examined while detectives stand in front and in back to see that nothing is slipped by.

Nothing is Overlooked.

Every scrap of paper or cardboard is taken away, even wrappings and paper lining to boxes. Cotton is removed from medicine bottles, cigars are examined, some are cut open, chocolate in sealed packages is opened, the wrapping destroyed and half broken up into bits to see that nothing is hidden. Shoes with a new half-sole are opened. The searcher feels everything, examines canes to see whether they are hollow, opens umbrellas, holds every collar up to the light to see that nothing is written on the lining. "After the baggage is examined," said an American woman, who crossed the border recently, "the men and women are taken into separate compartments, about the size of a large individual bath house, and there every bit of clothing is removed. Women are examined by women, men by men. The searcher went through every piece of my clothes, examined the border of my underwear and held almost every inch of my clothes up to the light. Even the roses I wore were examined petal by petal, my wrist watch was opened back and front, as also my shoes, umbrella and hat. I had to take down my hair and my scalp was examined thoroughly—I suppose to see that I didn't have a map of Metz concealed thereon.

An Alcohol Bath.

"Then my ears, teeth, hands, toes and back were examined, but fortunately I was not a suspicious woman, because I was not washed in alcohol to see if there were any concealed maps drawn on my skin. The alcohol and a basin of water with towels were there, and on a shelf I noticed a bottle of aromatic spirits of ammonia and drinking water for those who might faint under examination, but in every way the women were courteous and gentle."

After that was over the passengers were permitted to board the ship, but there they soon encountered a score of apies who watched for every move and who listened to every remark. The Germans take no chances with anyone.

Articles which are taken away during the examination are wrapped up before the eyes of the traveler and posted back to an address he gives of any friends in Berlin. Only suspicious articles are confiscated.

At present no rubber goods of any kind can be taken out no matter if it is the most necessary article. Not an ounce of rubber leaves Germany to-day.

Wifey Blight Hear.

Bix—Do you ever talk in your sleep?

Dix—Yes, but I am mighty careful what I talk about.

LOVAT

Mr Milton Acton left on Saturday for a three months' trip to the west.

Miss Annie Ross returned to Guelph on Thursday, after a two weeks' vacation at her home here.

Arthur and Roy Brownscombe returned home on Saturday last, after spending holidays with their grandparents at Tavistock.

Quite a number from here took in the barn-raising at Mr Chas Cottrill's on Tuesday last.

Mrs McLean and son Alex spent Sunday at the home of her daughter, Mrs Frank Mewhinney, at Carnill.

Mr Arthur Chapman, of Tavistock, spent Labor Day at the home of his sister, Mrs E N Brownscombe.

Mr Lowe Carr, of the Royal Bank staff, Kincardine, spent Sunday at Mr J G McKay's.

Our school board has engaged Miss Flossie McLennan, of Glamis, to teach for the coming year.

Some of our citizens have been attending camp meeting on the 2nd of Bruce. No dancing for J D this winter.

Miss Margaret McKay is spending a few days in the burg.

Miss Emma Snowden and Miss Mary Jane Nelson left on an extended trip to the west on Saturday last.

WALKERTON

Mrs Timothy Foley went to the County Hospital on Tuesday and was operated upon for internal trouble by Dr Hall on Wednesday. She is reporting to be making good progress.

Mr Geo D McKay left on Wednesday for London where on Friday, Sept 1st, he commences on his new duties as Chief Recruiting Officer for Military District No 1, which comprises the eleven counties extending from Lambton to Bruce. Mr McKay will be gazetted as Major and will draw the same pay as if holding that rank in the field.

It is rumored in Brant that the Hen over Cement Co is taking options on several farms on the Teeswater Road between Walkerton and Ennniskillen. This is taken to mean that the two subsidiaries of the C P R will be linked up in the near future and the lime rock which is to be had in abundance in that vicinity shipped to Hanover for cement making. Manufacture of cement from limestone has proven highly successful at very many places. It produces the highest grade of cement and the cost of production is in some instances lower than the cost of producing cement from marl.—Telescope.

A woman who been taking care of a crazy man here had much trouble with her charge on the street last Tuesday night, when trying to get her ward home she had to side step some stout blow from his fist and unarm him of a walking stick that he was endeavoring to swing in her direction. The way she got away with it and, without any assistance, landed the irresponsible one home, shows how the term "weaker vessel," as applied to women, is a joke.

Many teachers who resigned their positions this year are still out of jobs and with the schools re-opening next week the prospects of them landing a slit are daily growing dimmer. The fact of the matter is there is no longer a dearth of teachers.

Within the past few years five county churches have been closed in Brant and neighboring townships. All over this continent the small struggling country churches that did so much for the social life, as well as the religious zeal of the community, are giving up the unequal contest, and neither the city churches nor the country churches are taking their places. It is feared, too, that something worse than this is at the bottom of it all—a growing non-churchgoing country population. Time was when the residents of the country who had a church to get to would get there no matter what happened. It was a treat to go and see their neighbors and have a chat before or after the service. Now many farmers are not anxious about going to church. A wet or cold or a hot Sunday afford an excuse that would not have been thought of once upon a time. Or they get up too late or there were too many chores to do or they were tired. (How like the city folks' excuses some of these are). So, gradually the spirit of not going to church is crowding in amongst the rural people and that accounts for some of the decrease in churches—Herald and Times.

Potash Industry at Wiarton

A company with an authorized capitalization of $1,500,000 has bought the Crown Cement Co's plant at Wiarton. The Echo says it is the intention of this new company to manufacture potash, the importation of which has been shut off by the war. Before the war potash sold in United States from $60 to $100 per ton, to-day it sells for $460 per ton and twice that amount can be obtained for it. He claims that already they have orders for 50 tons per day, so if 50 is multiplied by $460 it is seen that the gross earnings of this new plant will be $23,000 per day and when this is again multiplied by 300 days per year you have a pretty big sum. The company will get their raw material near Parry Sound, where they have purchased 500 acres containing feldspar. This has been analyzed and goes 13% per cent of potash. The highest is 16 per cent while rock 1 per cent has been worked to a good profit. The company will employ 150 men.

Growing Dutch Sets

The growing of Dutch set onions is becoming quite an industry in some parts of Bruce and Huron counties. Half a dozen Lucknow men were into the business this year, and have harvested about four acres of crop. Arrangements for disposing of the crop are made before the seed is planted—in fact it is a sort of co-operative industry, and is quite profitable, says the Sentinel. It is not "grow them as big as you can," but "grow as many as you can." There is greater cheaper of their being too big than too small. Nothing over seven-eighths of an inch in diameter will be accepted, so the crop has to be harvested when the onions reach the desired size. They are then pulled (that's where the boy comes in) and left in small piles on the ground until the tops are dry enough to rub off easily. They are then gathered, cleaned of all tops and roots and made ready for shipment.

GRESHAM

Misses Mary Nelson and Emma Snowdon left on a trip to the west this week.

Miss Curry, of the 6th, and friends motored down to London and spent the week end in that city.

Our school re-opens this week. We welcome our new teacher, Miss Megraw of Paisley, to our section.

Mr Bert Cottrill, of Port Elgin, was a Sunday guest at Mrs J Young's.

Miss Minnie Shipley, of Shoal Lake, is a guest at the home of her uncle, Mr Edward Shipley, 6th con.

Mr H McDonald is at present visiting his aunt; Mrs Wm Rose.

Contractor Jas A McKinnon is building a large cement bridge on the 4th con.

Misses Alice Parker and Isabel McKinnon are taking in the exhibition in the city.

Mr and Mrs Bowes and friends motored up and spent Sunday at Mr Woods' here.

Mr George Fullerton and family have moved back to Paisley. We regret their decision, as they will be very much missed here. Mrs Fullerton took an active part in the W M Society and in the Red Cross work, where she was treasurer. We expect them back some time after their bright boys are educated, as Mr Fullerton has still 200 acres here.

Misses Isabel and Lettie Young, who spent part of the holidays at the home of their parents here, left for their schools. Miss Lettie has secured a school out west near Winnipeg.

Mrs A McDougal and two daughters returned to their home in Hamilton after spending part of her summer vacation visiting Mr McDougall's old home and friends here.

Mr Alex Wood received word from headquarters at Ottawa recently that Pte Jas Lothian, C E F, No 19419, who was reported missing on April 28th, died on the 15th of June. Pte Lothian enlisted on board the S S Leyland on Oct 14th, 1915. On attestation he stated he was born in Edinburgh, Scotland, and gave the name and address of his next of kin as a sister, Mrs Bishop, Providence, R I, U S A. Pte Lothian had been hired with Mr Wood for several seasons and was well known in our community.

SECOND CON ELDERSLIE

Signaller Jack Walks, of the 160th Bruce Batt, spent Sunday with his parents on this line.

Miss Jean Hicks spent a few days with her uncle and aunt, Mr and Mrs J Caldwell.

Miss Amy Marwood has returned to Toronto after a month's visit with friends here.

Hugh Watt has completed the job of rebuilding the bridge at 25th sideroad that was taken down in the June flood.

Misses Kathleen and Gladys Ferrier, of Bervie, spent last week with friends here.

Mrs Rich Jefkins and Miss M Allen are at Toronto exhibition this week.

Mrs Blaine Fortune is confined to her room with an attack of neuralgia.

Mr and Mrs Will Young and daughters spent Sunday with Brant friends.

Miss M Green spent last week with Sullivan friends.

Miss M Lillico has been engaged to teach in a school in Melbourne.

Mr J B Allen is spending a week visiting Toronto and Mimico friends.

Mr and Mrs T Snaith and Miss V Jackson spent Sunday week with Eden Grove friends.

Children Cry FOR FLETCHER'S CASTORIA

PINKERTON

Rev Mr Campbell, of Toronto, occupied the pulpit here on Sunday in the interests of the Dominion Alliance, and preached two excellent sermons.

Mr Russell Birrell, of Toronto, spent a few days at his home here.

Miss Lenora Clark returned to Toronto on Saturday.

Mrs (Rev) Richardson and son, who have been visiting at the manse, returned to Arthur this week.

Mr and Mrs Ansey Gregg returned from Inverhuron last week.

Messrs W and T Birrell, D and A Pinkerton motored to Toronto last week.

School re-opens this week, Mr Godfrey McKee again at the helm.

Mr Jack Wilson, sr, went on the harvesters' excursion on Saturday.

Mr D Elphick took in Toronto exhibition this week.

BRUCE COUNTY DAY

AT THE

WESTERN FAIR

London, Ontario

TUESDAY, SEPT. 12

HUSBAND OBJECTS TO OPERATION

Wife Cured by Lydia E. Pinkham's Vegetable Compound

Des Moines, Iowa.—"Four years ago I was very sick and my life was nearly spent. The doctors stated that I would never get well without an operation and that without it I would not live one year. My husband objected to any operation and got me some of Lydia E. Pinkham's Vegetable Compound. I took it and commenced to get better and am now well, am stout and able to do my own housework. I can recommend the Vegetable Compound to any woman who is sick and run down as a wonderful strength and health restorer. My husband says I would have been in my grave are this if it had not been for your Vegetable Compound."—Mrs. BLANCHE JEFFERSON, 703 Lyon St., Des Moines, Iowa.

Before submitting to a surgical operation it is wise to try to build up the female system and cure its derangements with Lydia E. Pinkham's Vegetable Compound; it has saved many women from surgical operations.

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential.

Gravelling Jobs to Let in Greenock

THE undersigned will let gravelling jobs at the following times and places:—

On Tuesday, Sept 12th, at 9 o'clock p m, at lot 4, con 7. At 2 p m, at 3 nr, con 7. At 5 p m, at lot 6, con 8.

JAS E CAMI, JAS LEWIS, C FRASER, Commissioners.

WARNING AGAINST DRUGS

Easy Sleep-producers Are Always Wrong, Says a Physician

Discussing how to sleep, Dr. Robert Watson writes: Persons worried with insomnia may find the cause concerned in their own particular cases, and work out their cure from these hints; but if we fail, they and I, there must be no forlorn descent upon the druggists for sleeping draughts or powders or tablets or pills. That way lies danger, maybe death; for drugs with the power to steal away your senses are never safe and good. Benefit may result from a judicious use of the right drug at the opportune moment; but an agent which numbs the most important portion of your body in spite of itself, and reduces your being to hours of unconsciousness, may leave indelible damage behind, and a persistent use of it may end in an unexpected halt in a vital section of the human machine.

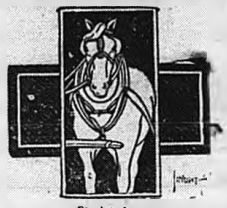
Such accidents occur daily, and often the drug employed has been one upon which some scientist has pronounced the magic word "safe." There is no safety in tampering with the essential machinery of being. Crises occur when such tampering has to be attempted, but the best physician is he who only measures out his pet hypnotic in fear and trembling when he can think of no alternative. It is not always the doctor who can produce a bottle to banish your pain at once who cures you soonest. Often the morphia or other sedative is added to the mixture to save thought or conceal ignorance as much as to allay your suffering. Pain means something every time, and a medical man has got to realize exactly what that something signifies before he wipes it out; otherwise he may blunder past the signals into a calamity which will cost a man life. It is the same with insomnia.

Character

Character is not measured by words and deeds alone. It would be comparatively easy to gain a strong and clean character if it were only a question of the control we could exercise over what we say and do. Every man ought to know that his attainments in character are measured by what he is when he is alone with his thoughts.—Charles Trumbull.

Mr. John Redmond is habitually attired from head to foot in clothes of Irish manufacture.

THE SHOE STORE



Is it worth while when you are selecting a pair of shoes to consider they are cheap or they are a fair price and absolutely satisfactory?

The City Bakery

The Bread that is Making Paisley Famous

Why perspire and tire yourself over a hot stove and before a hot oven when we are so willing to save you? We realize that home-made baking is very good, but for a month or two we think you could enjoy our mixtures. We would appreciate a trial order.

Have you ever figured out what your recipes cost you? Some morning have a piece of paper handy when you are baking and find out what it cost to bake that delicious cake. You will be surprised and wonder why we can make our pastry as cheap as we do.

We have added a new line to our Ice Cream Department, in the form of the Vortex Sanitary Paradise Paper Soda and Sunday Cups and Holders to eliminate the work of dish-washing.

Do not forget we are always in the market for fresh Fruits in season and always fresh Groceries. Farm produce taken.

A Marvellous Cure

Looking straight ahead of him, a rather curious expression on his face, Leslie Joyce came out of the recruiting office.

He had failed to pass the medical test.

The doctor had regarded him with obvious surprise, when he had professed himself unable to read the letters on the card on the wall, but he made no comment. He was a busy man, with no time to give to special tests, and, beyond a little grunt, he expressed no sign of dissatisfaction.

Joyce showed one of the sergeants waiting outside the room his blue form with the word "Rejected" scrawled across it; and then, picking his way through the crowd of determined-looking waiting young men, he reached the street.

As he stopped for a moment to light a cigarette, a girl on a bicycle came round the corner.

She was a pretty girl with coppery hair and big, wide-open hazel eyes, and the simple holland frock she wore suited her slim young form admirably.

"Hallo!" she called out gaily, catching sight of him. She slowed down, and jumped off her machine. "I was just wondering if I should come across you. Well, is it Private Leslie Joyce now?"

He raised his straw hat and took his cigarette out of his mouth.

"Well," he said hurriedly, "I've been up before the doctor, and—and they won't have me."

For some reason he averted his eyes.

"What do you mean?" asked the girl quickly. She seemed genuinely surprised. "Won't have you? Why, surely you're quite fit and strong, aren't you?"

She looked him over as she spoke. To all outward appearance he was a perfectly healthy, well-built, strong young man. He was tall, finely set up, broad-shouldered, and, judging by his lean brown hands and sun-tanned face, he was in excellent physical condition.

"It's not that. I'm all right in one way," he said. "It's my eyes. Can't understand it, but I couldn't manage the test at all."

He appeared to find something awkward about the explanation.

"Your eyes?" she said. "But I thought your eyesight was quite all right? It has never worried you at cricket, or tennis, or anything like that, has it?"

He shook his head.

"That's just it. My eyes are all right in some ways, but apparently in others they're not."

She nodded.

"It must be. But what about glasses? They take men with glasses now, you know. Besides, if you can't get in as a fighting man, why not try another branch—the Medical, the Army Service, or something of that sort?"

He appeared to have anticipated the question of glasses.

"Yes, of course. I know there is still a chance for me with specs. I mean to run up to town to see a specialist chap on Saturday. I'm not very keen on any branch but the actual fighting one, if I can possibly get in somehow."

"Good!" said the girl approvingly. "Go to a good man and tell him he must put you right!" she laughed.

She put her right foot on the pedal of her bicycle.

"Oh, I almost forgot," she said. "Jim has got four days' leave from the Front, and we expect him home this afternoon. Come to dinner; I know you'll like to see him."

"Thanks awfully!" said Joyce. "Is he all right? Good! I shall love to see him. At seven, then?"

For some reason Leslie Joyce frowned to himself several times before he reached the bank where he worked. He was very fond of Annabel Leigh, but as for her brother Jim—

"Confound it!" he muttered when he thought of Jim Leigh.

It was on Saturday night that the Zeppelin dropped its explosive bombs on Barrgate.

The Leighs were sitting out on the lawn when Jim's quick, war-accustomed ears first heard the hum of the gas-bag's engines.

"Hallo!" he said quite calmly and coolly. "That's not a 'plane. I'll bet my boots. Better take cover, all of you. Come on, mater."

He took his mother's arm, while Annabel and Leslie Joyce, who had got back from his visit to the London eye specialist in time to join them at dinner, followed. They had got indoors, when Mrs. Leigh discovered she had left her bag outside.

"I'll get it in a second!" volunteered Joyce.

And, taking no notice of Jim's warning, he ran back to the lawn.

As he did so, from out of the blackness of the night hurtled a bomb. It fell into the kitchen garden, beyond the lawn, at the precise instant Joyce was stooping to pick up Mrs. Leigh's bag, and for a moment he was conscious of a bright flash, followed by a sort of minor earthquake. The ground seemed to rise up and hit him in the face, and there after all was black to him.

When he woke up someone was banding over him.

"Steady on, old chap!" said a voice—Jim Leigh's voice—out of the blackness. It was curiously dark and black all round him. "How do you feel—eh?"

"A bit cheap!" he admitted. "What happened? It's beastly dark, isn't it?"

Jim sat down on the bed beside him.

"Oh, they just missed you when you went back for the mater's bag. You remember, don't you? You were laid out. No, don't touch that bandage, old chap."

Joyce had put one of his hands up to his head. He had on a bandage covering his eyes. Jim caught his hand and moved it away.

"Better keep that on till Muirhead comes and has a look at you," he advised soothingly.

"Muirhead?" asked Joyce. "You don't mean Muirhead the eye-man?"

There was just a trace or anxiety in the question.

"Yes," admitted Jim Leigh. We thought we'd better try and get him, as he's got your case in hand. You were telling us at dinner how you went up to see him, and how he said he couldn't quite make out your trouble, you remember. Annabel is trying to find his number to get through on the trunk 'phone to him."

Leslie Joyce, fully conscious now, considered matters swiftly for some moments.

"What's the hour?" he inquired.

"Just half-past nine," Jim told him.

"Half-past nine?" repeated Joyce. "Oh, then, I've only been knocked out about half an hour?" He seemed to think for a couple of seconds. "I say, you know, I hardly think it—it necessary to send to town for Muirhead. He's frightfully overworked, isn't he?"

"Yes; but in the matter of this sort——" suggested Jim.

"Just as you like, however. Still, don't you think you'd better see someone?"

"Why?" interrupted the other, a little nervously. "You don't think—think there's anything seriously wrong, do you?"

"Eyes are very funny things," replied Jim diplomatically. "I've had a look at yours, and although I'm not an expert, it seems to me that—that—well——"

His floundering speech frightened Joyce, and once again he put his hand to the bandage.

"Good lord!" he exclaimed, a sudden dreadful thought frightening him. "Good Lord, man, you don't mean to tell me I'm—I'm blind?"

The other did not answer.

"I wonder—that is—would you mind taking this bandage off?" Joyce whispered in a voice which struck him as singularly unlike his own.

Jim Leigh stood up, and leaning over him began without a word to undo the bandage. There was a suggestion of reluctance about the way he set to work.

"There you are!" he said quietly, when it was off.

Leslie Joyce uttered a cry of horror. His worst fears were confirmed. He could not see anything at all.

"My heavens!" he exclaimed frantically, sitting up. "I'm blind!"

He began to struggle off the bed. Jim Leigh gripped him by the arm.

"Stop where you are!" he ordered authoritatively. "Can't you see anything? Hold your hand up! Can you see it?"

Joyce did as he was told.

"I can't see anything—anything, I tell you!" He almost shouted; he began to groan. "Good lord, it's a judgment on me! A judgment!"

"A judgment?" said Jim, holding him tightly. "What do you mean by that?"

"I mean I've been fooling you—all of you—about my eyes. There was nothing wrong with them. But I didn't want to join the army—thought there were plenty without me. I was a shirker—anything you like. I wanted a way out that would save my face, so I fooled the doctor—pretended I could not see the letters on the wall. I failed on purpose. Then I lied to Anna—to your sister, I mean. Then I lied to all of you. I never saw Muirhead at all!"

"I guessed most of this," said Jim quietly, from what you said Muirhead told you. I happen to have studied eyes, you know. Made rather a speciality of 'em at Oxford, as a matter of fact."

There was silence for a second or two, and then Joyce spoke.

"Well?" he said. "Well, are you going to give me away?"

"That depends," answered Jim, "on what you are prepared to do."

"Do?" queried Joyce. "What do you mean? What can I do?"

"You might join the Army yet," said the other reflectively. "You have just said you wish you had."

Joyce broke in wildly.

"Don't talk such rot! How can I join the Army? I'm blind, you fool, blind!"

As he finished speaking Jim Leigh got off the bed, tip-toed to the electric light switch, and turned on the light. Then he turned round and looked into the blinking eyes of the other man.

"That's right! Have a good look round, old chap!" he chuckled. "And kindly observe how skilfully I have put away, or covered up, every light object in the room. Jolly thick curtains those are, too."

Leslie Joyce looked round, and then, in tense relief, he uttered the one word, "Spoofed!"

"Spoofed, as you say, agreed Jim. "Now, what about it? Am I to give you away?" He moved towards the door.

"For Heaven's sake," exclaimed the still bewildered Joyce, "don't hush like this, man! Where are you going?"

"To find Annabel," replied Jim. "I'm going to tell her not to worry about that call to Muirhead, that you can see much better than you could. A sort of marvellous cure, you know—what?"

"Tell her—tell her anything but the truth!" pleaded Joyce, with sudden earnestness. Then he became vehement. "I won't have those fiends dropping their beastly bombs on my friends and me without doing something in return! If they won't take me for a soldier at one place, I'll try another, I'll——"

"Good man!" said Jim approvingly. —London Answers.

"BRING RUIN TO NATION."

Prophecy Concerning the Kaiser Is Being Fulfilled.

A correspondent tells an American newspaper that in looking over some old papers he found a copy of the Saturday Evening Post, dated November 19th, 1898, containing an article headed "What is prophesied concerning the Kaiser." From that article he clipped the following extract:

"The German Emperor is very fond of being photographed, and is astonishing his photographers by the rapidity with which he changes his dress. The other day he had no fewer than forty separate portraits taken of himself in his pilgrim's dress. As if this were not enough he had a couple of cameras simultaneously levelled at him, the Empress seizing the opportunity while her husband was in the view to secure some portraits on her own account. The imperial pilgrim, if tradition goes for anything, should enjoy himself while yet he can. It is an old tradition of the house of Hohenzollern that three Emperors of the house will reign in Germany in one year, and that the third will have seven sons and will bring ruin to the nation as well as an end to his empire. The first portion of the prediction was fulfilled when the present Emperor came to the throne, his father, the Emperor Frederick, and his grandfather, the old Emperor William, both having died within the year prior to his accession."

WAR TO END THIS YEAR.

Peace Will Come Suddenly, Asserts Mme. de Thebes.

The Paris correspondent of the Berlingske Tidende, of Berlin, has had an interview with Mme. de Thebes, well known French clairvoyant and astrologer, in which she emphatically states that the war will end before the new year. She it was who said in 1913 that the year 1914 would be the year of great heroism, and despite much shedding of blood and tears would be a great year for France and place her in the front rank of the nations. Mme. de Thebes at first declined to be interviewed, but she finally consented to give him the following message:

"Germany has opened the eyes of the world and has given us all a great lesson in military efficiency and preparedness. We will always have war. Of course, it is nice to dream of peace, to preach peace and to wish for peace, but as long as there are two men left on the earth conflicts will take place. It is the same with nations. The wolf will devour the lamb when he gets the opportunity.

"I have predicted that the war will end this year, sir. I desire to say now, despite all circumstances and arguments to the contrary, that peace will be declared before the new year. And peace will come suddenly and unexpectedly. The roar of the guns will cease over night, and the soldiers on both fronts will be called home to peaceful pursuits. Fate has so decreed it."

SOME STRANGE BRIDGES.

One of Them, in Britain, Goes Back to the Ninth Century.

Probably no town in the world has such strange bridges as Srinagar, the capital of Cashmir, in India. The city is built on the banks of the River Jhelum, which is crossed by many wooden bridges lined with old and dilapidated shops and houses with balconies and lattice windows. Some of these are very insecure, and look as if they might at any time fall into the river beneath.

Timber has always been largely used for building bridges, and the earliest one of this kind on record is that which Julius Cæsar made across the Rhine, and which he describes in his "Commentaries."

The roofed Kapellbruche, at Lucerne, is one of the interesting. It crosses the River Reuss diagonally, and has a hundred and twelve triangular paintings beneath the roof, recording the heroic deeds of the old Switzers and the sufferings of their patron saints. In the midst of the Kapellbruche stands an octagonal tower, which formed part of the fortifications of the town in the thirteenth century. The bridge was built in 1333.

One of the curious and ancient bridges in Europe is that at Croyland, in Lincolnshire, which is supposed to date from the ninth century. No road now passes over and no water under it. It consists of three pointed arches, which meet in the centre, and the ascent is so steep that only foot passengers can go over it. Upon the bridge is a seated figure in stone of a robed Saxon king.

To Tax Gourmands.

The French Government is proposing to tax heavy diners. Those luxurious ones, who even in war time eat big meals at restaurants, will have to pay, according to the terms of the measure, five per cent. on the amount by which their bill exceeds one dollar (five francs).

RODE PICK-A-BACK ON CAPTURED HUN

BATTLE ANECDOTE TOLD BY A YORKSHIRE OFFICER.

This German Dugout Was Decorated With Most Luxurious Taste.

Our wounded soldiers have little to offer to the seeker after tragic gloom or infernal horror. They entered on the present situation in the spirit of good sportsmen. From their point of view the guild is a "Great do," "A good a show as ever I saw." "Some shindy, I can tell you," "Hot stuff," or "A little bit of all right."

Take the case of a second lieutenant in a Yorkshire battalion, who before the war gave his days to office work and his leisure to outdoor sports and amusements. He landed at Southampton as a stretcher case, by reason of the sharpnel wound in his right thigh. This is how he sees his own particular bit of it:

"There's no doubt it's a great show. There's bound to be ups and downs, of course, and in some of the Boche regiments there's a good deal of nap left. But, on the whole, I think we've got 'em now; I don't fancy they'll ever get the upper hand again. I don't want to brag about our chaps, but they are immeasurably superior to any Sauerkrauter. They're real sportsmen. You can't make them throw their hands up and cry 'mercy!'—they really don't know how it's done.

The Rest Went On.

"It was as we climbed out over their parados, making for their second line, that I got my leg punctured. But it didn't hurt a bit, and I went right on. Our chaps were in whooping fine form. And then, only a few yards further, came that confounded sharp that messed up my thigh, killed my second sergeant, and wounded two or three more. My platoon sergeant wanted to stay with me, but of course I wouldn't have that. What he really wanted was to get on. 'You get on, an' give 'em hell!' I told him, and on he went with the platoon.

"I was in a bit of a small shell hole. However, after a bit I wriggled back to that Boche front line and crossed it into a shallow sap. I was resting there when, if you'll believe me, I saw a Boche officer come climbing cautiously up out of a big dug-out we'd put six bombs in. He was a captain. He had a bomb in one hand and a rifle and bayonet in the other; and he was peering first one way and then the other, like a burglar 'Oh, you beauty!' I thought. And just then he snuggled down against a gap in their parados (back wall of a trench) near the dug-out and bedded his rifle comfortably for firing at our chaps in his second line.

Four Officers Sniped.

"You can bet I was glad I had my rifle and plenty of ammunition. I believe in the good old service rifle. Never did bother with revolvers and things. So I got a beautiful bead on this chap, and a second later he was—I wonder where dead Boches go!

"I charged my breech again, and no sooner done that than my next target broke up—a lieutenant. I put him while he was looking at his captain; I aimed for his shoulder blades, but the old gun kicked a bit and I got him through the head. Seemed I might as well be in a grouse butt, and nothing less than officers for targets, mind you. Well, to cut it short, two more lieutenants came up from that same dug-out, making in all three lieutenants and one captain, and I got 'em all.

"And when a private came up, with never a weapon of any sort in his hand, and the fear of God in his white face, 'You're a Boche,' I thought, 'probably a batman secretly, but certainly a Boche; and you ought to be shot, but you've got nothing in your silly hands.' It was too much like a sitting bird, you know. Couldn't manage it. 'Here!' I shouted at him. And do you know, he fell just as if I'd shot him.

"I tried hard to remember some German. Well, I managed to clamber back to that trench and spoke the Boche with the butt of my rifle till he found himself a little and stood up. I meant to see that blessed dug-out. Perhaps they've got their blooming general staff there, I thought.

"Diener Dugout"

"I had to get the Boche's help, but couldn't think how to tell him in German what I wanted. Finally I made him understand. 'Look here, Boshy,' I said, 'ich ville sehen dieser blooming dug-out. Got that?' Then I said, 'Donnerwetter!' and grinned at him to show there was no ill-feeling, and he managed to make connection.

"That dug-out was a bit knocked about, you know, by our six bombs. But right at the back of the lowest corner there was a sharp twist to the right and a door with broken glass panels, taken from a farm-house by the look of it. Through that we went along a passage, turned to the left, down four steps, and into a regular boudoir. Dug-out! Why, there was a Turkey carpet on the floor and beautiful tapestry curtains to the bunks. Never saw anything like it.

"There were three cases of beer; very good stuff too. I had a bottle myself right away. There were about a hundred eggs, two cut hams, pate de foie gras in little jars, sausages, several boxes of cigars, a case of champagne, a gramophone, and lashins of cakes and chocolate. There were an electric bell, a smart typewriter, and in one of the bunks I found a lot of ribbons and things from ladies' dresses and a pair of ladies' gloves.

Pick-a-Back on the Hun.

"I took a despatch case and all the loose papers on the table, and got the batman to help me back again to daylight. There wasn't a living soul to be found in the trench, so I got the batman to take me pick-a-back and carry the despatch case while I stuck to my rifle.

"He made quite a good job of carrying me till we got close to the old sap we used to call 'Rimmell's' because of the high ascent, on our own front. And there he got a chance bullet through his left knee—rather a narrow shave for my own leg—and simply crumpled up like paper. He wasn't really meant for war, that batman.

"I'd a lot of trouble dragging him into our lines, my thigh being rather nasty just then. But I got him into cover at last, though by that time he had another bullet in his shoulder, and weeping from sheer funk. Then one of our own bearers got us, and I was all right, and so was the batman."

BONE THERMOMETERS.

Going Out of Style—Only a Fraud, Anyway.

It is a fortunate thing that bone barometers are going out of style. The people who always felt everything in their bones were forever feeling many aches that nobody wanted them to feel. It never rained on a holiday, the washerwoman never failed to come, the bugs never ate the roses, company never appeared unexpectedly, nothing unpleasant ever happened without the person who had bones declaring that she had known it all the time; that she had felt it in her bones.

If the bone barometers could have been trained to predict sunshine and good crops they would have been very good things to have and would never have gone out of style, but a bone barometer was always failing. And at last it has fallen almost out of sight.

Of course, bone barometers were frauds anyway. They never predicted anything except in the vaguest manner until it had happened and nobody cared what they had to say about it then, or at least if anybody did care, it was too late to do anything but care. Grandmothers, as pleasant and useful as they were in other ways, were often the most determined of bone barometers. Anybody who remembers a day when there was going to be a picnic and it rained will remember that grandmother said that she had told you so, although, as a matter of fact, she had been busy making cookies and frying chicken the whole day before with never a word about rain.

It was a source of wonder and interest that grandmother should have known that there was going to be a cyclone or a flood or an earthquake to some far-off locality, but the fact that she knew it was going to rain and spoil the picnic and never said a word about it till afterward was enough to make one lose faith in the prophecies of her bones, and may account for the fact that they are going out of style just as grandmothers are in so many other ways.

Of course, it was not always grandmothers. There were many bone barometers among the loafers that used to hang around the store in the village grocery store over the register in the city corner drugstore. And the things they felt in their bones were enough to make the world rheumatic, with all the scandals, the misfortunes, the wars and the crop failures. It is not, you see, so much the things themselves that matter as it is the way we feel about them, and there is no sense at all in feeling things in your bones before they happen and then feeling them in other places after they happen.

LOYAL TO BRITISH RULE

Natives Grateful for Defeat of the Mad Mullah.

A letter has been received by the Anti-Slavery and Aborigines Protection Society in London from native headmen at Aden, expressing appreciation of the assistance of a British naval force in repelling a recent hostile attack by the Mad Mullah.

When the Mad Mullah had captured Bercorey and was about to kill off the inhabitants timely help came from a British ship. In the words of the headmen:

"The continuance of fire was most effective and so terrific that the brute Mad Mullah had to run away from his fortified position, and we believe he will no more try to come back to the place.

"Surely we have found in the commander a saviour of our place and people. May God give him long life and prosperity to enhance such heroic works."

GIVE SHIELDS TO SOLDIERS

VERY THIN STEEL WILL STOP A POINT-BLANK BULLET.

Sir Conan Doyle Argues That Attack Should Be Put on Level With Defence.

Sir Arthur Conan Doyle, the famous English author, writes the following letter to the London Times:

To the Editor of the Times:

Sir,—It is a year now since you were good enough to allow me to express some views about body armor in your columns. Since then, so far as I know, nothing has been done, but now we have got so far that the Minister of War admits that something of the kind may some day come along. To me it seems the most important question of any, and I earnestly hope that you will use your influence to keep it before the notice of the authorities.

Upon July 1 several of our divisions were stopped by machine-gun fire. Their losses were exceedingly heavy, but hardly any of them were from high explosives. The distance to traverse was only about 250 yards. The problem, therefore, is to render a body of men reasonably immune to bullets fired at that range. The German first-line trenches were thinly held, so that once across the open our infantry would have had no difficulty whatever.

Like That of a Roman Soldier.

Now, sir, I venture to say that if three intelligent metal-workers were put together in consultation they would in a few days produce a shield which would take the greater part of these men safely across. We have definite facts to go upon. A shield of steel of 7-16 of an inch will stop a point-blank bullet. Far more will it stop one which strikes it obliquely. Suppose such a shield fashioned like that of a Roman soldier, 2 feet broad and 3 feet deep. Admittedly it is heavy—call over 20 lbs. in weight. What then? The man has not far to go, and he has the whole day before him. A mile in a day is good progress as modern battles go. What does it matter, then, if he carries a heavy shield to cover him?

Suppose that the first line of stormers carried such shields. Their only other armament, besides their helmets, should be a bag of bombs. With these they clear up the machine guns. The second wave of attack with rifles and possibly without shields, then comes along, while the heavily armed infantry, after a rest, advance upon the next one. Men would, of course, be hit about the legs and arms, and high explosives would claim their victims, but I venture to say that we should not again see British divisions held up by machine guns and shrapnel.

Why Can It Not Be Tried At Once?

Nothing elaborate is needed. Only so many sheets of steel cut to size and furnished with a double thong for arm-grip. Shields are evidently better than body armor, since they can be turned in any direction as form a screen for a sniper or for a wounded man.

The present private contrivances seem inadequate, and I can well understand that those who could afford them would shrink from using a protection which their comrades did not possess. Yet I have seen letters in which men have declared that they owed their lives to these primitive shields. Let the experiment be made of arming a whole battalion with proper ones—and, above all, let it be done at once. Then at last the attack will be on a level with the defence.

Yours faithfully,

ARTHUR CONAN DOYLE.

BRITAIN LEADS AS BUILDER.

Constructs More Merchantmen Than Any Other Nation.

Great Britain, although hampered by the drain of war and a big naval construction programme, still leads the world in building merchantmen, according to a statement issued by the United States Bureau of Navigation at Washington, D.C. Her shipyards have under actual construction now 423 steel merchant ships of 1,423,335 tonnage, and would have more but for the fact that private yards are engaged in building war vessels.

The entire world in 1915 launched 743 merchant ships of 1,201,638 tonnage. Of these, eighty-four, of 177,460 tonnage, were launched in the United States.

WHAT JAPAN IS DOING IN THE WAR

CLOTHE AND ARM RUSSIAN SOLDIERS.

Military Observer Astonished to Find What She Is Doing for Czar's Soldiers.

The extent to which Japan is clothing, shoeing, arming and munitioning the Russian army was forcibly presented to a military observer who has just returned to Paris from a trip along the Russian front.

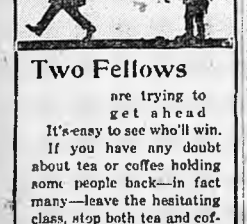
"I was astonished," he said, "to find great numbers of Russian soldiers clothed from head to foot in uniforms made in Japan, not only the tunic and trousers, but even the leggings. They carried on their shoulders Japanese guns. Their cartridge belts were filled with cartridges made in Japan. Their leather belts and buckles were from Japan. And the stout hob-nailed shoes they wear are from hides gathered in Korea and made into shoes in Japan. So that, there you see a Russian soldier in Japanese clothes, Japanese shoes, with Japanese gun, Japanese ammunition and Japanese accoutrement.

Korea Aids With Hides.

"It is strange," he went on, "that Russia went to war with Japan over Korea, and now Korea, the source of all the trouble, is supplying Russia with the shoes in which her soldiers are marching to victory. Korea is a great grazing country and is proving a vast reservoir of raw hides which the Japanese are rapidly turning into boots, shoes, saddles, and leather furnishings.

"How did these supplies get from Japan to the Russian front?" the observer was asked.

"It was noted," said he, "that about the only vital point where the Germans had not been able to send their submarines was in the waters of the East China Sea, the Straits of Korea and the Sea of Japan. These are the waters separating Japan from Russia and the Asiatic mainland, and the routes over them, commercial and military, are open and without menace."



All Sorts of Arms Supplied.

"What sort of arms and munition is Russia getting from Japan?" was asked.

"All sorts," was the reply, "from the service rifle and small field pieces up to the big 12-inch guns. The Japanese 12-inch is a terrible weapon, and they are content not to make any of the 14-inch and 16-inch guns, as they consider, from a military standpoint, that the immobility of the monster gun offsets its advantages, where the 12-inch is a mobile gun and very deadly."

"It is said that French and Japanese officers are now furnishing the expert direction of the Russian artillery fire, which has made it so effective. Did you see any of these officers?" was asked.

"No, and the report is not correct," said the observer. "The Russian artillery officers are directing their own fire and are getting splendid results. The only Japanese and French officers are those temporarily assigned to explain the workings of a new piece, just as an expert is sent along to explain any complicated piece of machinery. Japanese experts accompanied the big 12-inch Japanese guns, not to manoeuver them in action, but to explain how it was to be manoeuvred. That is the extent of their help, and the Russians should get full credit for what they have accomplished in operating their artillery. No, the Japanese have done remarkably in arming, clothing and munitioning the Russians, but they have not had a chance to do the fighting."

Two Fellows

are trying to get ahead

It's easy to see who'll win.

If you have any doubt about tea or coffee holding some people back—in fact many—leave the hesitating class, stop both tea and coffee ten days, and use

POSTUM

This delicious pure food-drink, made of wheat, roasted with a bit of wholesome molasses, has a delightful, snappy flavor. It is free from the drugs in tea and coffee and all harmful ingredients.

Postum is good for old and young, and makes for health and efficiency.

PALE, WEAK GIRLS.

Grow Into Weak, Despondent Women—How to Overcome the Trouble.

Healthy Girlhood is the only path to healthy womanhood. The passing from girlhood to womanhood lays a new tax upon the blood. It is the overtaxing of the blood that makes growing girls suffer from headaches and backaches, from paleness and weakness and weariness, from languor, despondency and constant ill health. Unhealthy girlhood is bound to lead to unhealthy womanhood and a life of misery. Nothing but the blood building qualities of Dr. Williams' Pink Pills can save a girl when she undertakes the trials and tasks of womanhood. That is the time when nature makes new demands upon the blood supply. Dr. Williams' Pink Pills actually make new, rich blood to meet these demands. In this simple, scientific way Dr. Williams' Pink Pills give growing girls new health, and makes their dawning womanhood bright and attractive. Miss A. Sternberg, Haileybury Road, New Liskeard, Ont., says: "I had been for some years troubled with a weak heart and was very pale and weak. I had no appetite and was always tired. I had taken medicine from the doctor who was called in said that mine was a bad case of anaemia. I lost flesh, always felt tired, and I got so nervous that I could scarcely hold a cup to take a drink. My heart would flutter alarmingly. The doctor did not seem to be able to help me at all and my family and friends all thought that I was in a decline and could not recover. I was in bed for some two weeks when an aunt came to see me and urged that I try Dr. Williams Pink Pills. My father got a supply, and by the time I had taken three boxes there was a noticeable improvement, and from that on I steadily progressed toward recovery. I continued using the pills for some time longer, and they restored me to my old time health and strength. I shall never cease to praise this medicine, and to urge all weak run down girls to give it a fair trial, as I have proved in my own case their great merit."

You can get these pills from any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

A JEWISH ARMY CORPS.

British Plan Inducement to Hebrews to Enlist.

A middle way has been found toward the solution of the problem of what to do with the many thousands of Russian and Polish Jews living in Great Britain who have escaped military service in the Czar's army and do not come under British conscription laws. In London, Manchester, Liverpool and other big cities are huge colonies of these exiles, a large proportion of them being of military age, who naturally have come to be regarded with no favorable eye by their English neighbors whose methods are engaged in war work.

After some agitation the Government proposed to enact a law by which Russian Jews of military age should be forced to enlist in the British army under threat of being sent back to Russia, where they would be liable to heavy penalties as defaulters from military service. This project aroused a storm of disapproval, though ably defended by Home Secretary Samuel, himself a Jew. The basic fact upon which the opposition rested was that England had always harbored political refugees, and a large number of the exiles in question came under that broad classification.

Mr. Samuel, while not withdrawing his original proposal, has now bit on a compromise. Reason and persuasion, as the Manchester Guardian puts it, are to be substituted for threats and force. A responsible leadership of the Russian Jews, Samuel announces, has been formed, which will conduct an active recruiting campaign in London and other centres, and definite inducements will be held out to the Jews to voluntarily enlist.

Almost all of them are aliens and the high naturalization fee of £5 ($25) plus law fees is as a rule quite beyond their resources. Mr. Samuel proposes that any one who enlists before September 30 shall, after three months' service, have his fee remitted if he desires to be naturalized.

Another part of Mr. Samuel's new proposals is even more interesting. This is the idea of forming a special Jewish Corps. This has already been done in a limited way with the Zion Corps. Something of the same sort also has been done in France.

Every woman thinks she is a prima donna when it comes to putting a baby to sleep.

FLIERS HAVE TIME TO WATCH SHELLS

UP AMONG THE CLOUDS IN AN AEROPLANE.

"Sail for Hours Without Putting a Hand on the Lever," Says One.

The hardest part about flying in war is the thinking that a flying man has to do. Here's the idea in an English flying man's own words:

"There isn't enough to keep a man's mind busy in the air since the war has developed the aeroplane. In the old days of the aeroplane there were so many things a flying man had to watch that he didn't have time to worry about what might happen to him. But in these days sitting in your machine is about like sitting on a log and waiting for something to happen.

"We don't have to use our hands as we used to. There is only one lever, and you don't have to watch that very closely. You can fly for hours without having your hand on it. You can write or read or smoke, and unless you touch the lever to change its position you will fly along at the same level indefinitely owing to the self stabilization of the machine.

Look Down; Watch Shells.

"So, with your attention only mildly occupied, you keep looking down over the edge to see what's happening. You get to watching the wires and wondering what would happen if a bullet cut one of them. You look at the frail affirons and consider how frail they really are. Sharpnel is breaking below you and around you, perhaps. There's no use of trying to dodge it, for by doing so you may only run into it.

"So there you sit imagining all sorts of horrible possibilities. You've been told to go to a certain place and then return. Your route is all laid out for you and your duties are so simple and easy that while you're performing them you have a thousand times too much spare time for thought and worry. As for myself, I'd much rather have the aeroplane a less simple affair, just to have my attention occupied. An imagination is a curse to a flier."

And then there's the problem of the whirling compass. An airman dived into a cloud; suddenly the finger of his compass began to whirl around like a clock gone mad. Scientists say it doesn't whirl, but so many English airmen have had the experience that even the scientific men are wondering whether the phenomenon isn't worth studying.

The Whirling Compass.

Here's a flying man's side of it:

"My compass finger has whirled like a top when I have gone into a cloud. It's enough to turn you demented. It's bad enough, goodness knows, to be lost in a cloud, but to have your compass go back on you at the same time is too much. Our scientific instructors tell us that the compass doesn't change, but that we lose our heads when we get into the mist and change our courses without realizing it, so that the compass indicator changes naturally.

"But in some clouds your compass doesn't change. It remains as steady as it was in the sunshine. Why should a flier jiggle his course unknowingly in one cloud and not in another? My opinion is that there are certain kinds of clouds that are charged with electricity. In such clouds your compass goes crazy. In other words, where electricity is not present your compass behaves itself."

How High the Clouds?

How far are the clouds above the earth?

As high above as we wish to climb. But the chief question with a flying man is how low the clouds are. A certain English flier told the correspondent something about low clouds.

"You may be walking along the street on a heavy day, and, looking up, may think that the clouds are miles high. As a matter of fact they may be only 200 or 300 feet above you. That's the kind of a day that the airman dreads. I've been lost in a cloud in France and come down out of it only to find myself flying around among the church steeples of a French town, with good chances of killing myself.

"In a cloud you can never tell whether you're over the enemy's lines. You may come right down onto his trenches before you know it. Clouds, the low kinds, are the most deadly things we have to fear."

FLEXIBLE SOLES OF WOOD.

Hungarian Inventor Has Solved a Difficult Problem.

Barna S. Kohlener, a Hungarian captain of cavalry, whose military usefulness was ended when he lost an arm, has devoted himself since his incapacitation to inventing a wooden-soled shoe that shall have the virtue of flexibility, and announces that he has solved the problem, the hardest that has confronted wooden-soled shoe enthusiasts.

His invention is a sole that, instead of being made of one solid piece of wood, is constructed of a number of layers joined together by heavy oils or fats that thicken and grip the pieces of wood together. After countless experiments Capt. Kohlener declares that wooden soles constructed in this manner have the elasticity of leather soles, and, in addition, can be made of old and worn material worked over.

Old age commands respect except in jest and poultry.

The Right Word.

"Ma husband's very po'ly, ma'am. He's got dat exclamatory rheumatism."

"You mean inflammatory, Martha. Exclamatory is from exclaim, which means to cry out."

"Yes, ma'am, dat's what it is. He hollers if anyone goes near him."

Minard's Liniment Cures Deafness.

Instructions Obeyed.

"Why, Freddie!" exclaimed the mother of a precocious five-year-old, "Aren't you ashamed to call auntie stupid? Go at once and tell her you are very sorry."

"Auntie," said the little fellow, a few moments later, "I'm awful sorry you are so stupid."

Minard's Liniment Co., Limited.

Dear Sirs,—I had a Bleeding Tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINIMENT, and after using several bottles it made a complete cure, and it healed all up and disappeared altogether.

DAVID HENDERSON.

Belleisle Station, Kings Co., N.B., Sept. 17, 1904.

Not to be Fooled Twice.

Judge (interrupting long-winded lawyer)—Can't you take it for granted that I understand an ordinary point of law?

Lawyer (coolly)—Your Honor that's the mistake I made in the lower court, where I lost my case.

Minard's Liniment for sale everywhere.

Why She Objected.

"I hear that Florrie has broken off her engagement with you, old chap," said one man to another.

"Yes," replied the second.

"I say, I'm awfully sorry to hear it. Whatever did she do it for?"

"Just because I stole a kiss," said the disconsolate one, sadly.

"Great Scott!" exclaimed his friend. "Surely she must be crazy if she objects to her fiance stealing a kiss from her."

The abandoned one sighed deeply. "But that's just the trouble," he said. "I didn't steal it from her!"

Complete.

"Do you mean to say you only paid $50 for that frock?"

"Yes; but that, of course, was without the trimmings."

"How much were the trimmings?"

"A hundred and fifty."

TRENCH ALONG SEA LINE.

Germans Have Formidable Defences on Belgian Coast.

A correspondent who has just been permitted to visit the Belgian coast reports on the formidable defences that have been raised there. A long line of barbed wire entanglement stretches along the coast, and an endless series of long slender ships' guns protrude from the coarse grass of the dunes, and behind the dunes crouch the heavy howitzers.

Underground dwellings of bomb-proof concrete form part of the great trench along the entire coast, he says. "No spot is unguarded. Everywhere the endless line is occupied by sailors.

"Here and there one comes across an enormous unexploded shell, buried ashore by one of the big British warships, and which now forms the ornamental centre of a flower garden.

"What one sees in the way of destruction is the work of the fast torpedo destroyers, which have on occasion hailed smaller shells on the guns. The corners of houses are gnawed away; here and there a gable exhibits great holes. But the damage is not very bad, at least not in Ostend and Zeebrugge; much less than one would have supposed. Even on the seaside the towns appear to be little damaged. The big bath hotel at Ostend is untouched, and the great glass Kurhaus shows no breakage in its innumerable panes.

"The real work of destruction begins where the French land guns have been able to have their say. Middelkerke is a mass of ruins. It is a remarkable fact that 600 people continue to crouch there. The school is even still attended by 80 children. But every house has its underground refuge, such as the soldiers construct in the front lines.

"Middelkerke is now in such a state that the Germans no longer take up quarters there, but prefer to live in dwelling-holes borrowed in the dunes."

THE POPULAR LAURENTIANS.

A Holiday Resort of Unsurpassing Beauty.

Lovers of beautiful mountain and valley scenery, towering rocks, thick forests, pleasant glades, flower-clad vales and plains, rushing and placid rivers, roaring waterfalls and babbling streams could not do better than to select the Laurentian Mountains reached by the Canadian Pacific, as their holiday resort. So prettily situated are all the spots where the holiday-makers make their headquarters that it is embarrassing to choose the one that might be best suited to the taste of the individual. But all are enchanting, from Shawbridge—the first of them—to Mount Laurier—the last. Within easy reach of any of the resorts there is excellent trout and bass fishing to be had. The rivers and lakes are clear and sand-bottomed generally, and are well suited to the requirements of the swimmer and bather. Row boating, motor boating, and canoeing are favorite pastimes, and on a fine calm evening it is exhilarating to sit by the waters and listen to the laughter and merry chat of the parties who are on the waters. Golfing can be had at Ste. Agathe, Ste. Margaret and Val Morin. Tennis courts are attached to some of the better class hotels. Those who love mountain climbing can have a variety of spheres for this form of activity to select from and the expense of a holiday in the Laurentians is comparatively small.

The Paisley Advocate

PAISLEY, SEPT. 13th, 1916

LOCAL AND DISTRICT NEWS

Lady Bank Clerk

The first lady employee to grace the office of a bank in Paisley is Miss Victoria Rose, who is the latest addition to the staff of the Standard Bank.

Annual Meeting of the Women's Patriotic League

The annual meeting of Paisley Women's Patriotic League will be held in Putnam's hall on Monday, Sept 18th, at 3 30 p m. Officers will be elected and other business transacted. A full attendance is requested.

Mission Conference

A meeting of delegates from the Walkerton District was held in the Methodist church, Paisley, on Tuesday afternoon to hear an address by Rev Mr Endicott, mission secretary of the denomination. A similar meeting for Wiarton district was held in Mount Hope church on Wednesday.

Seymour—Scantlebury

Mr and Mrs C B Scantlebury, of Belleville, announce the marriage of their daughter, Evelyn Elmina to Mr Edgar Orchard Seymour, son of Mrs (Rev) J C Seymour, formerly of Paisley, on Sept 6th. The wedding took place at the residence of the bride's parents.

Death of Former Elderslie Girl

Mrs Jas Allison, who died at Walhalla, N D, on Aug 5th, was born in Elderslie about 53 years ago. She was a daughter of Mr and Mrs Thos Fleming. The family went to Dakota in 1883. The deceased was married in 1914. Those left to mourn her decease besides her husband are her aged father, three brothers—George, of Calvin, N D; William, Regina, Sask; and John, of Walhalla, Sask; and an only sister, Mrs D Gibson, of Tyner, N D. The sympathy of a great many friends in Bruce county goes out to the bereaved ones.

Home From New Brunswick

Mr. and Mrs. Neil Cameron, of St. John's, New Brunswick, are here on a visit at the home of his mother, Queen St north. Mr Cameron was provincial secretary of the Retailers' Assoc'n, but is now publisher and proprietor of the Maritime Grocer. This bright new trade journal has already a very wide circulation, and enjoys a liberal support from advertisers, so is a lusty business proposition. Mr Cameron gave us a fraternal call while in town when he reminded us that it was as local correspondent to THE ADVOCATE from 10th and 12th Bruce that he took his initiatory step in journalism, and through the experience thus gained he became encouraged to greater literary efforts.

Suit for Damages

Division Court was held here on Friday last with Junior Judge Gregg presiding. From noon until about 4 o'clock p m the court was occupied with one case, an action for damages for non-fulfilment of the terms of a lease. The plaintiff, Mrs A Campbell (nee Miss McInnes), who has been living in Alsike for a number of years, had rented her farm, lot 33, con 10, Bruce, to the defendant, Mr A Thornburn, for five years, and it was alleged that the latter had not carried out his agreement. The action was gained by the defendant, plaintiff to pay all costs of the action. D Robertson, K C, appeared for plaintiff, and Wm Thornburn, of Winnipeg, defended the case for his brother.

Tolton—Ledgerwood

Mr Iden Tolton, who has been down from the West for the past few weeks on a visit to his parents, Mr and Mrs Arch Tolton here, left quietly on Wednesday morning for Toronto armed with a marriage license and fully resolved to play the leading role in a ceremony festered with orange blossoms and followed by confetti and congratulations. The lady who carried the bridal roses and answered in the affirmative was Miss Ella Ledgerwood, daughter of the late Alexander Ledgerwood of Eden Grove, and one of Toronto's most popular young milliners. The happy couple, after the tying of the connubial knot on Wednesday, left to reside in Portage la Prairie, where the groom holds the position of manager of the grocery department of the big general store of Brown Bros., Limited. The many friends of the young couple wish them success in their new sphere.—Herald and Times.

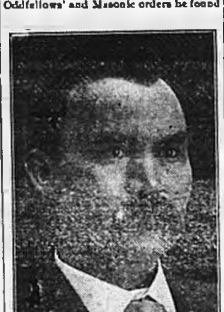
Death of R. B. Grant, V.S.

Was a Leading Citizen. Had Been a School Trustee, Councillor and Reeve

President of Agricultural Society

Prominent in Oddfellows and Masonic Lodges

On Methodist Church Board



The illness of R B Grant, V S, which was mentioned in our last issue as very critical, proved fatal, the patient breathing his last on Thursday afternoon.

By his death the village of Paisley has lost one of its most prominent citizens, who for thirty-one years had taken an active interest in the various phases of life coincident with residence in our midst during that time.

The deceased was born in Elderslie in 1865, and was a son of the late Mr and Mrs Ernest Grant, of the 14th con. In early manhood he attended Toronto Veterinary College, graduated in 1884, and the following year began practice in Paisley, which he continued most successfully to the time of his death, the farmers of the whole surrounding country becoming his clientele.

As a citizen he lent a firm and active support to one side or the other of almost any issue that arose, and because of his good judgment in public matters was rewarded with a full share of the honors. He was on the School Board for a number of years, several times in the council and then elevated to the reeveship. To the duties of each and all of those positions R B Grant applied himself with untiring energy, but nowhere, perhaps, was his executive ability employed to better advantage than in connection with our annual fair. For many years he was a director of the agricultural or horticultural society. He was president from 1904 to 1914, and the success of the fair in not only these but other years as well was due in no small measure to his efforts. With numerous other organizations at different times he pulled shoulder to shoulder with fellow citizens in promoting public interests. The Methodist church, too, of which he was long a consistent and prominent member, demanded and received his services in the Sunday School and on the board of management.

To fraternize with his fellows was an outstanding characteristic in his make-up, and after becoming connected with the Oddfellows' and Masonic orders he found

it most congenial to do his share in carrying out the tenets of these beneficent organizations. His notably retentive memory brought him to the front as an exponent of the ritualistic work of these orders. The Itinerancy of the degree team of Abirem Lodge made him widely known among the members of the I.O.O.F. in other towns and established many lasting friendships.

A staunch Conservative in politics, he was an active worker for the party's cause. In temperance and moral issues he always asserted himself on the side of right.

In his younger days "Doc" Grant naturally took a part in the field of sport. He was a strong man in the tug-o'-war events that were always on the athletic programmes then, also a reliable player on the baseball team. Later he became a devotee of curling and bowling. In whatever branch of recreation he chose to engage he was an enthusiastic and manly player, a cheerful loser and a magnanimous winner.

But however great his loss will be to the community at large, it will be in the home that his taking away will be most felt. He was married 24 years ago to Ella McClure, daughter of the late Isaac McClure and Mrs McClure, of Edmonton, but formerly of Elderslie and Paisley. The union was blessed by the birth of a family of four boys and one daughter, of whom four are living—Austin and Harry in Edmonton, May and George at home. To the bereaved wife and children the most sincere sympathy and tenderest condolence is extended from all classes of citizens of Paisley as well as the residents of surrounding country among whom the deceased was very generally and favorably known.

Brothers and sisters surviving deceased are: William, George and John W Grant, of Ebenezer; Joseph, reeve of Tara; Mrs Bryce, of Paisley, and Mrs Wm Alexander, of Greenock.

The funeral was held on Saturday afternoon, and was very largely attended. The services at the house were conducted by Rev Mr Crigdon, present pastor of the Methdist church, and two former pastors, Rev R A Facey, B A, of Waterdown, and Rev C W Cosens, of Walkerton. Over eighty Oddfellows marched to the cemetery and at the graveside paid their last fraternal respects to the departed brother. Rev E J McEwen was present from Wiarton, and acted as chaplain. Many of the brethren were from Tara, Underwood, Port Elgin and other towns.

RHEUMATISM WAS MOST SEVERE

Dreadful Pains All The Time Until He Took "FRUIT-A-TIVES".

MR. LAMPSON

Verona, Ont., Nov. 11th., 1915.

"I suffered for a number of years with *Rheumatism and severe Pains in Side and Back*, from strains and heavy lifting.

When I had given up hope of ever being well again, a friend recommended "Fruit-a-tives" to me and *after using the first box I felt so much better* that I continued to take them, and now I am enjoying the best of health, thanks to your remedy".

W. M. LAMPSON.

If you—who are reading this—have any Kidney or Bladder Trouble, or suffer with Rheumatism or Pain In The Back or Stomach Trouble—give "Fruit-a-tives" a fair trial. This wonderful fruit medicine will do you a world of good, as it cures when everything else fails.

50c. a box, 6 for $2.50, trial size, 25c.

At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Capt. Dug. B. McLean Reported Killed

LACKS CONFIRMATION

Signally Honored for Services at the Front

WON THE MILITARY CROSS

Capt (Dr) Dugald B McLean, a former Paisley boy is reported to have been killed in action. His name has not yet appeared in the casualty list, but information is said to have been received by his friends at Winnipeg. Capt McLean was the youngest son of the late Dugald and Mrs McLean, formerly of Burgoyne and later of Paisley. He attended Paisley public and continuation schools, and then took the medical course at Toronto University, graduating in 1914. He was on the staff of Winnipeg General Hospital as house surgeon when he enlisted in the C. A.M.C. After reaching England he was transferred to the R.A.M.C., and was serving with that corps when he met his death on the field. Dugald was 25 years of age, stalwart and strong in physique, reserved in manner, but endowed with a quiet determination that helped him meet the difficulties of life. To help pay his way through college he engaged in lumbering, and he could find during the holiday periods. By his schoolmates and companions as well as all other acquaintances he was admired and esteemed. With every prospect of a successful professional career before him, Dugald saw the need of loyalty to more than self when the call for men was being sounded through this land. Now that he has made the great and last sacrifice that man can make in behalf of country and his, his name will go down with the long list of Canadians who so heroically fought and died for world freedom in this great struggle that must continue to the bitter end.

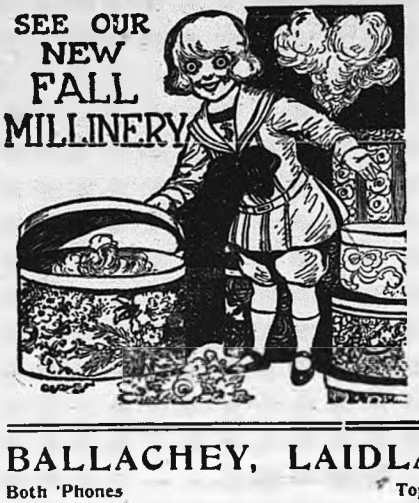
Since the foregoing was put in type THE ADVOCATE has found that the report of Capt McLean's death lacks confirmation from any authentic source, and that there is reason to believe that it is not true. So far as we can judge the Toronto papers in which it appeared received the news from informants in that city. Mr John McLean, of Burgoyne, a brother, had heard nothing of it until he was in Paisley on Friday. On Monday THE ADVOCATE received the following letter from Major Neil B McLean:

In the Field,
52nd Batt, Canadian Infantry,
B E F, France.
Aug 24, 1916

DEAR MR MCKENZIE—

I am sure it will be of interest to you and to the people of Paisley generally to learn that Dugald has been signally honored for his valuable services to the wounded in the battle of the Somme.

Dugald has been in France about 14 months now. He started as a lieutenant in the R.A.M.C. was made medical officer to the 8th East Lancashire Regiment in the fall of 1915, promoted to captain in June, 1916, was through the great push on the Somme, and has rendered such fine service that he has been awarded the military cross and will be presented to the king who will pin the decoration on him. The divisional commander recommended him also for the D.S.O., but the military cross was enough for one time. He has done fine work all along and is a great favorite with his men. His quiet manner, sincere interest in them and skill as a doctor have been of inestimable value, and as he is with his battalion in the front of the tray he is cool in the face of the greatest danger. Dugald is so modest that he would not tell anyone about his work, but I know you will be glad to get such an interesting item of news. I too, have been in the midst of things for some time, but am just going along doing my bit in this great struggle. I have not time to write you my impressions. If I had I could write a story that would prove to be of interest. But Dugald and I have offered ourselves in service for our country and are proud of the part we are playing."



As the above letter was written on Aug 24th, and the reported fatality must have occurred prior to that date, while the brother at Burgoyne has received no word from any source, his friends here are ready to believe that Capt McLean was not put out of action as reported, and may still be prosecuting his fine work in the field or resting behind the front lines.

Major Neil McLean was at the time of writing the letter, about to be transferred from the infantry (where we are sure he, too, has done good work) to the heavy artillery, where his professional ability and training as a mathematician will be of great service.

THE NEWEST REMEDY FOR Backache, Rheumatism and Dropsy.

Kidney, Bladder and Uric Acid troubles bring misery to many. When the kidneys are weak or diseased, these natural doors do not cleanse the blood sufficiently, and the poisons are carried to all parts of the body. There follow depression, aches and pains, heaviness, drowsiness, irritability, headaches, chilliness and rheumatism. In some people there are sharp pains in the back and loins, distressing bladder disorders and sometimes obstinate dropsy. The uric acid sometimes forms into gravel or kidney stones. When the uric acid affects the muscles and joints, it causes lumbago, rheumatism, gout or sciatica. This is the time to try "Anuric." Send 10c. for trial package.

During digestion uric acid is absorbed into the system from meat eaten, and even from some vegetables. The poor kidneys get tired and backache begins. This is a good time to take "Anuric" the new discovery of Dr. Pierce for Kidney trouble and Backache. Neglected kidney trouble is responsible for many deaths, and Insurance Company examining doctors always test the water of an applicant before a policy will be issued. Have you ever set aside a bottle of water for twenty-four hours? A heavy sediment or settling sometimes indicates kidney trouble. The true nature and character of diseases, especially those of the kidneys and urinary organs, can often be determined by a careful chemical analysis and microscopical examination—this is done by expert chemists of the Medical Staff of the Invalids' Hotel. If you wish to know your condition send a sample of your water to Doctor Pierce's Invalids' Hotel, Buffalo, N. Y., and describe your symptoms. It will be carried without any expense to you, and Doctor Pierce or his Staff of Assisting Physicians will inform you truthfully.

KNOW YOURSELF!

Read all about yourself, your system, physiology, anatomy, hygiene, simple home cures, etc., in the "Common Sense Medical Adviser," a book of 1008 pages. Sent to Dr. V. M. Pierce, Buffalo, N. Y., 50 cents in one-cent stamps for a cloth-bound copy. Customs prepaid.

The eyes at forty require assistance

When you are this age, reading or near work becomes an exertion, and glasses of just enough strength to relieve all strain should be obtained. We are experts in this line. We examine eyes free of charge and guarantee satisfaction.

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain last and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

MITCHELL—WRIGHT

From St Thomas Times: The prettiest event of the season, and one which will remain fresh in the memory of those connected with it for years to come, took place at First Methodist church, St Thomas, on Wednesday afternoon at 3.30 o'clock when Miss Irene Leonra Wright, only daughter of ex-Mayor and Mrs Fred Wright, 67 Metcalfe street, city, was united in the holy bonds of matrimony to Rev George C Mitchell, pastor of the Presbyterian church at Roslin, Ont. The officiating clergyman was the pastor of the church, Rev W H Hervey. The groomsman was Rev A M Stuart of Amherstburg, cousin of the bride, while Miss Elizabeth Wright, another cousin of the bride, of London, acted as bridesmaid. Little Amy Smith, 16 Isabel street, made a pretty ring bearer. The ushers were Mr Charles Gundy and Mr Ross Kearns. The wedding march was rendered by Mr Stanley Oliver, organist of the First Methodist church. During the ceremony Miss Mary Auld of Essex sang very sweetly "Love's Coronation." After the wedding ceremony at the church the party returned to the home of the bride where a reception was held and sumptuous banquet partaken of by seventy five guests. During the reception a pleasing feature was the beautiful harp selections rendered by Miss Cora Price. The happy couple were the recipients of numerous and costly gifts, among them notably being a handsome silver candle stick the gift of the inmates of the Thomas Williams Home, Miss Wright having been a frequent visitor and energetic worker in connection with that institution. The gift was accompanied by an address. There were also other cut glass, Crown Derby, silver and china articles, also a number of substantial cheques from St Thomas, Montreal and Fowlerville, Michigan. The groom's gift to the bride was a sunburst of pearls, to the bridesmaid a gold bar pin of pearls, to the groomsman a pearl stick pin, the soloist a set of sterling silver beauty pins, and to the ring bearer a basket of flowers. After the reception the bride and groom left for their home at Roslin, Ontario. Among the guests present were the following: Mr and Mrs Mitchell, Paisley; Pte W R Mitchell, Lordoo; Miss Hazel Oke, of Toronto, Miss Mary Auld, Essex; Mr and Mrs Wright, London; Mr and Mrs Graham, London; Mr and Mrs Ridall, London; the Misses Mamie and Lottie Ulton, Hagersville, Ont; Mrs Lulu Hodgins, Detroit, and Rev A M Stuart, B A, of Amherstburg.

Subscriptions for — YIELDING PRACTICALLY 5.35 %

WAR LOAN
DOMINION OF CANADA

As with the previous Loan, we predict a great success for this issue. During this period of stress our Government needs our help and counts upon our patriotism. But a chance is given investors of placing their money in securities of the highest grade, upon terms the liberality of which will, perhaps, not be fully realised until the return of normal times.

If this Loan were issued to yield 4½%, instead of about 5.35 %, the price would be 105.41, instead of 97.50. A 4% yield (the basis on which Dominion Government bonds sold so recently as 1914) would mean a price of 111 for the present issue.

We will forward your application, procure your allotment and render other services free of charge to you.

To ensure allotment application should be made at once

Street address (or P.O. Box) .....

Place ..... Province .....

WAR LOAN

DOMINION OF CANADA

Issue of $100,000,000 5% Bonds Maturing 1st October, 1931.

PAYABLE AT PAR AT

OTTAWA, HALIFAX, ST. JOHN, CHARLOTTETOWN, MONTREAL, TORONTO, WINNIPEG, REGINA, CALGARY, VICTORIA.

INTEREST PAYABLE HALF-YEARLY, 1st APRIL, 1st OCTOBER.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

ISSUE PRICE 97½

A FULL HALF-YEAR'S INTEREST WILL BE PAID ON 1st APRIL, 1917.

THE PROCEEDS OF THE LOAN WILL BE USED FOR WAR PURPOSES ONLY.

THE MINISTER OF FINANCE offers herewith, on behalf of the Government, the above named Bonds for subscription at 97½, payable as follows:—

10 per cent on application;
30 " " 16th October, 1916;
30 " " 15th November, 1916;
27½ " " 15th December, 1916.

The total allotment of bonds of this issue will be limited to one hundred million dollars exclusive of the amount (if any) paid for by the surrender of bonds as the equivalent of cash under the terms of the War Loan prospectus of 22nd November, 1915.

The instalments may be paid in full on the 16th day of October, 1916, or on any instalment due date thereafter, under discount at the rate of four per cent per annum. All payments are to be made to a chartered bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture and the allotment to cancellation.

Subscriptions, accompanied by a deposit of ten per cent of the amount subscribed, must be forwarded through the medium of a chartered bank. Any branch in Canada of any chartered bank will receive subscriptions and issue provisional receipts.

This loan is authorized under Act of the Parliament of Canada, and both principal and interest will be a charge upon the Consolidated Revenue Fund.

Forms of application may be obtained from any branch in Canada of any chartered bank and at the office of any Assistant Receiver General in Canada.

Subscriptions must be for even hundreds of dollars.

In case of partial allotments the surplus deposit will be applied towards payment of the amount due on the October instalment.

Scrip certificates, non-negotiable or payable to bearer in accordance with the choice of the applicant for registered or bearer bonds, will be issued, after allotment, in exchange for the provisional receipts.

When the scrip certificates have been paid in full and payment endorsed thereon by the bank receiving the money, they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer or registered as to principal, or for fully registered bonds, when prepared, without coupons, in accordance with the application.

Delivery of scrip certificates and of bonds will be made through the chartered banks.

The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The bonds with coupons will be issued in denominations of $100, $500, $1,000. Fully registered bonds without coupons will be issued in denominations of $1,000, $5,000 or any authorized multiple of $5,000.

The bonds will be paid at maturity at par at the office of the Minister of Finance and Receiver General at Ottawa, or at the office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary, or Victoria.

The interest on the fully registered bonds will be paid by cheque, which will be remitted by post. Interest on bonds with coupons will be paid on surrender of coupons. Both cheques and coupons will be payable free of exchange at any branch in Canada of any chartered bank.

Subject to the payment of twenty-five cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds of the denomination of $1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons at any time on application to the Minister of Finance.

The books of the loan will be kept at the Department of Finance, Ottawa.

Application will be made in due course for the listing of the issue on the Montreal and Toronto Stock Exchanges.

Recognized bond and stock brokers will be allowed a commission of one-quarter of one per cent on allotments made in respect of applications bearing their stamp, provided, however, that no commission will be allowed in respect of the amount of any allotment paid for by the surrender of bonds issued under the War Loan prospectus of 22nd November, 1915. No commission will be allowed in respect of applications on forms which have not been printed by the King's Printer.

Subscription Lists will close on or before 23rd September, 1916.

DEPARTMENT OF FINANCE, OTTAWA, September 12th, 1916.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER V.—(Cont'd).

"Yes," said Ethel. "I presume you, by your question, are going?"

"Yes," said Bertie Fairfax, "I am glad to say."

Five minutes before he had sworn to Mr. Leicester Dodson that he would not go to my Lady Darefield's ball for five hundred pounds, and five hundred pounds were of some consequence to Mr. Bertie Fairfax.

"It is very hot for balls, but one must do his duty. I hope I may be able to persuade you to give me a dance?"

"I don't know," said Ethel, with a smile.

At that moment her horse walked on a little. Mr. Fairfax moved farther up the rail, and then conversation, no more confidential than that we have already given, continued until Lord Fitz was heard to exclaim "Good by," and then joined his sister.

Both the gentlemen on foot raised their hats, Bertie Fairfax with his cordial, pleasant smile, Leicester Dodson with his grave and also pleasant grace, and after a return of the salutations the four young people parted.

"Well," said Lord Fitz, from whose mind the recent meeting had expunged the unpleasant remembrances of his morning interview, "what do you think of them?"

Ethel was silent for a moment.

"I don't know which was the handsomer," she said, thoughtfully.

"That's just like you women, Eth; you always think of the graces first."

"Well," said Ethel, "there was no time to know anything more about them. I think Mr. Fairfax is very pleasant—he has a nice voice and such frank eyes. There are some men with whom you feel friendly in the first ten minutes; he is one of them."

"You're right," said Lord Fitz. "Bertie's the jolliest and dearest old fellow going. Poor old Bert!"

"Why poor?" said Ethel.

"Because he is poor, deuced poor," said Lord Fitz, muttering under his breath, with a sigh, "Like some more of us."

"How do you mean?" said Ethel.

"Well," said Lord Fitz, "he has to work for his living. He's a barrister or something of that sort. But he writes and draws things for books, you know. I don't quite understand. He can sing like a nightingale and tell a story better than any man I know."

"He looks very happy," said Ethel, "although he is poor."

"Happy!" said Lord Fitz. "He's always happy. He's the best company going!"

"And who is his friend? Mr. Dodson, is not his name?" asked Ethel.

"Yes ,Leicester Dodson," said Lord Fitz. "He's one of your clever men. You can't understand whether he's serious or joking sometimes, and I've often thought he was making fun of me, only——"

"Only what?" asked his sister.

"Only I didn't think he'd have the impudence," said Lord Fitz, proudly. "It isn't nice to be sneered at by a tallow chandler."

"A what?" said Ethel.

That's what his father was. A nice, old boy. Haven't you heard of 'em? They live at Pennydie, which is about nine miles from that shooting box in Herefordshire—Coombe Lodge."

"So near," said Ethel. "No, I had not heard of him. He looked to be a gentleman, but I did not notice him very much. I like his friend's face yes, I am sure I do, though both the faces were nice."

"You don't take into account Leicester Dodson's face," said Lord Fitz. "His people are immensely rich; tallow turns into gold, you know, if you only melt it long enough."

"That's a joke or a pun, Fitz," laughed Lady Ethel. "And really rather clever of you. And where does Mr. Fairfax live?"

"Oh, in chambers in the Temple—quite the clever bachelor, you know. Very snug they are, too, much more comfortable than any of the places. He gives good dinners sometimes—when he's in luck, as he calls it. Eth, you ought to have been a man, then you could have known some jolly good fellows."

"Thank you, if I were not on horseback I'd curtsey," said Ethel. "Can't I know good fellows as I am?"

"No," said simple Lord Fitz, "you can't! They won't let you; it's dangerous. You must only know men with long handles to their names like ours, and with their pockets full of money—unlike ours. You mustn't know Bertie Fairfax, for instance. The mother wouldn't allow it."

At that moment Ethel's horse started—his rider had, in reality, touched him with a spur—and got in front of Lord Fitz, so that the blush which suddenly crimsoned Ethel's beautiful face was hidden from her brother's light blue eyes.

Now, why should Lady Ethel Boisdale blush at the simple little speech of Lord Fitz? It could be of little consequence to her, surely, if her eyes were fated never to rest on Mr. Bertie Fairfax again. Why did she blush, and why, during the remainder of that park gallop, did she look forward to Lady Darefield's little ball?

"Well," said Leicester, as the two equestrians rode away and left the pedestrians looking after them, "what do you think of the Lady Ethel Boisdale? You have been wrapped in a silence unusual and remarkable for the last three minutes; unusual because on such occasions as the present you generally indulge in a rhapsody of admiration, or a deluge of candid abuse, extraordinary because silence at any time is extraordinary in you."

"Hold your tongue, you cynical fellow," exclaimed Bertie, still looking after the brother and sister. "So that is the sister of whom simple Fitz is always talking—Lady Ethel! A pretty name, and it suits her. An Ethel should be dark, or at least brown she-vowed; an Ethel should have deep, thoughtful eyes, a pleasant, rather dreamy smile, and a touch of hauteur over face, figure, and voice. She has all these——"

"And fifty more virtues, attributes, and peculiarities which your confounded imagination can endow her with! Nonsense! She's a nice-looking girl, with a sensible face, and the pride proper for her station. You can't make anything more of her."

"Can't I?" said his friend; "you can't, you mean. I call her beautiful. She is going to Lady Darefield's ball to-night; I—I shall go, after all, I think, Leicester.'

"I thought so," said Leicester Dodson, with a smile of ineffable wisdom and sagacity. "I thought somebody said they wouldn't go to the confounded ball for five hundred pounds, and that the same somebody was pitying me for having promised to grace it with my presence."

"I thought you'd die if I didn't keep you company, and so, as I like to borrow your money, and don't want you to die, I'll go. I say, Leicester, haven't the Lacklands a small place in Herefordshire near you? What do they call it—Coombe Lodge?"

"Perhaps they have," said Mr. Leicester. "I believe that there are few counties which are not honored by the Lacklands in that way. Why do you ask?"

"Oh, merely for idle curiosity."

"H'm! you promised to come and spend a week or two with me," said Mr. Leicester. "Will you come?"

"Oh, chaff away," said Bertie Fairfax, good-temperedly. "But I'll take you seriously; I will come."

"Done," said Leicester, still chaffing as his light-hearted friend called it. "I'm going down next week. Come with me?"

"Thanks," said Bertie, I'll think it over. I'll come and cut you out with the Mildmay heiress! Hah! hah!"

He laughed as Leicester turned to him with a look of mild surprise.

"You didn't know that I was posted up in that intelligence! I've a dozen little birds who bring me news night and morning, and I've heard—"

"Pshaw!" interrupted Leicester. "I've dined with mamma and papa at Mildmay Park, and that—that's positively all. My dear Bertie, I am not a marrying man; now you are, but mark me ,Lady Ethel Boisdale is not meant for you."

"Thank you," said Bertie, "I'm very much obliged, but who said that she was?"

And with a light laugh the subject was dropped.

That night when Lady Ethel Boisdale entered the magnificent saloons of Lady Darefield's mansion in Park Place she looked round the room with calm, yet expectant eyes, and dropped them very suddenly as they met the also searching and expectant gaze of Mr. Bertie Fairfax.

It is one thing to exchange glances and smiles with a belle in a ballroom, but quite another matter to get a dance with her

The saloons were crowded by the best of the land, eligible parties were in abundance and Mr. Bertie Fairfax, handsome, sweet-natured and lovable though he was found himself somewhat out in the cold.

It was not an unusual position for him, and on other occasions he had laughed good-naturedly in the smoking-room of his club, saying that there had been too many iron pitchers going down the stream for such a fragile, unsatisfactory delf affair as himself to hope for success."

But to-night it was different.

He wanted to dance with Lady Ethel Boisdale; why he could scarcely have told.

She was very beautiful; but he had seen faces far more lovely even than hers; she was very graceful, tall and full of a sweet, proud dignity, but Bertie Fairfax had seen some of the ladies of the Papal court, and remembered their faces.

She was, as it happened, just the realization of the young fellow's ideal, and—yet it must be written—he was already half in love with her.

Round her, forming a sort of bodyguard or watchdog continually hovered in majestic grace the Countess of Lackland, here mamma.

Bertie was aware that her ladyship knew all about him, and that it was utterly vain to hope that he might be allowed to fill a vacant line in the Lady Ethel's little dancing program.

He watched her dancing for some time, watched her as she spun round in two waltzes with Leicester Dodson for her partner, then the disappointed Bertie made his way out on the corridor and leaned against the balustrade, gnawing his tawny mustache and trying to make up his mind to go to his club.

Just then, as he had almost decided Leicester Dodson came out, hot and flushed, but with his usual grave reserve about his mouth and eyes.

"Ah! Bert!" he said. "Taking a cooler; you're wise in your generation. They ought to keep a weighing machine outside in the lobbies, so that a man could see how much he'd fined down after each dance. I've lost pounds since the Lancers. It's hotter than a siesta hour in Madrid. You look cool."

"I don't feel particularly hot. I haven't been dancing. I feel like the skeleton at the feast; I think I shall carry my bones to the club. Will you come?"

"I'm engaged for another turn with Lady Ethel Boisdale," said Leicester Dodson, leaning over the ballustrade and skillfully concealing a yawn.

"Lucky dog," said Bertie, enviously.

"Eh?" said Leicester. By the way, you said she'd half promised you a dance; you don't mean to say you haven't called for payment. Bert she's the best-looking woman in the room, and the most sensible——"

"Too sensible to dance with Mr. Fairfax, or her mamma has had all her training trouble for nothing," said Bertie.

(To be continued).

JERUSALEM IN WAR TIMES.

Dumping Ground for Young Germans of High Family.

To Western minds the idea of the Holy City serving as a base for modern military operations must be full of incongruities. And, as a matter of fact, it was an amazing thing to see the streets packed with khaki clad soldiers and hear the brooding silence of ancient walls shattered by the crash of steel shod army boots. Here, for the first time, I saw the German officers—quantities of them, says Alexander Aaronsohn in the Atlantic Monthly. Strangely out of place they looked, with their pink and whiteness that no amount of hot sunshine could quite burn off. They wore the regular German officer's uniform, except that the pickelhaube was replaced by a khaki sun helmet. I was struck by the youthfulness of them; many were nothing but boys, and there were weak, dissolute faces in plenty—a fact that was later explained when I heard that Palestine had been made the dumping ground for young men of high family whose parents were anxious to have them as far removed as possible from the danger zone. Fast's Hotel was the great meeting place in Jerusalem for these young bloods.

Every evening thirty or forty would foregather there to drink and talk women and strategy. I well remember the evening when one of them a slender young Prussian with no back to his head, braceletted and monocled—rose and announced in the decisive tones that go with a certain stage of intoxication:

"What we ought to do is to hand over the organization of this campaign to Thomas Cook & Sons."

Stark Realism.

Mother (entering the nursery)—Children, why do you sit about looking so solemn and unhappy? Why not play a game of some sort?

One of 'Em—We are playing. We're grown-up ladies making a call.

Wise is he who has the cage ready for the bird.

Courage is a fine asset, but its steady unless accompanied by good judgment.

Thinking too much about what must be done to-morrow prevents the doing of to-day's work.

The running track at the Canadian National Exhibition is one of the few on the continent giving a 220 yards course straight-away. Many records have been equalled or broken on Athletic Day in past years.

SOME FORGOTTEN TREASURES.

Studying Life of Ancient Egypt From Cast Away Papyrus.

It is a strange story that reads more like a romance than cold fact, how the most intimate thoughts and emotions of two thousand and more years ago lay buried in the rubbish of ancient cities to come to light in our day. Papyrus was the writing material of ancient Egypt, used in official and private correspondence, in business transactions, in legal actions. When it had served its purpose it was thrown away.

Much of it also was used to wind the embalmed bodies of the dead. Fragments of it passed westward in the early part of the last century without attracting much attention, says the Christian Herald. The scholars of those days were interested in classical lore and literary remains, and could not foresee the infinite possibilities for studying the life of a past age from its private correspondence.

Within the last decades, however, interest changed completely. Exploration parties were sent out to go over every inch of ground and gather the remains. A host of scholars set themselves the task of deciphering and interpreting the documents. But still an immense amount of material is stored away in Oxford, the British Museum, Berlin, Paris and other places.

In a group recently examined there are three letters from recruits, young men who had passed the military examination and were taken from simple home surroundings to the cosmopolitan Roman army. The first is a letter from a youth in Alexandria to his mother. He writes:

"Send me two hundred drachmæ. I have nothing any more. When brother Gemellus came I still had four hundred drachmæ. They are all gone. I bought a team of mules. Send me monthly allowance soon. When I was with you you promised to send my brother before I came to the garrison. But you sent nothing. You left me to go as I stood, nothing in the pocket. Also my father on his visit gave me not a penny. All laugh at me and say: 'Your father is a soldier himself and still he sends you nothing.' My father tells me when he gets home he will send me everything. But you sent nothing. Why? There is the mother of Valerius; she sent him a pair of abdominal bandages and a cruse of oil, a basket of meats, and two hundred drachmæ. Send quickly. I already went and borrowed from a comrade. Also brother Gemellus sent me a pair of trousers."

TITLES OFTEN DUPLICATED.

Various Lords Greys, Two Lords Morley, Two Earls of Mar, Etc.

Sir Edward Grey will probably be known by the title of Earl Grey of Falloden. The peerage is already well-stocked with peers of this name. There is, of course, Earl Grey, formerly Governor-General of Canada, who is himself Baron Grey of Howick. Neither of these must be confused with Lord Grey of Ruthyn, nor with Lord Grey of Wilton, the eldest son of the Earl of Wilton, nor with Lord Grey of Groby, eldest son of the Earl of Stamford. And all these are quite distinct from Earl de Grey, who succeeded to his father's Marquessate of Ripton in 1909.

There is really no copyright in titles. There are two Lords Morley, an Earl and Viscount. There are two Barons Montcegle, voting as such in the Lords, though one is known as the Marquess of Sligo and now Earl of Clanricarde in the Irish Peerage. Scottish Representatives Peers include the Earl of Mar and the Earl of Mar and Kellie. There are Baron Clifford and Baron de Clifford (a minor); while two other titles which are often confounded because of the spelling are Viscount Midleton and Baron Middleton and the Earls of Desart and Dysart. Lord Midleton sits as Baron Broderick in the Peerage of the United Kingdom.

Giving up smoking brings one great compensation with it—the joy of beginning again. This is not to be despised.

COMPILING THE CASUALTY LISTS.

An official British photograph taken "somewhere" along the region of the Flanders drive showing a British company lined up for roll-call in one of the advanced trenches after the gruelling battle of July 1916.

PRACTICAL FARMING

Important to Wheat Growers.

This is important to you because it means dollars to you. In a short time you will be preparing for the seeding of your fall wheat, and it is necessary to keep in mind the danger of loss from Smut. Especially last year, Smut was very general in Ontario. Grain dealers advise me that that it has meant a difference of as much as 10c. per bushel for the grain delivered at elevators, aside altogether from making some of the wheat unmarketable. This means a loss of 15 to $5 per acre, while the cost of treating to prevent smut and prevent this loss is only a few cents per acre. Be sure this year and treat your seed for smut.

The method usually adopted is as follows:—Mix one pint of formalin with 40 gallons of water, or two tablespoonfuls to one pail of water. Place the grain to be treated in a heap on clean canvas or floor. Sprinkle the formalin solution over the grain, then shovel. Repeat this until every grain is moistened by the solution; then cover the pile with sacking and leave for three or four hours. At the end of this time spread the grain out thinly to dry; shovelling it over three or four times will hasten the drying. Forty gallons of the formalin solution is sufficient to sprinkle thirty or forty bushels of grain; smaller amounts in proportion. Bags, machinery, or anything with which grain comes in contact before being put in the ground should be thoroughly treated.

Immersing the grain in a bag is sometimes practised and is equally effective.

Of course smut is not as prevalent some years as others, being influenced to some extent by weather conditions. Treatment, however, is a form of insurance. You do not expect to have your barn burned down every year because you pay the insurance every year, and it is equally important to keep up your insurance on your wheat crop. This is important at the present time, not only on your own account, but on account of the Empire, which requires the maximum supply of high quality foodstuffs. The shipping of smutty wheat not only gives this Province a bad name but reduces the price you receive for your wheat.

Further information on the subject may be secured for the asking, either from the local office of this Department in your County or from the undersigned.—Hon. Jas. S. Duff, Minister of Agriculture, Toronto.

Cost of Raising Dairy Heifers.

One of the important things for the farmer to know is the cost of the thing he produces, whether it be a crop or an animal. Profits are governed as much by the cost of production as the price for which the product sells. One of the questions often discussed is the cost of raising young stock. Several of the United States experiment Stations have taken up the question of finding out what it costs to raise a heifer calf. The question is an important one and should interest Canadian dairymen. We would also be glad to have the experience of any of our readers as to the cost of raising heifers for the dairy herd.

The Ohio station has just concluded such an investigation. The figures given are the averages of the records kept on 51 heifers—29 Jerseys and 22 Holsteins. This involves large enough numbers to merit consideration.

The items other than feed are as follows: Value at birth $5, labor $11.50, bedding $4.50, service fee $1.10 tools, etc., $1.50, shelter $4, interest and taxes $6.68, or a total of $32.80. Nine dollars is credited for manure, leaving the net cost $23.68. To this must be added the feed cost. The total cost of raising the Jersey heifers to two years of age was $78.19, and the Holsteins $81.80, the difference being due to the larger animals eating more feed. They were charged 30 cents a month for pasture the first year, and 90 cents the second. The pasture had to be supplemented with grain in order to keep the heifers growing properly.

The heifers were bred to calves at twenty-six and one-half month of age, and at calving time the cost averaged $94.39.

The high cost of heifers as brought out by these different studies, clearly shows the folly of raising inferior individuals. It costs just as much to feed a heifer sired by an inferior bull as one sired by a high class bull. The figures also show why dairymen are justified in asking good prices for well-bred dairy stock. As a dairy farmer recently stated, they cannot afford to sell really good heifers for $60 or $70. The dairymen who insist on buying only cheap stock will get only culls, and would be better off without them. They must expect to pay good prices for well-bred heifers that have been properly grown and developed.

The economical thing for the dairyman who is just getting a start, is to give the most careful attention to the feeding of his heifer calves, saving only those having the right kind of parents. Even though the cost of bringing a heifer up to calving time does seem high, it is the safest and most reliable way of adding to the herd and is cheaper in the long run than to depend on buying. Those who are just making a start must of course buy their foundation stock, and it is important that these be selected with care. A bunch of culls is not every good start in the building up of a dairy herd.

This Ohio report also shows that fall calves can be raised more cheaply than can spring calves. This should fit in well with dairying on the general farm, for there is always more time to devote to the cows and calves during the fall and winter months than during the busy season when the crops are demanding a great deal of labor.

Pure Milk For Butter-Making.

It is most essential to use only pure uncontaminated milk for the production of butter when the finished product is to be of prime quality. In a great many cases where butter has an objectionable flavor it is due to the milk employed being badly contaminated with undesirable bacteria.

Cream is ripened by bacteria, and it is only when the right species of germs predominate in the cream that it will ripen properly. The germs which produce lactic acid, and thus ripen cream, have the power of overcoming other species of bacteria unless the cream is very badly contaminated, in which case the cream-ripening organisms could not perform their functions.

Why Milk Sours.

Bacteria cause the souring of milk. Bacteria usually get into milk in dirt and the bacteria develop fast when the milk is warm. To keep the bacteria out, keep dirt out of the milk. This means care in milking and care to have the milk utensils clean. Keeping the milk cool will retard the development of the bacteria, that do get into the milk. Cans or vessels that have had milk in them should be rinsed in cool water first, as hot water hardens the albumen of the milk and makes it hard to remove.—W. C. P., North Dakota Experiment Station.

Grain for the Skim-Milk Calf.

Calves are usually fed whole milk for two to three weeks, then gradually changed to skim-milk. About the time of changing, begin to feed a little grain, but do not think that it is necessary to use oil-meal or any other high-priced feed high in protein or fat, or both. Experience at the Missouri Agricultural Experiment Station shows that a mixture of two parts corn and one part oats, by weight, gives as good results as oil-meal and ready-mixed calf-meals often purchased at much higher prices. Bran is not especially good for the young calf because it is too laxative. The grain mixture should be fed immediately after the milk, and neither should be fed too liberally, or scours may result.

STORMS HIS MOTHER'S HOME.

Son Knew Germans Had Driven His Parent From It.

The Chateau La Maisonette, France, so often named in recent bulletins on the Somme fighting, is the property of Mme. Fernet, who has lived there for many years. The property is close to Biaches and Peronne. The owner was there in August, 1914, when Von Kluck's forces passed through during their rush upon Paris. She remained in her house and for months afterward no news was heard of her. One of her sons, Victor Fernet, son-in-law of Gen. Boisdeffre, although free from military obligations, volunteered at the beginning of the war, and the hazards of war sent him recently to the Somme front, where he has shared in all the attacks made.

A letter from Germany had informed him that his mother, who had remained until a short time ago at La Maisonnette, had been sent away with almost all her aged servants, so that he was able to take part in an attack which meant the destruction of his home without the fear that his mother was still there.

The Germans made six desperate efforts to retake La Maisonnette between 11 p.m. Sunday (July 16) and Monday afternoon. Each was made by at least a battalion, but each was defeated.

3000 SHIPS UNDER JELLICOE.

Tightness of the Blockade Surpasses Expectations.

In an article in the current number of "Cassell's Magazine of Fiction" on British effort on land and sea, Mr. Frederick Palmer, the well-known American journalist and war correspondent, tells that "including the regular naval and the auxiliary vessels, some 3000 ships are under Sir John Jellicoe's command. Success in keeping tight the blockade between Iceland and the North Sea surpasses expectations. It was feared that a number of raiders might get by, and, considering that the fog in the North Sea is often so thick that a man can hardly see his own hand held out before him, it is amazing that only one raider has got through at the time of writing. The fuss made over that single one is proof of the pudding to naval experts, who realize the difficulties if the layman does not. It was as unusual as in the case of the man biting the dog."

About the House

Useful Hints and General Information for the Busy Housewife

Tested Recipes.

Mexican Pickles.—Select four quarts green tomatoes, six large peppers, three onions, all chopped fine. Put a layer of this mixture in an earthen jar, then a layer of salt alternately, and let remain overnight. Then drains the water off, and add one tablespoon each, of peppercorns, mustard seed and whole cloves. Simmer the whole for twenty minutes in three pints of good vinegar, and set away in a cool place. After three weeks pour off the vinegar and add as much fresh In another week the pickles will be ready for use.

Fresh Pineapple for Occasions.—Take a very fine ripe pineapple, pare it and cut carefully all the eyes; then with a silver fork strip all the plup from the core. To one pint of this add one and one-fourth pounds of lump or crushed sugar and stir occasionally until all the sugar is dissolved. Put in glass fruit jars and screw down the covers as tight as possible. This keeps a long time and is delicious.

Rhubarb Marmalade.—Wash and pare rhubarb and cut in one-half-inch pieces; there should be two quarts. Add one quart of sugar, cover and let stand overnight. In the morning put in saucepan. Add grated rind and juice of one orange, one-half cup seeded raisins, cut in small pieces and one-half cup English walnuts, broken in pieces. Bring all to boiling and let simmer until thick. Seal in jars.

Chutney Sauce.—Select twelve green, sour apples, two green peppers, six green tomatoes, four small onions, one cup seeded raisins, one quart of vinegar (if strong dilute), two tablespoons mixed spices, two tablespoons salt and two cups brown sugar. Remove seeds from peppers, add tomatoes and onions, chopped fine; raisins, spices, sugar, salt and vinegar. Put on and let simmer slowly for about three-fourths hour. Then add the apples and cook until they are tender but not mushy. Put in bottles and seal. Delicious relish for meats.

Honey to Keep Without Candying.—To keep honey all the year round without honeying, it is only necessary to place, the honey, which has been strained previously, in a pan or pail, which may be placed inside of another one, putting two or three bits of wood under the pail containing the honey, to prevent it from burning upon the bottom. Then fill the outer one with water and bring it to the boiling point, skimming off the wax and foam which gathers upon the top. As soon as it comes to the boiling point remove from stove, and after a few minutes skim and pour into jars to cool. Cover tightly and place in a cool cellar. It will pay for the trouble.

Cucumber Pickles.—Over one-half a peck of small cucumbers pour a boiling brine made of five pints of water and two cups of salt. Stand twenty-four hours, drain and wipe and cover with five pints of boiling vinegar. Again stand twenty-four hours and drain. To fresh vinegar add two green peppers, chopped, one-half pint white mustard seed, one-half ounce each of whole cloves, cinnamon, allspice, ginger root and alum, two pounds of brown sugar and one tablespoonful of celery seed. Scald and pour boiling hot over the pickles. Do not tie the spices in a bag. The cucumbers will shrivel up when the hot vinegar is poured over them, but after standing for a fortnight they will be plump, firm and delicious. They will keep indefinitely stored in a covered jar or crock.

Canned Sweet Peppers.—Cut off the stem end, remove the seeds with a pair of shears and cut the pepper round and round ings long strip, one-fourth of an inch wide. Put the strips into a deep dish and pour over enough boiling salt water to cover them. Close the dish with a cover and let the peppers stand all night in the water. Turn them out into a colander and let them drain dry. Put into a quart jar and pour over them one and one-half cups of boiling hot vinegar, to which has been added one cupful of sugar and two small pieces of cinnamon stick. Let the peppers stand for three days, then drain off the vinegar, heat boiling water and pour over them again, then seal. Use mostly the red peppers with a few of the green. It will take two dozen peppers to fill a quart jar. These canned peppers are much superior to the imported "pimento," and should be used more generally than they are for salads, sandwiches and Spanish rice. It is well to wear rubber gloves in preparing the peppers.

Watermelon Rind Preserve With Orange and Lemon.—Take the rind of one melon, pare and cut in small pieces through a coarse meat or fruit chopper. Place in a preserving kettle, cover with water and boil about an hour or until fruit seems tender. Scrub four large lemons thoroughly and the same number of oranges. Cut in pieces, remove seeds and run through chopper. After fruit has been boiled rather tender add oranges and lemon. Measure up two-thirds the amount of sugar in same measuring cup in which the fruit was measured. Add to fruit, boil for one hour (not too fast) and stir fruit occasionally so it does not stick to the bottom. Lower the flame at the end of an hour and if the syrup seems to boildown too much add a little water now and then. Stir all thoroughly, mix water with syrup. This preserve will require often lifting and stirring to keep juice evenly distributed with fruit. The proper proportions of sugar to melon rind are twelve cups of sugar to eighteen cups of rind. When preserve is finished if rind is not sufficiently heavy one cup of sugar may be added and boil a short time, stirring well.

Pickling Wisdom.

When pickles are under consideration the most important item is vinegar. All things taken into account, it is best to use the vinegar obtained from cidar, since many of the colorless varieties are often made with an acid that is injurious to the stomach. The difference of cost between the cider vinegar and the white is not much.

Nearly all vegetables that are made into pickles, especially gherkins, cucumbers and onions, require a preliminary soaking in brine. Half a cupful of salt is usually allowed to four quarts of the pickles. These are placed in a stone crock, the salt strewed over them, water is poured in until it covers them, and a weighted plate is laid on top to keep the pickles from floating. This is left forseveral days. When the pickles are removed from the brine they should be looked over to see if there are any soft or spotted ones.

All pickles should be closely watched after they are put up, at least for a month or so. This to ascertain if they are keeping well. They should not be eaten unless they have had at least a two months' mellowing, although longer than this is safer still.

Sweet pickles are usually made from peaches, pears, plums and watermelon rind, and, except when the fruits must be peeled, they are less trouble to prepare than the tart pickles, since they do not have to be laid in brine before preparing. Spiced currants, gooseberries, cherries and grapes may be put up a little at a time, as one has the fruit and the leisure for the task. Other fruits may be spiced.

Here is a good recipe for spiced grapes: Remove the skins from the grapes, put the pulp over the fire and stew gently until it can be rubbed through a sieve, thus removing all the seeds. Weigh the pulp, and to every five pounds of this add a pint of cider vinegar, four pounds of brown sugar, four tablespoonfuls of ground cinnamon and two of ground cloves. Stew together until it is very thick. Pour into jelly glasses and seal.

Kitchen Measures.

It is so much easier to measure ingredients than to weigh them out that the housekeeper saves time and work by acquainting herself with certain equivalent weights and measures. Without staggering her with an array of items and figures, which nine women out of ten forget, here is an equivalent table that any housekeeper can keep in mind.

A cupful of flour or milk means half a pint.

Two scant cupfuls of butter packed tightly make a pound.

Ten eggs of ordinary size make a pound.

Four even cupfuls of dry flour make a pound.

A gill of liquid is a half-cupful.

Two cupfuls (one pint) of water or milk make a pound.

The juice of an ordinary lemon is about a tablespoonful. A breakfast cupful of bread crumbs equals about four ounces.

Useful Hints.

The cleverness of a cook is gauged by her use of leftovers.

Tired, aching feet may be refreshed by soaking in hot water.

Stale breadcrumbs are crumbs freshly grated from a loaf of stale bread.

One of the secrets of successful coffee is to wash the pot every time it is used.

Enamelware can be cleaned with soap and whiting rubbed on with a damp cloth.

Never dry a silk blouse before ironing it.

It is a good plan to oil stout walking shoes with kerosene and vaseline, half and half, before going on a wet tramp.

Fresh fruits and green vegetables supply the iron and mineral matter necessary to the general well-being of the system.

A simple salad is made with any kind of seasonable fruit sliced, served on lettuce leaves and sprinkled with chopped nuts.

When you want to thread a sewing machine in a hurry, remove the spool already on it, but do not unthread the machine. Put a new spool in place, tie the two threads together and pull the thread gently through to the eye of the needle. Break off the first thread and thread the needle.

If you can get a horse at a bargin—drive the bargain.

THE GOLIATH OF ENGLAND IS BEER

A MORE TERRIBLE ENEMY THAN GERMANY.

It Has Killed an Army Greater Than That Under Arms To-day.

Arthur Lee, in the London Daily Mail thus condemns the drink evil in Great Britain:

There is some hope for those who love our land. The Government is picking up a pebble to throw at our great Goliath. It is like a miracle to read that the Government has dared to touch the pot of beer that all these years has been more terrible than Germany, more powerful than the Church of England, and more sacred than the Front Bench of the House of Commons.

A British Government that was not afraid of beer would be a spectacle indeed for gods and kaisers. A British Government that could conquer beer would make Consuls jump for joy, and Germans fly for their lives. For it has been the unwritten law of governments since most of us were born that you must not touch this thing.

You may take a man's house in England now, you may take his motor-car, or his workshop, or the business he has built up during fifty years, or the money he has saved for his old age; you may take away his liberty and his only son, but you must not touch his beer. If you are the Government of the greatest empire on the earth, if the fate of human liberty is in your hand, and if a pot of beer stands in your path, you must not kick it out. Let it be; it is the holy thing of England.

And what is this thing before which kings and governments bow down? What has it done for us in these bitter days, in the days in which we should have found the strength we need so sorely now?

If it is true, as it is, that in fifty years we have thrown away an army as great as we have under arms today, it is beer that has consumed quite half of it. It has cut down the flower of our manhood less quickly, but not less horribly, than German shells are doing now.

Sapper of Strength.

It has bred weak joints, weak muscles, weak brains and little stunted bodies with feeble minds, where we should have had men fit for soldiers and women fit to make a soldier's home. It has chained our men in slums that are not worth fighting for; it has put a millstone round the neck of industry so that we have lagged behind our enemy; it has poured our wealth into the gutter; it has written "rejected as unfit" against the names of half a million men who were willing to join our army now in France.

And how did our beer-god help us when the hour of peril struck at last? It is just a year since it imperilled our national safety, and we are not likely to forget it. This time last year, with the fate of Europe in the balance, the beer-god stalked abroad in every street and factory and dockyard, and held away so mightily that the director of transports warned the Government that supplies to the army and navy might stop; the director of naval equipment warned the Government that shipbuilding might come to a standstill; manufacturers of explosives warned the Government that they might not be able to deliver the goods; and Admiral Jellicoe warned the Government that the efficiency of the fleet was imperilled.

So this thing has served the army and the navy. And what of the people? What of all those millions of people with shillings and pounds to spare and save that they will want as badly soon? Alas! their gold is being eaten up. The Moloch who consumed the lives of little children has a rival in this thing that stalks through our streets consuming the people's vital strength. It is not open to dispute that, with the money lost through drink, we could pay off, as the war goes on, 5s. of every £1 the war is costing us; it is not open to dispute that something like this is actually being done in Russia now, where the people who saved sixpences in peace time under vodka rule are giving up vodka for their country's sake and saving sovereigns.

Only in England.

But, happily, enemies do not have their way in Russia—or in France. It is only in England, in the land the noblest men on earth would die for, that this foul enemy of our race can work its will. If our ships are wanted for the war, and we must go short of something, we must sacrifice the books and papers that build up our minds, we must sacrifice the food that builds up our bodies, but the poison of the national life must come in. It does not seem to have occurred to a single member of the House of Commons to ask why we should give up sugar and paper for beer, when the tonnage of all is about the same, and the things we give up are helping England, and the thing that comes in freely is helping our foes. Mr. McKenna preaches economy. Lord Selborne urges us to grow more food; but Mr. Runciman imperils the fruit of all our orchards, and makes tons of it not worth the picking, by keeping out sugar to let in beer. The fruit must perish on the trees, the child must even lose its sweets, but its father may have the beer that too often sends him home to beat it.

It is the English madness; it is the mystery of war. Even we in our old age, when this traitor has perished with all others, shall hardly believe it. Who outside an asylum can believe this simple truth about the power of beer in England—that, depending on foreign sources for our food, we set aside as much land for beer and whiskey as for bread with this result: that if the German navy could blockade us our children would hunger for bread in two months, but our men could drink beer for a year or for ever?

LONG STRUGGLE AHEAD.

French Premier Does Not Anticipate an Early Peace.

A difficult and prolonged struggle before the war is ended is prophesied by former Premier Viviani, in the French Cabinet. In an address before the general council of the department council of the department of Creuse, held at Gueret, he said:

"Although victory is certain, it will require hard and prolonged efforts to break Prussian militarism and prevent recurrence of its crimes. There can be no peace before the attainment of victory, before adequate reparation is made and before justice triumphs."

In an address before the General Council of the Department of Aube Bienvenu Martin, the former Minister of Justice said:

"The French will not submit to the peace of the German Emperor, who boasted he would force his adversaries to accept peace on bended knees. They will accept only such a peace as assures them legitimate reparations, as well as their independence and security, and they will hear patiently all sacrifices in order that, in conjunction with the efforts of their faithful allies, such a peace may be imposed."

When prosperity turns a man's head it makes a pitiful sight of him.

Do not try to make a guest feel at home unless you know what sort of a home he has.

THE FASHIONS

Two striking models adopted by the younger set are reproduced here. In one of white and blue linen, the waist and upper part of the skirt were of white linen and the sailor collar, cuffs and lower part of the skirt were blue. Very large pockets were placed on either side. The larger the pockets the more up-to-date the dress, now-a-days. This dress, like many of the

7334

White and Blue Linen Combined.

present models, hangs from the shoulders and is therefore ideal for sports. The other dress is in Russian style. It is of rose-colored silk jersey with black collar, cuffs and belt, and but-

7332

Graceful Russian Dress.

toned all the way down the front with small black buttons. The waist has box plaits in the front and back stitched as far as the waistline and left free below it to give more fulness to the lower part.

Colored embroidery and beads are particularly favored for trimming the darker dresses that are brought out on cooler days. Purple on black, and gold or mustard color on dark blue, give exceptionally good results. White glass beads on dark blue serge is another very effective suggestion.

The Popular Hats.

Any number of white and colored felt hats in both small and large shapes are worn at present. The trimming is either a ribbon band, plain or plaited, or fruit or flowers cut out of silk or velvet and placed against the crown or on the brim. White hats of silk or satin with a flange of chiffon around the brim are also considered very smart. Some are trimmed with a large bow of white satin directly in front.

The mid-season hats used for other occasions than sports are in large sailor shapes, also in small and medium sizes. White satin crowns with black velvet brims are highly favored, as well as the all-black and all-white hats. Sometimes the order is reversed and the crown is made of black velvet with the brim of white satin or straw. The trimming used on this type of hat is generally a wing fancy or ribbon arranged in some attractive manner. Color is introduced in some of the large black hats for semi-dress wear, especially in those for the younger girls.

These patterns may be obtained from your local McCall dealer or from the McCall Company, 70 Bond St., Toronto, Ontario.

IN THE NORTH OF FRANCE.

Authorities Are Studying How to Re-establish the People.

The Inter-Ministerial Committee, of Paris, of which Leon Bourgeois is the moving spirit, together with the prefects of the departments concerned, are studying how life in the invaded districts of Northern France is to be restored after the war. It will be a prodigious task.

In the first place the sanitation of the country must be taken in hand. Imperfectly buried bodies, poisoned wells and ponds, masses of decaying matter in ruined villages and towns would quickly become centres of contagion. Large quantities of disinfectant chemicals will be required.

For some time supplies of food and other necessaries of life will have to be provided and already 90,000 hundred-weight of flour, 20,000 hundred weight of foreign wheat, and quantities of condensed milk, chocolate, soap, candles, and other stuffs have been stored in preparation at Dunkirk. The inhabitants of the invaded departments will begin to receive distributions directly they are delivered. The first credit of about £,250,000 francs has been voted by the Government to allow the Dunkirk Chamber of Commerce to make the necessary purchases.

The housing problem will next arise. Millions of bricks with quantities of wood and iron are being prepared and 5,000 transportable houses are being prepared for temporary shelter. Evidently this will not meet the whole need, for there are 100,000 refugees from the Department du Nord alone scattered about France. Many of these, however, will not wish to return at once. All could not do so. Rather it will be sought to organize their return gradually so that the privation, disorder, and discouragement may be minimized. The way will necessarily be led by those who have means, influence, and intelligence to commence the restoration of business and industrial life. Stocks of machines and goods and quantities of automobiles are being gathered for this happy event. Old army horses will be given to the farmers, together with assistance in obtaining hand labor.

The reconstruction of the local administrations, posts, transport, legal, and municipal services and so on is also being actively planned.

"The North is like Lazarus," said a little refugee. "We shall see its resurrection."

Machine Gunners Wear Gas Masks on British West Front

A BRITISH OFFICIAL PHOTOGRAPH from the Western front showing British machine gunners wearing their gas masks in action.

DUG-OUTS FOR DOGS.

The Three Breeds Mostly in Use in the Fighting-Line.

The introduction of dogs into the fighting line is due to a young French lieutenant, who brought the dogs over from North-Western Canada and the Labrador last year, when the question of transport among mountainous parts became a question of such serious importance.

The dogs were first utilized in connection with drawing loads over difficult passes by sleighs, etc. They now draw their loads on light sledges which run regularly to and from the trenches, and they find no difficulty with the steepest incline or the heaviest load.

The Labrador, Canadian, and Alaskan are the three breeds mostly in use, though the last takes first place for endurance and pluck. His energy never flags, and, according to a French soldier, "he works until he drops from sheer exhaustion."

Behind the firing line the French have instituted training camps for the purpose of instructing the dogs in their various duties. Here they are taught how to guard advance trenches against enemy attacks, how to carry messages, how to jump trench parapets, how to scout, patrol, and act as sentries. Their comfort is an important consideration, and dug-outs for doggies are as well screened and comfortable as Tommy's own.

Rice, horseflesh, and military biscuits form their chief diet, and judging from the truly excellent condition of the dogs, they thrive on it.

Nurseries for the puppies are erected close to the firing-line. Last year the dogs were some 250 strong, but their numbers have now greatly increased, and it is no unusual sight to see puppies playing unconcernedly about on the mountain slopes, within close range of the German guns.

EDEN GROVE

Misses Mae and Martha Fordyce visited Walkerton friends last week.

The man in the moon was full Monday evening for the last time before the 16th and he will be down to his last quarter on the 19th. Hard luck.

Last Wednesday evening Misses Gertude O'Reilly and Mattie Desmond, graduate nurses, very pleasantly entertained a number of their young friends to a social evening in the oper house, when a few most delightful hours were greatly enjoyed in dancing, cards, etc., the hostesses providing a dainty midnight luncheon. The guests included quite a number of Walkerton and Cargill friends of the young ladies.

Sunny Jim spent a couple of days last week looking up old Waterloo County friends.

Mr Tony Rosseau has rented the hotel in Clifford and is having a sale on Friday. Mr and Mrs Rosseau intend leaving for their new home Tuesday. During their stay here they made many good friends who will be sorry to hear of their leaving. All wish them everything that's good in their future home, and they will always be welcome back to our burg.

Messrs John Seiler and Herb Pearson visited Toronto last week, taking in the Fair.

Never mind, kiddies, if the weather keeps kool it will soon be Xmas holidays.

Mr and Mrs Rosseau and Mr and Mrs McKeeman motored to Kincardine Sunday.

It is rumored that a happy event will take place in an Eastern village next week, when a young gent and lady from our town will take an interesting part.

Jim Sparling of Cargill relieved the agent here during his absence last week.

Gordon Brown went on the harvesters excursion to the west.

Wonder who is the fellow with No 13 shoes who walks so heavy when going home from seeing his maiden. Please step light and not disturb one's sleep.

Miss Mary Desmond, nurse, of Pinkerton, visited her cousin Mattie last week.

Now is the time to fill up the shelves in your cellar with pickles, sloe, gin, etc., etc., for you won't have a chance to get pickled after the 16th.

The ladies had a quilting at the home of Mrs T Desmond on Friday, and apparently enjoyed themselves without the gents. Funny what women can do sometimes.

If you have any good looking visitors please leave their names and addresses at the post office.

The next question is, who will run the Simcoe House when Tony is gone?

Ice cream took a drop Saturday, when the bottom came out of the tub.

Miss Lily Alexander was a week-end visitor with Paisley friends.

Brant council will meet in the tp. hall on Monday, 18th, at 10 a.m.

Miss Nellie Stansal, graduate nurse, Rochester, is enjoying vacation at her home here.

Rev Mr Alnack and John Seller attended the missionary convention held in Paisley on Tuesday.

PINKERTON

Miss Grace Elliot returned to her home here after a long vacation at Molesworth.

Mr and Mrs Wm Meyer of Cargill spent Sunday at Miss Russels.

Masters Frank and Clare Donnelly went to Toronto last week to resume their studies at St Michaels College. Senator Donnelly accompied his sons and attended the Exhibition.

Rev Mr Gale visited in Alma last week

Miss Maude and Master Carl McKee return this week to school in Belleville.

Children Cry
FOR FLETCHER'S
CASTORIA

TENTH CON BRUCE

At present rain is badly needed in this section. Fall wheat and hoed crops are almost at a standstill on account of the drouth.

Mr Louie McDonald spent last week in Wingham.

Mr and Mrs Angus Atkinson motored over from Wingham and spent Sunday at Mr Alex McDonald's.

Mr R J Caldwell has purchased a new Cargill wind engine to do his pumping in the future.

Mrs J Vennard, of the 12th line, spent Sunday with friends on the 10th.

Our genial mail carrier has a kind of far away look for some time past. The reason is this: His wife's gone to the country. Brace up, George, she will be back in time to kindle the fire on the cold mornings in the fall.

Messrs C McDonald and L McPhail both intend to sink artesian wells on their property this fall.

Mrs J Caldwell spent last week with her daughter in Wingham.

Mrs R Atkinson and two daughters are spending a couple of weeks with friends in Toronto.

UNDERWOOD

Among those away to Toronto exhibition were Walter McKay, Mr and Mrs Bert Nuttall, Mr and Mrs Geo Tennyson, Arthur Cameron and Wellington Avis, John Wittig and Simon Ropel.

Mr Will Orford went west on Tuesday on the harvest excursion.

Miss Jennie Drummond, of Kincardine, visited at Mr John Wittig's last week.

Mr Nilledge Struthers spent a few days with his uncle, Dr Struthers of Tiverton.

Pte Herb Summers was up from Camp Borden for a few days.

Quite a number from here attended the funeral of the late Miss Maud McNally of the bdy on Saturday. We extend our sympathy to the bereaved relatives.

Mr Geo Hood went to Hamilton last week to attend Normal.

Our Telephone Central has been moved from Mr G Hood's to the old Post Office, on main street, and has been nicely fitted out for the use of our operator, Mr H Dent.

GLAMIS

Very sad and unexpected was the news that came over the wires on Thursday morning from Kincardine Hospital telling of the death of Miss Maud McNally, daughter of Wm H McNally, of the boundary. She was taken to the hospital on Saturday morning. On Monday Dr Lucy, of Guelph, and Dr Struthers, of Tiverton, performed an operation for internal trouble. Miss McNally came through the operation alright and every hope was entertained by her friends for her recovery. On Wednesday she took worse and passed away on Thursmorning at three o'clock. Her friends were sent for, but were too late to see her alive. Her death has cast a gloom over this community, where she had always lived and been very much respected. She was of a very mild, lovable disposition, and will be very much missed in her home and in St Paul's church where she was a member and a worker. Every sympathy is felt for the family in their bereavement, and especially the mother who is not in good health and is feeling her loss keenly. She leaves behind three sisters — Minnie, of Lapeer, Mich; Norah, and a twin sister, Mrs D McLeod, of the boundary; also three brothers—Hector and John at home, Wilbur, of the 16oth Bruce Batt, London. A large procession followed the remains to Purdy's cemetery on Saturday.

Miss Mary MacIntyre has returned from Inverburon where she spent several weeks.

Mr Wm Cunningham, of Allistion, and Miss Elizabeth, of Milton, are visiting their brother, Mr Jos Cunningham.

Rev DeMille and family have moved into Mr Dan Finlayson's house.

Mrs McDermid bought the McNally house and took possession last week.

Miss Kate McDermid is home from London on holidays.

Those from around here who took in the exhibition in Toronto were Rev and Mrs Reith, Mr Jos Cunningham, Mr and Mrs Roy Kennedy, Mrs Murdoch McKay, Daisy Cronin, Florence Webb, Susie and Tom Thompson.

Mrs Tufford, of Beamsville, and Miss Hendry, of Weston, who spent some time with the McKeeman family in their cottage at Inverhuron, have returned to their homes.

Mrs Wood and family, who visited her parents, Mr and Mrs Kenneth McLennan, have returned to their home in Superior, Wis.

Mrs J C McIntyre is spending a few days at Inverhuron.

Mrs Jackson, of Markdale, spent a week with their daughter, Mrs R J Nesbitt.

Mr and Mrs Jas Thompson, Murdoch and Cecil Garland are away this week attending the London Fair.

Mr Chas McKinnon, of the 10th, left for the west last week and will visit friends there.

Mrs Madden, of Hamilton, is the guest of Mr and Mrs Groves.

Mrs Jackson is spending some weeks with friends on the 2nd of Bruce.

Mr and Mrs R J Nesbit motored down to Markdale a week ago Sunday.

Mrs Graham, who has been seriously ill, is reported much better.

Miss Margaret McLennan, of Detroit, who has been home for the summer months, returned to that city and has gone to a hospital to train for a nurse.

Mrs Angus McDonald, of Detroit, came up to attend the funeral of her granddaughter, the late Maud McNally.

Mrs Tom McFarlane, of Toronto, is visiting at Mr Neil McFarlane's.

Miss Alexia Fraser, who spent the summer with friends in Saskatchewan, has returned to her home here.

Mrs J R McNally, of Sarnia, attended the funeral of her neice, Miss Maud McNally.

Mr Albert Pickard, of Wiarton, called on old friends here on Friday.

Mr and Mrs David Robertson are in Detroit visiting friends.

Miss Nettie Gunn has gone to Norland, Ont. where she will teach school.

Mr and Mrs Wandless, of Ottawa, were recent visitors at Mr Allan McKinnon's.

The series of camp meetings held by the Free Methodists has been brought to a close.

Mrs W J Graham is reported to be much improved, and was able to sit up a while on Sunday.

Miss Katharine McDermitt, of London, has been visiting her mother, Mrs Angus McDermitt.

Mr N Panabaker, of Hespeler, was a visitor at Mr J Deehan's.

Fraser—Thomson—That this board do now adjourn to meet again the first Monday in Oct at 1 o'clock p m, for general business.—Carried.

R C PEARCE, Clerk

VILLAGE COUNCIL

Council met on Wednesday, Sept 6th, members all present except Mr Sparrow. Minutes of last regular and subsequent special meetings were read and adopted.

The clerk reported car of coal, just received, to be short in weight by 1250 lbs; that the Hunter Bridge & Boiler Co had signed an agreement for the supply on the grounds of engine house a soft steel smoke stack; that copy of lease of ground where weigh scales are erected at station had been received, executed by the G T R Co.

Letter read from city clerk, Niagara Falls, with copy of their council's resolution re pensions to disabled soldiers, and suggesting similar action.

Letter from Ballachey, Laidlaw & Co protesting against delay in erecting a new smoke stack at engine house, owing to smoke nuisance from present broken stack. The clerk was instructed to reply.

George—Nicholls—That this council is of same opinion as the Niagara city council, re disabled soldiers, in that officers and men should receive similar treatment in the matter of pensions. The clerk was instructed to forward such resolution to Sec'y of State.—Carried.

George—More—That the poll tax for men whose names are on the Paisley voters' list, between the ages of 21 and 60, and who are not paying a property tax, be $5 each, except those enlisted for overseas service.—Carried.

The following rates were struck: Co rate 3 4-10 mills, village 10 mills, local improvement debentures 2 4-10 mills, general debentures 3 6-10 mills, street watering 4-10 mills, school rates 6 8-10 mills, school debentures, share, 3 1-10 mills.

George—Nicholls—That By-laws 659, 660 and 661 now read be read a second and third time, passed and executed.—Carried.

The following payments were authorized: Mord Leitch $45, E C Wilkins $50 48.

AFTER SIX YEARS OF SUFFERING

Woman Made Well by Lydia E. Pinkham's Vegetable Compound.

Columbus, Ohio.—"I had almost given up. I had been sick for six years with female troubles and nervousness. I had a pain in my right side and could not eat anything without hurting my stomach. I could not drink cold water at all nor eat any kind of raw fruit, nor fresh meat nor chicken. From 178 pounds I went to 118 and would get so weak at times that I fell over. I began to take Lydia E. Pinkham's Vegetable Compound, and ten days later I could eat and it did not hurt my stomach. I have taken the medicine ever since and I feel like a new woman. I now weigh 127 pounds so you can see what it has done for me already. My husband says he knows your medicine has saved my life."—Mrs. J. S. BARLOW, 1624 South 4th St., Columbus, Ohio.

Lydia E. Pinkham's Vegetable Compound contains just the virtues of roots and herbs needed to restore health and strength to the weakened organs of the body. That is why Mrs. Barlow, a chronic invalid, recovered so completely.

It pays for women suffering from any female ailments to insist upon having Lydia E. Pinkham's Vegetable Compound.

J H Maurer $35, Weighmaster $11 13, Electric Light Co $49 26, Ballachey, Laidlaw & Co $1 03, J H Glover $34, I Stanley $3 60, Scales Inspector $4, Frick Coal & Coke Co $59 05, G T R $89 54, Thos Collins $3, Paisley Advocate $3 50, D Thomson $1 75, J Stoddart $45 33, W Sparrow $9 63, J Stoddart $13 13, W Rae 45c, Alex Beck $30 82, W Sparrow $2 45, the clerk $3 75, Thos Sparrow 35c.

Just Think It Over

"All work and no play"—you know the rest. After the hard summer licks have been put in—when the balmy harvest days are drawing so near—what is there more pleasant than a day or two devoted to rest and pleasure. Don't you deserve it? You bet you do. The Fair—your Fair — will soon be here — then's your chance. Better think it over. The Paisley Fair, September 26 and 27.

Importance of Conserving the Fertility of Our Soils

The soil is the one great factoral foundation not only of agriculture but of the nation's welfare, hence it is practically impossible to spend an excess of care on its cultivation and preservation. Therefore any knowledge that results from experience is of the greatest value. A deal of information acquired from such experience is given in Bulletin No 27, second series, entitled "Soil Fertility, its Economic Maintenance and Increase," just issued by the Department of Agriculture of which Dr Frank T Shutt, the Dominion chemist, is author, and which can be had free by application to the Publications Branch of the Department at Ottawa.

Wiarton Business Man in Trouble

W J Holmes, a butter and egg dealer of Wiarton, has been sent up to Walkerton to be tried at the fall assizes there on the charge of forging the name of the Wiarton station agent on two bills of lading. He is alleged to have pretended to have shipped produce to a Toronto wholesale firm and to have signed the station agent's name to the pretended bill of lading which, according to the story, he sent to the Toronto firm and drew on them for the produce which they paid. Not receiving the goods, the Toronto firm made a claim on the railway company with the result that an investigation was instituted and a charge of forgery against Holmes laid. The defendant was sent up by a Wiarton court for trial at Walkerton, and is now out on bail.

Death of H. H. Miller, of Hanover

H H Miller, ex-M P, was suddenly taken by death on Monday of last week, after an illness of only a few days from stoppage of the bowels. An operation performed on the Thursday previous removed the trouble, but his vitality was not strong enough to recover from the operation, his heart being weak. Mr Miller was born in Owen Sound on January 10, 1861, being a son of Mr R H Miller, who still resides there at the age of eighty years. He went to Hanover in 1884 and opened up a conveyancing and insurance office, and by means of intense application, marked ability and absolute integrity, built up a large business. He was a director and shareholder in the Knechtel Furniture Company, the Splats Furniture Company and the Knechtel Kitchenet Company, all of Hanover, besides several other local concerns. He was a prominent Methodist, and a man of wide though unostentatious charity. Mr Miller was elected to the House of Commons for South Grey at the general election in 1904, and re-elected in 1908, sitting until the general election of 1911, or seven years in all.

Descriminating Men Are Finding Their Suits Here!

Style, tailoring and service are making many loyal friends. These are the men who, most of all, once doubted the ability of a department store to give actual clothing service to men. And now they have had the practical demonstration of a department store giving real clothing service—plus. These men have learned that the policy of this store is to have things right in the first place, to avoid controversy and to make good without "ifs" is worth a good deal to the customer.

Get a new Suit and be in line for the Fall Fair. All the newest styles and every suit finished in the best tailored fashions. We guarantee our Navy Blue Serges to be good as ever in both quality and color. See these new fall models for men and young men. Sizes 33-44. Prices... $9 to $22

New Fedora Hats

We have just opened the new Soft Felts. This is September and your straw hat is in danger now. We are showing the new shades of Grey, Brown, Green, Black, Pearl, Absinthe, in the new blocks from the best American makes. Sizes 6¼ to 7¾. See these at..... $2.50

Here are Some Fine Furnishing Bargains:

MEN'S BALBRIGGAN UNDERWEAR — Double thread, French needle, great for this kind of weather, sateen trimmed, pearl buttons, clearing at 35c

MEN'S HEAVY DRILL WORKING SHIRTS—A great bargain, extra large bodies, Blue Chambray, Black Drill, Black and Blue Duck, soft turn down collar attached, sizes up to 17. Going at..... 59c

MEN'S FINE SHIRTS—Many light colorings with fancy stripes and figured patterns, stiff and soft cuffs, coat styles, all sizes, special..... 69c

100 PAIR MEN'S TROUSERS—Fashionably cut and well made, trousers well worth $3. Very dressy, clean cut, well tailored and perfect-fitting. Trousers for business or dressy wear. Special..... $2.19

Specials from the Cotton Goods Department:

UNBLEACHED COTTON—36 in. wide, absolutely pure, splendid for sheets, worth 14c yd., special at..... 9c

5,000 YARDS OF WABASCO COTTON—36 in. wide, regular 18c yd. This is something that has advanced 40 per cent. in price, a very scarce article on the market to-day. This is a beautiful chance to save money. Splendid for Sheets and Pillow Slips. Special..... 10 yds. for $1.25

FLANNELETTES—Being in close touch with the market, we were posted when to buy, and to-day Flanelletes, same as Cottons, are much higher than in the spring. But another chance is before you. 36 in. fancy pink and grey stripes, in fact, all colors..... 10 yds. for $1.25

A REAL GOOD TABLE LINEN can scarcely be looked for to-day, unless your merchant happened to lay in a supply before it advanced. Linens of to-day are not near the quality we used to get a short time ago. Now, if your House of Trade cannot show you value for your money, we can, and more than value. We have a bargain, and a good one, in Table Linen. Come and see it.

Don't forget that the party bringing in the most PRODUCE—EGGS, BUTTER or FOWL—on or before SEPT. 30th, receives 100 lbs. of the best Granulated Sugar.

Grocery Specials too Numerous to Mention

EGGS, 28c. Bring us Your Fowl. BUTTER, 28c.

These prices are subject to change at any time, but we always pay the very highest prices.

"LIKE LIVING TORCHES."

Terrible Fate Overtook Party of German Flame-Throwers.

A remarkable vivid description of the recent desperate fighting on the Somme front has been given by a wounded French signaller to George le Hir, a special correspondent of the New York Times.

When asked how he came by his injuries the signaller made the startling reply: "In watching hell-fire from a tree-top." Then he continued:

"My company was sent to organize an old German trench a little north of a farm, but when the officers examined it they found it destroyed by our bombardment so that it would be almost impossible to prepare it before the enemy attacked. So it was decided to withdraw to a better position fifty yards in the rear. Then the captain called for someone to stay behind to watch and signal the enemy's movements. I fixed myself up in the cleft of a tree, taking with me a telephone which was connected with the nearest battery.

"For nearly an hour nothing happened. Then a group of about forty Boches crept forward from the wood, rapidly followed by the best part of a company. I telephoned 'Enemy advancing, led by a detachment of flamenwerfer,' for I had recognized the devilish apparatus carried by the foremost group. With appalling suddenness, a dozen jets of white and yellow flames darted up to fall plumb into the trench. The dense smoke hid the rest of the Germans, but, thanks to my mask, I was able to give information to the battery.

"Our gunners had the range to an inch, and a torrent of shells burst right among the fire-throwers. Great sheets of flame sprang up, one jet from an exploding container just grazing me, burning my clothes and scorching me rather badly. The ground was a sea of fire, and in the midst of it the Germans, like living torches, were dying horribly. One man spun round like a top, not even trying to run away, until he fell in a pool of flame. Others rolled on the ground, but the blazing liquid ran around them everywhere.

"I don't think any fire-throwers escaped."

16,000,000 LETTERS WEEKLY.

British Postal Arrangements to the Armies in France.

The British may pride themselves more especially on the efficiency of their transport of both men and mails. One of the biggest armies ever raised in any country has been conveyed over the sea without the loss of a single unit, and a prodigious amount of mail matter is handled with similar effectiveness.

The army postal arrangements, which are on a vast scale, are working admirably. Letters sent from England to the expeditionary force in France take three days to reach men in billets and four days for soldiers in the trenches.

All letters for the troops are dealt with at the home base office in London, where the work of sorting is performed. There is a separate mail bag for every unit, both for letters and parcels. All the base shops are similarly treated. About ten millions of letters are dispatched to the armies every week and about three-quarters of a million parcels. The mails are made up not only for the forces in France, but for the troops in Egypt, Salonica, Mesopotamia, East Africa and other parts of the world. Colonial sections deal with colonial letters both at the London base office and at the front.

All the cross-Channel routes are used, and three special trains are run daily for the army mails alone. The number of letters sent home from the front exceeds five millions weekly, and this vast correspondence has to be handled in the first instance at the base. The sorting is done in London. Several hundred women are employed in this work, and their numbers are increasing every day. They perform their work satisfactorily, but, of course, not so well as sorters of long experience, nor can they deal with heavy parcels. Letters which for any reason are undeliverable are sent back to the senders.

PASSENGER BUSINESS GOOD.

Northern Navigation Company Is Having a Busy Season.

"Our passenger business during the season has exceeded all other years, and it now seems probable that our steamers will be filled to their capacity upon every trip to be made to Duluth," declared E. W. Holton, general passenger agent of the Northern Navigation Company, while discussing the large reservations which are being made on all steamer lines this summer.

"There are several reasons for this increased business. Of course the warm weather has played an important part and the European war has kept many persons in the United States and Canada who might otherwise have toured in Great Britain, France, Germany and other countries.

"Then, too, the fact that Detroit has been made our southern terminal, has given us facilities to care for the residents of the Michigan metropolis and nearby American and Canadian cities much better than ever before. The Huronic, Hamonic and Noronic leave Detroit weekly on Mondays, Wednesdays and Fridays, and hundreds are now enabled to board the steamers at Detroit instead of making the trip to Sarnia which was our southern terminal until the latter part of last season.

"There has not only been a large business from our southern terminal, but there has been heavy traffic from the other end of our line. Many of the people who have boarded our steamers at Duluth are tourists from the western states, Seattle, Pohtland and Prince Rupert sending big delegations east which have enjoyed the cruises on our steamers.

"While reservations made up to date are unusually heavy, we are of the opinion that there will be room for all who care to take the northern voyage during September. This month, the last of the season, is usually lighter than those preceding, and we have no reason to anticipate any difficulty in getting suitable reservations this year, although it is one of the most delightful months of all for a lake cruise. The days are usually as warm as during August, the sunsets are wonderful and the cool evenings make dancing and walking on the decks most enjoyable. Because many people were unable to take our trips in August, a large majority plan to leave for the north in September on the week's voyage."

Their Marriage.

She—How did they ever come to marry?

He—Oh, it's the same old story. Started out to be good friends, you know, and later on changed their minds.

All Business.

"Then I can be one of your pupils?"

"Assuredly, sir, for $10 a lesson," said the great artist. "And a favorite pupil for $2 extra."

Family jars are never used in preserving peace.

Back To Wonderland

"It is an enormous bill, Doris," said Dick Barron. "You women take to spending money like a duck to water, and——"

Doris looked up from the couch in the dainty boudoir.

"Oh, Dick, how odd a thing to say! And I must have clothes!"

"Yes, of course. I know. I suppose it is all right, but these modiste people know how to charge. You dressed just as beautifully before I came into uncle's money. We had little enough then."

"Yes, Dick; it was little enough then," said Doris wistfully, with regret in her tone, darting a look instinct with anxiety at her husband, and realizing at last that a few big dressmaking bills would never bring back the old days.

Dick did not notice her look. He seldom did observe anything which concerned his wife. He was satisfied so long as she looked charming at the receptions he attended since he had taken up politics.

Doris sighed, and Dick crossed the room, said he must really be off, kissed her, and left the room. His wife followed him into the hall and held his coat, though the servant was waiting.

"You are always leaving me now," she said sadly. "I have been thinking of the old days when we were happy."

"So are we happy now, dear."

There was a shake of the head from Doris. She waited to see her husband hurry down the steps into the square, then walked slowly back to the fire she had quitted, to drop into a low chair, resting a white satin shoe on the brass rail, and gaze dreamily into the caverns of gold.

"How lonely I am!" she murmured.

She knew it had to be done — that Dick must be stopped in his career of excitement. He would not listen to her. She knew that well, too, for her pretty speech had been laughed at, and yet at a dinner-party a few months before, Russell, the physician who had always taken a paternal interest in her for he was her father's old friend, as well as a great nerve specialist—had told her of the peril menacing Dick.

"Take my advice, my dear," he said, "Call him off before it is too late. You must have noticed the change in him?"

"No," replied Doris. "Unless it is that now I am very little to him. He never remembers me."

"Quite so. Just make him remember you. That is where you come in. Insist upon it. Show him that you are good enough to fill his entire life—as you are, dear lady. The present mad rush is killing him; he can't stand much more of it. A woman can always find a way of doing anything in the world if she chooses."

* * * * * *

It was late when Dick Barron reached home. Doris was awake and listening.

"So he walked home," she said to herself. "There was no sound of a cab."

Then she started, raising herself on her elbow as Dick entered the room. She saw he was merely sustained by nervous energy, just as Dr. Russell had said.

"You have been overdoing it again, Dick," she said softly, as he dropped into a chair. Then she smiled as at a sudden idea. "I don't believe you give me a single thought, once you are away from me."

"Doris, dearest, what nonsense! Why, I think of you all the time!"

She leaned back on the pillows, regarding him oddly.

"And I should like to go back to Surrey," she said dreamily. "It was very good there, Dick, and you were not worried out of your life. You had time to come down the garden—do you remember that summer?—and we reigned over whole kingdoms and empires, just as children do in the shadows of the firelight."

"And it is the same now, dearest." Doris gently pushed him from her, for Dick had risen and taken her hand.

"No!" she said pathetically. "You work yourself to death."

She was wondering what he would say if he knew her plan to save him despite himself.

* * * * * *

"Mrs. Barron badly hurt. Come at once."

Dick Barron received the telegram as he was leaving the club late the following afternoon. It was despatched from a village far away in Wiltshire. He did not understand it at all. Doris was devoted to motoring, and she drove herself, but not for a single second had Dick thought she would have left town that day.

He stood on the pavement, the message crisped in his hand. He was troubled—more troubled than he could have said. His wife! Doris—the girl whose mind had one time seemed to him a radiant country which held mysteries of thought and tenderness it would take a lifetime to explore!

But there was his engagement! What was he to do?

He raised his cane, and a taxi glided up. He got in, telling the man to drive to Paddington.

He travelled down to the little town whence the urgent summons had come. The doctor met him at the door of the hotel where Doris had been taken.

"How is she?" gasped out Dick, dreading the answer he might receive.

"Unconscious, sir. Badly hurt. We felt it right to wire. There is no immediate danger, but——"

He stopped, and led the way to the room where Doris Barron lay. Dick heard all that had happened. His wife must, he thought, have been hastening back to London. Anyway, the car had smashed into the wall of a viaduct, and the girl had been thrown out, to lie in the lonely road for some time before help came.

Dick forgot everything, and the fever of his normal life, as he sat in the darkened room by the bed where the treasure of his world lay. He was thinking back into former times, entering once again that dreamy wonder-world which Doris had shown him—their own realm of enchantment.

Doris did not recover consciousness that night. The doctor was in constant attendance, also a nurse from the cottage hospital.

Then towards morning the sufferer opened her eyes. Dick was waiting. He had not slept. He had watched, his wife's burning hand clasped close in his.

He thought she knew him. But the poor girl, although she was staring at him, seemingly did not realize who it was. She began to talk, and Dick knew she spoke without knowledge, that fever held her in its grip.

The words came wildly:

"I must stop him! It doesn't matter! Dick to speak—Dr. Russell—his heart! A little accident, and it will be all!"

Dick started nervously. The truth was coming in a mist, though he could not yet believe.

There was silence, then Doris was saying something more:

"Oh, the car! Stop! I cannot stop it. I——"

Her voice died away.

* * * * * *

"Dick!"

Barron bent towards the bed.

Doris was speaking very softly. It was several days later—days of anguish and doubt.

He had never left the hotel, devoured as he had been with fear.

"Dick, I am so sorry, but I was afraid."

"Don't let's talk about it now, dear," said Dick unsteadily, as he saw something of what his wife had meant.

It was not until Doris was able to go downstairs, leaning heavily on her husband's arm, that she told him all —one evening as they were seated on the veranda of the hotel, an evening in springtime, one of those periods of unreality and tenderness, with yellow daffodils in the grass, and the thrill of great tidings in the air.

"I can speak now, Dick," said the girl, as she sat forward. "Perhaps you will be angry, but I have been hoping and praying that you will forgive." Barron's face was in deep shadow. Doris went on: "I was frightened about you, Dick. Dr. Russell told me over and over again that you were killing yourself, and that one day, very soon, you would break down, and then—— Oh, I was troubled, and you—you would never listen to me, any more than you would to the doctors, for there was the meeting that night, and I did not know what to do."

Dick Barron laid his hand on that of his wife, but he did not speak.

"I meant it to be only a little, little accident, Dick," she went on—"just bad enough for you to be called away from town; and then I thought that perhaps you would be convinced. I had tried to spend such a lot of money, Dick, so that you would not be able to go on but somehow it never seemed to make any difference. How angry you will have to be with me!"

Dick Barron bent down and kissed her hand tenderly.

"You are going to forgive me, Dick! Oh, if you could, and if you would believe! There were the old days, Dick, the brown roads. And then you were conquering the world, for your work was wonderful, and we were so happy—so happy—— The nights when you sat up writing till late, and I lay awake thinking and listening, for you were working for me then, Dick, and there was the glory of the day, and all the big and lovely things, the people working, and the morning, and we had the world just as much as if we had been kings and queens.

"And you were my king, Dick! Couldn't we go back, Dick, go back home, live as we used to? For, Dick, I could not bear the idea of troubling you. I was thinking, as I drove that day, of the speech, your speech, and of the triumph, and I hated myself when I reflected on what I intended to do—to have you sent for so that you should not go to the Imperial that night. Perhaps you would hate me for that, but it was your life and my happiness, Dick."

"Doris!"

The girl gave a sigh, and clung to her husband's hand.

"Perhaps you would never see it, Dick, but it was what Dr. Russell said. He set me thinking more and more. It seemed to be to be just a fight for myself against all those people who were claiming you.

"And you were mine, Dick—mine," she went on, "and it seemed to me that I had the right. But yet—ah, how I know it all!—all you will say, being worried by me, begged to think of the small things again—you who were so great—you sitting here at my side being bad, although I was treacherous and bad!"

Then the man spoke in husky tones, while his lips were twitching.

"There was no treachery, Doris."

"You say that now, but there is the world. And people spoke of you as though their rights were everything; mine no longer worth a second's thought. And yet I love you, Dick, and I thought if there were just this tiny accident that you would begin to think of me again.

Again did Barron stoop and kiss his wife's hand, grateful for what she had done, glad to think that she had controlled his life—brought him back to her, her slave!

"We are going back into the wonder-world," he said, "you and I!"—London Answers.

Accurately Put.

"Why did Rev. Binks leave his charge?"

"He said parishioners were guilty of contributory negligence."

INEXHAUSTIBLE RESERVES.

German Expert Says Russia Can Continue War Forever.

The Vossische Zeitung of Berlin, in a long article written by a military expert, admits that the hope of a breakdown of Russia for lack of reserves will never be realized. The writer concludes that the Czar has human material enough to continue the war almost forever.

"At the beginning of the war Russia had 173,000,000 inhabitants," the expert says. "This means that the population of the Russian Empire was almost three times as large as that of Germany. The annual increase in Russia amounts to more than two million souls, against 900,000 in Germany. Under these conditions the Czar has more than one million new soldiers at his disposal every year, while the recruits in Germany only number 450,000.

"With the enormous birthrate of 47 per thousand inhabitants, Russia is able to keep her army at its present strength for an unlimited time, even if more than a million soldiers should be killed, totally disabled or captured in a year. For Germany the loss of a million men per year means a serious weakening of the army, because only 450,000 men can be replaced.

"The exhaustion of the man power of Russia is out of question, but the breakdown of the colossus will surely come as soon as England and France are no longer able to furnish the enormous sums of money needed by the Czar."

CASH IN CHINA.

Some of the Inconveniences of the Monetary System.

In the remote parts of China the silver "shoes" are still used, and buyer and seller each carry a pair of scales, while the purchaser chips off with a chisel enough silver from his "shoe" to pay his bill, which the merchant again carefully weighs to the fraction of a grain, to see that he has enough.

The "cash," worth now a tenth of a Chinese cent, has disappeared from the coast cities, where big copper cents have taken their place, but they are still used in the far interior, though even ten years ago they were of universal currency, and it was a common saying that one took a donkey to carry his cash to market and took his purchases home in his hand.

Undoubtedly this financial muddle will in time be straightened out, says the Christian Herald, and even as it is it is more a matter of inconvenience than of actual loss to those who "know the ropes."

OFFICER WORE KID GLOVES.

German Taken at Pozieres Was on His Dignity.

An officer writing from the front says:

Yesterday morning Pozieres fell into our hands, after a terrific bombardment during the night. I never heard anything like it for intensity, although it did not last as long as some of the others I have heard. The Australians who were here the other day in the village took the place without great loss.

I had a long conversation with two officers who were taken prisoners and were in the prisoners' cage before going back behind the line. Both of them looked rather dilapidated, and the men, about 90 of them, were fairly fine specimens, but the officers told me that they were mostly machine gunners and picked men. Although much on their dignity, one of the officers admitted that we had done well, but he excused himself by saying that the Australians were so fresh that it was impossible to expect his war-weary men to hold out against them. He also admitted that the Australians were "very brave and fearless men." "They seem to have no fear of death," he said.

What seemed to stick most in this officer's gizzard was the fact that he was shut up in the same cage as his men, although there was a piece of wire between them; also that his position was so terribly uncomfortable. He said: "I am not used to sleeping in the open. Officers always sleep in houses with us!" So I reminded him it was war time. He replied, "Yes, yesterday I was a gentleman; to-day I am a monkey behind iron bars." True, they were not very comfortable, as they had to lie on some chalky ground alongside of a sunken road.

I could not help smiling myself at their lack of humor and absurd opinion they had of themselves. Just picture these two German officers anything but smart—in fact, very bedraggled after two days without a shave or wash—one in dark green uniform, the other in a Prussian blue uniform, with his long blue coat looking very dirty and worn and he himself most bedraggled. Then, to crown all, he was wearing a rather light pair of kid gloves, which seemed to give him an almost comedian's touch, so absurd did gloves appear in his present surroundings. I felt almost sorry for him, he looked so ridiculous and yet so much on his dignity. He seemed to cling to his gloves as an emblem of respectability, because when I saw him brought in yesterday evening he was still wearing them.

I gathered from these officers they were rather surprised that we have done as much as we had, and that our troops were as good as they are and our artillery so accurate. I asked what they thought of the present situation. They said, "Yes, you have won five kilometres, but it is a hundred miles from here to Brussels; but you will get no further." They were very much concerned as to whether there was any danger of being torpedoed when they were going over to England, as they heard that very few boats ever got across. I told them they might get across safe, but in all probability they would be sent to the Isle of Man, in which case there was a very good chance of going under. They replied, "Isn't there a signal given on the steamer that it is carrying German prisoners?" which I thought was rather priceless.

Grape-Nuts

Gets Attention-

First, because of its wonderfully delicious flavor—

Then again, because it is ready to eat—fresh and crisp from the package.

But the big "get attention" quality is its abundance of well-balanced, easily digestible nourishment.

For sound health, every table should have its daily ration of Grape-Nuts—

"There's a Reason"

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

PAYING $1,000,000 A DAY.

What British Are Allowing for Dependents of Soldiers.

One million dollars a day. That is what the British Government is now paying out to the wives and other dependents of soldiers serving in the army.

One million dollars a day or $365,000,000 a year, paid out exclusively to the families at home of soldiers fighting at the front. And this amount is entirely independent of the regular pay allotted to the soldier himself, the cost of his equipment and all the other expenses incidental to his support.

Enormous as it is, this amount represents merely a fraction of what the British Government is actually doing for those who have joined the colors.

SAVE THE CHILDREN.

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

ENGLISH MANSIONS SOLD.

Some of the Noted Old Castles Are Changing hands.

The old boast that visitors from abroad going to England after a lapse of twenty years would find their old friends established in the same old homesteads is vanishing in the war, along with many other traditions. Estates are changing hands with startling rapidity every week, bringing new announcements in which town and country houses long associated with their owners are offered in the public mart. In former years many such sales would be made privately. They are now too numerous, as a rule, for the agents to handle in any but public fashion, knocking the bargain down to the highest bidder at auction.

One of the most recent sales is that of Pennsylvania Castle, Portland, where a splendid collection of portraits, autographs, manuscripts, and books belonging to the family of William Penn had been housed. In the grounds of Pennsylvania Castle were the Norman ruins figuring in Thomas Hardy's novel, "The Well Beloved." The estate was bought by T. J. Templeman, of Weymouth, for $29,750.

The Penn relics were sold at Christie's, a portrait of John Penn, the son of William Penn, bringing $13,125. William Penn's family Bible brought $575. A treaty belt, the original one presented by the Indians to William Penn and made up of eighteen strings of wampum, brought $130. Another treaty belt, the second one given to William Penn by the Indians, brought $350.

Commander C. H. R. Slingsby, R.N., who inherited a year or two ago the large estates in Yorkshire of his father, but who has not yet succeeded in establishing the legitimacy of his son Teddy Slingsby in the English court, is selling off this month about 12,000 acres of the family estates. The Red House, near York, will be sold, as well as many historical places famous all over the world and during times of peace visited every year by tens of thousands of tourists. These include the Dropping Well at Knaresborough, where the water possesses petrifying properties; Eugene Aram's Cave, Mother Shipton's Cave, and St. Robert's Chapel.

The Slingsby case is now in the hands of the House of Lords. Commander Clingsby won in the lower court, when the presiding judge based his decision largely upon the advice of a famous sculptor that the boy must be the son of the commander's wife because of peculiar ear formations found in both. The case was appealed, Sir Edward Carson acting for the brothers of Commander Slingsby, and under Carson's cross-examination Mrs. Slingsby admitted that she had advertised in a San Francisco paper for a foundling which she wished to adopt.

Lord Ashburton, the husband of the former New York show girl, Frances Belmont, after disposing of much of his family inheritage, is selling Evington, in Kent, a beautiful property which it is expected will be cut up and bought by the tenants.

Love and reason are seldom on speaking terms.

LABOR ADVISER WILL BE USEFUL

BRINGS TIRELESS ENERGY TO WORK OF NEW POSITION.

Arthur Henderson Is a Well-Balanced and Patriotic Leader of Labor.

It is well from every point of view that the resignation of Mr. Arthur Henderson, the one representative of labor in the coalition Cabinet, from the post of President of the Board of Education, is not to involve his retirement from the Cabinet. He is continuing in the Cabinet, though in a new office—that of Labor Adviser to the Government. His Cabinet colleagues and the country at large could ill spare at this time from the inner counsels of Government, a labor leader so well-balanced, so able, so patriotic, and so wise as Mr. Henderson has shown himself to be.

Persistent criticism from extreme Radical quarters, had had the effect of rendering Mr. Henderson's continuance at the Board of Education extremely difficult. And while it is possible that in that particular department he may have been something of a square peg in a round hole, it is notorious that, by reason of the large demands of other kinds made

Hon. Arthur Henderson.

on his time and thought he was not able to give sufficient attention to the exclusively departmental work connected with the Board of Education. For, almost from the moment of his taking office, he was required to devote himself very largely to labor questions.

A Tireless Worker.

As a fact, these are the very questions to help in the solution of which he was called into the Cabinet. And in contributing to their solution he has done work of immense national benefit—work to which he has applied himself with that tireless energy and persistence which are so characteristic of the man. For fifteen months he was engaged, with great success, in dealing with labor matters submitted to him by the Ministry of Munitions, the Admiralty and the War Office, sometimes in turn and sometimes all at once. It is small wonder if, during that time, he was unable to give the requisite attention to the department of which he was the head.

His new appointment as Labor Adviser to the Government, and his retention in the Cabinet in that capacity, constitute a recognition of the importance of the services he has rendered, and will continue to render in connection with labor questions. In the newly-created office he will be the right man in the right place. The work which he has done in the organization of labor for war purposes generally, and, in particular, in the adjustment of difficulties under the Munitions Act, has been work of extreme difficulty and often of great delicacy. And there will certainly not be less scope for his great gifts when the difficult problems in connection with the readjustment of industry at the close of the war come forward for solution.

No Increase in Cabinet.

The new Department of Labor which has been established, might very well have been set up at a considerably earlier date. It is to have separate officers and a staff under the direction of the Labor Adviser. Its present work will largely consist in investigating labor problems for the information of other departments and of the Cabinet at large.

It is satisfactory that the creation of the new office of Labor Adviser is not to add to the already somewhat excessively large total of Cabinet Ministers. Lord Crewe is adding the work of the Education Department to

Phonograph Fire Alarm.

A fire alarm apparatus that calls "central," telling her in a calm, dispassionate, mechanical voice that the factory of Smith, Jones & Co., is in flames and to please call the fire brigade immediately is the proposal of an English inventor. A phonograph, with its horn close to the mouthpiece of a telephone, is fitted with a record bearing the fire warning. The phonograph starts when an electro magnet placed near it draws down the releasing lever. The circuit of which the magnet is a part is closed by an automatic switch which is held by a cord. A fire burns the cord.

Her Wish.

"I wish I were dead," said he after the quarrel.

His wife did not join in this melancholy yearn.

"I wish you were insured," she did say.

Minard's Liniment Cures Burns, Etc.

And He Knew It.

The Professor—I'm afraid, my dear young woman, that you find statistics very dry things.

The Dear Young Woman—Not always. Lieutenant Smyth told me that there were 400,000,000,000 people in the world and I was the prettiest girl of the lot.

St. Joseph, Levis, July 14, 1903.
Minard's Liniment Co., Limited.

Gentlemen,—I was badly kicked by my horse last May, and after using several preparations on my leg nothing would do. My leg was black as jet. I was laid up in bed for a fortnight and could not walk. After using three bottles of your MINARD'S LINIMENT I was perfectly cured, so that I could start on the road.

JOS. DUHES,
Commercial Traveller.

Merit Grows Like Fat.

A Dutch army officer appeared in public with his breast covered with medals.

"Where did you get all those medals, colonel?" a friend asked him. "Did you win some big battle?"

The officer pointed to the biggest, brightest medal of all.

"Dot's de first one," he said. "I got dot by mistake. Und I got all de oder ones because I had dot one."

Minard's Liniment for sale everywhere.

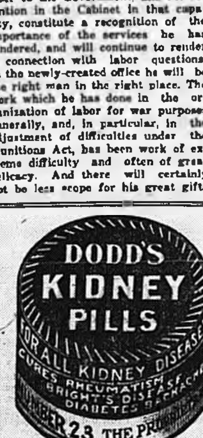
Striving to Please.

"John," said the minutely observant woman, "didn't you forget to tip the waiter?"

"No, I attended to that right at the start. I handed him all the money I can afford to spend and told him to take his tip and then bring us something to eat with the change."

As Good as a Gift.

Spendit—I say, old chap, if you would lend me $50, I could make $75.



Smart—How would you make the other twenty-five?

Immune From Suggestions.

"People don't bother Wombat with remedies for his ailment."

"What's his ailment?"

"He's deaf."

ANGELS UNAWARES.

Women Are Doing Their Share These Trying Times.

Before the war there were five million, five hundred women wage earners in Great Britain; to-day there are said to be over ten million. Five million men have enlisted for active service, and a woman has taken the place of every able-bodied man who might have been engaged in peaceful occupations. England has never been so busy a manufacturing and industrial country as she is in 1916, but this would never have been possible if women had not stepped into the breach.

In Canada there is not the same supply of surplus available women, so that in this respect Canada has not experienced so great a revolution in industrial life, but many new occupations are being opened to Canadian women, and the demand for women workers in factories and in the great industrial life of the railways is steadily on the increase If Sir Robert Borden is to secure his 500,000 Canadian soldiers, 100,000 women must tempor...

PLANT TREES BY DYNAMITE.

Orchard of 4,000 Trees Planted in Fifteen Days.

New methods of using dynamite are being constantly devised. Among the most novel of these is its application in the planting of trees.

There was an apple orchard of 4,000 trees to be planted, and as winter was approaching no time could be lost, for fear a sudden turn in temperature should freeze the ground.

The man who undertook the work first mounted a two and one-half-horse-power gasoline engine on the running gear of a light wagon and arranged it to operate a soil auger. With this outfit two men were able to put down as many holes in a day as 30 men could have punched with a bar and sledge.

In these holes light charges of dynamite were exploded to form an excavation in which to plant trees, a number of holes being fired at a time.

By this method the entire orchard was planted in less than 15 days of nine hours each.

Minard's Liniment Relieves Neuralgia.

HOW COCOANUTS GROW.

Covered With Thick Husk So They Will Float.

Why do coconnuts have "eyes"? This, say the naturalists, is the reason: Cocoanuts generally grow at the edge of seas or rivers, and a good many of the nuts as they become ripe fall into the water The nuts are covered with a thick husk, which has a waterproof covering, so that they will float. As they float the three eyes, which are all at one end of the nut, are always on top.

Once in the water, nature goes to work. From one of the eyes there comes a shoot that sends forth broad leaves that act as sails. The wind catches these sails and wafts the cocoanut on a journey that may be many miles long. As it sails the other two eyes send out roots, which at first grow among the fibre of the woody husk.

In time the cocoanut is swept on another shore, perhaps on another island. The roots embed themselves in the soft earth the sail becomes the trunk and very shortly a thrifty cocoanut palm is growing where none grew before.

Queer But True.

"It's a queer world."

"Why?"

"Stand up and say that riches don't make for happiness and everybody will agree with you heartily."

"That's so."

"And everybody will go out and keep right on trying to get rich.

The Paisley Advocate

PAISLEY, SEPT. 20th, 1916

—Liberals 39, Conservatives 5, uncertain 3. These are the results of the British Columbia elections held on Thursday last, according to the latest returns. Another case of the electors disposing of government graft and rottenness. The voice of the people was also expressed in favor of abolishing the liquor business, and giving the franchise to women. The progressive element seems to be coming strong in the sunset province.

—Within the last 10 years 442 miles of gravel roads have been built in New Hampshire at an average cost of $3,826 the mile. It is clear that auto travel would ruin them in a short time if they were not maintained in good condition all the time. To meet this necessity several hundred patrolmen are employed from the last of March to the first of December in patching every little rut and hole that appears, in cleaning the ditches and culverts and in spreading oil lightly over the surface. Each section patrolman has a section of road assigned to him and he is required to furnish a one horse wagon, a shovel, a rake, a drag and such other equipment as is needed for his work. If the road is not oiled it is smoothed with the drag after every rain; oiled roads do not require frequent dragging. The patrolmen are paid an average wage of $3.25 the day. In 1915 the total cost of maintaining these roads was $240 the mile. The roads officers of New Hampshire reckon that well-maintained gravel roads cost about $250 the mile annually less than that any of the more expensive types of road for the class of travel on four fifths of the through routes in the state. On one-fifth of these routes the travel is too heavy to be carried by gravel and more expensive construction is necessary; no amount of maintenance of a gravel road will make it strong enough to carry more than a certain density to travel, particularly where automobiles are numerous.

—Local option, that little star of hope and progress that has been illuminating with a new light the atmosphere of hundreds of municipalities in Ontario for one or more years past, is totally eclipsed by a much bigger orb of the same class since 7 p.m. on Saturday night, when the provincial prohibition measure came into force. The benefits of local option were considered so decidedly beneficial to society that it had become an impossibility to have the by law repealed where it had been tried out. It is safe to anticipate the same effect of the war-time prohibition law and prophesy that the licensed sale of intoxicating liquors will never be resumed in Ontario. More than this by the summer of 1919, the voters and politicians of Ontario may be ready to prohibit not only the sale but also the manufacture within our fair province. We can almost say that we heard nothing more than the echo of the noise where old King Booze dropped from his throne on Saturday. Stories of big buying of wet goods where the bars and liquor stores were going out of business reached our ears. No doubt some of the stuff is now located in a few Paisley cellars. Men still have the right to import from another province what beverages they choose to indulge in, and some will continue to do that so long as they feel inclined, but the dragon of drink will hereafter be a very small creature compared with the monster that not so long ago stalked through this land, destroying the bodies and souls of thousands of our citizens.

Hydro Electric Charges

Durham Chronicle: Bills are out for electric light for August, and as far as we have learned, the users are satisfied. One office for the month still stands at the minimum of 50 cts, with quite a margin of current unused. One bill for home use was the lowest, yet, being only 61c for the month. This covered cost for lighting, ironing, and 450 floor space. We are satisfied with the lighting charges, but for intermittent power we are not yet convinced that it will be cheaper than gasoline. That service charge of a dollar per horse power per month is the greater barrier to its introduction for small power, used only occasionally. For a constant test hours a day use it would be all right.

Law is Strict

The fact that druggists will still be permitted to sell liquor for medicinal purposes, is not going to add very greatly to the moisture in the dry belt if the law is enforced. Druggists can sell liquor only on a prescription from a medical doctor, and it can be filled only once and not filled for refilling. Pure alcohol can only be used by druggists in making up mixtures that cannot be used as a beverage without a prescription. Druggists are required to record every sale of alcohol and liquor in a special book and send a copy to the Government every six months and no additional sales were made. The penalties are very severe, including the cancellation of the privilege of carrying on business for a period of two years.

LOCAL AND DISTRICT NEWS

Has Ribs Broken

Mr Jas Watson, of con A, Elderslie, fell down stairs at his home on Tuesday morning of last week and had some of his ribs fractured.

For our 10th Bruce Cor.

A reader says: We noticed by last week's paper that the 10th of Bruce correspondent was much in sympathy with our genial mail carrier. We understand the latter hasn't the scribe's habits, anyway.

Hurt in Automobile Accident

Mr And Cormack, of Elora road south, had his jaw bone split by being thrown out of Mr Alex Rose's auto, when the machine performed a loop-the-loop act while travelling through a gully on con 2, on Thursday night. Mr Rose, who was driving the car, came off without anything more than a jolt.

Another Speeder Pays Fine

A second autoist caught speeding through Paisley has acknowledged his guilt and paid the fine exacted by Magistrate Gibson. The stop watch bought for constable Leitch has already paid for itself. The full capital investment having now been realized, future infractions of the speed law will undoubtedly provide dividends.

W.P.L. Booth at Fair

The Women's Patriotic League purpose serving tea, coffee, bread and butter and sandwiches on Fair day, and would be pleased to have all interested help in their usual liberal way to supply the above, also cream, and leave all donations at the council chamber or at the booth on the grounds.

Rev. John McNeill to Go Overseas

At the request of the National Council of the Y.M.C.A., Rev John McNeill, of Walmer Road Baptist church, Toronto, will go to England and France to spend five or six months preaching and ministering to the men of the Canadian contingents. At a meeting of his congregation Rev Mr McNeill was granted six months' leave.

Horses That Will Be at Paisley Fair

Pearce Bros. of Elora road north, captured two red tickets at Owen Sound fair, one for span of roadsters, the other for best double turnout. Mr Hank Irwin has a team of roadsters, too, that are bunching the red tags, winning from a big field of entries at Millbrook. The horse ring at Paisley Fair will be one of the chief attractions this year.

Died at North Bay

Mr Thos W Caley, a former well known resident of Paisley, died at his home in North Bay on Sept 13th. The deceased was in business here as a butcher, and went to Northern Ontario over 25 years ago. He entered the employ of the C P R as a sectionman, and also had a farm. Mr Caley was a native of the Isle of Man. He was married to Catherine Quayle, who survives him, together with several of a family.

Death of Mrs. Galbraith

Mrs Jas Galbraith, sister of Mr John Bannerman, of Elderslie, passed away on Sept 6th at the home of her nephew, Mr Johnston Winch, in Port Elgin, where she had been living for some time. The deceased was born in Elderslie, and lived there the greater part of her life. She was in the west a few years, where her husband died about three years ago. The remains were interred in Salem cemetery.

From Saskatchewan

Mr Arch Muir, in a note to THE ADVOCATE on Sept 9, from Colfax, Sask, says that wheat cutting is finished there, and oats are late, although some are cut. There is a fine crop of oats, with well filled grain and plenty of straw. Wheat was badly rusted in most of Saskatchewan. If the rust had not smitten it, they would have had a bumper crop. There are plenty of harvesters, and wages are $3 per day.

Real Estate Deals

Mr John Collins has sold his farm at the north end, where he has been living, to Mr W R Morrison, of 12th Bruce. Mr Wm. Young, of 9th con Bruce, is giving up farming and has disposed of his farm to Mr Wm McManus. Mr Young will continue to reside in the house. Mr John Alexander sold his property, lot 42 and half of lot 43, con A, Greenock, and is coming to live in Paisley. Mr Gilbert Grey, of Elderslie, is the purchaser. Mr Fred Watson has sold his farm at Killen gowan to Mr E A Zuber, of Brant.

From Shorncliffe Camp, Eng.

Bandsman Emerson Pearce, in a letter to his aunt and uncles, Elora road south, tells something of the life in their camp. "We had a review the other day, in which about 20,000 Canadian troops took part, also ambulance corps and a lot of artillery. It reminded one of the fall fairs to see the fine horses on parade. It seems a shame to send them to France to be killed. Uncle, I'd like to send you some of them, then you'd have a show team. Saw some British aeroplanes chase another and bring it down about a mile from our camp. It was a French plane occupied by two Germans. The night before last about 1.30 o'clock we heard a rumbling sound and heavy gun fire, so we got up, and looking out saw the searchlights playing on a big German Zepp which was flying over our camp. The aircraft guns gave it such a hot time that it quickly turned to sea without doing any damage to us. It dropped several bombs in the sea. It was sure wonderful to see the cannon blazing in the dead of night, and also to see the shells bursting around the Zeppa. This is the first real warfare we have experienced. We never thought of danger. All was excitement." The writer also tells of the baseball competitions that are put on to enliven the existence of the soldiers in training, and also does not forget to thank his friends for the box of cake sent to him.

THE TONIC THAT BRINGS HEALTH

"Fruit-a-tives" Builds Up The Whole System

Those who take "Fruit-a-tives" for the first time, are often astonished at the way *it builds them up and makes them feel better all over.* They may be taking "Fruit-a-tives" for some specific disease, as Constipation, Indigestion, Chronic Headaches or Neuralgia, Kidney or Bladder Trouble, Rheumatism or Pain in the Back. And they find when "Fruit-a-tives" has cured the disease, that they feel better and stronger in every way. This is due to the *wonderful tonic properties* of these famous tablets, made from fruit juices.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

The Potato Crop

The product of the potato fields in this section will be very slim on the average, and a lot of planters won't have enough for winter requirements. There was promise of an abundant crop in Quebec and the Maratime provinces, but the heat and drouth have very much reduced the early estimate. Prince Edward Island is the only eastern province that has a full crop. The west will have plenty of tubers to spare, and already there are some Ontario dealers buying there. Freight rates will, of course, make the price high.

From Pte Alex Blue

In a letter to his father here, written Aug 31st, Pte Alex Blue writes saying that he is getting on fine, recovering from his wound. He is now in the King's Convalescent Hospital, Bushy Park, Hampton Hills, Middlesex, England. The only thing that bothers him now is a pain in the lung that was touched by a bullet. This hospital was given by the king for use of Canadian soldiers. There is also a big castle there, which is intensely interesting because of its historic associations as well as its royal grandeur and magnificence. The people everywhere in England, it seems from Alex's letter, cannot do too much for the wounded Canadians while they are in the convalescent stage. At Leeds they were out in motors every day or enjoying themselves in some park, also were out to tea frequently. He goes to another hospital at Epsom before going to the base.

About the House of Refuge

The Bruce County House of Refuge has about fifty inmates at present, which is the general average. The board is provided at a weekly average cost of $1.62 per inmate. Last year there was 40 acres of farm land cropped in connection with the institution, the inmates assisting in the work. Some of the products were as follows: 12 tons of hay, 2,000 bushels of mangolds, 4t bushels of wheat, 300 bushels of barley, 755 bushels of oats, 150 bags of potatoes, 2 acres of corn, 12 bushels of onions, 1,187 lbs of butter, 334 doz of eggs, 1,000 lbs of pork. The institution produces its own milk, butter and pork entirely. At the barn are 7 milch cows, 2 horses, 5 hogs and 100 hens. The manager, Mr Wiles, states that whiskey has been the cause of sending more people there than anything else during his term of office. Practically all the men there are bachelors. In religion 19 of the inmates are Presbyterians, 12 Methodist, 8 Anglican Church, 11 Roman Catholics, 1 Disciple, 2 Latter Day Saints. In nationality there are more Scotch than any other, the Irish coming second and the Germans last. The oldest inmates are Nicholas Benson from Bruce Tp, who is 96 years of age, and Mrs Vanderburg, only three years younger.

Women's Patriotic League

The annual meeting of Paisley Women's Patriotic League was held on Monday afternoon. The officers were re-elected for the ensuing year: President, Mrs S Baillachey; Vice-Pres, Mrs R B Grant; Sec-Treas, Miss D McArthur.

Following is the financial statement for the year ending Sept 15th:

Shipped from Oct, 1915, to Sept, 1916: 33 mending kits given to Paisley boys, 186 pairs socks, 136 flannel shirts, 75 helpless shirts, 5 suits pyjamas, 2 prs operating socks, 13 pillows, 31 pillow slips, 8 sheets, 15 dozen Turkish towels 1¾ doz bushelbasket towels, 568 bandages, 9 tri angular and body bandages, 45 doz handkerchiefs, 50 doz wash cloths, 4 doz bed pan covers, 12,080 mouthwipes, 1¾ fomentation wringers, 12 prs wristlets, 1 pr knee caps, 1 pr trigger mittens, 9 mufflers, 2 quilts, 2 doz personal property bags, 2 rolls old flannel, 1 roll old linen, 107 qts jam.

Exclusive!

A glance at these cuts will give you some idea of the range and variety of our coats.

SIXTY STYLES

—no two alike—from reliable makers like John Northway & Son and Canada Cloak Co.

We have all prices—

$10.00 to $36.00

May we show them to you?

For the Youngsters.. from 6 to 14 years.. Our Variety is Large

The Coat in the illustration comes in three different colors and is priced at $6.75. Others from

$4.50 to $8.00

BALLACHEY, LAIDLAW & CO.

Both 'Phones — Top Prices for All Produce

Misty Vision

Comes with advancing years, but can be cleared by properly fitted glasses. Spectacles are our specialty. When we fit them, they give satisfaction. Eyes examined free.

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

Canning and Preserving Fruits

(Taken from the Ontario Fruit Branch circular. Put this in your book of Recipes.)

There are two distinct general methods of treating fruit so that it will not change or be changed though held for a time ranging from a few weeks to three or four years. These methods are termed canning and preserving.

Many people do not realize the difference. We find, however, that canned fruit depends for its keeping qualities upon heating and perfect sealing, whereas preserves need not to be sealed because their sugar content prevents micro organisms from acting upon the fruit.

Strictly speaking canned fruits and preserves should keep the fruit in its exact original condition. This, however, is an ideal which is never realized. If fruit is sealed in tin cans and then cooked long enough to kill all the minute forms of life within the can there are still several changes which may occur. Red fruits—strawberries, raspberries and cherries—are high in acid. The acid attacks the tin, forming salts of tin, and a little later quickly destroys the colour of the fruit. Such a change has little effect on flavor and digestibility. Canners have largely overcome this difficulty by obtaining a special kind of tin plate and by covering this tin plate with a gold colored enamel.

Fruit canned in glass jars cannot lose color through tin salts. There is sometimes a change in color due to light. Here again the red fruits suffer most.

Probably the most important fact to remember regarding canned fruits is that changes such as fermentation due to micro organisms are not prevented by the sugar added. The sugar used is for flavoring. Heating and sealing kills the harmful molds and yeasts and then keep others from coming into the container.

There are two ways of canning fruits. Some people cook the fruit before placing it into jars or cans, others pack the raw fruit, cover it with hot sugar syrup, seal or partly seal, cook and then seal if sealing has not been done first. If the fruit is cooked before placing in the container the latter must be thoroughly sterilized first. In the second case the container only need be washed.

Preserves include jams, jellies and marmalades. If the fruit product contains 70 per cent of sugar, by weight, molds and yeasts cannot live in it. Hence, if a person knows the weight of the ingredients put in and as well as the yields of the preserve one can usually predict whether the product will keep. Take the following case:—

Weight of fruit	10 lbs
Weight of sugar	10 lbs
Total ingredients	20 lbs
Yield of jam	14.5 lbs
Loss of evaporation	5.5 lbs

Thus 14.5 lbs of jam contains 10 lbs or 69 per cent.

To this may be added 3 per cent for the sugar naturally contained in the fruit, making 71.9 per cent sugar. This should keep.

Drops of water on the surface of a preserve dilutes it at that point and will likely start mold growth. Hence, jars to be filled with jam or jelly should be dry as well clean. For the same reason preserves should not be covered until cold because the steam rising from the warm or hot product will condense on the cover and have the same effect as an added drop of water. If it is desired to cover preserves while they are hot, sterilize the top, seal perfectly while hot and turn the jar upside down. By this method molds are eliminated to begin with and as with canned fruits prevented from entering afterwards.

Preserves also lose their color through the action of light.

In the case of jam and marmalade moderate firmness is desired. Jellies require to be quite solid. In all cases the solidifying is due to the combination of sugar with a substance in the fruit called pectin. The jellying or solidifying only takes place when the preserve is condensed to a certain extent by evaporation. Some fruits are low in pectin and will not properly solidify no matter how much condensed. A viscous, sticky syrup results. In any case the preserves is improved if a juice such as crab apple or currant juice is added. This juice is rich in pectin. By using it more sugar may be used, say to of sugar to 8 of fruit. Thus the time of cooking is reduced, color and flavor are retained, the yield is increased and solidifying results.

It will be seen that canning and preserving depends upon fixed laws. One should always try to explain why an operation of proportion is required. A good set of scales might mean a saving of material to many a housewife.

After Being East

Mr R J Follis, of Carmangay, Alta, who was down from the west this summer and spent a week in this neighborhood, published an account of his trip in the Carmangay Sun. At Chesley, Mr Follis says, "Almost everyone had a different question to ask. One said he invested some money in a going concern in ——. What do you know about it? I did not know anything about it. I cheered him up by telling him that going concerns were good investments, providing they knew which way the concern was going. Another said experience was a good asset, but he would prefer the bank roll he exchanged for his. How about Oil? What would I advise? The only kind I would advise at present was the Castor kind. How is subdivision property selling? I said I understood that all subdivisions were owned by Eastern capitalists. Have you got stung? Look here, the time is not far distant when we sorely tried Easterners will rise up as one man and wipe out and clean the earth of wildcatters. If the air was knocked out of them there would be nothing left. It was hard to make some of them believe their holdings were good. I explained that there were real realestate men in the West and that the very shadow of the fakir had flown and that no doubt these gentlemen would give them a hearty welcoming to the West and put them next a dead sure thing. Of course I cautioned them all that if they landed in some town looking for real estate to invest in other than farm land, they would probably be handed over to the proper authorities for examination to see if they were fit and proper persons to be at large. I also explained to many that the real estate boom had exploded long ago, and there is nothing to fear as things are quite different to what they were four years ago, when nobody worked and every person was buying and selling real estate, oil or shares or promoting some gigantic scheme that was to materialize nowhere. To-day in the West everybody works and father too." Of Paisley Mr Follis writes:

Bread Making Contests
At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions set lanned below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour
the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered in each local Fair:

1st Prize—1 gold-y subscription to "My Magazine" for 1 year. This magazine is full from cover to cover with interesting articles suitable for young people. It is published in England. Value $2.00 per year.
2nd Prize—1 handsome pocket map of the Dominion to "My Magazine." Value $1.25.
Extra Prizes—Where exhibitors send in more than 3rd prize will be awarded of 6 cents paid on subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th, and 6th prizes of one year's paid-up subscription to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with interesting stories and stories relating to history, nature-study, animals, bird-life, etc.

Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf to be sent to Ontario Agricultural College, Guelph, by the district representative to special contains provided. The judging is done by Miss M. A. Purdy of the Department of Homemaking and Flour Testing at the College.

Provincial Prizes—The 1 losers of first prize at each local fair - eligible for following Provincial prizes. The first and second prizes, or third and fourth prizes, will not be awarded in any one county.

1st Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years; if the winner be less than 17 we promise her a rich contribute assisting her to take the course when she reaches the right age. Value of course $75.00, which pays for tuition, board and washing. The winner lives at Macdonald Hall while taking course.
2nd Prize—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.
3rd Prize—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good board and lodging can be secured for them in Guelph. Value of course $25.00, which pays board of student in Guelph. (No fees are charged for course.)
4th Prize—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.
5th to 20th Prizes—The Famous Boston Cooking-school Cook Book by Fannie Merritt Farmer, latest edition (1914). There are 2172 thoroughly tested and 1200 photographic representations of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1914, or her 17th birthday does not occur before Nov. 1, 1913. One loaf of bread must be submitted baked in pan about 7 x 4 inches and 3 inches deep, and divided into two loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf		15 marks
(a) Color	8 marks	
(b) Texture of crust	8 marks	
(c) Shape of loaf	6 marks	
2. Texture of Crumb		40 marks
(a) Evenness	15 marks	
(b) Lightness	20 marks	
(c) Color	6 marks	
3. Flavor of Bread		45 marks
(a) Taste	25 marks	
(b) Odor	20 marks	

Each loaf must be accompanied by the part of the flour bag (containing the face of the Old Miller trademark) and an entry form must be signed by the girl and parents or guardian stating date of birth, P. O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The form will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way as in the case of all the other regular contests. The Provincial results will be announced a soon as possible after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practise using it so as to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competitions is open to all parts of the province where Rural School Fairs are held except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haldimand, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. You regret, therefore, that the competition cannot include these Counties.

If you cannot get Cream of the West Flour in your neighborhood, write us for prices.

Address **Campbell Flour Mills Co., Limited, (West) Toronto**

WOMAN SUFFERAGE.

Its War Time Aspect.

London, Eng. The women of England are doing their duty. They are taking care of the wounded, or if they cannot assist in work of that kind they are adding their savings to promote the good work. They are knitting and sewing for the soldiers at the front. The suffragists have given so little trouble to the government that it will undoubtedly soften the hearts of those in Parliament, since the "militants" have turned all their energies to aid the fighting men of England, and on sufferage may soon come after the terrible war is over.

Thousands of women in Canada have overcome their sufferings, and have been cured of woman's ills ny Dr. Pierce's Favorite Prescription. This temperance medicine, though started nearly half a century ago, sells most widely to-day, because it is made without alcohol or narcotics. It can now be had in tablet form as well as liquid, and every woman who suffers from backache, headache, nervousness, should take this "Prescription" of Dr. Pierce. It is prepared from nature's roots and herbs and does not contain a particle of alcohol or any narcotic. It's not a secret prescription for its ingredients are printed on wrapper.

Many a woman is nervous and irritable, feels dragged down and worn out for no reason that she can think of. In ninety-nine per cent. of these cases it is the womanly organism that requires attention; the weak back, dizzy spells and black circles about the eyes, are only symptoms. Go to the source of trouble. When that is corrected the other symptoms disappear.

St. Thomas, Ont.—"I wish to say for the benefit of other women who suffer that I recommend Dr. Pierce's Favorite Prescription as a great help. I have personally recommended the same to many who in turn have been helped a great deal by its use."—Mrs. F. J. Bowden, 19 Oliver St., St. Thomas, Ont.

"This town is the former home of the genial editor of the Carmangay Sun. It is in one of the best agricultural districts in the country. It is acknowledged to be the best grain and stock market in the north. Among the citizens are some who are extremely wealthy. We saw many of ye editor's friends and all seemed anxious to hear a word about him, especially the gentle sex. They wondered why it was you had not fallen to the charms of some of the fair Western girls. I assured them that the time was not far distant from the conjugal state when you could look as subdued as Geo. Carter, so they all extended prehymeneal congratulations."

—The Advocate office has a splendid stock of wedding stationery and calling cards on hand, also the most beautiful styles of type, so we are able to turn out the finest lines of wedding invitations, announcements, cards, etc. We can do work fit to invite the best of people to a wedding, so why pay two or three times as much to city printers or engravers?

—Port Elgin tax rate is 32 mills on the dollar for this year's levy

Paint Has Two Duties to Perform

One is to protect—the other to beautify. Paint that doesn't do both is not good enough for your buildings.

Lowe Brothers HIGH STANDARD LIQUID PAINT

both protects and beautifies—and has many distinct advantages over hand-mixed and cheap paints. It covers more surface—and does it more thoroughly; it is easy to apply, enabling your painter to do the work in less time; it wears from two to three years longer than ordinary paint and holds its color well; it fails only by gradual wear and leaves a good surface for repainting.

"High Standard" saves repairs and makes your buildings worth more. You'll get best results with this good paint. Ask for color card.

Promoted at the Front.

Mr David Robertson, K. C., of Walkerton, received word that his son, Roy Robertson, who has been serving at the front with the Canadian Military Engineers, has been promoted from a captain to the ranks of a major. The announcement which appears in the London Gazette of Aug. 16th, states that appointment will date back to Feb 18th. Roy's cousin Mr Eric Robertson, son of the Court Treasurer and Mrs Robertson here, and who is with the Royal Canadian Flyin, Corps, in England, has also been promoted from a lieutenant to the rank of captain.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER V.—(Cont'd).

"Nonsense! She's looking this way; go and ask her, man. I'll wait until the waltz is over, then we'll go on to the club, for, between you and me and that hideous statue, which is all out of drawing, by the way, I have had pretty well enough; and you seem, to judge by your face, to have had a great deal too much."

Bertie, without a word, left his friend, fought his way through the crowd, after some maneuvering, gained Lady Ethel's side.

"Have you saved me that dance which you half promised me this morning?" he said.

Lady Ethel turned—she did not know that he was so near—and a smile, bright, but transient, passed across her face.

"There is one dance—it is only a quadrille," she said; "all the waltzes are gone."

"I am grateful for the quadrille only, and do not desert me that," he said.

"I thought you had gone," said Ethel. "My brother was looking for you just now, and I told him that I had seen you go out."

"I was in the corridor cooling," said Bertie Fairfax.

"Is it cool there?" she asked; "I thought it could not be cool anywhere to-night."

Then Lord Fitz came up, his simple face all flushed with the heat and the last dance.

"Hello, Bert, I've been looking for you. I say——"

"You must tell me when the dance is over," said Bertie, "there is no time."

And he led his partner to her place in a set.

A quadrille has the advantage over its more popular sister, the waltz; it allows of conversation.

Bertie could talk well; he had always something light and pleasant to say, and he had a musical voice in which to say it.

He was generally too indolent to talk much, but neither his natural laziness nor the heat seemed to weigh upon him to-night, and he talked about this matter and on that until Ethel, who was not only beautiful but cultivated, was delighted.

Too delighted, perhaps, for my Lady Lackland, from her place of espionage in a corner, put her eyeglass and scanned the daughter's rapt and sometimes smiling face with something that was not altogether a pleased expression.

"Who is that good looking young fellow with whom Ethel's dancing?" she asked of the dowager Lady Earnwell, a noted scandalmonger, and an authority on every one's position and eligibilities."

"That is young Fairfax. Handsome, is he not? Pity he's so poor."

"Poor, is he?" said the countess, grimly.

"Oh, yes, dreadfully. Works for his living—a writer, artist, or something of that sort. Really, I don't know exactly. He is in the Temple. Very amusing companion, evidently. Lady Ethel looks charmed with her partner."

"Yes," said Lady Lackland, coldly, and in her heart of hearts she determined that her daughter should receive a lecture upon the imprudence of wasting a dance upon such doubtful and dangerous men as Bertie Fairfax.

CHAPTER VI.

Captain Howard Murpoint had not exaggerated his powers of pleasing when making that important communication and revelation to his accomplice, Jem Calder the Portland cliffs.

He had not been in the possession of the marvelously comfortable suite of rooms at Mildmay Park many days before young and old, mistress and servants, were ready to pronounce the captain a most agreeable man, and his servant, Jem, a most amusing and obliging fellow.

The morning after his arrival the captain came down to breakfast elegantly attired in a loose velvet shooting coat, which set off his strong, well-made figure to advantage.

His smooth face was set with a pleasant smile, and his voice was toned to a half-affectionate interest as he shook hands with Mrs. Mildmay.

"I hope you slept well, Captain Murpoint?" she murmured.

The captain declared that he had never slept better, and that his quarters were all that could be wished.

"Violet is not down yet," said Mrs. Mildmay. "She is late, but we were rather later than usual last night, and, I dare say, the excitement of your arrival made her feel tired. Ah, there she is."

And Violet entered at the moment, and came up to give her aunt the morning kiss.

Then she turned to the captain, and once again his bold, watchful eyes shrank for a moment before the clear, calm gaze of her pure ones.

His salutation was a finished piece of acting, so reverential, so paternally affectionate, and so respectful.

Violet shook hands with him, and tripped to her seat.

"And did the ghosts annoy you?" she asked, as the captain spoke of his night's rest.

"No; they were considerate to their guest. Perhaps when we are more familiar they may be more troublesome. You have had a good night's sleep, 'tis evident," he continued, glancing admirably at her fair, fresh blooming face.

"I always sleep well," said Violet, simply. "Neither ghosts nor indigestion disturb me."

They repaired to the drawing-room, that being the coolest part of the house, and there the captain was most attentive. The conversation got on to the topic of music, and Violet turned over her new songs, and at last, to answers to a question whether he sang or not, the captain offered to sing.

He seated himself at the piano, struck a few chords, and commenced a barcarole in so sweet and yet powerful a voice that Violet was charmed.

The music drew Mrs. Mildmay into the room from another part of the house, and the morning, which Violet had feared would be extremely dull, promised to pass away most pleasantly.

While he was singing, Violet heard her door open.

She was standing at the piano, and she did not turn her head, but raised her eyes to a mirror which hung over the instrument, and which reflected the whole of the room.

As she did so, she saw that the door was opened by the captain's servant, and her gaze was riveted by the picture which the mirror showed her.

The man, thinking himself unobserved, was standing, with the door handle in his hand, with such an expression of infinite mockery and sardonic amusement on his evil face that Violet felt herself fascinated and strangely impressed by it.

Suddenly the captain raised his eyes, and she knew by the look of mingled anger, alarm, and suspicion which displaced the smile upon his face that he was conscious of her fixed attention upon the mirror.

He finished the song abruptly, turned his head, and saw Jem Starling, whose face instantly resumed its usual snug demureness.

"Well, James?"

"A letter, captain," said James, "marked 'immediate.'"

The captain took it.

Jem left the room.

"Pray, do not mind us," said Mrs. Mildmay, and, with a bow, the captain took out the letter, which he had thrust into his pocket.

He was almost on the point of returning it to the hiding place, for at a glance he saw that it was only a sham one—an old envelope sealed up.

However, with his usual quickness he decided to open it, and, accordingly, made a slight fuss with the seal, and, taking out a piece of paper, read:

"The pleece inspector's cum down to-day."

Captain Murpoint smiled.

"Business, my dear madam; business men always mark their letters 'immediate,'" and he thrust the letter into his pocket, and commenced talking as if the matter were of no moment.

Violet played a little, and practiced some new song, and Mrs. Mildmay ventured to pass through the French window into the garden, the captain accompanying her.

It was after they had left the room that Violet, happening to glance at the carpet, saw a scrap of paper by her side.

It was the captain's note.

"The pleece inspector's cum down to-day," she said; "why, where can this have come from?"

For the moment she thought it must have been the letter which the captain had received, but the scrap of paper had so little of the appearance of a missive that had come through the post, and the information seemed to have still less connection with the captain, that she dismissed the idea.

"Strange," she said, and, with a laugh, she put the piece of paper in her pocket.

The captain had pulled it from his with his pocket handkerchief.

CHAPTER VII.

Five o'clock came, and with it Leicester Dodson.

It had been very warm out all day; it was warm still, but Mr. Dodson did not look at all distressed, and his velvet lounging jacket hung loosely and comfortably upon his strong, muscular frame.

"Have you courage enough to face the weather and go driving tandem?" he said, putting his head through the window frame, "or do you give in?"

"No," said Violet, laughing; "on the contrary, I feel quite brave. I will not keep you long. Will you take a seat while I get my hat?"

He entered, sauntered to a chair, and dropped into it, prepared to wait the three-quarters of an hour which ladies usually require for donning hat and cape.

But Violet was quick and impulsive in all her actions, and before ten minutes had passed he heard her voice on the stairs again, speaking to a servant.

Before she entered the room, however, the door opened, and Captain Murpoint came in.

"Oh, here you are, Mr. Dodson," he said. "Can you tell me at what time the post goes out?"

"Six o'clock," said Leicester.

"So soon?" returned the captain. "I am afraid I shall be compelled to deprive myself of the pleasure of accompanying you. I have some rather important letters to write, and shall barely have time to get through them."

"I am sorry for that," said Leicester Dodson, quietly telling a polite falsehood, for he was in reality rather glad than otherwise, and looked forward with no little satisfaction to a tete a tete with Violet.

"So am I," said the captain, and, as he spoke, he looked about the room, as if searching for something.

"Lost anything?" asked the other, in his slow, indolent way.

"Yes," said Captain Murpoint, "a letter. I have dropped it from my pocket, and I fancied I should see it in this room."

At that moment the door opened, and Violet entered.

The captain ceased his hunt immediately, and, murmuring softly, "It's of no consequence," turned to Violet and told her that he should be compelled to remain at home.

"I am sorry," said Violet, echoing Leicester's words, and with as little truth.

And she passed out onto the lawn.

"I don't know whether James has harnessed the ponies properly," she said, doubtfully, as the groom appeared, leading up the pretty pair tandem fashion.

"No, he hasn't," said Leicester, after examining them.

And he quietly explained to the man how the operation should be performed.

Then he handed Violet into the little toy phaeton, and took the reins.

At first the ponies, unused to their novel positions, and quite fresh after two days' rest, showed signs of rebellion, and started first to one side, then the other, and at last the leader ventured to attempt the feat of walking on his hind legs.

(To be continued.)

LESS INSANITY DURING THE WAR

WHAT AN IRISH ALIENIST HAS TO SAY.

Presents Remarkable Picture of the Tonic Value of Great Conflict.

An interesting sidelight on President Wilson's remark about the world going mad is given in the annual report of Dr. William Graham, of Belfast, one of the most highly reputed Irish alienists. Dr. Graham presents a remarkable picture of the tonic value of war. He says:

"It has become common practice since August, 1914, to say the world is growing mad, and there is a widespread popular notion that the distress and agony of a conflict so terrible as the present one must end in a profound disturbance and alienation. Yet the fact is indisputable that insanity, like corns, has lessened during the period of the war."

Improve Health of Men.

So far as the future is concerned, Dr. Graham is equally encouraging. He says: "There are solid grounds for the hope that, especially although exclusively among women, we shall find a great diminution in those neurotic disorders that form a part of the mental abnormality of thousands of men who have gone, or are preparing to go, to the front, who have all their life been subject to the bondage of neurasthenic weakness and incapacity of psychasthenic fears or hypochondriac fancies. They have never known what it is to live, but at the country's call they have flung from off them the spell of ancient inhabitations and long established impracticalities and have gone forth to face wounds and death. Only when summoned to possible surrender of life have they learned how wonderful life really is. The physical regime under which these men are compelled to live can have nothing but the best effect on those subject to its discipline.

Women Learn of Life.

"Especially significant is the change coming over the lives of women of the middle classes. These sheltered daughters of the merchant, of the professional man, victim of mid-Victorian traditions of gentility, are now falling into line with their sisters of the higher and the humbler social ranks, and are discovering that life is something greater than the latest novel or a game of tennis, or even the torpid gossip of the church sewing meeting. Idleness and ennui have lost their hold. Healthy and unselfish activity is now the prevailing fashion among war-enfranchised women. It has set them free from the benumbing conventionalities that threatened to stifle their psychic energy, and so far it has contributed to the soundness of mind and nerve among the mighty sociological forces which the present world conflict set in motion."

LOSES EYE ON FIRST AIR TRIP.

British Flier, Maimed, Shoots Foe, Lands, Cables Mother.

An army medical officer back in London from the front reported the case of a Royal Flying Corps observer whose eye was shot out. A German airman got a shot at him on his first trip into the air over the German lines.

"It sounded as if some one were playing a mandolin when the bullets came through the wires of our machine," he said.

One missile gouged out his eye and embedded itself in the frontal bone. Despite the injury the observer let go with his machine gun and drove off the enemy.

The pilot brought the machine back to the British lines and helped the observer to walk to the causuality station, where he cheerfully asked that his mother be informed that he was "slightly injured."

PRACTICAL FARMING

Can Rust Be Prevented?

There is no way of treating the seed or spraying the crop so as to prevent rust. It is impossible to control rust entirely, but loss from rust may be reduced considerably by acting upon the following suggestions:

1. Destroy as far as possible the Common Barberry (Berberis vulgaris) and the Buckthorn (Rhamnus cathartics) growing in Ontario. Rust may cause serious loss in districts where these shrubs are not found, but, when they are present, they do undoubtedly tend to increase the amount.

2. See that fields on which grain is to be grown are well drained. Rust is nearly always worse on poorly-drained land. Such land remains colder longer in the spring, and hence the germination and early growth of the grain are retarded. In wet seasons also grain ripens more slowly on poorly-drained land. This slow development of the crop and the excessive moisture provide the conditions most favorable for the development of rust.

3. Endeavor to have the crop mature as early as possible. This can be done to some extent by early seeding in a well-prepared seed bed.

4. Avoid those varieties of grain which give poor returns and are also badly injured by rust. See table at end of this article provided by Prof. Zavitz, of Guelph, showing the extent to which different varieties are attacked by rust.

5. Do not mix varieties of seed grains, the following is the result of varieties of oats, but use only pure seed of one variety to secure uniform ripening.

6. Treat all seed grain to prevent smut, as plants infected with smut are very subject to rust, which may get started on them and then spread to healthy plants.

7. Sow only sound, plump grain. This can be secured by the careful use of the fanning mill. Shrivelled grain is very likely to have been produced by badly rusted plants.

8. On rich soils be careful in the use of manures containing large amounts of nitrogen, such as barnyard manure and nitrates. Such manures on rich soil produce an excessively rank growth, which invites rust.

9. Rotation of crops, proper manuring, thorough cultivation, freeing the fields from weeds, and all such farm practices which tend to promote healthy growth and the proper maturing of the grain lessen the chances of rust causing serious loss.

In connection with the rusts of grains, the following is the result of experiments conducted by Prof. Zavitz at the Ontario Agricultural College in carefully testing different varieties of farm crops. The following table gives the average of five years' results (1910-1914 inclusive) in number of days in reaching maturity, in yield of grain per acre, and in per cent. of rust on the straw of each of eight varieties of oats, three varieties of six-rowed barley, and ten varieties of winter wheat:—use of a quick-acting fertilizer on the fields in the fall, just as soon as general infestation becomes apparent, with the idea that the fertilizer will so quicken the growth of the wheat plant that it shall acquire powers of resistance and recuperation which will enable it to withstand the attacks of the fly, and which also will send it into the winter season well prepared to withstand the cold weather.

The fertilizer which should be used for this purpose is one which shall have from 2 to 3 per cent. of ammonia, in order that a quick and vigorous growth of the plant may be assured. The result is that the plant tillers more freely, and even after suffering some damage from the fly, it will send up head-producing stems in the spring. There is nothing wonderful or mysterious behind this method; merely the taking advantage of the productive capacity of a fertile and enriched soil. In fact, it is so eminently commonsense that it ought to make an appeal to every farmer. The plan especially commends itself, for it promises not alone comparative immunity from Hessian Fly damage, but as well it holds out the very best assurance of an increased yield of wheat, and that, after all, is what every farmer is working for.—Canadian Farm.

Feeding Fat into Milk.

It is popularly supposed that the quality of milk depends on the feeding of the cows. This is not the case. So long as a cow is not fed in such a way as to derange her general health, change of food has very little permanent effect on the quality of her milk. A sudden change may impair her milk slightly for a few days, but as soon as she is accustomed to her new diet her milk returns to the normal. Very succulent grass does not produce inferior milk unless it deranges the health of the cow by causing her to scour, and this is commonly avoided by giving the cow two pounds or three pounds per day of cotton seed meal.

Professor Wood of Cambridge University, England, writing in the Cambridge Chronicle says:

"The following observations show that a too watery diet is more likely to reduce the quantity of milk than to impair its quality. Ahead of cows feeding on watery grass in August were given two pounds of cotton seed meal per head per day, and their milk weighed and analyed. Some of the cows then had their cotton cake replaced by 28 pounds of wet brewer's grains, a watery food reputed to produce a pious flow of milk of inferior quality. As a matter of fact, the change was found to have decreased the flow of milk and to have increased the percentage of butter fat from 3.33 per cent. to 3.46 per cent."

The idea that water may be put into the milk by giving the cow a watery diet assumes that the cow is a mere machine, an assumption which is entirely at Variance with all our knowledge of the physiology of the secretion of milk, and with all the results of carefully recorded experience. A cow is very much a live animal; she makes or intends to make her milk for her calf and as a matter of fact she can be actually starved of food for some time before the quality of her milk is seriously affected.

The Fall Hogs.

It pays to keep a sharp lookout for the fall litters.

There is profit in the fall litters if they are properly cared for; if neglected, they can be worse than a dead loss.

Get the early pigs ready for the early market.

Utilize the fallen fruit with the grain ration to help make rapid growth.

Every pound gained now, costs less than when colder weather comes.

The price of bacon and all pork products should convince any one that it does not pay to neglect the pigs.

Separate the pigs and put the larger, stronger ones together.

Give the smaller ones extra care and watch them catch up.

The big ones rob the smaller ones and keep them back.

Be sure the hogs have no lice on them.

Pigs that have lice will not grow, use some good spray, regularly, until lice are all gone.

A good scrubbing with soap and water will often start growth in a thriftless pig.

Whole oats scattered on a clean platform will help to grow strong bone. Sweep the hulls off the platform every day.

Called.

"My country calls me!" exclaimed the emotional patriot.

"It shouldn't have been necessary to call if you have any useful service to perform. You ought to have been on the job."

The Lesser Evil.

Old Grump—Why doesn't Ethel marry that young idiot? I am getting blame tired of his coming here so much.

His Wife—I believe I'd prefer to have him come here—if she married him he will stay here.

Huns Across the Sea.

The distributor of bread and meat cards—his wife and dog.

JAN SMUTS IS A MILITARY STAR

ONE OF THE GREATEST GENERALS OF THE WAR.

Will Soon Present Britain With Germany's East African Colony

"Jan Christian Smuts will yet play a great part in South Africa. He is one of the cleverest lawyers in the country and a man of versatile attainments besides. He is personally a very simple man, and to meet him one would not suspect that he possesses so firm a will and so determined a character. Although scarcely thirty years of age and without the slightest previous experience of military affairs, he developed in the later phases of the war into a most brilliant general.

Fifteen years ago "Oom" Paul Kruger wrote this prophecy and character sketch of the Boer-British general, who, as indicated in the war despatches, is momentarily expected to give the final thrust to that part of the Kaiser's army which for two years has been fighting in the swamps and forests of German East Africa to retain possession of the last of the Prussian colonies.

To Smuts the lawyer will go the credit of adding to the British domain an empire four times as large as the state of New York. He will be acclaimed as one of the greatest generals of the war, and already in England the demand has been made that he shall be sent to the front in France, where his surpassing military qualities may be utilized in driving the Teutonic hordes back beyond the Rhine.

Ancestors Were Germans.

General Smuts is a Boer whose ancestors, Germans, went to South Africa to escape religious persecution in Europe at the time the Hugenots swarmed to America. The British newspapers like to call him an Afrikander—a man born in South Africa of British parents—but he calls himself a Boer and he is proud of the name.

Smuts is not quite forty-five years old and with the possible exception of Louis Botha, the South African Premier, and his co-worker in peace, war and politics, he is the biggest man in public life on the continent of Africa. South African admirers say Asquith and Lloyd George are not in the same class with the lawyer whom Kruger picked to be a great man.

Farmer, Lawyer, Politician.

Smuts was born on a farm in the Transvaal, ten years after his father had assisted in trouncing the British at Majuba Hill. He was anti-British up to the time he was ten years of age. Then he went to England for a university education in law. He returned pro-British, but did not practise it very long, because he began the practice of law by going into politics. In those days, which was about the time Dr. Jameson made his unsuccessful run across the border for the purpose of annexing the Boer republics to the British Empire, it did not pay a politician in the Transvaal to be very pro-British, so Smuts went out and shot a couple of Jameson's men and became anti-British again.

Smuts went into the South African campaign as a private and ended as a general and one of the peace commissioners.

Momentous Eloquence.

It was as one of the Boer peace commissioners, who met General Kitchener and Sir Alfred Milner, the British commissioners, that Smuts rose to the rank of statesman. The commissioners had been unable to agree and the Boers returned to the convention of the national delegates to obtain new instructions, whether they should surrender unconditionally or return to the field and renew the war. For days the convention was at loggerheads. At length Smuts gained a hearing. He told them the truth about the situation, that it was impossible to fight longer, that they could expect no help from Europe or America, and that further resistance meant useless slaughter.

"Brethren," he cheered in what is regarded among South Africans as one of the most eloquent and certainly one of the most momentous speeches ever made in that country, "we have vowed to stand fast to the bitter end; let us be men, and acknowledge that that end has now come.

"The future is dark, indeed, but we will not give up courage, nor our hope and trust in God."

Let the Kaiser Answer.

The brighter day was not long in coming. Within a few years the United States of South Africa rose out of the ashes of the war, and it comprises practically all the vast territory south of the Limpopo river. To-day the Boer republics are out of existence, but in their places has risen the Boer nation. The British Government gave the confederated colonies a parliament and a liberal constitution.

Louis Botha and Jan Smuts are the leading Boers, and consequently these two men, who wept as they signed away the independence of their countries fourteen years ago, are the greatest men in the white man's Africa, the one a civil and the other a military dictator. One has gone beyond the borders of his country and has added to the British Empire that vast territory formerly known as German Southwest Africa. Smuts has gone afield and is about to present to his sovereign another huge territory, German East Africa. Then these brothers in politics, statesmanship and arms may feel warranted in turning their eyes toward Berlin and to wonder what are the thoughts of that same Prussian Kaiser who virtually promised Kruger almost a score of years ago to be his royal protector—and then broke his pledge.

GERMANY LEARNING TRUTH.

Newspapers Suddenly Admit the Defeat at Verdun.

Under the caption: "What has Happened to Germany?" the Daily Express says:

"Suddenly the veil is lifted and the true state of affairs is disclosed in the latest German newspapers. They admit defeat at Verdun and describe it not only as a military, but also as a moral, defeat, 'the percussion of which is at this moment felt so seriously in the Balkans.' They clamor for peace and renounce any ambition of annexation. A veritable disease of truth telling has broken out among them."

The newspaper cites the Berlin Post as follows: "Falkenhayn's recall is an admission of defeat suffered before Verdun."

The Berlin Vorwaerts (Soc.) is quoted as saying: "A truce with England must be arranged even at the sacrifice of some of Germany's chief ambitions."

The Schwaebische Tagwacht (Soc.) says:—"Even if the Russians and Italians and all their Continental allies were beaten England's naval supremacy would not yet be destroyed. We may go so far—unless a miracle happens victory will never be realized, not even by war that would last thirty years. The prolongation of the war will only plunge us into deeper misery and expose us to the gravest perils."

THE COSSACKS.

Pass Their Lives on Horseback in Service of the Czar.

The millions of Cossacks that serve Russia are divided into eleven voisos or groups, among which the principal ones are those of the Don, Kouban, Orenberg, Astrachan, Oussouri, Transbaikalio and Terek. These groups have a double hierachy, one side being civil and the other military. Established by several czars upon the territory that they occupy, they are always ready to vault into the saddle for the defence of the country. Their stanitzi or villages are their ostroghi or citadels of defence. There are no nobles among the Cossacks, as it is forbidden for anyone to acquire property apart from the possessions of the horde. Certain voiskos are practically communistic. Between the Cossack villages and the Russian peasants the division is complete. Ethnically the peasants and the Cossacks may be of like origin. The peasants conscientiously till the soil. The Cossacks pass their lives on horseback in the service of the Czar and disdain the labors in the fields. The number of sotnias or squadrons of Cossacks was fixed in time of peace at 894, with about 100 men in a quadron, a total of 89,400. But this number has been greatly augmented since the war began.

WONDER POWER OF COAL.

There is Remarkable Energy in a Small Lump.

The energy contained in coal is enormous. A pound of coal—that is to say, a piece about as big as a man's fist—in combining with oxygen, radiates heat equivalent to the energy of lifting about 10,000,000 pounds 1 foot high. Put otherwise, one pound of coal will do as much work as a powerful horse can do in five hours, remembering that the work done by a horse in one hour is nearly 2,000,000 foot pounds.

These estimates refer to the potential power of coal; but when we actually attempt to turn its heat into mechanical energy, we find that we can utilize only about one-eighth or ninth of its potential energy.

Coal also gives us innumerable chemical products. Sixty years ago Sir William Perkin extracted from coal-tar a beautiful mauve rye, starting a new branch of coal-tar chemistry, which has now grown to a huge industry.

From coal-tar we now extract not only an enormous number of dyes, but also delicate perfumes that rival the violet and the rose, delicious flavors, that appeal to the epicure's palate, explosives powerful enough to blow up a battleship, and drugs of all sorts—all from the decayed vegetation of primeval forests.

Convincing Proof.

Mother (at the party)—Why did you allow that young man to kiss you?

Daughter—Why, ma!

Mother—Oh, you needn't "why, ma" me. One side of his nose is powdered and one side of yours isn't.

Costs More.

"I've tried to teach my boy the value of money."

"Good thing."

"Well, I don't know. He used to behave for ten cents, but now he wants a quarter."

Brings Down His Twelfth German Plane

SECOND LIEUT. GUYNEMER, of the French Aviation Corps, who recently brought down his twelfth enemy plane. He has taken part in many aerial battles, several times he had hair-breadth escapes from death. Guynemer is one of the most successful of the French aviators, already he has earned the title of the "Fokker Killer" and he is only a youngster.

SOAP RATIONS FOR GERMANS NOW

ONLY 1¼ OUNCES PER MONTH TO EACH PERSON.

Price List at Which People Are Allowed to Buy Clothing Published.

Clothing and soap now can be had in Germany only on the ration-card system. The new regulations came into effect on August 1. Clothes for both men and women can be purchased without special permit cards only if the articles in question are contained in a so-called "free list" of maximum prices. Anybody who wants a suit or a dress costing more than the moderate prices fixed must obtain special permission of the "Imperial Clothing Office" and assign valid reasons for such "extravagance." The object of these unprecedented and drastic regulations, of course, is to conserve the supply of textile materials for the clothing necessities of the army during the third year of the war.

Soap Cards.

Soap is now allotted at the rate of 50 grammes (about 1¾ ounces) per person per month, including shaving soap, with an extra ration of nine ounces of "soap powder." Any child born on or after August 1, 1916, is entitled to a soap card on the above basis. Special allowances of four cards are allotted to physicians, nurses dealing with infectious diseases, dentists, veterinary surgeons, and midwives. Stokers, coal-heavers, and chimney sweeps are entitled to two extra cards.

This is the clothing "free list":

Men.

Morning coat, waistcoat, and trousers	$17 75
Tweed and sporting suits	15 00
Frock or morning coats	14 25
Two coats	5 00
Waistcoats	2 50
[illegible]	4 50
[illegible]ercoats	20 00
Summer overcoats	17 75
Mackintoshes or Alpine coats	10 00

Women.

Cloaks	15 00
Coat and skirt	20 00
Washing dress	10 00
Woolen blouse	3 75
Washing blouse	3 00
Woolen dressing gown	8 50
Washing dressing gown	5 00
Trimmed woolen dress	25 00
Skirt	6 25
Chemise	1 62
Nightdress	2 50
Knickers	1 25
Camisole	1 25
Dressing jacket	2 62
Washing petticoat	3 00
Kimono	2 50

A Butter Paradise.

The town of Freystadt, in West Prussia, is described as "a butter paradise," as the ration cards just introduced provide for half a pound of butter per day per family. Berlin's butter ration this week was two ounces per person.

Cards to take a walk are the very latest form of "rations" in Germany. They have just been introduced, according to the Vossische Zeitung of July 22, by the police authorities of Munich and Leipzig in order to better "control" the youthful population in the evening hours. Henceforth youths under 17 years of age may appear in the streets only when provided with permit cards, and these will be issued to none but members of so-called youths' organizations. The system has been established in the hope that juvenile crime, which has seriously increased during the war, may be checked. In Brandenburg-on-the-Havel, near Berlin, children unaccompanied by adults may not use the streets after 9 p.m.

TENDING BRITISH GRAVES.

King George Thanks French People For Work Done.

King George took advantage of his recent trip to France to visit some of those sacred spots which are the last resting places of fallen British soldiers. If anything were lacking to cement the sympathies of the French and English it would be supplied by the care with which the French people are tending the graves of the British. Long before the French Government decided to constitute the British burial grounds British territory for all time, the people of France took it upon themselves to tend these graves, and when the English Graves Registration Commission began its survey on the field of Marne, it found that the rural population had facilitated the work by naming and numbering all the graves they possibly could, and by keeping them in order.

King George, during his recent visit to France, himself saw how this had been done, and specially thanked some of the Maires and cures who had helped. Many burials took place out of consecrated ground, and although the work of transferring buried bodies from casual graves to recognized cemeteries, wherever possible, is proceeding, there remain many graves yet untouched. The British Red Cross Society has caused all those graves to be marked with a permanent cross, and the French people keep them freshly supplied with flowers.

King George had a quick eye for these wayside burial places, and every time he saw one he never failed to raise his hand to salute. Once, standing bareheaded at a nameless grave, he quoted Rupert Brookes matchless lines:

"There's some corner of a foreign field
That is forever England."

A RUSSIAN MYSTERY.

What Did Government Want With 100 Japanese Monkeys?

A Japanese resident of Vladivostok named Arita, who has been in Japan for some time, left Tsuruga for Vladivostok recently with eighty-seven Japanese monkeys. It is stated that Mr. Arita received an order from the Russian authorities for one hundred pure Japanese monkeys, but as he was unable to collect the required number before his departure he went away with only eighty-seven.

On arrival at Vladivostok the animals will at once be entrained for Petrograd. The use to which the monkeys will be put by the Russians is kept a profound secret, though there is a belief that it is in some connection with the war. According to the Japanese papers, some say the monkeys will be sent to the front to be used for scouting purposes, while others assert that they are required for hospital purposes. This is the first shipment of "war supplies" to Russia since the publication of the new Russo-Japanese convention.

Not Sufficiently Pickled.

Baggs (at 1 a.m.)—Don't you think you'd better go home to your wife?

Jaggs—Not yet, of fel'. Le's have a few more. I don't wanter be able t' understan' what she says.

QUESTION REASON OF THE WAR

GERMAN PEOPLE BEGINNING TO WONDER.

Believe That Country Was Pushed Into Something It Did Not Want.

The London Times says that Friedrich Naumann publishes in the current number of his weekly paper, Die Hilfe, an extraordinary article on the weakening of German popular opinion about the war, and the need of counteracting the present tendency. Herr Naumann writes:

"To-day there are people enough who no longer rightly know why we are still fighting. I was visited lately by a soldier who late in the war was taken up into the Landsturm. I know him well, and I know that by the very reason of his calling he understands the way of thinking of the simple people. He said to me: 'It must be explained to the people quite simply and intelligently why they are still fighting, because they do not know.' I answered that two years are surely enough to make it clear to the thickest head. He, however, replied:

Agitation in Army.

"'Two years ago all these people know, but as they read the newspapers irregularly, have little knowledge of geography, and have no training in historical thought, even at the beginning they grasped by a general impression rather than detailed events. Meanwhile, all that has for them returned to a state of flux and become obscure, and now they are mentally helpless in the face of sacrifices of the long war. Hence, it becomes possible for agitation of the Liebknecht type to find its way into the very army.'

Terrible Privation.

"I then made further enquiries among men and women, who by constant contact know something of the way of thinking of small people, and this is what for the memory, especially when the people are suffering, and our experiences have been so manifold during this time. At the beginning the people had no real idea what war was, yet they were ready to conduct war. Meanwhile, death in the field and privation at home have become greater than any power of the imagination had previously conceived. Hence, the impression easily arises that one has been pushed into something which one did not really desire. The necessity of what is happening is questioned, and the longing that this abnormal state of things may cease, dims the eyes to the inevitable character of events. To this is then added the old and eternal mistrust of the small for the great and it is said:

"'These people at the top need the war and that is why we have to endure it.'"

FRENCH ARMY TO SHAVE.

Beards Worn by Soldiers Ordered Removed.

The beard of the French soldier has been doomed in an army order which directs that the men at the front must shave all except moustaches. The order has been the signal for the outburst of a humorous and ironic discussion in the trench newspapers, to which some of the most famous artists, philosophers and literary men have contributed.

Jean Richepin, the dramatist, writing in the Fus, says:

"The beard has gone, but what is the difference to us? In place of it, it is courage that grows. Let the beard fall and French courage grow."

Edward Rostand celebrates the beard in verse as a symbol of "all the beauty of all of France, a soul, a jewel, a torch, a prod."

Maurice Barres gravely regrets the beard, which he says was a "heritage of long ago, in which the dead lived again, and which bound us mysteriously to the soil."

General Pierre Cherfils, reasoning technically, accuses the measure because "the beard of a trooper weighs on an average 60 grammes. With 2,000,000 men at the front this brings the aggregate weight to 120 tons. It was natural that the staff should think of cutting the army of this considerable and useless weight. It was reasonable in creating heavy material to make in compensation light infantry."

STRAWBERRY LEAF FOR TEA.

Germans Hunt Substitute and Say They Have Found One.

The London Chronicle says the Royal Horticultural Institute of Berlin has for some months been experimenting with various leaves to take the place of tea, which at eight shillings ($) a pound is too costly for the ordinary citizen. More than 20 different kinds of leaves have been tried, but only three were found to contain in some measure the aromatic and invigorating qualities possessed by tea. The leaves of the strawberry, blackberry and raspberry have given very satisfactory results.

The authorities who have been brewing the leaves have come to the conclusion that strawberry leaves are superior to all rivals, and that refined palates which have been refreshed with strawberry tea have no desire to return "to the much overrated and costly Chinese product."

FROM SUNSET COAST

WHAT THE WESTERN PEOPLE ARE DOING.

Progress of the Great West Told in a Few Pointed Paragraphs.

A bear raided the cook tent at Castle Internment Camp, Banff, and enjoyed a huge feast.

John Burns, the veteran contractor, of Nelson and Trail, died at his Nelson home last Friday, aged 65.

At Cordova Bay, Vancouver Island, W. J. Harris, 16 years old, saved a little girl from drowning.

Maple Bay residents are campaigning for the establishment of a post-office to handle their mail properly.

A daily mail service for all towns of importance along the route of the Kettle Valley Railway is to be established.

Two Indians while fishing near Fort Essington, B.C., found the body of a Japanese fisherman who was drowned over a year ago.

A few "springs" are being caught at Cowichan Bay, and the bay is full of grilse just now. The big run is yet to come.

Chong Hing, a Chinese contractor, in Vancouver, chased a thief into a dense crowd and recovered a wallet containing $1,400.

A representative of Australian dredging interests is in Vancouver to investigate the dredging prospects of the Fraser river.

There is yet no clue to the burglar who stole money and securities worth $10,000 from the vault in the North Vancouver city hall.

The Pacific Great Eastern Railway has leased a car barge with a capacity of nine cars to operate between Vancouver and Squamish.

The Provincial Fisheries Department has finished the stocking of the principal lakes between Squamish and Clinton with trout fry.

The city of Prince George has taken over the electric plant of the Northern Telephone & Power Co., and will run it as a public utility.

A strike of graphite is reported in the Fraser Valley, and other minerals have also been discovered there, notably alunite, which has high potash value.

The fossilized remains of a prehistoric animal, somewhat similar to the alligator, were found near Morrissey in a body of shale uncovered by recent floods.

By a considerable adverse vote the Cranbrook ratepayers turned down the proposition to buy the St. Mary's separate school at $6,000 for a high school building.

In order to avoid the possibility of spreading infection of infantile paralysis, the school holidays in British Columbia will probably be extended this summer by several weeks.

Mr. Harry Rhodes, of Vancouver, an employe of the B.C.E.R., when perusing a newspaper office in that city, saw pictures of four of his nephews who had all been killed in one day's fight at the front. All were from Newfoundland. It was the first Mr. Rhodes had heard of their tragic deaths.

FEAR LANDING IN BELGIUM.

German Says This Allied Move Would Make Retreat Inevitable.

The fear that a large British army may be landed in Belgium and Holland to attack the German forces in Flanders and France from the rear and recapture Antwerp has been revived in Berlin. One of the foremost military writers says in the "Armee- und Marinenachrichten" (Army and Navy News):

"The general offensive of the allies on all fronts keeps our armies busy. The British and French attacks on the western front, which have their centre and greatest force in Picardy, do not sufficiently disclose where our enemies intend to strike their main blow. It is possible and even probable that the "big rush" on both sides of the Somme is only a feint.

"The real intentions of the allies are probably disclosed by an article written by an unnamed French admiral and published in 'L'Information' a few weeks ago. The admiral says that the new strategic plan of the allies is to exhaust the German power of resistance by attacking on as many fronts as possible, and he continues:

"We must create new fronts to compel the enemy to thin his lines everywhere. An effective way to accomplish this result will be the landing of a large British army on the coast of Belgium. This can be done, if the English sea power is fully used."

All signs point to it that we will have to fight the main British forces in Belgium and on the Dutch border before the winter comes. This would make a general retreat from France inevitable.

Appropriate.

"What is the name of your dog?"

"Macbeth."

"That's a curious name for a dog."

"He howls a great deal at night. I got the idea from that quotation, 'Macbeth doth murder sleep.'"

A poor man never knows how many relatives he has until he suddenly becomes rich.

A sure way to improve the memory is to do something that you would like to forget.

GLAMIS

Miss Ena McKenzie, of Kincardine, is spending some time at Mr Neil Currie's.

Rev Donald MacIntyre, who was holidaying at Lake Huron, spent Friday night with his parents here and left for Toronto on Saturday.

Mrs T A Pickard, of Toronto, spent last week the guest of her sisters, the Misses Howson.

Mr Jack McKeeman took in the London fair last week.

Miss Kate McKinnon, of Chicago, is visiting her old home on the 10th of Kincardine.

Mr McCauley and Mr Dick McGregor motored to Williscroft on Saturday.

Mrs Tom McFarlane, who was visiting at Mr Neil McFarlane's, has returned to Toronto.

A load of people from Markham motored up on Saturday night and spent Sunday at Mr Kirktown's.

Mrs J C McIntyre returned on Friday from Inverburon.

Miss Minnie McNally, who was called home so suddenly, returned to Lapeer on Saturday.

Master Campbell MacIntyre is visiting his grandparents, Mr and Mrs J C MacIntyre.

Mr and Mrs Jas Thompson and other members of the family had a very narrow escape last week on their way to London, when their car turned turtle near Belgrave. The only one injured was Mr Thompson, who has a sprained wrist.

We are sorry to learn that Mr Allen McKinnon, on the 10th, is not improving much, but is in a very critical condition.

ELORA ROAD NORTH

Martin Bros are threshing in this neighborhood.

Mr Wm Daniels spent Sunday in Port Elgin.

Mrs J McCallum and family of Gainsboro, Sask., are visiting at Mr Neil McArthur's.

Mrs A C McMillan of Hillsburg, spent a few days at Mr Alex Swing's.

Mr and Mrs John McDougall are visiting friends at Lucknow.

Mr Thomas Irwin has bought a new team.

Miss Norman of Harriston is the new school teacher at Dunblane.

Mr D D Campbell makes his trips to school in an auto now.

Miss Daisy Ewing has returned home after a pleasant visit with friends in Toronto.

SECOND CON ELDERSLIE

Messrs A Young and W J Allen were visitors at Toronto Fair last week.

Mrs Geo Addison was up to Owen Sound last week receiving throat treatment.

Mrs Herb Fiddis spent Sunday with friends on this con.

On Sunday, Sept 24th, a rally day service will be conducted in the 2nd con S S. A cordial invitation is extended to all to attend.

Mr and Mrs D McGill were visitors at the Western Fair, London, last week.

The prayer meeting held at the home of Mr and Mrs A Young on Monday evening was largely attended by citizens of the neighborhood.

Mrs J B Allen and Miss M Burrell visited Cargill friends recently.

Mrs McCullough, of Saugeen, spent last week with friends here.

Mrs A Dawson, Misses Mabel and Maude spent Sunday at the home of Mr W Anderson, Sullivan.

Mrs McLeod is visiting her brother, Mr G Addison.

Mr and Mrs J Caldwell attended the wedding of the farmer's niece, Miss Jean Hicks, to Mr Buchanan last Tuesday.

Pte Newton, of Toronto, visited Mrs Newton last week. Mrs Newton is engaged with Mrs Blaine Fortune who has been ill for some time.

Miss Ellsworthy is visiting her sister, Mrs C Smellie.

Messrs H McKindless, T Nicoll and S Patterson are engaged with A Dawson to draw gravel.

Mr and Mrs W J Allen and Mrs J Vancise, of this con, also Mr and Mrs H Ferrier, of Bervie, motored to Keady and spent Sunday with friends there.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

—Fifteen hundred barrels of apples at $4 per barrel is the estimate of the apple crop that Mr Arthur Petch, of Grierville, Grey Co, will have this year. The orchard of 30 acres was set out 20 years ago, and has been well cared for, also sprayed.

—It is announced that a second overseas battalion, to be known as the 248th, is to be recruited in Grey Co. Col W N Chisholm is to be the commanding officer.

EBENEZER

Anniversary services were held here on Sunday last, both morning and evening. The preacher of the day was Rev Wm Johnston, of Tweed, Ont., who, when in charge of Paisley circuit over forty years ago, opened the Ebenezer church. Mr Johnston notes that many changes have taken place in the community since that time, and only a few pioneer members survive to greet him on his return. A liberal offering was received which goes to help the ladies' aid in their finances.

Mr Howard McFadden, his son Cecil and Mr Duncan McArthur attended the Western Fair at London.

Pte Ed Martin, of the machine gun squad, 160th Batt., is home on a week's leave to assist his brothers in the threshing operations.

Mr and Mrs Ramage, son and daughter, of Durham, spent Sunday at Mr E H Grant's.

Mr Duncan, of Detroit, is visiting at Mr Wm McKelvey's.

Mr and Mrs Jos Grant, Miss Ella Grant, the Misses Potts, and Mr Munson, of Tara, attended the church anniversary services on Sunday.

TURNER'S

Miss Maud McGillivray, of Toronto, is spending a month with her aunt, Mrs W Muir.

Mrs J Hessenauer and family, of Port Elgin, spent Sunday at the home of Mrs Wm Karcher.

Reeve Christie and Mr Wallace took in the London fair.

The market is now open for grain here and top prices are being paid.

Mr Jas G Pollock has returned to his home at Bedson, Alta.

Hon Duncan Marshall, Minister of Agriculture in the Alberta government, was in this section last week. He purchased two fine young bulls from Reeve Christie, also a fine bull from John McArthur.

Will sell on reasonable terms. Apply to NEIL McALLISTER R. R. No 2, Paisley P. O.

Death of Clerk of County Court

Matthew Goetz, a prominent and well known citizen of Walkerton, passed away at his home on Sunday week after a very short illness. He was in his sixty first year, and had enjoyed good health until a week ago, when a carbuncle formed on the back of his head, causing blood poisoning which resulted fatally. Mr Goetz was Clerk of the County Court, Surrogate Court Clerk, and Local Registrar of the High Court since 1885. He was well posted on matters pertaining to law, and was a great mathematician and grammarian, and in years past had frequently given his services at the local educational institutions. He is survived by his wife, one son, Leo, a barrister, of Guelph, and three daughters, Mrs O'Connell, of Regina, and Misses Olivia and Nettie at Home.

We Want You

To take a day off and help make up the biggest, jolliest crowd that ever flocked to Paisley Fair. Meeting your old friends—making new ones—pleasant greetings—hearty handclasps—neighborly chats—delightful music—will get you away from every-day cares. You'll enjoy every minute you're here and go back home heartier and happier. More than that—we want you to get into the list of exhibitors. Don't continue to say there's nothing you or any of the family grow or make that will be worth bringing. Do your bit to make the show a success.

"PRO BELGICA"

"The Relief Work for the Belgian Victims of the War," of whom the President is the most devoted General Consul for Belgium at Ottawa, editing for some weeks past, the paper "Pro Belgica" printed in two languages. This paper discloses the painful condition of Belgian people so worthy of admiration and show what Canada is doing for its relief. It is very interesting to observe the manner in which the subscriptions received for the relief of Belgian and French populations of the invaded departments are employed. The subscribers of "Pro Belgica" are not only aquainted with all that happens in Belgium, they also contribute to the revictualling of this unfortunate country, for all receipts of the paper are paid into the receiving office of the "Relief Work." The amount of the subscription is but one dollar, which can be sent to the Management of the paper, 149 St. Lake, Montreal. Give your subscription for "Pro Belgica." It is a mere trifle; but it is for the relief of the destitute Belgians.

BORN

VANCE—In Bruce Tp., on Sept 15th, to Mr and Mrs Sam Vance, a son.

Women Once Invalids

Now in Good Health Through Use of Lydia E. Pinkham's Vegetable Compound. Say it is Household Necessity. Doctor Called it a Miracle.

All women ought to know the wonderful effects of taking Lydia E. Pinkham's Vegetable Compound even on those who seem hopelessly ill. Here are three actual cases:

Harrisburg, Penn.—"When I was single I suffered a great deal from female weakness because my work compelled me to stand all day. I took Lydia E. Pinkham's Vegetable Compound for that and was made stronger by its use. After I was married I took the Compound again for a female trouble and after three months I passed what the doctor called a growth. He said it was a miracle that it came away as one generally goes under the knife to have them removed. I never want to be without your Compound in the house."—Mrs. FRANK KNOBL, 1642 Fulton St., Harrisburg, Penn.

Hardly Able to Move.

Albert Lea, Minn.—"For about a year I had sharp pains across my back and hips and was hardly able to move around the house. My head would ache and I was dizzy and had no appetite. After taking Lydia E. Pinkham's Vegetable Compound and Liver Pills, I am feeling stronger than for years. I have a little boy eight months old and am doing my work all alone. I would not be without your remedies in the house as there are none like them."—Mrs. F. E. YOST, 611 Water St., Albert Lea, Minn.

Three Doctors Gave Her Up.

Pittsburg, Penn.—"Your medicine has helped me wonderfully. When I was a girl 18 years old I was always sickly and delicate and suffered from irregularities. Three doctors gave me up and said I would go into consumption. I took Lydia E. Pinkham's Vegetable Compound and with the third bottle began to feel better. I soon became regular and I got strong and shortly after I was married. Now I have two nice stout healthy children and am able to work hard every day."—Mrs. CLEMENTINA DURRENBO, 34 Gardner St., Troy Hill, Pittsburg, Penn.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice,—it will be confidential.

Sunday School Orchestra

The music for Rally Day in the Methodist Sunday School on Sunday last was led by a good orchestra of seven pieces, directed by Mr Bert Rayner, of Southampton.

Passed the Matriculation Exam

Stewart R Dewar is another Paisley Continuation School student who passed the recent matriculation examination, but announcement was delayed by an oversight. Stewart took a good percentage.

S. S. Association

The East Bruce Sunday School Association will hold its annual convention in Cargill on Thursday, Oct. 5th. Mr E Otter, one of the assistant secretaries of the Provincial Association, will be present.

Among the Casualties

Pte Elmer J Gregg, son of Mr J A Gregg, of Pinkerton, was among those wounded at the front last week. Another Bruce boy in the list is Pte R Sinclair, of Hepworth, son of Mr Thos Sinclair, formerly of Paisley.

Bowling Winners

The rink competition of Paisley Bowling Club this season has been won by the quartette skipped by Mr Alex Jack, the oldest member of the club, and in the singles event the youngest member, Allan Shoemaker, captured the final honor.

The Fair

The efforts of the directors of Paisley Fair for 1916 have again been successful in bringing out a splendid array of exhibits for the inside departments, and entries are numerous for the stock classes. As the weather looks favorable this (Wednesday) morning, it is hoped that the afternoon will see a good crowd in attendance.

McGregor—Bryce

A quiet wedding occurred on Thursday evening last, at the home Mr and Mrs Thos Bryce, when their daughter, Miss Hannah, became the bride of Mr H E McGregor. The ceremony was performed by Rev A J Crighton, and was witnessed by only immediate relatives of the contracting parties. Mr and Mrs McGregor have taken up housekeeping on Queen St north. THE ADVOCATE joins heartily in the chorus of good wishes.

Biggest Bowling Event of the Season

A rink of colts, skipped by L C Spofford, and ably assisted by S Ferguson, A Shoemaker and J Cruickshank, served out a sound beating to a rink composed of D Lyon, A Jack, I Shoemaker and Dr Allen (ek), by the huge score of 38 to 11. Shame to do it when these men spent so much of their time teaching the winners the game, but it goes to show they are able teachers. Good luck to the boys.

Come and See Us

¶ When in town at any time make us a call. We shall be quite glad to see you. To those who have never paid us a visit we say that it's a great advantage in business to know what each other looks like. Kinks and tangles, which are liable to occasionally arise in the course of continual trading, can be much more easily unravelled when people are acquainted and the personal touch can be brought into play. So we again say, come and see us. We won't bother you to buy goods, UNLESS you show an inclination to do so, but we certainly would like to make your acquaintance, and, if you contemplate a visit to the Fair, it would be a good time to come and hitch up with us.

The man who does not advertise because he does not know how to write an advertisement should quit eating because he can't cook.

¶ The same way with a whole lot of people who call themselves business men, but it's only the crave for the almighty dollar that they are after that keeps them there, not that they know the business from one end to the other and it's pleasure for them to be in that certain line.

New Suitings and Dress Fabrics for Fall and Winter

Despite the abnormal conditions of the Woollen markets, we are showing good values in a well assorted stock of popular materials.

Fine Wool Suitings

A good range of fine Wool Suitings, the finest tailoring qualities in many colors and shades.

36-54 inch Serges in a fine quality, in navy, brown, grey, blue and black, regular $2.25, at..... $1.40

54 inch Serge in a good weight cloth, navy, green, brown, black, regular $2.75, special..... $1.90

Gaberdines, Poplins and Armures, in big demand, in fancy and tailored suits, in navy, copenhagen, black, green and brown, at..... $1.50 to $2.75

Fine Wool San Toys, 54 inches wide in navy and black, at..... $2.00

A Bargain in Black Silk

36-inch Black Taffetta Silk, in a firm, even weave, with a rich, lustrous finish. Regular $1.85, special..... $1.19

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER VII.—(Cont'd).

But Mr. Leicester's iron hand drew him to earth again and, with a touch of the long whip, hinted to him that a very different driver than Miss Violet sat behind him.

After a few minutes they settled down more quietly, and, as the feathery phaeton was rattled down the well-kept road to the village, Violet's face flushed and her eyes sparkled with pleasure.

"How delightful!" she exclaimed; "and how easy it looks!"

"Come and try," said Mr. Leicester, and he pulled the ponies up until he had changed seats with her.

Then Violet found that tandem-driving was one of those feats which look easier to perform than they really are. Her hold on the reins was not tight enough; the artful little creatures knew her gentle touch, and the leader commenced his old trick, and, in spite of all Violet's skill insisted upon turning round, as if he meant to enter the carriage and take a ride himself.

Mr. Leicester smiled, and Violet pouted.

"Hold the reins tighter," he said, "and give Master Dot—or Spot? which is it?—a clean, little cut on the left side."

She did so, and Master Dot immediately spun round to the right.

"Now take care," said Mr. Leicester; but his warning came too late.

Dot cut the corner rather close, Spot, of course, cut it closer, and the phaeton would have been over, and its contents spilled like eggs, had not Mr. Dodson's hand closed on the small ears of Violet, and tugged the leader round.

For the second time Violet learned how hard and firm that hand was, and involuntarily she uttered a little sharp cry of pain.

"I am so sorry!" said Leicester, and his voice, naturally so cold and grave, grew wonderfully gentle and anxious. "I did not mean to hurt you."

"No, no; it's nothing," Violet said, coloring with shame at her weakness. "I am really very grateful. You did not hurt me. May I keep the reins a little longer? I don't deserve to after such a silly mistake."

"Yes," he said, "there is a bit of straight road now."

He seemed so genuinely kind that Violet could not refrain from thanking him again.

"You are very good-natured, Mr. Dodson," she said. "I might have thought you proud if I had judged by first impressions."

"Why?" he asked.

"Why?" she repeated. "Are you sure that I shall not offend you?"

"Quite," he said, with a short laugh. "Pray, go on."

"Well, then, if you remember how abruptly you turned away from me that morning when you so foolishly and recklessly, but so heroically, risked your life for my paltry sunshade? You actually refused to shake hands," and she laughed, and turned away with the cut direct.

He laughed, and looked up at her with a half-amused smile.

"I did, did I?" he said. "Come, I will be candid. I had judged you, not by first impressions, but by hearsay. The unkind things said of one always get repeated—one's friends always see to that. And I have heard some of the mighty civil things your aunt, and perhaps you had said of tallow chandlers in general, and ourselves and the Cedars in particular."

Violet crimsoned, and whipped Dot almost angrily for very shame.

"And," he exclaimed, laughing again, "I thought, when you told me your name, 'Well, she shan't be compelled to know me because I picked up her sunshade,' and so I took myself off with all humility."

"Some one's darling sin is the pride that apes humility," answered Violet, with an arch smile.

"Exactly," said Mr. Leicester. "I did not choose that the acquaintanceship should be one of my commencing if you choose to look down with contempt upon tallow-chandlers—"

Violet stopped him, with a look almost of pain:

"You are unjust," she said, in a low voice. "And you forget that I never thought less of you for what you were. You are not a tallow melter—and—and—oh, I do not know what to say, save that I am not guilty of the meanness you lay to my charge."

"Forgive me," he said, gently and earnestly. "I was only half serious. I did not think so really. But," he added, laughing, "it is a fact that we made our money from tallow, and there's no getting over it. Ah! here is Captain Murpoint," he broke off, as the captain's tall and powerful figure stepped out on to the path beside the drive.

So sudden was his appearance, seeming to grow out of her thoughts, as it were, that Violet, who was by no means a nervous or sentimental young lady, half started, and certainly paled.

In starting, she tugged the reins. Dot and Spot took the jerk as an excuse for a little frolicsome, and started off, with their heads down viciously.

Leicester, who had noticed her start, and the sudden pallor, caught hold of her hand, and soon pulled the sprightly ponies into a trot again.

But Violet's hands and his had met once more, and the contact had produced a strange thrill, which was as wonderful as that feeling which they had been speaking of, but it was certainly not one of antipathy.

Leicester stepped out, handed Violet to the steps; then after patting the ponies, held out his hand.

"Will you not come in?" said Violet.

"No, thank you. It is nearly dinner time. I hope you are not tired."

"No," said Violet, giving him her hand, which he kept while she finished speaking. "No, and I am very much obliged. Good-by."

"Good-by," he said, and perhaps unconsciously he pressed her little hand as he released it.

After dinner he strolled out on to the cliffs and lit a cigar.

"Yes," he muttered, looking at the sea, lying like a great opal in the low sunset. "I will go to town; I am better there out of mischief. She is a beautiful, bewitching snare, and, as I have no desire to be snared, as I am too selfish, too cynical, too philosophical to make any woman happy, I will fly. Yes, I will go to town before the danger grows greater." And, as to resolve and perform were nearly one with Mr. Leicester Dodson, to town he went, and Violet saw his dog-cart rattling down to Burfield from her bedroom window.

He went to town, but, he could not be happy, contented, or even satisfied, and before the fortnight had passed, he was on his way back to Penruddle, with Bertie Fairfax accompanying him.

CHAPTER VIII.

The captain, as he opened his bedroom window, saw Mr. Leicester Dodson's departure, and was rather surprised.

Captain Murpoint was too shrewd an observer of human nature not to have noticed Mr. Leicester's evident partiality for Miss Violet's society, and, although it would seem to be antagonistic to the captain's plans that the young man should be hanging about the house, yet, in reality, he was quite willing that Violet's attention should be absorbed by handsome Mr. Leicester, or any one else, so that it was drawn for the present from Captain Murpoint.

He could not understand Mr. Leicester's sudden flight, and Mr. Starling, when interrigated, could not very much enlighten him.

Jem, or "Starling," as the captain now called him, entered his master's bedroom with the water for the bath, and found the captain still in bed, but with his head resting on one strong hand, and his face turned dreamily to the window.

Starling grunted his morning salutation, and the captain nodded.

"Go to the window," he said, "and tell me if that young Dodson's dog-cart has come back; if I have calculated correctly, it has just had about time enough to get to the station and back."

"Here it comes, captain."

"Without Mr. Leicester?"

"Without Mr. Leicester," replied Starling.

"Then he has gone to town," said the captain, springing out of bed and stretching himself thoughtfully. "Gone to town! What the deuce has he gone to town for?"

"That's what everybody wants to know," said Jem, from the next room, where he was spreading out the towels and pouring the water into the bath.

"Did you make friends with the people in the servants' hall as the Cedars?" asked the captain.

"I did, captain, obedient to your commands," said Jem, with a wink. "And a very nice, sociable lot o' people they are, though I prefer the hall here if there's choice. Oh, yes, I walked up last night, permissions like, and when they knew as I was your man they made me welcome, drawed me some of the best October and would 'a' opened a bottle of Madery, but I wouldn't hear of it,—I allus was so modest. I had a cut of duck and a helpin' o' some sort o' cream with a long, furrin name—"

"Tush! I don't want to know what you had to eat and drink," interrupted the captain. "What did you hear?"

"Not much," he said, laying out the captain's ready-brushed morning suit. "I heard that Mr. Leicester was going up to London this morning, quite sudden like—and he ain't one of your impulsive genius, neither. His man didn't know what was up, and depended to stop here for another month at the least. There wasn't anything awkward between the old people and the young 'un, neither, for the butler—which is a more high and mighty swell, in a bigger shirt front, than our old chap—he heard Mr. Dodson beg o' Mr. Leicester to stop. But no, he said he'd go, and gone he has, sure enough."

"And now you can go," said the captain. "Stay! did you find that piece of paper which I told you to look for in the drawing-room?"

"No, captain, and I looked everywhere."

"Idiot!" said the captain, between his teeth, "let that be a warning to you never to put your clumsy paw to paper again. How do I know who may have picked that up, with its cursed, tell tale sentence?"

"I beg pardon," said Jem, humbly, "but I thought I was doing right? This 'ere inspector was a man from London, and he might have spotted either of his——"

"Enough," said the captain, with a displeased frown.

"You were right to be cautious, and to give me warning, but you should have taken a better way in which to do it. Your grinning face and that stupid business of the letter were enough to arouse the suspicions of a child. Has the inspector gone?"

"Yes, captain," said Jem, "went last night. Found everything satisfactory; force in fine condition, and the reserve able and active. Ha! ha!"

(To be continued).

ON THE FARM

Washing Milk Cans.

The matter of washing cans by city dealers, while only a small part of the daily operations, is a very important one. Many different methods are used by various dealers in caring for the cans after the milk is removed from them. Some of these methods are as follows:

1. Returning the cans unwashed.
2. Rinsing with water (either hot or cold).
3. Rinsing out by means of hose with either hot or cold water. This is quite common at some plants but is not satisfactory.
4. Rinsing out with hose and then steaming with live steam.
5. Washing the cans out by means of washing powder and hot water and a hand brush, then rinsing.
6. Same as 5, with an additional rinsing with boiling water or steaming.
7. Cleansing by means of machines of various kinds.

One of the simplest of these machines is a jet machine, by means of which sprays of cold and hot water and of steam are successively forced into the can. Some of these simple machines also have dryer attachments, by means of which a draft of dry air is forced into the cans. Another type of machine is the brush machine, by means of which the cans are brushed out with washing powder and water and then rinsed. They may be steamed after washing by a spray of live steam. Some of the largest machines are fitted with powerful pumps, and the cans, in an inverted position, are run through the machine and sprays of soap and water, rinse water, hot water and steam are successively forced into them under considerable pressure. After being thus washed and sterilized they are also dried in the modern machines.

In justice to the farmer the dealers should give considerable attention to this question of washing the cans. If the cans are allowed to go back unwashed to the farmer it is a very difficult and often an impossible task for him, with his facilities, to clean them. Even a rinsing with cold water is better than nothing, though of course it is not satisfactory. It does not matter what method is used, so long as the cans are well cleansed and sterilized. The drying of the cans is also an important factor. Not only does this leave the can in a much better condition, but it will also preserve its life, as it helps to prevent rust. It is also important that the cover be thoroughly cleansed and sterilized as well as the can. It is not a good plan to put the cover onto the can until the latter is dry. When the covers are not put back on the cans immediately, the cans should be kept in a clean place where there is no dust or contamination. The covers should be placed tightly on the cans before they are returned.

Some of the large dealers who operate country stations not only wash the cans in the city, but also rewash and sterilize them when they arrive at the country plant. This is owing to the fact that the covers may be removed from the cans during the trip back to the country and thus the cans may be contaminated.

Considerable experimenting has been carried on by the Dairy Division in regard to sterilizing cans. Bacteria counts were made from cans receiving ordinary washing and rinsing. The results showed that the cans contained from 200,000 to 18,000,000 bacteria per cubic centimeter, with an average of 4,600,000. To 10 gallons of milk put into one of these cans there would be added more than 100 bacteria per cubic centimeter, as an initial contamination from the can alone; that is to say, that is the least number that would be added. With a little steaming these same cans could be rendered practically sterile.

One dealer who had recently installed a modern washing machine had some tests made by his bacteriologist on the results obtained. From the preliminary tests made less than 200,000 bacteria were found to the can and no undesirable types. Before the machine was installed, counts from the old one which had a much less efficient steaming device, ran as high as 20,000,000 bacteria to the can and some were undesirable. Of course the large dealer must have a machine that will do good and rapid work, but the main result to be obtained is a clean, sterile and dry can regardless of the machine used. The main means to accomplish this is thorough cleansing with washing powder and water, rinsing, sterilizing with live steam, and rapid drying, then cover the can and keep it from contamination.—U. S. Dairy Division.

Cleaning Grain at Threshing Time.

In a bulletin entitled "Grain Screenings" issued by the Dominion Department that the loss entailed in shipping Western grain uncleaned amounts to considerably more than half a million dollars. The following account of an experiment by a Western grower should be of value in connection with the problem of eliminating the waste due to the shopment of grain subject to a dockage on account of screenings.

A monitor cleaner and a five horse-power engine to run it were purchased and both mounted on an extra strong wagon gear. A 15-foot ordinary grain elevator was attached to the elevator wagon or bin. Another box wagon received the screenings (mostly broken and shrunken grain). The cost of the entire outfit, including operation, repairs and interest on capital, was $1,195. The grower calculates that he saved on his 50,000 bushel crop 1,600 bushels of broken and shrunken wheat worth $960, freight on which to the terminal elevator would have cost $220, and haulage to the local elevator $64. He thus has a profit of $49. The cut fit paid for itself in one year and he says is as good as when it started.

This experiment, it is argued, proves that cleaning the grain on a large farm is practicable where one has his own outfit. On a medium sized farm where the threshing is hired out, it could not be done in the case of grain hauled directly to market. When the grain is stored on the farm before hauling, cleaning is practicable and advisable. The really practicable way for the whole country generally would be that the threshing outfits should include a grain cleaning attachment, as many of them now do a sheaf loading machine.

Any ordinary threshing machine if fitted with proper screens and carefully operated is capable of removing many of the smaller weed seeds that now constitute a considerable percentage of elevator screenings.—Seed Branch, Ottawa.

Dairy Notes.

It is hard to make some men realize the great influence of a good, pure-bred sire in a herd. The sire is more than half the herd. If he is richly bred, every heifer inherits from him good butter traits.

Sires should be selected from families of cows with rich records.

A good price for a superior bull is money well invested. The difference between the price of a strictly high-class sire and an inferior one is made up in the first lot of calves.

Keep the old bull that has proved his merit.

Fill the silo as soon as the corn is fit. When the kernel begins to glaze is the right time. The more ears there are on the stalk the better the ensilage.

A silo is one of the best investments on any farm. It means the succulence of pasture all winter.

This means an increase in cream and milk production at less cost.

Now is the time to turn off unprofitable cows. If after a good trial any cow is below the standard in capacity, send her to the butcher.

Feed windfall apples, with the grain ration, and watch the results. Don't let a single apple go to waste; there is feeding value in every vegetable; get the good there is in it. Little things help to round up the profits.

A small grain ration with good pasture will quickly fatten the old and unprofitable cows. Now is the time before the cold sets in.

Colony of Barbary Apes.

There is at Gibraltar an interesting colony of macaque apes, the only one in Europe. Only twenty of the animals are living. They are highly prized and carefully protected. Their home is on the higher eastern portion of the famous rock, except at such times as they are driven down by cold winds.

"Meat Prices Will Not Come Down" is the cheerful news from the Department of Agriculture. Meat prices will not worry the man or woman who knows that a **Shredded Wheat Biscuit** will supply more real body-building nutriment than beefsteak or eggs and at much less cost. Shredded Wheat remains the same price, the same high quality, supplying all the nutriment a man needs for a half-day's work. Two shredded wheat biscuits with peaches and cream or other fruits make a complete, nourishing meal at a cost of not over five cents.

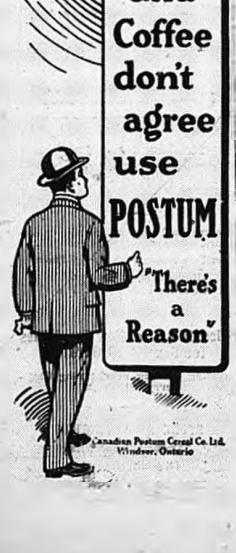
Made in Canada

THE BUBONIC PLAGUE.

Disease is Identical With the "Black Death" of the Middle Ages.

It is a remarkable fact that many physicians who have devoted considerable labor to the study of a particular disease have themselves died of that disease.

One of the most interesting examples is that of John Daniel Major, born August 16, 1634, in Breslau, a physician and naturalist of no mean ability. Bitten by wanderlust, he studied at Wittenburg, took courses at many of the schools in Germany and finally went to Italy, where he received the degree of doctor of medicine at Padua in 1660. Returning to his own country, he resided for a short time in Silesia, and in 1661 married at Wittenburg, Margaret Dorothy, a daughter of the celebrated Sennert. The following year his young wife was stricken with plague and died after an illness of eight days.



Distracted by his loss, Major wandered up and down Europe, studying plague wherever he found it, in the hope that he might discover a cure for the disease which had bereaved him. Spain, Germany, France and Russia were visited by him. He settled in 1665 in Kiel, where he was made professor of botany and the director of the botanical gardens. He made frequent voyages, however, always in quest of the remedy for plague. Finally, in 1693, he was called to Stockholm to treat the queen of Charles XI. then ill with plague. But before he could render her any service, he contracted the disease and died on the third of August.

The bubonic plague of to-day is identical with the "black death" of the Middle Ages. Primarily a disease of rodents, caused by a short dumbbell shaped microscopic vegetable, the yeast bacillus. It occurs in man in three forms: The pneumonic, which has a death rate of almost 100 per cent.; the septicemic, which is nearly as fatal, and the bubonic, in which even with the most modern methods of treatment the mortality is about 50 per cent. It is a disease of commerce, spreading around the globe in the body of the ship-borne rat. It is estimated that every case of human plague costs the municipality in which it occurs at least $7,500. This does not take into account the enormous loss due to disastrous quarantines and the commercial paralysis which the fear of the disease so frequently produces.

The disease is now treated by a serum discovered through the genius of Yersin. This is used in much the same way as is diphtheria antitoxin.

Plague is transferred from the sick rodent to the healthy man by fleas. The sick rat has enormous numbers of plague bacilli in its blood. The blood is taken by the flea, which, leaving the sick rat, seeks refuge and sustenance on the body of a human being, to whom it transfers the infection.

Since plague is a disease of rodents and since it is carried from sick rodents to well men by rodent fleas, safety from the disease lies in the exclusion of rodents, not only exclusion from the habitation of man, but also from the ports and cities of the world. Those who dwell in rat-proof surroundings take no plague.

BLAME ON AUSTRIA.

Locked Upon as the Cause of All Germany's Misfortunes.

A Russian officer arriving in Paris from the eastern front states that the difficulties experienced by the Austrians in transporting troops from the Italian front to Galicia in order to meet the Russian offensive are very great. The Germans had to do the bulk of the work during the first three weeks of the Russian offensive.

Before Kovel and on the road to Lemberg the resistance is made by the Germans. Indeed, had the Austrians been left to themselves during this period they would have been irremediably lost, since they were unable to bring up to the battlefield more than eighty or a hundred thousand men.

The anger of the Germans against the Austrian command can therefore be easily imagined. Austria's attack on the Trentino, which ended in a formidable check, is made the subject of derision by the Hochas, who also see in it the cause of all their misfortunes.

THE ROAD TO HEALTH

Lies Through Rich Blood and Strong Nerves.

Debility is a word that fairly expresses many ailments under one name. Poor blood, weak nerves, impaired digestion, loss of flesh, no energy, no ambition, listless and indifferent. This condition is perhaps the penalty of overwork or the result of neglected health. You must regain your health or succumb entirely. There is just one absolutely sure way to new health — take Dr. Williams' Pink Pills. These pills will bring you new life, fill every vein with new, rich blood, restore elasticity to your step, the glow of health to wan cheeks. They will supply you with new energy and supply the vital forces of mind and body.

There is not a corner in Canada where Dr. Williams' Pink Pills have not brought health and hope and happiness to some weak debilitated person. If you have not used this medicine yourself ask your neighbors and they will tell you of some sufferer who has been restored to health and strength through using Dr. Williams' Pink Pills. One who has always a good word to say for Dr. Williams' Pink Pills is Mrs. Luther Smith, of West Hill, Ont., who writes: "I feel it a duty as well as a pleasure to tell you what Dr. Williams' Pink Pills have done for me. I had an operation for tumors. The operation in itself was quite successful, but I was so badly run down and anaemic that I did not gain strength, and the incision did not heal, and kept discharging for nearly a year, until I weighed only eighty-six pounds and could scarcely walk across the floor. I had got so sick of doctors' medicine that I would vomit when I tried to take it. A good friend urged me to try Dr. Williams' Pink Pills, so I bought a box. Before they were gone I thought I could feel a difference, and I got a further supply. By the time I had taken five boxes the wound ceased discharging and commenced to heal. I took in all thirteen boxes and am to-day enjoying the best health of my life and weigh 140 pounds. I sincerely hope anyone suffering as I did will give Dr. Williams' Pink Pills a fair trial, and I feel sure they will not be disappointed."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

HUN SAVAGERY OUTDONE.

Terrible Story of Austro-Hungarian Outrages in Serbia.

Many people are inclined to dissociate the Austro Hungarians from the charges of lustful savagery which have been proved against the Huns. They will be unpleasantly made aware of the truth by a glance at the official report upon the atrocities committed by the Austro-Hungarian army during the first invasion of Serbia. Dr. R. A. Reiss, professor at the University of Lausanne, has collected evidence of what actually happened. His report is a thorough examination of facts, verified on the spot.

Dr. Reiss's pictures are photographs of horrors. They alone prove "that the 'charming Austrian people' and the 'proud and gallant Magyar race' have had the doubtful honor of surpassing, if possible, their German friends in beastiality."

The Austrians are convicted out of their own mouths. Explosive and dumdum bullets were freely used; this, with the bombardment of open towns and the mere shooting down of civilians, must be considered the minor cruelties of which they were guilty.

At the instigation of Austrian officers men and women were killed and mutilated with knives in ways which it is impossible to describe.

Dr. Reiss comments on the fact that "the Serb peasants are very reserved indeed, and I am convinced that they are more inclined to say too little than too much. I think there are many more victims than appear in the lists. In many of the villages almost all the women from the very youngest to the very oldest, have been violated."

There are two sides to every story and some have four sides and a ceiling.

We always admire a man who says just what he thinks—about other people.

FROM OLD SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What Is Going On in the Highlands and Lowlands of Auld Scotia.

Women cabdrivers are stated to be a success in Glasgow. One city firm has about 40 women driving cabs.

It was decided at a meeting of the Edinburgh and Leigh Millers' Association to raise the price of flour by 24 cents per sack.

Edinburgh accounts show an actual surplus of $210,000. Over $55,000 of the surplus will be available for the relief of the rates.

The burgh of Montrose had loans outstanding at the end of the year to the amount of $266,550, which is $32,440 less than at the beginning of the year.

The gardens in Kirkcaldy and district have been greatly damaged by the long continued rainfall. In many instances fruit of all kinds is a total failure.

An interesting function occurred in the village of Newtyle, when the Earl of Strathmore presented the D.C.M. to Company Sergeant-Major Beverley, a local Territorial.

The need for an imperial policy regarding trade after the war was advocated at a meeting in Glasgow under the auspices of the British Empire Producers' Organization.

The Ayr Town Council agreed on the motion of Provost Mitchell to confer the freedom of the burgh on Sir Edward Morris, Premier of Newfoundland, when he visits Ayr.

To provide houses for the rapidly increasing staff of workers at the Clyde Torpedo Factory, Greenock, the Admiralty purposes to take ground near Cave Farm, Gourock, and place groups of cottages on it.

The death has occurred at Kelso of Mr. John Brown, in his 78th year. He was a justice of the peace for Roxburghshire, and for a long period a member of the Kelso Town Council.

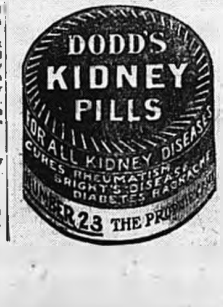
There was formally handed over to the authorities at the military hospital at Craiglockhart a recreation hut for wounded soldiers, the gift of the Edinburgh Committee of the Red Cross Society, erected at a cost of $6,750.

The first motor fishing boat built in Kincardineshire was recently launched from the building yard of Mr. A. Clark, Cowie, Stonehaven, to the order of Messrs. James Burnett & Sons, shipowners.

An order has been issued declaring that a portion of Scotland north of the Caledonian Canal to be a special military area, to which no person will be allowed access without a special permit.

During the flag-day recently held in Glasgow in aid of the Princess Louise Hospital for limbless sailors and soldiers, a sum of over $11,015 was collected.

The Rt. Hon. Atholl Monson, 24th Baron Forbes, premier baron in the peerage of Scotland, and chief of the Clan Forbes of Castle Forbes, Aberdeen, has left an estate valued at $29,752.



THE CAT'S WHISKERS.

The Reason That They Are Still in Style.

Although hirsute adornments of all kinds, whiskers included, were once the real and indispensable thing, modern sanitary practice has made such inroads on unharvested beards and long hair that only a few scattered humans such as musicians and soapbox orators still retain their hairy luxuriance. Notwithstanding this, however, the house cat has grown and nurtured its crop of whiskers or feelers for the last million years or so without bothering about hygiene.

The fact is that the cat's whiskers are absolutely necessary to it. The whiskers are as long as the cat's head is wide, and the head is as wide as the body, so wherever the whiskers go there may be cat go also.

The tiny, delicate hairs grow from a gland and are nerved to the utmost sensibility. No matter how light the touch of the hair against an obstacle it is instantly felt by the cat.—Popular Sciences Monthly.

Guard Your Baby's Health

Cheerful, Chubby Children Make the Home Happy

Weak, puny babies are a constant care to tired mothers and are subject to many diseases that do not affect healthy children.

Keep your children in good health. See that their bowels move regularly —especially during the teething period. This is a distressing time in the life of every child and the utmost precaution should be taken to keep them well and strong.

By the consistent use of

Mrs. Winslow's Soothing Syrup

at it possible to avoid many childish ills now so prevalent.

It is a corrective for diarrhoea, colic and other infantile ailments. It soothes the fretting baby and permits the child to sleep well and grow healthy. It brings comfort and relief to both child and mother.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

It absolutely non-narcotic. It contains no opium, morphine nor any of their derivatives. It is soothing, pleasant and harmless. For generations mothers in all parts of the world have used it and millions of babies have been benefited by it.

Losing Ground.

"My wife is in a fix about her garden party."

"What's wrong?"

"Declinations are coming in about as fast as she can send invitations out."

Minard's Liniment Cures Dandruff.

Gave Him a Pointer.

"I'd like to see Mr. Jones," said the lady caller.

"Sir. Jones is engaged, ma'am," replied the new office boy.

"Engaged, fiddle-ticks," exclaimed the lady. "He's married, and I'm his wife."

This is to certify that I have used MINARD'S LINIMENT in my family for years, and consider it the best liniment on the market. I have found it excellent for horse flesh.

(Signed)

W. S. PINEO.

"Woodlands," Middleton, N.S.

Who Cashed It?

"I sent a check to that fund, but I don't believe in parading my charity."

"Well?"

"So I signed a fictitious name to it."

Minard's Liniment Cures Burns, Etc.

Sir William Robertson.

Sir William Robertson and General Haig are exercising a rigid discipline in dealing with the higher commands. Efficiency is the only test. There is no hesitation in dispensing with generals who are not up to their work. Home they go. Sir William Robertson is quite a character. He is a man of few words and strong views. Officers' messes are full of good stories regarding him. The following may be taken as typical. An important military proposal was being discussed at a conference. Many lengthy speeches had been delivered. Then Sir William's opinion was invited. He responded with, "Gentlemen, it won't do. We can't have it."

Dyeing Materials in Brazil.

Brazil is said to be capable of furnishing a profusion of materials for dyeing purposes seldom found in one country. The list ranges from black to faint yellows and rose. Of the old-time vegetable dyes Brazil possesses an almost endless variety.

Many a bluffer has a wife that he is unable to bluff.

INVASION OF WOMEN.

Many New Occupations Are Being Opened Up to Them.

Before the war there were five million, five hundred women wage earners in Great Britain; to-day there are said to be over ten millions. Five million men have enlisted for active service, and a woman has taken the place of every able-bodied man who might have been engaged in peaceful occupations. England has never been so busy a manufacturing and industrial country as she is in 1916, but this would never have been possible if women had not stepped into the breach.

In Canada there is not the same supply of surplus available women, so that in this respect Canada has not experienced so great a revolution in industrial life, but many new occupations are being opened to Canadian women, and the demand for women workers in factories and in the great industrial life of the railways is steadily on the increase. If Sir Robert Borden is to secure his 500,000 Canadian soldiers, 100,000 women must temporarily step into the shoes of men so that the latter may be released for service, as the limit of available men seems almost to be reached. Women are already working alongside of men in sacking and hauling of grain at the Great Lakes elevators, in the Canadian Pacific yards and shops where they are cleaning cars, in the telegraph services and in many clerical positions hitherto held by men. They are acting in some places as Station Agents with satisfaction to their employers. But Canadians who visit England are surprised to find women ticket inspectors and guards, women as elevator attendants, women as chauffeurs, and train conductors, women as red caps, porters and ticket clerks; women as locomotive cleaners and track greasers.

SANG UNTIL KILLED.

German Soldier's Baritone Enjoyed by Friend and Foe.

Now and then a "close up" shows in the big war drama in France. An English officer returning wounded to London told the story of Paul.

At a point where the opposing lines were so close the enemies caught occasional glimpses of one another, Paul's rich baritone entertained his German comrades and the British Tommies alike.

During lulls in the fighting, to a mouth harp accompaniment, Paul sang favorite tunes from light operas. He always drew a generous hand from the British soldiers.

One day the British "went over" for a charge. When the lines were reformed they called for a song.

"Tell Paul to sing," yelled a Tommy.

There was silence for a moment. Then a German called back, "You hat shooted Paul; he sings no more."

Had To Be Cold There.

The following is told by a young bride-elect who was ordering her trousseau in England before going out to New Zealand to be married. The dressmaker suggested only very warm clothes, and when the young lady demurred at this, asserting that the climate of New Zealand is a beautifully mild one, she was immediately informed—"I assure you, madam, you are mistaken, for that, of course, is where the frozen meat comes from."

Minard's Liniment Relieves Neuralgia.

A Poser For The Teacher.

"Now, remember, children, the tares represents the bad people and the wheat the good ones," observed the teacher of the Sunday School class. "Why, Miss Mason?" exclaimed a rosy cheeked boy, who had been listening through the lesson with deep interest. "Did you say the tares are the bad folks and the wheat the good ones?" "Yes, James," replied the teacher, pleased at the lad's interest. "Well, that's funny, I think," remarked the matter-of-fact child. "It's the wheat that gets thrashed; the tares don't."

Between the men who used to do things and the men who are some day going to do things are the men who are actually doing the work of the world.

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impurities and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always.

The Paisley Advocate

PAISLEY, SEPT. 27th, 1916

—Wouldn't be surprised if all the French-Canadian boys will now want to enlist. Since those who went to the frodt are having such a bully time chasing the Germans at Pozieres.

—The hundred million war loan has been oversubscribed to the extent of $75,000,000. Sure, advertising always brings results. One insertion of the big adv. in THE ADVOCATE did it.

LOCAL AND DISTRICT NEWS

To Stamp Out Truancy

The School Act states that each child between the ages of 8 and 14 years must attend school every school day during the year unless excused by illness or other reasons stated in the Act. The Government intends to stamp out truancy and negligence on the part of parents. All inspectors now insist on a strict observance of the Act.

Pte. McDougall Wounded

On Monday Mr John McDougall, of Elora road north, received a cablegram informing him that his son, Pte John Alex McDougall, had been admitted to the First War Hospital at Birmingham, suffering from a gunshot wound in the side. Further particulars of the casualty will be received later. Pte McDougall enlisted in November, 1914, and went overseas with a transport corps. He was on transport service at the front for a time, but last spring was transferred to the Pioneers. It is hoped that his wound is not serious.

The Hunting Season

The following seasons for game are set forth in the statutes passed last session by the Ontario Legislature, on the recommendation of the Fish and Game Commission: Woodcock, open season from Oct 15th to Nov 15th; partridge, closed season until Oct 15, 1918; duck, snipe and plover, open season Sept 15th to Dec 31; hares may be taken by any means between Oct 15th and Nov 15th, and between Dec 23rd and Jan 22nd, and may be taken by other means than shooting at any time; cotton tails may be taken killed or destroyed in any manner by the owner, occupant or lessee of any land upon which they cause damage; black and grey squirrels, closed season for three years.

County Court Clerkship

We understand that the contest for the County Court Clerkship, made vacant by the death of the late Matthew Goetz, has simmered down to two candidates, Mr Arthur Collins, B A, barrister and town clerk and treasurer of Walkerton, and Mr C E Stark, barrister, of Tara. It is felt here that the appointment will likely go to Mr Collins, as it is naturally a South Bruce appointment, the other two Bruce ridings dividing the Shiretalty and the Registrarship. There is no question of Mr Collins being admirably qualified for the position as well as having strong political claims which are being urged by his friends, and this appointment would be especially popular in this part of the county.—Telescope.

160th About Perfect

The Bruce County overseas battalion was inspected by General Lessard at London on Wednesday and Thursday, and we understand were credited with being 99 per cent. of the standard of efficiency and fitness. This reflects credit not only on the men, who have worked hard and intelligently, but also upon the officers who had them in hand. It is really marvellous that in the short time the battalion has been together they have attained so near to perfection in the various branches of preparatory training. The remaining few weeks in which they will continue training at London will no doubt bring them above the standard. In physique the 160th is reported to be second to none. So that with their high efficiency they will will become a noted unit by the time they reach the front.

Warning to Lawless Boys

EDITOR ADVOCATE—Will you please give me a little of your valuable space. I want to warn a class of lawless, bad boys and their parents also. I have put up with their badness just as long as I intend to. My next move will be in the magistrate' court. I know whothey are. They interfere with my respectable business of delivering milk to some of the citizens of Paisley. They are concerned as well as myself. The boys have overturned the milk cart and spoiled the milk upon several occasions. Quite a few mornings ago they took the cart to the middle of the road and tipped the bottles out and took one. And on my little girls are delivering they interfere with them and frighten them in the dark. Now, sir, I am giving them their last warning before taking more stringent measures, which I will most surely do if the lawlessness is continued. JESSIE MCARTHUR.

Lost Their Wet Goods

The Lucknow Sentinel tells how one man, or a number of men of that town, lost the store of wet goods they had laid in prior to Sept 15th. Like most stories, there is a woman in it. This woman, according to the story, had noticed some of the men folk acting in an unaccountable manner about the ice house. They were visiting the place oftener than usual, and there was something about their movements during these extra visits which suggested secrecy and an uneasy conscience. Naturally the woman's suspicions were aroused and she decided to investigate. The cause of the unusual visits was soon discovered in the form of a number of boxes which did not appear to be a necessary part of the ice house equipment. One of these which had been opened disclosed the whole secret. It contained the familiar wet goods of the brewery. The woman recognized the stuff as the arch enemy of home and country, and having the courage of her convictions, she made an immediate attack. The cases were taken from their cool resting place to the vicinity of a good sized rock. There they were broken open and the bottles went bang, bang, bang upon the rock until not one was left. Some say there were 96; others put the number as high as 96. But whatever the number, the performance called for a good deal of courage, determination and muscle.

Pinkerton Fall Fair Prize List

HORSES

HEAVY DRAFT—Span, Wm Long & Sons, Dav'd Pinkerton; spring colt, D Pinkerton, Wm Long & Sons; brood mare, Wm Long & Sons; W T Hopper, D Pinkerton.

AGRICULTURAL—Span, Long & Sons, Napper Bros, A Schmidt; spring colt, F Rennie, W T Hopper, Napper Bros; brood mare, Long, Napper, Rennie.

THE BLESSING OF A HEALTHY BODY

Has Not Had An Hour's Sickness Since Taking "FRUIT-A-TIVES".

MR. MARRIOTT
78 Lees Ave., Ottawa, Ont.,
August 9th, 1915.

"I think it my duty to tell you what "Fruit-a-tives" has done for me. Three years ago, I began to feel run-down and tired, and suffered very much from *Liver and Kidney Trouble*. Having read of "Fruit-a-tives", I thought I would try them. The result was surprising. During the 8½ years past, I have taken them regularly and would not change for anything. *I have not had an hour's sickness since* I commenced using "Fruit-a-tives", and I know now what I haven't known for a good many years—that is, the blessing of a healthy body and clear thinking brain".

WALTER J. MARRIOTT.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Farming Has Thrills of Its Own

Toronto Telegram

Last year the western farmer sold his wheat at ninety cents to a dollar. The price went up and the speculator reaped a profit of from fifty to sixty cents a bushel. This year the cry, "Hold your wheat," has gone declaiming across the continent. And the farmer who holds may find the Dardanelles forced and the Russian wheat pouring into the world's market with a most depressing effect on the price. Figuring this along with the chances that the farmer takes with drought, flood and frost from the time he sows until he harvests, it can hardly be argued that tilling the soil is the least exciting of occupations. The prairie farmer who goes to bed with his crop standing in the field and the mercury hovering around freezing point has a fair idea how the stock speculator sleeps when the market is threatened with a panic.

THE STANDARD HOTEL

With the introduction of provincial prohibition on the 16th inst., all hotels throughtout Ontario became "standard hotels"—that is, they will be licensed as places of accommodation, though not to sell spirituous liquors. This license permits the selling of cigars, tobacco, newspapers and magazines, and etc., which would otherwise allowed, and it is the dividing lines between the words "hotel" and "boarding house." The Government has no intention of merely getting some of the hotel owners' money, as the fee is not excessive and the license is very essential. To each applicant for a license has been delivered a copy of regulations governing the conduct of lunch houses. Briefly they are :

A Standard Hotel shall be a place of public accomodation, approved and licensed as such by the Board, and containing such number of bedrooms, together with complement of bedding and furniture and public waiting and serving rooms and conveniences, as in the opinion of the Board are suited to the needs of the locality and the travelling public. Each of such Standard Hotels shall be a well appointed eating house, with appliances requisite for daily serving of meals to guests of the hotel.

The premises shall be kept comfortably heated, properly lighted and ventilated, sanitarily clean at all times, and in good repair ; regard being always had to the comfort and satisfaction of guests.

The holder of a Standard Hotel license shall be a person of good character and legal age, or may be a firm or a partnership or an incorporated company.

Every Standard Hotel license shall have placed over its main entrance a sign bearing in plain legible and prominent characters the name of the hotel, and also in smaller characters the subsign "Licensed as a Standard Hotel under the Ontario Temperance Act."

Every Standard Hotel shall keep in its office a register, in which at least the name and address of every guest who occupies a room shall be registered, with date and number of room.

Every Standard Hotel shall keep a supply of pure cold water conveniently placed for use of guests.

Every guest's room shall have a secure bolt on the inner side of every door and in addition thereto the door into the public shall have a strong lock with portable key for the use of the guests occupying the room.

On the inside of the door of every guest room in every Standard Hotel shall be posted a notice stating the rates to be charged for the use of said room, and whether the rates are on the American plan and include meals, or are on the European plan for the use of the said room only.

Standard Hotel located where water works and sewer service are available shall have adequate modern lavatory and water closet and bath accommodation for both sexes.

Licensees are warned that under the Ontario Temperance Act, liquor cannot be sold, served or kept upon the premises of a Standard Hotel.

Fire escapes must be provided and so located as to be accessable at all times, and not placed in bathrooms, bedrooms or other rooms.

OBITUARY

On Tuesday, Sept 19th, death came with awful suddenness to Forbes A McNeill at the residence of his brother, Jas A McNeill, Lockerby. He had been in his usual good health and had partaken of a hearty dinner. Shortly after he collapsed and fell to the floor. Mrs McNeill's brother, who was in another room, heard something fall heavily and on coming out to the kitchen found him lying on the floor unconscious. His brother, Jas A, was at the power house and was immediately telephoned for, but on his arrival found that his brother had passed away. Dr Houston was summoned and pronounced death due to heart failure. Deceased was born in Kildersbie 36 years ago and lived there all his life. He was of a quiet and unassuming disposition but had many friends. He made his home with his brother, J A McNeill, at Lockerby. He will be much missed in the home and among his friends where his many acts of kindness gave him a warm place in their hearts. He is survived by one brother, J A McNeill, manager of the Paisley Electric Light Co. The funeral took place on Thursday at 2 o'clock p m, Rev M Neilans, of Paisley Baptist church conducting the service. The remains were laid to rest in the family plot in Rush's cemetery. To the sorrowing brother and relatives the community extends its heartfelt sympathy.

Misery in Back, Headache and Pain in Limbs.

Dear Mr. Editor—For more than a year I suffered with misery in the back, dull headache, pain in the limbs, was somewhat constipated and slept poorly at night until I was about ready to collapse. Seeing an account of the wonderful qualities of "Anuric," prepared by Doctor Pierce, of Buffalo, N. Y., I sent for a box, and before using the whole box I felt and still feel improved. My sleep is refreshing, misery reduced, and life is not the thing it was before. I most cheerfully recommend this remedy to sufferers from like ailments.

Yours truly, W. A. ROBERTS.

NOTE: You've all undoubtedly heard of the famous Dr. Pierce and his well-known medicines. Well, this prescription is one that has been successfully used for many years by the physicians and specialists of Dr. Pierce's Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for kidney complaints, and diseases arising from disorders of the kidneys and bladder, such as backache, weak back, rheumatism, dropsy, congestion of the kidneys, inflammation of the bladder, scalding urine, and urinary troubles.

Up to this time, "Anuric" has not been on sale to the public, but by the persuasion of many patients and the increased demand for this wonderful healing Tablet, Dr. Pierce has finally decided to put it into the drug stores of this country within immediate reach of all sufferers.

I know of one or two leading druggists in town who have managed to procure a supply of "Anuric" for their anxious customers in and around this locality. If not obtainable send one dime by mail to Dr. Pierce for trial package or 50 cents for full treatment.

EDITOR—Please insert this letter in some conspicuous place in your paper.

Bread Making Contests
At Rural School Fairs

PRIZES—Free Courses at Macdonald Institute, Guelph
Free Poultry Raising Courses at Ontario Agricultural College
Free Cook Books and Magazines

Over 1,500 prizes in all will be offered in bread-making contests which will be held this fall at over 250 rural school fairs taking place in Ontario. It will be a great event at the fairs and will stimulate interest in bread-making among young girls between the ages of 12 and 17 years.

Here is a wonderful opportunity for your daughter to win for herself a Free Course in Domestic Science at the famous Macdonald Institute, Guelph. All she has to do is to bake one double loaf of bread and enter it in the contest at the fair according to the conditions explained below and more fully told in the folder we will send you on request. The loaf must be baked with

Cream of the West Flour
the hard wheat flour guaranteed for bread.

This is a splendid flour which makes the biggest, bulging loaves—whitest, lightest and most wholesome bread you ever baked. Is this not a splendid opportunity to interest your daughters in breadmaking?

Here are the Splendid Prizes offered for the best loaf of bread baked with Cream of the West Flour. The following are offered at each local Fair:

1st Prize—1 gold-up subscription to "My Magazine" for 1 year. This magazine is full from cover to cover every month with articles suitable for young people of all ages. It is published in England. Value $2.50 per year.

2nd Prize, 1 month's gold-up subscription to "My Magazine." Value $1.25.

Extra Prizes.—When entries exceed ten a 3rd prize will be awarded of 3 mos. paid-up subscription to "My Magazine." When the number of entries exceeds twenty the judges at the fair will award 4th, 5th and 6th prizes of gold-up subscriptions to "The Little Paper." This is a wonderful little publication issued every month in England. Its eight pages are packed with bright, snappy stories and stories relating to history, nature-study, animals, bird-life, etc.

Important—The winners of 1st prizes at the fairs automatically become competitors for the Provincial Prizes. The second half of the double loaf is sent to Ontario Agricultural College, Guelph, by the district representative in special container provided. The judging is done by Miss L. A. Hyslop of the Department of Breadmaking and Flour Testing at the College.

Provincial Prizes—The winners of first prizes at each local fair competes for following Provincial prizes. The first and second prizes, or third and fourth prizes, will be awarded in any one county:

1st Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph. The Macdonald Institute does not accept students under the age of 17 years; if the winner be less than 17 we promise her with a certificate entitling her to take the course when she reaches the right age. Value $75.00, which pays for fees, room, board and washing. The winner lives at Macdonald Hall while taking course.

2nd Prize.—Short Course (3 months) in Domestic Science at Macdonald Institute, Guelph.

3rd Prize.—Short Course (4 weeks) in Poultry Raising at Ontario Agricultural College, Guelph. Girls taking this course do not live at the College, but good boarding houses can be secured for them in Guelph. Value of course $33.00, which pays board of student in Guelph. (No fees are charged for course.)

4th Prize.—Short Course (4 weeks) in Poultry Raising at the Ontario Agricultural College.

5th to 20th Prize.—The Famous Boston Cooking-school Cook Book, by Fannie Merritt Farmer latest edition (1914). There are 1117 thoroughly tested recipes and 130 photographic reproductions of dishes, etc., besides much special information.

Conditions of the Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1913, or her 17th birthday come not occur before Nov. 1, 1913. One loaf of bread must be submitted baked in pan about 7 x 3 inches and 3 inches deep, and divided into two loaves so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One half will be judged at the fair. The other half first prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the Provincial Contest. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fair.

The standard by which bread will be judged will be as follows:

1. Appearance of Loaf	15 marks
(a) Color	5 marks
(b) Texture of crust	5 marks
(c) Shape of loaf	5 marks
2. Texture of Crumb	40 marks
(a) Evenness	15 marks
(b) Whiteness	20 marks
(c) Color	5 marks
3. Flavor of Bread	45 marks
(a) Taste	25 marks
(b) Odor	20 marks

Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller (important) and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one prize will be awarded to the same family.

The Results of the contests at the fair will be made known in the usual way at the fair and will be announced in the newspapers after the conclusion of the Rural School Fairs in the Province.

Do Not Miss this Great Opportunity: Every girl between 12 and 17 years should compete. What a splendid way to stir up increased interest in breadmaking! Get a supply of Cream of the West Flour at your dealers and practice using it as often as possible to increase the chances of winning. If your dealer cannot sell it to you, write to the Campbell Flour Mills Co., Ltd., Toronto, and they will promptly tell you the nearest place to get it.

No Competitions in Counties Named Below: The competition is open to all parts of the province where Rural School Fairs are held, except the districts of Rainy River, Kenora, Manitoulin and Thunder Bay. These districts are the only parts of the province where school fairs are held by the Department of Agriculture in which this competition will not be a feature. There are no district representatives of the Department of Agriculture in the Counties of Huron, Perth, Wellington, Haldimand, Prescott, Russell or Lincoln, and no rural school fairs are held in these Counties by the Department of Agriculture. We regret, therefore, that the competition cannot include these Counties.

If you cannot get Cream of the West Flour in your neighborhood, write us for prices.

Canning and Preserving Fruits.

There are two distinct general methods of treating fruit so that it will not change or be changed though held for a time ranging from a few weeks to three or four years. These methods are termed canning and preserving. Many people do not realize the difference. We find, however, that canned fruit depends for its keeping qualities upon heating and perfect sealing, whereas preserves need not be sealed because their high sugar content prevents micro organism from acting upon the fruit.

Strictly speaking canned fruits and preserves should keep the fruit in its exact original condition. This, however, is an ideal which is never realized. If fruit is sealed in tin cans and then cooked long enough to kill all the minute forms of life within the can there are still several changes which may occur. Red fruits—strawberries, raspberries, and cherries—are high in acid. The acid attacks the tin, forming salts of tin, and the latter quickly destroy the color of the fruit. Such a change has little effect on flavor and digestibility. Canners have largely overcome this difficulty by obtaining a special kind of tin plate and by covering this tin with gold colored enamel.

Fruit canned in glass jars cannot lose color through tin salts. There is sometimes a change in color due to light. Here again the red fruits suffer most severely.

Probably the most important fact to remember regarding canned fruits is that changes such as fermentation due to micro organisms are not prevented by the sugar added. The sugar used is for flavoring. Heating and sealing kill the harmful molds and yeast and then keep others from coming into the container.

There are two away in canning fruit. Some people cook the fruit before placing it in the jars or cans, others pack the raw fruit, cover it with hot sugar syrup, seal or partly seal, cook and then seal if sealing has not been done first. If the fruit is cooked before placing in the container the latter must be thoroughly sterilized first. In the second case the container need only be washed.

Preserves include jam, jellies and marmalades. If a fruit product contains 70 per cent. of sugar, by weight, molds and yeast cannot live in it. Hence, if a person knows the weight of the ingredients put in a preserve as well as the yields of the preserve one can usually predict whether the product will keep. Take the following case:—

Weight of fruit	10 lbs.
Weight of sugar	10 lbs.
Total ingredients	20 lbs.
Yield of jam	14.5 lbs.
Loss in evaporation	5.5 lbs.

Thus 14.5 lbs. of jam contains 10 lbs. of sugar or 68.9 per cent.

To this may be added 3 per cent. for the sugar naturally contained in the fruit, making 71.9 per cent. sugar This should keep.

A drop of water on the surface of a preserve dilutes it at that point and will likely start mold growth. Hence jars to be filled with jam or jelly should not be covered until cold because the steam rising from the warm or hot product will condense on the cover and have the same effect as an added drop of water. It is is desirable to cover preserves while they are hot, sterilize the top, seal perfectly while hot and turn the jar upside down. By this method molds are eliminated to begin with and as with canned fruits prevented from entering afterwards.

Preserves also lose color through the action of light.

In case of jam and marmalade moderate firmness is desired. Jellies require to be quite solid. In all cases the solidifying is due to the combination of sugar with a substance in the fruit called pectin. The jellying or solidifying only takes place when the preserve is condensed to a certain extent by evaporation. Some fruits are low in pectin and will not properly solidify no matter how much condensed. A viscous, sticky syrup results. In any case the preserve is improved if a juice such as crab apple or currant juice is added. This juice is rich in pectin. By using it more sugar may be used, say 10 of sugar to 8 of fruit. Thus the time of cooking is reduced, color and flavor are retained, the yield is increased and solidifying results.

It will be seen that canning and preserving depend upon fixed laws. One should always try to explain why an operation or proportion is required. A good set of scales might mean a saving of material to many a housewife.—Ontario Department of Agriculture.

Seasonable Recipes.

Wild Grape Juice.—Pick over wild grapes and almost cover with cold water; bring slowly to a boil. When all juice seems free strain through a jelly bag. For each quart of juice allow one tea cup sugar; boil five minutes, bottle and seal. This is much richer than the juice made with the tame grapes.

Earth Peach Preserve.—Procure fresh peaches, free from bruises, and peel. Secure a large old-fashioned stone jar, the sort that comes with a closely fitted stone cover, something on the fashion of the old-style churns. Place in this alternate layers of freshly peeled peaches and granulated sugar, using about pound for pound of sugar and fruit. Place the stone cover tightly in place—seal around with sealing wax and bury in the earth, leaving the jar low enough in the earth to prevent freezing or mound enough earth over it to prevent freezing. Just as one does when burying cabbages or apples. Do not disturb these for three months, and five is better. When opened you will find the most delicious preserves that can be imagined—better in flavor and different than from any other method. Something of the flavor of brandied peaches, rich and smooth and better than by any other process.

Chipped Gingered Pear.—Use eight pounds of pears, eight pounds granulated sugar, one pound candied ginger root and four lemons. Chip or slice the pears fine, simply coring and not peeling them. Slice the ginger root and boil with the sugar and pear, and four tablespoonfuls of water for one hour. Boil the lemons whole in a little water till tender, then cut them up in small bits, removing the seeds, and add to the pears and boil one hour longer. Can in jelly jars or large topped cans.

Peach Mangoes.—Use the large free stone peaches, pare with silver knife as thin a peeling as possible. Cut in halves and remove the seed. Fill the cavity with the following mixture: Cut one cup of preserved ginger into thin slices; add one teaspoon grated horseradish, one tablespoon each of black and white mustard seed, one teaspoon celery seed and one-half teaspoon black pepper seed. Tie the halves together carefully and drop into a syrup made as follows: To one quart of vinegar add three pints of sugar, two ounces each cloves and cinnamon bark, put spices in a muslin bag and drop in the syrup. Let the fruit cook very gently in the syrup until tender, then lift from the syrup and place in the jars. Cook the syrup until slightly thick, then pour over the peaches and seal.

Baking Soda Uses.

There are numerous uses to which baking soda can be put, apart from the accustomed and legitimate ones of cake and bread making. First of all, it is an excellent family remedy for scalds. When milk is on the point of turning sour a pinch of baking soda dropped in it will restore it to its natural sweetness.

A thick paste made of soda and water is excellent for cleaning glasses in which milk, ice cream or other greasy substance has been standing, or even when there is no time to make a paste, if the fingers are dipped in water, then in dry soda, and the greasy part of the glass is rubbed around with them, the marks will quickly disappear and the glass become bright.

Lamp chimneys treated in the same way will shine like crystal, while if a lamp burner is boiled for half an hour in soda and water it will cause the lamp to burn with renewed brilliancy. Soda is also excellent to clean silverware. Make it into a thin paste and rub briskly, then wash in hot water.

Things Worth Remembering.

To remove paint from glass rub with hot vinegar.

Ether is good for removing grease stains from clothing.

To prevent accidents, paint the bottom cellar steps white.

All suet puddings should be cooked a long time to make them digestible.

Add a teaspoonful of salt to starch, when making, if a gloss is desired on linen.

Drive six brass-headed tacks in the ironing board to take the place of a flat-iron stand.

It is wise to put a little salt in the water in which vegetables are washed. It will destroy insects.

Allow two level teaspoonfuls of baking powder to each cup of flour when no eggs are used.

To cut butter in, small even squares for the table, use a coarse wet thread as this leave no ragged edges.

The small pin feathers that are so hard to clean from very young chickens can be wiped off with a damp cloth in much less time.

Cold water closes the pores of the skin and makes it firm. A little vinegar or cologne added to the water also assists in the hardening.

When boiling meat which is inclined to be tough add one teaspoonful of vinegar. This makes it tender, and gives a good flavor.

When no suet is at hand, and a little is required for puddings, etc., chop some dripping finely and use. It will answer the purpose quite well.

Before polishing furniture, wipe over with a cloth dipped in hot water and wrung out. If this is done, finger-marks will not show.

If furniture is washed with lukewarm vinegar and water before polish is applied, very little will be required and a great saving in labor effected.

A use for old velveteen—Take a piece the size of a duster and tie it over the head of a broom used for wiping down walls. It cleans them beautifully.

To shine shoes quickly do not blacken but rub on a piece of orange and let the juice dry in, then polish with a soft brush and then they will shine like a mirror.

If clothes are to be ironed soon after they are dry use hot water for sprinkling them. They will dampen more quickly and evenly than if cold water is used.

When madras curtains are laundered they can be easily dried by hanging them on their own curtain rod and putting a heavy rod in the bottom hem to hold them steady.

When reheating meat place some gravy in a deep frying pan, season it and make quite hot, put in the meat and simmer gently, but do not allow to boil, as boiling makes the meat tough.

To clean dark varnished front doors, rub over, after dusting, with a little brown shoe polish on a piece of cloth; polish with a dry duster, and the door will look as if newly painted.

To remove the shine from serge, sponge the dress or suit with hot vinegar and press in the usual manner and all shine will disappear. The vinegar leaves no stain.

A small sponge the size of an orange will be found very practical to have to wash the little cores with, and more satisfactory than a cloth. Tie on a string so it can be hung up to dry after using.

MOTORCYCLE FIRE ENGINES.

Carries Apparatus and a Crew of Two Fire-Fighters.

The motorcycle, which has distinguished itself in family vehicle and a bearer of despatches in warfare, is being tried as a supplement to municipal fire-fighting. A machine of the side car type is equipped with racks for chemicals, axes, and other light fire-fighting apparatus and manned by a crew of two men. It thus provides a light, speedy mobile unit which can make fast time to the scene of a fire, and may be able to check a serious blaze in its inception by virtue of sheer speed.

Costs More.

"I've tried to teach my boy the value of money."

"Good thing!"

"Well, I don't know. He used to behave for ten cents, but now he wants a quarter."

THE DISABLED HERO.

No Effort Too Great to Restore His Ability.

There are already about 1,700 disabled soldiers now under treatment in Canada, and almost every week sees more of them arriving from the front.

Some of them, of course, are so seriously disabled that it is impossible for them to take up again their former occupations, or, at all events, to take them up again without the aid of artificial appliances and training in their use.

They are heroes, we say; but the glamor of heroism will not content them long. The same quality of self-respect that made them freely enlist, will make them as eager to re-enlist in the peaceful work of the community that they have helped to preserve. The pensions that are due them will be an assistance but never a substitute for honest livelihood in the days that lie before them.

Do we quite realize that our country, till lately, had no organized system established for fitting these men to turn to civil life?

And do we realize the waste of good human material and ability that the country would suffer from, if they were left, untrained and unaided, to remain idle or to pick up any casual or temporary job they might happen to come across?

In France, skilled scientists are set apart by the Government to devote their whole time to directing and training the permanently disabled so that they may do the best for themselves. The same problems in Canada are being met by the same wise control, and will be solved, we have every reason to hope, under the guidance of the Military Hospitals Commission.

It is the business of every true Canadian to help the Commission and its Provincial auxiliaries by backing up its efforts to restore these men's capacity, and by helping to get them work they can do with profit to themselves and to the country.

Strong Point.

"Why have you never married, colonel?"

"Because I feel that a man cannot be a good husband and at the same time a good warrior."

"You overlook the advantage of being always in training."

Times Changed.

Newcomer (at resort)—"Is this a restful place?"

Native—"Well, it used tar be until folks began comin' here fer to rest."

Girls who want to marry are always looking in shop windows for new brands of bait.

For every million tons of coal mined four or five men are killed and from 550 to 600 injured.

Road Construction and Maintenance

The Part Played by Refined Tars in Modern Road Building.

By J. RANDALL ROBERTS, B. Sc.

It is a well recognized fact among highway engineers that one great cause of the disintegration of water-bound macadam and gravel macadam roads is "internal attrition."

When a heavy motor truck or automobile is travelling up a grade or even along the level, there is a strong thrust developed under the driving wheels, which, while propelling the vehicle forward, tends to push the upper part of the road backward. The same is also true in the case of horse-drawn vehicles, only here the "thrust" is under the horses feet. This "thrust" causes a slight rubbing of one stone on another in the wearing course of plain macadam roads, which in a comparatively short time causes internal wear, and results in the formation of depressions and hollows, even though the foundation may be still firm and unyielding.

To overcome this difficulty, dense, heavy, refined tars have been used as a "binder" for many years in England and France, and for about twelve years on this continent. Abroad, the method followed has been to mix the crushed stone or slag with the heavy refined tar (at boiling temperature) and place the mixture on the prepared foundation, consolidating the whole with a suitable roller. This method has been followed on this continent to some extent, but the greater percentage of "tar macadam" is built by the penetration method. In this case, the layer of stone is placed upon the prepared foundation to the desired thickness, and then "grouted" with the heavy refined tar, at approximately boiling temperature. The road is then finished by covering this course with smaller stone, sealing same with additional refined tar, and then covering with sand or screenings and rolling. There are several refined tars on the market, one of the best known being tarvia. A tarvia "X" macadam road corresponds very closely to the standard English practice in new construction.

Tar macadam is an especially suitable type of road for trunk line highways, where the traffic is fast and heavy, on account of its durability and low cost of maintenance. In the villages and towns, tar macadam is also very satisfactory, on account of its dustlessness, as well as durability and low maintenance cost. Under ordinary conditions, this type of road costs between sixteen hundred and twenty-five hundred dollars per mile more than the corresponding plain macadam, depending on length of haul of material, width of roadway, etc. In considering the question of road cost on a five-year basis, or longer, which is really the proper method, it has been proven many times that this extra initial outlay is more than justified.

The consideration of road costs over an extended period brings up the question of maintenance, the importance of which is only just beginning to be recognized by the average municipal official. Tar macadam should be watched closely during the first year of its life, as this is the most critical period. Any weaknesses which develop, such as formation of depressions, or buckets, due to poor foundation, or lack of sufficient "binder," should be repaired at once, so that the whole road will wear uniformly. Under a comparatively heavy mixed traffic, composed of both horse-drawn and motor driven vehicles, light annual applications of light refined tar (cold application) with sand covering, give the most economical maintenance. The use of refined tar in both construction and maintenance prevents in greater measure the formation of dust from the road itself, which helps the maintenance thereby, owing to the retention of the road material in place, eliminates the cost of water sprinkling where such would otherwise be necessary, and also prevents the formation of mud in wet weather.

It might be thought to be more economical to build a plain macadam road and maintain it by surface treatments of refined tar, than to build the road as a tar bound macadam in the first place. This might be true under very light traffic conditions, but it is generally conceded, where the choice lies between the two, that for practically all locations where these types of road are warranted, it is cheaper and more economical in the long run to build the tar bound macadam. However, both tar bound and tar surfaced macadams are far superior to a plain water bound macadam road, no matter how well built this may be, as the well-known defects of ravelling, results of frost action, and of internal wear, also excessive dust, which are common to a water bound, are practically eliminated in a tar bound, and overcome, to a great extent, in a tar surface macadam road.

The AUTOMOBILE

Avoiding Tire Troubles.

The most expensive machine on the farm for upkeep is the automobile, and the most expensive part of the automobile for repairs is the tires. This is not hard to understand when we realize that all the weight of the car comes on them, that the full driving power of the engines is delivered through them, and that they come in direct contact, at speeds varying from 10 to 40 miles an hour, with the hard lumpy surface of ordinary country roads. Under these conditions it seems a wonder that tires last as well as they do. With the best of care they will, of course, eventually give way, but the life of tires can be greatly prolonged by the exercise of care in avoiding the commonest causes of tire troubles.

Chafed sides, in which the rubber is worn off the sides of the tires leaving the fabric bare, is due almost invariably to running in ruts on country roads, or rubbing them against curbs when in town. When this condition sets in they soon get beyond repair if not attended to. Chafing can be prevented by keeping out of the ruts and away from curbs. As soon as chafed sides are noticed the tire should be repaired. Scuffing maybe due to several causes, such as improperly adjusted brakes, or quick stopping, in which case the car skids along, wearing the rubber off on the hard surface of the road and leaving the fabric bare. Quick starting may have the same effect. Driving around corners at high speed, so that the car skids, or allowing the wheels to get out of alignment, so that the tire is subjected to a zig-zag motion while in contact with the road, are also prolific causes of scuffing. To prevent this condition care should be taken to have the wheels in alignment, to have the brakes and steering gear properly adjusted, to slow up while rounding corners, and to avoid using the clutch in a jerky manner.

Cuts and Bruises.

Unless small deep cuts are attended to as soon as they are inflicted on the tires, sand and dirt and water work their way into the wound. With every revolution the cut is expanded, the foreign matter sucked in, and a grinding motion is set up which cuts the tires to pieces. This trouble is known as disintegration, and is provided against by examining the tires for cuts and having them closed with materials which are manufactured for the purpose as soon as they appear. When tires are insufficiently inflated and a blunt object is struck at a high rate of speed, the result is that the inner plies of the fabric may be broken. No effect may be visible from the outside, but the broken ends of the fabric wear against one another and become weakened, and eventually a blowout results. Careful driving over rough or stony ground and proper inflation will provide against this trouble.

Running on a punctured tire, rusty or bent rims and insufficient air pressure are the common causes of rim cutting. The cause of the trouble sugge ts its prevention. In case a tire punctures while on the road, it is better to remove it and run on the rim than to run on the tire. This can be done for a short distance without seriously injuring the rim, though afterward it is best carefully examine it and see that it is not bent, as this may again result in rim cutting. Chain cutting results more frequently in cases where the chains are tight. They should be left slightly loose, so that they will move around to some extent and prevent the strain which the tire suffers when passing over them from always coming in exactly the same place.

Blowouts if the tire is in good condition, are always due to overloading. They also result from inattention to cuts, which allow the access of sand, so that the fabric is damaged until the tire cannot stand ordinary air pressure. Blowouts also result sometimes from insufficient inflation, and from damaged tubes which may have become slightly worn by being kept loose in a box before being used.

The most common cause of tire trouble is under-inflation. It is wise economy to purchase a pressure gauge. The following pressures are recommended for the different sizes of tires: Three-inch tire, 60 lbs.; three and one-half inch 70 lbs.; four-inch, 80 lbs.; four and one-half inch, 90 lbs., and five-inch, 100 lbs. Lack of attention to small injuries when they first appear, together with reckless driving over rough roads, are also prolific causes of tire trouble.—Farm and Dairy.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON OCTOBER 1.

Lesson I.—A Plot That Failed—Acts 23. Golden Text.

Jer. 1. 19.

Verse 14. Chief priests—More exactly, high priests, a close oligarchy including, besides the acting pontiff living, ex-high priests and priests belonging to the two or three families from whom the government selected the new one. Of course in Jewish eyes the office was for life, but they had to be content with keeping it in the families which had held it since the Maccabees. Curse—Greek, anathema: the formula would be, "God do so to me, and more also if I eat or drink before we have killed Paul."

15. With the council—The Sanhedrin, which contained many well disposed to Paul, was only to be asked to pass a resolution requesting Lysias to give them a further opportunity of examining the case. Signify—Rather too peremptory a word; it only implies putting a suggestion before the officer, who, of course, could grant it or refuse it as he pleased. Comes near—The Sanhedrin therefore would not be suspected of complicity.

16. Paul's nephew is the only relative of whom we hear. He must have been deeply interested in his uncle and employed great shrewdness in getting this information: a relative of Paul's was the last person to pick it up casually. The case with which he secured access to Paul shows that the apostle was no longer in rigorous confinement.

17. Young man—The term used in verses 18 and 22 is slightly different. Paul speaks of his nephew to the centurion with less familiar tone.

19. Lysias's interest in Paul, and his determination to see fair play, become apparent.

20. As though thou wouldest—It is better to follow one of the two greatest MSS., and by altering one letter read as though it (the Sanhedrin) would, etc. This agrees with verse 15. Lysias would not take Paul down to the Sanhedrin because he wanted to get more exact knowledge; he would question him in the barracks.

21. The information of their amiable intentions no doubt cost these forty zealots some delay in getting their dinner. But there were casuists ready to extricate them from a vow so praiseworthy when it failed of its object.

23. A very large escort for one prisoner, but Lysias was determined that a Roman citizen should not be murdered by these hated sectaries. A Roman cohort would include a contingent of all kinds of troops—regular infantry, cavalry, and miscellaneous native troops. The exact meaning of the word rendered spearmen is not known. Caesarea, on the coast, was the seat of government.

24. Felix—Antonius Felix, procurator of Judaea from about A. D. 52. He and his powerful brother Pallas were freedmen. Tacitus says that he "wielded royal power with the spirit of a slave, with unbounded cruelty and lust."

QUAINT OLD WALLS.

Furnish One of the Charms of English Countryside.

The stone walls of the Cotswolds, in England, one of their most personal charms, are called "mounds." As in New England, they border the roads everywhere.

The conventional hedgerows are still planted, in this part of the country, only to divide field from field. But New England farm folk never knew how to build a "dry" wall like this.

It is of fairly even stones, laid without mortar—in fact, with hardly a chink where mortar could be inserted. Some surfaces are marked by a sort of rough string course, and for coping the top stones are set up on end close together.

It must be admitted that a shelf of asphalt occasionally replaces them, and is not beautiful.

But far more often you get, by way of variety, a primitive battlement of mud, in which seeds find lodgment and where they begin at once to weave a curtain of falling verdure and moss and to fill all the crannies with green as years go by, so that the "mound" becomes really what it is called, and is hardly distinguishable from the massive granite and earthenwork walls of the Cornish roadsides.

BREATHE UNDER WATER.

Apparatus Makes a Life Preserver Doubly Useful.

A novel life preserver has been devised to supplement the ordinary cork jacket in rough water. By its use the person in distress is able to breathe, even when the waves sweep over his head. The appliance adds to the cork jacket a light metal chamber which floats high, a spout leading from it rising two or three feet above the water level. A tube leads from this chamber to a face mask, through which the wearer of the jacket breathes. Even if the water sweeps over his head the spout for the air chamber is still clear and the air supply unimpaired.

The Captain's Burglar.

It was the first occasion on which James Haines had set forth as a night prowler after illicit gain. As he slithered along a wet pavement in a quiet road he did not quite know what he was going to do. But he was keyed up to the pitch of housebreaking and theft, and only hoped that no constables, ordinary or special, would interfere with his business.

Now, Jim was not a wicked man—and if he contemplated crime, it was for the first time in his life—but he had had a long spell of illness and, though quite recovered now, he was practically penniless, and saw no immediate prospect of earning money. People had told him that in these days any man could get a job, but Jim had so far been unsuccessful.

In his home of two rooms there was a patient Mrs. Jim and a Miss Jim of some ten years. It was their existence that had brought him to his present decision.

The hour was very late, or, rather, very early, for midnight had long since been clanged out upon the clocks of the district. The only figure which Jim saw in the gloomy road was that of a policeman, who moved slowly away in the distance. When he had quite disappeared Jim began to look about him.

Some time had passed, and he had become not only more desperate, but had almost decided to give the thing up and return home, an honest if unsuccessful man, when, slouching past a small house, he saw that a big window on the ground floor was open by a foot or so.

It was a chance that he felt he could not miss, and some few seconds later Jim was inside the room.

His nerves were more than a little shaky, and he did not dare to use the small electric torch which he carried until he had pulled together the heavy curtains, which he was glad to find hung at the window.

As the moments went past, however, and no sound came to him either from the road or from the house itself, he became more assured—more like a real member of the profession, upon an apprenticeship to which he had just started.

Here and there about the comfortable sitting-room he moved on tip-toe, and as the tiny gleam of his torch showed him such alluring objects as silver candlesticks and cigarette-boxes, he almost forgot the risks which he was running in the prospect of having, on the morrow, money in his pocket and a plentiful supply of food in his home.

But things were not to go so smoothly as he had hoped, or as he had begun to think.

A box which he lifted slipped through his fingers and fell to the floor with a small rattle, which to Jim seemed very big indeed. Several moments he stood there motionless. Drops of sweat oozed out upon his brow.

Then, just as he had begun to congratulate himself that the result of his clumsiness had passed unnoticed, the door of the room was opened suddenly, and there was a little, sharp click. In a moment three electric bulbs had lighted the room sharply.

Jim, twisting round, looked towards the door, and there he saw a tall man in pyjamas standing watching him grimly. The tall man's face was very pale, but the pallor was not fear-born. On the contrary, it had come there as a direct result of bravery. The left sleeve of the pyjama jacket was empty, but in the right sleeve a serviceable, though at the moment rather weak, arm remained, and in the hand was a Service revolver, one of the few articles in his outfit which Captain Stanley Innes had brought back with him from Gallipoli.

This revolver was pointing now at Jim, and Jim did not like it.

"Don't, guv'nor!" he managed throatily. "Don't point that thing at me! It might go off!"

The other's eyes were opening and shutting slowly, as though he were very weary, but now he stirred himself to something of alertness.

"It might," he agreed. "That will depend upon you, my friend! Burglar—eh?"

"No!" Jim mumbled. "'Struth, mister! I'm not that! This is the first time——"

"I know!" said Stanley. "It always is! Got anything in your pockets—anything from here, I mean?"

"No—not an article! I've just come in!"

"I thought so. You were fairly quiet, but not quiet enough. You see, unluckily for you, I'm not sleeping well these nights. I thought I heard the window being opened; and when you let something fall a minute or so ago you gave the game away altogether. Well, I've no pity for your sort, so I think I'll ring the bell. My sister or one of her maids will come and telephone for the police."

A look of very real terror showed in Jim's eyes, but in justice it must be said the terror which came to him then, came not because he was thinking of himself so much as because he was thinking of Mrs. Jim and Miss Jim.

"Mister," he pleaded, "don't you do it! Listen just a minute! I'm not going to lie to you. I'm going to tell the truth. I can hardly expect you to believe me, but I swear this is the first time I've ever done anything crooked! I've been ill and out of work. I've got a wife an' kid. We've 'ad 'ardly any food for a couple of days, an' I was desperate. Don't send for the police! Give me a chance just this once! You'll never regret it! I'm not a thief, though I was trying to be. Let me off this time, sir! I'll go straight if you do! I'll get work somehow! I swear it!"

Something in the expression of his face, something in the tone of his voice carried weight, and Stanley more than half believed him.

"I'm going to sit down for a minute," he said. "You can sit down, too, if you like. I want just a word or two with you just before I decide what we are to do."

It seemed almost as though he swayed a little on his feet while he spoke, and even Jim, consumed with fear for himself, noticed this.

"There's nothing wrong with you, mister?" he asked, eyeing Stanley very closely while the latter seated himself.

"Nothing," said Stanley politely. "Now, my man, the question is, what are we going to do about you? You've told the story that I suspect ninety out of a hundred who are caught at the same game tell. Somehow I'm rather inclined to believe that—to a certain extent, at least—you are speaking the truth. You say that you've a wife and child, and that you're earning no money—that you haven't got a job?"

"That's right, guv'nor! I couldn't get a job."

"Why not? You may have been ill, but you look strong enough. How is it that you're not in the Army? That's where every fit man should be to-day. Did it never occur to you that you might provide for yourself and for your wife and child at the same time that you would be serving your country? Why aren't you a soldier?"

Jim grinned a little sheepishly.

"Me?" he returned. "It never struck me that way. I am not a youngster, sir. I'm forty-three."

"Are you? Well, I believe you, but you don't look it. You'd pass for thirty-five any day. If your conscience will let you attempt to steal, won't it go the length of dodging the truth for once, and telling the recruiting-sergeant that you're say, thirty-eight? The country will look after your wife and child, and you can look after yourself and them at the same time. Now, I don't want to speak about myself, but we're alone together and our conversation won't go further. Do you see this?"

While he spoke he touched the empty pyjama-sleeve with his revolver.

"Yes," said Jim uneasily, "I do. You've lost an arm." Then light came to him suddenly. "I know!" he announced, as though he had really made a really staggering discovery. "You've been fightin' an' been wounded. That's it. I thought you looked a bit done-up somehow—a bit white in the face, like, if I might say so."

"You might," said Stanley. "Yes; I've been out fighting, and I'm proud to have been. I left an arm over in the Dardanelles, which is a place you will have heard of. Now, can you tell me why I or any other man should go out to fight and to risk his life while men like you should stay at home to break into houses and live the sort of life that is no good whatever to anybody? Can you tell me that? Think, man! Why should I fight for you?"

The final sentence had been spoken very slowly, almost faintly, and when it was finished Stanley's head fell on a sudden to one side, and his eyes closed.

The revolver dropped from his limp hand.

It was then that Jim did a most extraordinary thing. One would have expected him to make a bolt for it then, but he did not. Instead, he crossed swiftly to where the soldier half lay on the chair, and, putting an arm about him, drew him quite gently to a more easy position.

And then, not sure whether the man who had fought for him and Mrs. Jim and Miss Jim was dead or had only swooned, he crossed to the fireplace and pressed an electric bell. And some minutes later, when Stanley came to himself, he found not only Jim by his side, but his fair-haired, anxious-eyed sister Kitty, too."

"I rung for her, mister," Jim explained, a little proudly. "You needed water."

Stanley looked at him reflectively. Then he turned to his sister.

"Kitty," he said, "this man wants to enlist in my regiment to-morrow. You will make a point of calling now and then to see how his wife and child are getting on, won't you?"

"Yes, of course," she told him.

Then she turned to Jim.

"You're going to enlist?" she asked, just a shade of incredulity in her voice.

There was a new light in Jim's eyes.

"That's right, miss!" he returned. "Somehow, I never thought of it before, but this gent here, he's suffered cruel for me an' my mis-us, as well as for himself an' you, an' if he'll let me go I'll join up to-morrow, an' I'll send 'im a card when I've done it if he'll tell me who to write to."

"Give him a card, Kitty," Stanley said, keeping his eyes steadily on Jim.

And two days later he got a rather soiled postcard, on the back of which there appeared these words:

"Joined up. Hoping you are well."
—London Answers.

It Does.

Bogey—"Do you think that golf interferes with business?"

Green—"No, but business raises hob with a man's golf."

HUNS CONFRONTED BY BRITISH WORLD

NECESSARY TO BEAT DOWN GERMAN LIE FACTORY.

Gabriel Hanotaux's Tribute to the British Peoples to Help Win the War.

The following is a translation of an article by Gabriel Hanotaux of the French Academy, in the Paris "Figaro."

"The German papers write, apropos of the British offensive, 'It is a complete new army which now confronts us.' It would be more correct if they should say 'It is a whole world.'"

The reunion in Paris of the representatives from the British dominions has a meaning so great in the world's history that some day we shall look back on this reunion as one of the important factors in the actual crisis.

Mr. Asquith one day defined the British Empire as an ever-increasing community of freed men. These free men grouped themselves spontaneously, not only to save the Empire but to save the independence and guard the liberty of the peoples of the world, and this group did not confine itself within the limits of Great Britain; they transported to Paris and came, rendering homage, to the soldiers of this sainted universal cause. "It is on bended knee, said the Canadian Senator Belcourt, that I offer my veneration to immortal France, who has always held in high esteem the rights of humanity—of civilization, and of progress."

These units are invincible in the present and will be indestructible in the future. The human species, throughout the world, is subject to the dictates of conscience; all the scattered peoples, who inhabit the world, speak unconsciously a common language. Germany, following the lead of her masters, her doctors, her junkers, has taken the false route aiming for the absurd programme of domination and of tyranny. She has sworn that by force alone she shall rule, but, if the force should fail her, what remains there.

The Lie Factory.

Besides, force is going to fail her —from then on—trouble, uncertainty, the ngulsh which exudes from her official communiques, working to create an atmosphere of calm—from then on—remorse, which even now is so transparent in the imperial proclamations. "I didn't wish for this!"

It is, that the official lie—the dynastic eye-wink — the imperial manoeuvre, which has for such a long time obscured the real situation, begins to be pierced by the German people, meant to bolster up their broken down morale, the "lie factory" defends itself by again lying. However, when the Germans people realize to a certainty that their communiques have lied to them—when they announced triumphantly the taking of Liege—then the victorious march to Paris—when they told of the victory of the Marne—when they were presented with the taking of Douaumont as the decisive victory in the capture of Verdun, and again, when they announced the great naval victory of the British fleet, etc., etc.

In all these great events the official communiques have lied — more than once. Berlin has had to take down her flags, hoisted in celebration of an officially announced victory — a victory flung to the crowd by the light of day—truth uncovers herself.

In this lame-table "address" to the Emperor himself from the balcony of his palace.

Many Hun Mistakes.

The German successes have always been "arranged" in such a fashion that they have kept up in the people a false confidence in victory. First, the coming victory—and then the final victory. They were mistaken about England. They were mistaken about Italy; they were mistaken about the fidelity of the French and the British colonies. They announced that the war would be of short duration—that it would not last six months and — again, they promised that there would be peace before Christmas of 1916, and, later, they promised that everything would be over in the spring of 1916. They announced to him that he would not see the end of their financial and economical resources. They told him that the cravings of his appetite would be satisfied. They promised him an honorable and profitable peace, and the bitter reality is destroying, one after the other, all the meshes of this tissue of lies. They boasted to him of the "war map," but all he sees is the "daily bread ticket."

Now comes the terrible and crushing British communiques, falling, at two hour intervals, on the already jaundiced imagination of the populace.

In truth, it was time to speak thus —high and clear, and to announce abroad the exact truth. We have been too modest and too discreet—our valor is obscured by our modesty, in ignoring our successes. They have lied impudently, and they still lie in saying that the British communiques do not tell the truth—for it is the very truth of these communiques, which affirmed and re-affirmed, begins to confound them. For the English are past-masters in the art of publicity. They understand the value of public opinion and they address themselves to that opinion by repetition and insistence; thereby producing a species of hypnotism in the public mind.

A New World Rises.

Here is the policy that we should adopt, in answer to the German publicity campaign, which has, for too long a time, "manoeuvred" us. The English do not worry about the costs of announcements or telegrams—for they know it is money well spent. It is necessary that the light should penetrate to Germany herself, in order to destroy the artificial and subtle "lie factory," which has been methodically kept up till this day by the German press agents.

Yes, it is a new army—it is a new world which rises. The peoples of the British Empire, whose parliamentary delegates actually are re-united in Paris, represent and mean not only a force of inexhaustible resources, but also new methods. France has held on, in order that they should have time to prepare themselves—and—here they are. They fight the fight in their own manner. They are a people a little rough. "Boche! You will learn to know them better. They are only beginning, and you shall see many more of them."

SERBIA'S BRAVE WOMEN.

The Many Duties Which They Are Expected to Perform.

Serbian women are a hardy race. Outdoor labor in the fields is a commonplace of their lot. Up first thing in the morning, the housewife is generally the last of the household to get to bed. The ordinary household duties are performed by her, and she does other work which is generally done by men. Her spinning and weaving provides the homespun for clothing. In Montenegro, which is a Serbian country, the women also make the shoes which are in general use. Serbian women are usually the potters of their land, making during the summer time a primitive kind of earthenware vessels. They shape them without the potter's wheel. Serbian carpets have not the fame or the quality of Turkey carpets; but their bright red Pirot rugs give brightness to their homes and are highly prized. These carpets are woven by hand by the women. How they manage so successfully puzzles a Westerner, for they generally work without patterns, and often without a shuttle. Yet their designs are almost invariably artistic and pleasing. The Serbians are thought to have learned carpet-making from the Turks, who on their part acquired it from the Persians.

The Serbian housewife is often doctor as well as nurse for her household. She is skilled in the use of medicinal herbs and in the practice of the art of massage. Altogether the women play no great a part in the everyday life of the Serbians that one wonders to learn that the birth of a daughter is not considered an occasion of much rejoicing, as is the case when a son is born.

Weddings in Serbia are most picturesque and interesting ceremonials. Love matches are not the rule, however, for marriages are usually arranged by the parents. In Serbia the men outnumber the women. Early marriages are the rule, and over fifty per cent. of the women marry before they attain the age of twenty. And many are married at sixteen, or younger.

SIMPLER FUNERALS NOW.

Protests in England Against Conventional Paraphernalia.

Since the war funerals in England have become simpler. Plumes and hearses, the brass-handled coffin, and other conventional rites of an expensive funeral have been strongly protested against recently.

The late Major Walton, of Brighton, ordered in his will that no gloves, hat-bands, scarves and cloaks, "or other disgusting paraphernalia of the undertaker," were to be worn at his funeral, and the horses used were to be brown, bay, grey or chestnut, and "not the usual undertakers' slab-sided Belgian horses, besides which no gentleman would care to be seen, dead or alive."

In another case in the eastern counties the body of a woman was borne on a farm wagon from the estate drawn by a pair of horses. Commending this style of funeral, a colonel writes in the Eastern Daily Press: "A hearse is an abomination of stamped tin and tinsel. Compare such a carriage with one of our best wagons cleaned and littered with clean straw, drawn by our best horses in cleaned harness, with all the brasses burnished and an old servant for driver. I have given my instructions to this effect some years ago."

DUCAL "POACHER" CAPTURED.

Anecdote of Canada's New Governor-General.

The Duke of Devonshire, the new Governor-General of Canada, owns, in addition to Chatsworth, his principal residence in Derbyshire, some half a dozen palatial establishments in various parts of England.

One of these, Bolton Abbey, in Yorkshire, is visited by its notable owner comparatively rarely, and then only in the shooting season.

On one occasion, however, the Duke arrived there unexpectedly overnight, and in the morning early he went out alone with his gun, intending to try and kill a hare before breakfast. After walking some time he came upon one in a secluded part of the estate, fired at it, and missed. A following shot with the second barrel, however, was more successful, and "puszy" rolled over dead.

His Grace secured his prize, then turned to retrace his footsteps, only to find himself looking into the barrel of another gun held at the "present" by a lad of about fifteen.

"Got 'ee, Mr. Poacher," cried the boy exultingly. "Now you mun come along o'me to yon house"—and he indicated by a movement of his head the gamekeeper's cottage, half-hidden amid the trees and tall bracken. "Me feyther lives there. He'll ha' summat to say to 'e's."

"Mr. Poacher" meekly obeyed, and in due course they reached the place, when the boy was scared nearly out of his wits by the discovery of the identity of his "prisoner."

But the Duke took it all in good part, and after complimenting his captor on his zeal, he presented him with a sovereign as a souvenir of his "capture."

KING'S FOURTH SON IN NAVY.

Prince George Is Now In His Fourteenth Year.

The latest list of candidates who have passed the qualifying literary examination for naval cadetships, and who will enter the Royal Naval College, Osborne, in September, includes the name of Prince George, their Majesties' fourth son, who is now in his fourteenth year. He appears in the list strictly in alphabetical order. The Prince of Wales and Prince Albert, it will be remembered, both went to naval colleges.

Since the days of the early Georges it has been traditional for the younger son of the British Royal family to enter the Navy. Prince George possesses an accomplishment which is curious for a boy—he is an expert knitter, and has knitted articles for charity functions which have won the admiration of feminine critics.

Prince George will commence his training at Osborne under the same conditions as a commoner, as was the case with Prince Albert, now a sub-lieutenant in the North Sea, and will spend the next few years in imbibing varied training considered essential for a naval officer. The first part of that period will be passed at Osborne, and in about two years the lad will go to Dartmouth. Finally, he will complete his course on a special training cruiser, and then will become a fully-fledged midshipman and will join a sea-going warship.

REPAIRING WAR'S DAMAGE.

Whole Towns Will Have to be Rebuilt When Peace Comes.

If anyone imagines that there has been exaggeration in the estimates of the probable extent of post-war rebuilding operations, says the Rochester Democrat and Chronicle, he should consider the havoc in Northern France. Poland, Belgium, Serbia, and East Prussia also have suffered much devastation. But to show the magnitude of the destruction caused by what it is sufficient to consider only what is taking place in Northern France.

The destruction of Verdun is philosophically accepted by the French as an unavoidable evil. But it is not so easy for them to view calmly the wrecking of historic and beloved towns and villages by the advancing British and French troops. The Germans report that the allies' heavy artillery is laying waste the country on the Somme front to a depth of twelve miles behind the German lines. Peronne and Bapaume lie in ruins. A large number of French villages have been wiped out. Systematically and relentlessly the allies' guns have destroyed every German supply basin and concentration camp.

When you get right down to knowing all the circumstances in men's lives the wonder isn't that some of them go wrong, but that so many are as decent as they are.

ENGLISH BOY DOING MAN'S WORK

MILKS SIX COWS, FEEDS THE CHICKENS AND PIGS.

Arthur French, Ten Years Old, War Worker and Subscriber to War Loan.

Jane Anderson, the distinguished American writer, draws this picture of the work of an English boy in wartime, when many ten year-old lads are taking the places of men:

This is the story of Arthur French, who is ten years old, and who is a war worker.

It was when Arthur was ten years old, or perhaps a little before that, that he started to do a man's work. It happened, as it has happened in so many English villages, that most of the men went to war; there was need of good labor—grave need. Above all, there was need for men for the farms. And so, quite suddenly, Arthur came into man's estate.

Perhaps there were exceptional people who thought that, war or no war, a small boy was not equal to the work which had to be done. And I have no doubt they said so, for people are unkind when success is not achieved. However, Arthur, who was ten years old, became helper to the farmer. And straightway Arthur's responsibility became the responsibility of a man; for it is not easy work, the work of a farm.

It is about half past five that he goes down the white street of the village, whistling, on his way to the farmer's.

At the farmer's Arthur goes straightway through the yard and out into the big field to drive in the cows, six of them, one after the other, through the wide gate.

Had No Holidays.

It is then that the work of the day begins. For Arthur milks these six cows, and then he carries the big milkpails up to the farmhouse.

Afterwards Arthur feeds the chickens and the pigs. Not by any manner of means the simple matter which it is reported to be. And there are other odd jobs to be done; a big farm where men labor from early morning to late night is not maintained by magic. And each day there is new work to be done; small tasks, each one independent of its predecessors.

It is after eight o'clock before Arthur comes in for his breakfast at the farm. After eight o'clock—and Arthur must be at school at nine. For although it is a man's work he has taken over, Arthur goes each day to school and returns at noon to his mother for dinner.

However, it is at the farm that Arthur has his tea. Because in the afternoon there is much to be done—more to the farmyard and in the fields and pastures. There are such important matters as sheep-shearing, and in their just season hay-making, and the cutting of the corn. In all of these Arthur has helped. I know that his summer holiday was the work he did in the cornfield. However, this is but one part of the story of a small boy of ten.

Helped War Loan.

For each morning, despite the other tasks which must be completed in turn, there is his own particular routine in the farmyard; he must feed the chickens, drive in the six cows from the field and milk them. It is, again, the work of the evening; only the sun, which showed above the tall hedges of the east, is round and golden above the wide hills of the west.

Which is, all in all, a very wholesome and adequate portion of labor for one boy of ten. And it has done its own part toward the shaping and moulding of those certain small currents of life which have their own intimate part in the building of courage, and honesty, and character, and such things. For Arthur, despite the fulness of his day, has had a lawful share of catastrophes which are the heritage of gallant, small persons of ten.

And this is the keynote of many things. Arthur French, aged ten, has invested five pounds in the war loan.

We May Now Walk on Air.

Walking on air is no longer an exaggerated expression. One of the new inventions to be placed on the market soon is a pneumatic sole put forward to share the popularity of the rubber heel. The new sole is presumed to take up the jar of walking. The new device is attached to the leather sole by plates and screws, and if punctured can be readily removed and repaired. Another genius, working along the same lines, has devised a pneumatic plug for use on the heel of a shoe. It is claimed that the new contrivances make not only for less nervous exhaustion among people but also a means toward safety on slippery pavements.

The world is three-fourths water, but you can't blame a cow for what happens after the milk gets out of her jurisdiction.

EDEN GROVE

Miss Mattie Desmond, graduate nurse, returned to Toronto on Tuesday after enjoying a month's vacation at her home here.

Mr and Mrs Campbell, of Brantford, spent a few days of their honeymoon trip at the home of Mr and Mrs H Pearson, "Quality Hill," last week.

Mr Oliver Seiler carried off the first and second prizes for fowl at the Pinkerton fair.

Mr Thos Desmond, grain merchant, has moved into the Eden Grove hotel, and will serve the public on the temperance plan. We wish him success.

Mrs Gregg and daughter and Mrs Walker, of Paisley, called on friends in the Grove last week.

The cool weather made the young porker get a move on. Mr O'Reilly shipped quite a bunch Tuesday.

Mr and Mrs Rossen left last Tuesday for their new home in Clifford with the best wishes of their friends.

Years ago the white men drove the Indians back. To-day the government has put the white man on the Indian list.

Mr and Mrs Jas Wilson were the guests of Mr and Mrs A McKeeman on Sunday.

Mr Leslie Garland, of Paisley, was a week end visitor in town.

Mr Clarke shipped a car of rock elm logs to Belfast, Ireland, this week for the home rulers.

The Misses Scanlon, of Walkerton, were the guests of Miss Desmond on Sunday.

Mrs Todd spent a week with Walkerton friends.

The Methodist Sunday School rally will take place next Sunday morning. A fine program has been prepared. Come out and encourage the kiddies and officers.

Mr and Mrs R D Gallinger were week end visitors at the home of Mr and Mrs Alex Gallinger.

Mrs Fair is visiting Palmerston friends.

Quite a number took in the fair and enjoyed the entertainment at Pinkerton on Friday.

Pte Charlie Reed, of the 160th, spent the week end at his home here.

The women folks are busy putting down fruit at present. The men will put it down alright later.

Mr Isaac Bailey, of Guelph, was a visitor to the Grove last week.

Mrs J Seiler captured the two first prizes for butter at the Pinkerton fair. Mrs Tennant also secured different prizes for different articles. We might not have the quantity in the Grove, but we certainly have the quality.

Garland Bros purchased a fine Irish canary at the London exhibition. It's quite a songster.

Mr and Mrs Pearson and son spent Sunday with Cargill friends.

Mr R J Perdue attended the funeral of his aunt at Clifford on Tuesday.

Mr Fred Fair, of Palmerston, spent Sunday at his home here.

A quiet wedding took place at the Presbyterian manse, Walkerton, on Wednesday, Sept 20th, when Mr Robert Douglas Gallinger, of Eden Grove, was married to Miss Laura Subject, of Elmwood. Miss Mabel Subject, sister of the bride, was maid of honor. Mr Plommer, of Chesley, was best man, Rev Mr Wilson officiating. The young couple have the best wishes of many friends in this vicinity for their future happiness.

GLAMIS

Mrs Madden, who has been visiting at Mr Groves', left last week for her home in Hamilton.

Pte Ernest Cunningham, of Camp Hughes, Man, came on Monday and will spend a few days at his home here.

Mrs Jackson is home again after spending some weeks on the 2nd of Bruce.

Mr Chas McKinnon, who was called home so suddenly on account of the serious illness of his father, arrived from the west.

Mrs D MacIntyre, Miss Dora Oliver and Miss Sara MacIntyre have moved up from the lake where they were spending some weeks.

Pte Clyde McKeeman is home from London on a visit. He belongs to the motorcycle corps now.

Miss Norah McNally left on Tuesday for Toronto to attend Faculty.

Miss Nellie McBride, of Paisley, is visiting her friend, Miss Alberta Kirktown.

Mr and Mrs Allan McKinnon, of North Bruce, and Mrs (Rev) McCormick, formerly of Port Elgin, spent Sunday with the Misses Howson.

Miss Annie Currie spent a few days last week with her friend, Miss Cora Purdy.

Quite a number from here attended the Kincardine fair.

Mr and Mrs R J Nesbitt spent Tuesday in Chesley.

GRESHAM

(Intended for last week)

Pte J F Brown was home over Sunday and presented by the Sabbath School with a handsome pocket-Bible. The presentation was made at the close of the service by Rev McNab, who spoke a few appropriate words in behalf of the Sabbath school. Pte Brown thanked the Sabbath School for their thoughtful gift, expressing his appreciation of their kindness.

Professor Laird, of Toronto addressed the congregation in the church here on Sabbath week, on behalf of Missions.

Mr Wm Young has sold out to Mr Wm McMann, Jr. We are pleased to learn that Mr and Mrs Young are not leaving here at present.

We welcome our new neighbor L McPhail to our neighborhood.

Messrs Andrew Hill and Saudy Martindale of Port Elgin visited friends in this neighborhood last week.

Wedding bells are ringing on the 6th Bruce.

Mr Keyes and gang are still working at the bridge on the 20th sideline, which will be ready for use shortly.

Miss Marion McArthur spent the week end at her aunt's, Mrs Jno Thornburn.

Children Cry FOR FLETCHER'S CASTORIA

TURNER'S

Mr Archie Pollock took in the Kincardine show.

Pte Oliver Christie of London is spending a few days at home.

Sergt Bell of London camp was home over the week end.

Miss Flora McArthur is spending a few days with her brother Alex.

There is quite a bit of fall ploughing to be done this season. A few have started but most are waiting patiently for the rain.

Mr and Mrs H Pollock spent Sunday with friends in Arran.

Many friends of Mrs Bell will be sorry to hear of her being quite ill with pleurisy.

CASTORIA For Infants and Children In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

UNDERWOOD

Miss Greta Leggett is visiting friends in Kincardine.

Ptes Jack Brown and Dave McNaughton were home for the week-end.

Mrs McAlpine, who has been visiting her parents, Mr and Mrs Hugh McDougall, returned to her home in Calgary last week.

Miss Margaret Russell, of Detroit, is spending a few holidays at her home on the 6th.

Miss Susie Begg is down to Chatham on a visit to her friend, Mrs Bert Begg, last week.

Mrs Robt Hunter returned to her home in Calgary, after a visit at her father's, Mr Colin McDougall, of the 4th.

Children Cry FOR FLETCHER'S CASTORIA

McKinnon—Stanley

A very pretty wedding took place at five o'clock at the home of Mrs John Stanley, con A, Arran, when her daughter, Maud Alllian, was united in marriage to Mr Hector Brown McKinnon, con 4, Bruce. The wedding march was played by Miss Edna Sturgeon, cousin of the bride. The groom took his place under an arch of evergreens decorated with flags and white asters, and from which was suspended a large white wedding bell. The bride was given away by her youngest brother, Pte Sam Stanley, and looked pretty in a beautiful gown of cream mesaline satin with silk embroidered net, and wore a bridal veil with orange blossoms and carried a bouquet of white asters. Miss Margaret Ernest, of Paisley, took her place very neatly as maid of honor, wearing a gown of sky blue silk. After the ceremony, which was performed by Rev L W Diehl, and congratulations were over, the young couple led the way to the dining room where a sumptuous supper was daintily served. In the evening a large number of guests assembled, and spent the evening in dancing and other amusements. The bride's suit was of navy blue silk with hat to match. The groom's gift to the bride was a beautiful sunburst of pearls, and to the organist a cameo brooch. The presents to the young couple were both beautiful and useful. Mr and Mrs McKinnon will reside at the groom's farm on con 4, Bruce, where many good wishes follow them.

—THE ADVOCATE office has a splendid stock of wedding stationery and calling cards on hand, also the most beautiful styles of type, so we are able to turn out the finest lines of wedding invitations, announcements, cards, etc. We can do work fit to invite the best of people to a wedding, so why pay two or three times so much to city printers or engravers?

YOUNG WOMEN MAY AVOID PAIN

Need Only Trust to Lydia E. Pinkham's Vegetable Compound, says Mrs. Kurtzweg.

Buffalo, N.Y.—"My daughter, whose picture is herewith, was much troubled with pains in her back and sides every month and they would sometimes be so bad that it would seem like acute inflammation of some organ. She read your advertisement in the newspapers and tried Lydia E. Pinkham's Vegetable Compound. She praises it highly as she has been relieved of all these pains by its use. All mothers should know of this remedy, and all young girls who suffer should try it."—Mrs. MATILDA KURTZWEG, 529 High St., Buffalo, N. Y.

Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

If you know of any young woman who is sick and needs helpful advice, ask her to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. Only women will receive her letter, and it will be held in strictest confidence.

BRANT TP COUNCIL

Brant Tp Council met on the 18th day of Sept. Members all present. Minutes of last meeting of council read and declared correct.

JAS. LEWIS, C. FRASER, Com.

Farm for Sale

LOT 6, con 5, in the township of Arran, containing 100 acres of rich clay loam, in a high state of cultivation, all fenced but 6 acres of sugar bush. The buildings consist of a 9 room solid brick house, frame barn 50 x 72 on stone wall with cement floor. There is a spring creek 100 ft from the barn with hydraulic ram to pump water to the stable. There is a drilled well at the house, and cistern; 5 acres fall wheat; telephone in house and rural mail. This is a high class farm and will be sold cheap. Apply to CHARLES WHITE, Tara P.O., R.R. No 2.

Farm for Sale

162 Acres of good farm land, soil clay loam, being lot 12, con 1. Will sell in one or more parcels. On lot 12, con 1, there is a bank barn, straw shed and silo, comfortable frame house, watered by three never failing springs. 17 acres of good hard wood bush, 1 mile from Paisley and 7 miles from Chesley; 1 mile from church and school. Will sell on reasonable terms. Apply to NEIL Mc ALLISTER R. R. No 2, Paisley P. O.

Complaints Vanish

Sometimes a preacher is sorely perplexed about the handling of complaints against church members. This is how one preacher handled them. He had learned that a person will often say a great deal which he is not prepared to substantiate, and whenever a member came with a complaint he took a blank book and his pen and said, "Now I shall write down what you say, and you can sign it, and then I shall know what the complaint is." And he carried the book for forty years and opened it perhaps a thousand times, but he never wrote a word in it. When people have to sign their complaints they usually prefer not to make them.

DATES OF FALL FAIRS, 1916

Durham	Sept 28-29

PAISLEY

Builder, Contractor and Cement Worker

Brick or cement buildings erected, brick work, cement work and plastering contracts taken.

Cement Supplies Furnished

Building Blocks, Window and Door Sills, Culvert Tile, Well Curbing, Lawn Rollers, Lawn Vases, Verandah Columns, Balusters and other fancy Cement Products.

Building Material

Cement, Lime, Lath, Shingles, Glazed Sewer Pipe and Flue Lining, Mortar Color, etc.

The man who does not advertise simply because somebody said it did not pay, should not believe the world is round because the ancients said it was flat.

No more shivering around on cool evenings. No more looking half-frozen on the road to work in the mornings. About this time last year I was feeling the cool because I didn't have the proper underwear on. Hadn't the nerve to put on the heavy winter clothing before the time and get laughed at. It's people like you that keep the doctor's pockets full all the time, when good judgment would prevent it. Show us whether you have any or not. We have to-day opened our stock of

Fall and Winter Underwear

which is the very best grade that money can buy. These goods were bought some six months ago and are much better than those being shown by the manufacturers to-day. Come and see them for yourself. Lines too numerous to mention. Get into a suit of this and be warm all winter. **Both Ladies' and Gents' in a full assortment.**

To hand a large assortment of

Flannelette Blankets

in 10-4, 11-4 and 12-4. This line, for one, is one of the many that has advanced 40 per cent in price and will go higher before they are needed. Despite the abnormal conditions of the markets we can and will offer 200 of them in Grey and White with Blue and Pink border, $1.69, regular $2.25. Act quick.

Heavy Drill Shirting

Just the thing for this kind of weather. 32 in. wide, several patterns to choose from. Regular 22c, yours for 16c.

A new shipment of

Fall and Winter Caps and Hats

for Boys and Men, and these latest American styles. Large assortment to choose from.

Every Person Likes a Chicken or Duck for Thanksgiving

and the people of the larger places are willing to pay a good price to have the pleasure of sitting down to a table and have one of these delicious birds set before their eyes. I have been asked to procure 200 birds for a certain party and can pay the following prices for the week:

Chickens 18c Live Weight Young Ducks 13c Live Weight
Old Hens 13c " Old Ducks 10c "

Must be A1 birds. Please bring them in Thursday or before.

See Us for Fruits and Groceries

BUTTER, 35c. EGGS, 37c.

Market unsteady, and these prices are liable to change at any time. Use the 'phone. We have them both.

A Dark Affair

Mr. Horace Benford, leaving his work at the War Office, strolled thoughtfully through the dimmed streets on his way to see his fiancée, Miss Gladys Dayton.

"Dash it all!" he soliloquised. "I don't know what to tell her. She's bound to make an awful fuss in any case. She's like that. Affectionate and all that sort of thing, but a bit exacting! And she expects me to call every evening. And I certainly did promise to call last evening. There's going to be an awful fuss, and I shall be in the middle of it!"

Further, he reflected bitterly, the whole blame lay on Dicky Saunders. What did Dicky Saunders want to come home on leave from the Front for, and go getting his friends into trouble? What did he want to go tempting friends into spending an evening at the theatre with him, and so causing them to break promises to their fiancées?

Mr. Benford was in a markedly apprehensive mood when at last he mounted the steps of Miss Dayton's abode in Penchester Square.

Miss Dayton was awaiting him in the drawing-room.

"Oh, so you have come at last?" she asked coldly. "What time did you leave the office?"

"Oh, just on seven!" he replied nervously.

"Well, it's taken you a long while to get here," she said. "Just twenty-five hours!"

"Twenty-five hours?"

"When you left on Monday evening, you promised you'd come straight to me after you left the office next day, didn't you?" she asked stonily. "And therefore, if you've kept your word, you must have started to walk here last night. And it's taken you twenty-five hours to get here!"

"But——" he faltered.

"Of course," she continued loftily, "when you didn't turn up last night, any other girl might have thought that you'd broken your promise to her. But I knew you wouldn't do a mean thing like that, would you?"

"No, of course not!" he answered shakily. He took comfort.

"Of course, after I'd waited an hour for you, I began to get horribly worried," she told him. "I knew nothing but illness would have kept you away. So I rang up your chambers, and they told me you had not come home. So I knew you weren't too ill to come round and see me."

"No, I—I wasn't ill," he replied slowly. "I—I had a bit of a headache this morning, though, if—if that counts?" he suggested, rather hopefully.

"I'm sure I'm not at all surprised," she observed icily. "Where were you last evening?" she demanded, abandoning sarcasm, and making a frontal attack. "Why didn't you keep your promise to me?"

Mr. Benford realized that the danger-flag was flapping vigorously in the breeze.

"Well, it was like this," he stated. "I mean—— Well, as a matter of fact, it was like this."

He stopped dead. The light in Miss Dayton's eyes was not at all reassuring.

"What was like what?" she persisted ominously.

"Well, when I say it was like this," he floundered. "I mean——"

"I shall be glad to hear what you do mean!"

"Well, you see, the—the streets were very dark," he began, yearning for inspiration to help him out. "Oh, very dark indeed. Quite dark, you know."

"Yes, I do know. Please go on!"

"Well, as I was saying, the streets were fearfully dark, and—and one street seemed to be as dark as another. And I—I was walking along, you know. Just—just walking along, and—and thinking hard of you, you know, dearest. And—and—and there was"—he closed his eyes momentarily, and made a dash at it—"and there was a sort of—well, a kind of accident!"

"Oh, Horace, how dreadful!" she exclaimed. "And were you badly hurt?"

"Well, not badly hurt," he informed her. "You see—er—I—I wasn't hurt at all!"

"But you said you were in an accident!"

Mr. Benford breathed hard for a moment.

"So I was," he explained, a little belatedly. "I was in it. Simply smothered in mud, I was! And—and a bit dizzy and stiff as well, you know. I—I positively had to go straight home and lie down. That's why I didn't come round to see you!"

"Well?" she asked, with scornful hostility.

"Ah, I see I shall have to tell you the real truth!" he said. "As a matter of fact, there was an accident, and that alone prevented me from turning up here. You see, it was a tremendously dark night——"

"You've said that before," she reminded him.

"And I was walking along, thinking hard of you, dearest——"

"You said that before, too!"

"Well, that shows I must be telling the truth, doesn't it? Well, all of a sudden, just as I turned the corner of this very square, there was an awful shriek!"

"What time was that?"

"Exactly eight o'clock. I—I happened to be looking at my watch at the time," he answered, determined that his narrative should not be starved for any lack of detail.

"Strange!" she mused. "I was standing on the doorstep at that very moment, looking for you. I heard the clock strike eight, quite plainly. But I never heard a shriek!"

"It—it wasn't exactly a loud shriek, you know. It was more of a—a moan. That was it—a moan! Thirty yards away, crossing the road, I saw a feminine figure. Bearing down on the female figure was a taxicab, going twenty miles an hour or more! The woman saw that she was doomed. It was then that she uttered that low, but terrifying moan!"

"Which you heard thirty yards away, through the noise of the taxi-cab's engine? And you saw her, in spite of the darkness? Well, what did you do?"

"Without hesitation I sprang forward. The machine had knocked the girl down, but, by a supreme effort, I managed to drag her body aside before the wheels passed over it. And that was all!"

"You managed to dash forward thirty yards and——"

"Don't ask me how I did it," he begged wearily. "It was all like a horrid dream!"

"But why couldn't you have come on here, then? You didn't come to any harm. You dragged her out of the way, and——"

"There—there was another taxi—one I didn't see. It sent me spinning and reeling into the mud and——"

"But what happened to the girl you rescued? Wasn't she hurt by the second taxi?"

"No. I had just had time to deposit her on the steps of an empty house, out of harm's way."

"But I don't understand. After you'd put her down safely, did you jump out into the roadway again, or what?"

"My brain is a blank," said Mr. Benford, shutting his eyes. "It's no good asking me. I can't remember anything clearly."

"I suppose it was a very pretty girl?"

"Not a bit of it!" asserted Mr. Benford quickly. "She was quite a plain girl."

"Some plain girls are very attractive," said Miss Dayton, evidencing jealousy. "And when their lives are romantically saved——"

"She—she wasn't exactly a girl," he declared earnestly. "She—— Well, she was, oh, quite a middle-aged woman!"

"Was she prettily dressed?" asked the inexorable Miss Dayton.

"Oh, no! Just—just plainly, you know. In fact, she—she was quite poorly dressed. Really, there's no need for you to be jealous. I only said 'girl' because 'old frump' sounded so ungallant. But that's what she was!"

"I wonder——" mused Miss Dayton. "Tell me, was she quite a plain old lady, with a long coat and a little black bonnet?"

"Yes, that's it—that's it!" he agreed eagerly, rejoicing that some sort of corroborative evidence seemed to be coming his way. "Why, did you see her when you were on the steps?"

"Yes, I did! And you're quite sure she was dressed like that? You have no doubt?"

"Not in the least! That was the woman I saved! What more proof do you want of the truth of my story?"

"None," she replied. "I know it to be true now."

Without explaining further, she quitted the room. Mr. Benford, a little perturbed, but still confident of his ability to emerge successfully from the ordeal, awaited her return.

She came back five minutes later. With her was an elderly woman, attired in a plain black bonnet and a long coat.

"Is that the gentleman who saved you last night, Mrs. Parker?" asked Miss Dayton.

"It is—it is!" said the elderly lady, exhibiting excitement. "And p'raps 'e'll tell me what 'e's——"

"That will do, Mrs. Parker," said the girl. "You had better go now, and leave the rest to me."

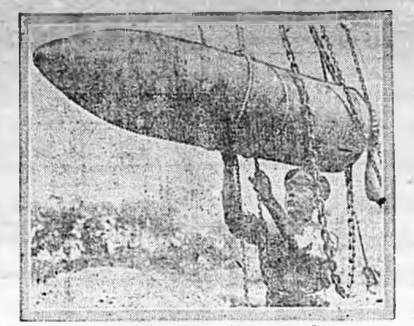
The elderly lady withdrew with obvious reluctance. Mr. Benford, as one waking from a trance, passed his hand across his forehead.

"She's our charwoman," explained the girl. "When she got here this morning she told me an extraordinary tale of a young man who most officiously dragged her back out of the roadway last night, although no danger threatened her. The young man then disappeared in the darkness. She then found that her purse had disappeared, too!"

"Surely you don't imagine that I—"

"Oh, no, of course I don't, but I'm afraid she does. She's been to the police about her purse, and she doesn't mean to let the matter drop. Really, there's seems to be a fearful mistake somewhere. Of course, no one will believe for a moment that you stole her purse. But think of the scandal! Your position at the office will be dreadful! Oh, and if the magistrate should make a mistake and sentence you——"

"But he couldn't!" declared Mr. Benford, "because I could prove I knew nothing about her purse. I could prove a complete alibi!" he added incautiously. "I could bring Dicky Saunders to prove that I was with him from seven o'clock last night till——"



"Oh!" exclaimed Miss Dayton, coldly.

"Well, I suppose the truth has got to come out sooner or later," he said wretchedly. "I did spend the evening with Dicky."

"I know," she replied, smiling. "And when you tried to get out of it with such an absurd story, I just let you go on, and then arranged with Mrs. Parker to give you a scare. What a lot of trouble you'd have saved if you'd told me the truth to start with. Why, Dicky Saunders rang me up, and asked me the best time and place to be sure of meeting you, and I told him. But I made him promise not to say I knew you were going out with him. I wished to see how you'd excuse yourself to me."

"Gladys," he said penitently. "I've been an ass!"

"Horace," she agreed, "you have. And that disposes of the whole affair, doesn't it? So we'll just say nothing more about your wonderful adventure last evening, shall we? We'll simply keep it dark!"—London Answers.

Hoisting a Shell Into One of New British Big Guns

THIS photo shows something of the intricate tackle necessary to lift one of the big shells used in the British offensive in the West. Recent reports say that the big British guns are doing more effective work than the German forty-twos.

"BREAKING" HABITS UNWISE.

They Should be Displaced With Better Ones, the Experts Say.

Trying to "break" children of habits is an error of method. The reason is that habit, according to William James, a great psychologist, not only is second nature, but has become nature itself, and that nature is not to be driven, but must be coaxed and led.

Displace habit with something else. Replace it on the policy of substituting some better activity. An average child, even if only five years old, can, according to Dr. Dearborn, head of a children's infirmary, be guided judiciously if given careful, clear explanations adapted to its year and pointing out things really fundamental or essential. "But one must start with a normal nervous system and musculature." The doctor explains that he means outdoor exercise and plenty of sleep.

Snipped the Wrong Leg.

A London clothier was never known to acknowledge that he didn't have anything a possible customer might ask for. One day a customer entered the shop and asked if he had any trousers made especially for one legged man. "Certainly," replied the merchant. "What kind do you want?" "Dress trousers," said the man. "The best you've got." Hurrying into the rear of the shop the enterprising merchant snatched a pair of trousers and snipped off the right leg with a pair of shears. Hastily turning under the edges he presented them to the customer. "That's the kind I want. What's the price?" "Thirty shillings." "Well, give me a pair with the left leg off." A month later the clothier was pronounced convalescent and on the right road to recovery.

To realize the hardness of this world step on a banana skin.

The splinters in the banister of life are unnoticed until we begin to slide down.

NURSES WANTED.

A number of applicants are desired for the Training School for Nurses, Hospital for Insane, Toronto. Three years Course. Lectures start October 1, 1916. Probationers begin at $12.00 a month, with board, uniform, and laundry. Apply Miss E. V. West, Head Nurse, 198 Queen St. W., Toronto.

DRIVING GERMANS OVER THE HILLS

IDEA OF THE TASK THE BRITISH ARE UNDERTAKING.

Able to Drive the Germans Before Them Slowly, It Is True, But Steadily.

Despatches from the Western front have not made it as clear as might be that the British advance is over rising ground, that it is now near the crest, and that when the high ground is taken it will be in comparatively easy matter to seize Bapaume, one of the chief objectives of the drive. A map prepared by the British Government and reproduced in the New York Times, as well as letter-press contributed by a member of the British Intelligence staff, gives a clear idea of the task the British are undertaking, and the headway they have made. From the Somme River where the drive began, the country rises in undulations as far as Martinpuich, though this village is rather beyond the crest. It then declines with few undulations to the Ancre, rising again slightly to Bapaume, which is on about the same level as Fricourt. The hills that extend from the Somme to the Ancre are too small to be noted in the ordinary map. The highest peak is not 600 feet above the level of the Somme. Yet since the Germans have had a couple of years in which to turn them into fortresses it will be understood that an elevation of even ten feet just doubles the task of the assailants.

An Uphill Fight.

The British have been fighting literally an uphill battle, and the fact is that they have been able to drive the Germans before them, slowly, it is true, but steadily. But they do not have to drive them uphill all the way to Bapaume. Once they are able to command Martinpuich they will be working downhill, and have only the village of Lesars between them and the River Ancre, which is in a slight depression. Then Bapaume is theirs. When the British advance has brought the army in sight of this now-famous village, the German lines will have been sent back into an almost peninsular salient. A retirement upon a long front will thus become necessary unless the German general decides to maintain an impossible position. It is also necessary to bear in mind the fact that the further the Germans retire the harder it is for them to maintain a foothold. They are in the position of a man who begins to slip downhill.

Wonderful Defences Destroyed.

Too little has been said of the task so far accomplished by the British on the Somme. In the matter of miles won the advance has been comparatively slight. Nevertheless it has been such an advance as is made to crack a modern chilled steel vault. An inch through the Harveyized steel represents greater effort than a yard through ordinary iron. The Somme defences have been of the former character, as compared with the sweep of the Russians, for instance. Never in the history of warfare have such defences been built. For the past two years when the Germans have not been fighting they have been toiling with concrete and steel to make their defences impregnable. They have dug themselves in 30 and 40 feet deep, and have roofed themselves with such steel plates as Dreadnoughts are lined with. In these subterranean caverns they have constructed veritable cities, hospitals, armories, parade grounds even; they have tapped subterranean springs for water; and have stocked their retreats with machine guns, mortars, and all the implements of war.

Underground Warfare.

"When the Allies open a bombardment the Germans retire to these caves, and remain in safety, except for the odd chance of a shell falling through a single opening. The most powerful explosives may burst overhead and do no damage to the enemy lying 40 feet below the surface of the earth. In the meantime, of course, the Germans occupying these dugouts can do no harm. They become active, however, when the infantry attack follows the bombardment. Then they climb by ladders to the surface, hauling their machine guns, and turn them loose on the enemy that has supposed all the defences to have been destroyed. Often they have caught the attacking British in the rear, and have made it necessary for the attack to be halted, while bombing parties creep back, hunt out the entrance to the shelters, and silence the defenders by hand-grenades.

The Work of Snipers.

They have also established their snipers in a most diabolical manner. They have dug tunnels in front of their trenches, and on either side, and then have run up openings at various points. In these openings the snipers station themselves. Their hiding-places are cleverly masked with the debris of war, heaps of brush, shattered wagons and other litter. In these hiding-places crack marksmen are stationed. When the British advance comes too near the sniper can dodge down, and, using the communicating tunnel, rejoin the main body of his comrades. Every house in the villages occupied by the Germans is thus defended, and the task of clearing the Huns out is a tedious and a costly one. But it is well to remember that such fortifications cannot be built in a day. The Germans have been driven out of positions that they took years to prepare. It will not be such a serious matter to drive them out of shelters that they have had to improvise since the big drive began.

CAUGHT A HUN SNIPER.

British Scouts Found Him Hiding in a Deep Hole.

Some of the most thrilling experiences of the front come on trench raids, undertaken at night between the opposing lines. A British officer in a letter home says:

"It was in the blackness of the early morning when the examination of the German lines was begun. In the first two of four shelters we drew a blank, and for the third time had to tack back from the line of the Bosche wire. All of a sudden a rifle was fired under our noses.

"The shot came from dead on the spot where we were making for. It was fair to assume the Bosche sniper who fired that shot would be facing our trenches, the same way we were facing at that moment, since no one was working back.

"The edge of that sniper's hole was not sloping, but sheer; and, crawling slowly along, I struck my right hand clean over it into nothingness, letting my chest down with quite an audible bump. Right before me then I heard a man's body swing round on the mud. I had to chance it then. I couldn't see him, but when I sprang the thing my hands gripped first was his rifle.

"It was rather like tom-cats coming to blows. I think my spring, slightly to his left, knocked him off his balance. But, though I got his left wrist and covered his mouth with my chest, I was a bit uneasy about his right hand, which for the moment I couldn't find. But Hankin found it, and we hauled him up to his feet and marched him into our front trench."

"SCOTS WHA HAE"

Has Never Become A Real War-Song Like the "Marseillaise."

Carlyle said that "Scots Wha Hae" was the finest war-song ever penned by man. It was composed on horseback whilst Robert Burns was crossing a wild moor in a thunderstorm.

But it has never become a real war-song like the "Marseillaise," which has had the power to fire the French to a white heat of patriotism for more than a century, and which still retains its hold upon the nation.

America has some splendid war-songs. Who can estimate the power of that song, born in revolution, on the troops of Lincoln, "John Brown's Body"? It was like fire in their veins, with its terrible chorus, "Glory, Glory, Hallelujah!" Our own lads sing it yet as they march, says London Answers.

The Southerners had a song, too—the famous "Dixie," a theme which has been exploited in ragtime, a rage which the war seems to have killed.

Singularly enough, the famous "Watch on the Rhine," which the Germans are so fond of chanting, has lost its meaning since 1870. There was some sense in it before, because the great river was one of the boundaries between France and Germany.

The "Gleaning Bell."

The "gleaning bell" is known in some places—as at Driffield, Yorks—as the "harvest bell," and is sounded at five in the morning and seven in the evening to mark the hours of labor in the fields, says the London Chronicle. Among the old records in the parish chest at Barrow-on-Humber is an instruction to the parish clerk "to ring a bell every working day morning at bread of day, and also every evening at sun-setting, until harvest be fully ended, and for this service each of the cottagers shall give him two peck of wheat."

We May Now Walk on Air.

Walking on air is no longer an exaggerated expression. One of the new inventions to be placed on the market soon is a pneumatic sole put forward to share the popularity of the rubber heel. The new sole is presumed to take up the jar of walking. The new device is attached to the leather sole by plates and screws, and if punctured can be readily removed and repaired. Another genius, working along the same lines, has devised a pneumatic plug for use on the heel of a shoe. It is claimed that the new contrivances make not only for less nervous exhaustion among people but also a means toward safety on slippery pavements.

From Erin's Green Isle

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irishmen.

Oats on sale at Roscommon recently fetched the record price of $5.28 per barrel of 14 stone.

The recruiting campaign in Belfast to secure additional reserves for the Ulster Division is making satisfactory progress.

The death has occurred of Mr. Charles Lowry, sub-sheriff of the Co. Meath, head of the firm of Charles Lowry & Son.

A public post office has been opened in Sackville Hall, Upper Sackville street, to serve temporarily as the G.P.O. for Dublin.

Mr. Wm. Murphy, horse dealer, Waterford, was seriously injured when thrown out of a training gig while driving a spirited horse.

Torrential rains fell recently in the Roscommon district, and houses were flooded to a depth of nearly a foot. Many farmers suffered a serious loss.

Mr. Forster says the War Office possesses information showing that large quantities of hay have now been released for the use of civil consumers in Ireland.

Under new regulations of the Defence of the Realm Act, the Secretary of State may prohibit from going to Ireland any person not a British subject.

A serious fire broke out in Crosse's posting establishment, Cork, and considerable damage was caused. Twenty-eight horses in the stables were rescued with difficulty.

Negotiations are proceeding amicably between three of the cross Channel steamship companies and the dock laborers in their employment in regard to an increase of pay.

Sir Horace Plunkett, who has been seriously ill for the last seven weeks as the result of an accidental burning while undergoing treatment by the X-rays, is still confined to his bed.

The Local Government Board have appealed to the Enniscorthy Guardians to institute legal proceedings against the more persistent of the 3,000 vaccination defaulters in the union area.

The death has occurred of Mr. R. Hamilton-Stubbes, D.L., at his residence at Durrow, Queen's County. He was a large landowner in the county and was Master of the County Hounds for ten years.

Field-Marshal Viscount French, Commander-in-Chief, Home Forces, inspected troops in Cork Barracks, consisting of the Royal Irish Regiment, Leinster Regiment and Royal Dublin Fusiliers.

The Lismore and District Red Cross Committee have presented their hon. secretary, Mr. E. D. Trundle, with a silver salver, "as a recognition of valuable services rendered as hon. secretary."

Twelve overseas delegates recently visited Belfast, and were entertained at luncheon by the Lord Mayor in the City Hall. They afterwards inspected shipbuilding yards and linen factories.

INEXHAUSTIBLE RUSSIA.

Can Double Germany's Output of Soldiers Every Year.

The German military experts are presenting a gloomy view as to the inexhaustible resources of Russia. They say the Russians can put 1,000,000 new soldiers into the field every year, where the Germans can put only about 450,000 at the utmost. The birthrate in Russia is the highest in Europe, being 47 for 1,000. By this calculation Germany can only put into the front one new soldier for every two that Russia can recruit her army with. The only hope that the German experts can give their people is that Russia cannot produce competent officers in proportion to her recruits, and that she will break down financially. They point out that the last attempt at the Finance Minister to obtain a large loan in London and Paris has been a failure.

No Different.

"What sort of a woman is Perkins' wife?"

"The ordinary kind. I guess Perkins has as much trouble with her as the rest of us do with our wives."

An Arabian bride makes her husband a present of a spear and a gun.

About the House

Useful Hints and General Information for the Busy Housewife

Dainty Dishes.

Rhubarb Jam.—Five pounds of rhubarb, cut as for stewing. Five pounds of granulated sugar. One pound of finely cut figs. One-half pound of almond meats, blanched and cut fine. Mix these ingredients and let stand over night. In the morning boil the mixture for forty-five minutes. Put in glasses when cold and cover with paraffin.

Onion and Potato Puree.—Two cups diced potatoes, one cup minced onion, three cups water, one teaspoon salt (or half-teaspoon each salt and celery salt), one-fourth teaspoon pepper, two tablespoons butter and milk or cream as needed. Boil potatoes and onions until well done. Rub through fruit press, season and reheat, adding as much milk or cream as needed to thin to right consistency. Serve with minced parsley and croutons.

Baked Onions.—Four cups peeled onions, one cup milk, two tablespoons each of flour, butter and breadcrumbs, one and one-half teaspoons salt, dash of pepper. Put onions on to cook with enough boiling water to cover; add one teaspoon salt and boil until tender, without covering. Brush baking dish with a little butter, put in onions, and pour over cream sauce. Sprinkle with breadcrumbs and bake until light brown. Cream sauce: Melt butter in sauce pan, add flour, mix well; add cold milk slowly, stir until smooth and creamy. Add pepper and one-half teaspoon salt and boil three minutes.

Combination Conserve.—Twelve peaches, twelve pears, one pineapple, six oranges, six lemons, two quarters of crabapples. Peel and quarter the crabapples and measure after quartering. Peel the peaches, pears and oranges and divide into eighths. Peel the pineapple and cut in dice; slice the lemons very thin without peeling them. Weigh all the fruit; add three-fourths pound of sugar for each pound of fruit; mix gently in preserving kettle and simmer for two hours, stirring as little as possible. Pour in glasses.

New Way With Sandwiches.—Rolled sandwiches look pretty, and they are just as easy to make as the other kind. Any housekeeper who makes sandwiches often appreciates something different in this line, for the same old kind is very likely to become decidedly unwelcome with a critical family acting as judges. The next time you prepare sandwiches cut the bread real thin, then put your minced meat, olives or jelly on the buttered bread as usual. When you are quite satisfied with the result, and all the edges have been trimmed off the bread, roll the bread firmly as you would do with a bandage. Secure with a toothpick, then tie with a bow of colored ribbon. Remove the toothpick and your sandwich is complete.

Mustard Pickles.—Two quarts green tomatoes; soak overnight in weak brine and drain. Two quarts small cucumbers. One medium head cabbage. One quart small onions. Six large red peppers. Chop all fine and boil all together, except cucumbers, in clear water until tender, drain well and add: Two quarts cider vinegar. One-half cup ground mustard. Three cups sugar, One cup flour mixed with vinegar. Two teaspoons red pepper. Two teaspoons black pepper. Bring to a boil, add the chopped cucumbers; bottle and seal while hot.

Plum Conserve.—Though we give plums as the fruit to use in the following recipe, any fruit in season may be used in the same manner. Stew two and one-half quarts of plums with one and one-half cups of water until they are very soft. Strain through a colander, then add as much granulated sugar as you have pulp. Put through a food chopper two oranges, one small lemon, one pound of seeded raisins, one-half pound of walnut meats and one-half pound of sun dried figs. Use the rind of the oranges and lemon as well as the pulp, but remove the white skin and seeds. Cook all together fifteen minutes, being careful not to burn. This is delicious for sandwiches or to serve with chicken or turkey.

Chili Sauce.—Twelve large, ripe, solid tomatoes, four cups of vinegar, two teaspoons of ground cloves, two teaspoons of ground cinnamon, one-half teaspoon of ground ginger, one tablespoon of mustard, one red pepper pod, four large onions, two tablespoons of salt (more if desired). Wash the onions and tomatoes. Remove the outer skin of the onions and chop them fine. Put the tomatoes in boiling water for a few minutes and then remove the skin. Put in all the other ingredients and boil on a slow fire for about two hours. Put this in sterilized glass bottles which have been standing in hot water, while hot, and seal. Keep in a cool, dry place.

Egg Recipes.

Nest Eggs.—Prepare bread dressing as for chicken or turkey, omitting the sage and using only onion and red pepper for seasoning. Form it into nests twice the size of an egg, and place them into a bread pan well greased and set into the oven. When partly baked break an egg into each hollowed center and return to the oven until the eggs are set. These are good, served with a drawn butter sauce, tomatoes, mush-room sauce or a dash of chili sauce.

Egg Gems.—Line the bottom and sides of each cup in a gem pan with the usual sour milk biscuit dough. Prick the dough with a fork so that it won't puff up, and set in the oven to bake. When done grate cheese and break an egg into each cup; cover with cheese, salt and pepper and let the eggs set. Rice or macaroni to which a well-beaten egg and a tablespoonful of flour have been added may be used in place of the biscuit dough.

Creamed Eggs.—Chop whites of eight or ten hard boiled eggs and grate and mash the yolks with a silver fork. Make a sauce of two tablespoonfuls each of butter and flour to which two cupfuls of sweet milk have been added slowly. Let boil up once or twice, season with salt, pepper, mustard or red pepper and add the chopped whites. Place pieces of hot toast on a hot platter and cover each piece with the mixture. Season the yolks with salt, pepper, mustard and a little vinegar, add sweet or sour cream and smooth to the consistency of creamy paste; place a heaping tablespoonful on the center of each piece of the covered toast. Serve with crisp strips of bacon and garnish with lettuce leaves.

Useful Hints.

Tried sauce is delicious on apple pie.

Half-ripe grapes always make the best jelly.

Soup should never be made in a metallic kettle.

All greens should be blanched before canning.

Milk and custards should not stand in any but enamel vessels.

Any fruit or vegetable to be eaten raw should be carefully washed.

Small bits left from meats or fish should be saved and used in potato puffs.

Sliced pineapple is more delicious if sliced and sugared about 12 hours before serving.

It should never be forgotten that unclean milk is as great a menace as unclean water.

A rice cream may be made like a thin rice pudding, only it should be cooked longer, poured into a mold and chilled.

The bones left from roast beef or lamb can be put into a pot with potatoes and boiled. They will give the potatoes a rich flavor.

If a mother can invent little games to play while the children are being washed and dressed those processes may go on more easily.

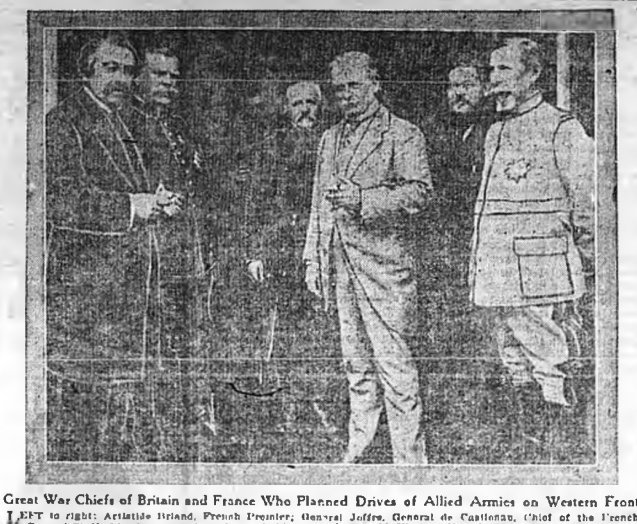
When you think the vaseline bottle is empty, heat it and lay it on its side to cool—you will be surprised at the amount of vaseline you will save.

A convenient way to boil macaroni is to put it in a wire basket. Immerse this in a kettle of boiling water. When the macaroni is done, lift it out.

To make cottage cheese of fine texture, have the water with which you scald the clabber merely hot. If it is boiling the curd will be very hard and lumpy.

If there is a stubborn spot on white paint that can not be removed with soap and water, dip a wet cloth in whiting and rub the spot. It will come off with ease.

There comes a time when any hardwood floor should be thoroughly cleaned. Wipe it over with a pure white soap and water, changing the water often. Then go over it with a cloth saturated with a good floor oil.



Fried cabbage is delicious. Cut the cabbage up as for slaw, put it into pan with enough water to cover and let simmer until almost tender, then put it in the fat and brown it as you would potatoes. It takes little time to cook it in this way.

To the old-fashioned housekeeper and cook the methods of accurate measurement do not seem important. When our cooks begin, to learn that cooking is an exact science, there will be less said about "luck" in cooking. The "bit or miss" methods of measurements are the cause of poor results.

A Deserted Village.

The first time you see a destroyed and deserted village you have strange feeling, especially when you know that the smashing process may be resumed any minute, says a writer in Cartoons Magazine. Can you imagine a village which has no inhabitants—houses with only parts of walls standing, perambulators, chairs, bedsteads and pictures heaped up in confusion, churches destroyed as if stepped on by a giant, tombs a tumbled-up heap in the churchyards, no children at play, no shops, no sounds except the echo of your footsteps and the roar of distant guns? You'll find them in the war zone.

The marriage ceremony in France, in very remote times, consisted of the man paring his nails and sending the pieces to the girl of his choice. Then they were man and wife.

Great War Chiefs of Britain and France Who Planned Drives of Allied Armies on Western Front

LEFT to right: Aristide Briand, French Premier; General Joffre, General de Castelnau, Chief of the French General Staff; Lloyd George, Great Britain's Minister of War; M. Thomas, French Minister of Munitions; and General Roques, French Minister of War. This gathering of the greatest of France's War Chiefs and Lloyd George, Britain's Minister of War, is one of the most notable conferences that have taken place since the beginning of the great war.

UNSEEN HAND THAT FEEDS THE ALLIES

THE COMMISSARIAT DEPARTMENT IN LONDON.

Buys Munitions and Supplies For the Varied Needs of Eight Nations.

At the corner of Kingsway, London, where that royally wide and straight street merges into the semi-circle of Aldwych, there rises the great triple building which contains Empire House, India House and Canada House. It is in aspect half noble and half commonplace, the front having both strength and dignity, white stone columns and wide and high window spaces, the sides being merely a raw and aching wilderness of red brick. But within its immense walls revolves one of the least-known and most important of all the many wheels of war. It is the headquarters of the Commission Internationale de Ravitaillement, the Commissariat Department of the Allies.

The Universal Buyer.

The Commission de Ravitaillement is the unseen hand that feeds the many great fires of war. In all the markets of all the world—that is to say, all the world outside the countries of the enemy—it buys the guns, the shells, the rifles, the ammunition, the saddles, the boots and the uniforms, and all the rest of the multifarious equipment required by the fighting ships of England's Allies. The commission buys in tons by the million, and pays in pounds by the hundred million. In short, a myriad quartermaster sergeants in one.

But it rose from very small beginnings. In August, 1914, a few days after war broke out, several French officers came to London to buy boots and similar articles for the French army. These were the first of a long series of war purchases, whose extent, beginning in thousands of pounds, rose rapidly to millions. They resulted in the formation by agreement between the French and British Governments of a Commission de Ravitaillement (a revictualling commission, in the old blunt naval phrase), with the following objects:

1. To co-ordinate the purchase of food supplies, munitions of war and military and naval equipment by the two Governments.

2. To prevent harmful competition in the same markets and a consequent inflation of prices.

3. To place the French Government in communication with firms capable of carrying out orders satisfactorily at a reasonable price; and,

4. To spread the orders in such a way as to distribute employment, and thus accelerate delivery.

How the Commission Began.

The commission began with a British staff of a dozen, established in a small office in Queen Anne's chambers. Since its inception its scope has been gradually extended to cover purchases made on behalf of all the Allied Governments, and it now includes military, naval and civilian delegates from each of England's Allies (including even Portugal), together with representatives of the War Office, Ministry of Munitions and other British Government Departments, under the general direction of Sir Edmund Wyldbore Smith, of the Board of Trade.

Its personnel is now numbered at nearly 500; its huge office has miles of corridors, containing about 200 rooms. Harbored happily on its many floors are no fewer than eight separate national colonies—French, Russian, Italian, Belgian, Serbian, Portuguese, Japanese and English.

Multiplicity of Articles.

The commission, whose purchases outrival in extent the most sensational of transatlantic deals, has been at work now for 22 months—almost without the general public becoming even aware of its existence! During this period the orders it has officially placed on behalf of the Allied Governments amount to no less a total than £220,000,000, and this stupendous figure, if we add the purchases made by Allied Government contractors, which are submitted for the examination of the commission, is increased roughly to £300,000,000.

Here is an approximate record of the quantities of some of the more common articles of war bought for the Allied armies:

Ten million pairs of boots.
Thirty million yards of cloth.
One hundred thousand miles of telephone wire.
One hundred million sandbags.

The figures in respect of the more destructive munitions of war cannot, for obvious reasons, be cited here, but they are no less impressive.

It is hardly necessary to remark—that is, in fact, the whole raison d'etre of the commission—that the sums expended, vast as they are, would have been much greater if there had been no official organization to regulate prices, to control the world's markets and to apportion the available supplies of food and war material to the needs of each Government concerned. And always this main object has been kept rigorously in view, that none of the munitions required for the adequate pursuit of the war should be withheld or delayed in transit by reason of any overlapping of orders or confusion of interest.

Regulating the Supply.

The services of the War Office in this connection in regard both to the purchase of personal equipment in the quantities referred to and the supply of munitions cannot be overestimated, and the completeness of a system of organization which is able to provide for the supplies both of the British fighting forces and of their Allies, not only in Europe but in Canada and America, is too little realized by the public. The revictualling commission also enjoys the full advantage of the experience of the agents of the Ministry of Munitions in America and elsewhere, and enormous quantities of metals and machinery have been purchased all over the world by this means for the benefit of the Allied Governments.

All orders are placed in such a manner as to avoid competition between the various purchasing Governments, to exclude the irresponsible speculator and to insure that the articles bought are obtained from reliable sources and are of the best quality.

Co-operative Purchasing.

This principle of co-operative purchase has been followed very close in connection with supplies of cereals, which are purchased on behalf of the Allies by a single committee consisting of members of the Commission Internationale de Ravitaillement and the Board of Agriculture.

Then there is the whole tremendous question of the provision of tonnage for the transport of these immense supplies and of the regulation of freights—a question which demands the closest application on the part of the shipping advisers attached to the commission. When all the ships requisitioned from the British Merchant service for war purposes are reckoned, there remains only a limited proportion of tonnage available for the carriage of coal, wheat and other commodities.

This tonnage is of necessity most rigidly regulated and apportioned, and the existence of the commission, which can centralize all information as to the requirements of the different Allied Governments and the possibilities of meeting them, is of invaluable assistance to those in whose hands rests the final decision as to the distribution of the available British mercantile marine.

AN EXCITING CHASE.

Hunter Had An Interesting Race With a Bear.

An Eastern man who was visiting in British Columbia was most desirous to meet and shoot a full-grown grizzly bear. He had hunted unsuccessfully throughout the Sierra Nevadas in California as well as among the mountains of Washington and Oregon, and at length had come to Glacier, in the heart of the Selkirk Mountains.

Here, accompanied by a trusty fellow sportsman, the man from the East hunted for five or six days, but still without success. He did not so much as see a bear track. Discouraged and not a little irritated, the Easterner came back to his hotel about noon of the sixth day, declaring that he was "through with the whole foolish business," and in earnest of his resolve he threw his rifle behind the door of the storeroom.

If it had been a "train day" at Glacier he would have departed at once, so disgusted was he with his luck; but he was forced to wait another day, and after supper he started out for a walk along the railway track, disdaining to bother with a gun.

Somewhat less than a mile from the station the line was protected by a snowshed that ran along the base of a mountain. The snowsheds are enormously strong structures, built to resist avalanches from the mountain sides. In many places they are nearly flat on top, and offer a fine planked surface for a stroll.

The hunter climbed to the roof of the shed, and as he walked leisurely along was enjoying the beautiful view down the valley, when up through a hole in the shed roof, where the trainmen had ripped off a couple of planks to allow the smoke of the locomotive to draw out, a bear thrust his head, with the evident intention of climbing out. It did not seem to be a very large head, and the man from the East, hastily concluding that it belonged to a young bear, snatched up a piece of board and aimed several blows at the animal. The bear struggled up through the hole in spite of these blows, and displayed a body that seemed out of all proportion to the size of his head.

No big was the animal that the Easterner thought his best course was to beat a retreat. It appeared, moreover, that a very rapid retreat was necessary, for the bear began at full speed to chase him back along the shed, and so closely that on coming to the end the hunter had to jump off—a distance of fifteen feet—to the roadbed below. A good deal shaken up, he regained his footing and ran into the shed, along the track, thinking that he would get out of sight thereby.

But the "roach-back," as the Canadians call the grizzly bear, slid down backward at the corner of the shed, and still pursued the luckless man, who was obliged to give another demonstration of his sprinting powers. The shed was dark, but he saw light ahead at the place where the bear had climbed out. The hunted hunter made for the place, and, in turn, tried his hand at climbing. Necessity spurred him on, and he was able to crawl out at the hole a little in advance of his adversary. The two planks that had been removed lay beside the hole, and the man from the East lost no time in dragging them over it, and thus prevented the "roach-back" from coming up after him.

Very hot and a good deal alarmed, the man now began to call for help. Presently three trackmen came running to learn the cause of the outcry. At their approach the bear moved leisurely off, and disappeared in a swamp at the further end of the shed. Thankful for his rescue, the hunter handed the trackmen several bank notes, incidentally telling them what he thought of bear hunting in their country.

A Real Jail Bird.

"If you don't mind, sir," said the new convict, addressing the warden, "I should like to be put at my own trade."

"That might be a good idea," said the warden. "What is your trade?"

"I'm an aviator," said the new arrival.

Formerly the bridegroom endowed his bride not, as to-day, "with all his worldly goods," but with his "cattle."

HUNS PETITION FOR END OF WAR

THE GERMAN SOCIALISTS ARE ACTIVE.

Captured Soldiers Don't Claim Victory, But Say They Can't Be Beaten.

It is extraordinary difficult to know whether all the British shell fire and all the dead have yet begun to shake the confidence of the Germans in the strength of their war machine. Some of the officers who have come in as prisoners still keep their pride, writes a correspondent with the British Armies in the field. They have seen the losses inflicted on them in and behind their lines, but say: "You can't beat us. We can't be beaten."

That is different from the old phrase: "We're winning. Victory is certain for Germany," and it is a long way from the acknowledgment of defeat or possible defeat. There are times when the pessimists among us are tempted to think that the Germans have mysterious reserves of strength from which they can heal their wounds, and that the success gained is only local, and has not yet injured the German war machine in any vital part or struck a blow which has reached to the heart of the German people.

Letters Reveal Truth.

The cure for such pessimism is found in letters captured in the German dugouts and on the German prisoners. They draw the veil aside and tell the naked truth. Through all these letters, written by men whose sons are fighting or dead, and by comrades in arms, not hiding their thoughts from each other, there is a cry against the bloodshed and misery of this war, and for peace at all costs.

"By now the town of Offenbach has five thousand widows, and besides that there are the unmarried men who have fallen."

"Our company lost all its officers and ten men, but that is the same with every company and every regiment on the Somme. I, alas, could not get the much-desired wound to send me home."

Riots Are Told Of.

There have been riots in Hamburg and other places, according to letters found in the trenches, and in the spirit of civilian Germany there is a rising anger against those who made the war and caused all this misery, and who keep it lasting for political and dynastic reasons. The German Socialists, it seems, are at last beginning to find their voices again, if one may judge from such letters as the following written by an educated hand:

Memorial for Peace.

"You ask how far the peace movement has advanced. It is impossible to say anything definite, but we Socialists are now going to present to the Imperial Chancellor a great peace memorial, containing the signatures of those citizens who want a speedy peace without annexations and without violence to other nations. These will put their names on the lists, and those lists will be collected from the whole empire and handed to the Chancellor. God grant that their names may be put down in millions, that the Government may see that the great mass of the people want an early peace.

Distress is Acute.

"One may hope this accursed murdering of peoples may come to an end soon, but, unfortunately, the obstinate ones have no wish for peace. They are working in all countries against it, working with all their power, for the international capitalists can do no better business than they are doing now, and their purses appear not full yet.

"With us the distress gets greater from day to day, and already many poor people are suffering from underfeeding. We will, however, hope and act, for surely the good sense of the peoples may conquer in the end."

A WOMAN'S SECRET.

Wife Masqueraded as a Husband for Many Years.

An amazing story of a woman who masqueraded as a man and was found out by the Mill Hill Medical Board was told at a North London tribunal.

Her employer appealed for the worker as his "foreman."

The chairman, holding up a letter, expressed surprise that the employer urged that this "man" was indispensable to him in his work. Did he know that "he" was a woman?

The employer smiled incredulously, and suggested that the chairman had made a mistake, for his foreman was married, with two children.

The chairman read a certificate from the Mill Hill Medical Board, which stated that the person named upon it was unfit for the army "by reason of the fact that the doctors' examination disclosed that the person was a woman.

It transpired that the "man" had been before the Advisory Committee, and on a certificate then produced was sent to the Medical Board. On the deception being discovered there was something like consternation in the barracks. It is understood that the woman was passing as a man to hide from her husband.

The Paisley Advocate

PAISLEY, OCT. 4th, 1916

LOCAL AND DISTRICT NEWS

With the Army Service Corps

Mr Jos Sparrow, son of Mr M Sparrow Elora road north, signed up a month ago with the C A S C and left Camp Borden last week for overseas. Mr Harvey McLelland enlisted with the same corps at the same time. The former was on THE ADVOCATE staff and the latter in Shoemaker's Jewelery before leaving here a few years ago.

Nurses for Overseas

Miss Mary Dryden, daughter of Mrs W Dryden of Paisley, has been accepted as a voluntary nurse for overseas service, and will leave with a corps from Winnipeg shortly. Miss Margaret Fortune, who was with Mrs J Eagles in Paisley for several months, has applied to go as a Red Cross nurse. Her sister, Miss Martha Fortune, is now in a military hospital in France.

Paisley Man is Bandmaster

Sergt Wm Jack is now the leader of the 160th Bruce Battalion brass band Sergt Wright, who was in charge since organization, has been honorably discharged from further military service on account of his being over age. The new bandmaster is a musician well qualified to fill the position of leader and instructor. He is a son of Mr Alex Jack of Paisley. Mr Wright has secured engagement as leader of Wingham band.

Fell into the Saugeen

Mr Dan Sutherland's team and wagon went into the Saugeen on Monday afternoon as he was backing a load of filling to be dumped at the north-east corner of the waterworks power house. The loaded wagon went over too far and in its descent pulled the horses after it. The animals were unhitched from the rig and swam down below the bridge, where they were got on to dry land again and led up the steps at the side of the town hall. Mr Sutherland stood on the [illegible] handle his horses in making the dump, so escaped a ducking or worse. Dan has had some adventurous times in his career as a teamster. A few years ago his team, load of gravel and himself went through the bridge at Stark's mill.

Home on Visit

Rev Malcolm A Campbell, of the First Presbyterian church, Montreal, was in town last week. He came up to visit his mother and brother, Mrs Mary Campbell and Duncan A Campbell, Sawyer. Rev Mr Campbell preached in Knox church, Galt, on Sunday, Rev Mr Fraser of that church preaching for Mr Campbell in Montreal. Mr Campbell was out to the coast this summer and met many Bruce people, among them being Mr and Mrs David Fair, Alderman Angus McNeill, who are all doing well, also Mr and Mrs Thos Pinch and Miss Pinch, all in Victoria; John McArthur, M P P, John Elliott, in Calgary; Hector Cowan, Arch Campbell and Peter Campbell, in Edmonton; John and Mrs Campbell (nee Ida Ewart), in Stettler. The impressions Mr Campbell received of the west were very favorable.

Killed by the Train at Tara

Mr John Grange, a retired farmer formerly of Arran Tp, was struck by a train at Tara on Saturday afternoon as he was crossing the track near his home and instantly killed. Mr Grange was very hard of hearing. He did not hear the train approaching from the north, although it whistled to warn him, and he was looking southward at the moment. The accident was witnessed by Mrs Grange, and it was a terrible shock to her. Mr Grange lived at Mount Hope for many years, but gave up farming about four years ago. He was a man of more than average intelligence, and well read. Had he not been afflicted in his hearing, he would undoubtedly have occupied a more prominent place among his fellows. He was 63 years of age.

Pte Stewart Daniel Wounded

On Saturday last Mr Jas Daniel received a message that himson had been admitted to hospital on Sept 17th, suffering from wounds in the left leg and hand. Stewart has seen longer service than any other soldier from this section. He began as a member of D Co, 33rd Regt, was made a sergeant, and about four years ago went to London to take the course to qualify him to hold the office. Immediately after completing the course at Wolesley Barracks he asked for discharge from the militia and joined the second regular infantry attached to the headquarters at London. Shortly after the war opened that corps was sent to Halifax, thence to Bermuda for a year and then to the front, and he had been in the trenches a whole year previous to figuring in the casualty list. As a son of a Fenian Raid veteran Stewart took to soldiering like a duck to water, as also did his brother Gordon, who is now with the transport service at the front.

Husson—Crowe

A very pretty but quite wedding was performed on Wednesday Sept. 20th at 11.30 a.m., when Miss Minnie Crowe, a popular Port Elgin young lady, became the bride of Irwin Husson, of Guelph. At the appointed hour, gowned in a smart travelling suit of navy french serge, with pearl grey velvet hat, bodice, gloves and shoes to match, with corsage bouquet of pale pink roses and lillies of the valley the bride was led to alter by her father, where the ceremony was performed by Rev Dr Scanlon, her pastor. Rev W Dorland, of Guelph, played the wedding marches while Mr W J Strachen brother-in-law of the bride, sang "Oh Perfect Love" during the signing of the register. Immediately following the ceremony a wedding dinner was served. Mrs Crowe wearing mauve satin, received the wedding guests. After felicitations and good wishes the happy bride and groom left for a wedding trip to New York and other American cities. The popularity of the couple was shown in the many useful gifts, among them being two substantial cheques from the bride's father and brother. The Belle class of the Methodist church, of which the bride was a member, gave four very pretty and useful pieces of silver. Out-of-town guests were Mrs Husson and Edna, of Guelph, mother and sister of groom, Miss F Cowan of Walkerton; Miss R Robertson of Southampton; Mr and Mrs Smith, Glenrose, Miss A Winch, Paisley.—Times.

A FINE FAIR

Beat Jupiter Pluvius to It

Nice Weather for Opening, but a Wet Finish

A Splendid Show and a Good Crowd

President Dave McBeath and his colleagues seem to have worked the weather man for a saving delay on Wednesday last. Whether or not their influence had any effect in holding back the downpour of that afternoon until the people had got inside the fair ground gates, it is quite certain that had the downpour come at 12.30 instead of 2.30, the treasury would have been loaded up with a lot of badly watered stock, and the exhibitors had reason so to be dubious as to whether they would receive their prize money. Preparations for the Fair had been made almost regardless of weather conditions, however, and fortune favored the brave directors.

The display of garden products and fruit in the palace was a surprise to the most of spectators, who previous to seeing the big ones shown here had set their eyes on nothing but dwarfed stuff this season. A great many people were disappointed with the results of their work in floriculture, gardening and growing of field roots, but the exhibits at our Fair proved that the drouth did not affect all alike. There were enough good samples brought together to make these departments very attractive and interesting, except in coarse field roots, which were very scarce.

The ladies' work and fine arts tables were well covered with articles in all lines of handicraft, while in the culinary department competition was decidedly close.

The number of entries for stock was sufficient to make a magnificent show in the ring, but the weather broke just as the judging got under way, and that part of the Fair programme was all off as far as the crowd was concerned. The rain came down in torrents at times, and all who remained on the grounds crowded into the buildings and tents for protection.

The large attendance under the adverse weather conditions without any special features to attract the people, demonstrates the fact that the public does, after all, appreciate a good fall fair conducted on straight agricultural and industrial lines. Had mid-day promised a whole dry afternoon the attendance would have swelled the gate receipts much above the goodly sum that was taken in. The directors have a good deal to be satisfied with, when everything is summed up.

The ladies did quite a large trade at their lunch counter, the proceeds of which go for patriotic purposes.

Kincardine pipe band were over, but the rain shut off their music very early in the afternoon.

The town hall was crowded at night for the concert. The Fax-Wilson Fun Co kept the laughs coming all evening, also rendering some numbers that were highly appreciated from a musical standpoint.

Three ticket drawings were held at the concert. A quilt made by the ladies of U S S No 10 Bruce & Greenock was won by Miss Mabel Nelson. The building lot donated by Mr H Boettger became the property of Mr John Teeple. A smoked ham contributed by Mr P Olsheer will be consumed at the table of Mr Donald Reid, of Elderslie.

PRIZE LIST

HEAVY HORSES

AGRICULTURAL.—Brood mare, 1 & 2, McDermid, Paul Kingston, Geo Munro; foal McDermid, Kingston, Colin Campbell; gelding or filly 3 yrs old, McDermid, J A Cumming, Geo Munro; gelding or filly 1 yr old, Colin Campbell, McDermid; span, McDermid, Wm Aleth; gelding or filly 3 yrs old, W Cassidy, Jas McFadden, Wm Minto; span general purpose, Alex Carr, Sam Alexander, John McDougall.

HEAVY DRAUGHT.—Brood mare, Fred Swinton, Wm Howe, D A McIntyre; foal Colin Campbell, D A McIntyre, John Thornburn; gelding or filly 2 yrs old, J H Turner, Thornburn, McDermid; gelding or filly 1 yr old, Fred Swinton; span, J B McBride, McKay Bros, Wm Howe; gelding or filly 3 yrs old, Colin Campbell, J A Cumming, Campbell.

SPECIAL.—Best foal by Heather Jock, J D Poole.

LIGHT HORSES

ROAD.—Brood mare, Sam Kingston, D Kingston; foal, J D Poole, Sam Kingston; gelding or filly 2 yrs old, F Hammell; gelding or filly 1 yr old, Wm Howe, J B Struthers; span, Pearce Bros, Chas Feller; driver, H Ernest, McL Young, Alex Lamont; driver 2 yrs old, Geo McKay, J W Hopper.

CARRIAGE.—Brood mare, Wm Cassidy; foal, Wm Cassidy; gelding or filly 2 yrs old, Geo Strong, D Kingston; gelding or filly 1 yr old, J W Hopper; span, J A Cumming, W H Davis; driver, D Kingston, John McLean, John Black; driver 3 yrs old, T Porteous; best halter broke colt, H McFadden.

SPECIALS.—Best turnout driven by lady, Pearce Bros; best lady driver, McL Young.

CATTLE

DURHAM.—Bull over 2 yrs, W T Hopper; bull calf under 1 yr, John Scott, J M Hopper; cow 4 yrs or over, W T Hopper,

TWO LONG YEARS HE SUFFERED

"Fruit-a-tives" Made Him Feel As If Walking On Air

CARLEAL, ONT., Nov. 28th, 1914.

"For over two years, I was troubled with *Constipation, Drowsiness, Lack of Appetite and Headaches*. One day I saw your sign which read "Fruit-a-tives make you feel like walking on air." This appealed to me, so I decided to try a box. In a very short time, I began to feel better, and *now I feel fine*. I have a good appetite, relish everything I eat, and the Headaches are gone entirely. I recommend this *pleasant fruit medicine* to all my friends".

DAN McLEAN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

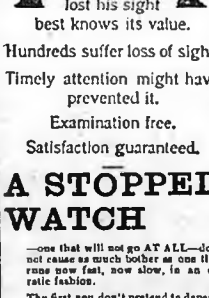
Should be at School

There are several children between the ages of 8 and 14 years in Paisley school section who have not been attending school. Whatever the reason there may be for this neglect, the parents concerned should see to it that their children are hereafter getting their share of the advantages offered for educating the young and equipping them for the battle of life.



The 160th to Go Overseas

Orders were received by the Bruce Battalion on Tuesday of last week to prepare themselves for going overseas shortly, and since that time they have had their last leave from London camp during the past few days, and it is expected that all others will be off duty this week for their final visit to home and friends before starting on the training camp nearer the fighting ground. The announcement that they had been chosen as part of the next contingent for overseas produced a feeling of elation among the Bruce soldiers who have been looking eagerly forward to this prospect. The 160th has won distinction already. They were mustered in shorter time than any other rural corps, and attained a degree of efficiency in training that is not surpassed by any. Now they see afar other fields to conquer, and nothing would please them better than to be assigned to the hardest work of the service. While the general health and physique of the force was found to be excellent and much above the average battalion, there were some rejected in the final medical examination, several of these being officers. Major A McLean Moffat was declared medically unfit, his heart being weak and his eyesight defective. It is said that possibly a little latitude may be given and the major allowed to accompany the battalion to the front. Lieut Harold Patterson of Walkerton, Bandmaster Wright, Sergt Taylor McDonald, Lieut Oliver and several others have been eliminated because of physical defects. Those who were home to Paisley on leave this week were Q-M Sergt Bernard Brown, Sergt Jas Patterson, Bandsman Henry Jack, Bugler Gladstone McGregor, Pte

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

I. SHOEMAKER

Jeweler and Optician

Sam Kayce, Jas Forrester, Louis Grant, John Dobson, Frank Dobson, Edmund Dobson, Jack Devine, J Rolston, R White, Wm Amstead, Roy Heppenstall, of the 161st, and J McArthur, of the 147th. Most of them returned to camp on Tuesday afternoon, and a large crowd bade them good-bye at the station.

Ribbing up the Liberal Party

H. F. GADSBY, brilliant Canadian journalist, continues in the October number of MACLEAN'S MAGAZINE his notable series of Canadian political studies. In the September issue he dealt with the "Duff Boom." In this October issue he tells in a non-partisan way of forces at work at the present time in the Liberal party of Canada. In the November issue he will have an article on the Conservative party in Canada. This series is unique and of lively interest, partly due to Gadsby's racy style and partly to the fact that he possesses "inside" information of a piquant sort.

Is Permanent Peace Possible?

Stephen Leacock What do you think? Let Stephen Leacock give you fresh thought and material in his stimulating and well-informed article in the October MACLEAN'S.

American Elections and the Great War

Agnes C. Laut Startles you in this article of hers in the October MACLEAN'S. How will the German-American vote go—to Hughes or Wilson? Miss Laut says Wilson will get it. Her vigorous mind, her "inside" information and the robustness of her style make this contribution of hers refreshing reading.

The Man from Athabasca Robert W. Service has another of his grip-ping at-the-front ballads in the October MACLEAN'S—The Story of a Get-rich Western Trapper who went overseas.

London Stage Favorites and Canadian Soldiers Tells of the entertainment of our Canadian soldiers in camps, hospitals and convalescent homes, by eminent British players. The article abounds in portraits.

Janey Canuck (Mrs. Arthur Murphy)—the first Woman Magistrate in Canada. A study of this forceful woman, and of the significant Women Movement in Western Canada.

Stories by Arthur Stringer, Arthur E. McFarlane, Napoleon Moorehouse and Mary E. Lowery all Canadian born.

Review of Reviews Department

The best things in the best magazines condensed for busy readers; always a fine and comprehensive presentation of the thought-making and informative articles appearing in current periodicals.

"Where Quality Counts, We Win"

H. PFAFF & SON

PERSONALS.

Ontario Woman.

Chatham, Ont.—"Some time ago I had a general breakdown. It terminated in quite a bad case. Dr. Pierce's Favorite Prescription was recommended to me by a friend who used it and received much benefit. I began taking it and in six months I was completely cured of my ailment and have never had any return of same. I can recommend this medicine as being good, if one will give it a fair trial."—Mrs. JOHN ACKERY, 67 Edgar St., Chatham, Ont.

At the first symptoms of any derangement at any period of life the one safe really helpful remedy is Dr. Pierce's Favorite Prescription.

Thousands of women in Canada have taken it with unfailing success.

Dr. Pierce's Favorite Prescription is a true friend to women in times of trial. For headache, backache, hot flashes, mental depression, dizziness, fainting spells, lassitude and exhaustion, women should never fail to take this tried and true woman's medicine.

Prepared from nature's roots and herbs, it contains no alcohol or narcotic, nor any harmful ingredient. In either tablet or liquid form. Write Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., to-day for free medical advice.

Dr. Pierce's Pleasant Pellets not only the *original* but the *best Little Liver Pills*, first put up over 40 years ago, by Dr. R. V. Pierce, have been much *imitated* but *never equaled*, as thousands attest. They're purely vegetable, being made up of concentrated and refined medicinal principles extracted from the roots of American plants. Do not gripe. One or two for stomach dyspepsia, three or four for *cathartic*.

DENTAL

DR. A. H ALLEN

DENTIST, formerly of Toronto.

Graduate of the Royal College of Dental Surgeons, Ontario. Senior Graduate of Toronto University Dental Department. Master of Dental Surgery, Graduate of the Detroit Post Graduate School of Prosthetic Dentistry, New York. Office over Mara's Drug store, opposite the Post Office.

Penmans
Hosiery for Men

HOSIERY that will stand up and look well——that's what a man wants. It's annoying to be everlastingly poking a toe through a sock——"why on earth don't they make 'em to wear?"——Penmans do.

Good sox to look at, good to wear——a color, and weight for every purpose. Simply say Penmans for Hosiery insurance.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER VIII.—(Cont'd).

"What are you laughing at?" said the captain.

"There's only one policeman—bar the coastguard, which don't count—in the place," grinned Jem.

Only one policeman—and the coastguard!" mused the captain.

Then he muttered, "All the better," and dismissing his faithful servant, he prepared for his bath.

For a week Violet felt very dull, and the captain, who watched her closely behind his well-shrumed simplicity and carelessness, found that all his amusing stories, songs and pieces of acting failed to amuse her, and he was not surprised to hear Mrs. Mildmay say at breakfast one morning:

"My dear Violet, you want change of scene. You look tired, my child. If we can persuade Captain Murpoint to accompany us, we will go up to town for a week or two."

The captain bowed.

"I must be taking my flight soon, my dear madam. I have made a long stay."

Violet looked up with one of her frank, open glances.

"You will not go yet!" she said. "You will walk this your home, Captain Murpoint, as you would have done if my father were master here."

The captain's eyes moistened, and his voice trembled with emotion as he bowed over to her in his courtly way.

"My dear Miss Mildmay," he said, in a low voice, "I express my gratitude for your generous, warm-hearted welcome and, though I cannot consent to make the Park my home, I will stay a little longer, for I must confess that I am loath to go."

"Stay as long as you can—forever!" said Violet, in her impulsive way. "You are my father's best friend, and mine, therefore."

"Do not let me be a drag on any of your plans," said the captain, earnestly. "I am an old campaigner, and can make myself comfortable anywhere. This is a charming place, but if Mrs. Mildmay would like a change, pray, pray do not let me be a hindrance."

"There is plenty of room over and over again for you in Park Place," said Violet, smiling. "So you will be no hindrance, Captain Murpoint. But I do not know that auntie really means to go to town—do you, auntie?"

"Well, my dear—" said Mrs. Mildmay, with hesitating decision.

"At least," laughed Violet, "you will wait a week to think over it. You and Captain Murpoint can sit in council while I take a drive. I am going to try Dot and Spot in tandem," and she ran from the room.

"Be careful, my dear!" Mrs. Mildmay called after her, and the girl's laugh rang back in loving mockery.

But something occurred within the next half hour which put the projected journey to London on the self for a while.

As Dot and Spot were trotting down the steep road, in very high spirits and showing signs of rebellion, Violet saw two gentlemen walking slowly up the hill.

Her attention was so much absorbed by the ponies that she did not behow more than a glance upon them at first, and it was not until she had got considerably nearer to them that she recognized in one Mr. Leicester Dodson.

Impulsive, as usual, she on the instant determined to change places with that gentleman in the matter of pride, and show him that she also could be 'inconsistent, therefore, when she came on a level with the gentlemen, she merely responded to the uplifting of Mr. Leicester's deerstalker by a cool, little nod, and whipped up Dot into a sharper trot.

Leicester, who had pulled up, expecting a little parley, colored slightly, and to Bertie Fairfax's enthusiastic exclamation, "I say, Les, what a beautiful creatures," replied, rather coldly:

"Do you think so? That is Miss Violet Mildmay."

Bertie glanced up at Leicester's face, and whistled, comically.

"By jove! she gave you the cut direct, Les."

"I am sure, I don't know," said Mr. Leicester, with the most provoking gravity. "She did, most likely, if you say so, Bertie—you, who are so well versed in woman's wiles and smiles."

"Item!" laughed Bertie. "you haven't made much impression in that quarter, Les, and—Hello!" he broke off, "those blessed ponies have started round, and here they come, neck or nothing! By Heaven! they'll be over that wall, trap and all, if she don't pull them in directly!"

Leicester turned round sharply, and, without a word, set off running across the road.

"Keep tight hold of the reins!" he cried, in his deep musical voice, as the two ponies came dashing along, with their wicked, little heads thrown back and the tiny toy phaeton swinging and rocking behind them. "Keep a light hand on the reins, and don't be frightened," he added, as he glanced at Violet's face, which was pale, but set fast and firm with determination and courage.

She nodded slightly to show him that she had heard and would obey, and he saw the tiny, little hands close fast upon the reins.

The next instant he made a spring at the pony with such force that the little animal was nearly knocked over and dragged him to a standstill.

Snap went one of the traces, and up went Master Spot, but around smack on the head from Leicester's hand quieted him, and then Leicester turned, with a smile, to Violet.

"You haven't acquired the art yet," he said, nodding laughingly. "I am afraid you do not use the whip enough."

Violet bit her lip with vexation for a moment in silence, then burst into a merry laugh, with half not a particle of fear in it."

"Tiresome little beast!" she said, "he would turn round! I did whip him, indeed, I did! But he was so obstinate, and so—and so—I thought I would let him go!"

Mr. Leicester smiled incredulously, and Violet, understanding the smile, laughed again.

"Well, I really do believe I could have pulled him in if I had tried a little harder!"

"Then you will not forgive me for interfering," he said.

Violet's smile changed immediately, and her beautiful eyes grew grave.

"I am only jesting," she said, in a low voice. "I know how kind you have been, and what you saved me from," and she glanced at the low wall, significantly.

"You must not try tandem alone just yet," he said.

At that moment, which was rather an awkward one, Bertie Fairfax came up, and Leicester hastened to introduce him.

As Violet bowed to the fair-haired Bertie, and after a glance of examination, felt that she liked him.

"Is it sympathy or antipathy?" murmured Leicester, who was near her.

Violet flushed slightly. "Neither," she retorted, in as low a voice.

"The trace is broken," said Bertie. "You cannot drive the little beggar any farther, Miss Mildmay."

"No," said Leicester, who seemed to have forgotten the ponies. "I will cut the connection, and divide the little rascals. You can then drive Master Spot home, and I can put Dot in my pocket."

Violet laughed.

"Really, it is a shame to give you so much trouble," she said. "Can you not tie him to a post? I can send Tom down for him!"

"It is no trouble" said Leicester, politely, "And what is more, we were coming up to the Park. My mother and father have driven over to pay you a visit; my friend and I were to accompany them, but we preferred walking, and arranged to meet them."

"I hope I shall get home before they have gone," said Violet. "At least, you will let me take one of you up?"

But they both declined, and Violet started, leaving Leicester and Bertie to follow with the rebellious Dot.

"Well," said Leicester, with his half cynical smile, as Bertie Fairfax looked after the disappearing phaeton, "I know you are dying to pronounce your opinion."

"I like her," said Bertie. "I think she's the most beautiful girl I've seen—bar one," he added, sotto voce, "and I like the candid, fearless look of her face. Those violet, velvet eyes, too."

"Nonsense, they're brown," said Leicester, but, although his voice was mocking, Bertie knew that his praises had pleased his friend.

CHAPTER IX.

In due course they appeared at the Park, very dusty and rather hot. Mrs. Mildmay was greatly alarmed and distressed at the idea of their walking such a distance in such weather, but it was the captain who so cleverly suggested that a little refreshment might be acceptable.

Mr. Leicester eyed him for the first time with something like amiability.

"I am thirsty, I'll admit," he said, with his cynic smile.

Mrs. Mildmay rang the bell.

"Some claret, and hock, and some seltzer water."

Violet, whose eyes were quick, saw a quiet twinkle in Mr. Fairfax's eyes, and said, with a laugh:

"Perhaps you would prefer something else, Mr. Fairfax."

"No, not I," said wicked Bertie; "but Leicester here has acquired a most degraded taste for bitter beer."

And as Mr. Leicester did not take the trouble to deny the imputation, Violet added, "and some bottles of ale."

The servant brought them, and while the gentlemen—including the captain, who said that he really could not resist the temptation—discussed them, Mrs. Dodson delivered herself of the purport of her visit.

Would Mrs. and Miss Mildmay and the captain come over to the Cedars and eat a friendly dinner with them on the morrow?

Mrs. Mildmay glanced interrogatively at Violet. Violet looked up, smilingly, and accepted.

"I shall be delighted, for my part," she said, "if it is really to be a very friendly, unceremonious evening."

The captain and Mrs. Mildmay echoed, and Mrs. Dodson looked pleased.

"It will be very quiet," she said. "We did expect Lord and Lady Beisdale from Coombe Lodge; but it is not certain whether they have come or; if they have they have promised to join us."

"I am so glad!" said Mrs. Mildmay, who was secretly quite surprised that the Dodsons should be on dining terms with the Lackland family. "I like Lady Lackland so much. I met them very often in town. Violet does not know them; they have not been to Coombe Lodge since she left school."

"Then you will come, and I hope we shall see them," said Mrs. Dodson, rising. "Seven o'clock. Have you gentlemen finished your ale, and do you mean to ride back?"

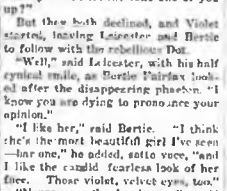
"I walk, please," said Leicester, rising.

"Then you must rest a little longer, I think," said Mrs. Mildmay.

So it happened that Mr. and Mrs. Dodson were escorted to their carriage and started off, and that Leicester and Bertie spent the afternoon resting in Violet's drawing room and conservatory, and that, while Bertie was absorbed in conversation with the captain, Leicester was left to exchange notes and opinions with Violet.

Perhaps it did not seem so dull to Miss Mildmay that afternoon, and perhaps Mr. Leicester was not altogether unhappy, stretching his long legs among her ferns and flowers.

At seven o'clock on the following evening the Park carriage dashed up to the door of the Cedars, and the guests alighted.



"Fancy calling upon 'those people, the tallow chandlers,' auntie," whispered Violet, wickedly, as they were ushered through the immense hall to the magnificent drawing-room.

"Hush, my dear! they will hear you," murmured Mrs. Mildmay, warningly, as Mrs. Dodson came forward to greet them.

But Violet was shaking hands with Mr. Leicester and Mr. Fairfax, the latter looking particularly handsome and yellow-haired in his evening dress.

"The Boisdale's have not come yet," said Mr. Dodson; "but they are coming."

(To be continued).

Loss in Shipping Uncleaned Grain.

About 40 per cent. of the cleanings removed from grain at the terminal elevators consists of fine seeds capable of passing through a zinc screen containing perforations 1-14 inch in diameter. This means that 40,000 tons of small weed seeds are shipped in western grain each year, on which the grower pays the freight, and for which he gets no return. This represents a loss of a quarter of a million dollars which could be obviated if these fine seeds were removed before the grain is shipped. The manufacturers of threshing machines are unanimous in stating that their machines are or may be fitted with screens and operated to separate a large part of the screenings at the time of threshing. The remaining 60 per cent. of the cleanings is good feed, and if it could be retained on the farm would mean a double saving to the grain grower. At least the fine seeds should and could be removed at threshing time.

Sugar Beet Tops for Silage.

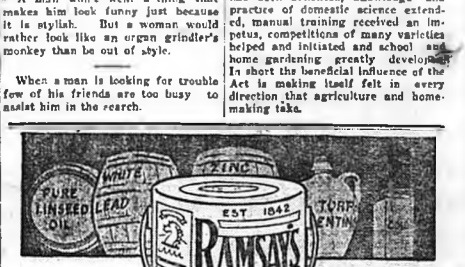
Silage beet tops cut and left in piles in the field after harvesting the beets, will make a fair grade of silage when run through a silage cutter with an equal amount of corn fodder. At the Wisconsin Station it was found that the silage had a somewhat strong odor but it was not offensive. The cows seemed to relish it, and did as well as on the regular corn silage. Chemical analysis showed that the silage had practically the same composition as clear corn silage.

By throwing the beet tops onto a pile of corn and cutting both together no difficulty was experienced in ensiling. Enough water was added to the cut material to give it the proper moisture content, and make it pack well when two men tramped it during the time of filling. The silage kept well.

Oh, Won't They.

A man won't wear a thing that makes him look funny just because it is stylish. But a woman would rather look like an organ grindler's monkey than be out of style.

When a man is looking for trouble few of his friends are too busy to assist him in the search.



AGRICULTURAL INSTRUCTION.

Amounts Allotted to Provinces for Year Ending March 31, 1917.

The allotments to the different provinces under The Agricultural Instruction Act, passed by the Dominion Parliament in 1913, has been made for the year ending March 31st, 1917. It will be remembered that by the terms of this Act, ten million dollars spread over a period of ten years was to be divided between the nine provinces of the Dominion, according to population, for the encouragement of education in agriculture and domestic science. In the initiatory year, 1913-14, $700,000 was to be divided. Each year the amount was to be increased by $100,000, until 1917-18, when the grants under this arrangement will have reached a total of $1,100,000, at which they are to remain until 1923, when the ten million dollars will have been exhausted. The sums received by the different provinces for the year ending March 31st next will be as follows:

Prince Edward Island ...	$ 30,443.75
Nova Scotia	74,859.28
New Brunswick	59,209.60
Quebec	243,712.23
Ontario	301,158.45
Manitoba	70,767.21
Saskatchewan	74,869.76
Alberta	61,747.22
British Columbia	63,732.60

By the aid of these grants agricultural education and domestic science knowledge has been greatly benefited and extended all over the country. School buildings have been erected, college buildings have been extended and increased in number, experienced teachers of a high class have been engaged, District Representative and county agents' expenses have been met, demonstrations in all branches of agriculture and short courses have been liberally arranged, agricultural instruction on both public and high schools has been extensively promoted, much useful literature has been circulated, veterinary science has been benefited, knowledge and practice of domestic science extended, manual training received an impetus, competitions of many varieties helped and initiated and school and home gardening greatly developed. In short the beneficial influence of the Act is making itself felt in every direction that agriculture and home-making take.

These Honest, Time-Tried Ingredients— are the bulwark of RAMSAY QUALITY

In RAMSAY PAINT you get the most accurate and thorough combination of approved ... materials ... all our painters will tell you no better materials exist. Your own good judgment will tell you that scientific machine mixing is superior to guess-work and "hand paddling."

Specify Ramsay for your next big job—and for the odd jobs you do yourself get the right Ramsay finish. Splendid service from the local Ramsay dealer or write the manufacturers.

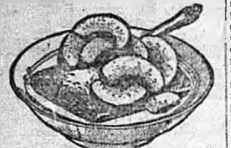
She Had Studied the Species.



A maiden lady of uncertain age entered a shop with the idea of purchasing a parrot. She inspected several and at last decided upon one of particularly bright hue, "That's a good bird, ma'am," said the dealer. "But he has one fault. He always grumbles a lot if he doesn't like his food." The spinster's faded eyes brightened. "Then I must have him," she said promptly. "It will be almost like having a man in the house."

Gave Her a Lesson.

"Have you any rags to sell?" said the ragman to a thin-looking woman who was standing at her door. "No," replied the woman, "excepting those I am wearing at the present time. If you want them, you'll have to take me, too." The ragman scanned the householder up and down, and a triumphant smile lurked around his lips. "I'm very sorry, ma'am," he replied, as he made for the gate, "I'm only buying rags, not bones."

An attractive girl can always find a lot of men who would "leave home" for her; the trouble is to find one who would stay home for her after she married him.

A Real "Peach Cobbler"—Not a soggy, doughy, inedible combination, but a crisp, tasty, easily-digested dish of whole wheat with peaches and cream. Cover one or more **Shredded Wheat Biscuits** with sliced peaches and then pour cream over them. Nothing so appetizing and satisfying and nothing so easy to prepare.

Made in Canada

GERMANIZING AMERICA.

By Charles M. Sloe, Denver, Colo.

In my last article on this subject, we were able only in the space assigned, to mention a portion of the work of the Kaiser's agents in the United States.

The apostles of 'Kultur" were specially chosen because they well represented German methods, and their imperial master. We will pass, for the want of space, the German-American press, the acts of the renegade German Jews, and the rest of the foul army of irreligionists, and take up the German Professors.

Some of these were already in the Chairs of American universities before the war began, but many others were sent over since, ostensibly to do some special work in the field of entomology and in kindred subjects; and those invariably, after a brief introductory address, would pour forth to the American students a specious but pathetic pro-German appeal.

This trick suggests the methods of the barbarous Huns, who leave no stone unturned to accomplish their unholy designs, but they were deluded if they imagined that they could keep on fooling America by such crude and silly subterfuges.

Some expounded the ethics of "Kultur," and left to their hearers the right to draw such conclusions as they might. Others again, were sly and casuistical, while some had the audacity to berate Americans frankly, but these missionaries of Prussianism accomplished but little in their proselyting work.

They had a two-fold purpose in view. They worked not only to conciliate American public opinion and turn Americans to defend their cause, but to arouse and organize the German Americans into a compact political party, which was designed to terrorize, if it could not persuade, the government to aid Germany by material means. As the months flew by, these brazen conspirators grew more bold and wanton in their methods, goaded on, no doubt, by their failure to make satisfactory headway through mild and conciliatory means.

They held meetings at which they openly preached sedition, and through the German-American press, they announced that they had formed a coalition with the Irish-Americans, and would seize the country and rule it in the interests of the Kaiser. Some of these more hot-headed scamps even planned a German Imperial Prince sitting in the White House, and ruling as viceroy of the Kaiser.

Of course, anyone who had the least knowledge of the Irish people, would know that a coalition of that kind with Germans would be as impossible as mixing water and oil and expect a chemical affinity to result.

But this claim, though ludicrous in the extreme, shows the denseness of the average German in dealing with those outside of the Fatherland. Though the Irishman has his grievances over what he thinks of the harshness of English rule, he is not apt to want to exchange his place in the sun for any straight-jacket coercive regime the Kaiser has to offer.

If so happens that the Germans in Tammany Hall are controlled by the Irish, and you may be sure that will be the relative position of the two races, should they coalesce, for the Irish will hardly sacrifice their position in America to promote the illicit ambition of any European monarch, much less that of the Kaiser. They intend to remain Americans, and these simple, deluded Germans will learn in the end that they will be exploited by the Irish, instead of exploiting them.

But the Kaiser's agents did not even stop at sedition. Acting under instructions which were directly traced to German and Austrian officials, they secretly placed bombs on outgoing steamers timed to explode when far out at sea. They blew up munition factories and resorted to the intimidation of manufacturers, organized strikes and sabotage, tried to wreck railroads, and to all intents and purposes, made this country the base for hostile operations against the Allies, with whom we were at peace.

For downright bold and uncompromising effrontery, this surely "takes the cake for a story," and has no precedent anywhere else; and if our administration at Washington had not been supine and self-seeking, this thing would have been promptly suppressed. Some prosecutions are still pending, I believe, but the perpetrators should have been hung.

But the final revelation of German atrocity and underhanded methods came when the world was introduced to the almost limitless schemes of the German spy-system. The spy, it seems, undergoes a prepared course of schooling in Germany, before he or she is sent out on their despicable mission of deception.

With perverted wits, they simulate truth which the heart is incapable of feeling, in order to prepare the ruin of the unsuspecting people with whom they deal. The German government kept spies in every Court, foreign Municipal Corporation, and in all laboratories, and mills. They intrigued in Egypt, in South Africa, to foment rebellion against the British. They were detected in Ireland and India; they influenced Japan against America, and were found in Mexico instigating that people against the U. S.

The German colonists who filtered into Belgium and Poland before the war were spies, though pretending to be loyal citizens, and they were found in many parts of England, France and Italy playing the roles of propagandist and of spy.

In these various forms mendacity, which seems to be an inherent element of German nature, displays itself. It is not to be wondered at that Goethe should embody in Mephistopheles—the spirit of falseness, a deep-seated national characteristic, of which the Kaiser is the most illustrious exponent. Cruelty and cunning are the ends to which "Kultur" logically leads. Dante rightfully reserved the lowest depths of hell for those who by mendacity betrayed their fellowmen.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentry, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to cure them. No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SHELL BLINDNESS.

Patient Was Cured Through Being Hypnotised.

One of the most perplexing injuries incidental to modern warfare is shell blindness, caused by shock. Numerous cases have been recorded where a big projectile, exploding near a soldier, has bowled him over and possibly knocked him senseless. He himself has escaped possibly without a scratch. Upon recovery he has been found to be sightless, blinded by the shock.

The symptoms are invariably identical. The eyes have not been injured—or only slightly—by grains of dust, which may merely have set up more or less local irritation. The patient has either been in absolute darkness or could only distinguish a slight difference between light and shadow. These cases, however, have proved to be exceptionally resistant to ordinary treatment.

Two of our leading optical scientists were attracted to the strange situation, and, although neither believed in hypnosis, both considered the field promising for its practice. Forthwith the patient was hypnotised, and he was induced to imagine that he was only temporarily blind and that he could see if he strove to do so. Strange to say, the treatment invariably had the desired effect. When the man awoke from his sleep he was able to see as well as ever. Indeed, in the cases handled by the two abovementioned scientists the hypnosis treatment has never failed.—Fred A. Talbot, in the Scientist in Wartime.

Brightens One Up

There is something about Grape-Nuts food that brightens one up, infant or adult, both physically and mentally.

What is It?

Just its delightful flavor, and the nutriment of whole wheat and barley, including their wonderful body and nerve building mineral elements!

A crisp, ready-to-eat food, with a mild sweetness all its own; distinctive, delicious, satisfying—

Grape-Nuts

ESHER URGES A THOROUGH JOB

NOBLEMAN WHO SNUBBED THE CURIOUS KAISER.

Ways of Emperor William Were Seen Through By Him in 1907.

Lord Esher has recently issued a very emphatic warning to the British relative to the desirability of their not being "caught a second time in the meshes of sleep" by the Germans. He is very insistent that the job must be thoroughly done this time—that the snake must not only be scotched but killed. His warning was written from headquarters at the front, where he has been staying for some time and whence he has written some very graphic letters descriptive of the fine work done by British ammunition, and urging the munition makers not to discontinue their efforts.

Lord Esher.

His warning about doing the job thoroughly derives especial significance from the opportunity he possessed for becoming acquainted with the extreme artfulness of the attempts made by the German Government to weave the meshes of sleep wherein they hoped to catch the British when the European war, for which they were steadily preparing, actually broke out. In the early winter of 1907 the Kaiser visited England. He was —as usual when he paid one of his frequent visits to England—overflowing with loving kindness towards the British. At Windsor Castle he was a guest of King Edward, and was all grace and graciousness.

Now, it so happened that Lord Esher, at that time, was Deputy Constable of Windsor Castle, and, in that capacity, was at Windsor during the Kaiser's stay there. He happened, moreover, to be as well a member of the Committee of Imperial Defence. Of this latter fact the Kaiser was, of course, well aware. All urbanity, he sought to discuss with the Deputy Constable of Windsor Castle the question of British naval programs and defences.

Snubbed the Kaiser.

However, Lord Esher is no fool. He realized that "fine words butter no parsnips," and that beneath all the Kaiser's soft sauder lay dark and sinister designs. Hence, although usually noted for his tact and charm of manner, he let the Kaiser see pretty plainly that he saw through his crafty game. Hot in the Kaiser where he belonged. And the Kaiser never forgave him.

But at that time the late Lord Tweedmouth was First Lord of the Admiralty. And he either lacked Lord Esher's sagacity or was more amiable to the Emperor's soft soap. Anyhow, he was ill-advised enough to allow himself to be drawn into a conference with the Kaiser on naval matters. This became noised abroad, and Lord Tweedmouth was popularly credited with something like an act of treason. On the full facts becoming known it appeared that he had acted with the knowledge of his colleagues—Sir Henry Campbell-Bannerman was Premier —in replying to the Kaiser's letter, and that he had not (as was popularly supposed) prematurely disclosed the British naval estimates to the Kaiser, to whom, in fact, he gave no information which was not given to Parliament at the same time. Still there had undoubtedly been some indiscretion, and the incident led to Lord Tweedmouth's relinquishment of the Admiralty.

All this is of particular interest because it was in his notorious letter to Lord Tweedmouth that the Kaiser showed how the snubbing he had received from Lord Esher several months before—the letter was written in the spring of 1908—still rankled.

"Drains and Navies"

In this letter the Kaiser venomously seized on Lord Esher's capacity of Deputy Constable of Windsor Castle to build on it a deliberate insult to the man who had snubbed him. He expressed himself as being doubtful "whether the supervision of the foundations and drains of Royal Palaces is apt to qualify somebody for the judgment of naval affairs in general." It was rumored at the time that it was through this gibe at Lord Esher that the fact became known to the public that Lord Tweedmouth was corresponding with the Kaiser. For the First Lord is said to have thought the slap at "Reggie Brett"—as Lord Esher is still familiarly known—rather smart and to have talked about it at some dinner.

At the Kaiser's own court, however, the slap at Reggie Brett evoked a good deal of laughter against the Kaiser himself, it being said that he was not the man to have talked of the unwisdom of mixing of drains with high political affairs, in view of one of his own experiences. For it was at the height of one of his own political crises—after the dismissal of Caprivi from the Chancellorship—that the Kaiser explained one day at his luncheon-table: "Here is a nice state of things! This city of ——— (naming a small town) proposed to empty its refuse into the river just above the bathing establishment. Nobody in the Home Office saw the mistake, and it took me four hours to get out a better plan." There was the Kaiser bothering about the sewage of a little town, while his Empire was in the throes of a crisis. And yet, with typical lack of humor, that very man sneered at Lord Esher's duty of "superviding drains" as disqualifying him for a knowledge of naval affairs.

Minard's Liniment for sale everywhere.

Really Careful.

Natalie, aged five years, for the first time planted some pansy seeds in small boxes. One evening she rushed to water them, and, on her return her mother: "You know, after a rain, you don't have to water them!" Natalie's reply was startling: "Oh, I take them in when it rains!"

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye free at Druggists or Murine Eye Remedy Co., Chicago

Bound to Ascend.

"So you've invested your money in a new airship company?"

"Yes. If our airship goes up, the stock will go up."

"But suppose it doesn't?"

"Then the company will go up."

Inadequate Instructions

Caller—Nellie, is your mother in?

Nellie—No, mother is out shopping.

Caller—When will she return?

Nellie (loudly)—Mother, what shall I say now?

Minard's Liniment Relieves Neuralgia.

Not a Pigtail Left.

The opening ceremonies of the Chinese Parliament marked the full turn of the circle to republican simplicity from the antique formalities and gorgeous ritual which President Yuan restored in the brief period when he was Emperor-elect. But the frock coat of the President who walked in and sat down while all the members were standing around gossiping was not such a surprise as the geniality and courtesy which prevailed. Old rivals shook hands and chatted of the prospects in a manner which was impossible when everybody was wondering if his neighbor had sold himself or would sell him. There were present 456 legislators and not a pigtail among them. Very few were in uniform.

To Be Candid.

Gentleman (to butler who has just given notice)—"But why do you wish to leave, Podgers?"

Butler—"I'd rather not say, sir."

Gentleman—"But come, come. I insist on knowing."

Butler—"Well, if you must know, sir, I've been 'ere now for twenty years, and I'm absolutely sick of the sight of you and your family."

PRO-GERMAN ORATORS.

Address Crowds in London Parks Without Interference.

A correspondent of the London Daily Express sent the following letter to that paper:—

Are the readers of the Daily Express aware of the meetings that are being held in Finsbury Park every Sunday evening?

Strolling through the park last Sunday evening my attention was arrested by several crowds, and by one large one in particular. To my amazement and disgust, I found myself listening to a fluent speaker whose every sentence, however cleverly cloaked, was apparently permeated by the desire to attack this country, to whitewash Germany, and to dishearten the civilian population.

The Daily Express, which has done such excellent work in arousing public attention to the intrigues and ignoble efforts of the pro-Germans in our midst to create national disunion, may perhaps draw public attention to these meetings, which are held with complete immunity in one of the most popular of London's playgrounds.

Minard's Liniment Cures Dandruff.

DUKE AS AN INDIAN CHIEF.

Stony Indian Garb Suits the Fine Figure of His Royal Highness.

During the five years of his Governor-Generalship, nothing has given His Royal Highness the Duke of Connaught, more pleasure than the ceremony which made him Chief of the Stony Indians. This ceremony took place at Banff, where the Duke and Duchess, together with Princess Patricia, spent a delightful holiday this Summer.

The Stony Indians, who were once a distinctly warlike tribe, and some of whose exploits form the background to Ralph Connor's "Sun Dance Patrol," are now good citizens and hold Annual Sports Day at the great tourist resort in July. The picturesque garb of a Stony Indian Chief admirably suits the fine figure and strong profile of the Duke.

Princess Patricia found particular pleasure this Summer in riding her Mounted Police pony "Dandy" along the mountain trails which radiate from Banff through the passes and over the precipitous sides of the surrounding mountains. The Duke himself spent much of his time in fishing for mountain cut-throat and devil trout, but the largest fish of the season was caught by Miss Yorke, lady in waiting to the Duchess of Connaught, who landed a monster of 7 lbs. less than nine pounds. The sulphur water swimming pool attached to the C.P.R. hotel was a source of great delight to the Royal party, and many amusing snapshots not for publication, are being taken back to England. The many visits of the Connaughts to Banff have resulted in this becoming the chief social centre of the West during the summer months. The Americans who have the money to travel have deserted their own National Parks so that they could be nearer to a real Duke.

Minard's Liniment Cures Burns, Etc.

STRANGE FACTS OF SCIENCE.

A small but useful electric railway is contained within a Paris sewer.

To one end of a new pocket knife is fastened an opener for bottle caps.

The government of Chile has authorized the erection of a technical industrial school.

A rack that can be hung on a radiator to enable a person to warm his feet has been invented.

The world's supply of black opals is practically exhausted, in the opinion of a London gem expert.

A woman is the inventor of a suitcase that can be folded flat and carried under one arm when empty.

Pressing a lever projects a slide down the tines of a new cold meat fork to remove its contents neatly.

A multiplying machine small enough to be mounted on the end of a lead pencil has been patented.

Bread loaves can be bleached by washing them with lemon juice, then with cold water and drying them in the sun.

A propellor, driven by the air as a car is running has been invented to blow rain away from the windshield of an automobile.

It is no easy task to down an upright man.

THE TIME HAS COME

when people cannot afford to accept anything but the very best for their money. Zam-Buk has been proved by thousands to be the best ointment obtainable for skin ailments and injuries, because it cures when other treatments fail, and because its cures are permanent. You take no chances when you buy Zam-Buk.

Only the really good things are imitated! Proof of Zam-Buk's superiority is provided by the great number of imitations and substitutes which have been put on the market. Don't be deceived, however, by anything represented as "just as good." There is nothing "just as good" as Zam-Buk. All druggists, 50c. box, 3 for $1.25, or direct from Zam-Buk Co., Toronto.

Send 1c. stamp for postage on free trial box.

The Ware That Lasts a Generation

You can cook the most easily scorched food in

"Wear-Ever" Aluminum Utensils

with less fear of burning than in any other kind, because aluminum is a better distributor of heat and retains it longer. This means a saving in fuel. And it means a saving in wear-and-tear expense too.

"Wear-Ever" utensils are light to handle and easy to clean. They cannot form poisonous compounds with fruit acids or foods.

"Wear-Ever" utensils are made from thick, hard sheet aluminum, 99% pure, without joint, seam or solder. You can let food burn dry without injuring them. Cannot rust—cannot chip or scale—are practically indestructible.

Replace utensils that wear out with utensils that "Wear-Ever"

Try our "PREMIER" GASOLINE No Water in it.

EDEN GROVE

Now is the time to thresh your pumpkins.

The S S Rally held in the Methodist church was a decided success.

Quite a number from here attended the Paisley Fair on Wednesday, and report the town wasn't altogether dry during afternoon and evening.

Sunny Jim was the guest of Mr and Mrs Rosseau, Mansion House, Clifford, on Thursday, and reports Tony doing a fine business and has everything up-to-date. Stop and see him while in that vicinity.

Lieut Gordon Connell, of the 160th, was tendered a right royal welcome Monday evening at the home of Mr and Mrs H Pearson, "Quality Hill," by his numerous friends in the Grove, whom the hostess had kindly invited in for the evening to do honor to our young soldier who expects soon to go overseas. All wish him a safe return.

Mr and Mrs McBride were the guests of Mr and Mrs McKeeman last week.

Single fare on railway Oct 9th, for Thanksgiving. Fare and one-third Oct 7th and 9th, return 10th

Mr and Mrs A Rosseau, of Clifford, called on friends in the Grove on Sunday.

Now that Turkey is at war it looks as if it were going to be roast goose for Thanksgiving this year.

Will Reynolds spent the week end in London. Mr Sparling of Cargill, relieved during his absence.

Mrs Elder, of Cargill, visited friends here on Thursday.

Mrs Reynolds, of London, is spending a couple of months with her brother-in-law in town.

WIFE TOO ILL TO WORK

IN BED MOST OF TIME

Her Health Restored by Lydia E. Pinkham's Vegetable Compound.

Indianapolis, Indiana. — "My health was so poor and my constitution so run down that I could not work. I was thin, pale and weak, weighed but 109 pounds and was in bed most of the time. I began taking Lydia E. Pinkham's Vegetable Compound and five months later I weighed 138 pounds. I do all the housework and washing for eleven and I can truthfully say Lydia E. Pinkham's Vegetable Compound has been a godsend to me for I would have been in my grave today but for it. I would tell all women suffering as I was to try your valuable remedy."—Mrs. Wm. Green, 822 S. Addison Street, Indianapolis, Indiana.

There is hardly a neighborhood in this country, wherein some woman has not found health by using this good old-fashioned root and herb remedy.

If there is anything about which you would like special advice, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass.

Mr Howard Birrel visited his father and mother here last week.

Mr Jim Gale returned to Toronto on Monday to resume his studies at the University.

Mrs Currie and Miss Isabel Currie returned to their home in Collingwood last week. They have been here for some weeks visiting at Mr A Pinkerton's and Mrs McKee's.

Miss Alma Reid of Toronto returned home here last week to be with her parents, Mr and Mrs Adam Reid, in this time of anxiety and grief over their son Lieut. Ernest Reid, who has been missing since Sept 17. At the time of writing no further word had been received by the sorrowing family.

GLAMIS

Bruce county has lost another pioneer in the person of Allan McKinnon, of the 10th of Kincardine. Just three weeks ago he was operated on for hernia and put up a valiant fight for life. His friends hoped that he might be spared, but he passed away on Saturday night. The late Allan McKinnon was very much respected and highly thought of by all, and will be much missed in the community in which he lived, and in the Baptist church where he was a member in high standing and always took an interest and active part in everything concerned with it. He was 72 years old. He leaves a widow and three children—Misses May and Lillie, and Charles. He was buried in Tiverton cemetery and the very large procession showed the high esteem in which he was held by all.

Mr and Mrs (Rev) DeMille spent last week with friends in Hamilton.

Mr and Mrs Nesbit, Mr and Mrs Dan McLean motored to Owen Sound on Saturday and spent Sunday with friends there.

Miss Reta McKinnon spent the week end in Elmwood with friends.

Miss Tessa Patterson is spending a few days in Paisley.

Mrs D MacIntyre and family and Miss Dora Oliver, who have been visiting at J C MacIntyre's, left on Friday, the former for Toronto, the latter for Winnipeg.

Monday, the 9th, is Thanksgiving Day. All business places in Glamis will be closed for the day.

Quite a number of the soldiers of the 160th are home on last leave before going overseas. A social evening was spent with them in the basement of St Paul's church on Monday evening. An impromptu programme was arranged, games played and lunch served, after which all joined in singing "God be with you till we meet again," and closed with the national anthem.

On Sept 22nd Mrs Catherine McKinnon received official word from Ottawa that her son, No 117089, Pte John Alexander McKinnon, M R France, has been wounded in the right arm, and was admitted to Middlesex War Office Hospital, at Natsbury, England, on Sept 17 A cable on Sept 21st from Nurse McKinnon, sister of Pte J A, was received stating, "I have seen Jack. All is well." On Sunday following another telegram was received by Mrs McKinnon saying her son No 117088, Corp Finnie George McKinnon, M R France, had been wounded in the right arm, and was admitted to Military Hospital, Chartam, Eng., on Sept 19th. These two sons have been in the trenches very near a year and Pte J A has now been wounded for the second time. Both are with the Mounted Rifles Machine Gun section. Their many friends here hope their injuries are not serious and that they may soon be restored to health and strength again.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

BRADLEY

A large crowd from here attended Paisley Fair and concert. All report a good concert, but owing to the rain have not much to say of the fair.

Stewart Bell returned on Wednesday to Brantford to continue his course.

Andrew Porter is building a water tank this week.

(Intended for last week)

Ptes And Bain, John Nicholls and John Woelfle spent a few days at their homes here.

Harvey Clark hired Millard Craig for a few days to help cut the corn.

Mrs Andrew S Bain and son have gone to spend the winter months at her home.

Miss McCurdy spent Sunday evening at her home near Vesta.

W J Ross cut And Porter's corn on Tuesday.

A large number from around here took in the concert at Pinkerton on Fair night.

Children Cry FOR FLETCHER'S CASTORIA

PINKERTON

Mr Howard Birrel visited his father and mother here last week.

Mr Jim Gale returned to Toronto on Monday to resume his studies at the University.

Mrs Currie and Miss Isabel Currie returned to their home in Collingwood last week. They have been here for some weeks visiting at Mr A Pinkerton's and Mrs McKee's.

Miss Alma Reid of Toronto returned home here last week to be with her parents, Mr and Mrs Adam Reid, in this time of anxiety and grief over their son Lieut. Ernest Reid, who has been missing since Sept 17. At the time of writing no further word had been received by the sorrowing family.

EBENEZER

Ptes Louis Grant, Russell McFadden and Ed Martin are home on their last leave, before going overseas.

Rev Mr Prudham, of Wiarton, a returned missionary from China, gave an illustrated lecture in the church on Tuesday evening. Mr Prudham will preach a missionary sermon here on Sunday next.

Mr Jos Kirkland and Mrs Robt Kirkland visited friends at Allenford last week.

SECOND CON ELDERSLIE

Miss Irene Gordon, of Owen Sound, is spending a few weeks with Mrs Geo Addison.

Will Young had the job of clearing away the ban from the bridge at lot 20, and has moved away a lot of good wood, but there is considerable left still.

Arthur Lilleo has gone to Toronto to resume his law studies.

Thos Pepper is at present seriously ill with an attack of typhoid fever His sister, Miss A Pepper, trained nurse of New York, has returned home to wait on him.

The threshing operations in this section are almost completed.

Mrs D Allen and Miss M Allen visited friends on the 10th con last week.

A large number from here attended the children's school fair at Vesta on Monday last The afternoon was ideal October weather and a very pleasant time was spent. The hearts of the children were gladdened as they saw the prize ribbons pinned on their exhibits. S S No 13 won third standing in the school march. Congratulations to all the 2nd con kiddies who did their part so well.

Sig aller Jack Wolfe, of the 160th Bruce Batt, spent the week end at his home here. This is Jack's last leave before going overseas, but his many friends here wish him a safe return when the war is over.

A number from here attended Paisley Fair, and all alike received a nice shower bath extra. Paisley always gives us the worth of our money.

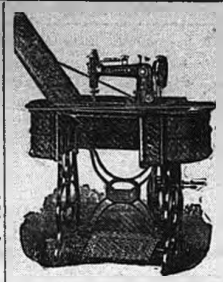
The work at Dawson's mill dam is progressing nicely at present.

On Sept 20th a quiet wedding was solemnized at the home of Mr and Mrs Russell Maxwell of this con, when their eldest daughter Florence May was united in marriage to Mr R J Gillies of Chesley. Rev W D Phillips officiated. The bride, who was given away by her father, was gowned in a beautiful white silk crepe dress. After a dainty luncheon was served the young couple left on the 5.30 p m train for a short honeymoon to Toronto. On their return they will reside in Chesley, where the groom is a partner with his father in the mercantile business. Their friends in this section wish them long life, happiness and prosperity.

On Friday afternoon last Mr Rundel, of Chesley, had a rather narrow escape. While driving up the road the horse took fright at something and shied, throwing Mr Rundel off the rig No bones were broken but he was stunned and badly bruised and shaken up. The horse was caught about a mile further up the road.

Mr Thos Smith, sr, has returned from a trip to the west.

Miss Green, of Shelburne, visited friends here recently.



Murdoch Campbell has gone west on a business trip.

Miss Susie Fortune spent part of last week at the home of her brother Blaine on this con.

A prayer meeting will be held on Wednesday evening of this week at the home of Mr and Mrs Will Young.

—Mr and Mrs Stewart Brigham of Allenford who have been visiting at the home of their son C E Brigham have returned home.

—Mrs John McBeath and son Alex, 4th Elderslie, spent the Thanksgiving holiday at the home of her daughter, Mrs David A Keith, Owen Sound.

—Mrs Wm Nicholls and son George were down to London on Monday to bid good-bye to Pte John Nicholls before his departure with the 160th Batt.

—Sergt Wilfred McFarlane, son of Registrar McFarlane, was home to Walkerton on final leave last week, and came up to Paisley for a day. He is with the 142nd, London's own battalion.

Good-bye to Soldiers

There was a great throng of citizens at the station on Monday afternoon to bid the 160th boys from here good-bye on their return to London after last leave.

Citizen's Red Cross Meeting

A meeting of the citizens of Paisley will be held in the council chamber, on Thursday evening, Oct 12th, at 8 o'clock to organize committees for collection of subscriptions for British Red Cross Fund as per proclamation of the Lieut-Governor.

T. H. George, Acting Reeve.

Read and Act

The appeal for the Red Cross, which appears in this issue of The Advocate, should be read by everyone who has not already done so. Paisleyites are reminded of the meeting in the council chamber on Thursday evening to organize for collecting subscriptions on Oct 19th. This is a great opportunity for noble generosity and self-denial on the part of citizens. The need is greater now than at any stage in the war, as may be judged by the lists of casualties that grow longer each day. It is still "fight or pay."

Thanksgiving Visitors

Miss Lucille Fraser, from Mount Forest; Cyclist James Brown, from Niagara Camp, at his home on 8th Bruce; Misses Mildred Johnston and Stella McKenzie, from Toronto; Melvin McArthur and Miss Bernhardt, of Guelph, at D McArthur's; Miss Ramage, of Toronto, at H Pfaff's; Miss Prudence Kerr, from Dutton; Mrs W Cook, of Toronto, at the home of her parents, Mr and Mrs H Reed; Miss Elizabeth McLennan, from Stratford Normal; Dr and Mrs Muir, of Gowanda, N Y, at the home of her sister, Mrs D Galbraith; Mr and Miss Robt Tooke, of Southampton; Mr Chas Welsford, of Guelph, at Jas Stark's; Mrs Geach, of Toronto, at Mrs R Hamilton's; Mrs Bruce, of Guelph, at the home of her parents, Mr and Mrs W Woodcock; Mrs Leach, of Toronto, at Mr John Collins'; Miss Buchan, of Walkerton, sister of Mrs H McKerracher; Mr F Waldroff, of Bradford, at Mrs Baig's.

Builder, Contractor and Cement Worker

Brick or cement buildings erected, brick work, cement work and plastering contracts taken.

Cement Supplies Furnished

Building Blocks, Window and Door Sills, Culvert Tile, Well Curbing, Lawn Rollers, Lawn Vases, Verandah Columns, Balusters and other fancy Cement Products.

Building Material

Cement, Lime, Lath, Shingles, Glazed Sewer Pipe and Fine Lining, Mortar Color, etc.

The man who does not advertise simply because somebody said it did not pay, should not believe the world is round because the ancients said it was flat.

No more shivering around on cool evenings. No more looking half-frozen on the road to work in the mornings. About this time last year I was feeling the cool because I didn't have the proper underwear on. Hadn't the nerve to put on the heavy winter clothing before the time and get laughed at. It's people like you that keep the doctor's pockets full all the time, when good judgment would prevent it. Show us whether you have any or not. We have to-day opened our stock of

Fall and Winter Underwear

which is the very best grade that money can buy. These goods were bought some six months ago and are much better than those being shown by the manufacturers to-day. Come and see them for yourself. Lines too numerous to mention. Get into a suit of this and be warm all winter. **Both Ladies' and Gents' in a full assortment.**

Heavy Drill Shirting

Just the thing for this kind of weather. 32 in. wide, several patterns to choose from. Regular 22c, yours for 16c.

A new shipment of

Fall and Winter Caps and Hats

for Boys and Men, and these latest American styles. Large assortment to choose from.

To the People of Saugeen:

The British Red Cross Society, through the Lieut.-Governor, is making an appeal to the people of Ontario for funds to carry on the work of caring for the wounded on the battlefields of Europe. This is a work that appeals to us all. The Red Cross knows no color or race. Your council carefully considered the matter at its last meeting and decided to ask you for a voluntary contribution on Oct. 19th (Trafalgar Day). Your response to this call last year was beyond our expectations. The need is much greater this year. Are we asking too much to expect a more generous response this year. The banks transmit all monies free. Every cent that you contribute will reach its destination free of all charges. Living here, as we are, knowing nothing of the awfulness of war, let us think for a moment of the boys at the front. May we not feel it our privilege, yea, our duty, to do this little part in the great world conflict. Let our response be of such a nature that the boys at the front will feel that we are keeping the home fires burning.

Major Moffat Not Turned Down

The report that Major Moffat, of the 160th, had failed to pass the final medical examination and would not go overseas is declared by Col Weir to be "ridiculous" says the Telescope.

Missionary to Korea

Miss Gertie Cass, daughter of Reeve Cass, Elderslie, who has been appointed Missionary to Korea from the Presbyterian Church, sailed for the Orient on Oct 6, from Vancouver. Miss Cass expects to remain in Korea for at least seven years.

Marjory's Soldier

"All tickets, please!"

Marjory Moore made the time-worn words ring with a new note as she stood by the station gate to collect the tickets. In her trim blue uniform, with a cap perched on her glossy hair at a smart angle, she looked charming enough to win a smile from even the most pessimistic of travellers.

"Good morning, miss!" said more than one of would-be clever youths who handed their little squares of pasteboard to her.

But there was a look in Marjory's eyes, as she returned the greeting, which put a full stop to their attempted familiarity.

Somehow this particular morning Marjory felt happy, although there was a chilly wind blowing, and the cemented platform struck cold through her stout shoes. She found herself now and then humming gently under her breath, while her eyes glanced quickly here and there.

Then suddenly her humming died away on a soft little minor key, and for a moment a tender light shone in her eyes. For coming down the platform towards her was a wounded soldier, in the well-known blue hospital uniform.

He was moving awkwardly along, evidently still uncertain of his crutch, while the big soft shoe on his right foot told of a bandaged wound inside.

As he reached the gate he paused for a moment, and then began to fumble for his ticket.

"I've got one somewhere," he said to Marjory, "but——"

"Never mind," said the girl, with a smile in which was a hint of tears.

The wounded soldier smiled back at her.

"Not used to this contraption yet," he said, with a grin, as he pointed to his crutch. "The doctor says that perhaps I'll be able to do without, but it seems to me that I might as well practise, in case I can't."

Marjory stepped well clear of the gate as he passed through, and, with another grin, he was gone.

The uniformed girl watched the man hobbling away with a sad look on her face. There were so many of them about, she thought, but all of them were cheery.

Ah, well, if they could smile at their fate, so must she.

She was just turning away towards the little room where she waited and sorted her tickets between the trains, when something made her look again at the soldier.

Then a quick pang ran through her heart, and with an effort she choked back a scream.

The wounded man was going along slowly, handicapped by the crutch, while just behind him a heavy luggage-trolly was beginning to slide down the platform. It had been carelessly left unfastened, where there was just enough slope on the platform to make it roll, and the helpless man was right in its path and quite unconscious of the danger.

A moment later Marjory was rushing across to the rescue, in her heart a great hope that she might be in time. There were few people about, and her path was fortunately clear. She was thankful then of the fact that she had always been good at running.

Just as the front of the trolly was about to touch the soldier, Marjory had reached it. With a great effort, she swung it round and brought it to a standstill. But the force with which she did this threw the girl herself to the dusty platform, where she lay for a moment breathless and shaken.

The wounded soldier had only become aware of his danger as it passed him by. Now he stood staring in amazement at Marjory, who presently rose slowly to her feet, and, with a shaky laugh, leaned against the trolly.

"That was a narrow shave!" she said, with a quiver in her voice.

"But—but——" began the soldier in amazement. "What happened?"

"The trolly was just behind you, and you would have knocked you down," explained the girl briefly.

"Then I have to thank you for saving me from a nasty tumble," said the man, comprehending at last. "By Jove, it was plucky of you!"

"Pooh! There was no risk to me," laughed Marjory, bending to dust her skirt.

"Perhaps there wasn't," replied the man, gazing with admiring eyes at her slight figure and flushed face, "but there aren't many girls, or men either, who would have thought of such a neat way of tackling that thing."

Marjory felt that she must get back to her post now; or, rather, to the little room. The sudden rush, with its consequent tumble, had shaken her more than she liked to own to before the little crowd which had collected.

"Shall I see you again?" asked the wounded soldier in a low voice, as she held out her hand and turned away.

"I'm always on duty somewhere in the station during the day," replied Marjory, striving to speak casually.

But somehow the touch of those strong fingers on her own thrilled her.

With another word of thanks they parted, and the soldier stood watching her as she walked away across the platform.

Here was a girl to admire! She was doing a man's work, truly, and she was such a slip of a thing, too! Just the sort of girl a fellow could like—just the sort——

Then, suddenly aware where his thoughts were taking him, he flushed crimson under his tan and hobbled away out of the station.

* * * * * *

Many times after that they met, and always there was a little chat between them. Each time they met the soldier seemed able to handle the crutch more easily, until there came a time when he walked towards the girl with only a stick.

"How splendid!" said Marjory gladly, as she noted the change. "You will never need that horrid crutch thing again, will you?"

"No, I hope not," said the man as gladly.

But he did not add that the stick must be his companion through life. The injury to his foot would leave him with a lifelong limp, but he would not grouse about that. After all, his fate was a million better than that of many of his pals.

"I'm getting discharged from the hospital soon, I hope," he went on. "Then I expect I'll be off home."

"Home!" repeated Marjory, trying to keep her voice calm and merely friendly, although her heart was beating wildly under her blue serge jacket. "Where's home?"

"Away in the country, down West," was the reply, while the speaker's eyes grew soft. "We've a little farm down there, just enough to keep mother, dad, and me."

And to himself he added the words, "And a little wife!"

"Then we shall be saying a real good-bye soon," said Marjory.

And, in spite of her efforts, a note of sadness crept into her voice.

"Perhaps not," was the man's reply.

Then he drew himself up. The doctor's report on his foot was not yet complete. There was just a chance that, after all, it might prove worse than expected, and in that case he could not ask a girl to tie herself to him, a cripple.

And a sudden rush of passengers from a train stopped their conversation at that point, and the soldier had to make way for them.

The days passed, and Marjory did not again see her soldier. "Her soldier" he had indeed become, although as yet she did not even know his name. But in her innermost heart she realized that the stalwart figure with the limp, which was a badge of honor, had taken possession of her whole being. She loved this man in the badly-fitting blue hospital uniform—her soldier.

Then she found herself unconsciously looking for him and wishing she could hear again his cheery greeting. She missed his voice and the look in his dark eyes.

But he never came. The days grew into weeks and the weeks into months and still she looked in vain.

There had been a heavy rush of work at the station, and Marjory was feeling worn out one evening as she prepared to collect the tickets on her last train—for she did not work in the late evening hours.

She gave her usual warning of "All tickets, please!" and prepared to take her stand by the gate just as the rush of passengers came along.

How it happened she was never to know, but perhaps she turned giddy from the long hours she had worked. In any case, as the train drew to a standstill, she reeled and swayed. A shout went up from the crowd, and one or two men dashed forward towards her as she staggered back a step or two, right to the edge of the platform.

In another moment she would have been on the metals and under the wheels of the still slow-moving train, when a man's figure hurled itself quickly forward and grasped her firmly, drawing her back to safety.

There was at once a crowd round them—the tall man with the fainting girl in his arms—and a superintendent came hustling forward.

"Fainted!" he asked quickly. "Bring her in here, sir!" And he led the way to the little room where Marjory had so often sorted her tickets and from the doorway of which she had looked so long and so vainly for her soldier.

The door was shut on them, and the crowd passed on.

* * * * * *

"My little girl!" the man whispered tenderly, as he laid her down on the dusty floor, with her own overcoat as a pillow.

"Now then, Jack," said a motherly-looking womtn, pushing him aside, "that's no way to bring the lass round. Let me see to her."

But as he drew aside Marjory opened her eyes, and as they rested on him a great glory shone in them.

"Then you did come again?' she said, in so soft a murmur that he had to stoop to hear the words.

"Ay, I did, sweetheart!" he replied, bending his lips close to hers. "And this time I sha'n't go away again—until you come with me.'

"Come with you?" replied the girl. "What—what do you mean?"

The motherly-looking woman interposed.

"There! Just like a man!" she snorted, but her eyes were wet and her lips trembled. "My son always was like that—everything at once, like. Look here, dearie, Jack and I have come to see about taking you back with us. He says, if you'll marry a man with a limp, he'll try to be a good husband to you.

"And"—her hearty voice faltered—"if he's anything like as good a husband as he's been as a son, you'll have naught to complain of."

But the man and the girl did not pay much heed to her words, and the woman turned aside as their lips met. Away in that little country home was the grey-headed man who had once spoken to her as Jack was speaking to this little slip of a thing.

And Jack's mother prided herself on being able to mind her own affairs.—London Answers.

Making Crosses to Mark the Graves of the Gallant Dead

AFTER an advance on the Western front, everything that can possibly be done to identify the fallen is done, and little wooden crosses are erected over each grave to mark the place of interment. The soldier seen in the above picture is shaping one of these crosses, which will later be erected over the grave of a gallant soldier. The French Government has made the kindly and thoughtful announcement that the little graveyards where British soldiers sleep their last sleep shall be free of all rent charges after the war.

FAMOUS "ONE CENT" STAMP OF BRITISH GUIANA.

It Was Sold By a Youthful Collector Who Was Short of Funds.

There are in existence several stamps that can claim to be absolutely unique—the sole specimens of their kind, says Leonard E. Goldsmith in Chums. If we accept the word "rarest" at its dictionary value, all of these must be placed level. Only one of them, however, is a classic, a real old issue from "way back," the others being in the nature of errors in surcharging, while in certain instances only one copy of a stamp has been prepared in order that a fictitious value might be placed upon it. The 20s surcharge in black on the 1s Oil Rivers Protectorate is an example of this, while only five stamps surcharged in violet and two in red were prepared.

World's Classic Rarity.

This is undoubtedly the One Cent British Guiana of 1856. This stamp, with its fellow, the four cents, was somewhat in the nature of a provisional, prepared during a shortage of the one and four cent values of the current issue. The design is very simple, the stamps being prepared at the office of the Official Gazette, Georgetown. The central design is a small three-masted sailing ship, with the words "Damus Petimus—Que Vicium" above and below it. The block of the ship was obtained from the head of the shipping column of the Gazette and this central portion is inclosed by a frame of printer's rules, round which are the words, in capitals, "Postage—British—Four Cents—Guiana." The Four Cent Value, both on magenta and blue paper, had been known to philatelists for many years before the sole copy of the One Cent made its appearance.

The Find.

One day in 1873 a youthful collector, Vernon Vaughan, of British Guiana, was turning over a mass of old family papers and letters with a view to adding to his collection. Among other stamps he unearthed a large stamp printed in black on a glazed and rather dingy red paper. Mr. Vaughan was interviewed some years back, and stated that he thought very little of his find, as it was in very poor condition, having the corners cut off. About a year after he sent to a firm of English stamp dealers for approval sheets, and on their arrival was seized by that insatiable desire to possess them that is a common symptom of philatelists, young and old. Being short of money at the time he decided to sell some stamps out of his album, and among those chosen for sacrifice was the uninviting One Cent of 1856. Mr. Vaughan says that though this was the only specimen he possessed he thought he would easily be able to replace it.

Travels of the One Cent.

He took his stamps to an old collector in the colony, who bought several, but who would at first have nothing to do with the One Cent; its bad preservation and octagonal shape prejudicing him against it. Eventually he was persuaded to "risk" six shillings on it, but impressed on the youngster the fact that he was buying it as a "favor." The stamp remained in his possession for 10 years, and was sold in 1883 to a London dealer for £25. The stamp was again heard of in a letter from the greatest of Victorian stamp dealers to Judge Philbrick, a great collector and president of the Royal Philatelic Society. It was offered to him, together with four other stamps, for £110; and although he fully intended to purchase it he delayed until too late, and the stamp was sold to the great French collector, Baron la Renotiere von Ferrary, for a price that has never been made public.

A philatelist remarks: "Lots contained a one cent, red, 1856! as genuine as anything ever was * * * It was a dreadfully poor copy."

Must be Worth £5,000.

It is a strange fact that, in spite of a great find of the early issues of this colony that was made some years ago, no second copy of the rarity has turned up. A very limited printing must have been made, or possibly the word "One" was a printer's error for "Four," which was immediately corrected. Various prices have been assigned to this tiny piece of paper, one catalogue placing it as low as £400 and another at £5,000, which, by the way, is much nearer the mark. The 1914 catalogue of Whitfield, King and Co. prices it at £2,000, but these quotations cannot mean much, as the gentlemen who have assigned them are not sellers. There are over a dozen specimens of the Postoffice Mauritius known, and this is priced at £1,200. If relative rarity had anything to do with the price, it is evident that the One Cent must be worth £15,000, but this is not an accurate guide, as the unique Oil Rivers stamp, previously mentioned, hung about a long while at £250 before it found a purchaser. The only limit to the price of this classic is the depth of pocket of the intending purchasers, and there is little doubt that should a second copy come into the market all records for a single stamp would go by the board.

THE SOLDIER-FARMER'S WIFE.

A Good Training and a Good Partner Make a Great Combination.

"What makes you think you will succeed as a farmer?"

The question was asked of a returned soldier who had expressed a strong desire to get out on the land.

"My wife," he answered.

"Do you mean to say she persuaded you?"

"No, I didn't need any persuading. But she wants to go as much as I do."

"Does she understand what it means?"

"She ought. She was born and brought up on a farm; she is not afraid of hard work; and she prefers to live in the country anyway."

"For the children's sake?"

"We've got none, worse luck. No, she likes it better herself."

That man's battle is half won.

He was not a farm boy himself, and he does not imagine that the little experience he possesses is enough. He is therefore taking advantage of the elementary training, in such matters as gardening and bush-raising, already started by the Military Hospitals Commission at some of its Convalescent Hospitals; and he aims at taking a course of extra instruction later on at one of the agricultural schools.

As announced some time ago, the Government makes special monetary allowances, in addition to the pension, for the maintenance of both the soldier and his family while he is being trained, if he has to learn a new occupation; so no man should have the slightest hesitation about taking full advantage of the training put at his disposal to increase his capacity and better his position.

A trained man, and a wife both experienced and willing, are a team hard to beat.

It is very interesting to see that this fact has been recognized in a most practical way in England. There, the Government decided a few months ago to start, by way of experiment, three pioneer land colonies of ex-soldiers,—or rather "ex-service men," for even the man now ploughing the sea will have his choice of ploughing the soil.

The President of the Board of Agriculture has just announced that in selecting settlers for these colonies "preference will be given, as between men of equal merit and qualifications, to those whose wives or sisters or daughters have acquired proficiency in milking or other farm operations, as the result of their employment on the land either before or during the war."

As a matter of fact, women in the old country have taken a large and even extraordinary share in working the farms, which the war has deprived of so many of their usual laborers. Women of every social rank have volunteered to do this, and have kept their pledge, though many of them were not only quite unaccustomed to manual labor, but free from any necessity to work at all.

Canadian women, the vast majority of them, have never been in that position. Work has always been familiar to them, and a very large number even of the town-dwellers among them were brought up on farms. Many of our returned soldiers, therefore, who think of going "back to the land," will have a great advantage in the experience of their wives as in the special training offered them.

Special training is given, of course, for a variety of other industries. The greatest care is taken to choose the occupation best suited to each man's ability. But, unconstionably, agriculture is the great national industry, and needs the energies of every man qualified to undertake it.

SCIENCE FACTS.

Salted whale meat is considered a great delicacy by the Japanese.

The locust tree was one of the first American trees to be brought to Europe.

The Belgians are looked upon as the greatest potato eaters in the world, and the Irish come second.

Polish women are renowned for the beauty of their hands; they place gracefulness of the hands above all other charms.

The emerald improves in color by exposure to the light. Pearls kept in darkness lose their luster, but regain it on exposure to the sun.

A tree grows in Ashanti and around the woods near Kabba resembling in appearance the English oak, and it is said to furnish excellent butter. A curious fact about this vegetable butter is that it keeps in perfect condition all the year round.

Beer is believed to be one of the most ancient of drinks. Manuscripts written at least 3,000 years before the Christian era show conclusively that even at that primitive period the manufacture of an intoxicating liquor from barley or other grain was extensively carried on in Europe.

OUR STAPLE FOOD SUPPLY.

Does the Modern Flour Mill Breed Cancers?

That cancer is caused by eating rice flour and other foods which have been robbed by millers of some of their most valuable elements before they reach our mouths is the belief of Dr. Horace Packard of Boston University. Such a demoralized diet, he declares, encourages the development of the parasite or fungus growth whose entrance into the system leads to cancer. "It is a momentous fact," he says, "that the flour mills and the rice mills of the civilized world are busy eliminating every particle of iron, phosphorus, sodium, potassium, silica, calcium, chlorine, magnesium and sulphur (mineral salts), from our staple food supply and sending out food materials rich in starch but pitifully meager in energizing and immunizing material.

"In a single flour mill, approximately one million tons of wheat are milled each year. Of this about 850,000 tons go to the human family as refined flour (wheat starch) and 150,000 tons of the by-products bearing the energizing immunizing food salts go mainly to feed domestic animals."

PROPOSING WITH A SPLASH.

To Break Jar Over Girl's Head is Avowal of Love.

The land of the Tarascans lies due west of the city of Mexico, and here the natives retain many of their practices which were well established when the Spaniards first landed at Vera Cruz. Here is the accepted method of courtship, for example:

The lover goes to the spring where the object of his affections is accustomed to fill her water jar. He holds her shawl until she accepts him, and then, with a stick, he breaks the jar which she holds on her head and gives her a betrothal baptism of water.

According to Prescott, the Tarascans had a Noah, called Trezpi, who escaped from a great flood in a boat laden with animals. Instead of a dove, Trezpi sent out a vulture first and then a humming bird, according to the legend.

The Tarascans once possessed the secret of tempering copper, an art now lost to the world.

MOTHER LOVE AIDS SON IN TRENCHES

It Brings Relief To Boy Standing His Watch Deep in Mud.

Once upon a time, only a few months after this terrible world war had begun, Private Bailey, a soldier in the ranks, had stood for days in the trenches "somewhere in France." The cold rains soaked him to the skin; the mud was deep. He had no rest. Weary and aching with rheumatic pains, he recalled the faith his mother had in Sloan's Liniment. He asked for it in his next letter home. A large bottle was immediately sent him and a few applications killed the pain, once more he was able to stand the severe exposure. He shared this wonderful muscle-soother with his comrades, and they all agreed it was the greatest "reinforcement" that had ever come to their rescue. At your druggist, 25c., 50c. and $1.00 a bottle.

Sloan's Liniment KILLS PAIN

School-Days are Joy-Days to the boy or girl whose body is properly nourished with foods that are rich in muscle-making, brain-building elements that are easily digested. Youngsters fed on **Shredded Wheat Biscuit** are full of the bounce and buoyancy that belong to youth. The ideal food for growing children because it contains all the material needed for building muscle, bone and brain, prepared in a digestible form. One or two biscuits for breakfast with milk give a boy or girl a good start for the day. Ready-cooked and ready-to-serve.

Made in Canada

MUCH FOUGHT FOR CITY.

History of Trieste is a History of Many Conflicts.

Trieste, the principal seaport of Austria, which figures so prominently in the news of the day, goes back for the beginning of its history into ancient days. It is first mentioned about 100 B.C. as a village, a place of no importance. Some fifty years later, it is recorded that the place was attacked by barbarian tribes from the interior, and about twenty years later still, Trieste makes its definite emergence into history during the Dalmatian wars waged by Augustus.

The Romans, with that sure judgment which characterised their empire building, recognized the importance of the site upon which Trieste now stands. Augustus consequently decided to found a Roman colony there. The little village quickly became a town, and, as a defense against the wild Celtic and Illyrian tribes of the surrounding country, who always gave the Romans so much trouble, the new city was surrounded by a wall and fortified with towers. It was given the name of Tergeste, quickly became a flourishing Roman colony and had a large territory attached to it. In those days, just as to-day, the importance of Trieste lay mainly in its commerce, as the natural outlet for Pannonia and Dalmatia, and in those days, just as to-day, it was a beautiful city.

On the fall of the empire in the west, the history of Trieste merges into the history of Istria. It passed through troublous times. It was pillaged by the Longobardi and the Goths; was annexed to the Frankish kingdom by Pepin in 789; fell into the hands of the dukes of Carinthia about the middle of the tenth century, and from thence it passed successively through the hands of the dukes of Meran, the dukes of Bavaria into the possession of the republic of Venice. For the next 180 years, the history of Trieste is chiefly a record of conflicts with the great city to the south, and in the end Trieste placed herself under the protection of Leopold III., of Austria. Leopold was only too willing to undertake the trust, and so from protection, Austria advanced to overlordship and from overlordship to actual possession. Twice during the Napoleonic period, namely, from 1797 to 1805, and from 1809 to 1813, Trieste was in the possession of France. In this later year, however, Austria seized the city and the surrounding district of Istria, and it has remained an Austrian possession ever since.

The fellow who gets nothing but money out of his work is poorly paid.

DEADLY DUST.

It Is Most Dangerous to Breath Dust-Laden Air.

The workman has no more deadly foe than dust. Not only are there tiny articles floating in the air, which carry germs of deadly disease which he may breathe or become infected with through a cut or scratch, but others that will inflict harm on his tissues.

Just now, when so many thousands of men are turning their hands to the making of munitions, it is timely to warn them against inhaling the flying, minute splinters and dust that are caused by a lathe or file working on metal, says the London Answers.

If a tiny particle of steel be examined under a microscope it will be found to be jagged and sharp as a needle, and when breathed into the lungs in great numbers it sets up all kinds of pulmonary troubles. The workman used to his conditions takes care not to breathe more of this dust than he can help, but the unaccustomed man may lean over his work, or, laboring in a dusty atmosphere, the unusual exertion may cause him to inhale deeply through his mouth.

All of us avoid nasty smells, but it is *often far* more dangerous to breathe dust-laden air which is not so perceptible.

RELIEF FROM INDIGESTION

The Most Common Cause of This Trouble is Poor Blood.

All conditions of depressed vitality tend to disturb the process of digestion. There is not a disturbed condition of life that may not affect digestion. But few causes of the trouble are so common as thin, weak blood. It affects directly and at once the process of nutrition. Not only is the action of the gastric and intestinal glands diminished but the muscular action of the stomach is weakened. Nothing will more promptly restore digestive efficiency than good, red blood. Without it the normal activity of the stomach is impossible.

Thin, pale people who complain of indigestion must improve the condition of their blood to find relief. The most active blood builder in such cases is Dr. Williams Pink Pills. They make the rich, red blood which quickly restores the digestive organs to their proper activity, and the dyspeptic who has hated the sight and smell of food now looks forward to meal time with pleasure. As proving the value of Dr. Williams Pink Pills in curing indigestion Miss Edith M. Smith, R. R. No. 4, Perth, Ont., says: "I can honestly say I owe my present good health to Dr. Williams Pink Pills. My stomach was terribly weak and I suffered from indigestion and sick headache, and was always very nervous. I was troubled this way for nearly three years, and in that time took a great deal of doctors' medicine, which, however, did not help me. I could not eat anything without experiencing the most agonizing pain. My sick headaches were most violent and I could not rest night or day. I was asked one day by a friend to try Dr. Williams Pink Pills, and consented to do so. After taking them some time I found they were helping me, and I continued to take them steadily for several months, until I found that I was completely cured. While taking the pills I gained both in strength and weight, and I feel it impossible to praise Dr. Williams Pink Pills too highly."

You can procure these pills through any dealer in medicine or by mail, post paid, at 50 cents a box, or six boxes for $2.50, from The Dr. Williams Medicine Co., Brockville, Ont.

A SYMPATHETIC COLLIE.

How "Max" Helped His Mistress to Bear a Surgical Operation.

An instance of the striking sagacity and almost human sympathy of her extraordinary collie, Max, is furnished by Mrs. T. P. O'Connor in her book, "Dog Stars." While she was in Germany she was suffering from a closed tear duct. Informe ne-tor in Baden-Baden whose y was the treatment of that difficulty she went there to see him, taking Max along.

The afternoon of my arrival, writes Mrs. O'Connor, anxious to know his opinion, I went at once to his office.

"Yes," said Doctor von Hoffman, "there is trouble here that will yield only to an operation; with the help of cocaine, I cut a little passage from the eye to the nose, keep it open with massage while healing, and in a fortnight your eye will be well enough for you to go away. Will you have it done?"

"Yes," I said, "certainly I will."

Max, who had been lying quietly in a corner, came forward, whimpered, looked at me anxiously, and laid his paw gently in my lap.

"This gentleman hasn't the same confidence in me that you have," said the doctor, smiling. "Come to-morrow at eleven, and everything will be ready for you."

"If you don't mind," I said, "I would much prefer the operation now."

I am sure Max pressed my knee with his paw.

"Very well," said the doctor. "I'll call my assistant. He has strong hands and will hold your head while I make the incision. Max must go into the other room."

"No," I said, "please let him stay. He will be a comfort to me. Go to your corner, old lad. Don't move till missy calls you."

Max obediently stepped back into shadow. The cocaine did not go very far, and the knife steadily pursued its way and unnerved me, I felt cold and sick; things were rather blurred, but the fear of Max, if I fainted, attacking the doctors, steadied me.

Not liking the look of things, he was gasping out little whines and whimpers. The doctor worked with quick dexterity and the operation was soon over. I called out, "All right, Max, stay where you are!" But he came to the centre of the room and waited. The doctor and his assistant bandaged up my eye. I reached for my hat, and Max bounded forward with greetings of great joy. He licked my hands, stopping between the quick breaths to give an occasional pianissimo bark, and intelligently kept a safe distance from my face.

"Never," said the doctor, "have I had better patients. Max did the crying and you did the sitting still."

"He would do the suffering for me, too, if he could," I said.

"I don't doubt it, and I am sure he will make a good nurse," said Doctor von Hoffman. "He seems almost human."

"His unselfishness and fidelity are more than human," I said.

While we were going to the hotel, Max kept very close to me, and when nine o'clock came he unobtrusively stored himself under my bed, although usually he slept on a travelling rug in the corner of the room. But he wanted to be nearer when I was in trouble, and after I got into bed his tail tapped out, "I'm here to take care of you, little missy." And we both fell asleep.

LAY WOUNDED ELEVEN DAYS.

British Soldier Exemplifies Never-Say-Die Motto.

Under the title "Eleven Days in a Shell Hole," the following was issued recently by the British official press service:

"In the Seymour Military Hospital at Manchester lies a wounded soldier of the Manchester Regiment, who has accomplished a feat of endurance which the doctors declare exceeds any demonstration the war has revealed of the 'never say die' spirit of the British soldier.

"Sergeant Huddart, formerly an engineer at the great Armstrong Whitworth Works in Manchester, was wounded by machine gun fire during the advance on the Somme. He fell with bullet wounds in his left hand, his thigh and his left leg. For cover he crawled into a shell hole, and there he lay for the incredible period of eleven days and nights.

"Five days after he had been there a stretcher party went by the lip of the shell hole carrying another wounded man, and Huddart hailed them. They said they would send a party for him, but the relief never came, and Huddart says he knew why—the racket of machine gun fire told him. Shells dropped all about him; his legs and feet were buried in earth thrown up by them. He had not a scrap of food, and he lived on sips of water from his flask.

"On the eleventh day he saw an officer looking down into the shell hole, and moved his hand to show he was alive. The officer called a stretcher party, and under fire they carried away the very feeble wounded man. One of the stretcher party was killed while performing the rescue.

"Huddart is recovering his strength The doctors say it is a case of which the war has revealed many, when the man ought to have died and would have died except that his indomitable spirit refused."

AFTER THE WAR.

Question of Reconstruction is Receiving Attention.

Day by day the question of reconstruction and of preparation for the great development anticipated in all directions after the war occupies a larger share of public attention in many countries. Paris has just held an exhibition of model houses on the terraces of the Jardin de Tuileries, and meetings, dealing with reconstruction and development work, are of frequent occurrence in both France and the United Kingdom. The latest instance of this activity is afforded in a report, recently made to the Birmingham corporation, on the question of rebuilding houses razed for military purposes and of proceeding with building schemes arrested by the outbreak of the war, two years ago. The report advises the expenditure of a sum amounting in all to something like £250,000 on schools and other public buildings.

Minard's Liniment for sale everywhere.

Minard's Liniment Relieves Neuralgia.

Complicated, But Easy.

"How do you get your husband to do what he doesn't want to do when you want him to do it?"

"That's easy. I make a big fuss over something he has already done which I didn't want him to do or I remind him of something which I have done which he wanted me to do and I didn't want to do and soon he is doing what I want him to do just as though he had wanted to do it all along."

Minard's Liniment Co., Limited.

Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

What the Canadian Pacific Railway Is Doing For Its Employees.

For the convenience of the employees, of whom there are nearly 2,000 in the Windsor Station buildings, Montreal, the Canadian Pacific Railway has recently set up a cafeteria luncheon at 15 cents in a large apartment which will accommodate 251 persons at a sitting. Judging by the attendances, it is bound to be one of the most popular features the company has put its hand to. There are hundreds of girls, especially, who have not time to go home, or who, if they do go home, are greatly pressed for time. With this service at their disposal they will save car fare; they will get a thoroughly satisfying luncheon; and they can have the comfort of the lounge room in connection on wet or cold days—a lounge room which contains a piano, magazines and papers and in which the employees can rest for the balance of their lunch hour. The arrangement is four to a table; all the appointments are harmonious; there is an air of quiet dignity about the place. Mr. W. A. Cooper, manager of the sleeping and dining car department, said that this was in accordance with the well-known policy of the Canadian Pacific for taking care of its employees. The people in the offices constituted quite a little city in themselves. Many could not go home with convenience. This lunch room would meet the wants of many. Of course, there would still be the 30-cent luncheon upstairs, and the regular dining room in which you could have what you wanted and pay for the same as much as you liked; but this was strictly for the employees, male and female, who would prefer to have their luncheon inside the building to going to restaurants—those of them who were in the habit of going to restaurants.

Minard's Liniment Cures Burns, Etc.

A Busy Lady.

Little Estar went to visit her Aunt Harriet for the first time. When she returned she remarked that her aunt was always busy.

"What does she do, dear," queried the mother, "to keep her so very busy?"

"Why," said the little girl, "she spends all day long hiding her silver in fifty different places so the burglars that she is sure are coming can't find it."

"Goodness!" exclaimed the mother.

"And," continued Esther, "she spends all night hunting for it and gathering it into one pile in case of fire."

The Paisley Advocate

PAISLEY, OCT. 11th, 1916

—"The real need in the rural districts is a new lookout on life. The rural problem is not deterioration, degeneration, nor the depopulation, but the farmer has missed the meaning of the value of money. It is the meagreness of life in country communities rather than the dazzle of the city that is taking the boy and girl away from the farm. The great need is to develop a class consciousness for purpose of organization."—Dr Creelman, President Ontario Agricultural College.

—"A message to the sessions" has been issued by the committee appointed in June last at the general assembly of the Presbyterian Church of Canada, in answer to those Presbyterians who have opposed organic union with the Methodist and Congregationalists. The document sets forth the position of the church, and is signed by by President Falconer, convener of the committee. It is stated that in the basis of union express provision is made that existing congregations shall be free to continue without change the form of organization which they at present have. The names "Session" and "Presbytery" are retained. Congregations will continue to call their own ministers and the pastoral tie will remain unbroken as long as minister and people so desire.

Brave Officer Missing

The following letter written by his commanding officer to Mr and Mrs A Reid of Pinkerton gives all obtainable information regarding the fate of their son, Lieut Ernest Reid:

Flanders, Sept 18th

DEAR MADAM—I regret to inform you that Lieut Reid has been reported missing after a raid on a German crater. He was seen in our trenches after the return of the raiding party. One man reports having seen him go back over our parapet and it is presumed that he had heard that some men were left behind wounded and went in search of them. These men were brought in by another party but nothing was seen of your son. As soon as it was known that Lieut Reid was missing I had the space between our trenches as well as the open ground and trenches in rear of our own thoroughly searched, in case he might be lying wounded in some shell hole or depression. This has been done as far as possible by day and night on three successive nights. Lieut Reid behaved with the greatest gallantry during the raid, for which his name has been submitted for recognition. I can assure you that we have done all we can possibly think of to find him. I personally feel greatly distressed at the failure to find him if wounded, but still hope that he may be heard of. He was a most gallant officer and a man of sterling character.

Yours truly,
A H S KIMAAELL, Lt-Col,
54th Batt.

From the fact that no trace of him could be found, it is quite probable he is in the hands of the enemy, and may yet be heard from. The many friends of the family hope that their gallant son may still be in the land of the living, and will be restored to his home and country when the opposing forces make an exchange of prisoners.

From Pte Frank Boyle

On Sept 2nd, from somewhere in Belgium: "I am out of the trenches safe again. Had a few close ones, but got clear. It rained for about three days a. so you can imagine what the mud would be like, and we were soaked to the skin. I know I was not in very good humor, but we had to be on the job and watch for fear Fritz should take a notion to come over. It is very quiet in the trenches most of the day, but at night it is a continual fire. I had the sand thrown in my face three times night before last from machine gun fire as it was pecking over the parapet. I had a good shot at a Hun when one of our flares went up the other night. He was out in front of their trench with a machine gun playing under our fire. When we were coming out of the trenches I met Charlie McGillivray going in. He sure was surprised to see me. Had only a few seconds to speak as we were within view of the enemy's lines. Will try and see him again. The rats and lice are fierce. The rats are so large and bold I always wear my sleeping cap at nights for fear they bite my ears. Fritz sent over our new four "rum jars," as they are called. They are about the size and shape of an 8-inch stove pipe, filled with explosives and old bolts, scrap iron, knives, razor blades, glass and all kinds of stuff. They don't come very fast, and make a whizzing noise. They sure made us dodge around the corner. It sure is some fun, but very dangerous for the fellows who happen to be asleep in a dugout. Sept 16—Had to get the letters. The weather has been very wet here lately and the mud is fierce, but the sun is out to-day, so we will get our clothes dry. It is not very comfortable sleeping in wet clothes. We do not use blankets. Just have our overcoat and rubber sheet. We have been on a night working party four nights and have to put in a few more before going to rest camp. Have been carrying timber and digging trenches. Water comes near our knees in some places. We had our issue of rum when we got through last night to warm us up going to bed. Last night was the heaviest bombarding I have ever heard. They threw our shells so fast Fritz could not send many over, and one a he did send did not burst. Three lit about 30 feet from us on the road and did not go off, but we could see by the fuse behind Fritz's line that some places were set on fire by our shells. Such a noise! The air was full of screeching shells from cannon all around us. My ears are ringing, yet. I have not found any souvenirs of any importance to send you yet. Am waiting till we get orders to visit Heinie, then we will get some and they will be of more importance. Our battalion has been very lucky so far. Have not lost many men. Cutmore, from Tillsonburg, went to England with a hole in his leg. He was tickled with it, and lots of us would not mind if we got as easy one like that. Well, we have said good-bye to the Ross rifles. Received our Lee-Enfields yesterday, and we are not tickled. Had a jam with the Ross the last night in the front line. Had to get into a dugout with a candle and pick away till I got the shells loose. If Heinie had been coming over at the time I would sure have been out of luck. I had a letter from Tillsonburg friends the other day with a five dollar bill in it. It certainly was welcome. We only get 20c a day, and we never know when we are going to get paid. I wish I were where I could get all I could eat for once. I am hungry all the time. I was in the graveyard looking at the Canadian graves yesterday, and was talking about Babcock from Paisley to my chum. Major Swinburn, our second in command, asked me if I was from there. He is the Mr Swinburn who used to visit at Jacques'. I am coming down in flesh a little, but feel fine."

With the Surgeons Behind the Battle Line

The following letter was written by Capt R H Athey, C.A.D.C., who was assistant in Dr Allan's office a couple of years ago. It gives a picture of war from the Army Medical side; and attests the wonderful courage of the fighting men. Capt Athey says: "There has been an awful fight and the wounded have been coming through by the hundred, and I was working all night, and part of the next day helping with the dressing, etc. The sights are dreadful, but you get used to them and they seem ordinary. The poor boys! It is great to see them smashed up, and the shell shock cases are pitiful. Great strong chaps creeping in dazed and staring and trembling, and jumping up at the sound of the train passing or anything like the whistle of a shell. "All night long and the day before and after, the big gun close to us crashed out, sending its giant projectiles ten miles up to and over the lines and on into the enemy's lines of communication, and every time the hut would shiver and the air rush by with the shock. At a window you can feel the puff of air. Then over come big German shells, searching and searching for our "big Uncle." Away off a dull boom and then presently a high, wavy whistle nearer and nearer and a bang! and she bursts. But though they must have struck near, they never got the gun and I believe did no damage, though I'll bet they weren't very far off their mark. Fancy, some men have lain two and three days wounded and unapproachable for the snipers and shrapnel and lived through. Marvellous constitutions. I mustn't say names and figures or anything, but we lost a lot of fine chaps. And what for? I don't think the line has been materially altered for all the slaughter. I was so glad to be useful. I'd work myself blind to help these chaps who have been in this very hell itself to hold our British line. I only feel I have it too easy and too safe when they are facing the music. And yet there are those calling themselves men who can and won't help. Believe me when I say that I don't wish to meet those chaps when I return—my friends in future are the lads who have done their bit. Thank Heaven all our lot are in. It is awful to see a friend start out for the front and say "Good-bye and Good luck," and then to see or hear of him coming back wounded or perhaps dead, as has happened. However, it will not last for ever and God is on the right despite all Keisers and Kroppa. This is my first experience of the results of a big fight. I have seen some strange sights. "One medical officer I have lived with came rushing in the other afternoon crying and sobbing like a poor child. He had been up with a battalion for only four or five days at the front, and they had been fearfully attacked and shelled, and after that his nerves gave out and he had to be relieved. He told me later he would never have believed he could be so weak (down). He said when the shells were all around him and no shelter, he hoped one would hit him and relieve the awful strain. "Then the bluff jolly colonel of—— Ambulance, like the brave chap he is (and they all are), when the fight was at its worst, he came in here on his way up to the advanced dressing station. I was thrilled as he strode in, huge and plain faced, with raincoat, steel helmet and gas helmet at his side. Next morning we had him back in the ambulance mortally wounded. He was buried yesterday; and the men I knew in the 9th Reserve at Sandling have come through, and so on. And yet the lads go back to the trenches singing "Keep the Home Fires Burning" or "Pack up your troubles in your old kit bag and smile, smile, smile!" They are wonderful. Every night the troop train passes up with them and the roads are full of them. Just at this moment a boy has landed in who has been wandering for two days, evidently suffering from a confused mind, perhaps shell shock. He is sleeping on the floor now under a blanket. Oh, how tired these wounded are, they fall asleep anywhere, wounds and all, while waiting to be "dressed."

Red Cross Meeting

The meeting of citizens, billed for last Friday evening, for the purpose of organizing committees for the collection of subscriptions for the Red Cross Fund, failed to materialize, as the half dozen or so who were present decided that nothing should be done until a more representative meeting could be secured. Another meeting is therefore called by acting reeve George, in the absence of Reeve Ballacher, to be held in the council chamber on Thursday evening, Oct 12th, at 8 o'clock. Come out and take a part in assisting the collecting of a liberal sum towards answering the urgent call from the greatest life saving organization in the world. Bear in mind that the soldier boys of our own county and village will likely be among those in need of succor by the time this money comes into use. Without such an agency as the Red Cross hundreds and thousands of the wounded would be allowed to languish and perish on the field of battle. We can't all fight, but no se are too poor to help with a small contribution, and the well-to-do should be liberal when called upon for Red Cross or patriotic purposes.

Away for Thanksgiving

Dressing Station, Firing Line—Official Film, "Battle of the Somme."

Give and heal!

An urgent call for help again goes forth from the Motherland's mighty life-saving agency — the British Red Cross. The Empire is called upon to give greatly, give lovingly, give quickly, that the sick, wounded and suffering on all the battle fronts may not languish and perish in their hours of deepest need.

Here is a great work in which all can share. The Joint War Committee of the British Red Cross Society and Order of St. John is the only institution which carries voluntary aid to the sick and wounded of the British forces on land and sea in every region of the war. Thousands of lives of our bravest and best are saved through this splendid work. YOUR gift may save a life. Isn't it worth doing? It is. GIVE!

The Red Cross looks after the transportation of sick and wounded—it equips thousands of hospitals, rest and convalescent homes, it supplies countless requisites for hospital work, clothing and other comforts. Over 2,000 Red Cross Motor Ambulances are at work on the various fronts, while "rest stations," hospital trains, steamers and launches, food for prisoners, books, special work for the blind, etc., etc., are a few, only, of Red Cross activities.

Make "Our Day" Your Red Cross Gift Day
Give on October 19th

The Sick and Wounded Call For Your Help
Give on October 19th

Ontario's princely gift in 1915 of $1,614,000 rang a clarion mercy call, throughout the Empire. The British Red Cross were grateful beyond measure, and their appeal through Lord Lansdowne, President, now comes to us as to friends who sympathize and help. The need is greater to-day than a year ago—it is ever growing. Will Ontario do less than she did last year? No! GIVE—give a day's pay, give all you can. GIVE.

Your gift will go entirely to the British Red Cross, where, again, through much voluntary work, the working expenses are cut down to only 3½% of the total revenue. Thus, if you give $10, actually $9.77½ goes to the healing and saving of some stricken hero. The expenses of the Ontario Committee, advertising, printing, etc., are being met entirely by the Provincial Government.

Premier Hearst Has Seen the Work

"My visit to England and France has aroused deeper appreciation than ever of the splendid work of the Red Cross. It deserves every support, and I trust the people of Ontario will respond with their usual generosity to the British Red Cross Appeal for October 19th."

HON. W. H. HEARST,
Prime Minister of Ontario.

Mr. N. W. Rowell, K.C., Brings a Red Cross Message

"I bring a message of cheer to those who have relatives at the front and who fear they may be wounded. I believe everything human skill can do, that human care and sympathy can provide, is being done and provided each day and each night throughout the year by the Army Medical Corps and the Red Cross. It is a perfect marvel of efficiency."

MR. N. W. ROWELL, K.C.,
Leader of the Opposition.

He gives twice who gives quickly. Your help is needed NOW!

The Motherland's only direct appeal to us for help in this great war is her great Red Cross mercy work. Ontario's response must and will be quick and generous. Give through the Treasurer of your Local Committee—or, send your subscription to the Clerk of your municipality—or, make it payable to Hon. T. W. McGarry, Treasurer British Red Cross Fund for Ontario, Parliament Buildings, Toronto.

Don't Let Your Stricken Defenders Call in Vain, but

Give and heal!

Had Terrible Pains in Kidneys and Back.

Dear Mr. Editor—I want to write you about "Anuric." I was very sick, could hardly be up; I was in bed most of the time. Had terrible pains in my kidneys and back, so much so that I had to scream sometimes when I was sitting down and wanted to get up, the pain was so great. I had tried a well-known kidney medicine but it didn't help me. I heard of Dr. Pierce's Anuric Tablets so I thought I would try them. I took only one box of the Tablets, and my back is now free from pain and I can work and take care of my family. I feel I cannot say enough for this medicine. Sincerely, MRS. WM. KELLER.

NOTE: This "Anuric" is adapted especially for kidney complaints and diseases arising from disorders of the kidneys and bladder, such as backache, weak back, rheumatism, dropsy, congestion of the kidneys, inflammation of the bladder, scalding urine and urinary troubles. The physicians and specialists at Dr. Pierce's great Institution, at Buffalo, N. Y., have thoroughly tested this prescription and have been with one accord successful in eradicating these troubles, and in most cases absolutely curing the diseased kidneys.

Patients having once used "Anuric" as Dr. Pierce's Invalids' Hotel, have repeatedly sent back for more. Such a demand has been created that Dr. Pierce has decided to put "Anuric" in the drug stores of this country, in a ready-to-use form. If not obtainable send one dime by mail to Dr. Pierce for trial package or 50 cents for full treatment.

Dr. Pierce's Golden Medical Discovery is a blood cleanser and alterative that starts the liver and stomach into vigorous action. It thus assists the body to make rich, red blood, which feeds the heart, nerves, brain and organs of the body. You feel clean, strong and strenuous.

GIRLS WANTED

For office work to fill the places of men who have gone or are going to the front. Young women can render the country real service by preparing to take positions in banks and business offices.

THE CHIEF CHARM OF LOVELY WOMAN

Soft, Clear, Smooth Skin Comes With The Use Of "FRUIT-A-TIVES".

NORAH WATSON
26 Drayton Ave., Toronto.
Nov. 10th, 1918.

A beautiful complexion is a handsome woman's chief glory and the envy of her less fortunate rivals. Yet a soft, clear skin—glowing with health—is only *the natural result of pure Blood.*

"I was troubled for a considerable time with a very *unpleasant, disfiguring Rash*, which covered my face and for which I used applications and remedies without relief. After using "Fruit-a-tives" for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without "Fruit-a-tives".

NORAH WATSON.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

PRESENTATION

A very pleasant time was spent at the home of Mr and Mrs Wm Nicholls, con 16, Greenock, on Friday evening, Oct 6th, when a large number of friends and neighbors called in to meet with their son John who is on his last leave of absence before going overseas. John, like many other Bruce boys, heard the call of his country, and although but young in years he bravely responded by joining the 160th Bruce Battalion of which every Bruce citizen should be proud. The evening was made enjoyable by speeches, songs, selections on the gramophone and a general social time. The following address was read and John was presented with a handsome wrist watch and a fountain pen. With many good wishes to the genial host and hostess and to John the friends withdrew.

To John Nicholls:

DEAR FRIEND—We your friends and neighbors have met with you this evening on the eve of your departure for your final training course across the sea, and quite possibly for active service on the blood-stained fields of Flanders. As we see and understand this great war, Britain, the home of the brave and the true, entered this war to protect the homes, the liberties and freedom of the weak against the strong. The wheel of oppression and tyranny rolled out toward Servia and over little Belgium, where many brave, noble and true hearts were crushed beneath the onward sweep of German militarism. Britain stood the test and sent a few men, ill equipped, and joined hands with France and stayed the onward sweep of one of the most gigantic enemies of freedom and right that ever drew the sword. From our Motherland went out the call and from each colony that forms our great Empire the answer went back in the sending of thousands of our noble sons, willing to go to the front, yea, willing to fight, to suffer, to bleed, to die in the cause of freedom and justice. This has caused a deeper sense of brotherhood between all the overseas Dominions and of common loyalty to the Mother Country, linking us together in mutual sympathy. We wish, we hope, we pray for peace, but the peace that costs a great sacrifice is the more lasting. This is a great war, the greatest conflict in history, the greatest number of men engaged, the greatest amount of property destroyed, the greatest engines of destruction that ever were invented are in use, the greatest number of lives will be lost, the greatest number of hearts will be made sad, the greatest number of chairs around the firesids will be vacant, many of them never to be filled again. As we think of all these things we are led to ask. "Does God still live? Does his hand still guide the destiny of nations?" What answer will we give? Russia, France, Britain, Canada, yes, and Ontario, were fast losing their hold on God. This great conflict as it draws to a close, when every home in every nation engaged feels the touch of this war, then we may realize that there is a God and that his hand is still at the helm to guide this great world conflict back to peace and to the Prince of Peace. You have heard the call of your king and country, you have enlisted, you have put on the king's uniform, you are ready to follow your captain. Be true to your king, be true to yourself, and above all be true to your God. Trust and look to Him for help. Take His word as your guide and you are safe. We ask you to accept this present just to remind you of your old home and friends in Greenock. (Signed, Chas Webb, Howard Parker, Scott Webb, Thos Fullerton, Thos H Purdy.

'Twould Make a Change

If country merchants advertised their goods in the same attractive way that departmental stores do, so that the purchasing public could be induced to look at diligently through the columns of their local newspapers as they do through the mail order catalogues, the merchandising opportunities at home would be so apparent that buying out of town would be reduced to a minimum.

VILLAGE COUNCIL

Council met on Wednesday, Oct 4th. Members all in attendance except Mr George. Minutes of last meeting read and sustained.

Mr John Collins interviewed council re erection of new smoke stack.

Messrs Thos Sparrow and John Smart on behalf of the fire brigade requested the purchase of 100 feet of new fire hose.

Communication received from the Organization of Resources Committee, Toronto, in the British Red Cross appeal for funds to be collected in this province on October, authorized by proclamation of the Lieut-Governor.

Sparrow—Nicholls—That the reeve be and is hereby authorized to call a public meeting of the citizens of Paisley, to be held in the council chamber on Thursday at 8 p m for the purpose of making arrangements for the Red Cross collection on the 19th.—Carried.

More—Sparrow—That the clerk is hereby instructed to procure from the Canadian Consolidated Rubber Co one hundred feet of new hose, and that couplings on hand be shipped to that company to be placed on said hose.—Carried.

Payments were authorized as follows:

CHAPTER IX.—(Cont'd).

"And here they are," said Leicester, as another carriage, not quite so well appointed as the wealthy Mildmays', dashed up.

Violet looked toward the door, with some curiosity, which was transformed to pleased interest as Lady Ethel entered.

Violet, whose likes and dislikes were most sudden, and oftentimes unaccountable, like Ethel at first sight.

The two girls bowed first, and then shook hands. There was no doubting Violet's open, kindly eyes on Ethel's part, and Ethel's gentle, quiet smile on Violet's.

"This is my brother, Fitz," she said, as Violet made room for her on the sofa, and Violet looked up and saw good-natured, simple Lord Boisdale standing looking down at her with his boyish grin.

Violet felt herself superior to him immediately, and bowed quite condescendingly, as she would to a schoolboy. Lord Fitz felt—well, he never could tell how he felt at their first meeting, though he tried to often afterward.

"What a pretty place this is!" said Ethel. "I am so sorry we have not known more of it. It is the prettiest drive possible up the cliff."

"And that house with the green, old buildings on the hill," said Lord Boisdale, "is quite a treat. I wonder who owns it?"

"Miss Violet Mildmay," said Mr. Fairfax, who was standing near, quite silent, for a wonder, and looking out of the corner of his frank, blue eyes at Ethel.

"Eh? Eh? I beg your pardon," said Lord Fitz, coloring.

"You have done nothing to need it," said Violet. "I am quite grateful to you for admiring what I love."

"Well, it is pretty," said Lord Fitz. "By jove! prettier than this," he added, in a loud whisper, which was fortunately drowned by the announcement of dinner.

Mr. Dodson took in Lady Ethel, Lord Fitz followed up with Mrs. Mildmay, and Violet found herself upon Bertie Fairfax's arm ,but Leicester Dodson sat near her at dinner, and, being at home, found it his duty to talk,

It was a pleasant dinner, exquisitely cooked and served by discreet, attentive and noiseless servants.

When the ladies returned to the drawing-room the gentlemen seemed to miss them, and after a very little wine was consumed they followed them.

Somebody proposed whist to Mr. Dodson presently. The captain said it was a good idea, and simple-minded Fitz, Mr. Dodson and Bertie and the captain sat down, just for a rubber, while the ladies gave them a little music.

Leicester could play a good hand at any game of cards and was fond of whist, but he found himself at Violet's side, by the piano.

The captain was induced to sing, and the audience dropped into silence, for when Captain Murpoint pleased he could still conversation most effectively, and never did he sing more effectively than he did then.

When the carriage came up the party was quite loath to break up.

Coombe Lodge was within such an easy drive, and the Park so near, that, as Mr. Dodson said, they were like a family party.

It was a lovely moonlight night, and Leicester proposed that, if they insisted upon going, they should send the carriages on at a slow pace and walk themselves part of the way.

They started and sauntered on, the moonlight pouring down upon them its soft, placid, fitful light, and bathing sea and land, cliff and hollow, in a silver stream.

The party soon broke up into groups Fitz and Leicester, with Violet, Bertie and Ethel with Mrs. Mildmay, and the captain and Mr. and Mrs. Dodson.

It was certainly a tempting night, and the young people seemed to quietly revel in it. Twice the Lackland carriage was sent on; but at last Ethel decided that they had better get in, and much to Bertie's inward grief, Fitz consented.

"The day after to-morrow, then," he said ,as he closed the carriage door, "You will not forget that as you forgot me."

"No," said Ethel, laughing, but with a slight flush, "I will not forget, and I hope we shall all have a nice ride. Good-night."

Bertie bent over her hand and held it until he was in danger of the wheels. Then Leicester declared that he would go on as far as the Park and return with a cigar.

"You may light it now," said Violet, "if you like. I do not mind."

Leicester was very grateful and lit it.

By some means the captain attracted Bertie's attention as they neared the Park, and so, calling him away, left Leicester and Violet alone.

They did not seem to notice it, however, and stopped to look at the ruins of the old abbey clinging to the new house.

"Beautiful!" said Leicester. "Bertie has been in ecstasies over this; he is an anther and an artist, you know."

"I like him," said Violet, in her decisive way.

"So do I," said Leicester. "He is my best friend. My rooms and his in the Temple adjoin."

"Do they?" said Violet. "How strange it sounds: 'In the Temple.' What do you do in chambers?"

"He works hard. I—smoke, drink, read, think, and watch him working."

Violet laughed.

"It must be very nice," she said, softly. "Look!" she said, suddenly; "that is the ghost's window."

"That long oriel window?" said Leicester. "You promised to tell me about your pet ghost."

"Don't joke about it," she said, with a short laugh. "Ask the fisherman about it. No man, woman or child would pass that tower after dark."

"What sort of ghost is it!" asked Leicester, with extreme levity. He did not believe in the supernatural.

"Have you never heard the legend?" said Violet, "It is a swange one."

"Tell it me here; it is a fine opportunity, and proper surroundings. Is it a man or a woman?"

"A nun," said Violet, "in white robes, with a skull's face and two gleaming eyes. My old nurse had seen it three times. And after each appearance something dreadful or unfortunate happened either at the Park or at the village. Once the old farm took fire and was burned down, the second time one of the Godolphins, who were then living at the Abbey, was drowned in the bay, and the third time a child fell off the cliff."

"The people of Fanruddle should insure their lives after the ghost appears," said Leicester, laughing.

"You laugh; but is it not swange?" said Violet, gravely. "And, what is more strange to my mind, all the descriptions of the apparition by the different persons who have seen it tally exactly. All say it is a woman in white robes, with a skull's face and gleaming eyes, and that it carries a strange, shaded light, which throws a fearful, dim glare for some distance. It is not awful?"

Leicester smiled.

"Not very," he said. "I have seen better at Drury Lane. And does your ghost confine herself to that lower oriel window, or does she peramulate?"

"Yes, she has been seen at that small window on the right, you see, which the ivy half covers."

"I see," he said, "and what room is that?"

"A room in the old abbey, which was left standing by my father's directions," said Violet, in a low voice. "He used it as a sort of study or reading-room, and when he died it was closed up."

"It is empty, then?" said Leicester.

"No; we would have nothing removed. There is all the old furniture as it used to be when he lived. It used to be left undisturbed while he was absent on his voyages, and it is undisturbed now."

"It is a room for a ghost," said Leicester.

Violet nodded.

"Yes," she said. "Look, the moon is obscured. How dark it is. Ah! what is that?" she broke off, with a scared, dry voice, clutching Leicester's arm.

"What—where?" he asked, quickly, and laying his hand upon hers.

"There—in the room! at the window!" she breathed. "It has gone!"

"What?" he asked, still keeping the hand, which she seemed too frightened to remove.

"I—I—scarcely know," she said, brokenly, and with a shudder, which Leicester felt. "A something white, with a light, at the little window."

"Oh, are you sure?" he asked doubtful, anxious to convince her that it was mere fancy. "Remember, we have just been talking about the ghost."

"No, no; it was not fancy," she said. "I saw it plainly enough. I was not thinking of it as I spoke, and I saw it when the moon got behind the cloud. It was in my father's room."

At that moment she started again. A voice so close behind her that it seemed to spring from the ground said:

"Miss Mildmay, where are you? Oh here you are!"

And Captain Murpoint came up.

"How interested you look! What are you talking about?"

"Ghosts," said Leicester, fixing his dark, scrutinizing eyes upon him. "Did you not hear Miss Mildmay call out?"

"No," said the captain, innocently, "I only just came up."

But he had been close beside them for some minutes, and had not only heard Violet's low cry of terror, but the whole of the conversation.

CHAPTER X.

Some quiet evenings are more productive of matter for reflection and afterthought than many more exciting and apparently eventful ones. How little there is to talk over a ball! One quadrille is like another and one partner very much like another. Most ballrooms are hot, most partners are unsuitable. But how often a quiet evening with a few friends in a country house is the beginning of some great matter—the mustard seed whence springs the shadowing tree, the bend of the stream which changes its whole course!

So it was with several of the members of Mrs. Dodson's quiet little dinner.

Five of them at least returned to rest that night very thoughtful.

The captain, when he had reached the little boudoir, or dressing-room, of his luxurious suite, cast off as if it were a mask the careless smile of simple amiability and showed in his countenance some of the subtle working of his brain.

As he walked to the window and looked out upon the scene bathed in the moonlight, his face grave and frowning with deep thought, he looked a very different person to the easy-going gentleman of fortune which he had appeared in the drawing-room a few minutes before.

"Soh!" he muttered, "the room has been closed since John Mildmay's death, and never been opened; the dust must lie thick there. Haunted, too! Did she see anything, or was it only a sentimental girl's fancy? Violet is not sentimental, and is scarcely the girl to be led away by a weak fancy, either. The cry and the start were too natural in their suddenness and reluctance to be affected. Strange! I don't believe in ghosts, but if I did I would believe that Violet Mildmay saw one then.

"The haunted room lies near this—in what direction? Let me see," and he closed his eyes and worked out a mental calculation. "It must lie at the end of my bed-room, for that is in the part of the building nearest the ruins. If I were a nervous man, I might feel qualmish about the near proximity of the haunted chamber. As it is, as I am a man who has to make his fortune, that chamber, with its uncanny character, is a godsend; it is a slice of luck I little looked for, another card in a hand which was not a bad one at any time.

"But I must not overlook my opponents. I play as one against many. First, Leicester Dodson; he is not to be lightly held. His handsome face and long legs carry a brain with them that may be a fighting match for mine. He has coolness and confidence, has Mr. Leicester Dodson, and he is smitten with Mistress Violet. They were close together to-night, in amiable confidence, her hand fell upon his arm. I have known a man's heart fell before one look of such a woman as Violet before now. And the boy, my young Lord Boisdale, is half inclined to lose his wits over the girl's fair face and grace—but he doesn't count. Some men are born fools, and this is one. He is of use, though. I must play one against the other. His sister, too, Lady Ethel, is no fool, and Mr. Bertie Fairfax thinks her an angel. There should be some cards to play there!"

(To be continued).

"Blest is the bride on whom the sun doth shine," is a universal belief.

Rust Brings Other Troubles.

It would appear from information issued by the Publications Branch Department of Agriculture, Winnipeg, that rust on wheat brings along other troubles. The plant, weakened by rust, is made susceptible to other diseases. Prof. Jackson, of the Manitoba Agricultural College, states that the crop failure in some places is due to other causes than rust. These are described as follows:

Head Rot: Owing to the weakness of the wheat from the rust attack, and to the continued wet and muggy weather, many secondary diseases are sure to occur, and I have recently noticed soft black spots occurring in the heads. These black spots are independent of the rust, and, on examination under the microscope, are found to be Fusarium Wilt and Macrosporiore, two common wilts always ready to attack a weakened plant. They will do much harm to grain which might otherwise have graded number three, as they tend to give it a moldy smell and dirty color. In samples sent me from Saskatchewan, these head wilts had so developed as to cause the grain to be quite soft.

Ergot: It is seldom that we see ergot on wheat, but when conditions favor one disease they also favor another, and I find much ergot on barley and rye; in some cases 20% on barley, and considerable on wheat which is seldom ergoted. The ergots appear as large black protruding grains. On cutting them open, they are purplish inside and quite hard. They make flour unfit for use, and hence should be carefully looked for this year. I do not expect that they will be sufficiently common in wheat to hold up much of it for flour-making, but on barley and rye they will be sufficiently common as to be a factor in their grade this year.

Smut or Bunt: Plots of wheat were sown this year with tagged wheat, untreated, and, as one might expect on such a year as this, bunt has developed on these plots to the extent of perhaps 20%. All the weaker and poorer heads are badly "bunted"—every kernel in the head. This is a splendid illustration of the expediency of treating seed grain with formalin.

Plums

have a spicy zest which makes them a favorite preserving fruit, and several excellent varieties are plentiful this year. Preserve all you can with

The Housewife's Corner

Selected Recipes.

Lemon Cookies.—One egg, one cup of granulated sugar, an eighth of a cup of shortening, a cup of sour milk, an even teaspoonful of soda. Beat into milk until dissolved one and two-thirds cups of flour and one teaspoonful of lemon extract. Will be stiff batter. Drop in gem pans and bake in hot oven. This rule makes about 16 cakes.

Fried Oysters.—Use large oysters, drain between cloth without pressure, roll in seasoned bread crumbs, then in beaten eggs, diluted with one tablespoonful of milk and again in the crumbs, and fry, a few at a time. In smoking hot deep fat. Drain and serve three or four, according to the size, on each plate, with a small cup-shaped leaf of lettuce, in which place a teaspoonful of tartare sauce.

Oyster Patties.—Roll puff pastry about one-half inch thick; cut rounds with a small cutter for the patties, and mark a smaller round in the center of each. Put the pastry on a flat tin, glaze with egg, and bake in a hot even oven. Remove the center piece with a sharp-pointed knife; take out the soft inside paste. Boil a pint of good stewing oysters. When they are cooked add a small amount of salt and butter. Fill the patties with the oysters by taking out the soft inside paste. Serve hot on a dish paper. Garnish with parsley.

Fish Fillets.—Fish should always be fried like doughnuts, in deep fat. Bacon drippings are perhaps as good a material as any. Butter should not be used for frying fish. It should be cooked until well browned, and then removed and allowed to drain, but not grow cool, before serving. If the fillets prepared as above are cut into individual portions before being cooked, the housewife has no crumpled mass of fish as the result of her labors, but firm, well-cooked squares of a delicious food.

Escalloped Oysters.—Take as many oysters as desired—a quart enough for six people. Use a granite or crockery baking dish. Lay a layer of cracker crumbs in the bottom of the dish and two or three small pieces of butter on top of the crumbs. Put in a layer of oysters, then another layer of the crumbs and butter, and so on. Have the cracker crumbs form the top layer, and place butter on top. Bake in a medium oven for from three quarters of an hour to an hour. Serve while hot, either plain or with chili sauce.

Gluten Bread.—The following is a delicious bread made from buttermilk and gluten flour: Half pint fresh buttermilk, half level teaspoonful soda, one teaspoonful butter or olive oil, half pint gum gluten flour, one rounded teaspoonful baking powder, two eggs. Mix well, put in eight-inch squares, well-greased pan and bake in moderate oven half an hour. Bran biscuits with gluten flour, for constipation, are made as follows: Half cupful wheat bran, half cupful gum gluten flour, one teaspoonful baking power, one teaspoonful melted butter, one teaspoonful salt. Sift dry ingredients, rub in butter and add milk to make a stiff dough. Roll out and bake in hot oven.

Sunshine Cake.— Ingredients—Six fresh eggs; one cupful flour, pinch of salt, one and one-fourth cups sugar (granulated), one-half teaspoon cream of tartar, one-half teaspoon almond or vanilla extract.

To make—First separate yolks eggs, putting the yolks in a small bowl and the whites in your mixing bowl; beat the yolks with a revolving beater until light and add salt to the whites. Whip with a wire whip until frothy, then add the cream tartar, whip until stiff and dry. Meanwhile have the sugar with about three tablespoons of boiling water boiling slowly until it hairs from the spoon as it does when making boiled frosting; pour this on the beaten whites and beat well. When partly cool, add the yolks and beat until well mixed. Now add the flavoring and the cup of flour measured with measuring cup after being sifted five times. Place around the edge of bowl and fold in lightly toward the center, using the egg whip for mixing in; do not beat. Keep the mixture light and foamy; pour in a medium sized angel cake pan, ungreased. Start to bake in cool oven, turning the gas burner quite low until the cake has raised to the top of the pan, then increase the heat slightly to finish baking. Will raise in from twenty-five to thirty minutes and will bake in from fifteen to twenty. When done the cake will shrink slightly from the sides of the pan. Take from the oven and invert cake until it is cold; remove from pan and ice with a boiled white frosting.

Keep Your Brushes Soft.

It is impossible to overestimate the danger to the hair of unclean combs and brushes. Such toilet instruments should be carefully cleansed and disinfected once a week, and there is a way to do it so as not to injure them. The brush and comb must first be quickly washed, then dipped in a water with boric acid and then sunned and aired. An expensively backed brush may be cleansed by dipping the bristles clean in a strong solution of ammonia and water. After this run hot and cold water alternately over this part of the brush, shake it vigorously and put it, bristles down, over a rest of some sort to dry in the open air.

If the bristles of a brush have lost their stiffness or elasticity, treat them to an ammonia and salt bath. First wash the bristles in hot water to which ammonia has been added and then dip directly into water to which salt has been added. Dry the brush, with bristles up, in the open air.

Borax also cleans a brush well. Dissolve the borax in hot water and dip in the bristles. Rinse thoroughly, when clean, and dry, with bristles up, in open air. Combs can be cleaned with borax or ammonia, but ammonia sometimes discolors celluloid combs.

Another admirable method for cleaning brushes is to use dry bran. Naturally this method is easier on the brushes. Rub the bran in thoroughly, as you would rub orris root into the hair. Then shake and rub it out. It will take out all grease. Bran can be safely used with brushes having bristles set in rubber, which cannot be cleaned with water.

Things to Remember.

Soak a hardened lemon in hot water.

Never move a cake in the oven until the centre is set.

Sponge cakes baked in patty tins require a very hot oven.

Good soup stock is made with lean, juicy, uncooked beef.

Pickles should be kept in a dark, dry place in stone or glass jars.

If whipped cream is to be flavored it should be done before the cream is whipped.

White enamel furniture can be cleaned with turpentine and it will retain its gloss.

Rubber bands are not expensive, and they are useful in so many ways in the kitchen.

Warmed-over meat loses its flavor, therefore, the gravy should be well seasoned.

Clear cold water and ammonia, aided by a nail brush, cleans cut glass beautifully.

Glass jars are used for storing dry materails, such as coffee, tea, spices, etc. Paste the label inside the jar.

Garbage will not attract so many flies if it is wrapped in newspaper before it is put into the garbage pail.

Cooking of cheese is a valuable and nutritious food, and is more easily digested than when eaten raw.

A soft cloth dipped in gasoline will clean the cuffs of a blouse. Change the cloth when it begins to look soiled.

When putting down cucumber pickles put a green pepper in the jar. This will improve the flavor of the pickles.

When making teas, instead of the usual spoonful for the tea pot, add a lump of sugar. The tea will be just as strong.

If the layer cake insists on sliding when you are putting it together put two skewers through the layers to hold them together.

Milk or milk foods will not scorch in the cooking if stewpan is rinsed in cold water and rubbed with a little fresh butter or lard.

When beating eggs with a dover egg beater try holding the beater at an angle in the bowl. The work will be accomplished much quicker.

If you wish to have mashed potatoes in a hurry, cut the potatoes in small pieces before boiling them. They will cook much more quickly.

By cleaning one room thoroughly each month the house will be kept in good shape and that terrible task of house-cleaning twice a year avoided.

Before using cabbage, cauliflower or lettuce the heads should be turned down in salted water. This will cause any form of animal life to crawl out.

Cream cheese mixed with chopped celery and olives, formed into balls, rolled in chopped nuts and served on lettuce leaves with French dressing, is a very good salad,

Very frequently when separating the whites from the yolks of eggs the yolk becomes broken and falls into the white. Dip a cloth in warm water, wring it dry and touch the yolk with a corner of it and the yolk will adhere to the cloth and may easily be removed.

Before using tea, spread it on a sheet of brown paper and place in a warm—not hot—oven for ten or fifteen minutes. The tea will go much farther and the flavor will be improved. By this method there is a saving of a quarter of a pound on every pound of tea.

If beds received more attention there would be less of that "tired feeling in the morning. The bed ought to be the most hygienic piece of furniture in the house. It should be well aired and never dressed immediately after the occupant leaves it. And when it is being aired the windows should be wide open. Regardless of the condition of your couch, however, if you sleep in a stuffy room you are bound to pay the penalty. When you open the windows wide and sleep in an hygienic and properly equipped bed, you can depend upon nature to do her part in assisting upon nature to do her part in assisting you to recuperate and gain strength.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON
OCTOBER 15.

Lesson III.—The Appeal to Cesar—Acts 25. Golden Text—Matt. 10. 25.

Verse 1. Porcius Festus was a great improvement on Felix, but he died after two years. The province—Loosely so called, for Judea was only a department of the province Syria. After three days—Here and in verse 6 we have the impression of a conscientious administrator, accustomed to act promptly.

3. Asking a favor—Compare verses 11 and 16, which similarly lay stress on the fact that to change the venue of the trial of Roman citizen was a considerable concession. Festus was not unnaturally wishful to grand it. To a new governor it was reasonably enough a consideration to conciliate the men he had come to govern. But his intellectual sense of justice made that depend entirely on the prisoner's consent.

4. Festus describes in verses 16, 16 his view of the Jews' request. It appears that informed (verse 2) included an audacious request that Festus would pronounce sentence; they would urge that Felix would not have left him in custody without grave reason. Probably the request to have him tried in Jerusalem—where evidence would be easily secured—was the Jews' alternative request, after the first had been refused. But the audacity of the former demand had put Festus on his guard.

5. Them that are of power—Men of position whom the rest would intrust with their case. Anything amiss—The word used in the crucified brigand's declaration about Jesus (Luke 23. 41). In earlier Greek it meant "strange, out of place," but it was now ordinary vernacular for "Wrong."

7. Charge—The nature of which may be inferred from verse 6, which is a list of headings in Paul's speech in his own defense.

9. To gain—Literally, "to deposit," as one does in a bank; the same statement is made of Felix in Acts 24. 27. Before me—Naturally implying "in my court." But verse 20 distinctly suggests that Festus meant the experts to conduct the trial in his presence, so that it would virtually mean trial by the Sanhedrin. Festus thought that by leaving it in their hands he would be better able to find out whether anything in Paul's conduct had brought him within the range of Roman criminal law. He was not yet prepared to acquit him, since he saw the strength and unanimity of Jewish feeling against him. He was bound to sift this, if only because it was evidently a danger to the public peace, however innocent Paul might be.

10. Paul knew the dangers of the road, and knew that the serious matter than Festus suspected. But his determination to complete the emancipation of the Faith from Jewish control. The civil court will give him—even with Nero presiding—a fairer trial than the Sanhedrin, and he wants his liberty, if God will, so that he may go on with his preaching. One who can write as he does in Rom. 13 of the government, who acknowledge no more the right of the Jewish rulers to a voice in matters of religion which the Romans had always excluded from their courts, he determined to take the great issue to the highest court of all; it would give him the supreme opportunity of his life, even if he were condemned. It should be added that he was now clearly a money man—presumably by the death of his father; and he had determined to use his money for this visit to Rome, so often eagerly anticipated; without money the appeal, in theory allowed to every citizen, was impossible. All this, of course, was determined by the vision of the Lord himself in Acts 23. 11. Very well knowest—The word is not that which implies information—it is to the clear-sightedness of Festus he appeals.

11, I refuse not—See the paraphrase adopting the formula an English judge uses when a prisoner has been found guilty of murder. "Refuse" in our modern use is incongruous. Grant me by favor (margin)—See note on verse 9, and the paraphrase.

12. Council—His personal retinue (cohors in Latin) who acted as assessors. Festus might perhaps have offered Paul an acquittal at once, and his difficulty was that which he expresses in verse 27. On his assessors' advice, he decides to accept the shifting of responsibility. After definitely allowing the appeal a sound in law, he would no longer pronounce a verdict of acquittal (Acts 26. 32).

A LUMBER OR METAL CLAD BARN—WHICH?

A Helpful Discussion of a Very Important Subject.

By A. A. GILMORE, A.S.A.E.

When a farmer decides to erect a new barn, he naturally wants prices on the different materials that will be used in the building. The local lumbermen quote him a price of $25.00 per thousand on a pretty good grade of lumber. Then he goes to the hardware man or his builder, and wants to get prices on metal roofing and possibly siding, and is quoted a price of $5.50 or $6.00 per square. Very likely the intention is to erect a frame of wood, possibly plank construction, and cover the roof with metal, and the sides as well, if the cost is not too high, but Mr. Farmer considers these prices carefully all the way home, and finally comes to the conclusion that the lumber figures out about 2½c. per foot, and the metal 5½ or 6c. per foot, or more than twice as much as the wood. It certainly looks like it, but—

Let us take two barns, size 36' wide, 56' long, side wall 16' high, having gambrel roof, and compare them. We will consider the frame to be built of plank construction in both cases, one barn to be covered completely with lumber, and the other covered on the walls and roof with metal.

The lumber in the frame in either case will cost $500.00, and the following is a short list of the materials required in a metal clad barn:

Frame, including floors, etc.	$ 500.00
3737 s. f. 28 ga. Galv. Corr. Iron, walls @ $5.50 per square	205.53
3619 s. f. 28 ga. Galv. Corr. Iron, roof, @ $6.00 per square	217.14
58 lin ft. Ridge, @ .13	8.44
316 " Hip, @ .13	13.92
112 " Eave Starter, @ .07	8.12
116 " Gable Cornice, @ .11	12.76
112 " End Cornice, @ .15	16.68
50 lbs. 1½" Galv. Nails, @ .09	4.50
54 lbs. 1¾" Galv. Nails, @ .09	4.86
18 lbs. Lead Washers @ .15	2.70
2 Barn Vents @ $5.55	11.10
2 Gable Windows @ $4.00	8.00
1 Roof Window	6.00
Lightning Conductors	8.00
Total Metal work	$526.75
Hardware for doors, etc.	526.75
Nails for frame and floors	30.00
Erection of wood and metal work	30.00
	196.00
Total	$1283.75

The above are actual figures used by contractors when tendering on farm barns, and while the prices of metal may have advanced a little since this estimate was made, the difference is not great in a barn of this size.

Following is list of material required for complete lumber clad barn:

Frame and floors	$ 500.00
3,600 s. f. walls covering @ $25.00 per M	90.00
Roof Sheeting (required in addition to the 1x6 strips on 2" centres on which the corr. iron is secured) 2,400 s. f. @ $25.00 per M.	60.00
27,000 Wood Shingles @ $4.00	108.00
1 Dormer Window on roof	10.00
2 Gable-end Windows @ $2.00	4.00
2 Wooden Vents @ $7.00	14.00
Lightning connections, with points, etc.	25.00
Nails for complete barn	35.00
Hardware for Doors, etc.	30.00
Erection	250.00
	627.00
Total	$1127.00

According to the Valuators Tables of the Insurance Companies the depreciation on a metal clad building is never greater than 1¼% per annum, while on a wooden building it is not less than 1½%. The total cost of the metal clad barn is $1,283.75, which at 1¼% amounts to $16.05 per year. It would be eighty years before the complete cost was expended in repairs.

Now look at the wooden clad barn. The price is $1,127.00 and the depreciation is 1½%, so that the wear and tear would amount to $28.20 per year. This building will last almost forty years before the complete cost has been expended in repairs. It has only half the lifetime of the metal clad building, yet the total difference between the two, completely erected, is only $156.75. It is apparent that the cost of repairs on a wooden building would offset in a few years the extra initial cost of a metal clad barn, and when the fire and lightning-proof qualities, the better appearance and low insurance rate on the latter is considered the choice should be an easy one for Mr. Farmer.

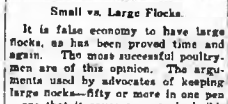
Our Anglo-Saxon forefathers, after the marriage ceremony, used to crown the bridal couple with garlands of flowers kept for that purpose in the church.

Odd.

If about debt you think a bit
This paradox you'll find,
The faster you run into it
The more you get behind.

The AUTOMOBILE

The Storage Battery.



The average owner of a car looks upon a storage battery with fear and trembling, not because there is anything imposing about it, but rather because the dark, heavy receptacle seems to be filled with mystery. There is just one thing to remember about any storage battery, that is to care for it constantly and tenderly. When you see that it is not holding up, you should take immediate action as any delay is extremely dangerous and inconvenient. A number of situations can arise which will affect the efficiency of the battery. Sometimes cars are shipped from the factory and remain in transit for many days, and upon their arrival at their destination the dealer or owner does not immediately recharge them. Sometimes, too, new machines are allowed to remain on the showroom floor and are constantly tampered with by prospective customers, so that the battery runs down before it is given any attention. Of course, it is possible for the generator to be out of order, and it is also very easy for bra eak or ground in the circuit to prevent a surplus current from recharging the battery. Perhaps, also, neglect has more to do in the development of a weak battery than any other cause. Physicians, veterinary surgeons and other professional men who do a great deal of night driving, must realize that a battery is called upon for tremendious energy to keep the lights, the ignition and starter in constant running order. We know of many farmers who have purchased a car in the busy season, and, after working all day in the fields, have taken it out for long rides at night. The extra energy required for the lights is a constant drag upon the battery, and if the agriculturist does not speed his car up at frequent intervals, and continues to run it only after dark, he will find the battery losing its "pep" slowly and surely. Neglect also contributes to a weakening condition when the owner fails to refill the battery on the first and fifteenth of each month with distilled water. In most care you will find a plate upon which is engraved complete instructions, and a warning not to forget that the battery needs distilled water.

When you find that your battery is not giving maximum service, do not take it to an inexperienced individual for tampering purposes, but rather have some expert charge it. The latter will revivify it gradually, so that the heat will never be above 100 degrees Fahrenheit. A hydrometer syringe is called into use, and as long as the gravity keeps rising the electricity must be allowed to go into the battery in order that its highest power may be attained. A quick charge slips away quickly; a long, low charge passes out the way it enters. Perhaps we have gone too far in this article without explaining that a battery is not a mechanical proposition, but an electro-chemical one. Electrolyte is the substance used, and this name is a trade term, meaning no more nor less than an acid solution. When you place your hydrometer syringe in the cells, it should read between 1,275 to 1,300 in each one, and when the indicator shows 1,250 or less, it is high time to become concerned.

When you are handling a set of gears, you can keep them so well oiled that their life is prolonged indefinitely. You cannot lubricate a battery, however, because, as we have already stated, it is electro chemical. Nothing can be done towards drawing out its life that is normally done where steel and iron are concerned. Hence, a battery's life is shorter than that of a mineral mechanism. We make this point clear, because when your battery fails you are rendered helpless on the road. You may be able to travel an enormous mileage and never do much to the battery, but some day it will stop suddenly, just as an overworked horse drops dead, and you will find that a large expenditure is required where a small one, paid out at the proper time, would have saved many dollars and much trouble.

The company's guarantee that goes with the battery is not a whit different from a warranty of any other kind. Abuse is not included. There are cases where batteries have been turned out with defects and have proved inefficient, and in such instances the makers have never failed to provide proper replacements. In most cases, however, the trouble has been entirely due to neglect, and so the owner has had no recourse from the manufacturer. You must regard your battery in just the same light as you consider a tire. When the latter is pounded over the road, under inflated, left out in the hot sun, or skidded, damage is bound to result, and an adjustment from the rubber company cannot be demanded reasonably. So it is with a battery. If you fail to constantly provide distilled water, leave your ignition switch open a long time before the starting pedal is pushed down, allow visitors to put the lights on and off, leave the car stanging for many hours with lights burning and the motor running slowly, you will take out of the life of the battery the force that sooner or later you will require in an emergency. Do you make the excuse that there is anything difficult about a battery. A child can provide it with all the care it requires, and do not say that you cannot get distilled water, for all druggists keep it in stock constantly, and should you find it impossible to procure a supply at any point, all that it is necessary to do is to leave some sort of earthen vessel out in the open air where it can gather rain water that is free from any metallic contamination.—Auto in Farmer's Advocate.

POULTRY

Small vs. Large Flocks.

It is false economy to have large flocks, as has been proved time and again. The most successful poultrymen are of this opinion. The arguments used by advocates of keeping large flocks—fifty or more in one pen—are that it saves expense in building; it saves labor in feeding and watering, and it saves time.

Grant that there will be less building required, and that time and labor will be saved, there are still many arguments in favor of small flocks of not more than twenty-five head in a pen. Some of these are: There will be no crowding and fighting on the roost at night; more exercise will be taken than when the fowls are compelled to remain indoors; fewer vices, such as feather-pulling, egg-eating, and bleeding the male bird's comb, will develop; more eggs of better fertility will be secured, and there will be better general health throughout the flock. Are not such considerations worth more than the expense of extra lumber, extra labor, extra time?

If there is anything wrong with the hens, or an accident, it will be more readily noticed in a small flock than in a large one. In small flocks there is a better chance to see that all the fowls get a proper share of the feed. There are fewer "bullies" to drive away the more timid hens.

Overcrowded flocks are not the active, energetic ones that are needed to make profitable egg production. Besides, there cannot be the proper fertility on farms where there are large, common flocks and two or more males are allowed with the hens at the same time. Even if these males do not quarrel, they are always interfering with one another's attention to the females. This is not only interfering with fertility, but is injurious to the hens.

But the greatest consideration is that of health. It is a noteworthy fact that the bulk of inquiries that come to us requesting remedies for roup, cholera, and other ailments come from farms upon which it is the custom to have large flocks. At night these birds are crowded on the roosts and they become heated. The next morning they fly from their roosts and go out to face a temperature many degrees colder than they experienced during the night. The result is injured health, with the development of the diseases mentioned. For successful work, more than twenty-five fowls should never be allowed in one flock, and the nearer the number is kept to fifteen the better will be the returns. —Michael K. Boyer in Farm and Dairy.

WOUNDS AND INFECTION.

Germs Numerous in Long Cultivated Soil.

The professional healer, like the professional fighter, has found that many of the things he learns in South Africa he has had to unlearn in Flanders. Wounds seldom proved troublesome in the Boer War, because the South African veldt was almost virgin; but in Belgium and France, where the land has been cultivated for centuries, the gentle germ is always ready to enter the smallest wound and bring about tetanus and other diseases. At first the surgeons were in despair, fearing that our much-vaunted antiseptics were of no avail.

It requires long search and experiment before methods of overcoming new difficulties could be discovered. Then, owing to the lavish use of high explosive shells, wounds are more complicated and more difficult to keep clean, while the pointed bullet works more harm than the blunt one of the "good old days." Plenty of fresh air is found to work marvels, so there is at least one hospital where the patients live practically in the open. It has also been found that wounds remain clean if water continually flows over them, so the clever surgeon has constructed little baths which fit over the wound, a supply of warm water impregnated with oxygen continually flowing through.

All He Can Attend To.

Uncle—And what does your young man do for a living.

Niece—Why, uncle, you can't expect Jack to do anything for a living while we're engaged.

Sometimes a man avoids a lot of worry by having a poor memory.

ELORA ROAD NORTH

Mrs J S Campbell is visiting her mother at Chippewa Hill.

Mr Jake Cole of Paisley has been working for Mr John Brown.

Mr Neil McArthur is busy making a cement tank.

Mr John McDougall has been repairing and painting his house.

Mr and Mrs Clarence Fraser and Mr and Mrs John Walker motored over to Tara show.

Mr Harry McTavish was in Toronto with cattle last week.

Miss Lillie McDougall spent last week with friends in Bruce.

Mr and Mrs Fred Farrow, of Parkhead, formerly residents here, called on their old friends last week.

Mr and Mrs Winch and family motored to Owen Sound on Saturday.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

GLAMIS

Mr Albert Pickard and family, of Wiarton, spent a couple of days at the Misses Howson's.

Mrs J K McLennan and Miss Lizzie Campbell spent the week-end with friends in Ashfield.

Mr Wm Cunningham, who was visiting his brothers, left on Saturday for his home in Alliston.

Mr and Mrs Peacock and family and Miss Wilson, of Meaford, motored up and spent Thanksgiving with Mrs Peacock's parents, Mr and Mrs Neil McFarlane.

Private Mack McKinnon is home on last leave, before going overseas.

About fourteen of the young people of the Baptist church motored over to Wingham on Monday to attend the B Y P U rally.

Mrs Dougald Gilchrist, of Detroit, spent a few days with her parents, Mr and Mrs McLeod, on the 2nd.

Mr and Mrs Norman McLeod, of Niagara, spent a few days at the home of the latter's father, Mr Jas Downing.

Pte Clyde McKeeman is spending a few days at his home here.

Mrs John Denham is visiting friends in Detroit.

Miss Dorothy Burghes came down to spend the winter with her grandparents, Mr and Mrs Jos Cunningham.

Miss Mary Webb is spending Thanksgiving holidays with her parents, Mr and Mrs Geo Webb.

Mr Henry Pocock and Mrs Barnes, of London, spent Sunday with the latter's parents, Mr and Mrs Steve Stevenson.

Mr and Mrs Webb, of Wingham, spent Sunday at Mr Kirkham's.

Miss Minnie McLennan is spending a few days with friends in Detroit.

Mrs Gilchrist, of the 2nd, is visiting at her son Dougald's, in Detroit.

EDEN GROVE

The next holiday will be Christmas, so let us settle down to work for a couple of months.

The Misses Scanlon, of Walkerton, called on friends in the Grove on Thanksgiving Day.

Pte Dan Desmond, of the 118th, is spending a few days at his home here.

The ladies of the Red Cross Society held a progressive euchre party and social evening in the Masonic Hall on Tuesday, when a pleasant few hours were enjoyed and a nice little sum netted for the Red Cross.

Pte Ed Bailey, of the 160th, was home over the week end.

Mr and Mrs Willoughby were the guests of Mr and Mrs A McKeeman last week.

Rev Mr Creighton, of Paisley, will preach the anniversary services in the Methodist church here next Sunday at 11 a m and 7 p m.

Miss Frances Seiler, of Walkerton, enjoyed the week end at her home in town.

The shooting match on Monday was a decided success.

Mr and Mrs Pearson and son motored to Hildmay on Sunday and spent the week end with friends in that town.

Mrs D J Connor, of Walkerton, was a Thanksgiving visitor with friends in the Grove.

Mrs Pearson, Mrs Todd and Miss L Watson represented "Quality Hill" at the banquet at Cargill Friday evening

Mr and Miss Emery and Miss Powell enjoyed Saturday the guests of Mr and Mrs R Perdue.

Mrs R Gregg and daughter, of Paisley, were visitors in town on Monday.

Mr and Mrs Robt Perdue motored to Clifford on Sunday in their new Overland and spent the day with friends.

Now is the time to fatten up the pumpkins for Hallowe'en.

Mr and Mrs Harry Fair and Mr Harry Fair, of Palmerston, are spending a few days at the home of Mr and Mrs Fair, King St.

Miss Thompson, of Walkerton, is the guest of her cousin, Miss Lily Alexander, this week.

Children Cry

FOR FLETCHER'S

CASTORIA

CANTIRE

Threshing has been finished in this section and with the exception of roots all the field crops have been garnered in. Farmers find that they have less grain in the granary than they had on the 1st of March. The corn crop, too, has been short, and only for the bumper hay crop the problem of wintering stock would be a serious one. However, prices have been good, and taking it altogether we have great reason to be thankful.

A number from here took in the school fair at Vesta, and report a good crowd and a keen interest taken by exhibitors. John McIntyre, son of Mr and Mrs John McIntyre, carried off the red ticket for oratory, his subject being "Pioneers of Bruce." This is the third time this honor has come to our school. Perhaps the time will come when some statesman will claim Cantire as his birthplace.

A number from here drove over to Chesley on Saturday last to join in the farewell to the soldier boys who leave shortly for overseas. They report almost as big a crowd as on fair day. Corporal Enos, who was home on a visit, waited over till Monday. The report is that the 160th will go straight to France, although they will not go on active service, but will train there for some time.

Rally Day was observed in Cantire S S on Sept 24th. There were fifty present, and the collection for missions was $5 34.

Mrs J A Hamilton, who has spent the past two months with her sister, Mrs Angus Bell, returned to her home in Sault Ste Marie last week.

Mr and Mrs J A McIntyre, Mr and Mrs Pete MacAllister took in Tara show and report it a splendid exhibition, especially horses.

Miss Erma Foster, 2nd Hld. Miss Lois Spencer, Miss Myrtle Pringle and Mr Cruickshank of Parkhead, were guests of Miss Sara Enos last week.

Mrs Chappel, who has been visiting her daughter, Mrs Alex Gowanlock, returned to her home in Saugeen on Saturday.

Mr and Mrs Neil Reid are visiting friends in Turnberry.

PINKERTON

Ptes Gordon Garland, Gordon Pinkerton, Edgar Campbell and Wm Bell, of the 160th, returned home for their last leave on Tuesday, and returned to London camp on Saturday and Monday. We wish the boys the best of luck and a safe return.

Miss Mary McKee, of Stratford, spent Sunday and Monday with her mother, Mrs A C McKee.

Mrs R Trotter, of Toronto, renewed acquaintances here last week.

Mr T Pinkerton, of Toronto, is visiting his sister, Miss Lena Pinkerton.

A small party was held at the home of Mr J Wilson on Monday evening and all report a good time.

A ball under the auspices of some Chapelowe youths was held in the hall on Wednesday night last.

The annual meeting of the Pinkerton Red Cross was held on Sept 28th. All the officers were re-elected. The total amount of money received during the past year was $481 68, amount paid out $351 65, balance on hand $130 03. Lunch was served at the close of the meeting. The Red Cross Society gave a banquet for the soldier boys on Oct 6th. A short programme was given and at the close each soldier was presented with $5 from the men of the village and the Red Cross presented them with a pair of socks.

ELDERSLIE COUNCIL

Paint Has Two Duties to Perform

One is to protect—the other to beautify. Paint that doesn't do both is not good enough for your buildings.

Lowe Brothers HIGH STANDARD LIQUID PAINT

both protects and beautifies—and has many distinct advantages over hand-mixed and cheap paints. It covers more surface—and does it more thoroughly; it is easy to apply, enabling your painter to do the work in less time; it wears from two to three years longer than ordinary paint and holds its color well; it fails only by gradual wear and leaves a good surface for repainting.

"High Standard" saves repairs and makes your buildings worth more. You'll get best results with this good paint. Ask for color card.

HELP FOR WORKING WOMEN

Some Have to Keep on Until They Almost Drop. How Mrs. Conley Got Help.

Here is a letter from a woman who had to work, but was too weak and suffered too much to continue. How she regained health:—

Frankfort, Ky.—"I suffered so much with female weakness that I could not

do my own work, had to hire it done. I heard so much about Lydia E. Pinkham's Vegetable Compound that I tried it. I took three bottles and I found it to be all you claim. Now I feel as well as ever I did and am able to do all my own work again. I recommend it to any woman suffering from female weakness. You may publish my letter if you wish."—Mrs. JAMES CONLEY, 816 St. Clair St., Frankfort, Ky.

No woman suffering from any form of female trouble should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice,—it will be confidential.

I. S. CRUICKSHANK

160th Left London on Saturday

The Bruce Battalion was given a good send-off on Saturday when it left London for other training quarters. It is predicted that this unit will form part of the new 5th Division which is being organized for service at the front. That it will be a credit to Canada and to its native county is a foregone conclusion, says the London Advertiser. The battalion left in full strength, with the following officers: Lieut-Col Adam Weir, officer commanding; Major A McL Moffat, second in command; Capt R B Whitehead, adjutant; Capt & H Veitch, medical officer; Capt F Shaw, paymaster; Major A W McNally, "A" Company; Major H M Chadwick, "B" Company; Capt J C Little, "C" Company; Capt H Dannard, Capt A P Todd, Capt Logie Foster, Capt W L McKay, Lieuts H R Henderson, D D McLeod, R D Cameron, H Parker, R C Rowland, J A Crouin, M J Aitken, V A McKechnie, H B Krug, J A McDonald, E Pettigrew, H Oliver, D W Stewart, J H Zinn, F C James, H C Hatcourt, A M Chaler, R T Seifert and H B Johns.

—Mr and Mrs Robt Barclay, of Hamilton, were up visiting his mother, Mrs A Ross, at Thanksgiving.

—Your financial help is needed for the British Red Cross. Everyone can give more or less of their money towards the alleviation of suffering fellow-beings who are fighting your battles and ours today in Europe. Don't think of excusing yourself in any way. Give! Give!! Give!!! Your contribution will be called for on Thursday. Have it ready.

—For the first time since taking up housekeeping in Paisley, Mr and Mrs David Bell with their daughter Hilda closed up their home recently and went on a visit to friends in Toronto, Niagara Falls and La Salle, N. Y. At the latter place they had the pleasure of attending the State Carnival, where their son Mr R C Bell, won a string of first prizes for Indian game fowl he exhibited. These birds were bred from Mr D Bell's flock here.

Died in the West

Mrs John S Moffatt, who was formerly Miss Catherine McTavish, of Paisley, died at her home at Pilot Mound, Man, on Oct 1st, aged 58 years and 8 months. The deceased is survived by her husband, two sons and two daughters.

Death of R. Y. McFadyen

Announcement of the death of Mr R Y McFadyen, formerly of Glamis, which occurred at his home in Toronto on Monday, will be read with regret by his many friends in this section. The remains will be brought to day (Wednesday) for interment in Purdy's cemetery.

W. M. S. Thank Offering

The annual thank offering meeting of Knox church Women's Missionary Society on Thursday last was more largely attended than usual, a good number of ladies from other churches being present. An excellent address was given by Mrs (Rev) Mason, of Harriston. The thank offering received amounted to over $65.

For a Missionary in Japan

—The proceeds of the Thanksgiving entertainment held in the Methodist church on Wednesday evening last will go towards supporting Rev C P Holmes as a missionary in Japan. The Paisley Epworth League is one of a number of branches of this organization that have undertaking to provide the money required. As the attendance on Wednesday night filled the church nicely, the sum realized would help considerably. The programme was replete with good numbers and rendered almost wholly as advertised.

Cement, Lime, Lath, Shingles, Glazed Sewer Pipe and Flue Lining, Mortar Color, etc.

¶ The man who does not advertise, because it costs money, should quit paying salary for the same reason.

The price of everything is getting to a dizzy height, but still the world keeps buying them and Mr. Manufacturer keeps putting on the price. It seems that every time they make a sale over there they put up the price another notch, and when this process is going to end we haven't any idea. In the meantime we are offering for a few days the following:

Furnishings

NEGLIGEE SHIRTS, regular $1.50, special 89c
DRILL-WORK SHIRTS, regular $1.00..... 69c
HEAVY WOOL TOP SHIRTS, reg. $1.75 $1.09
NEW FANCY TIES, regular $1.50..... 99c
" " " $1.25..... 79c

OVERALLS, ODD PANTS and SMOCKS, at big reductions.

Clothing

MEN'S SUITS—Heavy Brown and Grey Tweeds, all sizes, for young and old, guaranteed to fit in every way and wear as well as any tailor-made. Regular $18.50 and $20, this week only, for..... $12.00

MEN'S BEST BLUE INDIGO—3 Piece, best that money could buy, better quality in them than many tailor-mades of to-day. Regular $22, $24 and $25, special..... $15.00

OVERCOATS—Bring your boys to us. We'll send them away warmly clad and smiling. Lines too numerous to mention. See them, boys. Men, we have the same to offer you, and the price is the kind that fits your pocket book.

Something that boys and girls will hear from now on—"John, put your rubbers on. Mary, where are yours?" will be the cry of the careful mother from now on. We have them, boys and girls, and they are good ones. Good, heavy Rubbers, rolled edges, at a cut price. Old stock, but they are far superior to the new stock that is being shown to-day.

RUBBERS—Rubbers are the thing of the day. Protect yourself from the mud, rain and sloppy weather. We have them in Ladies', Boys' and Men's.

Our bargain counters are all "dolled" up with great bargains—many that will catch the eye of the bargain-hunters. The thrifty buyers will come and see these specials, if they are in need of any Flannelette, Bleached and Unbleached Cotton, Pillow Cotton, Shirting, Prints, Ginghams and various others too numerous to mention. Glad to show these lines, because we are proud to be able to show and offer such values at the prices you will see on them.

Watch This Space Next Week!

BUTTER, 36c. EGGS, 38c.

Market unsteady, and these prices are liable to change at any time. Use the 'phone. We have them both.

About the House

Useful Hints and General Information for the Busy Housewife

Canning and Preserving Meat.

Canned meats are a great convenience and luxury, not only as an extra dish for the family, but when company arrives unexpectedly, or work hands are needed at a time when the housekeeper has an unusually hard day's work to accomplish and finds the larder rather low. Especially is this true in the country where a trip to town for the purpose of obtaining meat is sometimes impossible.

At butchering time one often tires of seeing so much fresh meat about, that if there is not some forethought some of the canning, etc., may be neglected, but every scrap of meat available should be carefully prepared and saved, for it proves very appetising and saves butcher's bills.

Spare Ribs, either fried or roasted and canned in tin cans or tin molasses pails, are excellent, and when carefully prepared will keep as fresh and sweet as when first cooked, until midsummer and fall. The work of roasting them is easily and quickly done. With a sharp ax cut the ribs in the center, or saw them with the meat saw, if one is handy, then cut in pieces of a convenient size to place in cans; put the ribs thus prepared in a roasting pan, season with pepper and salt as for the table, add a little water and roast till tender and there is no water left in the fryings; then pack the pieces closely together as possible in the cans, add fryings to cover well and seal. If there is not enough fryings to cover the meat a little, nice lard may be used. This is not wanted as it keeps sweet and good and all can be used when the meat is opened. We think it excellent for frying potatoes and bread.

Sausage may be canned in the same way, frying or roasting till just done and free from water, or it may be packed in jars and covered with fryings, covering it to a depth of two inches. Prefer to put it in small jars, and use lard for the last covering. When putting the fryings over the meat do not fill quite enough to cover, put on a light weight to hold meat closely and the next day melt the lard and cover.

Fresh pork is very nice preserved in this way. The lard must be deep enough to render the meat airtight, and it will keep for months. When the meat is wanted remove lard, take out enough for one or two meals, and replace the lard, spreading it firmly. Keep the meat tied up tightly with several thicknesses of paper in a cool, dry place. These meats are greatly relished by the working men who require something substantial.

Fried beef may be kept a long time. Grind very fine, season with salt and pepper, make into pats like sausage or stuff in cases and fry or roast and can, or put in a jar like sausage. It sometimes happens the weather becomes too warm to keep the beef fresh, and the fried beef pats are a pleasing change from corned beef.

Potted liver may be kept some time during cold weather and is nice for sandwich filling. Pour boiling water over the liver and let it stand till cool to draw out the blood, drain, add hot water, salt, pepper and herbs to flavor, and boil until tender; add to the liver two tablespoons of butter, and an onion (if the flavor is liked) to each pound of liver, chopping the onion and frying it in butter and grind all together in a fine paste. Boil the broth in which it was cooked down to about a teacup, add it to the meat, and add the juice of one lemon for each pound of liver used. Pack firmly in small jars and cover well with melted lard. Slice cold when needed.

Souse is a dish much relished and may be made of waste bits of meat such as the lean from the jaws, the ears, feet, ears, or heart and tongue. Simmer the meat in weak salt water till very tender, drain from the liquor, remove all bones, peel the tongues, pack in glass cans, cover with boiling vinegar that has been weakened and spiced or flavored to taste, seal air-tight. This is nice to use during the spring.

When not relished prepared in other ways, the bits of meat from the heads can be made up into mince meat and canned while hot for use when needed as it will keep nicely until midsummer.

Home-Made Relishes.

Catsups and similar relishes may be prepared at home at a much lower price than you pay for them in the stores. They are easy to make, and are wholesome. Catsup should be cooked in an enamelware kettle or a porcelain-lined receptacle, because the copper vessels are not reliable. The effect of slowly boiling vinegar in a copper kettle is likely to be injurious, if not actually poisonous.

Jars and glasses containing canned fruits, such as jellies, jams, preserves and conserves, should be quite spotless on the outside. Inspect these jars regularly so as to be sure that none of the contents are fermented or soured. These processes cause a running over and leakage which make the shelves very sticky and unpleasant. It also attracts ants and other insects.

When you find that your preserves are beginning to show signs of fermentation, it can be stopped sometimes by opening the affected jars in a kettle and boiling them over again. They may not be so perfect as to color and taste afterward, but they will not be really spoiled. There is no harm in really trying this, anyway.

To Light a Fire Quickly.

While we do not approve of the dangerous and all too common practice of lighting fires with kerosene, in any manner, those who are in the habit of doing so, may make the operation much safer by pouring a half-pint of the kerosene into a quart can. Just before retiring for the night, and standing three or four corn-cobs on end in it. The next morning they will have absorbed much of the oil, and may be placed in the stove, underneath other fuel.

Close the stove and touch a lighted match to the saturated cobs, and a good blaze will be started up at once, without the danger attending the usual way—that of pouring oil all over the wood, or lighting the small wood, then pouring the kerosene on the blaze; either of which is extremely dangerous.

Household Hints.

Scald new brooms in hot suds to toughen the fibre.

A little vinegar will soften the roughest of hands.

To remove iodine stains on clothing sponge freely with ammonia.

White enamel paint will cover a multitude of sins at small expense.

Add a minced sweet pepper to the potato salad. It gives a good flavor.

Celery roots, boiled, cooled and cut into dice, make a very acceptable salad.

The only way to keep food hot after it is dished up is to have metal dish covers.

Olive oil is exceedingly nourishing and healthful, and children should be coaxed to like it.

If washing powders are used in the washing of linen, it will go to pieces in no time.

Salt meat is not so nourishing as fresh meat and should not form a large part of the diet.

If your thread insists in knotting, unthread your needle and thread it from the other side.

A teaspoonful of baking powder to every four eggs will make an omelet of wondrous lightness.

When making cornmeal mush do not thicken it too much or it will be harsh and hard to eat.

Save all materials left over from meals; they will make side dishes to help out with the lunch.

Save the scraps of fat meat and bones; they will be handy to quicken a slow fire in the morning.

Never waste the drippings or meat essence in the frying-pan—it will make a savory brown or creamed gravy.

A teaspoonful of powdered borax added to the water in which clothes are rinsed will be found to whiten them considerably.

There is poor economy in buying cheap blankets; an all-wool blanket not only outwears the cheaper one, but is much warmer.

When cream doesn't "whip," stand it where it will get very cold, then add to it the whole of an egg, and beat them together thoroughly.

Suppose you have made your gravy, soup, or stock too salty, stir in a little caster sugar. A grated raw potato will disguise a salty taste in soup.

Prevent the after odor from cleaning with gasoline by using one-third vinegar. This will prevent a circle from forming around the place cleaned.

Vegetables that contain little starch such as onions, carrots, turnips, tomatoes and cabbages, can be eaten by stout people without fear of gaining flesh.

In mixing any pudding made with batter, you may add too much liquid if you are in a hurry. If your batter is too thin thicken it with white breadcrumbs.

A good way to serve the left-over chicken is to make a biscuit crust, the same as for old-fashioned short-cake. Spread the chicken between and pour gravy on the whole.

The steel rod from an old umbrella or parasol will make an excellent plant supporter next summer, and if painted green will look well. The ribs, too, may be brought into use for a similar service.

To make flaky piecrust fry out three pounds of pure lard and two pounds of cold suet; strain and mix together. This makes very nice, rich piecrust and is very much healthier and cheaper than clear lard.

When you turn out a very light boiled pudding it is apt to break. Don't send it to the table like this, but coat it with meringue made from the white of an egg beaten stiff with an ounce of caster sugar. Put it into the oven long enough to brown the meringue lightly, then decorate with glace cherries or angelica stripe.

Rust stains, no matter how bad, can be easily removed by putting vinegar and salt on the stain and placing it in the warm sunshine. Repeat this until the stain is removed. The vinegar and salt (together) are very active and will remove the stain more quickly than lemon and salt.

Take a spool and place on the material to be marked and with a lead pencil mark half way around the spool. Then lower the spool a little to form the scallop and mark half way around again. Continue in this way until you finish marking your material. Any size scallop can be made by using larger or smaller spools.

No matter how careful you may be when cooking, it isn't always easy to prevent things going wrong. But housekeepers sometimes set a spoiled dish aside as "wasted," or eat it in its unpalatable form, when the trouble might be remedied if they knew what to do. Suppose your boiled custard curdles, for instance, try putting it in a very cold basin, and beating it briskly. Another plan is to add a teaspoonful of cornflour, mixed to a paste with water. Cook this for a few minutes, then strain the thickened custard into a glass dish.

COME ON OR COME OUT!

This is the allied soldiers' cry, spoken or not, to the Germans in their vast system of dug-outs. How it is answered may be partly judged by the fact that since the allied offensive started in July nearly 60,000 German prisoners have been taken.—Drawn by Louis Raemakers in London Daily Mail.

FACTS ABOUT THE WEATHER.

By Chas. M. Bice, Denver, Colorado.

The winds are the chief factors in weather, but they change so unexpectedly that prognosticating the weather is very difficult.

Weather signs are numerous and many of them still remain a mystery, but enough have been deciphered to render forecasting tolerably certain for at least 48 hours.

We have rain when there is cause for it; and the wind blows this way and that, for well ascertained reasons. Air pressure determines the winds and winds are the potentials of storms. Barometric pressure of the air simply means that this instrument records its relative density, or weight, it having been proven by experiment that when air is heated it expands, or becomes lighter, for the same volume, and it becomes heavier as it cools.

Air is always flowing from regions of high pressure to those of lower, hence the winds.

A weather map for the country shows the high and low pressures by heavy black lines, and all the places having the same air pressure are shown by these heavy lines running through them and the figures close to the lines indicate the extent of the pressure.

These heavy lines are called Isobars meaning equal weight or pressure. In the U.S. and, I suppose, similarly in Canada, each morning at 8 o'clock, Washington time, at every weather station in the country, the barometer is read and the result sent to Washington by telegraph, where the readings are placed on a skeleton map of the country, each at the location of the city from which it is telegraphed, and lines are then drawn through the places having the same pressure. From these it is easy to see where the high and low pressure centres are located. Such a map generally shows several such areas. Observing these maps day by day will show changes in location of the high and low pressures. It moves eastward across the country at several hundred miles, a day, and often many of them are on their way at the same time. Experience has shown that the "lows" generally cross the Northern part of the U.S. and almost invariably pass down the St. Lawrence River valley. The "highs" occupy the spaces between the lows and also proceed eastward with an inclination to the south-east, but their progress is not so regular as that of the "lows."

The "lows" are generally more or less of a circular area, surrounded by high pressures, and the air tends to move from the high to the low areas from all sides. The rotation of the earth on its axis changes the direction of these winds slightly. The low is a sort of air whirlpool, embracing sometimes an area 1,000 or more miles in diameter, and moving slowly eastward, called a cyclone; but in meteorology, a cyclone is not a destructive wind, as popularly conceived. Such are called tornadoes.

A warm wind from the south to cooler places north causes warmer weather in the latter, and vice versa a cool wind from the north in winter often carries freezing weather to the Gulf States.

On the weather map places of equal temperature are connected by dotted lines called Isotherms. They are usually bent northward in front of a storm, and southward in its rear.

The humidity in a wind is also an important factor, for it varies with the temperature. Air from the south moving north warms the country but is itself losing heat, and as it cools and the air contracts it holds more moisture relative to bulk until finally at some distance above the earth, saturation may be reached and the moisture condensed into the form of clouds, and if continued, rain is sure to fall. Of course, large bodies of water and mountain ranges cause marked local variations in the weather accompanying the passage of winds.

Several cyclones pass eastward each week as a rule; cyclones and anti-cyclones follow so closely that we are in the one or the other almost constantly. Most of the winds are cyclonic, and to them chiefly the middle, or what is known in this country as the Mississippi valley, owes its rainfall.

An anti-cyclone means the area in which the cooler air of the upper regions is settling to the surface of the earth and flows away in all directions. Hence the weather in a region of high pressure is usually cool, clear and dry, with a west-or north-west wind. This is why the air is fresh and bracing following a rain storm, it is what is called anti-cyclone weather.

Hurricanes are storms that originate at sea and are of the same character as the land tornadoes, but usually far more destructive. Those that affect Canada and the U. S. have their origin near the West Indies, and generally move westward to the coast, and then northward and pass out across the Atlantic with decreasing severity. We will consider thunder storms in our next.

But the Question Returns.

As the stage coach careened toward the edge of the cliff the timid tourist gazed anxiously down at the brawling stream 300 feet below.

"Do people fall over this precipice very often?" she asked.

The driver clucked to his broncos. "No, ma'am," he returned placidly; "never but once."

THE FASHIONS

The Long Flowing Veil.

The new veil is a long, flowing one draped over the top of a small high-crowned hat with a narrow turned-down brim, like the one pictured here. It is caught together in front and fashioned to the top of the crown with a large, round pin, and from there it hangs softly down the back.

There are ever so many charming veils of this type nowadays. They are made of chiffon, silk net or lace, some of them finished with borders and others without. And they come in avariety of colors to suit every complexion and every taste. Some of the prettiest ones are in lovely shades of purple, soft rose-color, lavender, taupe, green and blue, as well as black and white. They are sometimes worn on small close-fitting turbans and again on larger sailor shapes.

Hats and veils like these are worn with frocks of serge, satin or silk. The illustration is shown here. It shows the straighter effect and long lines which Parisian houses have made a point of featuring this season. Long straps starting from the shoulders, under the large collar, and working their way down on either side of the front, relieve the severity of this simple design. Little slash pockets are placed on both the straps below the belt line.

7407-7405

Satin Dress Braided with Soutache

One pictured here was worn with a dress of black satin with a long snug bodice fitted at the waist with soft pleats. The skirt had a full tunic pleated at the waist and made with the popular loop pockets, which were faced with purple satin to match the purple-braided design which trimmed the dress. This is one of the favored designs for autumn and it certainly is a most becoming one. The sleeve was cleverly cut to form a point below the elbow, where a silk tassel was placed.

7391

An Example of the Straighter Effect

A Popular Fall Model.

There is another type of dress for fall which is rapidly gaining more and more advocates every day. This is the one-piece frock of which an illustration is shown here. It shows the straighter effect and long lines which Parisian houses have made a point of featuring this season. Long straps starting from the shoulders, under the large collar, and working their way down on either side of the front, relieve the severity of this simple design. Little slash pockets are placed on both the straps below the belt line.

In some of the one-piece dresses, a long, narrow girdle of the material is wound loosely around the figure several times and tied at the back or front in a loose knot. The ends are often finisher with silk tassels. The belt is generally arranged at the low waistline, giving a suggestion of the Moyen Age effect, which, it is predicted, will become popular again.

The materials most favored for these practical frocks are satin, broadcloth, fine serge, tricotine, fancy twills, gabardine and poplin. The Parisienne favors wool jersey very highly for these one-piece frocks, also the checked velours de laine which are considered so very smart. These materials are excellent for shopping, motoring and such occasions when one must be simply though smartly dressed. Some of the colors are dark brown, terra cotta, orange and green. The combinations in checked velours are dark green with beige, gray with navy blue, and beige with Brandy, not to speak of the black and white checks, which never seem to lose their popularity.

Skirts Are Longer and Straighter

There is a decided tendency to longer and straighter-hanging skirts in most of the autumn models. Paquin has made many dresses noticeably longer, both for street and evening wear, and many of the other Parisian couturieres have lengthened the skirts for the coming season, though not to an exaggerated degree. The skirts have not lost any of their fulness in their downward tendency. They simply follow the lines of the figure more closely and do not flare as much. The hoop skirts and crinoline effects are practically dead and some soft draperies are seen in their stead, especially in evening and afternoon dresses of satins, crepes and soft silks.

These patterns may be obtained from your local McCall Dealer or from the McCall Company, 70 Bond Street, Toronto, Ontario.

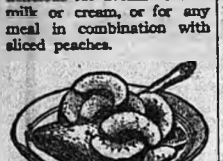
GERMAN PRISONERS.

How the French Secure Them From Running Away.

An American who fought with the French gives in the Atlantic Monthly a lively description of a successful attack on the enemy's trenches and the capture of many German prisoners:

Our line was wearing thin. Halfway to the third trench we were reinforced. The ground in our rear was covered with our men. All at once came a change. The German artillery in front ceased firing, and the next second we saw the reason why. In the trench ahead the German troops were pouring out in black masses and advancing toward us at a trot. Was it a counter-attack? Then, as suddenly our own artillery ceased firing and the mystery became plain. The Germans were approaching in columns of four, officers to the front, hands held in the air; and as they came closer we could distinguish the steady cry, "Kameraden! Kameraden!"

They were surrendering. Out flew our knives, and in less time than it takes to tell it we had mingled among the prisoners, slicing off their trouser buttons, cutting off suspenders and hacking through belts. We cut the laces off all their shoes, and then sloping along, their hands helplessly in their breeches pockets to keep their trousers from falling round their ankles, shuffling their feet to keep their boots on, the huge column of prisoners was sent to the rear with a few soldiers to direct rather than to guard them.



As the Germans had left the trenches, their artillery had paused, thinking it a counter-attack. Now, as the after flow was escorted to the rear and it became apparent that the men had surrendered, the German artillery opened up again furiously. Six shells landed at the same instant in almost the same place, and within a few minutes Section 8 of our company had almost disappeared.

A Stinger Himself.

Merely Curious—What was it the woman had, a swing low?

Male Pessimist—Must have been a "bee" all right; I guess likely was stinging enough.

Our Kitchen is Your Kitchen—it cost two million dollars and was built to furnish you with crisp, golden loaves of **Shredded Wheat**, the purest, cleanest, most nutritious cereal food in the world. It is ready-cooked and ready-to-serve, delicious for breakfast with milk or cream, or for any meal in combination with sliced peaches.

FROM OLD SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going On in the Highlands and Lowlands of Auld Scotia.

Glasgow municipal farms last season made a clear profit of $15,000.

The offer to raise a Volunteer battalion in Forfarshire has been accepted by the King.

Mr. Thomas Kyle, Stirling's oldest inhabitant, has just died at the age of 97 years.

Women navvies are laying a cable at Bo'ness, Linlithgowshire, as part of the electric light scheme.

Sir George McCrae of Edinburgh is in a base hospital in France, suffering with trench fever and dysentery.

A battalion to be known as the 1st Battalion Ayrashire Volunteers' Regiment is to be raised in the county of Ayr.

The death has occurred of Mr. Henry Rutherford, far over forty years manager of Aberlady Gas Company.

The constables connected with the Stirlingshire police force have been granted a war bonus of 84 cents per week.

Mrs. MacLeod, 80 years of age, was burned to death at Lentran, near Inverness, in a fire that gutted four houses.

Twenty more wounded soldiers recently arrived at Gordon Castle, Hospital, Morayshire, making a total of 80 inmates.

A memorial to the late Field Marshal Earl Roberts was unveiled in Kelvingrove Park, Glasgow, by his daughter, Countess Roberts.

Lieut. Batten-Poole, nephew of Anna, Lady Colquhoun, of Colquhoun, has been awarded the Victoria Cross for conspicuous bravery in the field.

Mr. A. J. Balfour, M.P., First Lord of the Admiralty, has begun an official visit of inspection of the Clyde shipyards and engineering works.

At a meeting of Deeside District Committee, the M.O.H. for Aberdeenshire stated that there are 60 cases of infantile paralysis in Aberdeen.

Instead of a special Scottish memorial to the late Lord Kitchener, there will be a Scottish contribution to the Lord Mayor of London's Fund.

Measuring about 76 feet in length, a whale was washed up on the coast of Colonsay, off Argyllshire, but was afterwards swept away by a higher tide.

Mr. Daniel Rankin, lecturer on Humanity in Glasgow University, was recently drowned, together with his brother, the Rev. E. B. Rankin, near North Berwick.

Logierait School Board, at a recent meeting, adopted a motion of protest against the calling up for military service of Mr. MacLean, headmaster of Logierait school.

At a special meeting of Falkirk Town Council a letter was read from Mr. Robert Dollar, San Francisco, offering a gift of $15,000 for the erection of public baths in the burgh of Falkirk, of which he was a native.

Sub-Lieut. H.R.H. Prince Albert

It was announced officially in May that Prince Albert, second son of the King, had been promoted from A Sub-Lieutenant to Sub-Lieutenant in His Majesty's Navy. His Royal Highness, who is in his twenty-first year, entered the Royal Naval College, Osborne, in January, 1909, and became a midshipman in September, 1913. He was promoted to Acting Sub-Lieutenant in September, 1915. When war broke out he was serving in a Sag ship of the Grand Fleet, but in September, 1914, he was compelled to go on sick leave, and was operated upon for appendicitis. He was unable to rejoin his ship until February of the following year. In the following November he was again on sick leave, with an obstinate gastric disorder. He returned to active duty in May of this year.

THANKFUL MOTHERS

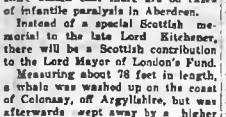
Thousands of thankful mothers throughout Canada—many of them your own neighbors—speak with the greatest praise of that splendid medicine, Baby's Own Tablets. Many mothers would have no other medicine for their little ones. Among these is Mrs. Albert Nie, St. Brieux, Sask., who says: "I have been using Baby's Own Tablets for the past seven years and they have done my four children a world of good. I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

KASHA THE SMASHER.

Something About the Famous Russian General.

The Russian soldier's nickname for General Brussiloff, the man who has driven the Austrians before him in Galicia in a dozen battles, is "Papa Kasha." "Kasha," a writer in a British periodical tells us, is a breakfast dish greatly beloved by the Russian soldier. It is made principally of dry buckwheat mixed with sour clotted milk, and Brussiloff was the first to introduce it as a regular ration for the Russian soldier.

Although his name was not widely known before the recent campaign, General Alexei Brussiloff has for some time been recognized in Russian military circles as a brilliant strategist and tactician. When the war broke out he was in command of the 14th Army Corps on the Galician frontier, and he took a prominent part in all the earlier operations in that part of the eastern front.



Early in April last he succeeded General Ivanoff in command of the southern Russian army, and at once he began to prepare assiduously for the great offensive.

Trained as a cavalry leader, he insisted that that army must play a prominent part in his plan of operations. Only through cavalry, he said, could a rout, as distinguished from a mere withdrawal, be assured. And only cavalry, he thought, could act as quickly as the occasion would demand in the broad intervals of open country between the lines of the enemy's intrenchments.

The Russian military wiseacres shook their heads. But Brussiloff had shown marvelous skill and adaptability in manœuvring large bodies of men, and he was permitted to have his own way.

The victorious commander, like most of the other successful generals in this war, is well advanced in years, he is sixty-four years of age. His vitality, however, is amazing. He is reported to be the picture of health at present, in spite of sixteen hours' work a day. In all weathers he will inspect his troops and visit the vital points along his front. If his motor car cannot take him where he wants to go on account of the bad roads, he will continue his journey for many miles if necessary on horseback.

"We have undertaken a big operation. With God's help we will conduct it to a successful conclusion," was all he said when he was congratulated on his victories. Brussiloff is a man of very few words.

Adds to the Joy of Living—

It isn't alone the deliciously sweet nut-like taste of Grape-Nuts that has made the food famous, though taste makes first appeal, and goes a long way.

But with the zestful flavor there is in Grape-Nuts the entire nutriment of finest wheat and barley. And this includes the rich mineral elements of the grain, necessary for vigorous health—the greatest joy of life.

Every table should have its daily ration of

Grape-Nuts

NEURALGIA PAINS YIELD QUICKLY

Hundreds Find Sloan's Liniment Soothes Their Aches.

The shooting, tearing pains of neuralgia and sciatica are quickly relieved by the soothing external application of Sloan's Liniment.

Quiets the nerves, relieves the soreness feeling, and by its tonic effect on the nerve and muscular tissue, gives immediate relief.

Sloan's Liniment is cleaner and easier to use than mussy plasters and ointments and does not clog the pores.

Just put it on—it penetrates. Kills pain. You will find relief in it from rheumatism, neuralgia, sciatica, stiff neck, toothache, etc.

For strains, sprains, bruises, black-and-blue spots, Sloan's Liniment quickly reduces the pain.

It's really a friend of the whole family. Your druggist sells it in 25c, 50c and $1.00 bottles.

Sloan's Liniment KILLS PAIN

The Folly Of Taking Digestive Pills

A Warning to Dyspeptics.

The habit of taking digestive pills after meals makes chronic dyspeptics of many thousands of men and women because artificial digestants, drugs and medicines have practically no influence upon the excessively acid condition of the stomach contents which is the cause of most forms of indigestion and dyspepsia.

The pill after dinner pill merely lessens the sensitiveness of the stomach nerves and thus gives a false sense of freedom from pain. If those who are subject to indigestion, gas, flatulence, belching, bloating, heartburn, etc., after eating, would get about an ounce of pure bismuth tasteless from their druggist and take a teaspoonful in a little water after meals, there would be no further necessity for drugs or medicines because bismuth magnesia instantly neutralizes stomach acidity, stops food fermentation and thus insures normal painless digestion by enabling the stomach to do its work without hindrance.

41 ZEPPELIN RAIDS.

1,334 People Killed and Wounded in England.

The New York Times prints the following story from London:

In the last two years there have been 43 Zeppelin raids on England—23 in 1915 and 18 in 1916. This summary does not take into account the many aero and seaplane attacks and the numerous abortive attempts which have been driven back at the coast or baffled by shifting winds and misty weather.

If in these raids we take three Zeppelins as the average number, and allow three tons of explosives and incendiary bombs as the capacity of each dirigible, we have an aggregate of 370 tons of death-dealing missiles. Supposing each bomb weighs 50 pounds, we have approximately 15,000 as the number dropped on England or in the North Sea in the last two years.

The British Government has made public the number of casualties after each raid, and these aggregate 336 dead and 980 wounded. This means that it has taken more than a ton of German bombs for every British man, woman and child who has been killed. A military expert figures that for every soldier killed the enemy must expend his weight in lead. Before the British perfected their defences against air attack the loss of life was much greater, the casualties steadily decreasing as the difficulties of attack increased.

Since the war began it has been definitely reported that fourteen Zeppelins have been wrecked; the real number is probably much larger. It is estimated that it costs at least $250,000 to build a Zeppelin. Multiplying this sum by 14, we have $3,500,000 as the amount the Germans have lost through the wrecking of Zeppelins alone. This sum would build 500 aeroplanes at $7,000 each, 25 submarines at $100,000 each, or pay for 70,000 shells at $500 each. These 14 Zeppelins did no military damage; their only value to Germany has been in reconnaissance work over the North Sea.

TORONTO FAT STOCK SHOW.

As evidenced by an advertisement which appeared in last week's issue, the Toronto Fat Stock Show are giving special attention to farmers and breeders, and are offering many handsome prizes for classes where stock must be bred, fed and owned by the exhibitors. This is work along the right lines and should bring out a good entry.

MORE BABIES FOR EMPIRE.

Large Family Will be Regarded As a National Asset.

"The war after the war will be won by the nation which encourages early marriages and large families."

These words were used by an eminent London physician in an interview with the London Daily Express. He spoke on the subjects which Sir Leo Chiozza Money, M.P., dealt with recently—the need for more abundantly populating the British Empire and the peril of the families of one or two children.

"My experience shows that, given good stock to start with, large families show no deterioration among the younger branches," said the physician. "On the contrary, I frequently find that the best bodies, and emphatically the best brains, occur, say, with the fourth, fifth, sixth or seventh child.

"Married people who prefer small families risk the possibility of losing a genius which might have come in a fourth or fifth child. Persons set a good example, as a rule, in the size of their families, and they are usually fine families, too.

"In Germany, early marriages and large, very large, families are the rule. I have seen a father, mother, and twenty-four children, all robust and bright, going to church.

"Bachelors who postpone marrying until they are thirty-five or forty act foolishly for themselves and the race. It is one of the weak points in our social system that men do not marry young."

Minard's Liniment Co., Limited.

Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

Yours truly,
T. B.-LAVERS,
St. John.

Nothing Worse!

Benevolent-looking Lady (with a pitying look at the man who has just been dragged from underneath his motor-car)—Poor man, have you a wife?

Unfortunate Motorist—No, madam, I haven't. This is the worst thing that has happened to me.

Minard's Liniment Relieves Neuralgia.

She Knew Better.

Mrs. Wiseman was one of those women who always know. Whatever the subject under discussion, she had her own opinions, and made other people have them, too.

"Joshua," said she to her husband one evening, "I saw in this morning's paper that old Mr. Bilfer died on Saturday."

"It was a mistake," mumbled Joshua, as he bent down to unlace his shoes; "he died on Friday."

"But the paper said Saturday," repeated Mrs. Wiseman, firmly.

"I know it did," persisted Joshua, "but it was an error in the print."

"I thought that at first," said the lady decidedly, "but I got half a dozen copies of the paper and it was the same in all of them. And they certainly couldn't have made the same mistake over and over again like that!"

NUMBER 23 THE PROPRIETORS

A NEW SERVICE.

Now Possible to Send a Day Letter by Telegraph.

Mr. J. McMillan, who has initiated many notable improvements since he became General Manager of the C.P.R. Telegraphs eighteen months ago, has just decided to inaugurate an important service entirely new to Canada over the hundred and ten thousand miles of wire under his immediate control, namely, the day letter which may now be sent between points in Canada on the Canadian Pacific system at a rate very much reduced as compared with the usual commercial rush telegram. Mr. McMillan is convinced that many of those who send telegrams would be quite satisfied if these arrived on the same day, whereas a proportion of the cost of the rush telegram is due to the cost of speedy delivery. The day letter of fifty words will be rated at one and a half times the cost of a regular rush message of ten words and can still bring an answer the same day, which is as quick as many people desire. There are sixteen hundred C.P.R. telegraph offices throughout Canada, at each of which the new service will be in force, so that this will be a Dominion-wide service stretching from Louisburg, Nova Scotia, to Victoria, B.C. Messages will be taken in either French or English, code words not being permissible.

Mr. John McMillan owes his success to a genial and tactful disposition which made him one of the most popular C.P.R. officials in the West, where his work centred until he was called to the head office in Montreal last year. Although less than fifty years of age, he joined the C.P.R. at its inception, working on construction in 1883. After acting for a number of years as operator at Donald B.C., he became Inspector of Telegraphs at Winnipeg in 1902, Assistant Superintendent in 1906, Superintendent at Calgary in 1907, General Superintendent at Winnipeg in 1913, and finally Manager of the whole telegraph system in March, 1915.

How To Get Rid Of Catarrh, Catarrhal Deafness or Head Noises.

If you have catarrh, catarrhal deafness or head noises caused by catarrh, or if chlorra drops in your throat and has caused catarrh of the stomach or bowels you will be glad to know that these distressing symptoms can be entirely overcome in many instances by the following treatment which you can easily prepare in your own home at little cost. Secure from your druggist 4 ounces of Parmint (Double Strength). This will not cost you more than 75c. Take this home and add to it 1 pint of hot water and 4 ounces of granulated sugar; stir until dissolved. Take one tablespoonful four times a day. A decided improvement is sometimes noted after the first day's treatment. Breathing becomes easy, while the distressing head noises, headache, dullness, cloudy thinking, etc., gradually disappear under the tonic action of this treatment. Loss of smell, taste, defective hearing and nausea, dreariness at the back of the throat are other symptoms which suggest the presence of catarrh and which are often overcome by this effectious treatment. Nearly ninety per cent. of all ear troubles are said to be directly caused by catarrh, therefore, there must be many people whose hearing can be restored by this simple home treatment.

Plain Talk.

Heiress—I like you very much, Mr. Ardup, but I cannot marry you.

Ardup (picking up his hat)—I will be equally frank with you, Miss Bullion. I don't like you at all, but I would marry you in a minute. I am more self-sacrificing than you are. Good evening.

Minard's Liniment Cures Burns, Etc.

On His Furlough.

The reading lesson was on, and the word "furlough" occurred. Miss Jones, the teacher, asked if any little girl or boy knew the meaning of the word. One small hand was raised. "Furlough means a mule," said the child. "Oh, no; it doesn't," said the teacher. "Yes, ma'am," insisted the little girl, "I have a book at home that says so." Miss Jones told the child to bring the book to school. The next morning the child came armed with a book, and triumphantly showed a picture of an American soldier riding a mule, under which was the caption—"Going home on his furlough."

Minard's Liniment for sale everywhere.

Attending to Business.

"You say the officer arrested you while you were quietly minding your own business?"

"Yes, your honor. He caught me suddenly by the coat-collar and threatened to truncheon me unless I accompanied him quietly to the station."

"You were peaceably attending to your own business, making no noise or disturbance of any kind?"

"None whatever, sir."

"It seems very strange. What is your business?"

"I'm a burglar."

And many a man's belief in his superior wisdom makes a fool of him.

PAISLEY, OCT. 18th, 1916

LOCAL AND DISTRICT NEWS

Red Cross Collection

At the meeting on Thursday evening last all arrangements were made for a house to house canvas for Red Cross purposes on Thursday, Oct 19th. It is hoped that the generosity of citizens towards this cause may result in rolling up a list totalling 50 or 100 per cent more than the very gratifying aggregate of 1915. Following are the committees appointed to solicit subscriptions: S F Ballachey and J S Dewar; Geo Grant and W S McLachlan; D McKenzie and J Logie; A Galbraith and J H Steele; Dr Allen and H B Putnam; Alex Frewer and J A McArthur. The chairman of committee is J H Steele, and H B Putnam sec'y.

Death of J. M. Chase

On Tuesday, Oct 10th, at the advanced age of 81 years, Mr J M Chase passed away at the home of his son, Mr Jos E Chase, at Nottawa. The deceased was a native of Rhode Island, U S, where he spent his boyhood days and learned the woolen mill business. He lived in Illinois for a short time and then came to Canada about fifty years ago. During nearly the whole of the half century Mr Chase was actively engaged in the woolen mill trade, manufacturing homespun flannels and tweeds. For fourteen years he and his sons operated a mill in Paisley. He was also thirteen years in Chesley and six years at Inglis Falls before coming to this village. For the past seventeen years he was in Nottawa, but of late years was in the law business. He was married in Illinois, and his wife, with their two sons and two daughters survive—Joseph R, of Nottawa, and George J, of Edmonton, with whom the mother was residing at the time of her husband's death; Mrs Geo Sherman (Ada), of Grand Forks, N D; and Mrs H Dixon (Ida), of Edmonton. Mr Chase is remembered by every old resident not only of Paisley and vicinity, but of almost the whole county, as in doing business with the farmers in buying wool and selling goods he drove a wagon, calling at nearly every farm periodically.

New Act Works Out

Four Port Elgin men have discovered that the new Ontario Temperance Act can't be trifled with. The quartette were prosecuted by Inspector White for infringing its provisions. Each swore that he had secured a bottle of liquor in the rear of a store and had partaken of its contents without invitation. They were each fined $50 and costs for drinking in any place other than his own private residence. While the new Act has its weak spots, it also has its teeth. It prohibits carrying liquor on your person. You can't have a flask in your pocket, nor carry a bottle of strong stuff in your grip. If you do and are caught with the goods or the fact is afterwards discovered by the authorities, you are straightaway mulcted $200 or you go to jail. Already several cases have come before various magistrates and always has the $200 been imposed. A Renfrew man who was taking two bottles of gin in his grip to a friend, was caught and had to pay the $200 for his kindness. Better let the friends get their own hard stuff. Clause 41 of the act reads as follows: (1) Except as provided by this act, no person by himself, his clerk, servant or agent shall have, or keep, or give liquor in any place whatsoever, other than in the private dwelling house in which he resides, without having first obtained a license under this act authorizing him so to do, and then only as authorized by this license.

To the Editor of THE ADVOCATE:

A few weeks ago your valuable medium contained a financial statement from "The Women's Patriotic League." I am sure the public are well pleased with the way the League has handled the funds entrusted to their care for Red Cross purposes. Should they appeal to the public again this coming season they will no doubt meet with a liberal response. It is well known that the Red Cross tea room was started last fall under the auspices of the "Women's Institute," and largely carried on by the Women's Patriotic League. The Women's Institute through their treasurer took charge of all the Tea Room funds. In the statement above referred to the proceeds of the pig and centrepiece raffleings are recorded, but there is no mention made of Bell Bros' load of tile. It looks to me as if that sum, some $65 00, is still in the hands of the Women's Institute. Again, I believe the public would like to know what was done with the money taken in by the Women's Institute which accrued from the sale of candy, the proceeds of which, as advertised by the Women's Institute, were to go towards the purchase of a flag for the new school, a very commendable object. Many contributed candy for that purpose, and it was sold by school girls. Will the Women's Institute kindly publish a financial statement as the W P L have done? It is due the public.

PUCLICO

Hall—Ellis

A pretty military wedding took place on Saturday Oct 9th, at Knox Presbyterian Church, Tara, when Miss Olive Evelyn Ellis, youngest daughter of Mr and Mrs Thomas Ellis, and one of Tara's popular young ladies, was united in marriage to to Pte James Cameron Hall, of the 160th Bruce Battalion, son of Mr and Mrs Robert Hall, Arran. The Rev R McCallum pastor of the church performed the ceremony in the presence of a large gathering, the church being decorated for the occasion. At 12 o'clock the bride, leaning on the arm of her brother Mr T H Ellis, of Paisley, entered the church and took her place beside the groom at the altar while the wedding march was played by Miss Nettie Trelford of Paisley. The bride wore a pretty navy blue suit and a black picture hat and carried a bouquet of pink and white roses. While the register was being signed Miss Jessie Robertson sang "O Promise Me" very sweetly. After the ceremony the guests adjourned to the home of the bride and partook of a splendid dinner, being waited on by Miss Retta Keller and Miss Georgia Lee. The dining room was nicely decorated with flags, bells hunting and flowers. The groom's gift to the bride was a set of [illegible] Lamb furs, to Miss Trelford an amethyst pin, and to Miss Robertson a purse with beads. Mid showers of confetti the happy couple left for Toronto on the 2.08 p m train accompanied by the best wishes of their many friends for a long and happy wedded life.—Leader

ANNUAL SALE

TEN DAYS ONLY

Wednesday, Oct. 25th to Saturday, Nov. 4th

in Our New Salesroom Gibson Block

a few steps from our own Store

D. A. McLACHLAN, Principal

Of all overworked women probably the housewife is the hardest worked. She has so much to attend to, with very little help. Her work can be lightened if she knows the value of system and she should try and take a short rest in the daytime. A physician who became famous almost around the world, Doctor Pierce of Buffalo, N. Y., the specialist in women's diseases, for many years practiced medicine in a farming district. He there observed the lack of system in the planning of the work.

If it is a headache, a backache, a sensation of irritability or twitching and uncontrollable nervousness, something must be wrong with the head or back, a woman naturally says, but all the time the real trouble very often centers in the organs. In nine cases out of ten the seat of the difficulty is here, and a woman should take rational treatment for its cure. The disorder should be treated steadily and systematically with Dr. Pierce's Favorite Prescription.

For diseases from which women suffer "Favorite Prescription" is a powerful restorative. During the last fifty years it has banished from the lives of tens of thousands of women the pain, worry, misery and distress caused by these diseases.

If you are a sufferer, get Dr. Pierce's Favorite Prescription in liquid or tablet form to-day. Then address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., and get confidential medical advice entirely free.

Prize List, Bruce School Fair District

The school fair at S S No 9 Bruce Tp, on Oct 6th, attracted a larger crowd of visitors this year than last, although the exhibits did not make quite as good a showing. About a thousand people were on the grounds and took a keen interest in the children's exhibits and the races. The judging was managed by Mr N C McKay, of the Agricultural Branch Dept at Walkerton.

The Red Cross fund receives the profits from the refreshment booth run by the ladies, also from the ticket sale of a 60-lb can of honey donated by Mr A E Jones, which became the property of Mr Geo L Carter, of Paisley.

—A flax puller, efforts to perfect which have been made for 200 years, has at last appeared in the flax fields of Lambton County and has met with the approval of the Lambton Flax Growers' Association. Rev Charles Andre Vassot, pastor of St Mark's French Presbyterian church, Ottawa, is the inventor. T A G Gordon, closely connected with the flax growing association, stated that the work of the new puller is wonderful. "We are satisfied now that we have got the machine that will do the work," he declared.

FELT LIKE A NEW PERSON

After Taking Only One Box Of "Fruit-a-tives"

EAST SHIP HARBOUR, N.S.

"It is with great pleasure that I write to tell you of the *wonderful benefits* I have received from taking "Fruit-a-tives". For years, I was a dreadful sufferer from *Constipation and Headaches*, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried "Fruit-a-tives" and the effect was splendid. After taking one box, I feel like a new person, to have relief from those sickening Headaches".

MRS. MARTHA DEWOLFE.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Eye Glasses that Don't Slip or Pinch.

When we fit eye glasses the fit firmly, yet comfortably, as near the eyes as the lashes will allow, each eye looking exactly through the centre of each glass.

Comfort assured.

Satisfaction guaranteed.

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

Your New SUIT OR OVERCOAT

from $16.00 Up

It doesn't make any difference to us what you may want to pay for a suit; that is a point for you to decide, but it is for us to see that you get what you pay for, and we will do it, too.

Whether your preference is grey, brown, navy, blacks or mixtures, you will find them here in a very gratifying assortment.

For the young men we have some of the snappiest styles you have ever seen, and for the older men and quieter dressers we have styles of conservative genteel design that give that well-dressed appearance.

G. B. IRWIN

The Up-to-Date Tailor Paisley

At the Front with the "Terrible Tanks"

Pte Stanley Martin, son of Mr and Mrs W Martin, of Con 2, Arran, has been in the thick of the fighting in France and charged the Huns trenches in company with the new British armored cars. On Sept 20th he wrote home: "It is some time now since I have written but couldn't get my letters away if I had, as the out going mail is very irregular and very little or none goes out when we are on the move. I haven't had any mail for about two weeks now but expect some the next mail. I received the parcel at a good time as I was in the reserve trenches at the time and those socks came in fine for I went into the front line and was all ready for the big scrap which you will have read about by this time. You know what section I belong to. Well it was our duty to get ourselves in a favourable position to repel a counter attack in case our attack failed, which as it turned out was a great success. When we fixed up—which we did almost before our barrage lifted, as we went forward into "No man's land" along with the first wave—we had nothing more to do but stick right and keep out of the way of bullets and shrapnel. But this let we disregarded, for there was too much going on around to miss. It was broad daylight. Our boys had kept pressed close to our barrage, some standing up, some in shell holes. When of a sudden you could feel a lessening of the noise which was going on just in front, and we knew our barrage had lifted. Our boys went forward immediately and I saw quite a number go down, shot at close range from Fritz's front line. I believe the Huns in this line fought to the last man. At this period I first noticed those "wonders" which you will have read about — the armoured cars — and it was sure a great sight. One was parallel to us and others coming up, and moving steadily forward. They resembled a huge block in a diamond shape with no outstanding feature or mark. Sometimes nose up in the air and tail down, or the reverse, as it crept over the shell craters — and believe me there are big holes. The boys say the cars got Fritz's goat right, and no wonder, for there was no stopping them. Some fifty or more prisoners passed closed to us and I noticed they all looked very pale, and also lost no time in getting away from the "hell" that was raging just in front of us. We now turned our attention to helping the wounded to get back. I was through a section of the Huns' first line and it was a terrible sight. In some places I had to get out of [illegible] as the dead were piled up. Th[illegible] were killed with shrapnel. There we[illegible] only one or two of our boys in this part of the trench and they needed stretchers to take them back. You may take it I didn't linger long among that slaughter. The remainder of the forenoon was fairly quiet for us considering the way our boys were going forward. But in the afternoon and toward evening when another fresh party of our division went forward, we certainly were caught in a terrible bombardment. I can't understand how I came through without a scratch. And others were just as lucky, but some were caught by it and paid the full price. My head was fairly splitting with the concussion. We were relieved the next morning and were glad to be out of it where we could breathe more freely. Our airmen have the full control of the air and it is a great comfort to know that the Huns' artillery is working with its eyes shut. One of our planes brought a Fritz's down in flames. I was only 300 or 400 yards away, and as our aviator passed flying low over our heads, we gave him a great cheer. Well, I haven't much more to say this time but will write as often as I get a chance. I am in pretty good health except for a bad cold which I got as a result of getting wet through on a march a few days ago. Thank very much for the cakes and socks.

—The two London dailies announce that they will raise the subscription rate of their mail edition on October 1st to $5. Four dollars will be charged in London and in towns where they have delivery system. Brantford and Chatham dailies have also been forced to raise in price.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER X.—(Cont'd).

"Let me think, let me think. There are the materials of a nice little game of cross-purposes, if I can but manage it. Come in!"

He broke off abruptly as a knock at the door disturbed his cogitations.

Mr. Jem entered with his master's dressing-gown.

The captain threw off his coat, and donned the capacious garment in silence which Jem did not think proper to break.

At last the captain roused from his reverie and turned his attention to his follower.

"Where have you been?"

"Down in the village, captain," said Jem Starling, with a wink. "There's weary nice little and pretty little creetur in cherry ribbons wot draws a good glass of ale."

The captain nodded, absently.

"Don't be seen there too often, and keep your mouth shut."

"Trust me," said Jem, clicking his tongue against his cheek, with a knowing air. "This old soldier is a very remarkable old soldier, and he's like the parrot— he don't talk much, but he thinks the more."

"You may think as much as you like," said the captain, "but be as moderate in your thinking as your talking, my friend. You had a bad habit, when I knew you in former days, of lifting that elbow of yours too often," and the captain went through the patomime of a man raising a glass to his lips. "One slip in that direction means ruin, remember, ruin for you as well as me. But, there, I have no wish to worry you. Amuse yourself as you like, so that you keep your mouth shut."

"I amuse myself," said Jem, "There's quite a little game going on down below, which I'm mightily interested in. It's like one o' them Chinese puzzles, little pieces of wood you put together, you know. Lor', you might 'a' lived down Whitecaped in Larry's thieves' kitchen and not see more signs and mysterious nods and winks as you do down here—down here in this village, which I thought was inhabited by perfect infants. Why, a man has to keep his eyes open every minute to catch all the signs which one simple-looking chap of a fisherman gives to another."

"What do you mean?" asked the captain, absently, and with evident inattention. "What signs should these men have? what mystery? There, I'm tired, go to bed. By the way, there's a sovereign for you."

And he threw one of the coins which he had won that evening on the table.

Jem, who was beginning to understand his master's moods, picked up the donation with a touch of the forehead, and, with a gruff, "Good-night, captain," departed, muttering to himself:

"He's working, he is; he's begun the game, or my name's not Jem. Ah! he's a deep 'un, is the captain!"

In another room of the Park Violet was inclined to be thoughtful, and for some time her maid brushed the long tresses of her mistress' bright hair with inward surprise at her silence.

CHAPTER XI.

It happened that Mr. Starling was rather late in arriving at the "Blue Lion" on the evening following that of the dinner party at the Cedars.

He had been sent over to the nearest market town on some errand of his master's and had not returned until after the servant's dinner, which meal he had partaken of "warmed up," a state and condition which he declared to the cook was enough to drive a parson swearing.

Altogether Jem was not in the brightest of moods when he entered the hospitable doors of the "Blue Lion," and it did not help to disperse the gloom to find that the parlor door was locked. The room was not empty, for he could hear the hum of voices inside talking in a hushed sort of undertone.

There was no one in the bar, and Mr. Starling, rendered by his early training and the influence of circumstances suspicious by anything out of the common, crept back on tiptoe into the street, and peeped through the crack of the window which was formed by the uplifting of the curtain.

There he saw that the usual number of the gentlemen was reinforced by a little old man, whom he seemed to recollect as having seen somewhere before.

He commenced whistling "Villikins and His Dinah," and re-entered the bar.

His quick ears detected the unslipping of the bolt, and he pushed open the door without and difficulty.

All the men had suddenly assumed an air of the usual indifference and sleepiness, and responded to his cheerful salutation after their various kinds.

"Bring me a pint of the very best, Miss Polly," said Mr. Starling, sinking into his seat, and eying from under his frowning eyelids the strange little man.

"A nice night for salamanders, mates."

"Yes," said Willie Sanderson, "it's mighty hot."

"No fish?" asked Jem.

"No," was the response.

"But we expect a shoal over to-night," said the little man, with an almost imperceptible glance around the room.

"Ay," said the others, in a chorus. "We may do something to-night."

"And a very pleasant little trip, too," said Mr. Starling, nodding all round over his pewter pot. "I quite envy you, and I don't mind volunteering if so be as I shouldn't be in the way."

A slight but unmistakable expression of dismay shot for one instant on his manly face, then Willie Sanderson laughed slowly.

"Better be in bed, mate. We might have it rough, for all the wind's so dead now, and if you ain't a first-rate sailor the smell of the fish—if we get's any—might disagree with ye."

"Ay," said the little man. "Better stay in bed."

"Well, perhaps you're right," said Jem, thinking to himself that they were all mighty considerate on his behalf. "Yes, perhaps you're right. I like 'em when they are cooked, though, and I'll just look down in the morning and see if you've had a take."

"Do," said Willie, shortly, and then started another topic. But though many other followed and Mr. Starling was quite as amusing as usual, the company did not seem to be in the mood for conversation or laughter, and Jem noticed that every man seemed to be watching or listening.

Once the door opened rather suddenly, and the little man rose with an ill attempt at indifference, but only Polly entered with some tobacco, and the little man sat down again.

Presently the door opened again, and Martha Pettingall entered.

She wore her yellow bandanna, and she looked round the room Jem, who while lighting his pipe was watching her closely, saw her raise her hand and scratch her ear.

He looked round the room covertly to see for whom the sign was intended, and was not surprised to see the little man lift his hand with a natural air and scratch his ear.

"Well, boys, what do you say, shall we be starting?" And as he spoke he went to the window and pushed the curtain aside to look out at the night.

As he did So Jem, who was watching under his eyelids with the most lynx-like intention, saw a streak of light cleave the sky seawards.

The old man dropped the curtain again immediately, but Mr. Starling's eyes were sharp ones, and he had seen the light distinctly enough to know that it was not a natural phenomenon.

"Well, come along, boys," said Willie Sanderson, and, hastily tossing down the remains of their potations, the boys rose and trudged out, giving Martha Pettingall and Polly a cheery "good-night" as they passed.

Jem sat for a little while in deep thought. Then he sauntered out.

Outside he paused and looked up at the sky, then scratched his head, and instead of turning homeward he bent his steps toward the beach.

The tide was coming in; it was a fine night, and Jem could see every ripple upon the smiling, playful ocean.

There, far out now, were the fishing boats, looking like magnified walnut shells as they rose and fell on the light swell.

He waited until the boats were lost to sight, then climbed up the beach again.

As he passed through the street he peeped into the "Blue Lion."

There was no one in the bar, and he was about to peep in when he saw a light pierce the chink in the cellar flap.

He stood and knelt down, and was rewarded, not with a sight of Polly or Martha, but of the little old man, peering on his knees into what seemed to Jem like the mouth of a well.

"Hello," he thought, "here's the old chap playing larks with old Grunty-grump's beer," and he was about to run into the bar with the information.

But before he could get up from his knees another figure, no other than Martha Pettingall, entered the cellar, and, far from expressing alarm or indignation at the old man's presence, commenced talking with him in a low, confidential tone.

Jem would have given one of his large eyes to have heard that conversation, or for a peep into that hole over which it was held.

But the pair spoke in a faint whisper, and Jem could not catch a word.

Presently the man dropped the lid of the well, spread some sawdust over it, and taking up the candle from a cask, lighted Martha up the steps, following himself immediately after.

Jem got up, gave vent to a noiseless whistle, and, having had his curiosity sharpened to a most ravening edge, determined to play spy a little longer.

According he drew back into the shadow of the house, chose a tree as ambush, and kept a sharp watch both upon the cellar and door.

The light did not appear in the former, and for some time the latter was not moved, but at last Jem heard voices in the bar, and presently Martha opened the door.

She stood for a few moments looking up and down the empty street, then re-entered.

"What they call reckonocrring," muttered Jem. "Now I bet the old chap'll come out."

And so it proved.

The little old man did come out, and set off at a sharp trot up the hill.

"Well, I'm blest; that must be funny fishin' up a mountain," said Jem to himself. "He's in a mighty hurry, too. But what's my move? Do I dog him or wait here a bit longer and see what the old woman will be up to? If I set off arter him he's safe to see me; you could see a brass farden at two miles in this light. No, I'll stop here."

And he did, but was rather disgusted at his fortune when about half an hour afterward Martha came out, closed the shutters to, and shut up the house for the night.

"The performance is over," said Jem, coming out of his ambush, "and a werry pretty play it's been, only, as the chap said at the Hitalian hopera, it 'ud be all the better if I knowed what it means, which jigger me if I do."

And with a shake of the head Jem hurried his steps homeward.

CHAPTER XIII.

Up to this time the captain had been making holiday. He had been resting after his exertions for his country in the stone quarries at Portland, enjoying a little quiet repose amid the luxuries and beauties of the park. But while he had been reposing he had not allowed himself to be lulled into a false sense security.

He was fully aware that the position which he occupied at Penruddie was intangible and untenable.

He was, though John Mildmay's oldest and best-loved friend, only a visitor at the Park, and a guest of Mrs. Mildmay.

But the captain had determined from the first to change the position from that of a guest on sufferance to one of power and possession.

Captain Murpoint, as he leaned back in the carriage returning to the Park, watched from between his half-closed lids the thoughtful, pensive face of the girl who was usually so light-hearted, careless, and talkative.

(To be continued).

Canine Rodders.

"The dog," said the scientific gentleman, "sometimes steers himself with his tail."

"Uses it to guide his wandering bark, does he?" asked the irresponsible humorist.

Men laugh at what is in a woman's purse, but search the average man's pockets and you'll find more useless junt than three women would carry around.

PRISON READY FOR KAISER.

He Will Be Incarcerated on Island of St. Helena.

According to French papers the allies are as firmly determined as ever to capture the German Emperor and to incarcerate him for life on the Island of St. Helena where Napoleon ended his career as a prisoner. The "Petit Provencal" says:

"The plan to capture the Kaiser has never been given up by England and France, although this aim of the war has not been mentioned by the press during the last twelve or fifteen months. The fate of the unspeakable chief of the Huns, this beastly modern Attila, will probably be decided before the end of the present war. If he cannot be caught in the field when the remnants of his shattered armies are exterminated by the great offensive of the allies, his surrender by his people will be the first peace condition. The prison in which he will have to spend the rest of his miserable life has long been prepared by the British Government on St. Helena. His quarters there will be far less comfortable than those of Napoleon were. His oldest son and heir, the Crown Prince, will be executed with Admiral von Tirpits, and a number of the other beasts who are commanding the Boches."

It Wasn't Her.

A mother-in-law had visited her daughter so frequently and stayed so long that it caused a quarrel with her husband, and one day, when she again came to visit, she found her daughter in tears on the door step.

"I suppose, Will has left you," she sniffed.

"Yes," sobbingly returned the young wife.

"Then there's a woman in the case," her eyes lighting up expectantly.

"Yes." More sobs.

"Who is it?" demanded mother with authority.

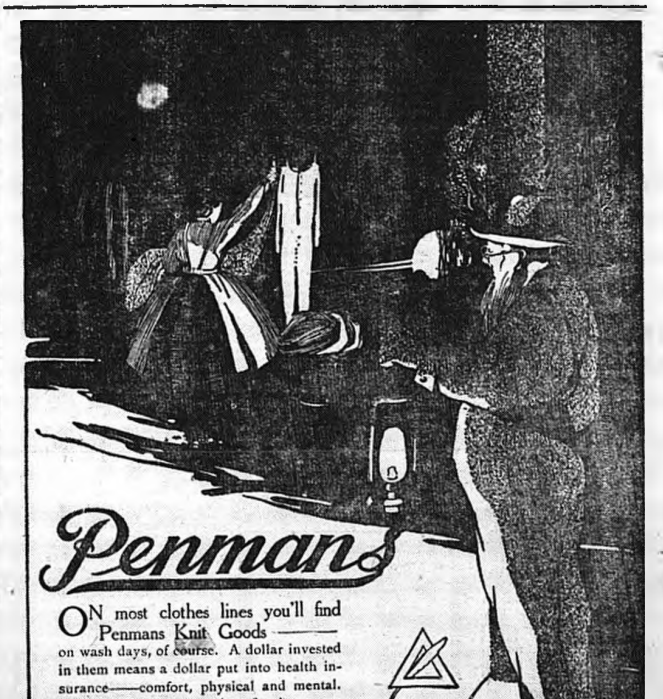
"You," came the tearful admission.

"We? Goodness gracious!" exclaimed mama-in-law. "I'm sure I never gave him any encouragement."

FREE PRIZES TO GIRLS

Beautiful Doll and Doll Carriage.

This lovely Canadian Doll is 16 inches tall and looks just like the picture. She has jointed arms and legs and natural looking head, hands and feet. She has a pretty dress with lace and ribbon trimmings.



The Doll Carriage has a steel frame and wheels and is covered with leatherette. It is 24 inches high, just the right size for the big doll we are giving. Any girl will be proud to own this lovely Doll and Doll Carriage.

Just send us your name and address and we will send you 48 of our lovely 12x16 inch colored Oilgraph Pictures to sell to your friends and neighbors at only 10 cents each. They are so pretty that nearly every house wants four or five of them. When they are sold you send us our money (Three Dollars) and we send you the Doll by mail, with charges all prepaid. And we send you the Doll Carriage too, just as soon as you show your doll to your friends and get three of them to sell our pictures and earn prizes.

Write to us to-day and you can get your Doll and Doll Carriage quickly.

SEA POWER OF GREAT BRITAIN

CREW FROM THE TIME OF THE ROMAN GALLEY.

When Julius Caesar's Admirals Ruled the English Channel.

When the gigantic "Queen Elizabeth" class took the sea against the Germans, the British were but continuing a line of succession which can be traced by small gradations right back to the galleys in which Julius Caesar's admirals ruled the English Channel nineteen hundred years ago.

In the wake of Caesar's ships with their grey-blue sails and twenty chained oarsmen on each side came the high-prowed Saxon "long ships" and "ceols" carrying a single mast. These culminated in Alfred's "King's ships," which the chronicler writes were "full nigh twice as long as the others." They were propelled by as many as sixty oars.

King Canute produced what his people considered wonderful warships; in fact, the men of every period have been dazzled by the great men-o'-war of that period. These ships ranged from 100 to 200 feet long, their sides were adorned with dragons' and serpents' heads, their sails were painted in rainbow hues, and along their rails were rows of many-colored shields.

The Norman Ships.

The Normans built still larger craft and, in imitation of land warfare, constructed high "castles" on bow and stern. These were sturdy square structures for the fighting, much like the stone keep.

Nor did the Norman fleet lack for picturesqueness. The sides of their warships were painted in bands of blue, yellow, red and brown, and the sails were striped with the same bright colors.

With the Plantagenets the vessels of war became more business-like and more formidable. The Norman boats were under fifty tons, while now many were of eighty tons. Each carried thirty seamen and an equal number of crossbowmen and other soldiers. In the castles fore and aft were fighters armed with spears "long enough to spit a man on the deck of a ship alongside."

Slings and javelins were also used, with axes and bills to cut the enemy's rigging at close quarters. On meeting a hostile ship a war vessel ran alongside under the fire of crossbowmen and volleys of heavy stones, darts and incendiary projectiles, and then grappled and boarded her.

The oar-propelled galley disappeared about this time. In Edward III.'s reign naval architecture had progressed to the "cog," a vessel of 200 tons and more. She carried from 120 to 150 seamen, soldiers and archers. From the "castles" at stern and stern and on the mast amidship the archers fired their arrows and bolts at the enemy until the moment arrived to run alongside and board her.

Hurled Stone Missiles.

A great new departure must also be noted. From the castles crude cannon of hooped iron bars hurled stone projectiles. The weapon which had so astonished the French at Crecy had been adapted to the sea.

By the end of the fourteenth century the "cog" had been relegated to the scrap heap for the "great ship" of 500 tons burden, carrying 280 sailors, archers and spearmen.

The hulls were ornamented with heraldic carvings and "some had purple sails, embroidered in gold and emblazoned with bright colors."

The method of fighting still remained the same. The long bow and the crossbow were the principal arms of attack, and the primitive cannon were used more for their demoralising effect on the enemy than for their destructiveness.

Growth More Rapid.

With the coming of the fifteenth century the growth of the warship became more rapid. Vessels of a thousand tons with two masts were not uncommon. Heavy cannon of cast-iron were mounted on the fore and aft "castles" which had now become permanent structures wrought strongly into the framework of the hull.

We also hear for the first time of "hand cannon," the muskets and pistols of later days. The little primitive muskets popped side by side with the twang of the bows. A little later light cannon were fired through loopholes in the bulwarks.

Under the Tudors, warships took a great leap forward. We come to the Great Harry, the celebrated vessel of King Henry VII., which cost $14,000. This and the Great Michael were each 240 feet long and 38 feet broad. They could fire a broadside of eight large guns each, in addition to smaller ordnance.

Guns Pointed Inward.

Followed the Harry Grace a Dieu, a great two-decked vessel, with 58 cannon, the largest 60-pounders, besides curious batteries of short, wide-mouthed cannon, mounted fore and aft and pointing inward. The latter were to blast the enemy when the deck had become a battlefield.

The Harry Grace a Dieu was 1,500 tons gross and had four masts. So large was she that many veteran men predicted she would founder the first time she was taken into the open Atlantic. The great Tudor ships proved very seaworthy, however, but not over fast.

By the time of Queen Elizabeth the days of boarding were near an end. The cannon had been improved until they were able to rend the enemy's masts, yards and hull. The guns of largest size were eight feet long and 8¼ inches bore, and could send their projectiles a mile. Each ship carried from 40 to 60 of these cannon, the broadside reaching as much as 400 pounds. The "hand cannon" had now become arquebuses, but long bows were still in use.

Formidable Fleets.

The Stuart kings brought forth formidable fleets, consisting of vessels of different types, from pinnaces of less than 200 tons to the Sovereign of the Seas, the first British three-decker. She was a gorgeous affair, with decorations of carved angels and cupids covered with gilt, and she cost just $204,165, not counting the expense of her two hundred guns.

The warship in Stuart days did not depend entirely on her guns for punishing the enemy. We read of "arrows trimmed with wildfire to stick in the sails or ship's sides," and "hollow brass balls and earthen pots covered with quarter bullets stuck in pitch, which, in a crowd of people, will make an incredible slaughter."

Another step forward was taken with the "first rate" ship of about 1700, such as the Britannia, which carried 100 guns, from 6 pounds to 78 pounds.

Larger Than To-day.

Before the close of the eighteenth century Great Britain had a fleet numerically larger than that of to-day. There were about 700 sail, of which 435 were so-called "rated" vessels of 20 to 120 guns.

The so-called "three-decker," which really had five decks, was the stock large ship, and she left the Sovereign of the Seas far behind. The famous Royal George, for instance, had a tonnage of 2,286. Again the old salts feared that such great ships would not be able to navigate.

The ship of Nelson's day indeed touched the imagination of its contemporaries. "She carried in her timbers the growth of a century of British oak, and a fifty-acre forest was needed for the two thousand well-grown trees required for her building. Her cost, with all equipment, was 120,000 pounds ($600,000), and a couple of hundred shipwrights took a year to do the work."

First Iron Ship.

But it was more than thirty years after the Battle of Trafalgar before a warship carried a gun firing a heavier projectile than 32 pounds.

In 1861 Britain's first iron ship, the Warrior, of 9,210 tons, was launched in the Thames. She was plated for two-thirds her length. In the next three years the Civil War in the United States forced the science of building ships of war to an astonishing growth. The victory of the Monitor over the Merrimac doomed the ship of oak and brought in the ship of iron. Since then there has been a half-century of development the most rapid the shipbuilders of the world have ever seen. The ship of iron has been displaced by the ship of steel. Cannon have increased until the maximum bore is fifteen inches. We have certainly not reached the pitch of development. Who can say how much further it will go?

TREE HUNTERS.

It Is a Profitable Profession and Requires Training.

Mahogany hunting is one of the best paying professions. Mahogany trees do not grow in clusters, but are scattered through the forests. The mahogany is one of the largest and tallest of trees, and the hunter, seeking the highest ground, climbs to the top of the tallest tree and surveys the surrounding country. His practised eye soon detects the mahogany by its peculiar foliage, and he counts the trees within sight, notes the directions and distances, and then, descending, cuts a narrow trail to each tree, which he carefully blazes and marks, especially if there is a rival hunter in the vicinity.

To fell a large mahogany tree is one day's task for two men. On account of the wide spurs which project from the trunk at its base, scaffolds must be erected, and the tree cut off above the spurs. The hunter has nothing to do with the work of cutting or removing the timber. He merely points out the tree, and moves on in search of more. He is paid by results, and it is by no means unusual for a clever hunter to draw $500 for a month's work in the forests.

She Confessed.

A young woman called at the Post Office and bashfully inquired if there was a letter for her. "Business or love letter?" jokingly inquired the clerk. "Business," was the reply, accompanied by a blush of the deepest crimson. As there was no such letter to be found, the young lady took her departure. She came back, however, after a little while, and said, in faltering tones, "Please, would you mind looking among the love-letters?"

Queen Mary Placing Flowers on a Mural Roll of Honor.

The little thoroughfare of Balcorne street, an offshoot of Well street, in South Hackney, was, in common with a number of other streets in this busy and crowded district, honored on August 10 by a visit from Queen Mary, who is shown in our photograph placing a little bunch of flowers at the foot of the Roll of Honor placed here, as in other streets of the East End, to record the names of local men who have joined the Army or the Navy. Her Majesty was greeted with the keen enthusiasm which her constant and unwearying kindness in showing her appreciation of loyalty and courage invariably calls forth. The streets of this teeming district have sent nearly 500 men to the colors. To one mother, who has four sons at the front, the Queen said: "Keep a brave heart!" and shook hands with her. Her Majesty's visit was punctuated by such touching and womanly incidents. In one case, a woman said to the Queen: "You know how mothers feel." "I know," replied the Queen, "and that is why I am here."

MOVEMENT OF GRAIN.

The Figures Surpass in Interest the Latest Fiction.

Western Canada's crop year commences on September 1st and ends on August 31st the year following. So it happens that during September, those chiefly interested in the marketing of the crop, collect and compile statistics to show how the details compare with those of the preceding twelve months.

Grain figures are of interest wider than most. To the multitude concerned in the movement of grain from the farmers' siding to the consumer, they surpass in interest the latest fiction. To the business section, they speak of obligations met and credits removed; to manufacturers, as foreshadowing a revival of ordering and a busy season for the industries; to the farmer and his people, they take tangible form in new articles of comfort about the home; but to the men on the railways, they provoke reminiscences of days and nights on the road, and continuous striving to keep the ordinary traffic of the country in motion while the wheat was moving to the sea.

During the twelve months ended August 31st, the Canadian Northern Railway handled over its lines between Lake Superior and the Rocky Mountains, 109,122 cars of grain produced along its rails, and inspected by the Government at Winnipeg, Calgary and other points in the West. This is an increase of 69,828 cars over the total of the last previous year, and represents a gain of 176 per cent. A modern box car carries 1,200 bushels, so that the figures mean really, that the Canadian Northern transported over its steel more than 130,000,000 bushels of grain.

Coupled together, these 109,122 cars would form one continuous train from Toronto to Montreal and back, and up north as far as Parry Sound. Split this up into freight trains of fifty cars each, which is the average over the Canadian Northern between Winnipeg and Port Arthur, and there are 2,182 trains, each with locomotive, caboose and train crew. The cars handled over and above the total of the year before, would constitute a train continuing without a break from Toronto to New York.

The terminal elevators at Port Arthur have been making records also. Of the crop of 1914, the movement of which closed on August 31st, 1915, the Canadian Northern Railway elevator at Port Arthur, the largest consolidated elevator in the world, handled 18,000,000 bushels. Of the crop year which ended with August last, the same elevator handled 56,884,560 bushels. Its receipts of wheat alone this year totalled 28,582,531 or more than twice the handlings for the elevator of all grains during the preceding crop year.

A woman isn't afraid to trust her husband anywhere so long as she makes the trip, too.

OVER NINE MILLION DOLLARS

What Forest Fires Cost Canada in the Year 1916.

Canada has lost through forest fires in 1916 over nine million dollars. This equals more than six times what has been spent on forest protection work from coast to coast.

The enormous sum wasted through this year's forest fires most of which were preventible, would add another $480 to the first year's pension allowances of nearly 19,000 Canadian soldiers.

It is noteworthy that while some parts of the Dominion owe to rainy weather their immunity from fire damage, the season's record proves beyond gainsay that in areas where first rate fire protection systems were in operation, losses of life and property were held down to a remarkable minimum.

Quebec had some heavy fires in the Lake St. John and Saguenay districts, also in the Gaspe peninsula and west of Escuinca on the Transcontinental railway. It is a striking fact, however, that within the 24,000 square miles of Quebec, covered by the two well-organized associations of limit holders, the amount of green timber burnt is practically negligible. This immunity was not a matter of luck but of consistent patient effort to educate settlers, lumber-jacks and others in care with fire, coupled with a system of promptly reporting all outbreaks, and attacking forest fires in their incipiency with large forces of men and modern equipment.

British Columbia faced fairly favorable fire conditions through the summer months and the cost of fire fighting was reduced by about 75 per cent. over the record of 1915. The number of fires was about half of last year. The British Columbia forest protection service is the most complete in Canada thus far and the saving of timber is a logical consequence.

A heavy average of rainfall kept fire troubles at arm's length in Alberta. Saskatchewan and Manitoba and this weather condition was undoubtedly responsible for the escape of the main areas of big timber throughout Ontario. The Claybelt fires at the end of July and first week of August provided a tragic sacrifice of 202 lives and what is estimated to be six million dollars worth of property. There was practically no forest guarding organization in the fire-swept district, except along the railway track.

New Brunswick escaped the risks of 1916 with a very small timber loss. Nova Scotia having a similar experience. The records of the Dominion Railway Board show that the private-owned railway lines of Canada have not been responsible this year for any damaging forest fires. Those that were started were promptly extinguished by railway employees.

GOLD CORD A WAR PERIL.

Now Very Difficult to Distinguish An Officer.

One of the earliest lessons of the war was that of the danger to officers in allowing them to wear badges of their rank, gold cord around their cuff sleeves, gold decorations on their headgear, etc., which marked them out to the enemy's picked shots and resulted in unnecessary and avoidable losses among them, says a Paris despatch. This lesson was learned, and now it has become so difficult at the front to identify an officer that a failure to salute is overlooked on this ground.

There seems, however, a chance that this danger is being revived by the regulations making the wearing of chevrons obligatory. These chevrons are in the form of an inverted V and are worn on the right arm between the elbow and shoulder to denote that the wearer has been wounded, and on the left to show the length of time he has been at the front, one showing one year of active service, two for eighteen months. They are worn in all sorts of material and colors, officers wearing them in gold and silver. When worn on leave or during convalescence their visibility is a good point, but at the front they draw upon their wearers the same danger that badges of rank formerly did.

PROPOSING WITH A SPLASH.

To Break Jar Over Girl's Head is Avowal of Love.

The land of the Tarascans lies due west of the city of Mexico, and here the natives retain many of their practices which were well established when the Spaniards first landed at Vera Cruz. Here is the accepted method of courtship, for example:

The lover goes to the spring where the object of his affections is accustomed to fill her water jar. He holds her shawl until she accepts him, and then, with a stick, he breaks the jar which she holds on her head and gives her a betrothal baptism of water.

According to Prescott, the Tarascans had a Noah, called Trespi, who escaped from a great flood in a boat laden with animals. Instead of a dove, Trespi sent out a vulture first and then a humming bird, according to the legend.

The Tarascans once possessed the secret of tempering copper, an art now lost to the world.

There is a speed limit of twenty-five miles per hour for motor-cars at the Front in France.

DEEDS WORTHY OF VICTORIA CROSS

THOUSANDS OF THEM ON THE BATTLEFIELD.

Remarkable Story of the Man With the Bent Nose at Pozieres.

"You must never suppose that the only deeds of heroism are those that get into despatches and win decorations," said a wounded senior officer landed at Southampton, England; "scores of thousands of V.C.'s have been earned by our brave fellows since July 1.

"Take this last 'do,' now, from Pozieres, the one I was knocked out in. I was knocked over in a bit of a hollow. I was rather dazed at first. Then I heard the order given several times for our chaps to get back to the trench. I saw a big, burly, dark chap, with a queerly bent nose, making back for our trench. It was queer to see him striding back in that jerky, hesitating sort of way, as though a string were pulling him after the Boches, but not strong enough to overcome the pressure the other way of discipline.

Cowardly Boches.

"He was just on the edge of my hole when he swung right round, facing the Boches, and I saw what he saw, twenty or thirty paces off. Two of our men were down, wounded, and three Boches were prodding at them with their bayonets, meaning to take them along back, you see, as prisoners. The poor devils struggled up to their feet and fell again. They'd nothing in their hands. The Boches were yelling at them to get on, and as one fell again a Boche kicked him on the side of the head.

"At that, my big chap with the twisted nose let out a roar like an angry bull. 'You dirty German swine!' he yelled, and he made one bolt of it for those Boches. Mind, there were plenty of bullets flying, and there wasn't a sign of another man of ours about then on his feet. Run! That fellow fairly bounded over the broken ground. The Boches ran, too, and they yelled and screamed like frightened women. One of them got clear away; but my dark chap struck one through the back, and the other he just jumped on, brought him down, and smashed him.

Crawled With Wounded.

"The fire got a bit hotter, and I saw no more of the dark chap. Most have been bowled over, I thought. And I was sorry for that. But five minutes later the fire slackened again, and next thing I saw was my dark chap crawling past the side of my hole with one of those wounded men of ours on his back. I thought that was pretty good for him. But ten minutes later hanged if he didn't come striding past me again; no crawling this time; walking at his full height, and with a regular swing, as if he'd been crossing a parade ground, instead of a ploughed up No-Man's-Land, with a dropping fire falling across it.

Rescues Second Man.

"I plainly saw him get hold of that other wounded man of ours and fix him across his back; but then he went down on hands and knees and started crawling back for the trench. You see, he'd go upright himself, but preferred to give the other fellow a better chance by crawling; though, mind you, it's not easy over ground like that. I lay very low, partly to escape fire, and partly because I didn't want to attract that dark chap's attention, or I felt he'd come out again for me; and it was hardly to be expected he'd get through three trips alive."

ATTACKED BY AN APE.

Wife of President of France Has Terrible Experience.

While the President of France and Mme. Poincare were taking an after-dinner stroll in the gardens of the Elysees recently, the President was summoned to read some despatches that had just come from the front. He had hardly re d his study when he heard screams from the garden, and rushing back, the President learned from Mrs. Poincare that the moment he left her she had been attacked by a "strange being."

While an inquiry was being made Dr. Henri de Rothschild, who lives a few doors away from the Elysees, arrived on the scene and explained that an ape which had been sent to him had escaped from its cage and had been seen climbing over several garden walls in the direction of the Elysees.

The ape was found in a tree, but it was not until a Hindu attendant had been summoned that the animal could be induced to come down.

Well Fixed.

"I see Smith is building a garage. When did he get a car?"

"He hasn't got one yet but he's got an option on 10 gallons of gasoline."

Old-Fashioned.

"They're old-fashioned people."

"In what way?"

"They still have fried potatoes and pork chops for breakfast."

GRANITEWARE SALE

IN COMMON with most goods, there has been a strong tendency towards upward prices on graniteware since the war commenced. Only a few days ago we received notice of another general increase in prices from several large factories. We have, however, been successful in getting a limited quantity at special prices which enables us to retain the old prices, and in some cases reduce them for a short time. We suggest early shopping to get pick of the stock.

Berlin Covered Kettle

Nicely finished Berlin Kettles, seamless, with strong wire bale and wood handle. Attractive tin cover.

Sale price, 4 qt size, 25c each
Sale price, 6 qt size, 35c each

Dish Pans

Extra deep Dish Pans, made with grooved edge and strong wire handles.

10 qt size, 25c each
14 qt size, 35c each

Preserving Kettles

Lipped Preserving Kettles with strong wire bale, black enamelled handles. Extra deep and a well constructed kettle throughout. 3 qt size 15c each, 8 qt size 25c each.

Lipped Sauce Pans

Well made Granite Lipped Sauce Pans, strong handles securely attached.

4 qt. size, 15c each
5 qt. size, 20c each

Tea Kettles

Extra strong Tea Kettles with special mouth piece. Extra strong bale with black enamelled wood handle. 3 qt size, 45c each, 4 qt size, 55c each.

Wash Basins

Smooth finished Wash Basins in Hesperler made enamelware. Good depth, made with grooved edge. No 30 size, 15c each, No 32 size, 19c each.

Mixing Bowls

Beautifully decorated Hesperler grade enamelware Mixing Bowl. A smooth bowl with an attractive finish in every detail. 3 qt size, 17c each.

Water Pails

Seamless enamelware Water Pails. Well made and finished. Complete with strong wire bale and wood handle. 10 qt size, each 40c.

Dippers

Extra deep Granite Dippers, seamless with strong handles.

3-4 qt size, 12c each
1 qt size, 15c each

These goods are well finished, and have those long wearing qualities that will give you satisfaction.

EDEN GROVE

This is the kind of weather that makes a fellow feel like looking up his last year's mittens.

The fowl supper, the great annual event, given under the auspices of the Methodist church Monday evening, notwithstanding the jukey weather, was a decided success. Early in the evening autos, carriages, &c, filled with the cream of the surrounding country, commenced to come in, everybody looking happy and bent on enjoying themselves. About seven o'clock the famous Chesley choir, numbering 25 members, followed by a large number of their admirers, arrived. After partaking of a most delicious supper served by the ladies of the church, all adjourned to the church which was well filled. A splendid program was rendered by the Chesley choir under the leadership of Mr Sanderson, an Eden Grove boy. Rev J Crichton, of Paisley, acted as chairman, and kept the large audience in the best of humor.

Mrs Clark, of Cargill, spent Sunday with friends in the Grove.

The proceeds of the Red Cross social evening amounted to over $14. Quite a number from Cargill were present.

Mrs Loughlean, of Cargill, visited friends in town on Sunday.

Mr and Mrs Pearson and son Melvin were in London on Saturday seeing the 160th off.

Mrs Tennant visited Paisley friends last week.

Rev J Crichton, of Paisley, delivered two very able and impressive anniversary sermons in the Methodist church on Sunday. The choir rendered special music which was also much appreciated by the large audiences present.

Miss Long, teacher at Dunkeld, Miss Lena Pinkerton and Miss Knox, of Pinkerton, were among the outsiders who attended the social evening held in the Masonic Hall last week.

Our heroes have not all gone to the war. We noticed a means trotting up the church isle Sunday evening and not a woman climbed up on the top of the pew. Great presence of mind.

GRESHAM

Mr Bell, of Sangeen, preached here and in Underwood last Sabbath very acceptably.

Miss Ida Rankin, of Sangeen, spent last week with her friend, Mrs Leonard Shipley.

Mrs Alex P Mewhinney and niece Miss Marie, were down to London last week to see the 160th Battalion off.

We are pleased to learn that Mr T Curry, of the 6th, who was very ill, is improving nicely.

Mr J R Aitchison and family motored up from Clifford last week and visited at Mr Woods'.

Friends from Cargill visited at Parker Bros' last week.

Mr Michael Nelson is visiting friends at Orangeville.

The W M Society held their annual thankoffering meeting in the church here last Thursday. Underwood, North Bruce and Pinkerton auxiliaries were well represented. Mrs Gale, of Pinkerton, gave an excellent paper on Korea, which was much appreciated. Besides the president, who was in the chair, those who took part were Mrs (Rev) MacNab, Mrs Kelly, Mrs Cameron, Mrs McDougall, Mrs McKay, Miss McKenzie, who had charge of the musical part of the program, also rendered a solo. Miss McDonald gave the address of welcome. Tea was served at the close.

EBENEZER

Miss Annie Hanbidge, who is attending Normal School in Stratford, spent Thanksgiving under the parental roof.

Mr and Mrs C A Thomas visited friends in Chesley on Saturday and Sunday.

Mr and Mrs Ed Scarrow, of Owen Sound, and Mrs Darroch, of Collingwood, motored over from Owen Sound and spent Sunday at J H McFadden's.

Mrs Jos Howley, of Greenock, visited Mrs Geo Grant last week.

The Epworth League convention, which was held at Allenford, was attended by about a dozen of the League members here. All report a good and profitable time. Over 100 delegates were present from other Leagues in the district. Wiarton League won the pennant for having the best report and most delegates present.

WILLOW CREEK

Plowing goes better since the recent rains.

All the farmers have threshed here. The turn out was fair. The season being dry, the grain was well cured. Grasshoppers were scarce, but there is a "hopper" in this neighborhood that comes into the barns and takes the grain out in a bag.

Some cars have run dry since prohibition came in.

Mr and Mrs D Nelson of Tiverton have purchased the Commercial Hotel in that village and will operate it under the standard license.

Rev M D Hallman is the new pastor of the U B church here. Service is held every Sunday evening at 7.30 o'clock.

SECOND CON ELDERSLIE

Died—On Oct 14th, at his late residence, Samuel Patterson, sr, aged 68 years and 7 months. Funeral on Oct 17th, from the residence of his son, T H Patterson, to St Andrew's cemetery.

Mr A Young was confined to his room for a few days last week with a severe cold, but is able to be out again.

Mr and Mrs Wm Patterson came up from Toronto on Saturday to attend the funeral of the former's father, the late S Patterson.

Murdoch Campbell arrived home from the west last Wednesday.

The threshing operations in this section will be completed this week.

Tom Smith, jr, who has been on the sick list, is better and able to attend to his work again.

A prayer meeting will be held in Manley's school on Tuesday evening.

(Intended for last week)

Mr and Mrs J Vanzice, Mr and Mrs W J Allan attended the wedding of Miss Lillian Brown at Keady on Sept 8th. Miss Lillian Brown acted as flower girl.

Mr and Mrs Jas Vanzice and Master Allan, Mr and Mrs Tho Neal and family visited Bowie friends recently.

It was truly a day of Thanksgiving in the home of Mr and Mrs Alex Anderson of Scone, on Monday when their son, Pte Duncan Anderson, who was wounded some months ago, returned home for a two months' visit. Pte Anderson is suffering from a bullet wound in the breast, but his many friends here hope to see him soon strong again so that he may be able again to go "another bit" for his King and country.

Mr Gillies Campbell, of Fort William, arrived home on Monday to attend the funeral of his brother-in-law, the late Thos Pepper.

Mr D U Lillico, of Toronto, and Miss Mabel Lillico, of Shelburne, spent Thanksgiving under the parental roof.

A feeling of deep sorrow passed over this community on Friday evening, Oct 6th, when it became known that Thos Pepper had passed away. Deceased had not been in robust health for some time, but about two weeks previous to his death typhoid fever developed, finally his sister, Miss Aggie Pepper, trained nurse at New York, was called and every care and attention that loving hands and medical skill could render were done for him, and until about a day before his death hopes were entertained for his recovery, but heart trouble came and the disease was too much for mortal strength. Thos Pepper was born and raised on the farm on the 4th of Elderslie and Bruce, received his public school education at S S No 15. About 19 years ago he purchased the farm on the 2nd con, and he with his sister Maggie came to live there. About 7½ years ago he purchased the 50 on the 3rd con and moved there. On May 15th, 1907, he was married to Maggie May Campbell, who with one son Garland and two daughters Margaret and Eva, are left to mourn the loss of a loving husband and father. He also leaves to mourn his loss one brother, Wm Pepper, of township Eld and Bruce, and three sisters, Mrs J Mee and Mrs Dr Mee, Mrs T Patterson, 2nd con Kld; Miss Aggie Pepper, of New York. Mr Pepper was a member of the Presbyterian church, and the funeral service was conducted by his pastor, Rev J A Hiltz, a large number of friends and relatives assisted at his late home on Tuesday to pay their last tribute of respect he has been a worthy citizen of the community. The floral offerings were numerous, each one the tribute in which it was used by all. He was a member of the O O F, and the local Court with which he was connected took part in the service at Chesley cemetery, where his remains were laid to rest. The friends and relatives have the deepest sympathy of this community in their time of sorrow.

SAUGEEN COUNCIL

All the members of Saugeen Council were present at their meeting on Sept 30.

J W Anderson asked to have snow fence built on McGillivray's hill. The council will furnish 600 ft lumber and nails, and road division will furnish posts and erect fence.

Accounts amounting to $133.70 were ordered paid, being mostly for gravel contracts.

Reeve Christie presented an offer from the C P R to provide for removal of water from bridge near Conner's station if council would agree not to ask to have bridge raised. No action taken.

In response to the Red Cross appeal it was decided to make a canvass of the township on Oct 19th, and a committee of 34 was appointed to take charge. Reeve Christie is president, F W Elliott sec'y-treas, and the canvassers in ward 1 are A Cairns, A Davidson, J T Wallace, C Nelson, P A McKinnon, C Kelly, Arthur Campbell; in ward 2, And Miller, A Rowand, John Scott, J W Reany, J B Lyness, Walter Gowanlock, jr.

Council adjourned to meet again on Nov 4, when wire fence bonuses and gravel accounts will be paid.

F W ELLIOTT, Clerk

Bruce Tp to Give $1000 to Red Cross

On the evening of Oct 14 a public meeting of the ratepayers of Bruce Township, called by the reeve to consider the second appeal on behalf of the British Red Cross, met in the Tp hall, Underwood. After all present who wished had spoken on the subject it was decided to ask the council to contribute the same as last year, this seeming to be the quickest and best way to reach every ratepayer of the Township, any one else wishing to "Do their bit" by contributing to this worthy cause, or any ratepayer wishing to contribute more towards the comfort of the brave boys who may be injured while defending our homes and empire, against Prussian militarism, are invited to hand their contributions to the Township treasurer, as evidenced by the following motion, which was carried unanimously.

Moved by Robert Brown, seconded by Archie McLean, that as on the 19th of Oct 1915, a Trafalgar day contribution is asked from all municipalities towards the support of the work of the British Red Cross, this money to be raised by subscription or otherwise as seem best, this meeting would ask Bruce Tp council to contribute the sum of one thousand dollars towards British Red Cross work for 1916-17 this amount to be provided by special levy as authorized by Ontario Statutes. Also that any person or persons wishing to contribute any more be invited to do so by sending their contribution to the Township treasurer.—Carried unanimously.

Health for Sick Women

For Forty Years Lydia E. Pinkham's Vegetable Compound Has Been Woman's Most Reliable Medicine —Here is More Proof.

To women who are suffering from some form of woman's special ills, and have a constant fear of breaking down, the three following letters ought to bring hope:—

North Crandon, Wis.—"When I was 16 years old I got married and at 18 years I gave birth to twins and it left me with very poor health. I could not walk across the floor without having to sit down to rest and it was hard for me to keep about and do my work. I went to a doctor and he told me I had a displacement and ulcers, and would have to have an operation. This frightened me so much that I did not know what to do. Having heard of Lydia E. Pinkham's Vegetable Compound I thought I would give it a trial and it made me as well as ever. I cannot say enough in favor of the Pinkham remedies."—Mrs. Mayme Asbach, North Crandon, Wis.

Testimony from Oklahoma.

Lawton, Okla.—"When I began to take Lydia E. Pinkham's Vegetable Compound I seemed to be good for nothing. I tired easily and had headaches much of the time and was irregular. I took it again before my little child was born and it did me a wonderful amount of good at that time. I never fail to recommend Lydia E. Pinkham's Vegetable Compound to ailing women because it has done so much for me."—Mrs. A. L. McCasland, 509 Have St., Lawton, Okla.

From a Grateful Massachusetts Woman.

Roxbury, Mass.—"I was suffering from inflammation and was examined by a physician who found that my trouble was caused by a displacement. My symptoms were bearing down pains, backache, and sluggish liver. I tried several kinds of medicine; then I was asked to try Lydia E. Pinkham's Vegetable Compound. It has cured me and I am pleased to be in my usual good health by using it and highly recommend it."—Mrs. B. M. Osgood, 1 Haynes Park, Roxbury, Mass.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

To the Editor of THE ADVOCATE:

Why is the baker always made the talk when the price of bread is raised a cent a loaf? There is a cry in many of the large cities and towns for a civic investigation and the establishment of a municipal bakery. It is charged that the baker is an extortioner, that he is getting rich quick at the expense of the public, and robbing the poor, over-worked people by his unjust exactions. Long, plaintiveinary editorials are printed about bread being the "staff of life" and how impossible it is to do without it, that it forms the chief diet of many families and should be sold practically at cost. These critics forget that bread is not in the nature of a monopoly, that every housewife is a potential competitor of the baker, that she can resort to the virtue of making her own bread. If it is necessary to raise such an inhuman cry about bread why does not the shout of disapproval and criticism go up when meat, sugar, milk, fruit, beans, potatoes and other household requirements are raised in price? Against this there is practically no protest, yet the average household cannot provide meat, sugar, milk in the same way as bread. If it is necessary to institute an inquiry into the price of bread, why not make it cover the rising cost of meat, sugar, butter, flour, eggs, potatoes, canned goods and other food stuffs. If it is necessary to establish a civic bread factory then why not a civic grocery, butcher shop, dairy or dry goods store—it is a poor policy that won't work both ways. It has become necessary for the price of bread to be raised to 6c per loaf of 24 ounces. The local baker does not control the market, nor does he dictate to others what they must sell bread for. It has become general. It is not only a municipal matter, but a world-wide price, and some critics at the present time are selling a 24 ounce loaf for 5c. If this is not enough to convince the critics of the local baker that it was necessary for him to raise the price of bread, and that he is not an extortioner and robber, and that he is not in a "get rich quick" scheme he is willing to produce figures to any reasonable thinking man that his profits are low and that he is not under the present condition making fair wages. Of course, we know there is always a class that delights in cheap goods. But I speak to the thinking housewife and thinking man that I am only one of many bakers that have been talked about, and if it should be that the price of wheat and flour should soar to such a price that it would become necessary for bread to go up in price again do not blame everything on the poor baker.

Yours for fair dealing.
P S MACLACHLAN

Red Cross Work Appreciated

On Dec 13th, 1915, at the home of Mr A P Mewhinney, Bruce Tp, they were busy making bandages for Red Cross, and also other work. Mr Mewhinney's little daughter, Paulette Jean, wrote her name and address and put it in one of the bandages. Last week she received the following letter from Sergt-Major G H Green. The letter speaks for itself and should give a great deal of satisfaction. They do not know how much they are doing until incidents such as these are brought to their notice:

Sept 18th, 1916.

DEAR UNKNOWN FRIEND—This is perhaps a strange beginning for a letter, but it is the only one I can think of suitable for the occasion. The other morning, while sister was dressing my wounds, your name was noticed and the request to write you was found attached to a roll of bandages. I am taking the opportunity to let you know that the results of your kind work on behalf of the wounded have been realized. Perhaps a few particulars about myself might be interesting. I enlisted on Sept 2nd, 1914, went to the front with the 1st Div and by January, 1915, passed the rank of Company Sergeant Major, the duty list, while the best part in the great offensive was shot through the right leg and right elbow. After a short time in hospital I was sent to "Blighty," where I am now in hospital and doing well. Although I am in a Canadian hospital I belong to the county of Durham in the north of England, where my parents live, and I am writing this letter with my left hand and hope you will be able to read it. Will you do me the favor of writing back in answer to this as perhaps you would like to know more about the work and perhaps help to relieve the monotony of lying in bed. With all good wishes, I am, yours sincerely,

Pte. GREEN, No. 2 Wing, Dominion Convalescent Hospital, Canadian Red Cross Hospital, Taplow, England.

P.S.—In addressing the envelope as "Miss" in the absence of the necessary information on the address enclosed.

AUCTION SALE
— OF —
Horses, Livery Stock and Farm Implements

The undersigned has received instructions from Mr. Peter Ross, Paisley, to sell by public auction on the premises, old North End Livery, on

Saturday, Oct 21st

Few Hallowe'en Pranks, but an Incendiary Fire

The town authorities got wind of depredatory plots for Hallowe'en, and nipped them in the bud. A proclamation was issued, signed by the reeve, giving notice that lawlessness would be prosecuted to the extreme limit of the law, and extra nightwatchmen were put on the streets. These precautions held the soft pedal down, sure enough. The customary programme of turning everything upside down that could be handled by a husky young "gang," or changing the location of everything movable was abandoned for the year 1916. We haven't heard of more than two or three wheeled vehicles being shifted around, and that seems to be the extent of the pranksiness that prevailed. The calm was rudely broken by the ringing of the fire bell about 4.40 on Wednesday morning for a blaze which consumed the summer house in Mr Ballachey's grove. Whatever the cause may have been, it looks like the hand of an incendiary.

—Mrs Stauffer, of Walkerton, is visiting friends in Paisley and vicinity.

—Mr Rich Reasy has sold his property at the north end of the village to Mrs Jas Rowley.

—Mr and Mrs Henry Crowe are leaving Port Elgin and taking up their residence in Guelph.

—Mr and Mrs A R Evans and children motored up from Fordwich to spend Sunday at the home of her brother, Mr Chas Brigham.

—Mr Wm Shouldice, lot 7, con 15, Brant, is giving up farming and will have an auction sale on Thursday, Nov 9th. See list in this issue.

—Mr John Alexander, of Greenock, has bought the McGill residence and property on Victoria St, and intends becoming a resident of Paisley.

—Heath & Brown, blacksmiths, have dissolved partnership, Mr Brown retiring because of the strain upon his health. The business will be continued in the old stand by Mr Heath.

—The Women's Institute will meet at Mrs P B More's, on Thursday, 2nd Nov, at 2.30 p.m. All interested whether members or not are cordially invited. Knitters please bring their work.

—The Methodist church was crowded on Sunday for the union service. Rev Mr Neilson, of the Baptist church, gave an excellent discourse. The collection was in aid of the Lord's Day Alliance.

—Mr and Mrs W S Given, of Millbrook, were here visiting old friends for a few days, guests at the home of the latter's sister, Mrs C L Carter. Mr Given is editor of the Millbrook Reporter, and clerk of the town.

—Mr and Mrs P Sinclair, of Chicago, are visitors at the home of his mother, Mrs R Fleming, Queen Street. Mr Sinclair informs us that the sympathy of a very large majority of the people of Chicago is with the Allies in the present crisis, and that pro-Germans have become comparatively meek since the tide of war has begun to set in against the Kaiser's hosts. Very lee interest is felt in the presidential election this year.

160th Safely Crossed the Briney

The welcome news—this time authentic—that the Bruce Battalion had reached port in England, along with several other units, was received on Tuesday morning.

Going Overseas

Spr Elroy McKenzie is home from Ottawa on last leave before going overseas with a draft of the Divisional Signallers. He is accompanied by his friend Spr W H Brown, who also goes overseas.

Entertainment, Nov 13th

In Town Hall, Paisley, under auspices of the Women's Patriotic League. Elocutions and lecture by Lottie I Tillotson of Hawaii, and musical programme by local talent. Admission 25c and 15c.

Wounded in France

Gunner Dan Roppel, son of Mr and Mrs Menno Roppel, 6th Bruce, was wounded on Sept 18th, and admitted to No 1 General Hospital, Etretat. He enlisted with the 65th Batt at Prince Albert, Sask, on Nov 13th, 1915, but transferred at Winnipeg to the 24th Battery of artillery. They left for England in February last, went to France in July and Gunner Roppel has been on active service ever since until wounded. No particulars have been received yet.

About Boys Overseas

Pte Lawrence Stanley, who had been out of the hospital after being wounded by shrapnel, is again under the doctors' care at Shorncliffe Camp. The muscles of his back were so injured that Lawrence may be unfit for duty in the trenches again. Pte Frank Boyle, in a recent letter home, tells of being accosted in France by an officer who turned out to be an old scalmate in Paisley school—Cliff Robertson, son of stationmaster Robertson, now of Drayton. Ptes Jas Sparrow and Harvey McLennan, who reached Shorncliffe a few weeks ago, have met a number of the Paisley boys there—George McLelland, Wilfred McArtop, Lawrence Putnam and Emerson Pearce.

—At the close of the war conditions will make another change. They will never be as previous to July, 1914. Changes that will surely affect the farming industry will take place. You want to be prepared for this change. The Weekly Sun will do its part for you by keeping you posted on the different changes that are likely and how they will affect the farmers. It remains for you to help a paper that has served its subscribers and the Ontario farmer generally so faithfully during the past quarter of a century. The subscription price of The Sun remains the same as formerly and is cheap at the price. We will be pleased to accept subscriptions for The Sun at this office.

About the House

Useful Hints and General Information for the Busy Housewife

With Corn Meal.

Indian Meal Bread.—One and one-half cups Graham flour, one cup corn meal, one-half tablespoon soda, one teaspoon salt, one-half cup molasses, one and two-thirds cups milk. Mix and steam as Boston brown bread.

Crisp Corn-Meal Cake.—One cup milk, one-half cup white corn meal, one-half teaspoon salt. Mix the ingredients and heat slowly until the boiling point is reached. It is not necessary to stir. Spread on a shallow buttered pan to a depth of about one-fourth of an inch. Bake in a moderate oven until crisp.

Apple Corn Bread.—Two cups white corn meal, two tablespoons sugar, one-half teaspoon salt, one teaspoon soda, one teaspoon cream of tartar, one and two-thirds cups milk, three tart apples pared and sliced. Mix the dry ingredients, add milk, and beat thoroughly. Add the apples. Pour into a well-buttered shallow pan and bake thirty minutes in hot oven.

Fruit Gems.—One cup corn meal, one cup milk, one teaspoon salt, one teaspoon baking powder, one-half cup raisins, one-half cup currants, one-half cup cream. Cook the meal and salt in the milk for a few minutes. When cool add the baking powder and beat thoroughly. Add the fruit and cream and bake in well-buttered muffin tins.

Boston Brown Bread With Cream.—One cup rye meal, one cup corn meal, one teaspoon salt, one-half cup molasses, two eggs, one and a half cups thin cream. Sift the dry ingredients. Add molasses, yolks of eggs well beaten, and cream; lately, fold in the whites of eggs beaten stiff. Pour mixture into buttered mold, steam three hours; then bake one hour in a moderate oven.

Boston Brown Bread.—One cup corn meal, one cup rye meal, one cup graham flour, two and one-half teaspoons soda, one teaspoon salt, three-fourths cup molasses, two cups sour milk, or one and three-quarter cups sweet milk. Mix and sift the dry ingredients and add the molasses and milk. Beat thoroughly and steam three and a half hours in well-buttered, covered molds. Remove the covers and bake the bread long enough to dry the top. This may be made also with one and one-half cups corn meal and rye meal and no graham flour.

Buttermilk Waffles.—Three cups water, two cups corn meal, two cups wheat flour, one cup sweet milk, four eggs, two tablespoonfuls butter, two teaspoons salt, one and one-half teaspoons soda, buttermilk or sweet milk enough to thin batter. Cook the meal, water, salt and butter together in a double boiler for ten minutes. When the mush is cool add the eggs, beaten separately until very light. Sift the flour and soda together. Add the flour and the sweet milk alternately to the corn meal mixture. Finally add the buttermilk. This mixture is improved by standing a short time.

Parched Corn-Meal Biscuits.—One cup yellow corn meal, two teaspoons salt, two cups peanut cream. Put the meal into a shallow pan and heat in the oven until it is a delicate brown, stirring frequently. Make the nut cream by mixing peanut butter with cold water, and heating. It should be the consistency of thick cream. While the nut cream is hot, stir in the corn meal, which should also be hot. Beat thoroughly. The mixture should be of such consistency that it can be dropped from a spoon. Bake in small cakes on a greased pan. If preferred, these biscuits may be made with cream or with butter in place of peanut cream, and chopped raisins may be added, one cup being the allowance for the quantities given above.

Sour Milk Corn Bread.—Two cups corn meal. Two cups sour milk. Two tablespoons butter. Two tablespoons sugar, white or brown. One and a half teaspoons salt. Two eggs. One teaspoon soda. One tablespoon cold water. There are two ways of mixing this bread. By the first the meal, milk, salt, butter and sugar are cooked in a double boiler for about ten minutes. When the mixture is cool, the eggs are added well beaten and the soda dissolved in the water. By the other method all the dry ingredients, including the soda, are mixed together, and then the sour milk and eggs well beaten and the butter are added. If the second method is followed the cold water is not needed. The bread should be baked in a shallow iron or granite pan for about thirty minutes.

Beaten Corn Bread.—Three-fourths cup white cornmeal. Three-fourths cup of wheat flour. One teaspoonful sugar. One-half teaspoon salt. One tablespoon lard. Water. Mix and sift the dry ingredients and rub the lard thoroughly into the mixture by means of a fork. Add a little water, enough to moisten the mixture throughout, but not too much, as it must be crumbly. Spread on a board and beat thoroughly with a rolling pin or mallet, as is done with beaten biscuits, folding it over frequently to introduce air. Roll out about one-half inch thick, cut into small pieces and bake in a moderate oven. In camp this can be baked in a hot greased pan propped up before a hot fire.

Gluten and Corn Bread.—Two and one-fourth cups yellow or white cornmeal. Three-fourths cups gluten, rye or wheat flour (preference being in order named). One and a half cups boiling water. One tablespoon sugar. One-half yeast cake (or one cake if haste is an object) dissolved in one-fourth cup lukewarm water. Two tablespoons butter, lard or a mixture of the two. Three teaspoons salt. Pour the cornmeal into a dish of boiling water. It is not sufficient merely to pour the boiling water over the meal in a cold dish. If yellow meal is used, heat it a little in addition to pouring it into the boiling water or mix meal and water and heat in a double boiler. When cool mix with the other ingredients and knead thoroughly. Place in a baking tin and bake when risen sufficiently.

Delicious Pie and Cake Fillings.

Dried Apple Pie Filling.—Three cupfuls of molasses, three cupfuls of dried apples, one cupful of sour milk, one cupful of sugar, three cupfuls of flour, three-quarters cupful of butter, one cupful of seedless raisins, two eggs, two teaspoonfuls of soda, one teaspoonful of powdered cloves, one teaspoonful of powdered cinnamon. The apples must be soaked in water overnight. In the morning chop fine and cook slowly in the molasses for about two hours. Then remove from stove and when cold add the other ingredients. Beat the eggs thoroughly and stir them into the mixture and bake in a slow oven.

Dried Fig Pudding.—One-half pound chopped figs, one and one-half cups of water, one and one-half teaspoonfuls of sugar, two eggs and two tablespoonfuls of powdered sugar. The chopped figs are simmered for half an hour in the water, and when nearly finished, sugar is added. The dish is then removed from the stove and when cool the beaten yolks of the eggs are added. Pour the mixture over the pie crust and bake until the yolks are set. The whites of eggs are beaten with powdered sugar and the meringue poured over the fig pie and browned.

Meringue Date Pie.—One-half pound of dates, two cupfuls of milk and one egg. The dates are heated slowly in the milk and are then soft are stoned and press through a colander. A beaten egg is added to the dates, or one tablespoonful of dissolved cornstarch can be substituted, if preferred, and poured on the pie crust. Before it is removed from the stove a meringue can by added or it may be served with stiff whipped cream.

Lady Helen Filling.—Three cupfuls of granulated sugar, one cupful of chopped raisins, one-half cupful of figs, one-half cupful chopped nut meats. The sugar is dissolved in boiling water and cooked until it threads, when it is poured slowly over the stiffly beaten white of an egg and stirred. Then chopped nut meats, raisins and figs are added and the cake filled and iced with the mixture.

Chocolate filling for layer cake. Two cupfuls of sugar, one-quarter cupful of chocolate, three-quarter cupful of milk, one tablespoonful of butter, one teaspoonful of vanilla. The grated or chopped chocolate, sugar and milk are boiled over a hot fire for about six minutes and then removed from stove. Vanilla is added and the whole beaten hard until the mixture has become sufficiently thickened, when it is poured quickly over layers.

Things to Remember.

Salt in whitewash makes it adhere better.

The stove with a red top will have a cool oven.

Always use the coldest of dishes to serve salad on.

Dried fruits are safer bought in packages than in bulk.

It is a good idea to have regular days for each kind of work.

If the shoes are too tight, the feet will get cold very quickly.

Peel onions under cold water to prevent the eyes from smarting.

Warm gingerbread, cottage cheese and apple sauce are delicious together.

Sprinkled on a carpet before sweeping, salt will lay the dust and revive the color.

Coffee made with an egg has a rich flavor, which egg alone can give.

Peeling a potato is like taking the cream from milk—you lose the best part.

Butter for the cake should never be warmed or melted, but beaten to a cream.

If bread is allowed to get too light before it is put into the oven it will be sour.

Olives and English walnuts ground together and moistened with mayonnaise make a good sandwich.

Orange peels thoroughly dried, then put on a bed of coals, will shoot forth spikes of many-colored flames.

Before putting a cork in a bottle put a few drops of glycerine on it. The cork will then be easily removed.

A nice way to serve cream cheese with salad is to roll it into a ball and place it on the side of the salad dish.

Always take the draughts off the kitchen range when you have finished cooking a meal, thereby saving fuel, place the cake tin inside a larger tin, place the cake tin inside a larger tin, or in a dripping tin containing salt.

Onion juice—applied by rubbing the freshly cut red onions across the surface to be pasted—makes a satisfactory strong adhesive for pasting labels on glass, tin or other metals.

It saves time in packing school luncheons to do them always in the same place, with the lunch boxes, paraffine paper, sharp knife, and paper napkins all close at hand.

Fruit soups are made of sifted, stewed fruit, thickened like cream soups with cornstarch, tapioca or arrow root and flavored to taste. They should be chilled before serving.

A use for old kid gloves can be made by cutting the palms of the gloves out and sewing them neatly into the knees of children's stockings. This will prevent them from wearing into holes.

Grease spots on the pages of books should be sprinkled with finely-powdered pipeclay, then a piece of tissue paper laid over the pipeclay, and the page pressed with a warm iron. Rub off with india rubber.

When colored clothing is stained with mud, let it dry and brush out all you can. Then apply a mixture of salt and flour; let it remain on, in a dry place for a day or two, then brush off.

MOST BEAUTIFUL ROYAL GIRL.

Rumanian Princess May Become the Queen of Greece.

The people of Rumania are very proud of Princess Elizabeth, the eldest daughter of Queen Marie and King Ferdinand. She is very fair, like her beautiful mother, and has the same golden hair and blue eyes, and the same dark eyebrows.

Her coloring and her upbringing have contrived to make Princess Elizabeth, who is just 21, look a typical English girl. Her education has been largely English. She had English nurses and indulged in English outdoor pastimes—riding, skating, driving and tennis. The Princess is a skilful driver and can be seen almost daily in the streets of Bucharest guiding her docgert through the congested traffic coolly and skilfully.

Though she can be vivacious and charming, Princess Elizabeth is silent rather than a talker, but when she speaks she shows thoughtfulness and shrewd common sense. She can read four languages. She has inherited a love of art from her mother.

As Princess Elizabeth is, perhaps, the most beautiful eligible royal girl in Europe it is but natural that gossips should link her name with that of one prince after another. It is practically certain, however, says an English authority, that the lucky man will be Prince George of Greece. The young couple are reputed to be very fond of one another and the match had the approval of their parents. It is said the formal announcement of the engagement was about to be made when war broke out. If the rumor is correct that King Tino is to abdicate in favor of the Crown Prince it is very probable that Princess Elizabeth will one day be Queen of Greece, for Prince George of Greece would undoubtedly throw in his lot with Rumania and the allies.

WAS INVENTED IN 1543.

Spaniard Really First to Build Successful Steamboat.

Fulton is famed as the inventor of the steamboat. Authentic history attests that he was not the inventor, declares the Philadelphia Inquirer. In 1543 Blasco de Garay, a sea captain of Spain, exhibited in the harbor of Barcelona, in the presence of Charles V. and his court, a steamboat capable of a speed of three miles an hour.

For nearly two hundred years Blasco de Garay's invention was lost sight of, and not till the end of the eighteenth century was the subject taken up again. European scientists became interested, and the result was the construction of a steamboat on the River Saone by Marquis de Jouffroy in 1769.

In 1788 Patrick Miller of Scotland built a steamboat. It succeeded so well that a larger one was built in 1789, when seven miles an hour was made. Eventually Robert Fulton built the Clermont, which made its trial trip in 1808. Robert Fulton has the fame of an invention that belongs to Blasco de Garay, who antedated Fulton by 265 years.

Priests in the Greek Church have their heads shaved quite bald.

THE FASHIONS

We have lately been hearing rumors from Paris that the period of the Directoire is likely to make itself felt again in our dress. Although these rumors have not been confirmed from all sides, here and there a costume appears highly suggestive of this period, so it will hardly be looking too far ahead to give it some consideration. Period styles keep recurring every little while, and for some time we have had no strain of the Directoire in our dress, so there will be little wonder if it should return very soon. And there will be little regret, too, for there is a certain dignity and stateliness about the costume of this period that makes it a favorite among many women.

In the accompanying sketch is a dress which shows the Directoire influence very markedly. This type of dress strikes the eye at once as being very distinct from other styles. At first glance one might easily mistake it for a coat on account of the large collar rising high at the back of the neck, the equally large revers and the double-breasted effect of the short, fitted body. At this season of the year a dress in coat effect is especially desirable, and one of this type has many charms. The long tunic parted in front and attached to the rather short-waisted body can be worn to advantage by the woman of average proportions.

Tunics are quite fashionable this season and there is a large variety of different styles. A novelty seen very recently was in the form of a long tunic reaching to the hem of the skirt, but it was placed only across the back of the skirt, barely starting from the hips. The dress in question was made of soft navy blue silk and the tunic was of very fine serge in a matching shade.

Collars, high in the back and open in front, on the order of the one in the illustration, are very good style. Even in separate collars to be worn with dresses and suits, the style that goes well up in the back and almost touches the hair is one of the very

7379

Reflecting the Directoire Style

newest from Paris. Most collars continue to be very large, though some small ones are seen.

A Skirt of Many Gores.

In the matter of separate skirts, there is a striking novelty which has made a strong appeal to many women. This is the fourteen-gored skirt, of which an illustration is shown here. Not even the number of gores has deterred them from taking a fancy to this skirt, the novelty and the effectiveness of it having far outweighed the task of making it. The most effective developments are in two materials, making the alternate gores of the different materials. Needless to say, in this lies the chief beauty of the skirt. One may use the same material in two contrasting colors or contrasting materials in the same shade. These skirts are often made in two colors of serge, as black and white, or brown and white; or they are made in combinations of serge and satin, broadcloth and velvet, or taffeta and serge. Taffeta or corduroy in two colors is very often employed with good results also.

As to Separate Blouses

The waists to go with separate skirts and suits are, as a rule, very simple. White and pale flesh-colored blouses are still favored, though the fashion of having the blouse match in color the suit with which it is to be worn is again coming in. For this reason there are some dark blouses seen. Satin and Georgette are combined for waists that form part of the

7370-7373

New Gored Skirt with Simple Waist

costume. The sleeves and upper part of the waist are generally of Georgette and the lower part which comes nearest the skirt is of satin. Striped satin is also used for waists combined with Georgette or chiffon. A charming model for dressy wear was made of blue and white striped satin with white Georgette. It had a large cape-collar.

These patterns may be obtained from your local McCall Dealer or from the McCall Co., 70 Bond Street, Toronto, Ontario.

THE EDUCATION OF OFFICERS

SEVERE TRAINING AT BRITISH MILITARY COLLEGES.

Cadets Are Forced to do Eighteen Months Work in Six Months.

Training of cadets at Sandhurst and Woolwich, is quite a different matter from what it was in times of peace. In pre-war days the shortest time cadets spent before getting commissions was eighteen months. Now the minimum is six months. And even this period may be abbreviated if the great army in the field calls for officers in a hurry. There are no vacations for cadets or instructors—nothing but hustle, hustle, hustle.

As between the Royal Military College at Sandhurst and the Royal Military Academy at Woolwich, virtually the only difference is that at the latter establishment the engineers and artillery are more thoroughly grounded in the science appertaining to their particular branches of the service.

At Sandhurst, which, by the way, is an exceptionally gloomy barrack-like building, situated in exceptionally pleasant surroundings at Cumberley, Surrey, there are usually several hundred cadets, and they are organized in companies on the same basis as a battalion of infantry.

Punishments for Cadets.

Specially selected officers of the regular army act as company commanders. They have the power of inflicting certain punishments on the cadets for breaches of discipline, but as the cadets are deemed to be gentlemen and are designed for a career the primary duty of which is to lead men, the company commanders are expected to maintain discipline among them by gaining their esteem and respect rather than by punitive measures.

Rustication and the sentencing of a cadet to lose places in the list of successful candidates for commissions are the heaviest punishments for minor offences. Removal from the college is a punishment reserved for more serious offences, but a cadet may be "removed" for other than disciplinary offences for any of the following reasons: First, moral or physical unfitness; second, unsatisfactory progress in his studies or physical exercises, and, third, if reported by the commandant as not likely to become an efficient officer.

Expulsion is the gravest punishment that may be inflicted, and is, naturally, inflicted only in extreme cases. The name of an expelled cadet is recorded at the War Office and is made known to the First Lord of the Admiralty, the Secretary of State for India and the Civil Service Commissioners, in order to prevent the expelled youth from subsequently entering the naval or military service or home, colonial or Indian civil service.

Medals Are Granted.

To take some of the disciplinary and routine work off the shoulders of the company commanders, who are also instructors, promotion to non-commissioned rank is granted to a number of cadets in each company, and one cadet is given the rank of under-officer. The latter acts as a subaltern to his company commander and assists him greatly in maintaining the general tone of the company. The under-officer's job is much sought after, because it carries with it a good many little privileges, as well as an accession of dignity.

In order to encourage industry in study a medal is granted to each of the two best qualified cadets of each half-yearly batch, while a sword is bestowed on the cadet considered to be the best qualified cadet of the year.

The principal subjects in which practical as well as theoretical instruction is imparted to cadets at the college are military field work (fortifications, bridge building, demolitions, etc.), tactics and typography (sketching, map reading and making, etc.). In addition, drill, riding and gymnastics are also taught.

The theoretical instruction is given to the cadets in the "hall of study," as the schoolroom is termed. Practical demonstrations of all matters that are dealt with theoretically are given in another place.

It is not, of course, all discipline and work at the college, for every sort of healthy sport and recreation is encouraged, and, as a matter of fact, enforced to a certain extent. Anything, however, in the shape of gambling or extravagance is very sternly discountenanced. The rules in this respect might, indeed, be said to verge on the sanctimonious, so very stringent are they.

Rules Are Strict.

At one time the cadets used to be a favorite mark for racing tipsters and the money lender fraternity's alluring circulars, but are not so any longer. The reason they have ceased to be so is because a cadet who now receives such circulars is under strict injunction to report the fact, and ill results thereby ensue to the tempters.

Extravagance also at one time held a very gay reign at the college, but was banished because of its bad moral effects on the wealthy lads and because it made the positions of the poorer cadets so embarrassing. Now no cadet is allowed to even incur a messing bill (over and above the ordinary charges of seventy-five cents a day, which the Government pays) of more than $15 a month, including beer and wine, on which he may not spend a greater sum than twenty-five cents a day, without the sanction of his company officer. This sanction is given only on special occasions, such as for the purpose of entertaining a guest.

Horses, ponies and dogs are not allowed to be kept by the cadets. Nor are the embryo officers, much as sport is encouraged amongst them, permitted to ride at race meetings, play polo or hunt the game on the estate.

Afternoon tea with each other is one "dissipation" which is allowed the cadets, but nothing in the shape of intoxicating liquor is permitted to be introduced into their rooms. Lights in rooms have to be turned out at 10.30 p.m. except on Saturdays and Sundays, when an extra hour's grace is granted. Under-officers may, however, keep a light burning for another hour.

HORSE BUTCHERS PROSPER.

Twenty Shops in London do a Thriving Business.

Prior to the war there was not a single shop in London, Eng., where horseflesh was sold for human consumption. A horse-butcher who started business in Soho, the centre of the Franco-Italian colonies, six years ago failed to obtain customers.

To-day, owing to the great influx of Belgian refugees and the high prices, there are over twenty horse-butchers, all doing a thriving trade, including five who are located in the south-west district of London, which abuts on aristocratic Kensington.

One of the probable effects of the war and the high price of beef and mutton will be that the London poor will acquire a taste for prime cuts of horseflesh at 7d. (14 cents) a lb., against beef and mutton at 1 shilling 6d. (about 36 cents).

Japan's Factory Law

Japan's new factory law which became effective September 1st affords food for thought. By its provisions a ten-year period is established during which an employe may be worked 13 to 13 hours a day. There are 10,000 children between 12 and 14 years of age and more than 100,000 children between 14 and 16 who work in Japanese factories. A skilled workman receives about 40 cents a day and the scale runs down to a few pennies to young children. Japan has instituted a new freight line on which to transport her products to foreign markets. This is the sort of competition which is preparing after the war sets world trade chaos.

Slightly on the Large Side.

The Recruit: "Sergeant, would you mind changin' this pair o' boots for me? They're too big. (Apologetically) "I think what you was lookin' at on the paper was my age, not the size of my feet."—London Opinion.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XIV.—(Cont'd).

"There is some, sir," said he, "but it is rather faded. The fact is we are not often asked for it, and this has been in the house for some time. If it is of any use to you I will charge you less than the usual price for it."

The captain turned it over indifferently, and separated the sheets with his finger.

"No," he said, "I think paper will do." Then he raised his eyes to a shelf behind the shopkeeper's head and said, suddenly: "Is that sealing wax up there? I think I'll have some."

The man reached a ladder and climbed up for it.

While his back was turned Captain Murpeint skilfully abstracted a sheet of parchment from the heap and slid it into his pocket, coughing the while to cover the sound of the crisp rustle, and flinging his umbrella down upon the remainder so as to account for the sound if his cough had not covered it.

The shopman descended quite unsuspiciously, however, and the captain, having added the sealing wax and some red tape to his purchases, took his leave, refusing all the obliging stationer's offers to send the parcel home, and carrying it in his hand.

From the High Street he then made a slight divergence to one of the smaller thoroughfares, and paused before a small shop which displayed in its little window a sample of some of its varied stock.

He purchased several small articles and then inquired in the most natural manner for a flour dredger.

"I do not know what it is," he added, with a smile, as the good woman looked rather surprised; "but I have been commissioned to purchase one for a lady."

"Certainly, sir," said the woman; and she produced a flour dredger.

The captain examined it with a smile.

"I suppose it is all right," he said, and he had it packed up with his other purchases.

With a sigh of absolute relief, for, though the incident was seemingly trivial, he had effected a good deal in obtaining a sheet of parchment and a flour dredger without attracting attention, he returned to the "Royal George," and sat down to a nice light luncheon.

Then ordering his horse, he mounted again.

On his way home, a very little distance from his route lay Coombe Lodge. The captain was a gallant gentleman, and he thought it would only be a delicate piece of attention if he called to inquire after Lady Lackland's health.

After earnest inquiries after her ladyship's headache the captain gave an amusing and highly colored account of his trip to Tenby, introducing and inventing half a dozen little serio-comic incidents, which, though they did not occur, highly amused the countess.

"I am sorry Ethel and Fitz are out," she said as the captain rose to go. "I suppose, however, you did not expect to find them at home?"

She smiled interrogatively.

"No," he said "I was not aware—"

"Indeed!" said the countess. "Did you not know that they were going yachting with Mr. Leicester Dodson and Mrs. Mildmay?"

The captain certainly did not know it, and shrugged his shoulders with a smile.

"No, indeed," he said. "Ah, my dear Lady Lackland, these very young people are so impulsive! They arranged their little pleasure trip after I had started this morning, seeing that the weather was fine—though," he added, glancing at the window, "I think we may have a storm."

Lady Lackland looked at him thoughtfully.

She thought him a man worth conciliation, and perhaps of confidence.

"Mrs. Mildmay has gone," she said, "Mr. Dodson rode over this morning and fetched Fitz and Ethel."

"Oh!" said the captain, significantly. "Very impulsive young man, my dear lady; very excellent, clever young man, but impulsive. He has been badly brought up, in a selfish circle, and I am afraid has acquired a considerable amount of wilfulness, and—I shall I add, fickleness?"

"What do you mean?" asked Lady Lackland, with soft abruptness. "Do you think Mr. Leicester is obstinate and a flirt?"

"The very word, my dear lady," said the captain, softly, as he sank into the seat beside her. "I am very interested in Mr. Leicester," he continued, swinging his hat gently and looking up into the countess' face under his deeply penciled eyebrows. "Very. I could tell you why—perhaps you can guess. To be candid, my dear Lady Lackland, as I told you the other evening, I am poor John Mildmay's oldest friend. I was to have been his daughter's legal guardian; and though his sudden death prevented him bequeathing her welfare to my care I still feel for her the affection and anxiety of a father. Ah, how can I do otherwise when by her every look and gesture, by her every smile and tone she reminds me of my dear lost friend?"

Lady Lackland, whose eyes had been averted, sought his face with a mild but astute look of inquiry.

"One cannot suppose for one minute," continued the captain, "that a man of the world like Leicester Dodson can entertain any serious intention of making a proposal to Violet No, my dear lady; men of his class strike at higher game." He paused, and did not fail to notice the sudden drooping of the wily countess' eyelids. "They, or their fathers, have made money by trade, and with that money they desire—nay, they look to purchase rank. It is their ambition. They have it instilled into them with food of their infancy; they look forward to it as the final goal of their endeavors. Yes, Leicester Dodson intends to marry rank, and," he continued, in a lower voice and with a subtle significance, "and will do so if some foolish flirtation does not act as a stumbling-block."

The countess raised her face languidly.

She understood the captain, and she began to see that he was on her side.

He meant by his delicate confidence to warn her that if the flirtation between Leicester Dodson, the millionaire's son, and Violet Mildmay, the merchant's daughter, were not stopped, the countess would lose the aforesaid Leicester and his money bags for her daughter, Lady Ethel.

The captain continued:

"I may describe the captain of Violet as very similar, yet with a difference. She, my dear lady, though I, so biased and partial should not give it utterance perhaps, is a most charming and lovable girl; but she is simple—simple in the extreme, unsophisticated. She would be the first to be led away and deceived into thinking a foolish flirtation, a midsummers day's flirtation, a serious love affair and a binding engagement. Now I am sure that must not be. No, she is reserved and friended for a different end and may I say a happier and more suitable fate? By the way, did you say that Mr. Leicester Dodson came over himself this morning?"

"Yes," said the countess.

The captain smoothed his hat.

"I hope you will not think the less of him for what I have said, my dear lady."

"Oh, no!" said Lady Lackland, "not in any way. Besides, you have not said much," she added, "only that he is somewhat of a flirt."

"And that you have noticed yourself?" said the captain, with ill-concealed eagerness—"you who have so many better opportunities of observing him in the society which you so much adorn."

"Yes," said the Lady Lackland, "I think perhaps that he is a flirt. He would be a very eligible young man if he were a little more steadfast; but one cannot put old heads on young shoulders, Captain Murpoint."

"No, no," said the captain. And with a delicate emphasis he shook hands and took his leave, repeating to himself Lady Lackland's reply as he went. It was not a very important one; but we shall see how by deftly twisting and turning it Captain Murpoint affected a great deal with it.

As the captain rode home the storm gathered and broke upon him.

The rain nearly blew him from his horse and the rain saturated him.

At the park he found the servants in a state of confusion and alarm, and learned that the ladies had not yet come home.

Without dismounting he galloped down the steep hill to the beach, which presented a picturesque scene enough, but a sufficiently significant one.

Just within reach of the spray stood a small crowd composed of the fishermen and their wives and children and the principal part of the village.

Lower down, and seemingly in the foremost waves themselves, were Willie Sanderson and two or three of his mates, vainly endeavoring to launch one of the boats.

By their side, in close and agitated conversation with Mr. Starling, was Jemmie, Sanderson's lame brother.

The captain spurred his horse across the stones and shouted, loud enough to be heard above the roar of the waves:

"Has the yacht come in?"

Willie Sanderson shook his head, and significantly pointed seaward.

Jem Starling came up and touched his hat and bellowing hoarsely in the captain's ear, said:

"No, she ain't come in, sir, and these chaps be all in a regular state about her. They say——"

But the captain was too anxious as to the situation to receive anything second-hand, and beckoned imperiously to Willie Sanderson, who came up to him.

"Do you think there is any danger?" asked the captain, in a voice slightly tremulous.

Willie Sanderson shook his head gravely.

"Can't say exactly, sir. All depends upon where she be. I knows as the skipper said they were to sail south and tack round. If so be they have, why then they're close agin the North Reef by now, and——"

"Well, well?" asked the captain, with feverish eagerness.

"Well, then, may Heaven help 'em!" said Willie, solemnly.

The captain's white, strong hand clutched the reins tightly, and his thin lips compressed with restrained emotion.

If the yacht were on the North Reef she would be wrecked, and in all probability Violet, her aunt, and Leicester Dodson, Fitz and Lady Ethel would be drowned.

All the eventualities, the results, and the personal consequences of such a fatality rushed through the captain's brain, and Jem, who was standing by the horse's head, watching his master, saw a gleam of fiendish joy flash across the pale, masterful face. Perhaps the captain knew that he had seen it, for the next instant his face had assumed a look of alarm and anxiety, and, with a burst of excitement not altogether feigned, he flung himself from the saddle, shouting:

"Launch the boat! We must go to her. Who volunteers?"

The men looked out to sea, then shook their head.

"No boat could live in this, sir," shouted Willie Sanderson, "and if she could, by the time we'd get to the North Reef, the storm ow'dd be over. Lookee now, it's clearing off a bit to the northward."

The storm abated and passed off as rapidly as it had gathered and broken, and the wet crowd, about an hour afterward, had the extreme pleasure of descrying a white speck on the horizon, which soon grew to be the familiar form of the Petrel.

She sailed in with all her canvas crowded, looking as unconcerned as a swan on a lake after an April shower, and the crowd burst into a cheer of mingled excitement and admiration.

But the captain had determined that there should be a little display of emotion, and therefore when the Petrel ran into the little rude harbor he hurried forward and sprang on to her deck, his two hands outstretched to Violet and Mrs. Mildmay with his face pale and grateful.

With soft and emphatic gratitude and anxiety he went from one to the other of the ladies, while Leicester, in command of the vessel, was seeing that all was made secure.

PRACTICAL FARMING

The Care and Handling of Milking Machines.

Seven different kinds of mechanical milkers have been operated under varying conditions for periods of from six months to five years by Prof. Larsen, of the South Dakota Experiment Station. The results of his experience are summed up in the following nine points which contain many valuable suggestions, both for users of the milking machine and for those who contemplate installing them.

1. Before the milking machine is installed, cull out the cows having very uneven quarters, and teats that are extremely small and extremely large. Even though the milking machines may have a large range of adaptability in this respect, uniformly shaped udders and teats are advantageous.

2. The operator should know how each cow in the herd gives down her milk, and how she milks mechanically, and adjust the work of the milking machine according to the individual cow.

3. The cows that gave only a small amount of milk and habitually release their milk little by little are not best suited for mechanical milking.

4. Breed and raise cows that are adapted to mechanical milking by, first, selecting a herd sire that comes from ancestors having good udders and teats and that milk well, or select a tried bull that is known to put good udders and teats on their daughters; secondly, by not raising the daughters of the cows that have abnormally shaped mammary organs and that are known to give down the milk irregularly.

5. The operator of the milking machine should understand how to adjust the parts and the workings of the milking machine to the different cows. He should have a mental picture of how each cow in the herd releases the milk, and how the work of the machine and the cow must work together and not at cross purposes.

6. The operator should take time to prepare the cow. He should see that the teats are all in normal condition. With most cows, the machine should not be attached until the cow has given down her milk.

7. With some cows, and near the end of the milking process, the teat cups will climb upwards. The loss of part of the quarter is thus wedged in to the upper part of the teat cup This may shut off the flow of milk. The operator should gently pull down on the teat cups to release this grip or pressure before the machine in entirely detached. If this bothers much, a weight may be suspended from the lower part of the teat cup during milking. By gently lifting and pressing the halves of the udder in the latter stage of milking just previous to detaching, it will help the machine to milk the cow dry.

8. If the above points are observed, many cows need no stripping. The operator soon learns from the amount of milk, and from the looks of the cow's udder whether the cow is milked clean. However, to be sure, the operator should try every cow by hand. This should be done at once after milking. It may be accomplished by shutting the vacuum off and stripping directly into the teat cups, holding the cups in the left hand and stripping with the right; or it may be done by stripping into the pail.

9. The different parts of the milking machine should be kept sanitary by thoroughly cleaning, and by keeping the parts in a disinfectant solution between milkings such as previously described.

Deep Stirring v. Deep Plowing.

Deep plowing is often preached now, since the bringing up of the substratum to the surface is not altogether wise. Deep stirring, however, is another thing—and this is encouraged to give air to the roots, hence the success of dynamiting. At the same time, as pointed out by the "Field," London, the fact that deep cultivation is not always advantageous should not be regarded as justification for going too far in the opposite direction, as unquestionably many do. In this connection it is well to observe the distinction between deep plowing and deep stirring. The former is often a risky proceeding, but the latter hardly ever, and the more it is persevered with the greater becomes the rooting area and the cropping capabilities of the soil. The important thing to avoid, and which proved the undoing of the deep furrow theory, is the transposition of top and under soils. As far as practicable the latter should be kept at the bottom of the tilled stratum until it is improved mechanically and chemically through bacterial action, promoted by tillage and judicious manuring.

An example of the room that obtains for discretion in regarding the depth of furrow is provided by a simple experiment carried out in Morayshire in connection with the Aberdeen College of Agriculture. A field that had been two years in grass, chosen for its suitability for the purpose, was plowed at depths of 4½ in., 6 in., and 7½ in., and sown with oats, the treatment in every other way being the same throughout. It is interesting, and may even be a little puzzling, to note the influences of the varying depths upon the crop. The best return both of grain and straw was obtained from the 6 in. furrow, the deeper furrow being a good second, while it was evident that 4½ in. was an insufficient depth for that field. The only point in favor of the shallowest furrow was that the crop ripened rather earlier than on the other portions. This advantage, however, was gained at too big a sacrifice of quantity and quality of yield. All the samples gave the same weight per bushel, 44 lbs. of dressed grain. The returns of dressed grain were seventy-one bushels, 8 lbs.; eighty-five bushels 5 lbs.; and eighty-three bushels, 4 lbs., per acre, respectively; of light grain, 170 lbs., 155 lbs., and 130 lbs.; and of straw and chaff, 43 cwt., 45½ cwt., and 43¾ cwt. The soil is described as of a sharp black gravelly nature of a good depth, but whatever might be the result of deep stirring it is evident that on immediate subject is to be served by exceeding on it a 6 in. furrow.

Saving Pastures For Next Summer.

In order that the live stock which have been doing well on pasture during the summer months may maintain their gains, and for the sake of saving the pasture for another season, the farmer should take care that his animals are brought in and started on winter feed before the season becomes too late. Cattle and horses, more especially the latter, if left out in October and November are very likely to crop the pasture so close that there will not be sufficient winter protection for the roots of the plants, and in spite of their efforts to secure sufficient nourishment by this means, will go back in flesh.

Milch cows are particularly susceptible to the action of cold or wet weather, and one or two nights of frost while they are lacking the shelter of the barn will set back the milk flow to such an extent that the work of restoring it by extra feeding will prove very costly. The best results from added feed can always be obtained when the animal is kept up to top notch all the time.

If the land is firm enough late in the fall to allow of the stock being turned out without doing damage to the surface, then the plan of turning out during the warm hours of the day is a good one, but in this practice provision must be made for feeding of a plentiful ration of green feed in the barn, as the pastures after a heavy frost has occurred are not to be greatly depended on for feed.

Generous Pat.

During some recent heavy route marching in Aldershot an Irish rifleman, called Pat Doolan, was admitted into the hospital suffering from rheumatism. Pat would have enjoyed his new quarters very well, only he was debarred from sending for or receiving intoxicating liquors.

One day, however, Pat determined to preach the subject to the surgeon, and, accordingly, when the latter visited the wards and inquired if there were any complaints, our hero innocently asked for a change of diet.

"What change of diet would you like?" asked the surgeon.

"Sure," says Pat, "Ol'd loike a bottle av shtout, sor, as Ol'm feelin' mortial bad, and Oi think the shtout would do me a power o' good."

"Indeed!" said the surgeon, with a twinkle in his eye. "It's a bottle of stout I wish I could get for myself now."

"Is it, sor?" said Pat, not in the least abashed. "Then you order me two bottles, and I'll give you one of them, bedad."

"Don't you think Miss Howler has wonderful control of her voice?" "No, I don't. She sings every time any one asks her to."

2 in 1

A combination of both liquid and paste. They produce a brilliant, lasting shine with very little effort.

These polishes contain no acid and will not crack the leather. They preserve the leather and increase the life of your shoes.

LOCAL AND DISTRICT NEWS

Seized Light Weight Butter

The first case of seizure of light weight butter took place on the market at Owen Sound on Monday morning when ten prints supposed to weigh a pound each were found to weigh only nine pound and two ounces. The butter was sold by a farmer to a local grocery man and the deficiency was noticed. At first the farmer who sold the butter was in a combative mood and threatened to take the matter to police court. When invited to do so a backed down, and the butter was sent to the shelter of the Children's Aid Society. The enforcement of the by law will be welcomed by both honest producers and the consumers.—Owen Sound Times.

Getting Ready For Hydro Vote

Engineer H J Sultces of the Ontario Hydro Commission, Toronto, spent Thursday and Friday here going over the town getting the limits where they should place the poles, and finding the best route for bringing the system into the town. He also took cognizance of the amount of lamps that should be used for properly lighting the streets. He finished up here Friday and will report to headquarters at Toronto, after which prices will be furnished the Council for the street and private lighting by hydro in town. If the rates are low enough, the council will submit a by-law to the electors to enable them to go on and bring in the current.—Herald and Times.

Died in the West

A gloom was cast over this vicinity when Mr and Mrs H Lamont, of Lovat, received the sad message telling them that their second eldest son, Lewis H, had passed away on Thursday morning, Oct 19th. The deceased had been in the west about three years and the most of that time he spent in Melville Sask, but in the fall of 1915 he purchased a farm near the village of Willowbrook and was married in March to Miss Pearl Griffith, also of Willowbrook. His illness had been long and trying. He had contracted a heavy cold, but thinking lightly of it neglected it for some time, and when finally he consulted a physician was told he had an abscess on one lung, but was given hopes of speedy recovery. However, with all that medical aid and kind hands could do he passed to the great beyond. During his illness his brother Nelson had been with him most of the time. He was also visited by his sister, Mrs W Wrightson, of Uoltz, whom he fully assured he was quite willing to submit to "Thy will be done," as his faith and hope in Christ grew stronger as the days passed. Lewis was highly esteemed by all who knew him, and much sympathy is extended to the bereaved wife, parents and family. His remains were laid to rest in Yorkton cemetery, as this was the wish of his faithful and loving wife.

Narrow Escapes from German Bullets

Pte Stanley Martin, in another interesting letter home, writes: You would be amused to see the way they thresh here. They use a one-horse combined treadmill separator. The sheaves are put in crosswise, and the straw is tied up in bundles again, by hand, of course. The horse has his nose just over the cylinder or rollers. Quite often the boys buy the straw for bedding at two sheaves for a frank—that is, when they can't steal it. At present I am chumming with a Frenchman, and as he can parler Francais tres bein, I intend to hit the hay to-night. It is much easier on the hip than the bare board or the ground. I am a few miles from the firing line just now, and hope to have a little rest for a few days. I was very lucky the last trip in. I got a few welts from wandering pieces of shrapnel, but couldn't make Blighty. On one occasion when I was crawling along as low as possible a bullet zipped through my hat. Say, didn't that old helmet ring. Old Fritz rang the bell that time. There was a shell hole right handy and I wasn't long getting into it. Our sergt. and a stretcher-bearer were in the same hole. The sergt had been sniped at, too. The top of his helmet was torn and he had his hair parted, but no damage done. I felt me shoulder smarting a little, and when I looked I saw that the skin was just broken. One sees some very lucky escapes. But our Sergt was killed that night and we all felt very blue about it. I helped carry to the dressing station the last two of my pals who came over last March from the old battalion. I am very thankful to be able to still carry on as well as ever. We have had quite a little rain here lately and it is very trying in the trenches when it is so muddy. I have received THE ADVOCATE and the Star, and was glad to get them. The boys all welcome the latter paper, too. Sorry to hear of Mrs Greig's death, and R B Grant's was rather sudden, too

BORN

KILLED IN FLANDERS

Lieut. Ernest Reid

Reported missing after a raid on a German crater about the middle of September last, awarded the D S O for bravery during that raid, and eventually reported killed. This is the train of events that ended in an official notice received on Saturday last by Mr and Mrs Adam Reid, of Pinkerton, which contained the brief intimation that their son, Lieut Ernest Reid, had made the supreme sacrifice in behalf of the great cause for which so many more Canadians are fighting in Western Europe. As the Lt-Col of the 58th Batt wrote when Lieut Reid was found to be missing, the latter had returned to the Allies' trenches after the raid, but was seen to go back over the parapet, presumably in search of some men who had been left behind. In his last hours he had acted with such bravery as to win the D S O award.

Lieut Reid was born at Pinkerton, attended the public school there, and then became a student in the Paisley Continuation School. After completing the courses here and at Normal School, he taught Pinkerton school for a term. Upon deciding to do his bit as a soldier he went to London Military School and qualified for the office of lieutenant before enlisting and then took a commission in the 71st. The battalion went overseas to Aden. He was a stalwart young man of 25 years, mentally strong and morally clean, sociable and equable in temperament. His aims and aspirations in life were lofty and worthy ones, and these he has nobly and willingly sacrificed for the betterment of the world to those who live after him.

The family have the sympathy of a wide circle of friends in the loss they have sustained by the death of their gallant son and brother. A memorial service in honor of the dead soldier will be held in the Presbyterian church, Pinkerton, next Sunday afternoon.

DIED

LAMONT—At Willowbrook, Sask, on Oct 19th, Lewis Henry Lamont, second son of Mr and Mrs Henry Lamont, of Lovat, aged 29 years, 4 months and 13 days.

WHEN IS A NATION SAFE?

(Contributed)

A nation is safe when God is at the heart of it. It is never safe otherwise. All are passing through the testing fire of warfare, and the important question for each is—What is the fire doing? Some are losing everything therein except their bonds! Others are losing their bonds and are being made free. Such need no man's pity, for this visitation of God is their eternal enrichment. We need not know the why of life's anguish, but must learn its use. From the civil war of the seventeenth century, the French revolution, and the great civil strife between the northern and southern states of America, it is clear that nations, and indeed the whole human race, owe much to God's fiery judgments. Yet it is not the whole truth that the fire of warfare makes either men or nations free. There is nothing inevitable regarding its moral consequences. Sorrow may be abused, as joy so often is; and the great danger of our land is that its moral pestilences should outlast even such fiery ordeals as those through which we are now passing.

Of all tragedies the greatest conceivable is not the crippled commerce, the appalling wastage of human life, nor the dislocation of our imperial interests, but that the nation should come through the fire still bound in the fetters of drink, mammon and materialism. The curse of strong drink, the insidious evil of licentiousness, selfish greed for gold, unscrupulous grasping after power, the discontent and anger of the poor—not one of these dangers but would vanish from sight and memory like a swamp vapor, before the rising of the Sun of Righteousness.

God alone can overrule political misrule. In spite of gold cures and all other cures, God alone can break the drunkard's awful bondage. No act of Parliament can purify a lustful soul, but God can. No arbitration boards can make employers just or employees patient; no altruistic philosophy can transform a miser into a generous man; no science can bring peace to an infidel; but God can do all these things. There is no national danger if the nation has God. How can we get God into our national life? In the first place Christians must cease to shut up their religion in their churches. If it is not for the market it is not for the pulpit; if it is not for the convention it is not for the pews. Religion is not desecrated by contact with the world; it is enervated by seclusion from the world. In the second place, Christians must practically believe that God is stronger than the devil. If this were believed they would not be afraid to bring charges against lawbreakers, prosecute criminals, head revolts from parties, and join righteous minorities. A nation is saved by its men that dare to stand alone. In the third place, Christians must stand together. The reason why the liquor traffic wields its awful power is not because Christians do not hate it and want to fight it, but one man prefers this method of warfare and another that. As guerrillas, Christians are not to be feared by any foe, but in an army they would be irresistible. In the fourth place, Christians should hold their citizenship on high. A country is not safe till its citizens are seeking the better country. The supreme loyalty to one's Fatherland is loyalty to one's Father in heaven. As the spirit of mammon is the ruin of a land, so the spirit of other-worldliness is its salvation. It prevents undue wealth. It checks ambition. It prevents friction between worker and worker. It makes men faithful. It empties saloons and builds up homes. Shall we despair of our nation then? Never, till we despair of God. Shall we count any reform too difficult? Not while a single man may draw upon all of God's resources. Shall we find fault with others? Possibly, if we ourselves have been perfect citizens. And what is it to be a perfect citizen? It is to live for men, the nation, as faithfully as we know Christ wants us to live for man, for our neighbor; and to live for man, for our neighbor, as grandly as we know Christ wants us to live for men, for the nation.

Tired Eyes

Sensations exist for our guidance. They are Nature's warnings.

Over-worked eyes demand rest.

Eyes that tire easily call for help.

Properly adjusted glasses afford the only assistance possible.

We make a specialty of relieving tired eyes and guarantee satisfaction.

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

PERSONALS.

Ontario Women.

Chatham, Ont.—"Some time ago I had a general breakdown. It terminated in quite a bad case. Dr. Pierce's Favorite Prescription was recommended to me by a friend who used it and received much benefit. I began taking it and in six months I was completely cured of my ailment and have never had any return of same. I can recommend this medicine as being good, if one will give it a fair trial."—Mrs. Louis Ackert, 67 Edgar St., Chatham, Ont.

At the first symptoms of any derangement at any period of life the one safe really helpful remedy is Dr. Pierce's Favorite Prescription.

Thousands of women in Canada have taken it with unfailing success.

Dr. Pierce's Favorite Prescription is a true friend to women in times of trial. For headache, backache, hot flashes, mental depression, dizziness, fainting spells, lassitude and exhaustion, women should never fail to take this tried and true woman's medicine.

Prepared from nature's roots and herbs, it contains no alcohol or narcotic, nor any harmful ingredient. In either tablet or liquid form. Write Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., to-day for free medical advice.

Dr. Pierce's Pleasant Pellets not only the *original* but the *best Little Liver Pills*, first put up over 40 *years ago*, by Dr. R. V. Pierce, have been *much imitated* but never equaled, as thousands attest. They're purely vegetable, being made up of concentrated and refined medicinal principles extracted from the roots of American plants. Do not gripe. One or two for stomach corrective, three or four for *cathartic*.

Total balance to Red Cross fund			4 36

In presenting our report to the public it is necessary to go back to a year ago. At that time, owing to most urgent appeals from Red Cross headquarters, to the greatly increased price of yarn and flannel used in the work, and to the fact that although there were many willing workers, there was great difficulty in procuring the material with which to carry on the work. In accordance with our motto, "For Home and Country," we at our regular meeting held at the home of Mrs Hayden, set ourselves to devise some means of raising a Red Cross fund. The idea of starting a tea room was thought advisable, and was acted upon at this meeting. A committee of three of our members was appointed, with Mrs D McGregor as convener. The work of this committee was laid out for them. They were to procure a suitable room, to secure the necessary utensils for the work, to see that it was thoroughly advertised, to wait on the officers of the Women's Patriotic League who were not connected with us in Institute work for their co-operation and to report at our next meeting. This meeting was held at Mrs Briggs' home and there Mrs McGregor gave a very full report of the work they were to carry out. Through the kind generosity of the late Miss Stark our nice tea room was given free of rent, the use of the several utensils needed was granted, the cooperation of the W P League was promised, and in your case, Mr Editor, although you could not promise free advertising your charges were to be as low as possible. Everything was arranged at this meeting. Our treasurer, Mrs Conn, was appointed to take charge of the cash after each tea and to deposit the same in the bank as a Red Cross fund. It occurred to us in launching out in the scheme that there was a possibility of there not being sufficient material donated on any particular day to successfully carry on the work, and in such case the committee in charge of the dispensing were to purchase anything necessary and the treasurer was to see that it was paid for out of that day's receipts. The continuance of the teas depended entirely on the patronage received and this was voted on at our regular monthly meetings. At this meeting the committee was appointed to take full charge of tea room on the first Saturday in December, this committee to appoint the next, and so on during their continuance. The committee all appointed was expected to solicit contributions and to attend to every detail of the work for their own particular day. Everything that we could think of was attended to for the successful carrying out of our object. The work was started and carried on through the winter, and thanks chiefly to the kind liberality of our friends in the country surpassed even our fondest expectations. This may be a fitting place to remark that during the progress of our tea money was required to purchase material to keep the workers busy and in these cases the Institute voted necessary funds and authorized our treasurer to pay over the same for the purchase of necessary material. At the close of the series of teas after paying for the material used through the winter we had to our credit in the bank $820.73. After the close it was found that some of the ladies of the Patriotic League wished to divert certain amounts to other purposes than Red Cross purposes, and this is duty to ourselves and also to the public who honored us with their patronage, we opposed, and voted that our treasurer pay out no money except for purposes for which we advertised the proceeds to go. This was strictly adhered to as the above statement will show. In the case of Mr Rudolph's pig and Miss Johnston's lunch cloth, the proceeds of the sale of these tickets was not handed in to us but was handed directly to the W P L, differing in that respect from Bell Bros' tile which came to us through the regular Red Cross fund, and helped so materially to swell the fund from that particular district. In presenting our financial statement there is the amount of $2 84 not itemized. That there may be no misunderstanding as to the disposal of this money we would say that although the bills were handed in to us, voted on in our regular meeting and paid for out of our Red Cross fund, the secretary of the W P League asked for them to compile her statement, and although two of our officers asked for their return in making our statement this was not granted, for what reason we do not know, as we would much prefer that the public who so loyally supported us should know every article purchased and price paid for out of our fund. Sufficient to say that with the exception of the $500 sent to Red Cross headquarters and the $25 paid for two dozen cut shirts, all the other articles were purchased in our own town and paid for out of the proceeds of the Red Cross fund. We now come to the flag fund about which Publico is inquiring. At the close of the winter series of teas the Women's Institute thought it would be fitting to have an afternoon to themselves that there might be a little fund to be used in Red Cross work in our members should wish to use it. This was our pancake tea and at it $10 50 was made. We felt that our school should have a flag, and as we could not use the proceeds of this tea for that purpose, as it was not Red Cross work, we asked the young ladies to make candy for sale at this tea for that purpose. The sale of this candy brought $4 35. Now, as we could not procure a flag worthy of our school for this amount, and as the skating season was over and there was no day in sight to add to this, it was deposited in the bank as a flag fund. We sincerely hope that the public, and especially the young ladies who created this fund, did not think that we lost sight of it as that is not the Institute way of doing business. The fund is in safe keeping until there is an opportunity of adding enough to make it worthy of a good flag, but not out of the Red Cross fund. And now, Mr Editor, although we feel that we have encroached too far on your valuable space, there is still another matter that we must mention, although we are very sorry to be compelled to do so. When we were starting out in our tea room some of our members who are also members of the W C T U, knowing that this society had dishes that would be most suitable for service in our teas, presented a request at their December meeting for the loan of these dishes while the teas would continue. This request was cheerfully granted and the dishes were used throughout the series. We also had dishes loaned by stores in town. After the close of the series and while the dishes were still in the tea room, we held a special meeting to dispose of business accruing from the work. At this meeting a committee of two of our members was appointed to sort out the separate dishes and to convey them to their respective owners, and although only the second day following our meeting when they went to do so there were no dishes there. We received no complaint from the store, so took it for granted that they received theirs, but although we advertised through your paper for information regarding the W C T U dishes we have not yet located them, and the mystery is, where are these dishes. Perhaps some public-spirited citizen will help us to solve it. And now, Mr Editor, thanking you for the publicity you have given our work, thanking the public and especially our country friends for making the food possible, the willing workers who so faithfully worked on the material purchased by the fund, also to Publico for drawing our attention to certain items we might otherwise have omitted from our statement, we have the honor to subscribe ourselves "For Home and Country, The Women's Institute."

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF $500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

COUNTER CHECK BOOKS

We are agents for the Appleford Counter Check Book Company.

This firm turns out only high-grade work at very reasonable prices.

See our samples and get our prices before ordering.

Had Some Nightmare

At 0t 3 o'clock on Wednesday morning of last week when the interior of the Hartley House, Walkerton, was melodious with the snores of the boarders, there suddenly arose above the musical chorus shrieks that were wild enough and a commotion that was terrible enough to have made all their hair stand up like a scrub brush. Every head was out of its pillow in an instant, and Night-shirted Sweaston, who was passing, took a firm grip on his baton and rushed in. As the noise, which had been coming from the room of a traveller, ceased as mysteriously as it arose, the crowd on finding his his door locked, concluded that it was a false alarm and dispersed. Finding, however, the following morning that he could not be aroused by pounding on the door, an employee crawled through the fanlight into his room and seeing blood splattered about the place and a big hole in the wall, summoned others to the scene. At first it was feared the traveller was dead, as the utmost efforts failed to wake him, but when later, after a violent shaking, he came to, he was the most pained and bewildered man in town. The h tered condition of his feet, as well as t blood stains about the place, showed th while under the influence of a nightme he had risen up in bed and with his be feet had kicked a hole three feet by tw feet clean through the platform, the lati being busted and the plaster knocked in the next room. Although the bed a the wall was red with the blood spille yet the drummer knew nothing of t ordinance until he awoke. The servic of a doctor were required to fix up t wounded trotters which were in a terri battered state. As this was his first nig more, he claims he would sooner go Flanders than have to kick with his be feet through another wall.—Herald a Times.

—"Advertising is the education the public as to what you are, whe you are, and what you have to off in the way of skill, talent and co modity. The only man who shou not advertise is the man who has n thing to offer the world in the wa of commodity or service." - Elbe Hubbard.

Circumstantial Evidence

Mr. Robert Jinx was in a temper.

As he stamped about in his study waiting for the dinner-gong he reviewed the situation. Steven Collier, his agent, was coming to dinner, and had sent a little note ahead, asking for a private chat. Jinx suspected that both his wife and Betty knew of the request.

But he had determined that Betty was not for his agent. Collier was capable enough, he had to admit that; but he was a younger son, with his own way to make. Betty, with her face and her figure, was going to marry a title, and give them all a lift. That had been his idea from the day he had given up brewing and bought the estate.

"Where was the fellow's note?"

The muttered exclamation left the squire's lips as he jerked open a drawer. For some seconds he stood staring into it, as if he doubted his eyesight; then slowly he placed his fingers in his waistcoat pocket and drew out some gold.

At sight of the coins his expression changed from amazement back to anger. Here was matter for explanation. His hand went out to the electric bell-push.

"When Mr. Collier arrives show him in here!" he ordered.

"He has just come, sir," returned the butler.

Steven Collier strode into the room with a smile on his fresh-colored, good-looking face.

"Shut that door!" commanded the squire. "You were working here this morning after I left."

"Until twelve-thirty," Steven replied frankly.

"And since?"

"I caught the two o'clock train to London to keep an appointment with Merryweather."

"When I left here this morning there were ten sovereigns in this drawer," said the squire slowly. "They've vanished!"

"Is that so?"

Steven was not smiling now.

"Amongst them was an Australian coin, rare enough to be remarkable."

"Yes."

"Look at this!" The squire held a coin in his fingers. "Grimes, the station-master, gave it me in change for a note this evening."

"That's Sydney Mint right enough. You think it's the same coin?"

"The coincidence struck me as strange. Grimes told me it was tendered in payment of a fare to-day—by you!"

"You think——"

Steven started forward at the implication, to pull himself up short as if shot, while gradually the color died in his face, and a curious look came into his eyes.

"Well?" The tone was harsher still. "Will you explain how you got the coin?"

"I cannot."

The older man's face was purple with wrath.

"Very well," he snapped; "you will hand me your keys, and get out of this as quick as you can. I've no use for an infernal rogue!"

His outburst was cut short by the sudden opening of the door and the entrance of Miss Betty, a delight to behold.

At the sight of the mottled face of her sire and Steven's strained expression, the laughter died in her roguish eyes. She guessed that dad, who was invariably bad-tempered after his turn on the Bench, had evidently anticipated the talk which should have come after the coffee and cigars. Steve had palpably been warned off; but she would soon alter that.

"Quite tragic!" she said, in her usual airy manner. "You mustn't take him seriously, Steven. He's always hearish while waiting for the gong. There it is now! He'll be perfectly happy presently."

The squire puffed out his cheeks at the flippancy.

"Come on, Steven," she went on, slipping her hand through his arm. "For once you shall take me in in style."

"One moment!" Her father threw out a clenched fist. "Collier will not line; I don't choose to sit down with a thief!"

"Thief!" Betty swung round and faced him with flashing eyes. "Are you quite mad, father, or can't you see that this gentleman is Steven Collier?"

The storm burst at that. In a few sentences she had the facts.

"I've given him the chance to explain," raged the irate autocrat. "Ask him; perhaps he will answer you!"

Wide-eyed, the girl gazed from the coin in her hand to the set, white face of her companion.

"You think—you think that Steven would take—— Oh, it's infamous!" she cried.

"The coin was with the rest. It was presented by him."

"Infamous!" she repeated. "Tell him so, Steven."

Her hand went out again to rest on the young man's arm. He made no move. For some seconds she remained staring at his unsmiling face; then, with a little forced laugh, she turned to her father.

Her quick wit had divined that, if Steven could not explain, there was good reason for his silence.

"I cannot allow Steven's loyalty to put him in a false position," she said. "Fact is, father, I paid him back a sovereign I'd borrowed. You've got to apologise."

"You!"

The squire's fists came down on the desk with a thud, while he stared at her as if she had suddenly gone demented.

"You! Do you know what you are saying?" he roared.

"My monthly allowance has such a way of melting, and I haven't forgotten the last time I approached you between pay-days," she laughed.

"I say, you people, d'ye know you're keeping us?"

Bob Jinx, a reckless young fellow, shot out the protest from the hall. It tailed off into a whistle as he flung open the door and noted the signs of disturbance.

"What's the shindy?" he inquired.

"Oh, nothing of much consequence," returned the girl, with an ironic laugh. "Dad has simply charged Steven, here, with being a thief."

"Rot!" ejaculated the graceless Bob. "Come on and feed."

Again the tale was told by the furious magnate.

"The coins were in that drawer—ten pounds," persisted Mr. Jinx. "They vanished."

The scamp coolly held out his hand for the coin.

"You really think Steven would take your beastly money, guv'nor? This is unworthy! Old Steve? Good lor'!"

"I tell you he was the last man——" began Betty.

"I should think so!" Ready-witted Bob had sized up the situation. "As a matter of fact, guv., I gave Betty a couple of sovs. this p.m.—been owing for some little time. We both seem to have been discharging our debts."

"You!"

"Old Steve knows you'd kick up no end of a row if it came to you that either Bet or I had been obliged to borrow. There you have the explanation!"

"You. Do you know what you're saying?"

The lad shrugged his shoulders.

"We may have incorrect ideas of common property in our family," he said; "but the second generation is sound enough on honor."

Again the opening of the door cut into the outburst.

"Now, what in the world is the matter with you all?" The portly, jolly-looking lady came into the room with her two hands upheld. "Bob, didn't I tell you? Why, Robert!"

Her gaze had been held by the purple visage of her frenzied lord.

"It's just as well you've arrived, mater," drawled the scamp. "The guv'nor has given old Steve the kick-out!"

"Steve is a thief!" put in Betty.

"Pinched ten pounds from that drawer this mornin'—among 'em, this," added Bob. "The guv. gets in change from Grimes this evening. Grimes tells him Steve tendered that identical coin for a ticket this afternoon."

"Steve won't explain," Betty interjected.

"And the worthy magistrate says he's guilty," Bob threw in.

"He doesn't believe that I gave Steve a sovereign this afternoon," stated Betty.

"And he won't have it that I paid Bet two pounds I'd borrowed," asserted Bob. "Not likely, is it? Old Steve here is a thief!"

"What nonsense are you talking?" gasped the lady. "Robert, what is it all about?"

Again the angry man told his story of the missing money, of Grimes' story and Steve's silence, and then of the tacit confessions of both Betty and Bob. But at the finish, he dropped into a chair with his mouth still open.

The wife of his bosom was laughing.

"What a to-do about nothing!" she said. "I needed some ready cash to pay a——"

"You?"

"The mystified man jumped up from his chair as if he had found a bent pin.

This was too much. First Betty had led him to think that she had taken the missing money. Then Bob had gone a step further and insinuated that he had "borrowed" it to pay a small debt to Betty.

And now his wife came forward calmly, and suggested that she was the culprit. It was beyond him.

At last he regained sufficient self-control to splutter:

"You, Maria — you took this money?"

"The drawer was opportunely not locked," returned the lady cheerfully.

The gaze of the squire travelled from one smiling face to another, until it finally rested on that of Steven.

"I owe you an apology," he jerked out savagely. "But, hang it, sir, you will admit the circumstantial evidence——"

"Say no more, sir, I beg," said Steven.

"I shall say something if you don't come to dinner," laughed the squire's lady. "Steven, your arm!"

* * * * *

"I believe you wished a little—er—chat?" observed the squire an hour later.

Graceless Bob flicked the ash from his cigar and lifted himself.

"Leave you to it," he said.

"Mother, you're a real brick!" he jerked out, as he strode into the drawing-room.

"Why did you do it?" she asked, with a tenderly reproachful look.

"Positively had to have some oof to-day," he stated. "Promised to clear a debt. Asked Steve to oblige until pay-day. Said he hadn't it on him, but would be pleased when he got back from town. No good to me.

"While he was out of the office I found the drawer. Seemed an easy thing. Thought I could slip it back when Steve stumped up, before the guv. missed it. Asked old Steve to change me a sov. just before he sprinted for the train. He got the Sydney Mint; and that explains it. He wouldn't give me away. But what I want to know is, why the dickens you had to butt in, Bet?"

"Steve looked like losing his dinner," confessed Betty demurely.

"And something else," bantered Bob.

"Not at all," she laughed. "As it happens, this has probably prejudiced the case in his favor, don't you think?"

"Bet you they stroll in arm in arm," laughed the scamp, as he dropped on the piano-stool, and proceeded to rattle off "The Wedding Glide."

The performance was interrupted by the opening of the door.

"I win!" he said, with a grin. "Chorus repeated fortissimo!"—London Answers.

A PARADISE FOR ANIMALS.

Ignore Man Because Natives Do Not Kill or Eat Them.

Pierre Loti, in his book on "India," repeatedly describes the fearlessness of animals in that country. He says: "My room was never closed, neither during the day nor the night, and the birds of the air made their home with me; a sparrow walked on the mats that covered the floor without even heeding my presence, and little squirrels, after an inquiring gaze, came in, too, and ran over the furniture; and one morning I saw the crows perched on the corner of my mosquito net."

Describing the enchanted wood of Oodeypore, where are wild boars, monkeys and a number of birds, flights of turtle doves and droves of parrots, he says: "Flocks of superb peacocks strut up and down among the dead trees, running with outstretched tails, the scendrous sheen of which looks like a spirit of green and incandescent metal. All these animals are free and unrestrained, yet their demeanor is not that of wild animals and birds, for in these lands, where they are never slain by man, the idea of flight does not animate them as it does at home."

This respect for animal life is not confined to the Buddhists or Jains, the sentiment is of much more ancient origin. Pierre Loti tells us that the horrors of death and slaughter, the sickening display of carcasses of animals are nowhere to be seen, for the people of Brahma do not eat anything that has ever lived. "In the place of such exhibitions we see heaps of roses plucked from their stems, which are used in the making of essences, or simply to be woven into necklaces."

HIGH PRICES IN ITALY.

Many Food Staples Dearer Than in France or England.

The high cost of living and particularly the price of coal is becoming a subject of grave concern in Italy as another war winter approaches. Due to continued excessive freight rates by sea many staple food articles are dearer in Italy than either France or England. Despite a special treaty with England for cheaper freight rates in force obtained by the loaning of ships, sugar is selling at 20 cents a pound and can be bought only in small quantities for household consumption from day to day. Coffee sells at 50 to 70 cents a pound, according to grade. Though Italy is a heavy producer of wines, a table wine that once sold at six cents a quart now sells for 14 cents and is inferior to the old six-cent grade. Beer is sold at 14 cents a quart, milk at 10 cents, good butter is 55 cents a pound.

Coal that before the war sold at $10 per ton now sells at $60 and the price may go higher as winter comes. Last winter it was $30 to $40 per ton. Italy hopes to import 750,000 tons from the United States for industrial uses this winter.

BRITISH ARE DRINKING LESS

THE POLICE REPORTS SHOW AN IMPROVEMENT.

"No Treating" Is the Feature of the Prohibitory Rules Enforced.

It is now possible to form some notion of the results of the measure adopted in the British Isles to prevent excessive alcoholism from reducing the national efficiency in the prosecution of the war. At the outbreak of the war an effort was made to accelerate the progressive reduction of the number of licensed vendors of alcoholic liquors, by an amendment to an old law of 1904. By the end of 1914, however, the number of "saloons" had been reduced by only 623, leaving Great Britain and Ireland still 111,000 licenses, to which must be added about 9,000 clubs, many of which existed chiefly for alcoholic purposes. Meanwhile conversations for public drunkenness had actually increased, especially among women.

It was not till it was seen that a further imposition of excise tax upon the trade would merely meet with violent opposition without accomplishing the desired result, that the central liquor control board was established to apply the amendment to the Defense of the Realm Act, of May 19, 1915, which empowered the government to control the sale of liquor in all districts where munitions are manufactured, troops stationed or in transit. The first duty of the board was to define such areas, and by a process of trial and error they gradually extended their boundaries, until by the end of February, 1916, some 30,000,000 of the population of the islands had begun to live under the new restrictions.

Restrictions on Traffic.

The restrictions imposed are:

1. Limiting the sale of spirituous liquors to two and a half hours, 12 to 2.30 p.m., on five days of the week and prohibiting it entirely on Saturday and Sunday.

2. Limiting the sale of malt liquors and wines to the five or six hours between 12 and 2.30 p.m., and 6 and 9 or 9.30 p.m. the week round, practically the hours coinciding with the midday and evening meals.

3. Forbidding the sale of liquor to be taken off the premises, entirely on Saturday and Sunday and after the middle of the afternoon on other days. This last applies only to saloons; "liquor stores" may sell for "off" consumption in accordance with rules 1 and 2.

4. Absolute prohibition of treating; this is enforced even in the bona fide clubs.

5. Extension of all the above measures to clubs generally, in order to make impossible evasion of the law by the mushroom variety of such institutions.

6. Forbidding the sale of spirits less than 26 per cent. under proof and allowing the dealer to dilute to 50 per cent. under if he wishes.

Temperance Restaurants.

The board has established a large number of temperance restaurants convenient for munition workers, and has encouraged the saloons in establishing facilities for the sale of eatables and non-alcoholic beverages, by allowing them to sell these during the hours prohibited for strong drink. But it is by pushing the establishment of canteens in the factories themselves that the board has done most to establish the habit of rational refreshment among the working classes.

The board is empowered to acquire either temporary or permanent possession of any saloon in the area under its control, and it has been deemed advisable to do this in the case of about fifty. Compensation is usually arrived at by amicable agreement with the licensee. This system has been found less efficacious than the establishment of industrial canteens.

Drunkenness on Decrease.

As to the general result of all the above methods of control the board has called attention to the following figures. In London and vicinity the daily average of convictions for drunkenness, which was 1,301 in 1914, had fallen to 1,077 during the first half of 1915, and to 603 during the first eight weeks of 1916. For the whole of England and Ireland the average of 2,034 for 1914 had fallen to 940 by March, 1916. In Scotland the average of 1,434 for 1915 had become 794 by the same date.

But the board does not attach more than a relative significance to such figures, realizing that they are merely indicative of a tendency, rather than conclusive as to the efficacy of the various phases of control that have been applied more or less tentatively, and always first and foremost for specific and immediate war purposes. As to what has been accomplished in this particular direction the testimony of the Admiralty, the Army, the Council, the Board of Trade, the commissioners of police in various districts throughout the country, and of the medical profession and manufacturers generally—in fact, all those in close contact with the industrial life of the nation—agrees that the controls adopted have been marked in their effect on the public health and industrial output of the nation.

GERMAN EMPIRE LOSES HOPE.

Food Shortage and Prolongation of War Depresses People.

The London Times prints a narrative of conditions in Germany by an educated woman of German birth, recently allowed to join her husband in England, who says that the food shortage in Germany is not really serious in the country, but that in the cities and towns the problem grows more difficult.

"Life there is very hard," she writes. "The very poor and many in better circumstances have been compelled to draw on their savings. There is some jealousy in the towns because the country population gets better and more varied food.

"If rations are further reduced, I do not know what the poor people will do. Those with little money get scarcely enough to eat now. When I left Germany there was no general alarm over the war, although everybody was eager for peace. It was never believed in the early days that the war would go into its third year. The dragging war and the food shortage together are having a depressing effect.

"The belief that Germany cannot be defeated is not yet seriously shaken, but there is no longer any real enthusiasm for the advertised victories. The people are getting suspicious. The Jutland battle and the entry of Rumania produced a gloomy effect, for the people had been told continually that Rumania would join the winning side.

"People in Germany realize that the Somme is worse than any previous battle and what they hear from soldiers home on leave makes them very anxious. The soldiers speak of the terror caused by the British artillery and also say that the English and French flying men give them no rest. No German officer was ever permitted to say in a German newspaper 'flesh and blood cannot stand the bombardments of the allied batteries much longer.'"

The narrator was in Germany when the Zeppelin was brought down at Cuffley. She heard little discussion about it and says that it was firmly believed in Germany that great damage was done in London. The more intelligent Germans, however, now discount what they read in the newspapers about the raids. They are convinced that the British do not always admit everything and feel that the German reports of the damage done by the raiders are often only surmise.

THE ORKNEYS IN PAWN.

Were Transferred by Denmark to Scotland in 1468.

The Orkney Islands, says Pearson's Magazine, do not really belong to Great Britain in the sense that they were ever ceded by treaty or acquired by conquest. They were simply transferred by Denmark to Scotland in 1468, in pledge for the payment of the dowry of the Princess of Denmark, who was married to James III., King of Scotland. In the deed of transfer, which is still in existence, it is specially mentioned that Denmark shall have the right to redeem them at any future time by paying the original amount of the dowry with interest to date.

There is no likelihood, however, that Denmark will ever attempt her right of redemption, because sixty thousand florins, the original amount of the dowry, plus compound interest for 448 years, would amount to perhaps a million pounds, and that is a bit more than the islands are worth.

We haven't much use for misers, but is is far better to freeze on to your money than burn it.

PATROLLING IS DANGEROUS SPORT

THE WORK CAN ONLY BE CARRIED OUT AT NIGHT.

Sometimes a Scout Officer Gets Mixed Up With Exasperating Results.

Patrolling plays a prominent part in trench warfare. The sporting instinct peculiar to nearly every Briton causes him to undertake this dangerous work with unbounded enthusiasm. Indeed, so seriously do some divisions apply themselves to it that they would be grievously offended if one spoke of the ground separating their own trenches and the hostile ones as "No Man's Land." They regard it as their own particular territory.

Owing to the proximity of the opposing trenches patrolling can only be carried out at night, and when very dark great difficulty is experienced in preserving a right sense of direction. The trenches twist and turn so deceptively that when certain landmarks are invisible it is very easy to lose one's bearings, says a writer in the London Daily Mail). On such occasions it is well-nigh impossible to distinguish the enemy's lines from our own.

Consults His Compass.

Information of a certain nature being required about the enemy's trench an officer volunteers to scout the position.

Going down on all fours he creeps cautiously along, frequently skirting shell-holes which he is now able to locate with his hands. Though he has endeavored to keep in the right direction, after a time he begins to wonder whether he has not lost his bearings and decides to consult his compass. He is saved the trouble, however, by a Very light, rocketing some distance down the line, which shows the faint outline of a trench about fifty yards ahead.

Not a sound comes from the trench, and the fleeting glimpse which the flicker of a far-away flare gives him shows no movement either. If only he can get through the wire unseen he believes he can crawl unheard up to the parapet.

"Halt! Hands Up!"

Desperate though the undertaking is, he grips his revolver and crawls to the wire. With difficulty he wriggles under the outer strands and creeps forward inch by inch. With every movement forward his hopes rise higher. Then his quick ear detects a movement in the trench, followed immediately by a gruff challenge.

"Halt! Hands up!"

The wire prevents him lifting his arms, but, able to use his tongue, he pronounces a certain word—as only a Briton can—with extraordinary gusto that it probably saves his life.

With natural exasperation he forces his way through the remaining wire and enters his own trench.

"One should always—er—creep under one's own wire when—er—returning from a patrol," he remarks naively to his men. "It's—er—good practice."

Not Many Checks in France.

In France the checking system so well known in this country is hardly used at all. Practically all transactions are settled by passing bank notes from hand to hand. Now the Banque de France is urging a more general use of checks.

Trouble is never particular about hitting below the belt.

TO END CATARRHAL DEAFNESS AND HEAD NOISES

If you have Catarrhal Deafness or head noises go to your druggist and get 1 ounce of Parmint (Double strength), and add to it 1 pint of hot water and 4 ounces of granulated sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Any one who has Catarrhal Deafness or head noises should give this prescription a trial.

"Faulty Nutrition and Elimination"—these are the cause of the most of the ailments that afflict human beings. Too much indigestible food and lack of power to throw off the poisons that come from indigestion—these lead to a long line of distressing disorders. Avoid them by eating **Shredded Wheat Biscuit**—a simple, elemental food that contains all the body-building material in the whole wheat grain, including the bran coat which keeps the intestinal tract healthy and clean. Delicious for any meal in combination with sliced peaches or other fruits.

Made in Canada

GERMANS ARE DAZED BY FIRE.

British Lieutenant Writes That They Surrender Willingly.

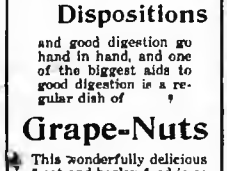
A second lieutenant has written as follows from the Somme front to his relatives in England:

"Since writing we have taken a further active part in the 'great push,' with considerably more success than we had on July 1. We went over at night time, 11 p.m., and managed to take the Boche by surprise, and without much difficulty or many casualties we got three lines of trenches and about ninety prisoners.

"On the whole it was great fun, and the raiding of the dugouts was most profitable to all of us. All the men got helmets (a Tommy's greatest ambition) and I managed to come to grips with a German lieutenant.

"Before going over I managed to teach all my platoon to say, 'Hanile hoch!' and it worked admirably, as the Hun was so dazed by a five minute bombardment of 76s and field guns that it was a relief for him to be taken prisoner.

"Needless to say, we had casualties, and those, coupled with the ones of July 1, have rendered us temporarily 'down and out,' so to speak, so we were relieved and we are having a quiet time here. We did quite well with decorations. Five of my platoon got distinguished conduct medals and I managed to get a military cross.



"Things seem to be moving in the direction of finis now. I should imagine that Rumania joining in would have a great deal to do with it. When we had the news from the brigade we immediately had a board painted up in German, telling them of the news, which they probably already knew. However, it annoyed them, and they proceeded to sling all the muck in the district at it, from bombs to eight inch howitzers, but still the board stood firm. However, their snipers got at it and before long it was perforated with bullet holes. Some of the snipers who hadn't loopholes were a little too eager to get a pot at it and showed themselves a bit too much, with the result that our snipers had some fun."

In the Future.

The Student—This is an odd monument—this small pillar with a ring in it. I wonder what it was designed to commemorate.

The Archaeologist—That was not a monument. That was a hitching post in use during the horse age.

It is quite safe to turn the hands of a non-striking watch or clock backwards.

Sunny Dispositions

and good digestion go hand in hand, and one of the biggest aids to good digestion is a regular dish of

Grape-Nuts

This wonderfully delicious wheat and barley food is so processed that it yields its nourishing goodness to the system in about one hour—a record for ease of digestion.

Take it all round, Grape-Nuts contributes beautifully to sturdiness of body and a radiant, happy personality.

Every table should have its daily ration of Grape-Nuts.

"There's a Reason"

Canadian Postum Cereal Co., Ltd. Windsor, Ont.

"DUCK, BIRDIE," SAID SENTRY.

Australian Troops Shock the English Officers.

The Australian troops in Flanders have a reputation for eccentric military deportment. English comedy probably exaggerates the behavior of these colonials affectionately, but the Australians are distinctive or there would be no basis for the comment. Their personal independence is noted, even where Canadians have prepared English militarists to look for an individualism not strictly in keeping with military theories.

It is said of the Australians that they obey significant orders as well as any martinet could wish, but that their disregard for the aristocracy of war is complete. It is related that an English colonel complained to Gen. Birdwood, of the Australian contingent, that a sentry had failed to salute him. The general said it was not uncommon for the men to fail to salute him.

He said he had approached a sentry one day and had been amused to note that the soldier merely stared at him curiously and made no movement to acknowledge his presence. A shell came along, and the sentry called out, "Duck, Birdie!" The outraged colonel asked what the general had done. "I ducked," said Birdwood.

ST. VITUS DANCE CAN BE EASILY CURED

A Tonic for the Blood and Nerves With Rest All That is Needed.

Many a child has been called awkward, has been punished in school for not keeping still or for dropping things, when the trouble was really St. Vitus dance. This trouble may appear at any age but is most often met between the ages of six and fourteen. The most frequent cause of the disease is poor blood, aggravated by indoor confinement, or mental strain at school. Under these conditions the blood fails to carry nourishment to the nerves and the child begins to show listlessness and inattention. Then it becomes restless and twitching of the muscles and jerking of the limbs and body follow. A remedy that cures St. Vitus dance and cures it so thoroughly that no trace of the disease remains is Dr. Williams Pink Pills which renew the blood thus feeding and strengthening the starved nerves. This is the only way to cure the trouble and parents should lose no time in giving this treatment if their child seems nervous or irritable. Mrs. Wm. A. Squires, Cannington, Ont., says: "My only daughter, now fourteen years of age was troubled for several years with St. Vitus dance. She was so bad that at times she would lose control of her limbs and her face and eyes would be contorted. We had medical advice and medicine, but it did no help her. In fact we thought the trouble growing worse, and finally we had to take her from school. About a year ago we began giving her Dr. Williams' Pink Pills and by the time she had taken five boxes she was completely cured, and is now a fine, healthy girl. I firmly believe we owe this to Dr. Williams' Pink Pills and are very grateful for her restoration to perfect health."

You can get these pills from any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

TENDING BRITISH GRAVES.

King George Thanks French People for Work Done.

King George took advantage of his recent trip to France to visit some of those sacred spots which are the last resting places of fallen British soldiers. If anything were lacking to cement the sympathies of the French and English it would be supplied by the care with which the French people are tending the graves of the British. Long before the French Government decided to constitute the British burial grounds British territory for all time, the people of France took it upon themselves to tend these graves.

King George, during his recent visit to France, himself saw how this had been done, and specially thanked some of the Maires and cures who had helped. Many burials took place out of consecrated ground, and although the work of transferring buried bodies from casual graves to recognized cemeteries, wherever possible, is proceeding, there remain many graves yet untouched. The British Red Cross Society has caused all these graves to be marked with a permanent cross, and the French people keep them freshly supplied with flowers.

King George had a quick eye for these wayside burial places and every time he saw one he never failed to raise his hand to salute. Once, standing bareheaded at a nameless grave, he quoted Rupert Brooke's matchless lines:

There's some corner of a foreign field
That is forever England.

Not Mistaid.

Doctor—Well, and how did you find yourself this morning.

Patient—Oh, I just opened my eyes and there I was.

SOLDIERS CURED OF RELIEF FROM SORENESS

Boys on the Border Relieved Their Pains and Aches With Sloan's Liniment.

Once upon a time Norman Jones, serving in the National Guard at El Paso, returned to camp after a strenuous 15-mile hike, foot sores and leg weary. He had not been long in active service and his shoulders, back and limbs felt the after-effects of marching.

Remembering Sloan's Liniment, Jones applied it to the sore spots and went to bed. He writes: "I arose the next morning feeling fine; in fact I had entirely forgotten about the hike and went out for a four-hour drill in the sun as spry as ever."

Private Jones passed the experience along, and many a boy on the border relieved the agony of sprains, strains, bruises, insect bites, cramped muscles, rheumatic twinges, etc., by the use of Sloan's Liniment.

Easily applied without rubbing. At all druggists, 25c., 50c. and $1.00.

Sloan's Liniment
KILLS PAIN

SCIENTIFIC CAUSE OF THUNDER-STORMS.

By Chas M. Bice, Denver, Colo.

Ever since the mythology of Greece, which attributed flashes of lightning to the vengeful bolts of angry Jove, countless explanations of the phenomena of thunderstorms have appeared, but more or less wide the mark.

Science has put forward various tentative hypotheses to account for the thunderstorm, such as freezing and thawing weather in the upper atmosphere, air friction and many other theories which experiment has demonstrated to be worthless.

It has been reserved for Dr. G. C. Simpson to finally hit upon a very simple experiment that solves the mystery.

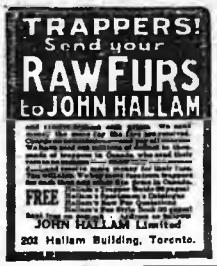
By allowing drops of distilled water to fall through a vertical blast of hot air of sufficient strength to produce spray, he obtained these very significant results, viz.: that the breaking up of these drops of water was accompanied by the production of both negative and positive electric ions.

A thunderstorm, as is well known, is always characterized by strong upward currents of heated air, which by experiment has been shown to amply account for the breaking up of all rain drops which would otherwise fall through the currents. Hence at the summit of the uprising air current of the storm, within the thundercloud, a rapid electrical separation, as in the foregoing experiment, goes on, the first of which is positively charged rain drops, and free negative ions. The charges of the positive ions are also continually increased by the successive division and coalescence of the added rain drops.

The positively charged drops fall to the earth whenever the upward air current becomes weak enough to permit their passage through it. The negative ions are carried up into the higher part of the cloud, where they unite with the cloud particles, and facilitate their coalescence into negatively charged drops.

These ultimately fall in the gentler rain of the storm. Thus the same process that produces the giant cumulus cloud of the thunder storm, with its violent uprising current of moist air, also gives the separation of electricity required to produce lightning and thunder.

A thunder storm may begin at any place where a layer of warm air underlies a colder one, for the lighter warm air is sure to force its way through the heavier cold layers and this rising produces the thunder storm in the manner described.



Experience teaches that on land, at least, thunder storms occur most frequently in the early afternoon, because the air is warmest at that time, and generally in summer time. Areas they are said to be most frequent at night, and in winter time, because of well-known thermal conditions that prevail next to the water and in the air above.

The ultimate controlling factor is temperature, which seems to vary in consonance with the sun-spot period, but with modifications due to an occasional excess of volcanic dust in the air.

It follows that the thunderstorm is not the beautiful simple vortex with horizontal axis pictured in books. Instead, we have the air floating in from

all sides, and the warm air rising, cooling by expansion and thus building up the typical thunder cloud, all moving forward under the control of the prevailing cyclonic wind.

Then, as a result of strong connection, rain forms at a considerable altitude where the air is cool, so cold at times that hail instead of rain is often formed.

Excessive condensation anywhere in a thunder cloud produces an excess of electrification and electrical discharge and a "rain gush" follows, but as sound travels faster than rain falls we hear the thunder before the "rain gush" reaches us."

Chief of French Staff.

General Dupuri has been made Chief of the General Staff of the French army. The general is a man of energy and has exceptional ability, and his appointment has met with the approval of all the ranks of the French army.

Dyspeptics Should Avoid Drugs And Medicines

Try a Little Magnesia Instead.

Some people instinctively shut their eyes to danger, and it may be that instinct, or custom or habit causes dyspeptics to take drugs, patent foods and medicines, artificial digestives, etc.

But closing the eyes does not banish the danger, and it is certain that neither drugs nor medicines possess the power to destroy the harmful excessive acid in the stomach, which is the underlying cause of most forms of indigestion and dyspepsia. They may give temporary relief, but ever increasing quantities must be taken, and all the time the acid remains in the stomach as dangerous as ever.

Physicians know this and that is why their advice so often to sufferers from digestive and stomach trouble is "Just get about an ounce of pure bisurated magnesia from any druggist and take a teaspoonful in a little water immediately after every meal." This will instantly neutralize all the harmful acid in the stomach and stop all food fermentation, thus enabling you to enjoy hearty meals without experiencing the least pain or unpleasantness afterward.

True Candor.

"Am I good enough for you?" sighed the fond lover.

"No," said the girl candidly, "you're not, but you are too good for any other girl."

Minard's Liniment Cures Distemper

Evening Dress.

"The evening wore on," continued the man who was telling the story.

"Excuse me," interrupted the would-be wit; "but can you tell us what the evening wore on that occasion?"

"I don't know that it is important," replied the story-teller. "But if you must know, I believe it was the close of a summer day."

Minard's Liniment Cures Distemper

World's Record Wheat Crop.

In view of various claims of world's record wheat crops for large areas, the Crowfoot Farming Company of Crowfoot, Alberta, submit a sworn statement of their results for the year 1915 which probably surpass all properly authenticated claims from other sources. From 1356 acres the Crowfoot Farming Company received an average yield of 51 bushels, 56 1-3 pounds per acre of number one spring wheat, by actual selling weight; 400 acres of wheat averaged 59¾ bushels per acre. These records were established in the Canadian Pacific Irrigation Block in Southern Alberta.

The Brute.

Mrs. Willis—Wake up, John! Wake up!

Mr. Willis—What's the matter?

Mrs. Willis—I hear a harsh, grating noise. I think someone is trying the door.

Mr. Willis—Nonsense. It's some rae trying that cake you made to-day.

GERMAN SMOKERS THRIFTY.

Tobacco Trade Journal Predicts Ruin of Industry.

Total ruin of the German tobacco industry is predicted by the Tabak Zeitung, the organ of the combined tobacco manufacturers and dealers in Germany. It points out that the sale of cigars and cigarettes, which had been diminishing steadily since the end of 1914, sank to a minimum during August, 1915. The trade organ complains that men who formerly smoked cigars costing at least 3 cents apiece have now descended to "weeds," sold at 1 cent, while the smokers of the cheaper brands of cigars and cigarettes have in many cases taken to the pipe and the commonest kind of tobacco.

The journal concludes by saying that "the position is disastrous and the outlook hopeless because the financial condition of Germany excludes the possibility of any marked improvement after the war."

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day it is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Honesty of French.

A British colonel who is not unknown in the political world has every reason to think the French are honest. While in Marseilles the other day he dropped a wallet containing $5,000, and did not discover his loss for some time. When he did he rushed off at once to the chief police station, and to his great relief, found that a French artilleryman had picked it up and brought it at once to the station.

Dog Meat Eaten.

Among the Chinese a particular species of dog is said to be reared for the table. It is a small dog of a greyhound shape, with a muzzle much more elongated than in terriers. The flesh of black dogs is preferred to that of animals of any other color on account of the greater amount of nutriment the black dogs are supposed to possess.

Minard's Liniment Cures Garget in Cows

New Way to Kill Rats.

A new way to kill the rats which infest the trenches is reported by a South African officer writing from France. He says: "We found one of our men putting a bit of cheese on his bayonet and firing a rifle every time a rat started to eat it."

A druggist can obtain an imitation of MINARD'S LINIMENT from a Toronto house at a very low price, and have it labeled his own product.

This greasy imitation is the poorest one we have yet seen of the many that every Tom, Dick and Harry has tried to introduce.

Ask for MINARD'S and you will get it.

Jam in War. Why Not in Peace?

When we think or read of the vast expenses of the present war our minds naturally turn to munitions, aeroplanes, submarines, equipments and items of a similar warlike nature, but the English army account for the last financial year opens another vista. During the twelve months we are told $10,000,000 was spent on jam! Does not this suggest a possibility that this item might advantageously appear on our domestic menu with greater frequency?

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always.

SECOND CON ELDERSLIE

Have you caught the strains so sweet and low that papa sings?

Henry Priebe visited friends here on Sunday.

During the wind storm on the evening of Oct 16th W J Allen's windmill was blown down and badly twisted up and broken.

Born—On Oct 17th, to Mr and Mrs Alex McGregor, a son.

Mr Alex Anderson and son, Lieut Duncan Anderson, of Scone, visited their aunt, Mrs Wm Hope, one day recently.

Mrs Tulloch, of Brant, visited last week with her daughter, Mrs A McGregor.

Death has again visited this vicinity and claimed for its victim one of the oldest members of the community in the person of Samuel Patterson, sr, who was suddenly called away on Oct 17th at the ripe old age of 85 years and 7 months. Mr Patterson was a native of Derry Co, Ireland. He came with his parents to Canada in the year 1847. For a short period he lived in Cookstown and then moved to the 2nd con Elderslie with his young bride, where they since resided. Mr Patterson, with all the rest of the pioneers of this section, endured many hardships and toiled faithfully to make for himself and his family a home. Deceased had been in failing health for several years, suffering much from rheumatism, but death came very suddenly and unexpectedly, heart trouble being the immediate cause. Besides a brother, Mr Wilson Patterson, sr, of this con, he leaves to mourn his loss a wife and family of four—Maggie, Thomas and Samuel, all residing on this con, and Wm of Parkdale. The funeral, which was held from the residence of his son, T H Patterson, on Oct 19th, was very largely attended. Rev J A Hills, his pastor, conducted the service, and the remains were laid to rest in St Andrew's cemetery, 4th con. The sorrowing relatives and friends have the sympathy of this community in their time of sorrow.

TURNER'S

Mr and Mrs Joe Hyde, of the 4th Bruce, spent Saturday with his mother here.

Mr [illegible] McLeod was visiting with h[illegible] Mrs John Pollock.

Many [illegible]s of Mr Allan McKinnon will be sorry to hear of him being quite ill.

Mrs Robt Pollock was visiting friends in Bruce.

Mr Wm Schell expects to start work with Mr Thompson, clover thresher, the first of the month.

Col Cameron left on Saturday for Toronto hospital. He was accompanied by his nephew, Mr Archie Cameron.

PINKERTON

The Ladies of Red Cross are this week mailing twenty boxes of cake, candy and other treats and gifts for Christmas to the soldier boys who have gone from here, viz., Capt J A Reid, Sergt Andrew Bain, Ptes Frank Pinkerton, Jerry Desmond, Andrew Culham, Elma Gregg, Samuel Reaburn, George Stewart, John Woelfle, John McAfee, Edgar McAfee, Gordon Garland, Edgar Garland, Henry Campbell, Edgar Campbell, Frank Sawyer, Lorne Reid, John Nicholl, Wm Bell.

(Intended for last week)

Mrs (Rev) Gale went to Alma this week for a short visit.

Mrs Simpson, of Brooklyn, N Y, with her little son visited at Mr D Pinkerton's last week. Mrs Simpson was formerly Miss Irene Geary, daughter of Mr Robt Geary, formerly of Pinkerton.

Mrs H D Pitcher of Toronto spent a few days with her sister Mrs Adam Reid.

Rev and Mrs Gale drove to Teeswater last week and spent a couple of days.

PRESENTATION TO SOLDIER

On Friday evening last there was a very pleasant gathering of neighbors and friends at the home of Mr and Mrs Thos O Brown, Elderslie, when their son, Sig. Walter Harry Brown, was presented with a wrist watch and a purse of money. Mr David Wm was chairman. The following address was read by Mr Jas Walker, and the presentation was made by Mr Thos McBeath:

SIGNALLER HARRY BROWN:

Comrade and Friend—We meet this evening to offer you our congratulations, also in a measure to show our appreciation of the stand you have taken in offering your services to King and country at this very critical time in the history of our beloved Empire. It is held by some that in peace or in war the services of the man behind the plow are equally as important to this country as the man behind the gun. You considered the call to arms, "more men, more men," most urgent, carrying out the maxim that the great thing in life is not to see in the dim distance, but to do the duty that lies clearly at hand. Hundreds of thousands of Canada's bravest and best sons have since that memorable day in August, 1914, rallied round the flag to defend and maintain the principles of the Empire: justice and liberty, dear to every Briton, and faced a treacherous and most unscrupulous foe with a preponderance of more than forty years. We are proud when we say that although the end of this conflict is yet in the distance, we are assured that victory is for Britain and her Allies, and Prussian militarism will be wiped out, righteousness alone exalting nations. We ask you to accept this watch and purse as a token of esteem and friendship accompanied by our best wishes for all kinds of success as a soldier of King George. And may God's blessing rest upon you, guarding and protecting you till you return again to our own beloved Canada. Signed on behalf of your neighbors.

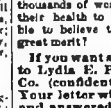
Short speeches were made by Messrs J M Hopper, Jas McBride, D McBeath and Thos O Brown. The Misses Potter rendered vocal and piano selections, and Mr Wm T Hopper sang a song. Following this programme the balance of the evening was spent in the enjoyment of music and dancing.

—A New York farmer who died recently left an estate behind him valued at over $95,000, of which $35 was in household furniture and $61,608.80 in mortgages. What had that man lived for? Was his career a success?

"I DON'T SUFFER ANY MORE"

"Feel Like a New Person," says Mrs. Hamilton.

New Castle, Ind.—"From the time I was eleven years old until I was seventeen I suffered each month so I had to be in bed. I had headache, backache and such pains I would cramp double every month. I did not know what it was to be easy a minute. My health was all run down and the doctors did not do me any good. A neighbor told my mother about Lydia E. Pinkham's Vegetable Compound and I took it, and now I feel like a new person. I don't suffer any more and I am regular every month."—Mrs. HAZEL HAMILTON, 822 South 16th St.



When a remedy has lived for forty years, steadily growing in popularity and influence, and thousands upon thousands of women declare they owe their health to it, is it not reasonable to believe that it is an article of great merit?

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

—From week to week questions political and otherwise of the utmost importance to the farmer are coming to the front. These questions are in many instances permitted to pass without comment by some newspapers for political reasons. That old and reliable friend of the farmer, The Weekly Sun, does not allow any questions affecting the farmer or his family to pass without comment. You may not always agree with its opinion, but the Sun being free from party or political control gives its readers an unbiased opinion on all questions. These opinions are always worth reading, while the Sun's market reports have long been considered most reliable from the farmer's standpoint. Are you reading this exponent of your interests? If not, you are missing many good things each week. You will find The Sun instructive and profitable reading.

Frank Boyle Killed

Just as we go to press the news is heard that Pte Frank Boyle is reported killed in France.

Battery Wants Men

Lieut G R Weight, of the 64th Battery, Guelph, was in town on Friday, and will be at the Hartley House, Walkerton, on Tuesday, Nov 14th, to receive recruits for overseas service.

S. S. Convention

The North Bruce S S Association will hold their annual convention in Knox church, Paisley, on Tuesday, Nov 14th. Sessions at 2 in the afternoon and 7.30 in the evening. All interested in S S work are invited to attend.

Patriotic Entertainment

Don't fail to hear Lottie I. Tillotson, the gifted lecturer and entertainer, in Town Hall, Nov 14. An intellectual treat is in store for all who attend, as well as abundance of wit and humor. As an elocutionist, Miss Tillotson has few equals and no superiors. Musical numbers by local talent also by Catherine Campbell and Willie McDonald, juvenile Scottish singers from Port Elgin. By patronizing this entertainment you help to provide Christmas gifts for our soldier boys at the front.

Recruiting for Highland Battalion

Corp Allen, of the 241st Batt, was in Paisley on Thursday last looking up the prospects for picking up recruits. If there are any more young men in Bruce who are willing to enter military service at this time, the 241st should attract them, as Bruceites dearly love the kilts. The 241st are known as the Canadian Scottish Borderers, and are affiliated with the King's Own Scottish Borderers. The battalion has now 500 men enlisted, and it is hoped that the number required to bring it to full strength can be procured in Huron and Bruce counties. Other officers were visiting neighboring towns last week.

Stock Tonics, &c.

A quantity of **Glauber Salts,** while they last, at 10 lbs for 25c.

A quantity of American Horse Tonic, regular 25c size, at 15c a package to clear.

Dr. Hess' Stock Tonic, in 100-lb., 25-lb., 12-lb., 7-lb. and 1¼-lb packages. Heave Powder, Worm Powder, Instant Louse Killer, Poultry Panacea, Dip and Disinfectant and Healing Powder.

Also a full stock of **Royal Purple and International** preparations.

THE ANGELS ON THE STAIRS

"Where is daddy now?" "When is daddy coming back?" had been little Elsie's constant questions since her father's regiment had been called across the Channel to take part in the awful battles in Flanders.

Elsie was too young to realize the full meaning of war. Mrs. Westgarth had told her that daddy had gone to fight the Germans, and would come back with honor and glory. She had shown her the more cheerful of the pictures in the illustrated papers, but she had kept from the child her own terrible fears.

"Captain Westgarth—missing," had been the official report. What did it mean? Taken prisoner, injured for life—dead? The suspense of a fortnight was far worse than any shock of news—even the worst.

One November evening there came an imperative ring of the telephone. It was an official at the War Office speaking.

"Mrs. Westgarth?" he asked.

"Yes, yes!"

"Your husband is safe."

"Thank God!"

"He is due to arrive at Victoria station at four o'clock to-morrow morning."

"Then he is wounded?"

"We don't know. The information is that he straggled back to our lines, and was sent to hospital at base. It probably means that he is only slightly wounded, and is being sent home to recuperate. If it were anything dangerous he couldn't be moved across the Channel. Don't worry, Mrs. Westgarth. To-morrow morning at four you will have him with you. Good luck!"

There was no need to make preparations in the house for Captain Westgarth's arrival. Ever since he had left for the war his room had been ready for instant hospital service. Everything needful was there. Mrs. Westgarth, a soldier's daughter, had fitted herself for surgical nursing, but she had also a call on a trained nurse to share the vigils. She now 'phoned and arranged that the nurse should meet her at Victoria Station, while the doctor should call at the house early in the morning.

It only remained to tell Elsie that Daddy would be with them to-morrow. But the child was fast asleep. It seemed a pity to disturb her rest. Better to give her the happy surprise when daddy was actually in the house.

* * * * * *

Victoria Station in the black hours of the morning was closed to the general public. Outside, in the fog-swathed Buckingham Palace Road, were gathered a dim line of Red Cross motors, private cars, and taxis. Inside, where the blazing arc-lights thrust through the fog drifting slowly in from riverwards, were St. John's ambulance men in their trim uniform of dark blue tunic and puttees; stretchers and wheeled ambulance carriages; and a few of the railway police in the uniform which is usually mistaken for the regular police. Two khakied sentries with fixed bayonets stood impassive at the station entrance.

There were also the relatives and friends of the men returning from the front. The common sorrow drew together into conversation women of all ranks of life.

Fear clutched at their hearts. It is not the superficially wounded, they felt, who arrive in London at the dead hours of the night. Cases too terrible for public sight would be brought at that hour.

In spite of the hopeful words of the official at the War Office, Mrs. Westgarth waited with dread for the arrival of her husband.

A sudden stir and bustle announced that the train was signalled. The police waved into position the first of the line of Red Cross cars and private vehicles. The ambulance men prepared themselves.

The long train crept in very slowly and carefully. There was no perceptible jerk when it stopped. The relatives of the men ran eagerly from carriage to carriage in search of their loved ones.

It was a heartrending scene—and yet, in places, a joyful scene. Some there were who found their worst fears lifted. With others ——

Captain Westgarth sat stiffly upright in his compartment. His was not bandaged. An unlighted pipe was set firmly between his teeth. He remained seated as if did not even look out of the window.

"Oh, Frank! It's you at last—and not wounded!" cried Mrs. Westgarth joyfully.

Captain Westgarth turned his head stiffly towards her.

"Who are you?" he asked.

"Your wife—Madge."

"I've never seen you before," he said.

An R.A.M.C. man, who had travelled with the train, came up hastily to Mrs. Westgarth and drew her aside.

"Your husband has been mentally injured by a bursting shell," he explained. "It's not the first case we've had. You must be very patient with him."

"Oh, my God! You mean that his mind has gone?"

"No, not that," soothed the Red Cross man. "He will recover in time. It's only a temporary effect."

"But he has been reported missing for over a fortnight. He has been in that condition all this time?"

"There have been other cases like this. No outward sign of injury at all. We take them right away from the scene of war. In his own home, with you to look after him —— Now, please, please don't worry! A little patience, and he will be quite his old self again."

Captain Westgarth was being helped out of the compartment by a St. John's man. Suddenly he cowered back.

"Over there!" he cried, pointing to an arc-light where the carbons spluttered. "Another shell! Duck, all of you! Shells all round! They've got our range! Hang you! Let me go!"

* * * * * *

Mrs. Westgarth had prepared herself for everything but this. Her husband unrecognized neither her nor the home. After the incident of the station he became dull and listless, and suffered himself to be taken to the house and put to bed with entire indifference.

What was to be done with Elsie? It would be cruel to let her see her father in his present state. Better to keep her away. Perhaps in a week's time ——

"Daddy is too ill for you to see him just now," the child was told.

Ten days of anxiety almost unendurable ensued. Doctors could do nothing for Captain Westgarth. He would sit in an armchair all day, stiffly upright, an unlighted pipe between his teeth, gazing at nothing, saying nothing. He accepted his wife's presence as that of a paid attendant. He gave no sign of recognition to relatives and friends who were brought to his room.

The doctor, groping for a remedy, had tentatively shown him some war pictures in a daily paper. The only result was to send his temperature leaping and bring on a slight delirium.

Another week, and the situation seemed even more hopeless. Captain Westgarth was sinking into a state of mindless animalism.

Elsie was crying to be taken to her father's room. Mrs. Westgarth, almost distracted, 'phoned to her sister-in-law, and arranged for her to carry away the child the very next day.

But that night Elsie decided on action of her own. She would go to daddy and kiss him well again. From the nursery she would creep down stairs to her nightdress and bare feet.

It was quite dark on the stairs. Elsie was not afraid of the dark. She started to descend cautiously, so that no one should hear her.

But a stairboard creaked loudly, and Mrs. Westgarth, from her own room, heard. She came out to the landing, and called up:

"Is that you, Elsie? Go back to your room."

"Oh, mummy, look—look!"

Mrs. Westgarth could see nothing unusual.

"Look at what?" she asked.

"The angels, mummy! They are going up and down the stairs; so many of them!"

Mrs. Westgarth caught her breath sharply.

"You are frightened, dear. Come and sleep with me to-night," she answered.

"I'm not frightened at all, mummy. The angels look so kind. Can't you see them?"

The child came down fearlessly, joyfully, making way on the stairs for transcendental figures which only she could see. It brought a chill of fear to Mrs. Westgarth's heart. Could these be the messengers of death?

Elsie reached the landing by her father's room. She held out her hands in prayer to an unseen figure.

"Please make daddy well!" she pleaded.

It was as though the figure offered a hand and Elsie grasped it. Mrs. Westgarth, stupefied, remained stock-still as the child went to the door of Captain Westgarth's room and entered.

The figure entered, too.

"Daddy is in here," said the child, and closed the door.

The mother scarcely knew what she ought to do. Should she interfere? Angels—nonsense, of course! And yet Elsie could see them.

Mrs. Westgarth listened at the closed door. She could faintly hear Elsie in childish prayer by the father's bedside. Then silence. She waited, heedless of the cold, a full half-hour. Then she turned the handle and entered on tiptoe.

The child lay in bed with her father, snuggling close to him. Both were fast asleep.

* * * * * *

Early in the morning Mrs. Westgarth entered her husband's room and pulled up the blind.

He stirred drowsily and opened his eyes.

"Hallo, Madge!" said he. "Had such a queer dream last night. Thought there was an angel stroking my forehead. Must have been you, I suppose. What's the news of Kaiser Bill? Got him on the run—What? London Answers.

COLORS YOU CAN'T SEE.

Many Shades Painted on a Gun Has Strange Effect.

Four years ago there was an Aldershot ordinary field-gun which looked as though an insane artist had used it for a palette. Every color from a paint-box had been lavished upon it. Blue, brown, yellow, red, and green had been laid on in the most haphazard blobs and daubs, says London Answers.

It was not until you began to walk away from the gun that you realized there was method in he painter's madness. At two hundred yards the violent colors had all run together, at three hundred the gun seemed to be fading out of sight, at five hundred it was practically invisible.

The armored train, manned by British soldiers and British guns is painted in precisely similar fashion.

To give our War Office its due, it was the first to realize that the thin red line of Crimean days was quite out of date with rifles that would carry a mile, and just before the South African War khaki became the universal wear.

At first our Tommies hated khaki, and in August, 1903, it was announced that it was to be abandoned, and "Atholl grey" substituted. But it was pointed out that grey would stand terribly, and that it would not be as invisible as khaki, and in the end practical use won the day.

The Germans followed our example, but their khaki has a greenish tint which is extremely and unnecessarily ugly.

The Russians fight in grey, a color well adapted to their vast plains, covered in summer with withered grass and in winter with snow.

IF FOOD DISAGREES DRINK HOT WATER

When food lies like lead in the stomach and you have that uncomfortable-distended feeling, it is because of insufficient digestive supply to the stomach, combined with acid and food fermentation. In such cases try the plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure bicarbonated magnesia in half a glass of water, as hot as you can comfortably drink it. The hot water dissolves the bland of the stomach, and the bicarbated magnesia, as any physician can tell you, instantly neutralizes the acid and checks the food fermentation. Try this simple plan and you will be astonished at the prompt relief, the delightful comfort that always follows the restoration of the normal process of digestion. People who find it inconvenient at times to secure hot water and magnesia, who are frequently obliged to take lunch meals poorly prepared, should always take two or three five-grain tablets of Bisurated Magnesia after meals to prevent fermentation and neutralize the acid in the stomach.

She Met A Good One.

The inspector was hearing a class of small girls read, when they came to the word "pilgrim." "Now who can tell me the meaning of the word 'pilgrim'?" A little hand went up, and a voice said—"Please, sir, a pilgrim is a man that travels about a good deal." "Well, I travel about a good deal, and I'm not a pilgrim." "But, please, sir, I mean a good man!"

In Cochin China the inhabitants prefer rotten eggs to fresh ones.

To a good woman a lover's jealousy is a homage, but to a good wife a husband's jealousy is an insult.

MAKING BREAD FOR BRITISH ARMIES

MILITARY BAKESHOP "SOMEWHERE IN FRANCE."

Wonderful Organization That Feeds the Armies in the Field.

"Bakers, attention!" The words of command ring out in the great hall. From their positions, bent double over the long troughs, 200 men straighten belt upright, head erect, eyes steady, hands rigid at their sides.

"Carry on!"

Immediately 400 hands plunge into the billowy dough and the work of kneading begins again. A man clad in a sleeveless shirt, wearing a cook's cap, passes by me, bearing a heavy load of fresh dough, which he flings down a "shoot" to the floor below, writes W. Kay Wallace from the British headquarters in France.

We are inspecting briefly the process of providing bread for an army. Here, in the former factory, the bread of the British armies in the field is being made. One hundred and twenty thousand two-pound loaves of bread are each day baked in the ovens of this bakery. I was given a slice of the bread. It was crisp, appetizing and excellent. Day and night work is carried on by enlisted men of the army—men who wear their khaki as proudly as any of the troops in the front-line trenches. The division of labor is admirable. Every device which tends to increase the efficiency of the men has been installed. Yet it is "hand-made," one might almost say "home-made," bread that is delivered to the men at the front.

Flour Brought From Canada.

Here, in the long sheds, the flour that has just come in from Canada is stacked, and, passing through hands of skilled workmen, is turned into bread as if by magic. A steady stream of kneaded dough, freshly leavened, is being carried to the "shoots"; below it is gathered up and slung on flour-sprinkled tables, cut into round lumps about eight inches in diameter, each lump forming a loaf; each is carefully weighed to make all the loaves of identical size. Then the loaves are shoveled into the ovens, baked to a turn, drawn out, carried into the adjoining storeroom, where they are left to cool. When cooled the fresh bread is packed into sacks, loaded into goods vans, which wait right at the door of the building, and twelve hours from the time that it has left this bakery the bread is in the hands of the quartermasters ready for distribution to the men.

Industrialism in its highest state of perfection never produced a more efficient organization. The men work at high speed. Military discipline prevails. There is no talking or chaffing. Here there is none of that atmosphere of personal irresponsibility so prevalent in industrial enterprises. I watched for a long time these men at their work, straining every nerve and muscle to do their best as efficiently as possible, and as we passed from hall to hall the command, "Bakers, attention!" brought the men instantly to the rigid position demanded by the drill regulations.

Looking over the long rows of faces I was not a little astonished to find such a variety of ages. Gray-haired men work side by side with what seemed to be mere boys. On inquiring, I learned that fathers and sons often enlisted together for this special service; skilled men of the trade who before the war had carried on their work for the most part in individual shops.

Army the Finest Union.

Those of us who have been taught to believe that the Englishman is a confirmed individualist, that he is incapable of organization in the German sense, must revise our notions.

Those who have been led to believe that the British workman is opposed to compulsory military service and that trade union men are submitting recalcitrantly to army regulations must change their point of view. As a soldier here, a trade union man, said to me, "The finest union in the world is the army."

This great bakery is only a model of many other such establishments which I visited. Nearby are warehouses filled with stores for the troops in the field. The amount of goods handled in one consignment is stupendous; 50,000 tins of jam, 20,000 boxes of meat, cases of onions by the thousands, bags of sugar by the 10,000, boxes of tea by the ton, and the like. Brought in from all parts of the world direct by transport, the goods are stored in the warehouses, stacked in piles so arranged that though hundreds of thousands of cases and sacks are here stored, yet almost at a glance the exact amount of the goods on hand can be counted.

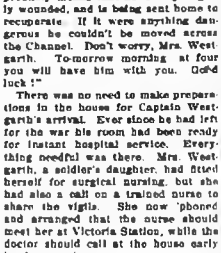
The supplies are so vast that no matter how great the requisition may be it can be instantly filled. I walked through long rows of goods stacked up in blocks as high as city houses. The different types of wares are arranged in squares resembling a city street. Here is a square all of sugar; close by, one of jam; beyond, another of marmalade, and so on. All the goods bear British trade marks with the exception of tinned meat. We walked for half a mile through this strange and silent city of foodstuffs. "Le pays de Cocagne" (the land of plenty), as a Russian companion remarked to me, staring up at a high edifice made of bags of sugar.

It is a fact admitted by every one that no army in the field is better cared for or fed than the British troops in France, but at the same time it is a current belief that no army is as extravagant. This latter opinion, which is widely held not merely in neutral countries but even in England, would not seem to be borne out by facts. On the contrary, so far as could be observed during a brief sojourn, I found everywhere signs of rigid economy. A regimental cook at a base told me that he had saved 8,000 rations during the last month. This does not mean that the men are stinted in any way, but the allowance of fresh meat, bread, butter, cheese, jam and tea is greater than needed to satisfy the appetite.

"Muddle" Gone by Board.

Efficiency and economy are the two dominant factors of success in modern warfare, as in modern industry. The old spirit of "muddle" to which many clung so tenaciously during the first and even the second year of the war has been swept by the board. The third and, as many hope and confidently believe, the last year of the war is opening auspiciously. The signs of success are not to be read exclusively in the bulletins from the fighting front, nor estimated by the number of prisoners taken or miles of trenches captured; but rather by watching how smoothly, silently, irresistibly the great machine of the army, now perfected in every part, is gearing up the speed of efficiency.

SOUNDING FOR SHELLS.



Ingenious Instrument Now Being Used in France.

Where the tide of battle has ebbed and flowed, the soil of France is so full of projectiles that a French inventor has devised an electrical apparatus to find them. As soon as the thrifty French recover any portion of land from the invader, they return it at once to agricultural use, but before the soil is ploughed it is necessary to find any sources of potential danger —in the form of unexploded shells — that may be found. According to the Edison Monthly, the instrument that they use is an adaptation of the Hughes induction balance. As described in the proceedings of the French Academy of Sciences, the apparatus is so sensitive that the operator can detect by sound, through the telephone, the presence of a fragment of shell, or even of a tin can. It is also possible from the nature of the sound to distinguish between considerable masses of metal and small fragments. The instrument has two coils of large diameter, the windings of which are on wooden frames. As is usual in the induction balance, no metal of any kind is used in that part of the instrument. The two coils, attached to a handle, form an instrument with which the surface of the soil is explored and tested. As long as there is no metal present the mutual induction of the primary and the secondary circuits is in a neutral state, with the result that the telephone remains silent. When fragments of shell are encountered, even if they lie at considerable depth, their presence speaks, as it were, through the telephone. It takes two persons about an hour to test thoroughly an acre of ground, but when the work has been completed the farmer can be sure that there is nothing left there to endanger his life or blunt his ploughshare.

BATTLES AND RAINFALL.

Meteorologists Say Gun-fire Will Not Produce Rain.

Many persons in Europe and many in this country have noticed the unusual rainfalls that have occurred in various localities since the beginning of the great war, and have wondered whether those and other anomalies in the weather could be caused by the tremendous gunfire in Europe. Meteorologists scout the idea. They say that, to cause rain, gun-fire would have to be on a vastly greater scale than it has yet attained, and that all attempts to produce rain by bombarding the clouds have failed. In discussing the extremely heavy rainfall in England during the winter of 1914-15, Dr. H. R. Mill, director of the British Rainfall Organization, made the following statement: "The vastness of the work done by the quiet processes of nature requires only to be realized in order to show the incalculable improbability that gun-fire in France can produce a wet winter in England. Take the case of three and a half inches of rain that fell in excess of the average in December over 58,000 square miles of England and Wales. That quantity is 203,000 square-mile inches or more than 13,000,000,000 tons. At winter temperatures, saturated water vapor would form about one per cent of the mass of the atmosphere that contained it; hence the minimum quantity of air that must have carried over England and Wales in December, 1914, must have exceeded 1,300,000,000,000 tons. The amount of force required even to deviate the direction of moving masses of that magnitude is surely far beyond that which can be exerted even by nations at war."

THE NATION'S FUTURE Depends Upon Healthy Babies

Properly reared children grow up to be strong, healthy citizens

Many diseases to which children are susceptible, first indicate their presence in the bowels. The careful mother should watch her child's bowel movements and use

Mrs. Winslow's Soothing Syrup

It is a corrective for diarrhœa, colic and other ailments to which children are subject especially during the teething period.

It is absolutely **non-narcotic** and contains neither opium, morphine nor any of their derivatives.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Soothes the fretting child during the trying period of its development and thus gives rest and relief to both child and mother.

From Erin's Green Isle

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irish-men.

Mr. Duke, the Chief Secretary for Ireland, has been making a tour of the southern counties.

At a meeting of the Portadown Town Council it was decided to reopen the flax markets.

The Admiralty has raised male clerks' pay in the dockyards of Ireland from $6.24 to $7.20.

A British dirigible recently arrived over Dublin Bay. Large crowds gathered to watch it manoeuvring.

Mr. John Murray, who for a great number of years has held the position of postmaster in Carlow, has just retired.

A German prisoner named Backmoyer, who attempted to escape from Oldcastle Detention Camp, Co. Meath was shot by a sentry and died.

The Listowel Urban Council are taking the necessary steps towards putting the School Attendance Act into operation in the urban district.

The death has occurred in his 71st year of Mr. Joseph Atkinson, J.P., D.L., of Crowhill, Co. Armagh. He served for some years in the Hampshire Regiment.

The Local Government Board have notified the Sligo Co. Council of their approval of the scheme formulated for the maintenance of the roads by a system of direct labor.

It is understood that there is a proposal under consideration for the closing of several Irish provincial prisons, Waterford and Londonderry being amongst the number.

Emigration from Ballybunnion district during a recent week was very heavy, and the number of departures in a single day was the highest ever remembered in the district.

A 200-pound catch of mixed fish, in which were three 25-pound ling, has been made at Ballycotton by Mr. R. Blair, British Sea Anglers' Society, as the result of a day's angling.

The members of the V.A.D. Killeal have, through their president, the Countess of Kilmorey, remitted the sum of $250 to the Ulster Volunteer Force Hospital fund in Belfast.

The garden plot movement, which commenced in Belfast several years ago, has during the past year developed at a rapid rate, and there are now twenty separate gardens in the city.

A bed has been endowed in the Throne Room of the Dublin Castle Red Cross Hospital from funds subscribed by members of the St. John Ambulance Brigade, Dublin Castle Division.

At a meeting of the South Westmeath Teachers' Association it was stated if immediate action is not taken to meet the extra cost of living some of the teachers were confronted with starvation.

The death has occurred of Mr. John Henry Edge, K.C., at his residence, Dublin, in his 75th year. He was one of the best known citizens of Dublin, and played a large part in Irish administrative life.

A motorcycle collided with a cart at Ballylongford, Co. Kerry, with the result that Mr. Wallace, a well-known Limerick man, was killed and the occupant of the cycle car, Mr. Stokes, was killed.

A largely attended meeting of the National School Teachers of Belfast and district was held recently to consider the most effective means of obtaining an immediate permanent increase of salaries.

At a meeting of the West Waterford executive of the U.I.L. at Dungarvan resolutions were accepted calling upon the Government to immediately release the prisoners of the recent rebellion.

A Necessary Weakness.

He—The trouble with you women is that you have too much imagination.

She—I don't know. If we didn't imagine you men were a lot better than you are, none of us would ever marry you.

The Bread Problem is not a problem in the home where Shredded Wheat is known. The whole wheat grain is the real staff of life, and you have it in Shredded Wheat Biscuit prepared in a digestible form. It contains more real body-building material than meat or eggs, is more easily digested, and costs much less. The food for the up-and-coming man who does things with hand or brain—for the kiddies that need a well-balanced food for study or play—for the housewife who must save herself from kitchen drudgery. Delicious for breakfast or any meal, with milk or cream.

Made in Canada.

A MOMENT OF PERIL.

Maid Stuck a Lighted Candle Into the "Black Sand."

There is a striking illustration in Das Buch fur Alle of the fact that it is not necessary to roam over the world to find adventure. The German merchant of the story found it in his own peaceful house, in the quiet town of his birth. It happened on his daughter's wedding day, about sixty years ago. The happy father was alternately welcoming the guests and bustling about attending to final details.

In one of the halls he met a maid carelessly carrying a lighted candle without its holder. He did not rebuke her, as she was not one of the regular servants, but had only been brought in to help for the occasion. In a short time she returned from the cellar, her arms full of bottles, but with no candle. The absence of the light sent a sickening thought sweeping over the merchant. Only the day before several barrels of black powder had been stored in the cellar, and one of them had been opened in order to get a sample for a customer.

"Where is that candle?" he asked her quickly, with his heart in his mouth.

"I had my hands full and couldn't bring it up," the maid answered.

"Where did you leave it?"

"I stuck it in the black sand in the open barrel," she explained.

But the merchant had not waited to hear her out. Into the hall and down the cellar steps he stumbled. His knees were shaking, his breath caught in his throat; death already seemed to have its grip upon him.

Just beneath the room in which the guests were assembled stood the fatal barrel, the burning tallow candle upright in the powder. To his horror, he saw a long piece of burned-out wick sagging in the reddish flame. If that spark should fall! He made a desperate move toward the candle—and stopped. The slightest touch or breath might shake that glowing bit of wick into the powder. He heard the sound of laughter from above, and he trembled. He stared at the light, powerless to move.

Suddenly the end of the wick nodded, and with its movement the merchant recovered from his momentary paralysis. Cautiously he thrust both hands toward the candle; then, with a sudden squeeze, he smothered the wick and flame in his grasp. Never relaxing his hold, he carried the candle the length of the cellar. Then he fainted.

The Blushing Brides.

"Why are brides generally expected to be blushing as they walk down the aisle?"

"I suppose," replied Suffron Long, glancing cautiously about and lowering his voice, "that a good many of them blush to think how they are going to subdue the lords of creation after they've safely got them."

Watchful Waiting.

Farmer—Why haven't you harnessed that horse yet, Missie?

The Lady Help (holding bridle and bit)—I can't get this into his mouth, so I'm waiting for him to yawn.

BRAVE NAVAL CHAPLAINS.

Stories of Their Calm Daring in the Jutland Battle.

Mr. Arthur Pollen, in Land and Water, gives these stories of the bravery of naval chaplains in the recent fight:

"In the 6-inch battery of one ship an enemy shell set fire to a cordite charge, and there being others in close proximity, the officer of quarters at once gave orders to clear the battery. Before the order could be obeyed, two boys were knocked over by the ignition of a second charge.

"A naval chaplain went back, brushed the burning propellant off them and pulled them out, and got badly burned about the face and hands in doing so. With every feature disfigured and almost blinded, he was led, almost by force, below. The pain must have been excruciating. But he protested he was an absolute fraud, not a bit hurt, and that they ought to be giving their attention to people who were seriously injured.

"Another chaplain, hit in the spine, was told by the doctor that he only had a few hours to live. He sat in the chair, conversing cheerily with those around him till death came—by far the least concerned of all in the company."

THE SHADOW OF BROKEN HEALTH

Can Be Quickly Dispelled Through the Use of Dr. Williams Pink Pills.

When the shadow of poor health follows your life; when hope begins to fade and friends look serious, then is the time you should remember that thousands just as hopeless have been cured and restored to the sunshine of health by the use of Dr. Williams' Pink Pills. These pills actually make new, rich blood which brings a glow of health to anaemic cheeks; cures indigestion, headaches and backaches, drives out the stinging pains of rheumatism and neuralgia, strengthens the nerves and relieves as no other medicine can do the aches and pains from which womankind alone suffer. In any emergency of poor health give Dr. Williams Pink Pills a fair trial and they will not disappoint you. Here is a case that will bring hope to many a weary sufferer. Mrs. E. C. Taylor, Ascot Ave., Toronto, says: "A few days ago I was so run down with anaemia that I could scarcely walk about the house, and was not able to leave it. I had no color; my appetite was poor and I was constantly troubled with headaches, dizzy spells and general disinclination to move about or do anything. I tried many medicines, but none of them helped me, and my friends thought I was in a decline. One day a friend who was in to see me asked if I had tried Dr. Williams Pink Pills. I had heard of this medicine often, but had not used it, so I determined to give it a trial. I certainly got a pleasant surprise, for after using two boxes I could feel an improvement in my condition. Continuing the use of these pills I began to regain my health, the headaches and dizzy spells were disappearing, and I began to gain in weight. People began enquiring what I was taking and I was not slow to give Dr. Williams Pink Pills the credit. I took the pills for less than two months, and completely regained my old time health and strength. I hope my experience may convince some doubting person as to the great merit of Dr. Williams Pink Pills, as I certainly have cause to be a firm champion of them."

You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

WARNING TO THE PUBIC.

Parcels for Prisoners of War Must Be Strongly Packed.

The Canadian Post Office Department has been notified by the British Post Office that many parcels sent from Canada to prisoners of war in Germany are being received in London in a damaged condition, so that frequently they have to be repacked before they can be forwarded to Holland for transmission to Germany. The British Post Office adds that in most cases the damage appears to be due to the fact that the parcels were inadequately packed by the senders.

The public are warned, therefore, that parcels for prisoners of war, unless they are very strongly packed, will probably arrive in such condition as to be of little or no use to the recipients.

Ordinarily thin cardboard boxes, such as shoe-boxes, and thin wooden boxes should not be used; nor does a single sheet of ordinary brown paper afford sufficient protection. Even where proper materials are used, it is important that the contents should be tightly packed so as not to shake about during transit. The following forms of packing are recommended: (1) Strong double cardboard or strawboard boxes. Those grade of corrugated cardboard and having lids which completely enclose the sides of the box are the most suitable. (2) Tin-boxes such as are used for packing biscuits. (3) Strong wooden boxes. (4) Several folds of stout packing paper.

The British authorities advise that parcels for prisoners of war in Germany must not be wrapped in linen, calico, or any other textile material.

Parcels posted in Canada for prisoners of war in Germany which have not been adequately packed by the senders will not be forwarded but will be returned to the senders, as the British Post Office has notified the Department that parcels which are inadequately packed must be returned to the senders.

RHEUMATISM AFTER HIS DAY'S OUTING

Hunting Trip On a Wet Day Brings Painful Results.

Once upon a time Charles Mullen, of Philadelphia, went gunning. It was a dismal rainy day, and long exposure to cold and wet brought on a severe attack of rheumatism. He was confined to his home.

A friend recommended Sloan's Liniment, citing his own case as evidence of its effectiveness. Mullen bought a bottle and applied it to his aching limbs. Soon improvement was noticed and he was able to return to business.

Mr. Mullen writes "Since that experience I have never been without Sloan's Liniment in the medicine chest." You will find it soothes bruises, sprains, toothache and relieves lame back, neuralgia, in fact all external pains. At all druggists, 25c., 50c. and $1.00 a bottle.

Sloan's Liniment
KILLS PAIN

QUEENS SOLD ALMANACS.

Once a Special Privilege to Say Who's Who.

The sale of almanacs was once a lucrative monopoly. Queen Elizabeth granted the sole right to publish "almanacs and prognostications" to the Stationers' Company, and James I. extended the privilege to the Universities of Oxford and Cambridge, but for centuries only these three bodies were permitted to issue printed calendars. The monopoly ended when the claim of the king to the privilege of granting or withholding permission to issue calendars—a survival, perhaps, from days when kings asserted their right to regulate all things, including even the times and seasons—was definitely disproved and proclaimed nonexistent. Now anybody can say who's who anywhere.—London Chronicle.

A FINE TREATMENT FOR CATARRH

EASY TO MAKE AND COSTS LITTLE

Catarrh is such an insidious disease and has become so prevalent during the past few years that its treatment should be understood by all.

Science has fully proved that catarrh is a constitutional disease and therefore requires a constitutional treatment. Sprays, inhalers, salves and nose-drops seldom if ever give lasting benefit and often drive the disease further down the air passages and into the lungs.

If you have catarrh or catarrhal deafness, hawking, spitting, offensive breath and the other effects of Catarrhal trouble, Take this home and add to it 1 pint of hot water 1 oz. compound of granulated sugar. Stir until dissolved. Take one tablespoonful 4 times a day.

This will often bring quick relief from the distressing headaches, foggy mind, tells should open, breathing become easy and mucous stop dropping into the throat.

This treatment has a slight tonic action which makes it especially effective in cases where the blood has become thin and weak. It is easy to make, tastes pleasant and costs little. Every person who wishes to be free from this destructive disease should give this treatment a trial.

Hopelessly Ignorant.

"I dunno how that boy of mine got through college."

"Didn't he learn anything?"

"Why, he can't even read the Latin on his diploma."

Minard's Liniment Cures Diphtheria.

There is nothing quite so unsatisfactory as the good judgment a man might have used but didn't.

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye free ask Druggists or Murine Eye Remedy Co., Chicago

His Preference.

Young lady (with hopes)—What do you think is the fashionable color for a bride?

Male floorwalker—Tastes differ, but I should prefer a white one!

Minard's Liniment Cures Garget in Cows

Stepping Him.

"I shall never ask you to promise to come home early again," she said sorrowfully when he let himself in at two a.m.

"Why not, my dear?" he inquired quietly.

"It's bad enough to be married to a nighthawk and a loafer, without making a liar of you, too," she replied, and he had no comeback.

NUMBER 23 THE PROPRIETORS

20,000 MILES OF TRACKS.

The Canadian Pacific Railway is a Great Corporation.

If all the trackage over which the Canadian Pacific railway has control—that is, all the leased lines, or lines taken bodily over, or with running rights—be included in a grand total, the company operates to-day 20,000 miles of tracks. This fact alone would tell of the bigness of the corporation which, thirty years ago, issued its first annual statement on a sheet of notepaper. The company owns 100,000 miles of telegraph; 10,000,000 acres of unsold lands, worth $200,000,000; and controls shipping to the extent of 400,000 tons. One of the notable features of the great corporation is, that it takes account of so many things, which, at the first blush, might not seem to be related to railway transportation. The comfort of the inner man on the trains is, of course, of prime moment; but note how the Canadian Pacific Railway went out of its way to provide dietetic gastronomy. The railway company milks its own cows, and makes its own soap. It bakes its own bread; and it bores a tunnel through the mountains above the clouds. It grows its own potatoes, and its policies are of world-wide import and significance.

CHILDHOOD AILMENTS

Childhood ailments in most cases come through some derangement of the stomach or bowels. Baby's Own Tablets have been proved by thousands of mothers to be the greatest medicine known for the cure of these ailments, simply because they regulate the bowels and sweeten the stomach. Concerning them Mrs. Napoleon Lambert, St. Ignace, Que., writes: "Baby's Own Tablets are an excellent medicine for childhood ailments and I am well pleased with their use." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Needed for the House.

Husband—Now, my dear, tell me just what you absolutely need for the house.

Wife—We need a new serving table a set of dining room chairs, a front hall rug and at least two evening gowns.

Minard's Liniment Cures Distemper

Obliging

Mrs. Simmons was rather taken aback by learning that her new domestic's name was the same as her own daughter's.

"Your name, Katherine, and my daughter's being the same makes matters somewhat confusing," said Mrs. Simmons. "Suppose we change it?"

"Oi don't maind, mum," replied the girl.

"That's very nice," said the mistress. "How do you like, say, the name of Bridget?"

"Well, mum," returned the domestic, "it's not mesilf that's over partic'lar. Oi'm willing to call th' young leddy any name ye'd suggist, mum."

Minard's Liniment Co., Limited.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the every day ills and accidents of life I consider it has no equal.

I would not start on a voyage without it if it cost a dollar a bottle.

CAPT. F. R DESJARDIN.

Schr. "Storke," St. Andre, Kamouraska.

Salute Suitable for a General.

The recruit was having his first turn on sentry duty. "Now, remember your salutes," the corporal warned him. "If you see a lieutenant wearing two stars, slope arms. For a captain, with three stars, slope arms also. The major has a crown on his straps, and you present arms. For the colonel, who has stars and a crown, you present arms and turn out the guard." When he was left alone the recruit went over these orders again and again. Suddenly his musing was interrupted by the approach of an officer. This was a general, and the recruit did not know what to do for him. "And which might you be?" he asked blunt'y, unable to recognize the badge of the officer's rank. "I'm the general," replied the officer affably. "Sure, now, and are ye?" exclaimed the recruit in consternation. "Then ye'll want something big. How'd it do if I give you a bit of bayonet exercise?"

Minard's Liniment Cures Colds, &c.

Not Just For Fun.

A Scotsman and an Irishman were discussing the recent revolt in Ireland. The Scotsman remarked that too much fun was a dangerous thing. "What's that got to do with the rebellion in Ireland?" says Pat. "Weel," says Sandy, "ye see, it started with Larkin, and finished up in earnest."

Wanted to Practise.

"My boy, you want to practise thrift."

"I know, dad, but I haven't the tools."

"What do you mean by that?"

"If you'll let me have the five dollars I need I'll see how long I can make it last."

The Paisley Advocate

PAISLEY, NOV. 8th, 1916

—Toronto leads the province in many ways. Just now it's in the price of bread. The bakers have just raised it to 9c a loaf.

—Flour dropped 10c per bag at Winnipeg on Nov 1st. Small mercies thankfully received. The Ogilvie Milling Co. made three-quarters of a million in profits during the past year, and the Lake of the Woods Milling Co a half million. Shareholders probably don't approve of taking more for the next year, hence the drop of 10c a bag.

—Thirteen million dollars is the amount that the Canadian Patriotic Fund managers are to raise for 1917 and the campaign by which the work is to be accomplished will soon be inaugurated. The Province of Ontario is being asked to contribute six millions, and four millions of this is to be raised by private subscriptions. The purpose of the fund is to assist those, and those only, who require a greater measure of help than is given by the Government separation allowance and assigned pay. Of every three persons receiving separation allowance two are on the Patriotic Fund, the other one not being in need of further assistance.

—Returns of the Australian vote as to whether conscription should be adopted are not yet complete, but so far the majority is against. The proposed form of conscription was remarkably moderate, and it was to continue only for the duration of the war. Voluntary recruiting was to be continued, and only the deficiency under voluntary recruiting to be made up by compulsory service. No man under 21 years of age would be called up compulsorily. The exemptions are absolute: (1) Only sons; (2) any single man who was the sole support of dependents; (3) in families that had already given volunteers the remaining members up to one-half of the family not to be called.

—Possibly it is not generally known by everyone that a man is liable to a fine of $10 for the first offence and $25 for the second offence for employing boys of school age at such hours as will keep them away from school. What benefit can a splendid new school building with first-class equipment, all in charge of an efficient staff of teachers, be to a community if the children are not there regularly to receive instruction? Some men seem to believe that it is of more importance that a boy be earning an odd dime or quarter than acquiring an education. Of course, it's cheaper to hire a boy than a man, too. But some of these days a fine may be imposed, and then certain parties will have a better understanding of their relation to the educational system.

Postal Rates for Parcels to Soldiers

To Great Britain—12c per pound or fraction thereof; limit of weight 11 pounds. To France and Flanders — For parcels weighing up to three pounds, 24c; from 3 to 7 pounds, 32c; limit of weight 7 pounds. Mediterranean and Salonika: 1 pound, 32c; 2 pounds, 40c; 3 pounds, 48c; 4 pounds, 54c; 5 pounds, 62c; 6 pounds, 90c; 7 pounds, 98c. All parcels must be securely wrapped in stout paper, or preferably in cotton over paper, and tied firmly with the address in full written in two or more places. All parcels must be addressed in care of the Army Post Office, London, England. A customs declaration stating the contents with the value of the same must be attached to each parcel. Soldiers will not be required to pay duty. Special care must be taken in packing liquids, such as honey and syrups. Parcels not sufficiently packed or tied up in flimsy parcels will not be accepted by the postal authorities. The soldiers appreciate gifts of cake, tobacco, gum, oxo and soup cubes, candy, chocolates, sardines, chicken, pork and beans, etc., in tins, raisins, socks, handkerchiefs, mitts and gloves, wristlets and money. Post office money orders may be sent to any soldier, no matter where located, provided the sender has his number and battalion. Razors, indelible pencils, fountain pens, writing papers, magazines and papers, and especially letters are also very acceptable.

Personal Canvass for Recruiting

At a meeting of the commanding officers of the battalions in Military District No 1, held at London, ways and means of recruiting the units up to strength were discussed. It was practically unanimously decided that the practice of holding public meetings has served its term of usefulness and that the only way to obtain men was by personal canvass. The district was divided up among the battalions, and the O. C.'s were instructed to appoint recruiting parties consisting of officers and men to work the areas. The district was parcelled out as follows: The 153rd Batt will recruit in Wellington and East Elgin; the 150th was given Lambton, Huron and West Middlesex; 118th, Waterloo, Perth, Oxford and East Middlesex. The 24ist Batt, the A. M. C., A. S. C. and Batteries are given permission to recruit any place in the district, with London as open field to all units. The 186th Batt. will get what men it can in Kent and West Elgin.

Republican President

Mr Hughes is President of the United States for the next four years. The electors of the republic are reported to have said so on Tuesday.

LOCAL AND DISTRICT NEWS

Col. Douglass Back

Lieut Col Douglass, commander of the old 33rd Bruce Regiment, and who went overseas as an officer of the 34th Battalion, has returned from the front and visited his old home in Tara. He was in the trenches for fourteen days when he became a victim to shell shock and is now on leave of absence. A shell lighted a few feet in front of him, when he was thrown about forty feet and buried with the earth, but managed to extricate himself.

A Big Sale

The sale of farm stock and implements owned by Mr Dug McArthur, which was held last Thursday, was a great success. There was a large crowd present. Mr Dug Cavin wielded the hammer, it being his first sale since returning from the west and he was successful in securing high prices. Sixteen ewes averaged $27 each; 13 cows averaged $91 each; the highest price for any cow was $106. One horse brought $221, and a suckling foal $78. Calves sold from $29 to $38 apiece, while five brood sows averaged $36 each. The total proceeds amounted to $5,400. Mr John A Howe has taken over this fine farm, Mr McArthur retiring from active farming.—Times.

Complicated Litigation

Mr L C Spofford, who a few months ago took over the Putnam general store here, has been tied up owing to a chain of circumstances in which he forms, unwittingly, an important link. In July, 1914, a man named Young was killed in Guelph when he was struck by an automobile driven by Fred Spofford, jr, a brother of the Paisley merchant. A charge of manslaughter was laid against Fred Spofford, but the jury on the case brought in a verdict to the effect that the man's death was accidental. The dead man's widow then sued for $10,000 damages, this action being entered against Fred Spofford, sr, owner of the car. A verdict for $300 was secured, but plaintiff could not realize the money on the judgment. Learning that the defendant had made the deal for the Putnam stock in Paisley, proceedings were taken to satisfy the judgment on the assumption that the stock was the property of Fred Spofford, sr. The stock was seized by the sheriff of Perth County and held, pending litigation to decide whether the goods are owned by Fred Spofford, sr, or L C Spofford. The case came up at Walkerton on Tuesday.

From the Boys Overseas

Pte Stewart Daniel, who went to France with the Royal Canadian Regulars, wrote home a few days ago that he is now out of danger from the three wounds he suffered from shrapnel. He was hit in the left hand, left ankle and right hip. He will now be placed in a convalescent hospital, as I intends going back to the work of beating the Huns as soon as he can. Lieut J H McLean, son of Mr Hugh McLean, of Walkerwood, was wounded in the head, face and back on Oct 9th, and is now in England. He enlisted with the third contingent, and was in France for 28 months. Sergt A R Babcock writes from Belgium on Oct 25th, for the first time in several weeks. He has been very busy, but the transport section with which he is connected is now settled down in what he is pretty sure will be their billets for at least two months. The horses are in brick stables and the men in private houses. They are tickled to death with a change, that is a great improvement. Saw Geo Purdy about a week ago and he is looking fine. Sons Tooke is fine and dandy. What do you think of the news from the western front? Aren't we doing pretty well?

Vic Smeaton in the Thick of the Fighting

Being a member of the P P's, Pte Vic Smeaton has been on the first line for some time. Writing to a Paisley chum a short time ago, from the rest billet, Vic said: "In place of regular rows of huts and tents, I see a horizon, broken by the outlines of church spires and windmills, the kind you read about—real Flanders windmills. Except for a few pals standing around in uniform and an occasional aeroplane overhead, one would not know there was war on. Perhaps you think I am poetic, but you can't imagine the contrast of this to narrow, shell-shattered trenches, leafless trees, shot-torn ground and ruined buildings. We are also free from the stench of the dead. I saw Guy Purdy a couple of times. It was certainly a pleasure to see some one from the old home town. Paisley may be quiet, but what wouldn't I give to be back. I was with Ralph Geddes (of Port Elgin) when he was wounded. Fritz gave us quite a heavy strafe that night with trench mortars. I was a little quicker than Ralph, so managed to evade the particular "sausage" that got him. I took him to the dressing station after first aid was applied. He got an ugly rip on the neck. Too asked me how we managed to sleep in the trenches with the constant bombardment. Fritz does not keep up a constant bombardment, thank goodness, and since we have become superior in artillery he bombards us less frequently. For the sake of something to do, I counted the number of shells he put over to ours. Well, to his one we put over twenty. He usually strafes at 'stand to.' We are always awake all night, and if we were allowed to go to sleep we couldn't on account of constant machine gun fire, bombing attacks, etc. At 'stand down' we usually are strafed again, and then a quiet till noon." On Oct 21st he wrote: "I am going on five months in the trenches, and in that time I have seen as much fighting as I wish, which is a good deal more than you imagine. You no doubt know where we spent the last month or so. Talk about going over the parapet! We don't even get a chance to see the bayonet. When we get near Fritz's trench up go his hands, and all we hear is a babbling of "Mercy kamarade!" I used to read in the papers of Fritz surrendering so freely, but didn't believe it until I came up against him. One Hun big enough to handle four or five actually got down on his knees before me when I pointed a rifle in his direction. Dozens of others of our fellows have seen them do the same. Honestly, I laughed in his face. I got some fine souvenirs and could have got more, but the one souvenir I wanted was "yours truly." so I didn't burden myself with such useless things. I was away for a week down the line with influenza, but am now back on the job."

—The Red Cross workers of No 15 Bruce made the following shipment Oct 27th: 17 flannel shirts, 20 pairs socks, 9 suits pyjamas.

HEALTHIEST ONE IN THE FAMILY

No Sign Of Dropsy And Kidney Trouble Since Taking "FRUIT-A-TIVES"

HATTIE WARREN

Port Robinson, Ont., July 8th, 1915.

"We have used "Fruit-a-tives" in our house for over three years and have always found them a good medicine. *Our little girl, Hattie, was troubled with Kidney Disease.* The Doctor said she was threatened with Dropsy. Her limbs and body were all swollen and we began to think she could not live. Finally, we decided to try "Fruit-a-tives". *She began to show improvement after we had given her a few tablets.* In a short time, the swelling had all gone down and her flesh began to look more natural. Now she is the *healthiest one in the family* and has no signs of the old ailment. We can not say too much for "Fruit-a-tives" and would never be without them".

WILLIAM WARREN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Big Flock of Laying Hens

Mr D H Cooper, of Ripley, formerly baker for Mr F S McLachlan, Paisley, is going extensively into hens for egg production. The Express says he has 175 chickens and will probably increase the number to 200. Next winter he expects to sell twelve dozen eggs every day, and if he keeps this up for the next year he will have an income of over $100 a month from his flock of fowl.

Hydro-Electric on the Farm

The first farmer in Grey County to put in an electrical equipment and the first to tap the Eugenia system for a farm power load is Mr Thos I Mercer of Maxsdale. He has wired for lighting his own house, his mother's residence, two large barns, pump house, blacksmith shop, two drive sheds and one hog pen. With a half horsepower motor he can run the washing machine, the churn or a cream separator. An electric iron is a blessing to the women folk. A half horsepower power does the pumping with ease, but will probably be exchanged for a 2 horsepower motor which can be used for various other power purposes. A 10 horsepower motor is intended to do the heavy power work on the farm. It is mounted on skids and can be drawn from place to place for use in cutting corn, sawing wood or chopping grain.

Hallowe'en Fire Investigation

The burning of Reeve Ballachey's summer house on Hallowe'en was the subject of an official report and investigation last week. Village Clerk Gibson, in his capacity as local fire marshall, filled out the formal report which it is his duty to do in all cases of fire, and sent it on to the provincial fire marshall, stating that the circumstances were very suspicious, and it appeared to be a certain case of arson. Before the reply was in Mr Gibson's hands Mr A H Dickey, special investigator from the fire marshall's Office, Parliament Buildings, Toronto, arrived in town on Friday, and set about getting what information he could regarding the circumstances connected with the case. It may not be generally known that one function of the fire marshall's office in Toronto is to secure the co-operation of local municipal officers in checking the incendiary habit, and the promptness of our clerk in making his report was commended by the headquarters officer. What will be the outcome of the preliminary investigation made by Mr Dickey remains to be seen after his report has been considered in Toronto. From all information obtainable it appears to be certain the blaze cannot be attributed to the mischievous small boys of the village, or even the sporty youths, as everyone of these two classes has an alibi. The Hallowe'en proclamation issued, signed by Reeve Ballachey, had the effect of keeping them out of the mischief zone for that date, and removes them from all suspicion. There is a pretty general feeling that had Mr Ballachey been a plain citizen during the past three years, and not filling the position of reeve and magistrate, his summer house would not be in ashes to day. The suspicion will not down that an enemy hath done this thing, and the enmity was aroused by some action of Mr Ballachey in his official capacity. An enviable reward, indeed, for public services rendered. The diabolical individual guilty of the crime of arson may yet be brought to justice, and let us hope so, for one who can deliberately destroy property with the torch is hardly a desirable citizen to be at large, and could be confined within other precincts. The monetary loss by the fire amounts probably to three or four hundred dollars. The loss of this little building will be felt as much or even more by other villagers than by the owner and his household, as it had become quite an indispensable adjunct to the community equipment for social entertainment and outdoor recreation in summer. The beautiful grove in which it was located is a favorite resort for summer pleasure seekers, there being a good tennis court and croquet green there which all who desired were free to use at almost any time. The contents of the summer house consisted chiefly of the accessories requisite for the various games mentioned, as well as a cooking outfit, dishes, seating, etc. all provided by Mr and Mrs Ballachey for picnic parties which were frequently held there.

Job Printing Prices

WE beg to inform the patrons of our Job printing department that all prices hitherto quoted on job printing are withdrawn. Quotations given you a year ago, six months ago or even one month ago, are no longer effective. Prices on all classes of papers, envelopes, cards, cardboards and practically all material entering into printing have advanced from 25 per cent to 75 per cent and are still advancing. Cheap material has become dear and former medium priced or expensive goods have attained an incredible price. Our prices have to go up correspondingly and the best we can do is to give quotations from day to day. In every case we will give the lowest available price compatible with keeping up the high standard of work.

BORN

DANIEL—In Saugeen, Oct 25th, to Mr and Mrs R O Daniel, a daughter.

DIED

CAMERON—At Paisley, on Nov 7th, Mary McCormick, widow of the late Neil Cameron, aged 81 years and 9 months. Funeral on Friday. Service at the house at 10 o'clock a m. Interment in Port Elgin cemetery.

Suing the Counties

A few weeks ago an accident occurred in Culross by a tree falling across the road, and damaging an automobile and injuring its occupants. The owner of the car, who resides in Normanby, is bringing an action against the Counties of Bruce and Huron on the ground that the tree stood on the road allowance. The accident took place on the Turnberry and Culross townline, and the action is brought against both counties, the plaintiff claiming that this road was assumed by the two counties named. A committee composed of Reeves Pfleiger of Carrick, Phelan of Greenock, and Ferguson of Teeswater, viewed the scene of the accident and will bring in their report to the county council.

The Difference

TENNYSON or Longfellow could take a worthless sheet of paper and write a poem on it and make it worth $65,000—that's genius. There are some men who can write a few words on a sheet of paper and make it worth $5,000,000—that's capital. The Dominion of Canada can take half an ounce of silver and stamp upon it a "crowned head," and make it worth fifty cents—that's money. A mechanic can take material worth $5.00 and make it into watch springs worth $1,000—that's skill. There is a man in Toronto who can take a fifty-cent piece of canvas, paint a picture on it and make it worth several hundred dollars—that's art. A lady can purchase a hat for seventy-five cents, but prefers one that costs $25.00—that's foolishness. The author of this could write a cheque for $50,000,000, but it wouldn't be worth a cent—that's tough. There are tailors who will say they can serve you as well as Irwin at less—that's nerve. Every man who is posted and wants the best deals with Irwin—that's common-sense.

SUDDEN DEATH

Caused by Disease of the Kidneys.

The close connection which exists between the heart and the kidneys is well known nowadays. As soon as kidneys are diseased, arterial tension is increased and the heart functions are attached. When the kidneys no longer pour forth waste, uremic poisoning occurs and the person dies, and the cause is often given as heart disease, or disease of brain or lungs.

It is a good insurance against such a risk to send 10 cents for a large trial package of "Anuric"—the latest discovery of Dr. Pierce. Also send a sample of your water. This will be examined without charge by expert chemists at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y. When you suffer from backache, frequent or scanty urine, rheumatic pains here or there, or that constant tired, worn-out feeling, it's time to write Dr. Pierce, describe your symptoms and get his medical opinion without charge—absolutely free. This "Anuric" of Doctor Pierce's is found to be 37 times more active than lithia, for it dissolves uric acid in the system as hot water does sugar.

Simply ask for Dr. Pierce's Anuric Tablets. There can be no imitation. Every package of "Anuric" is sure to be Dr. Pierce's. You will find the signature on the package just as you do on Dr. Pierce's Golden Medical Discovery for blood and stomach.

WORRY, DESPONDENCY.

Kidney Disease is suspected by medical men when patients complain of backache or suffer with irregular urination, disturbed, too frequent, scanty or painful passage. The general symptoms are rheumatic pains or neuralgia, headaches, dizzy spells, irritability, despondency, weakness and general misery. Worry is a frequent cause and sometimes a symptom of kidney disease. Thousands have testified to immediate relief from these symptoms after using Dr. Pierce's Anuric Tablets.

GIRLS WANTED

For office work to fill the places of men who have gone or are going to the front. Young women can render the country real service by preparing to take positions in banks and business offices.

Special courses of training in Bookkeeping, Shorthand and all other commercial subjects now in progress. Students admitted any time. Illustrated catalogue free

JAIL-BIRDS IN OPEN ARE GOOD PATIENTS

Farm Life and Congenial Work as Factors in Reform—Experiment Based on Normal Life

Life on a farm with work in a factory is the cure for law-breakers which Ontario is testing at its provincial prison. Instead of the barrow park-like enclosures, towering walls and close confinement which herded all prisoners in the old Central Prison at Toronto there are the rail fences and rolling expanses of an eight hundred acre farm at the new Ontario Reformatory at Guelph. Instead of the few well-known and stigmatised "prison industries" there are all the occupations of a large farm and a variety of industrial occupations, designed to suit the present abilities and future needs of the seven hundred men who are thrown from all walks of life into the temporary custody and guardianship of the state. In such an experiment, the outcome of public dissatisfaction with old methods, there is great public interest and the officials of the Provincial Secretary's department in initiating the new reformatory method are closely and sympathetically watched by the province and by reformers elsewhere.

Tasks to Suit All

An enumeration of a few of the many industries carried on at the Guelph farm will indicate the variety and usefulness of the trades in which the prisoners may elect to engage. There is much limestone in the land purchased designedly by the province and the production of various kinds of prepared lime is under way on a large scale in a modern plant. This furnishes work for many of the uneducated foreigners who get into trouble with the authorities. Others of these find work at brickmaking and tilemaking and most of the public buildings erected in Ontario in recent years include a large share of material from the Guelph institution. The public institutions of the province, the jails, asylums and homes for the deaf and dumb get their meat supply from the abattoir installed at Guelph and operated economically by the prisoners or "inmates" as the officials prefer to call them. Then there is every sort of wood and iron working in large stone factories. Here highly-skilled workers find their chance and young fellows who have previously loafed and learned no trade but the nefarious trades they learned in cells have a chance to become skilled men beside their fellow inmates. There are the usual prison trades carried on under far more healthful surroundings than in the older city prisons and in addition a woollen mill which has a finished product as attractive in its way as the products of the abattoir. Above all there is the work on the farm which gives all in their turn a chance to get acquainted with the out-of-doors, animals, growing things and the wonders of nature.

Free as Possible

The officials claim that the influence of this open-air work is one of the biggest factors in reform. Farmers and factory workers alike have hard work, but the hours are regular, the food clean and abundant and the sleeping and recreation quarters attractive. There is the utmost of freedom within the eight hundred acres and only the guard towers at commanding points to prevent "departure before cure." The work of reformation of character at Guelph is thus designed to have a strong foundation of physical comfort and satisfaction in full and mental repose and interest. To make the man good they first try to make him healthy and contented and interested in his work and surroundings.

WATER

Water is very slightly compressible.

H2O is the chemical formula of water.

The water wheel was used by the ancients.

Water covers 73 per cent. of the surface of our earth.

Absolutely pure water is not to be found in nature.

Strictly speaking, there is no such thing as water power.

Hard water is brisker and more agreeable to the taste than soft.

There could be no form of animal or vegetable life without water.

For general manufacturing purposes, soft water is preferable to hard.

Americans drink much more water than do the people of Great Britain.

London's water supply was for half a century in the hands of some eight companies.

Sea water may be rendered drinkable by being filtered through a bed of fresh, dry sand fifteen feet deep.

Well water and spring water, if hard, generally contain in solution magnesia or carbonate of lime, or both.

If a house has no proper water supply the authorities have power to declare it as unfit for habitation.

A molecule (the smallest possible portion) of water is made up of two kinds of gas—two parts hydrogen and one of oxygen.

The hardness of water is determined by making a solution of soap of such a strength that a standard volume of it will take a given quantity of barium chloride, and then be just able to froth on shaking.

Life of a Bank Note

Whenever a Bank of England note reaches the bank again after it has been issued it is at once destroyed by having the cashier's name cut from it. The remainder is then kept for five years, at the end of which time it is burned.

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF $500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,

BLOOD-STAINED MONEY

There came the other day to a London mother a letter from her son "Somewhere in France." In it was a clipping from a Frenchwoman to a brother in Canada. It should be read by every woman in Canada, because of the lofty spirit of complete self-sacrifice it breathes forth.

"Dress and pleasure are forwaste long ago," she writes. "If you hear of French styles, you may take it for granted they are not for us—we could not afford the price. It would be a heartless decision, whilst our men are in rags fighting and in the trenches. The finger of scorn would follow the woman who would so demean herself while thousands are in want." And then she adds a searching question: "Are there any Canadian women spending blood stained money on baubles, pursuing pleasure, whose eyes have not yet wept bitter tears?"

"Blood stained money!" How the words bring one up with a shock. And yet is the expression too strong? For every dollar we spend upon ourselves which might have been given to help those who are breasting this fearful world storm is surely costing the life of someone we might have saved. How we should hoard and save and scrape to keep our money clean. We dare not allow it to become stained with the blood of those whom we have sent over seas to fight for us.

There is that money we spend on just one day's pleasure which should have gone to feed a starving Canadian boy in a German prison. Is it free from stain? There is the next bank account to which we are adding regularly the amount that should go to the Red Cross dues. Is it clean shining money when we remember that our hospitals are calling for donations? And that ornament for the house and the hundred and one little expenses we might have curtailed. Ah, perhaps if we examined carefully our expenditures we would surely find some of our dollars have indeed been blood stained.

We in Canada have not begun to even dream of such sacrifice as the women of France make—and they make them bravely and willingly. "To eat less," goes on the writer of the letter, "to wear old skirts, to work hard and for little or nothing, what is that to complain about when the world tells us, 'Go to it.' Therein women felt to work on the farms; the very young and the very old, with the help of women must save the harvest. And they will do it."

It is a gallant letter—the true expression of a woman of a great and gallant country. Men with mothers like that are unconquerable. And we Canadians must not be behind, just because we have not felt the full brunt of the tyrant's blow. We must prove a gallant ally of these gallant women. We too, must be self-forgetful, uncomplaining and ready for work.

And the work? There is so much to be done one does not know what to mention first. There is a labor of love waiting for every woman of Canada. There are thousands and thousands of socks to be knit for this winter campaign we are facing. There are hospital supplies to be sewn—miles of seams waiting for busy hands. There are boys from our own country whom the Germans will starve in their prisons if we do not feed them.

There must be no stain on either our time or our money. We must keep them bright and clean—a fit offering upon the altar of our country and our empire.

RUBBERS!

Now is the season to buy Rubbers. Our line for this season is better than ever. New lines and new lasts have been added so that we can fit any shoe made.

Waterproof Boots and Shoes

of staple lines for Men, Women, Boys, Misses, Youths, made of the best of leather that can be bought. We can sell these at reasonable prices, as they were bought before leather advanced.

The Housewife's Corner

Selected Recipes.

Nutmeg Sauce.—Mix together a tablespoon of cornstarch, half teaspoon of salt and half cup of sugar. Add slowly, stirring constantly, one cup of boiling water. Boil rapidly for five minutes, then add half tablespoon of butter and half teaspoonful of grated nutmeg. Serve at once.

Gingerbread.—Half cupful white or brown sugar, one tablespoonful butter or lard, 1 cupful molasses, one cupful sour milk, one level teaspoonful soda in milk, two level teaspoonfuls cinnamon, one tablespoonful ginger, one-half teaspoonful of cloves, one and one-half to two cupfuls of flour. By adding one cupful raisins it will make a good fruit cake.

Apples and Sausages.—Fry the sausages lightly in butter for a few minutes, then remove and keep hot while cooking the apples, which should have been pared, cored and cut into neat rounds about a quarter of an inch thick. Put them to fry in the liquor of the sausages and a little additional butter and keep simmering gently until quite tender. Pile them piled up in the center of a very hot dish and arrange the sausages neatly round. Serve immediately.

Making Fruit Butter.—When making fruit butter, both time and fuel can be saved if this method is followed: First stew the fruit, then take from the fire, strain through a colander and put the juice into the kettle in which the butter is to be made. Let it boil until it is thick and beginning to jelly, then add the fruit which has been rubbed through the colander and, in a very short time it will be made into the smoothest butter imaginable. In this way you will have avoided the long, tiresome stirring and the danger of burning.

Apple Pudding.—Put two layers of quartered apples in a pudding dish, sprinkle thickly with granulated sugar, add a few raisins and a teaspoon of butter; pour over this a batter made of a small teacup of sugar, three-fourths of a cup of milk, one-fourth of a cup of butter, two teaspoons baking powder, flour enough to form a batter as thick as for layer cake, and a little salt. Steam or bake until the apples are cooked. Serve hot, with cream and sugar.

Small Cakes.—½ cupful of butter or three-quarters of a cupful of shortening, two cupfuls of powdered sugar, a cupful of milk, whites of six eggs, a tablespoonful of lemon juice, two teaspoonfuls of baking powder, and four cupfuls of flour. Cream the butter and the sugar together, add milk, mix well, add lemon juice and mix thoroughly. Beat well. Add alternately the whites of the eggs, beaten stiff, and the flour sifted with the baking powder. Bake in jelly cake tins. When cold, cut in tiny squares or rounds, and ice all over with pink icing, and top off with half a blanched almond.

Chicken Left-Overs.—An interesting way to utilize left-over chicken is as follows: One cup cold cooked chicken cut in strips, three cold boiled potatoes cut in one-third-inch slices, one truffle cut in strips, three tablespoons butter, three tablespoons flour, one and one-half cup scalded milk, salt and pepper. Make a sauce of butter, flour and milk; add chicken, potatoes and truffle, and as soon as heated add seasoning. Another delicious dish can be made by taking equal parts of cold chicken, boiled rice or macaroni and tomato sauce; put in layers in shallow baking dish and sprinkle liberally with buttered breadcrumbs, brown in oven.

Stuffing for Baked Fish.—A fish weighing from three to six pounds is the best to stuff. Wash the fish, cutting off the head and side fins. Fill with a stuffing made of one cup of fine breadcrumbs, one teaspoon chopped onion, scalded, one-quarter teaspoon salt, one-quarter teaspoon pepper, one teaspoon lemon juice, one-quarter cup melted butter, milk or water to moisten. Fill the fish with the stuffing, sew together and cut gashes two inches apart in the sides. Put bits of butter or dripping or thin slices of fat salt pork or bacon under the fish and in the pan. Dredge with flour, sprinkle with salt and pepper and bake in a hot oven. Baste every ten minutes. Cook until the flesh is firm and on being touched separates easily from the bone. Remove from the oven, take out skewers and strings and serve on a hot platter, with fish or tomato sauce.

Tasty Nut Recipes.

Nut Kisses.—White of one egg, one-half cup of chopped nuts, one cup of powdered sugar. Beat the white of egg until quite stiff and dry and then add the sugar; beat again and lastly mix in the nuts. Drop in spoonfuls on a well-buttered tin and bake in a moderate oven until brown. Lift on to a cake rack and leave to dry and get cold. Keep in an air-tight tin.

Nut Bread.—Four cups of flour, four teaspoonfuls of baking powder, one cup of sugar, one-quarter teaspoonful salt, two cups of milk, one cup of walnuts and one tablespoonful of lard. Mix and sift the dry ingredients, add the milk, melted lard and chopped nuts. Beat thoroughly and pour into well-greased tins. Leave in standing for about thirty minutes and then bake for one hour in a moderate oven.

Nut Roast.—Two cups bread crumbs, 1 cup pecans, 1 cup filberts, 1 teaspoonful chopped parsley, 1 tablespoonful chopped green peppers, 1 onion chopped, 1 onion chopped, 1 cup of milk, ½ cup chopped celery, 1 egg, salt and pepper, 2 tablespoonfuls butter. Put the bread, nuts, parsley and pepper through the mincer together; grind up the apple and stir it into the rest of the ingredients. Beat the egg, add the milk and seasoning and stir into the dry ingredients. Melt the butter in a frying pan and pour half into the mixture; fry the chopped onions in the remainder and pour on top of the loaf, which should be put into a well-greased tin and baked for forty-five minutes in a slow oven, basting occasionally with butter and boiling water.

Nut Wafers.—Six tablespoonfuls of flour, one cup of chopped nuts, one. Beat the eggs to a froth, then add the flour and sugar gradually, beating well between each admixture. Chop the nuts, which may be either mixed or of some one particular kind, and mix in. Lastly add the vanilla; about a teaspoonful is the usual amount, but it is better to use the very best make, in which case one-half spoonful is ample. Pour the mixture into a large pan, so that it is spread out very thinly, and bake for ten minutes in a hot oven. When it is cooked cut at once into rounds with a sharp cutter, for the cookies get hard and brittle very quickly and would snap if you tried to stamp them out.

Useful Hints.

Dates filled with cream cheese and chopped nuts are delicious.

When spoons are egg-stained they may be easily cleaned by rubbing with salt.

The most precious thing is time, and yet there is nothing we waste so freely.

When knitting, drop your ball into a cup or jar and it will not roll out of reach.

Cloves placed between blankets and clothing are said to be a good moth remedy.

Lace that is continually cleaned with gasoline or naphtha is bound to turn yellow.

When the stove becomes heavily coated with blacking, sandpaper it off before applying fresh polish.

Wash lamp-chimneys in warm suds, then polish them easily and quickly with soft, crumpled newspaper.

When straining hot fruit juice, pin the cloth to the sides of the dish with clothes-pins, and avoid burned hands.

If you wish to boil a cracked egg, add a teaspoonful of salt to the water and the white will not escape from the shell.

A delicious cake filling is made with sugar and cream boiled together and thickened with finely chopped nuts.

Dates may be added to puddings, cakes and graham bread, and they will give both flavor and nourishment.

Bread should never be kept wrapped in a cloth; the cloth will absorb moisture and impart an unpleasant taste to the bread.

A little olive oil poured into the bottle of home-made catsup, after the bottle has been opened, will prevent it from spoiling so quickly.

A dish of water placed in a hot oven where pies, cakes or puddings are being baked will prevent them from scorching.

By using soapy water when making starch the clothes will have a glossy appearance, and the irons will be less likely to stick.

A full-length mirror set where there's a good light would make many a dowdy woman straighten up and be more careful about her dress.

Did you ever try boiling potatoes with a chicken? The fowl loses none of its relish by the neighborly cooking, and the potatoes gain a great deal.

The best place to dry onions for future use is out of the sun. Sunshine toughens the outside, and a tough onion is not a very digestible thing to tackle.

Write each child's name with indelible ink on broad tape, and sew in umbrella, overshoes and leggings, thus avoiding confusion in the school dressing-room.

Put a large sponge in the bottom of the umbrella stand. It will absorb the moisture from a wet umbrella, and keep the stand from breaking if a heavy umbrella is dropped in.

When raisins are added to rice pudding, the milk and rice should cook for some time before putting the raisins in. This will prevent the milk from curdling.

After the cap of a fruit-jar has been screwed in place, invert the jar and dip the whole top in melted paraffine. Old caps and rubbers can by this means be used with safety.

Cider fresh from the press, boiled down to one-half its bulk, and then sealed like grape-juice, will keep the flavor of fresh cider and be good for drinking or for putting in mince pies.

Fasten small pieces of sandpaper where they will be handy for the scratching of matches. This is a precaution which will save paper and paint from being marred. Fasten the places with thumb-tacks. Better yet, use safety-matches.

Lady Haig Practises Red Cross Work.

Lady Haig, wife of Sir Douglas Haig, British Commander-in-Chief, recently attended a fishing competition arranged by the Deal and Walmer Angling Association for the benefit of 150 wounded soldiers. The photo shows Lady Haig bandaging Private Borthwick's finger. Borthwick was the winner of the tournament. His finger was caught in a hook, giving Lady Haig an opportunity to display her aptitude for Her Cross work.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON NOVEMBER 12.

Lesson VII.—World's Temperance Sunday. Rom. 14. 13 to 15. 3.

Golden Text.—Rom. 14: 21.

Verse 13. Judge is used in two senses, meaning "decide" the second time. Stumblingblock. This is an obstruction put in the way, over which a man may fall, especially in the dark. The occasion of falling is generally taken to be practically the same thing, and the Greek word (whence our scandal) is commonly rendered "stumblingblock." More probably it means a trap or snare. The word or here is enough to suggest that the figure is changed.

14. Nothing is unclean of itself may be one of the quotations from these headstrong people who boasted their freedom from "feeble prejudices." So "all things are pure" (verse 20). "We have faith" (verse 22), "we that are strong" (Rom. 15-1). Paul admits them all, but turns them against their users by the great principle, noblesse oblige. Am persuaded in the Lord—Paul's convictions, like all his words, thoughts, and deeds, were "in Christ." Unclean—Literally, common, as distinguished from "sacred." The inference was drawn from a saying of Jesus that made a peculiarly deep impression, when he swept away the distinction between clean and unclean meats: see Mark 7. 19, where the evangelist gives us a solitary comment on his story. We see that the distinction between sacred and profane lies entirely in the soul: an act that in one man would be impious may be piety in another, and vice versa.

15. Is grieved—Because you eat what he regards as sinful. the prim, any reference is to "meat offered to idols. Of course the principle vastly transcends this application. In these days it especially appeals to men of strong faith and strong minds who have no difficulty in combining modern views with evangelic faith. Let such be very tender of the prejudices of the "weak" who fear all novelties! For whom Christ died—For he died for us all when "weak" (Rom. 5. 6).

16. Evil spoken of—The word often rendered blaspheme. it is wider in Greek than in its English translitération. The good here is the Christian freedom which raised them above narrow prejudices. Paul tells them it will provoke grievous (and quite honest) misrepresentation. And as it is about an indifferent matter, not a great principle, the avoidance of such is wise.

17. One of Paul's rare references to the "kingdom." / It is specially helpful as being impossible to square with that overstrained view which makes "the kingdom of God" always future. Compare the great saying of Luke 17. 21. In the Holy Spirit—The definite article is absent in the Greek.

18. Herein. The word may be general ("in all this"), or may grammatically refer back to "your good"; instead of maintaining their rights in the "good thing," they should "serve Christ" by foregoing it in the interests of the weak brother whom He is not ashamed to call brother. By doing this we may win that hardest of all prizes, the pleasing of God and men at once.

19. Let us follow—Compare Heb. 12. 14. Pea. 34. 14 is the common origins' Edify—As in this Latin equivalent, the Greek word contains the metaphor of an "edifice." But it is wearing a little, and the idea of "help" and "advantage" is prominent. Our use of edify is much too narrow.

20. The work of God is the gradual preparation of a human soul for its glorious destiny. To risk the success of such a work because an emancipated but obstinate reformer will insist on eating something which the other thinks wrong—how demnable a wickedness! All things—See note on verse 14. With offence—The word rendered stumblingblock in verse 14. The man follows his "strong" brother's example, but his conscience is not convinced, and he believes he is committing sin. That belief is enough to constitute it sin!

21. Compare 1 Cor. 8. 13, the climax of a very similar argument, but concentrated on one particular application. It is good—The word used implies moral beauty; it is a grand thing to go to such lengths, though the ideal is beyond most of us. The flesh and wine here are alike connected with idolatry, the "weak" brother thinking them defiled by the possibility that they might have been offered to idols. While therefore this passage has no direct reference to the motive is really identical, being still consideration for the weak "for whom Christ died." It is an outstanding example of the way in which the New Testament is so amazingly up to date; the circumstances for which its precepts are designed become obsolete, but the principles laid down adapt themselves perfectly to conditions undreamed of when the Book was written.

22. The self-opinionated "strong" man boasts that he "has faith for all things," as against the "weak [who] eateth herbs" (verse 2). Then let that faith work in his own heart: God will be able to see it, and that is the one object of faith' Judgeth not—The decision ought not even to come up for trial before the bar of conscience. Such glad confidence is the privilege of the "strong." The "weak," then like Bunyan's Mr Fearing, have to avoid a multitude of harmless things because they have not faith enough for them. The strong and loving man must try to educate and emancipate a conscience of the morbid kind, but never must he trample on it.

23. This verse has been appallingly misused; it must be kept strictly to its context. Paul's real purpose is to warn men that to act in defiance of conscience is sin, even if a thing is no sin in itself.

15. 1. We that are strong, although a quotation, does imply that Paul himself has no weak scruples, if he can be sure he is not risking others' peace of mind. Bear—These irritating morbidities and foolish scruples are the burden strong men have to carry, because strength must always imply chivalry.

2. The reservation for that which is good is, of course, added to guard against cases where principle comes in.

3. Christ, or the Christ. He is mentioned here by his office, as is shown by the quotation attached from Psa. 69. 9—a verse the former half of which was also linked with the life of Jesus (John 2. 17). The speaker in that psalm is the oppressed people of the Jews during some time when pious men felt peculiarly that their trials were on account of their religion: the dark days before the Maccabees came would suit very well. New Testament writers were constantly appropriating to the Messiah words originally belonging to Israel in its ideal aspect. They would know where to stop in that psalm, which plunges suddenly into terrible imprecations, natural enough, but utterly vetoed by the Spirit of Christ.

The Insect World.

The insect world represents an unlimited field of life and activity. The number of insect species is greater by far than of the species of all other living creatures combined. Although more than 300,000 have been described, probably twice that number remain to be examined. Virtually all living animals, as well as most plants, supply food for these incomputable hordes.

The AUTOMOBILE

Preparing for Winter.

In another month or two a large percentage of cars that have been used exclusively for pleasure, will be stored away in buildings of some kind, sort or description. A small percentage find lodgement in city garages where they are always kept well heated and in excellent condition. A larger proportion, however, are put away in barns or other buildings on the property of the owners. If you intend to do any work upon your motor during the winter months, do not forget that there is a new disease called petromortis. This is caused by the injurious gases filling the air in any garage not properly ventilated. See to it that your storage facilities include windows or pipes that will provide definite quantities of fresh air as well.

Here is another cool weather suggestion. Of course you realize that freezing troubles must be forestalled. If you are going to use your car on the warmer days of winter and do not wish to be constantly draining the radiator you should remember that a small radiator requires two quarts of wood alcohol, or two and one-half quarts denatured alcohol, the medium-size radiator demands one gallon wood alcohol or five quarts denatured, and the large size five and a half quarts wood alcohol or seven quarts denatured. This mixture will keep radiators from freezing at zero. If a cold snap comes and there is danger of the mercury dropping to twenty degrees below, your radiator should have 3, 6, 9, quarts of wood alcohol or denatured alcohol for the small, medium and large sizes respectively. To prevent freezing at thirty-five and forty degrees below zero the quantities must be increased to one gallon, two gallons, and eleven quarts. It would also be well to remember that wood alcohol is more effective than the denatured product under ordinary circumstances, but that at lower temperatures there is very little difference. In using an anti-freeze, first drain the entire cooling system and wash it out thoroughly with clean water. When you have added the proper amount of alcohol, fill the radiator to the usual level with clean water, then be sure to run the motor a few minutes in order that the solution may be properly mixed. The alcohol has a tendency to evaporate more or less rapidly, even in the coldest weather, and more must be added from time to time to keep the solution up to the strength desired. Perhaps a pint every fortnight will be sufficient, especially if when running the motor you do not allow the mixture to steam. Some people have secured very good results from adding three or four ounces of glycerine to the solution, and there can certainly be no harm in following such a course.

Most of the good motors are equipped with vacuum tank systems for drawing fuel to the carburetor, and after a season's running this very excellent device may require a certain amount of attention. There are dangers to be avoided.—the collection of sediment in the strainer at the top of the tank,—perhaps too, the cover has become slightly loose, admitting air, and the third cause for minor trouble may be the looseness of the connections on the suction pipe in the manifold end or where it joins the vacuum tank itself. Just to satisfy yourself that the vacuum system is in good running order, it might be well to give it an overhauling at your earliest convenience. If everything is found in satisfactory condition, you have the joy of knowing that the season's work has been satisfactory and that your car, so far as its fuel transmission is concerned, is ready for another season's work.—"Auto" in Farmer's Advocate.

PROBLEM OF THE DISABLED SOLDIERS.

The Mother Country Advised to Follow Canada's Example.

The London Daily Chronicle, the leading Liberal journal of the Imperial Capital, gives the most prominent place in its issue of Oct. 4 to the following spontaneous and remarkable appreciation of Canada's method of restoring disabled soldiers to active and self-supporting citizenship. In this article the well-known writer, Mr. J. Saxon Mills, goes so far as to suggest that the Mother Country in dealing with this problem might follow the example of the Dominion. "We are in danger of thinking that our responsibility for the wounded soldier is fulfilled when he is no longer fit for military service, and when he is pensioned and discharged from the Army. We may learn much from the admirable system which has been established by the Dominion Government."

By an order in Council, dated June 30, 1915, the Canadian Government formed, at the instance of Sir Robert Borden, a Military Hospitals and Convalescent Homes Commission, "to deal with the provision of hospital accommodation and military convalescent homes in Canada for officers, non-commissioned officers and men of the Canadian Expeditionary Force who return invalided from the front." The Commission has learnt much by experience, and is to-day undoubtedly working on right lines. At first, the general idea was that convalescent homes, where discharged soldiers would spend a short time for rest and refreshment, would be the chief requirement, and scores of houses and hundreds of workers were placed at the disposal of the Commission. But this idea was soon dispelled when it was found that the treatment of the disabled soldiers was a more serious and lengthy business. Months or even weeks spent in the atmosphere of such a home would tend to injure rather than strengthen the physical and moral fibre.

On this subject Mr. J. S. McLennan, a member of the commission, said: "We are changing as rapidly as may be our convalescent homes into hospitals where, in the interests of the men, their time will be fully occupied, their physical restoration made as perfect as possible, and, from the beginning, the bad effects of idleness obviated by employment."

At all these hospitals, schools are held where training of an elementary and non-vocational character is given in English, French, mechanical drawing, arithmetic, wood-carving, &c. These classes are open to all inmates, whether they are able to return to their former occupations or not. But, from these homes and hospitals, the men who are not so able can be sent on, after they have been pensioned and discharged, to technical institutions, agricultural colleges, schools of telegraphy, &c., where they can be taught new occupations which their disablement does not prevent them from following. And that is not all, for employment is practically assured to them by the Provincial Commissions (under the Federal Military Hospitals Commission) which have charged themselves with the duty of finding work and wages for the returning veterans.

The aim of the Commission is to do its best for the physical and economic well-being of the men, and to bring to bear on him such influences that he may perform for his country a service not less important than those of the firing line, namely, that, instead of being an idle ward of the State, he becomes a shining example to the young, of self-dependence, of courage, and perseverance in overcoming disabilities.

It would be an excellent thing if we had a system similar to this, and based upon the same sound principles, established in these islands.

CELLULOID FOR WOUNDS.

Perforated Sheet to Replace Lint Next to Large Cuts.

Opinion among surgeons and nurses is practically unanimous in favor of the advantages of a new method of dressing large and painful wounds, whereby a thin layer of perforated celluloid is substituted for lint as the first covering for the raw wound. The plan was tried successfully first by Sir Allmoth Wright at St. Mary's Hospital, Paddington, London, and now promises to become generally adopted.

The celluloid, first rendered soft and pliable by being soaked in a twenty per cent. solution of carbolic acid and then washed in a weak salt solution, is laid on the raw wound, the perforations being so numerous that it seems mostly holes. Fine lint soaked in a five per cent. solution of common salt in water is then placed over the celluloid, after which firm bandages are applied. Owing to the celluloid much firmer pressure can be used than with ordinary dressings. One surgeon, explaining the advantages of the celluloid dressing, further said:

"In many cases the healing of a large wound is actually retarded by the general bodily depression resulting from the pain caused in the dressing of it. Again, gauze bandages, when laid directly on the raw wound, must inevitably in the process of removal, tear away from their site certain of the tiny new cells which are formed by nature in affecting the cure. Every cell thus destroyed has to be remade, and so healing is delayed."

Japan's Wayside Inns.

The wayside inn of Japan, unlike the serai of Western or Central Asia, is superficially clean, and supplies all the necessaries and, in a modified form, some of the luxuries of life. Quilts, which the lodger spreads on the straw-matted floor, are provided for him to sleep on; food—edible, if unsatisfying—is served him in tiny bowls, with chopsticks supplied; and a boiling hot bath, common to all and sundry, welcomes him at the end of his day's march.

A New Economy.

"He was always trying to save himself trouble."

"And did he succeed?"

"Yes. He has saved up a whole lot more than he can take care of."

Men Wanted for the Navy

The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy

Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.

PAY $1.10 per day and upwards. Free Kit. Separation allowance, $20.00 monthly.

Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XIV.—(Cont'd).

When he was free he turned to where Fitz and Bertie were assisting the ladies to alight and eyed the captain with a calm, keen scrutiny.

"Alarmed, were you, Captain Murpoint?" he said, in his grand, clear voice. "What would you have been if you had been fated to be with us?" and a slight sneer curled his lip.

"Not so much alarmed or so anxious," said the captain, with a smile that was a finished piece of calm reproach. "For I should at least have had the satisfaction of sharing in the danger of my friends."

Leicester smiled grimly and stooped to lend Violet his hand over the gangway.

"A poor satisfaction, captain. There was not much danger, or if there was it did not last long. The Petrel will see out many a worse summer gale than this. But I am sorry," he added, addressing Mrs. Mildmay with a much more eager tone in his voice, "I am so sorry you should have been so alarmed and made so uncomfortable! And—ah, here is the carriage," he said. And he ran up the beach as the carriage Jem had ordered drove up to the parade.

He held the door as Mrs. Mildmay and Violet entered, but though his dark eyes sought hers Violet's made him no return, and her "good-by" was as dreamy and indistinct as her gaze.

Leicester returned to the Petrel to assist Lady Ethel, in a state of mind not enviable.

"I'll drive you home, Lady Ethel, if you are too tired," he said, "but if you are not, my mother will be delighted beyond measure to make you comfortable. What do you say, Fitz? Will you take refuge with us to-night? I'll ride over to Coombe Lodge and set Lady Lockland's fears at rest."

Now Fitz was very willing to stay so near Violet Mildmay, and Ethel was not unwilling, though she demurred.

But Leicester's strong will decided for them, and it followed that they were on their way to the Cedars while he was galloping toward Coombe Lodge to apprise Lady Lackland of her children's safety and their whereabouts, also to order a box of clothes, which Ethel declared was positively necessary.

The Captains attention continued

during the journey home and even to the door of the ladies' rooms, for he insisted that they should take precautions against colds, and in his quiet, unassuming way saw that their comforts were attended to.

That evening as the captain sat on the veranda smoking his cigar, he turned unconsciously, and said:

"I called at Coombe Lodge this morning."

Violet, who lay on a couch, had closed her eyes, but the captain saw that she was not asleep.

"And how is Lady Lackland?" asked Mrs. Mildmay.

"Better I found her, I am glad to say, much better. The earl had not come down yet; parliamentary duties kept him in town I suppose. Pity, a great pity. The peasant in his cot, beneath the blue sky and on the heather-covered hill, is to be envied by an earl in London this weather. By the way," he continued, glancing at Violet and speaking in a low tone as if he were anxious not to awake her, "I heard of rather a damaging trait in Leicester's character."

"Indeed!" said Mrs. Mildmay, very much interested, and looking up from her knitting.

"Yes; Lady Lackland knows more of him than we do, of course; she sees him at balls and concerts, at friends' houses and parties. Mr. Leicester Dodson, as I hear, is a terrible flirt."

"Oh, dear me, I am so sorry to hear that," said Mrs. Mildmay, shaking her head over her knitting and entirely unconscious of the sudden pallor which had fallen upon the motionless face opposite her and which the captain had quickly noted.

"Yes, not very dreadful, is it? It is not fair to accuse the young fellow—as nice a young fellow as ever lived!—behind his back, but I do hear two or three stories of broken hearts and scattered vows—but nothing very tangible. But be sure Lady Lackland would not have mentioned it if she had not some grounds for regretting it."

"Regretting it?" said Mrs. Mildmay, who could never see through hints and innuendoes and always required things to be as plain as plate-glass.

"Don't you see, my dear madam," said the captain, lowering his voice to a musical pitch, which was as distinct as a trumpet call to the ears of the motionless girl, "don't you see that the young fellow is really in love with Lady Ethel and that he would win her but for Lady Lackland's doubt of his steadiness. A flirt, my dear madam, is to be evaded by every prudent mother and every sensible girl——"

Violet rose, white and statuesque.

"I was nearly asleep," she said, looking round the room with a sad, stupefied look in her eyes of dumb pain, like some one roused to a sense of a lifelong misery. "I—I am very tired, aunt, and I think I shall go to bed."

The captain was by her side, ringing for her candle, in a moment, and she smiled—yes, smiled at him as he pressed her hand and murmured a good-night.

Brave Violet! what did that smile cost her?

CHAPTER XV.

Quite unconscious of the stab in the back, so to speak, which the cunning Captain Murpoint had delivered him, Leicester spent the evening in entertaining his guests, Lord Fitz and Lady Ethel.

In the morning Leicester and his guests walked over to the Park.

He would have liked to have been alone, but that was impossible under the circumstances, so he contented himself with hoping that he might get an opportunity of speaking to Violet alone.

But Violet had spent the wakeful night in planning for herself a desperate course of action.

She was, as she told herself at breakfast time, prepared to meet "the first" on his own ground.

Nothing would do for Mrs. Mildmay but that she insisted that the Cedars' party should remain all day to dinner, and see the evening out, and a footman was dispatched with the invitation for Mr. and Mrs. Dodson.

"I am so delighted you have come," said the good-natured lady; "for I do think Violet is quite triste and needs a little excitement."

They were standing on the lawn chatting, and Leicester glanced up at the upper windows expecting to see a blind down.

"Miss Mildmay not well?" he asked.

"Yes," said Mrs. Mildmay. "But a little low spirited, I think. She will brighten up when she hears that you are here. James," and she called to a footman who was passing, "please ask Miss Violet to come down."

But Violet did not need any information.

She saw the group approach from her window, and as Leicester's long limbs strode across the lawn her heart beat violently.

"He has come for another flirtation, has he?" said the mortified, suffering girl. "Well, he shall not be disappointed. He shall see that two can play at his contemptible game."

So saying she thrust a camellia in her glossy hair, called a smile, perhaps the first artificial one she had ever forced, to her beautiful face, and stole down the stairs, bursting upon the group like a vision of Oriental beauty.

Leicester advanced, but Violet passed him and went to kiss Ethel. Then she shook hands cordially with Bertie, added a blush when repeating the salutation for Lord Fitz, and pretended to have forgotten that Leicester har not received a word.

"I'm so small," he said, with a smile, "that no wonder Miss Mildmay overlooks me."

"Did I not shake hands?" said Violet, looking him full in the face, but with coldness, but with a pleasant, indifferent, painfully frank friendship. "Did I not? How stupid of me! But I was overwhelmed with surprise," and she gave him her hand with a cool, self-composed smile which staggered him.

Before three minutes had passed Lord Fitz plucked up courage to say:

"Miss Mildmay, you said you would show me your flowers."

"Did I?" said Violet. "Then I will redeem my promise," and, with a smile, she led him to the conservatory —that very conservatory in which Leicester had lounged but a few days ago, listening to her frank laughter and drinking in the charm of her youth and beauty.

With a blush of pleasure, Fitz walked off with her, and soon his boyish laugh could be heard from the greenhouses, joined with Violet's musical peal.

What had happened to cause her to treat him so?

Yesterday she was all frank delight in his presence.

To-day she treated him with the haughty insolence and indifference of a sultana.

"Ah!" said Leicester, with a growl. "They are all alike. The best of them cannot resist a lord."

He was not in the best of humors for a collision with the captain, but Captain Murpoint greeted him ardently.

"None the worse for your weather yesterday, I see," he said, in his soft, silky voice. "I was just coming after you. Mr. Fairfax, who is the most inventive genius in the way of pleasure I have ever had the happiness of meeting, has set up a target and we are all shooting at it with arrows which remind me of nothing so much as the arrows which the Brahmins give their children to play with."

"Confound the Brahmins!" thought Leicester, but he walked by the side of the captain to where the clever Bertie had set the archery pastime going, and then the captain left him to order some sherry and soda water.

Mrs. Mildmay begged him to light a cigar, and Leicester, who really wanted one, gave way.

He seated himself on a bench and watched the party, wondering whether Lord Fitz had finished his second wreath, and what the pair in the conservatory were doing now.

Presently he heard their laughing from the back of him, and it stung him to the quick.

"Confound her!" he muttered. "Why should I let her see her wickedness at flirting is cutting me up so? By Jove, I'll show her two can play at that game. I'll make up to Ethel Boisdale." So saying he drew his legs to the ground, pitched his cigar into the shrubbery and went up to Ethel.

"Now, Lady Boisdale," he said, "I am going to enter the lists, and I bet you a box of Jouvin's best—I have your size—that I hit the bull's-eye three times out of six."

"Oh, I shall bet," said Ethel, "because I am sure I shall win. Why, we have been trying ever so long, and have not hit it once."

"There goes then," said Leicester. "Hit or miss. Hit it is. That's once. Twice, I have missed it. Three times, that's a bit. Four times, missed it. Missed it again, missed it again. That's the sixth time, and I've lost."

Then he rattled on as lively and entertaining as Bertie himself, so startling that honest friend that he did not know what to make of it.

All through the glorious afternoon the plot and counterplot were carried on.

At dinner Leicester devoted himself to Lady Ethel, talked to her with an amount of badinage and excitement that was most unusual.

After dinner Fitz went straight up to Violet, who was sitting talking to Ethel, and seated himself in a chair beside them.

Leicester dropped down beside Mrs. Mildmay and Mrs. Dodson and joined in a discussion upon croquet.

But the captain did not let him rest.

"I think there's a frigate coming across," he said. "It's rather misty, but I fancy I can distinguish the masts."

(To be continued).

ON THE FARM

Buckwheat for Live Stock.

Many farmers in Ontario sowed more than their average of buckwheat this year on account of the impossibility of getting on the land in time to put in their usual grain crops, and from reports received to date it appears that there will be a good supply of this grain throughout the province.

Buckwheat is, as a rule, considered chiefly as a poultry feed by most farmers nowadays, but with coarse grains lacking in supply it will be necessary to consider the possible value of all farm crops as feed for stock. Buckwheat compared with wheat as regards its composition stands as follows: Buckwheat, water 12.6; ash 2.0; protein, 10.0; crude fibre, 8.7; nitrogen-free extract, 64.5; ether extract, 2.2.—wheat; water, 10.5; ash, 1.8; protein, 11.9; crude fibre, 1.8; nitrogen-free extract, 71.9; ether extract, 2.1. The black woody hulls of buckwheat have little feeding value and are the chief objection to the grain as chop, but the portion of the grain that forms the middlings is rich in protein and ether extract, and has a high feeding value. "The feeder may make liberal use of the floury portions of the buckwheat grain, well assured that they are valuable and that, usually, they are an economical feed," says W. A. Henry in Feeds and Feeding.

Buckwheat is rarely used in Ontario as feed for dairy cows, but is something of a favorite in the Maritime Provinces. If ground and mixed with other concentrates it usually cheapens the ration and adds bluk. It frequently seems to increase the flow of milk. The Central Experimental Farm has reported two feeding trials in which buckwheat was fed against wheat, to pigs. In the first trial, ground buckwheat was fed against ground wheat, and in this trial 445 pounds of ground buckwheat were required for 100 pounds gain, and 410 pounds ground wheat for 100 pounds gain.

In the second trial, one lot of pigs was fed a mixture of one-half ground buckwheat and one-half mixed meal, and the other lot a mixture of one-half ground wheat and one-half mixed meal. In this trial it required 405 pounds of the buckwheat mixture for 100 pounds of gain, and 380 pounds of the wheat mixture for 100 pounds gain. This is a much better showing for buckwheat than might be expected, since buckwheat has a thick, fibrous hull which the hog cannot digest. Ground wheat showed an advantage of only about 8½ per cent. over ground buckwheat, and the wheat mixture an advantage of 6½ per cent. over the buckwheat.

Feeding of buckwheat to sheep and horses does not seem to have been tried to any great extent but there would no doubt be safety in its use in small quantities if mixed with other grains. An account of the experience of feeders who have used buckwheat as a feed for all classes of live stock would be greatly appreciated by many who have a stock of this grain on hand.

Lengthen the Life of Machinery.

Fall is here again and it will not be many weeks until the cold winds from the north will be carrying snow-flurries across the fields. The leaves will soon drop from the trees and make them, like the fence corners, a very bare shelter for the farm implements and machinery. The life of usefulness of any machine depends more on the care taken of it than upon the work done. Farm binders and mowers are too short-lived and it is not always the fault of the manufacturer. Too often the machine stands in the field from the time it is last used in haying or harvest until after it freezes up and in some cases even on through the winter. Snow makes a good covering but a poor preservative for such machinery. The careless plowman leaves his plow in the ground at the end of the field when he unhitches at night, and one night the frost comes hard and the plow is there till spring. The cultivator, the harrows and the disk are often found in the corner of the field where the fall wheat was put in and are left there till the snow flies and sometimes until spring, and the owner, when he wants to use them next spring, finds them so rusty that they do not clean, and decay sometimes has set in in the wooden parts. Rust rots the metal just as quickly as decay consumes the wood. We venture to say that the lifetime of farm implements and machinery could be doubled were they always driven to the implement shed and put under cover when the day's work is done or when the particular job at which they are used is completed, and when put away were looked over to see that all nuts were tight and parts in place, and all those parts which are liable to rust covered with oil and the wooden parts kept freshly painted. We saw a wagon a few months ago which was so old that the owner, a man well past middle age, could not remember exactly how old it was and yet largely by good care in being kept under cover and washed frequently and also treated to a coat of paint annually, it was just as serviceable and looked as well as it did when it left the shop. Put away the implements and machinery as soon as through with them this fall. It is a good way to save.—Farmer's Advocate.

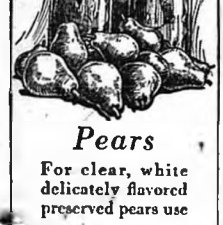
Selection of Seed Potatoes.

Thousands of farmers have suffered heavy losses at various times from fungus diseases attacking potato crops. Weak, spindly hills make breeding places for the disease which would never get started otherwise. These spindly hills are often caused by planting weak seed, the result of carelessness in selecting the tubers for seed. Like begets like, and the sooner persons planting small or diseased potatoes realize this the better it will be for their crop yields.

Remarkable results have been obtained by investigators in seed selection work with potatoes. Intricate methods are not necessary to obtain marked improvement in the ordinary field crops. It is a good plan to go over the field when the tops are about half ripened off and mark with a stake or twig the hills which show exceptional vigor and resistance to disease, to drought or to heat. At digging time these hills can be kept apart for seed. Any of the marked hills not yielding smooth or superior potatoes should be discarded. Farmers may think it too much trouble to save all their seed in this way, but enough can easily be selected to plant a special seed plot each year from which seed for the main crop the following year may be obtained. If the farmer neglects to mark the vigorous hills he should, at least, note and keep apart the high yielding hills of smooth, uniform tubers for a seed plot next year.

Potato growers will find that it is highly profitable to select their potatoes for seed carefully and intelligently, as it will mean greater productiveness, vigor and uniformity in shape and size.—F.C.N. in Canadian Farm.

The Effect of Sod on Yields.



Practically all of North Dakota was prairie or sod land for countless centuries before the while man came and overturned it with his steel plow drawn by oxen, horses or a tractor, according to the time and place. This state with a population of 630,000 people produced 162,000,000 bushels of wheat in 1915, or exactly as much wheat as was produced in the entire United States in 1866, the year following the close of the civil war, when the population of the country was 35,000,000. The sod land had within it the elements of fertility to produce this big yield, years after it was first broken up, and the fine grass roots bound the soil particles together and prevented drifting or blowing. The native clovers or legumes had the soil thoroughly enriched with nitrogen, a very essential element in hard wheat, and the decaying roots filled the soil with humus or vegetable material which makes it open and mellow. If land is cultivated too long it loses these essentials of fertility. Every one who wants to keep up yields should plan to seed down the fields to grass and legume crops every few years, for these crops renew the strength and fertility of the soil. Such fields are also profitable when in pasture or hay and if the products are fed on the farm and the manure resulting is used to further enrich the land.—By W. P. Porter, North Dakota Experiment Station.

Colt Sense.

Make friends with the colts. Pet and handle them while they are young. Take time to slip the halter on them occasionally. But don't expect them to lead right off. They don't know what you require of them. Deal gently with them on the start, and the first thing you know, they'll be leading up like an older horse. What's the use of waiting to be yanked around in breaking a big, strong two-year-old colt?

Curry and brush them, too, up one side and down the other, clear to the hoofs. It takes lots of time to teach them to be curried if you wait till they are two or three years old. And then, when you do try to break them in, you are liable to get kicked.

Get the young horses accustomed to buckles and straps. It's a good plan to lay a light set of harness on them occasionally. But be very careful not to put a flimsy halter on them that they can break; and see that they never get loose with any straps or ropes dangling about. You don't want to train the colts to pull back kick, or be runaways.

EDEN GROVE

Hallowe'en passed off quietly in the burg, as some of the enterprising business men bought the boys off by treating them to candy, oranges, etc. The fellow who thought this out must have had a long head, like a goose.

We notice the railroads have advanced the freight rates on live stock to Toronto. No wonder the hog was the first to squeal. He will be sliced up thinner than ever now.

Mr and Mrs McKeeman and family motored to Paisley Wednesday evening.

Rev Almack, pastor of the Methodist church, delivered a very interesting address along educational lines on Sunday morning, which was greatly appreciated by the large audience present.

Mrs Weichman, of Chesley, called on friends here last week.

Sunday being Guy Fawkes' day, our local Orangemen celebrated the day quietly, sitting around smoking ten centers, chewing apples and chatting about the great revolution in 1688, when they were kids.

Miss Viola Kerry, of Walkerton, visited at our home here Sunday.

The fowl suppers put up by the members of the Red Cross Thursday and Friday evenings, were a decided success, and quite a nice sum was added to the treasury of the society. Owing to the storm passing over this section Thursday evening quite a number from a distance were not able to enjoy the treat.

Mr W J McKeeman, of Glamis, called on his brother, our genial merchant, last week.

There are lots of strange things happen on the town line. The latest is an overflowing well on the farm of Mr Wm Dalgarno. After drilling to the depth of 90 feet a great flow of water was struck, gushing up over seven feet above the top of the well. All day Sunday people were coming from all directions to see the sight.

A number of the members of the Epworth League attended the social evening at the home of Rev and Mrs Almack at Cargill last week, and also at the home of Miss Della Reed, Mountain View Farm, last Wednesday evening. A pleasant time was enjoyed at each place.

Messrs R Gregg and Leslie Garland called on friends in the Grove Sunday.

The hook and ladder company were out after the fowl supper on Thursday night. They put up the ladder and hooked the chicken and cakes.

Messrs A McKeeman and Cassidy were on the jury at Walkerton this week.

Miss Mattie Desmond, graduate nurse, of Toronto, is home on a visit at the Simcoe House.

A large number of friends of the late Lieut Ernie Reid from this district attended the memorial services held in Pinkerton last Sunday.

Mr and Mrs A Rosseau and Master Amey, of the Mansion House, Clifford, called on friends in the Grove Saturday.

The apple crop seems a failure around here. Since the war started spies are very scarce, and most of the other kinds have been blown off by the high winds.

Sunday school at 9.30 a m, quarterly service at 10.30 a m in the Methodist church. All welcome.

Mrs Connors visited Walkerton friends last week.

The Epworth League will meet at the home of Miss Jessie Alexander on Thursday evening.

Mr John Killan has purchased a fine new coal cooker named "Britannia." Now when the kettle sings "Britannia" John can play the accompaniment on the violin.

Miss Rebecca Thompson, of Walkerton, is visiting her cousin, Miss Lily Alexander, this week.

Mr John Seiler attended the church board meeting at Cargill Monday night.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

TURNER'S

Mr Robt Durward and his sister, of Kincardine, were calling on old friends here.

Mr Geo Gibbons, of the 12th of Bruce, spent Sunday at Enoch Gibbons'.

The W M Society held their annual thankoffering meeting in St Andrew's church here last Thursday.

Mr Wm Atkinson has purchased a new clover puller.

Mrs J Perrester has sold her farm on the 2nd of Saugeen to Mr A Miller, of Paisley. Mr Geo Kidd has had this farm rented for 12 years.

PINKERTON

At the regular meeting of the Pinkerton Red Cross Society last Thursday afternoon, the members had the following expression of sympathy sent to Mr and Mrs Adam Reid and family:

Moved by Mrs Bain, seconded by Mrs Birrell, that we, the members of the Pinkerton Branch of the Red Cross Society, desire to express to Mr and Mrs Adam Reid and family their sincere sorrow for the loss they have sustained by the death of their son, the late Lieut A B Reid, who was killed in France on Sept 17th, while leading a party of volunteers who went out to bring in wounded comrades. Lieut Reid's conduct as a civilian was a model for all young men, and his death was in keeping with his life.

MRS FLORA MCKEE, Sec'y Red Cross

Children Cry FOR FLETCHER'S CASTORIA

WALKERTON

Some farmers in Greenock appear to have their tomahawks out for each other over a proposed drain which threatens to rival the famous Newmarket Canal as a promoter of discussion and a handy thing for people to differ over. That it will run away more water than the canal, which was only made to float boats on, is evidenced by the fact that it will drain about one thousand acres of land. Starting at Wm Keake's in Kinloss it will travel in an easterly direction for 3¾ miles when it will empty into the river at the 3rd con of Greenock. The plan for the famous ditch was laid out last fall by an engineer, who set forth in his report what each party along the route should be assessed as his share. Some of these appealed to the Greenock council with the result that that august body struck off five from paying altogether an substantially lowered the rate of four others. The three hundred odd dollars which were knocked off in this way was added to the assessment of the others, and of these 20 loaded with the increase no less than 17 appealed from the Greenock council award to the judge at Walkerton. The matter was argued at much length before Judge Greig here on Tuesday, and was adjourned for further discussion on Friday afternoon at 2 o'clock. Lawyer Vanstone, of Wingham, is appearing for the appellants in the case, while David Robertson, K C, is representing the council at the trial.

Although the Columbus Oil Co was fined $40 and costs in Walkerton about two years ago for disposing of coal oil in this vicinity without a license, yet this did not altogether scare them off the job. On Friday and Saturday last their representative was at the G T R station here going through the ordinance of delivering the petroleum from a tank car, and judging by the size of the cans some of the farmers brought in much midnight oil will be burnt on the neighboring concessions this winter. It has been said that many gallants in the country carry their town oil with them when calling, a particularly friendly call, which probably explains why some bachelors who don't read overly much are yet strong on the oil. In addition to the large quantity sold by the local merchants, the outsiders seem to be taking a hand at replenishing the supply. Believing that as the merchant pays taxes the stranger should at least take out a license to get in on the game, Chief Ferguson laid an information against the stranger for neglecting this little formality. Although he first showed fight and asked that the trial be adjourned from Saturday evening last to Wednesday afternoon to enable him to bring his London solicitor to the scene, yet the impending struggle was abolished by the defendant making a pilgrimage to the county treasurer's office and taking out a six months' license on Monday. As a result, therefore, of the alacrity of Walkerton's live sleuth Bruce's coffers were enriched by $30 of the stranger's coin, which shows that the cops here don't sleep on the job as they do in Kincardine, where the Columbian did a similar business for two days and got away with it.—Herald and Times.

Children Cry FOR FLETCHER'S CASTORIA

—Members of fraternal societies who get carried along by their brethren and "drop out" will be interested in Judge Monk's ruling that they can be sued and made to pay up. It is a good doctrine, too. It is a very unfraternal thing to cheat brethren who have shown so much consideration as to keep members in good standing.

THE BEST OF THE BARGAIN

You get a bargain when you get The Youth's Companion for 1917 for $2.25—52 issues crowded from cover to cover with the reading you most enjoy. But you get the best of the bargain if you subscribe the minute you read this, for then you will get free every number of The Companion issued between the time you subscribe and New Year's. If you send your $2.25 at once that means a lot of reading for which you won't have to pay a cent. And then the long, glorious 52 weeks of Companion reading to come after! Let us send you the Forecast for 1917, which tells all about what is in store for Companion readers in 1917.

Our offer includes:

1 The Youth's Companion—52 issues of 1917.

2 All the remaining issues of 1916.

3 The Companion Home Calendar for 1917.

New Rooms For Old!

What a transformation can be made in old rooms by finishing the walls and ceilings with

Mellotone

—the ready-to-use flat wall paint! The rich, harmonious effect that Mellotoned walls will give your home will delight you. You will be still better satisfied as time passes and you find that the beautiful finish holds its color and is not easily marred.

Mellotone imparts the soft, beautiful effects of water colors and gives the enduring, sanitary, washable qualities of high grade paint. The velvety, flat-tone colors make rooms attractive and homelike.

Come in and see the Mellotone sample panels on display here—see how this modern wall finish will look in your own home.

—Mr and Mrs Robt Valentine have gone to live in Southampton where the former has employment in a furniture factory.

—Mr and Mrs J B Wylie, of Los Angeles, Cal., are over on a trip to Ontario, and were in Paisley on Wednesday last, calling on a few of their old friends.

—Mr W Woodcock, late of the G T R section crew here, has been working with the car repair department at Palmerston for some time and this week removed his family to the railway town.

—The Red Cross Society of S S No 14, Bruce, shipped the following supplies for the month of October: 32 sheets, 1 draw sheet, 1 pr pillow cases, 21 grey Shirts, 22 hospital shirts, 19 pr socks.

—Anniversary services in Gillies Hill Presbyterian church on Sunday, Dec 3rd. Services at 11 a m and 7 p m. Tea-Lunch 5 to 6 p m Monday, Dec 4th, in Town Hall, and programme in church. Admission, adults 25c, children 10c.

—The telegraph office has been removed from More's drug store to the Bruce Telephone Central, where the best attention will be given to dispatching and receiving messages. Mr More decided to give up the agency, hence the change.

—The officers of the Paisley Women's Patriotic League acknowledge with thanks a donation of $10 55 from Miss Keith and pupils of Cruikie school, 4th Elderslie, this being part of the proceeds of the Log social held on Friday evening last. An equal amount was sent to the Chesley Patriotic League.

—The training course for nurses at the Bruce County Hospital has been extended from two years to three years. The new ordinance which went into effect this fall, requires each nurse to spend six months of her term in the Bellevue Hospital, New York, with which the Bruce County Hospital has affiliated.

Sunday School Association

A report of the North Bruce Sunday School Convention held in Knox church on Tuesday afternoon and evening, is held over for next issue.

Christmas Boxes for Soldiers

The Red Cross workers of No 15 Bruce packed and shipped twelve Christmas boxes to soldiers who have gone overseas and whose homes are in this section.

Save Papers for Red Cross

Town and country people are requested to save their old papers, magazines, etc. for Red Cross Fund. Arrangements are being made to collect for shipment. See announcement next week.

The Golden Hogs

Mr W H McLean, of Ellengowan, recently sold eight pigs weighing 1840 lbs for $193 25. These were less than six months old. Mr S Winch, Elora road north, sold nine pigs lately that weighed 2515 lbs each, and the bunch were exchanged for $223 in money. Next!

Women Munition Workers

At least three young women from Paisley are working in munition factories in Toronto, and others are likely to go to the city to take up the same work shortly. To those who have no other occupation this branch of the war service is becoming popular among women and girls who feel that they should be doing something to help win the battles of the Allies. Their patriotic course is most commendable.

New Regulations

By the new regulations of the Education Department, girls are to be given their High School Entrance up to Normal School Entrance in 1917 the same as boys who work on the farms or enlist for overseas service. Of course girls who do housework should receive the same consideration at the hands of the Education Department as the boys, but the result of this regulation allowing certificates to be granted on students' standing at Easter exams when they need the extra two months to give them the necessary educational equipment, will surely result in an inferior class of teachers in our schools a few years hence.

Stock Tonics, &c.

A quantity of **Glauber Salts**, while they last, at 10 lbs for 25c.

A quantity of American Horse Tonic, regular 25c size, at 15c a package to clear.

Dr. Hess Stock Tonic, in 100-lb., 25-lb., 12-lb., 7-lb. and 1¼-lb packages. Heave Powder, Worm Powder, Instant Louse Killer, Poultry Panacea, Dip and Disinfectant and Healing Powder.

Also a full stock of **Royal Purple and International** preparations.

The Housewife's Corner

Selected Recipes.

Flavoring Sauerkraut.—A delicious flavor is imparted to sauerkraut by adding a cup of seedless raisins to about two quarts of the kraut. If the boiler is placed in the oven to cook there will be no odor through the house.

Rice Loaf.—Butter a bread pan and line with rice, steamed and still warm, about an inch thick. Fill the center with cold boiled salmon moistened with egg sauce (parsley may also be added). Cover with rice, set in pan of hot water, cover with buttered paper and bake one hour. Turn on a hot platter, pour an egg sauce around it and garnish with hard-boiled eggs.

Corn Muffins.—One cup flour, one-half cup cornmeal, three teaspoons baking powder, one tablespoon sugar, one-half teaspoon salt, one egg, one cup milk, one tablespoon butter. Mix and sift the dry ingredients together. Beat the egg and add the milk to it, then add this to the dry ingredients. Add the melted butter last, then beat well and turn into well-greased tins. Bake in moderate oven about thirty minutes.

An "Unexpected Company" Dish.—Break into small pieces sufficient macaroni or spaghetti to serve your guests and boil until tender in salt water. When done, turn out on a deep platter and make as many hollows or nests as there are persons to be served. Into each of these break an egg. Dot all over with generous bits of butter, season and place in the oven until the eggs have set, which should take only a few minutes. Garnish with parsley. A little grated cheese sprinkled over the dish before baking adds to the flavor.

Sage Tea.—Two ounces of garden sage, two ounces of green tea, two ounces of eau de cologne. Steep the sage and the tea separately, each in eight ounces of water. Allow the liquids to simmer on the stove for several hours until they are reduced to two-thirds of the quantity. Strain and combine the liquids, and when cooled apply to the hair. More than one application will be required to secure the best results. Use a small brush and distribute the dye evenly over the hair.

Almond Cake.—One-cupful butter, two cupfuls sugar, four eggs, one-half cupful almonds, blanched by pouring water on them until skins easily slip off, and cut in fine shreds; one-half teaspoonful extract bitter almonds, one pint flour, one and one-half teaspoonfuls baking powder, one glass brandy, one-half cupful milk. Rub butter and sugar to a smooth white cream, add eggs one at a time, beating three or four minutes between each. Sift flour and powder together, add to the butter, etc., with almonds, extract of bitter almonds, brandy and milk; mix into a smooth batter, and bake carefully in a rather hot oven for twenty minutes.

Shoo-Fly Cake.—Have two bowls ready for the mixtures. First, line a deep piepan with nice, flaky pie crust; then into the first bowl put two cups of flour and one-half cup of sugar, and work into this with the fingers a good half cup of any preferred shortening. I generally use half lard and half butter. Mix well and set aside. Into the second bowl put one-half cup molasses and one-half cup boiling water; mix one-half teaspoonful baking soda with a little vinegar, to dissolve it, add to the mixture and stir until it ceases to bubble. Pour this into the pie crust, and then gently drop the other mixture into it. Bake in a moderate oven. It will taste as good as it looks. First the crisp under crust, then the dark cake and on top the nice, mellow crumbs of flour and sugar. The directions sound long, but they are very simple, and the whole thing can be prepared quickly.

Sausage Suggestions.

As a wholesome addition to the winter diet there is much to be said in favor of sausage. There are several precautions to observe, however. One is that sausage is preserved meat, and should not be fed to children, as they cannot digest it properly. Sausage casings should never be eaten. It is absolutely necessary to pare carefully all the casings from all sausages—frankfurters, salami, bologna, etc. The casings are simply cleaned intestines, have absolutely no food value, and are highly indigestible. Also it is best to broil or cook sausages before using. Never use them raw.

Sausages combine excellently with beans, rice, eggs, etc. Egg sausage is a popular foreign breakfast, and is made as follows:

Six eggs, two sausages, sliced; one tablespoon of butter, four tablespoonfuls of milk, salt, pepper. The sausages should be sliced, heated and drained of fat. Beat the eggs thoroughly, add butter and eggs to the sausages and the milk. Cook until thick and smooth. While hot turn them on a platter and garnish with parsley. This is a very substantial and palatable dish for a cold morning.

Sausages are baked by placing in a dripping tin in a single layer and leaving in a moderate oven for about one and one-half hours. As soon as they are brown on one side they can be turned over. When brown on both sides drain and serve hot.

A quick way of preparing sausages is to dip them in beaten egg and bread crumbs, place in frying basket and cook in boiling fat for ten minutes. Serve on hot toast points.

As a matter of fact, sausage can be made at home with little difficulty. It will keep well during cold days. A perfectly wholesome sausage is made by chopping fine one-third fat and two-thirds lean pork. Season highly with black pepper, red pepper, fine table salt, a little finely chopped thyme and summer savory. If desired, a little brown sugar can be added to prevent the sausage meat from becoming too strong. Mix all together. One rule for seasoning is one tablespoonful of salt, one-half teaspoonful of pepper, one teaspoonful of other seasoning to each pound.

Make cotton bags about one yard long and four inches wide, and dip in a strong salt-water solution to harden. Allow the bags to dry, and then fill with sausage meat, pressing it in tightly with a potato masher. The bag should be tied very tightly and then stored in a cool place. When ever desired the bag can be pulled back and slices of the sausage meat cut off and fried or cooked as preferred. This particular sausage is delicious if served fried with fried apples.

With Oysters.

Oysters in Blanket.—Drain off as many oysters as you need, salt and pepper them. Have thinly sliced bacon large enough to cover an oyster, and fasten the pieces of bacon with toothpicks. When they are all ready, fry in a small amount of butter. Garnish the dish with lemon and parsley. Season with a chili sauce.

Broiled Oysters.—Drain the oysters, heat the liquor over the fire. Boil and skim it. For every twenty oysters allow one tablespoonful of butter, put in the saucepan and brown. Add a tablespoonful of browned flour, then add one-half pint of the oyster liquid. Stir the mixture until boiling; add salt to taste, and a teaspoonful of paprika, turn all this into a double boiler and add a teaspoonful of seasoning. Heat an ordinary pancake griddle very hot, and brush it lightly with butter. Lay on a few oysters at a time, as soon as they are brown and curl, put them in the oyster sauce in double boiler and continue so until all the oysters are broiled. The griddle must be very hot or the juice of the oysters will prevent browning.

Oyster Pie.—Make a rich puff paste; roll out twice as thick as for a fruit pie for top crust, ordinary thickness for the lower. Line a pudding dish with the thinner and fill with crusts of dry bread or light crackers. Butter edges of dish liberally that you may lift upper crust without breaking. Cover this with thick crust, ornamented heavily at edge, and bake. Cook the oysters as for a stew, only heating into them at the last two eggs and the thickening with one spoonful of fine cracker crumbs or rice flour. They should stew only five minutes, and time them so that the paste will be ready to receive them. Lift top crust, pour in smoking hot oysters and serve hot.

Household Hints.

It is better to boil cabbage in two waters.

A very sweet dessert is not appropriate with fish.

White oilcloth is good covering for cupboard shelves.

A long-handled dustpan is a great prize for a housekeeper.

Excellent pantry cloths for glassware and china are made from cheesecloth hemmed.

Simple milk puddings should not be put in a very hot oven, for the milk will curdle.

Browned breadcrumbs can be used as a breakfast food, and are really palatable.

A table of weights and measures, typewritten and framed under glass, should be hung in every kitchen.

The systematic brushing of the hair every night will do much toward keeping the scalp and hair clean.

Do not wait until afternoon to plan the evening dinner. Haste makes wasteful marketing and poor meals.

Wash colored silks in cold water and a moderate amount of soap. Do not rub the soap directly on the fabric.

A good dessert is made with bananas put through the potato ricer and sliced orange and pineapple added.

When making tomato or asparagus soup a few grains of baking soda should be added to the cooked vegetables.

Test nutmegs by pricking them with a pin. If they are good, oil will instantly spread around the puncture.

Even left-over cornbread can be made with eggs and milk and flavoring into a delicious and nutritious pudding.

When rolling cracker crumbs time will be saved by rolling them on a piece of brown paper. They can be easily lifted and poured into a jar and the table will not be covered with crumbs.

Stains can often be removed from clothing with ease and no rubbing if the stains are rinsed out in warm water, then well rubbed with a good soap and allowed to soak in boiling water for an hour.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON NOVEMBER 19.

Lesson VIII.—From Melita to Rome. Acts 28, 11-31. Golden Text.—Rom. 1, 16.

Verse 11. After three months—Early in February, when navigation began again. The journey was taken up as early as possible, and there was practically no chance of any messenger's reaching Rome after Paul's appeal sooner than he arrived himself. This accounts for the Jews' statement in verse 21. Of Alexandria—Engaged very probably in the same service as its predecessor, the freight of corn (Acts 27, 38). Sign—Figurehead, and so "name." The Dioscuri (margin) were "the great Twin Brethren, to whom the Romans pray" (Macauley). Castor and Pollux had many functions, the guardianship of sailors being prominent among them.

12. Syracuse—Capital of Sicily, eighty miles from Malta.

13. Cast loose (margin)—The word of Acts 27, 40, but "anchor" is not expressed. The text reading made a circuit is an attempt of the later MSS. to ease an unusual word. Rhegium—Now Reggio, in the toe of Italy; it and Messina, on the other side of the strait, were the chief sufferers in the recent appalling earthquake. Puteoli—One hundred and eight-two miles from Rhegium, now Pozzuoli. It was then the chief port and "the regular harbor for the corn fleet from Alexandria."

14. Found—Implying that they had to look for them; they had not heard of Paul's coming (see above). The week's delay would enable them to send word to the church in Rome. Note the readiness of the centurion to give Paul favors. Of course he had a soldier with him whose right wrist was chained to Paul's left (compare verses 16, 20). And so—This sentence is the climax of the book, which closes where it does because its whole object is to show how the church's "organizer of victory" came to the world's capital. The planting of Christianity in Rome was due (not to Peter! but) to nameless Christians from the East who were constantly traveling to and fro.

15. The Market of Appius—Claudius, who built the great Appian Road in B. C. 312. The Forum is about forty miles from Rome, and Tres Tabernae ("Three Shops") some thirty miles. Took courage—They were evidence of the firm hold the gospel had in the city.

16. By himself—Instead of in some public prison. This liberal custodie was a privilege he was entitled to, but he could not have enjoyed it but for his possession of money. Delivered—Because the Jews' murderous violence had forced the Roman chiliarch to take him.

19. True to his regular practice, he goes to the Jew first, as a potential missionary ready prepared, if he can accept Jesus as "The Hope of Israel." He is therefore anxious to prove that his appeal was in self-defense.

20. Call for you (margin)—The more probable rendering. The hope—as he declared in Acts 26, 7. Compare also Acts 23, 6, which might suggest that the truth of the resurrection is intended. But the two were inseparably bound together.

21. See note on verse 11.

22. Sect.—See Acts 24, 14 and note (Oct. 8). These Jews were fairly open-minded: their knowledge that the "sect of the Nazarenes" was everywhere spoken against prompted them to give its "ringleader" (Acts 24, 5) a hearing.

23. Expounded—The verb goes directly with the kingdom, it is needless to add a new object. Persuading—An imperfect rendering, as it implies success, read pleading with them. At the end of Luke's first volume (Luke 24, 44) the risen Lord had shown his disciples how to argue this plea.

30. Two whole years—At the end of which—what happened? We have insufficient facts to decide between these alternatives: (1) He was tried, condemned, and executed (traditionally on the Via Appia, on which he came to Rome). In that case it is hard to believe that Luke was not reserving the story for a third volume. (2) He was tried and acquitted, and traveled again for a while. Here again the same comment holds. (3) Luke wrote his book, and what happened to Paul after the two years was still future. The present writer (with Harnack and others) prefers (3). During these years Paul wrote Ephesians, Colossians, Philemon, and Philippians (some think also (on the first theory above) Timothy and Titus.

31. Boldness, or freedom—The government let him say what he liked. That is Luke's special point: in the whole book he is urging that the empire had never proscribed or discouraged the Faith. The days were drawing near when this would be changed. None forbidding him—One sonorous adverb in the Greek, closing the book. It was much used in the vernacular legal phraseology, hence the paraphrase above.

When planting trees, flowers, plants or shrubs, place the plant in the hole, press the earth firmly around it and then pour quantities of water and allow the ground to absorb it before filling in the remainder of the earth.

GIRLS WHO EARN HUGE SALARIES

WHAT THE WAR HAS DONE FOR ENGLISH WOMEN.

The Great War Has Proved a Veritable Gold Mine to Some.

Among the highest-paid women workers to-day are foreign correspondents in big banks. These duties call for a knowledge of several languages and the possession of an apt mathematical brain, says London Answers.

There is one woman foreign correspondent in a London bank whose business it is to keep in touch with the foreign exchanges, and who is in receipt of a salary of $35 a week—very good money when one considers that $10 a week has generally been regarded as a handsome wage to pay a woman engaged in clerical duties.

Perhaps the highest amount of all earned by any woman during the present war is $6,500 a year received by the managing director of a big sugar confectionery firm formerly in German hands. Her ability to carry on the business has prevented it from being wound up and throwing a large number of people out of employment. She earns so much because of her remarkable specialized knowledge of the trade.

Mothering the Workers.

The very able women who act as supervisors of war work at big munition factories, and whose duties are to regulate the work of the women munition-workers and see that their output is maintained, are paid as much as $25 a week, and on all sides it is agreed that they well earn their money, for no foreman could hope to obtain such successful results.

While being sympathetic and encouraging their attitude towards the women under them, these supervisors are firm enough in their manner to obtain perfect discipline, and, generally speaking, are well liked by the women they control.

Women welfare-workers are commanding salaries of from $1,000 to $1,250 a year. Their work is regarded as increasingly important, for their duties have to do with the health and the food conditions of thousands of women munition-workers. Their employment has given such good results that in almost every munition factory of size they are being introduced.

Woman as Organizer.

Here, again, special qualifications are demanded, of which tact is not the least. As a rule, the women who have been appointed to these positions are those of long experience in social work, with particular training in hygiene.

Women chemists are being employed in increasing numbers, their remuneration varying according to ability. There are many cases of $20 a week being earned. Women doctors are also in great prominence because of the shortage of doctors, and their earnings are exceedingly high—at least $2,500 a year.

The Bank of England, which has sent such a large proportion of its male [illegible] to the war, has provided a considerable number of competent clerical female hands with excellent situations. For those who are not afraid of work there is $15 in the pay-envelope every week—a wage which, it must be agreed, is highly satisfactory.

A salary of $1,500 a year is being earned by the woman director of a newly-established typewriting department in one of the Government offices. Before the war she was manageress of a typewriting bureau, and, in view of her capacity, was appointed to control a staff of twenty-five typewriting operators.

The Picture-Palace Girl.

In a well-known solicitors's office in London a woman has just been appointed head copying-clerk, at a salary of $17.50 a week.

Private secretaries to the heads of big commercial firms are being paid as much as $750 a year, and expert shorthand-typists are receiving $600 a year, which is a handsome wage for women in this class of work.

The shortage of male operators for cinema palaces has compelled the managers to employ women instead, and these are making anything from $8.75 to $15 a week, according to the size of the hall.

The earnings of women munition-workers are dependent on the number of hours they put in and their output. The beginners do not earn very much, but those who become markedly competent, and are able to turn out a great amount of work, can manage to make from $15 to $20 a week, although it must not be supposed that this is an average sum earned.

In industries where large contracts for home and allied armies are being executed, capable women workers are earning sums which would be regarded as extraordinarily high when contrasted with peace standards. Women working for large boot-making firms are taking home every week $10 and over, and any number of trades could be cited where equal amounts are being earned.

The Lady "Commercial."

Women commercial travellers working on a small salary and commission are making in special cases from $20 to $25 a week. Here, again, their earnings vary with their qualifications. Some women make excellent commercial travellers, and are able to procure even larger orders than the men whose places they have taken. There are others, however, who do not take so well to the work, and are content with earning, perhaps, half the remuneration of their more successful sisters.

There is a demand for women chefs, and in good-class hotels and restaurants they can depend on earning as much as $10 a week, with all their food during the day free. Waitresses at establishments where liberal gratuities are given have been taking as much at $2.50 a day in tips.

Lift girls, who work alternate weeks the whole seven days, have been making from $16 to $17.50 a week, in addition to their food, but this, of course, is an exceptional experience.

Scores of cases, however, can be mentioned where, with tips, the earnings of smart waitresses have been brought up to $10 and $12.50 a week. But the hours are long and the work very exacting, and not every woman would be able to stand the resultant strain.

Capable and trustworthy women chauffeurs are earning from $10 to $12.50 a week, and quite as much is being earned by women in country towns driving motor cars for public hire.

One or two well-educated women who understand dogs are making a handsome living by looking after the lap-dogs and spoilt pets of wealthy ladies. They attend to the toilet of the dogs each day, and those dog "nurses" who have been well recommended have as many as twenty houses a day to call upon.

Exceptional Cases.

The war has created a demand for women tutors at $500 a year and women librarians at $600 a year; in fact, hundreds of well-educated women who before the war never thought of engaging themselves in industrial pursuits, are now in receipt of $10 a week, with every chance of still further improving on this remuneration.

Unfortunately, the women who are earning from $10 to $25 a week only represent a small element in the vast army of women war workers. For the rank and file $8.25 to $8.75 is still considered a fair wage to pay, the employers forgetting that what might have been a satisfactory wage in peace-time is scarcely adequate when the cost of living has gone up at least 40 per cent. The women who are earning the handsome amounts mentioned must therefore consider themselves particularly favored, and it is not to be supposed that they form more than 5 per cent. of the whole huge community of women war workers.

The AUTOMOBILE

Some "Nevers" to Remember.

Never stop your car by using the service brake if it is at all possible to utilize the clutch, and never under any circumstances use the brake without first pressing down the clutch. Brake action is hard on the tires, while the releasing of the clutch allows the casing to cease revolving without unusual friction. When you press down the brake without slipping the clutch, you are making the tightening of the brake drums work against the speed of the engine as well as the momentum of the car.

Never allow your motor to run very long with the spark retarded, as the tendency is to overheat the engine and use gasoline unnecessarily. If there is a starter on your car, it is folly not to kill the engine immediately upon your having no further use for power. Try to minimize the wear and tear on the motor and reduce to a minimum the amount of gasoline expended.

Never try to reverse your car while it is going forward. Fighting one motion against another gives but one answer—terrific strain upon the machine. Always see that your car is brought to a dead stop before shifting gears to reverse.

Never attempt to start your motor by pushing down on a crank or by "spinning" it. It is far safer to always pull up on the crank, and in the majority of cases this action is sufficient if you apply a quick, active energy. Spinning a motor often results in back fires that break wrists or arms. And do not fail to bear in mind that when cranking a car the spark should be retarded. In machines made some seven or eight years ago, the spark lever operated a metal disk which automatically prevented cranking when there were too much spark. People have recently become educated, however, and this device is no longer necessary, although we still hear of accidents happening from back fires.

Never start your motor until you are sure that the car is in neutral gear, and never put a car in gear after the motor has commenced running until you are positive that the emergency brakes are not set. Many drivers have wondered why their cars would not move off after they had placed them in low gear. The fault was not in the motor but rather in the fact that the machine was endeavoring to initiate momentum against the weight of the car itself., and the fact that the emergency brakes had been pulled.

Never use hard or dirty water in your radiator if a soft, clean supply is available. Foreign matter clings very readily to any kind of metal, and incrustation is bond to result on the jacket.

Never allow anyone to carry any kind of a naked light anywhere near your car while it is being filled with gasoline, as a breath of air may blow the fumes toward the light and cause a burst of flame. Only recently an owner struck a match to watch his gasoline gauge while fuel was being poured into the tank, and the accident that followed was almost fatal. He thought that there was no danger, but a gust of wind communicated the gas fumes to the match and a great blaze went up instantaneously.

Never throw in your clutch rapidly, as this creates a great strain on the machinery. Endeavor to so start the car that you will give the impression of a thief stealing away in the night. The appearance of this system of driving is much more attractive as it eliminates all jolts and jars, and the effect on the mechanism is restful and easy.

Never hesitate to use low speed in mud, gravel or any kind of heavy going. Your car may be able to travel any where on high gear, but it is a useless expenditure of energy to force it to do this upon all occasions.

Never stop your car suddenly. Your chief object in so far as the emergency brake is concerned, should be to know when not to set it rather than when to set it.—"Auto" in Farmer's Advocate.

WHAT THE SOLDIERS EAT

Food Varies According to Their Nationalities.

The principal meal of the Russian soldier consists of stchee, something between a gruel and a soup, the chief ingredients of which are cabbage, potatoes, oatmeal and fat meat, preferably pork. These are boiled together with salt and other seasoning, the result being a thick, nourishing and by no means unpalatable dish.

The Italian soldiers, who are splendid marchers, live largely on a farinaceous diet—macaroni, spaghetti, and so on. They are also very partial to fruit, which is issued, together with wine and cigars, as part of their rations whenever possible.

No German soldier considers his daily menu complete without a sausage of some kind or other, and the "stronger" its flavor the better. A nutritious pea soup is also a staple of the army ration.

The mainstay of the French soldier consists of his beloved "soup," as he calls it. It is really a thick, nourishing stew, made of meat, potatoes and various other vegetables.

The English "Tommy" is conservative, but the things he loves above all else are bacon and jam.

Hibernian Hospital Orderly (to patient): "Wake up! Wake up! and take your sleeping draught!"—London Bystander.

Let Him Help Himself To

CROWN BRAND CORN SYRUP

It will do more than satisfy his craving for "something sweet"—it will supply the food elements needed to build up his little body and help him to gain in health and strength.

"Crown Brand" is a wholesome, nourishing food—as well as the most delicious of table syrups.

The recipes in our new book, "Desserts and Candies", will tell you just how to use it, in many novel ways. Write for a copy to our Montreal Office.

Dealers everywhere have "Crown Brand" in 2, 5, 10 and 20 pound tins—and 3 pound glass jars.

222

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XV.—(Cont'd).

Leicester rose and walked to the window.

From the place where he stood, he could hear, as the captain had intended that he should, every word Fitz and Vollet were saying.

The young lord, excited by the wine to an extraordinary pitch of courage, was making love, hot and serious.

Violet, just a little frightened, was laughingly and rather nervously evading him.

Leicester's cheeks flushed, and, his eyes hidden by the field glass, flashed passionately.

"Consummate coquette!" he murmured, "she is either fooling the boy or angling for a coronet—she whom I thought the soul of purity and disinterestedness. Which is it? By Heaven, I will know!"

And, much to the captain's amusement, he dropped the field glass and said, with an air almost of command:

"Miss Mildmay, your eyes are better than either mine or Captain Murpoint's; pray lend us their aid."

Violet hesitated a moment, then, with a smile which barely covered a peculiar feeling of nervousness, rose and came forward.

"Step outside," said Leicester, in his deep voice, and before she knew what he was going to do he drew her hand within his arm and led her out. "Do you see," he said, "out yonder? or have you no eyes for anything to-night but Lord Fitz Plantagenet Bloisdale?"

"Mr. Leicester!" exclaimed Violet, with dignity, still trembling inwardly.

"Pardon me," he said, in a deep whisper, drawing her farther from the window and speaking in an earnest, almost pleading tone, "pardon me. I was wrong to speak so, but let me plead as an excuse some provocation. I have not wounded you, Miss Mildmay, by these few words one-tenth so much as you have me by one of a thousand you have spoken to-day."

Violet tried to draw her hand away, but his strong hard hand retained it against her will.

"Wait one moment, I implore you," he said. "Wait while you tell me wherein I have offended you."

"Really," said Violet, with a low ripple of amusement which maddened him. "This is like a charade——"

"Tell me," he said, interrupting her almost sternly, "have you forgotten yesterday? Miss Mildmay, speak to me if you can as an honest woman should speak to an honest man. If the assurance of my devoted——"

"Oh, stop—pray stop!" said Violet, with a laugh which was calculated to madden a less passionate and willful temper than Leicester's. "What a contradiction! In one breath you assert your doubt of my honesty and assure me of your devoted—what? Oh, no, no more, Mr. Leicester! Pray be assured that I am not offended—not with any one! I am quite happy, and I don't understand you in the least. Shall we go in?"

She moved toward the window as she spoke, smiling with maddening wickedness, and fanning herself hurriedly, her heart throbbing all the while like a wild animal within her bosom.

Leicester turned with stern courtesy.

"By all means," he said. "I hope you have not caught cold!"

She dropped him a mocking curtsey and passed through the window.

Leicester stood for a moment looking at her as she glided with her peculiar grace into the chatter of voices and the light dance music which Ethel, with Bertie at her side, was evoking at the piano, than turned and strode out onto the terrace.

He leaned his arms on the coping and stared into the night.

"What is she? a flirt, a heartless coquette, a beautiful falsehood, or what?"

As he asked himself the question he heard theb ushes stir beneath him.

It did not attract his attention, and he did not glance down until he saw something dark move from beneath the laurels.

Then, with his usual rapidity of resolve, he lightly vaulted over the terrace and dropped close beside the figure.

It rose from the ground surprised and startled.

Leicester's hand grasped the man's shoulder, and turned him round.

It was Captain Murpoint's servant, Mr. Jem.

In a moment Leicester saw part of the hand.

The fellow was not a burglar on the scout, but a skulking eavesdropper.

"You've been listening, my friend," said Leicester, angrily, and with an ominous gathering light in his eyes. "That's a falsehood!" shouted Jem, who had been imbibing ale—and some quantity of it—at the "Blue Lion."

"Let that teach you greater caution and respect for the future, my friend," said Leicester, and he struck the daring scoundrel a straight blow full of unmitigated scorn.

Jem started, turned livid with rage, fear and hate, slunk away like a beaten hound and stole off.

After delivering punishment to Jem for his eavesdropping, Leicester walked round to the stables and ordered the Cedars' carriage.

When the carriage was ready he returned to the drawing-room, and, going up to his mother, whispered:

"I have ordered the carriage for you; do not let them think you are surprised."

Mrs. Dodson nodded and looked up at him inquiringly. She saw that something had gone wrong.

At that moment a peal of silvery laughter proceeded from the corner of the room where Lord Fitz and Violet were seated.

Leicester started and frowned and then Mrs. Dodson knew what ailed him. She knew that he was in love with Violet Mildmay.

When Leicester had left, Violet's smiles disappeared.

She answered Lord Fitz at random and grew cold and even stately.

Lord Fitz hoped when they were saying good-night that she would relapse into her bright amiability, but he was disappointed.

She wished him good-night with a smile that was the perfection of friendly indifference.

All the guests had gone, and Violet sat alone in the now silent drawing-room.

Her heart was heavy, her eyes and her whole frame weary.

As she reached her room she saw a light making its way from the captain's room, and heard the soft hum of his voice as he murmured his favorite air from "Faust."

"How good-natured he seems!" she thought. "He is really my friend, and yet I cannot quite like him."

So she went to bed thoroughly unhappy, dissatisfied with herself for acting the flirt and dissatisfied with Leicester for being one.

Although the captain was humming so carelessly, he was not idle.

No sooner did the sound of Violet's closing door greet his ear than he ceased humming and drew his chair to his bureau.

He had prepared his pens, ink, etc., on the table; there was every sign of a hard night's work.

He drew from the bureau his strange purchases, the sheet of parchment and the flour dredger, spreading the parchment upon the desk.

It looked very yellow and old, and anything but a nice material for a document.

But for the captain's purpose it was apparently not at all too passe, for he drew from his pocket a small bottle of cold coffee, and with a paint brush carefully washed the surface of the parchment on both sides.

Then he held it near the candle to dry, and after a close scrutiny nodded with satisfaction.

The ink underwent manipulation.

It was good black ink, evidently too good, for the captain carefully diluted it with water.

Then he took from his pocket a bundle of letters, and selecting the longest spread it out upon the bureau, lit a cigar and studied the handwriting, with the closest attention.

It was the handwriting of John Mildmay, and the letter was one of many he had written to his good and kind friend, Captain Howard Murpoint.

"I can imitate that, I think," muttered the captain; let me try."

For half an hour he preserved, and at the end of that time he had succeeded in imitating the handwriting of his dear, dead friend so closely that John Mildmay's ghost, if it had risen and peeped over the forger's shoulder could not have distinguished the forgery from the original.

"There," he muttered. "I'll defy all the lawyers in the world to detect that. Now for the deed."

He drew the parchment toward him, and proceeding with the greatest care and minuteness, drew up a document, which he signed with the name of John Mildmay.

The deed purported to be witnessed by an old coachman and his wife, both of whom were dead.

Then he took his flour dredger, and poured into it from a box which he had concealed in his dressing-case a quantity of finely powdered dust.

When the box was full he shook a little from the top upon the desk and the table.

Then he unlocked the door and touched the bell which summoned Mr. Starling.

After a few moments the door opened and Jem entered.

The captain looked up and frowned inquiringly.

There was a red mark across Jem's face, an ugly flush which rendered the sullen, ferocious countenance more evil and desperate looking.

"Shut the door and lock it," said the captain.

Jem did so and stood fingering the dressing-gown with shifting eyes and sullen, evil mouth.

"Come here," said the captain. "What's that on your face?"

"What's what?" said Jem, without raising his eyes.

"You know well enough," said the captain, eyeing him closely. "Are you sober enough to tell me how you came by that blow? If so, out with it. Who gave it to you?"

"It was Mr. Leicester, curse him!" burst out Jem, and with an oath. "He caught me a-listening by the terrace."

"Ah!" exclaimed the captain, with a gleam of malicious delight in his eyes. "My young lad, Leicester, was it? Oh, you must bear it, my dear Jem, grin and bear it. I think it will be black and blue. Never mind, Jem, it will make him laugh in the morning, and he'll ask you how it is."

"Don't, don't!" groaned the infuriated man, hoarsely. "Don't work me up, captain. Don't! I shall go mad! I'll be even with him! I'll make him rue the night he struck me, dog as I am!"

"Do you want revenge, Jem?"

Jem looked up from the floor with savage eyes.

"You do? Then I'll show you how to get as sweet, so rich a one that you'll bless me, Jem. But first I've got a word with you, Mr. Starling. You are getting careless. You'll never make a good servant. You are idle. Look at the dust on that table!"

Jem looked and stared.

"That's a pretty state for a gentleman's writing-desk to be in! You have not dusted that for a week!"

"I dusted it this morning, sir," said Jem, looking round with bewilderment.

Then the captain took up the dredger from beneath the table and held it up with a smile. "Conjuring, Jem—magic! By this simple contrivance we get the dust of years in one moment. Put it in your pocket and light the lantern."

Jem stared in silence profound and amazed for a minute.

(To be continued).

Concrete Wall Construction.

Concrete walls are easily constructed and at a low cost. These walls are especially suitable for farm entrances or enclosures about farm buildings. Where merely serving the purpose of an enclosure, such as a barnyard or poultry yard, it is not necessary to construct the wall more than 6 inches thick. Simple methods of construction are as follows:

The most important consideration in the construction of any wall is a firm foundation, sufficiently deep to prevent heaving by frost. In most localities this distance is 3 to 4 feet. When the earth is firm and the sides of an excavation will stand up vertically, it is unnecessary to use wooden forms for the portion of wall beneath the ground level. A trench of the required width is dug, taking care that the sides of the trench are straight, vertical and fairly smooth. The width of all walls below ground level should be at least 12 inches. Where sandy or crumbly earth is encountered, it is best to use wooden forms below ground level. In depositing the concrete in the foundation trench see that no dirt falls into it as this would weaken the wall. The proper proportions for walls below ground are 1 bag of Portland cement to 2½ cubic feet of sand to 5 cubic feet of crushed rock or pebbles. When the trench is filled with concrete to ground level, a simple form, is set in place. The surface of the foundation at ground level must be entirely free from dirt, chips or other foreign substances and the concrete roughened before depositing upon it the above-ground portion or wall proper. The minimum thickness of walls for very light structures may be 4 inches, although it is very difficult to deposit concrete in a wall this thin. A thickness of 6 inches is better for most purposes. The proportion of walls above ground should be 1 bag of Portland cement to 2 cubic feet of sand to 4 cubic feet of crushed rock or pebbles. Bank-run gravel may be used if the pebbles are separated from the sand by screening through a ¼-inch screen. For the above-ground portion of walls the forms should be made with care, the boards being carefully matched so that a smooth surface will be obtained in the finished wall. This result is obtained by spading the concrete as it is being placed in the forms. Spading consists of thrusting between the form and the fresh concrete a thin wooden paddle. This serves to force the stone back into the concrete, allowing a rich mortar coat to flow against the forms. In walls above ground it is well to reinforce with small steel rods or wire mesh. This reinforcing runs in both directions and serves to prevent any cracks due to settlement or other causes.

Walls for buildings can be constructed as described, but for buildings of considerable size the thickness of the walls should be 8 inches, and one or two lengths of rods should be laid about 2 inches above the tops of windows, doors and other openings.—Canadian Farm.

Food for Thought.

First sea voyager (on rather rough trip)—Ah, isn't the salt air bracing! The sea is good for a man!

Second sea voyager (wanly)—Yes, it certainly calls forth the best that is in you.

There are two distinct classes of college graduates: Those who accept positions and those who hunt jobs.

She Makes a Threat.

"I notice," said the determined young woman, "that you don't care to sit alone in the parlor here with me any more."

"Oh, I don't know," replied the lover, who was growing cold. "Why?"

"Well, I just want to remark that you'll either have your courting in here or your hearing in court."

Fatal Self-Criticism.

"My husband has no faults; he doesn't gamble and he doesn't drink."

"Doesn't he smoke, either?"

"Well, after a good dinner, he may light a cigar, but that's only about once in six weeks."

The Paisley Advocate

PAISLEY, NOV. 25th, 1916

—There is nothing much doing at Toronto jail since prohibition came into force, and the old building is no longer considered a fit place for even guilty law-breakers because it has become a rat-infested ramshackle, so the city council has determined to close up the institution. The council has passed a resolution to cut off the salaries of jail officials and employees unless the Provincial Government insists that the institution be kept up at the expense of the city. The counties of Ontario might follow this lead and save a lot of money to the country by abolishing at least one or two out of every three jails in the Province, as been proposed before.

—The republic to the south of us had the same experience in their recent Presidential election as the big riding of North Bruce has had repeatedly. On election night the people went to bed with the idea that Hughes, the Republican candidate, had been elected by an overwhelming vote, but got up next morning to find that Wilson was still president, and the Democrats had a narrow majority of members in the House of Representatives and the Senate. How many times have the Liberals been leading in the early returns in North Bruce, but been put down and out by the little figures from the slim north end of the peninsula?

Patriotic League Entertainment

On Monday night the Patriotic League held an entertainment in the Town Hall, the programme being a mixed one by home and foreign talent, with Miss Hilliston as the main attraction. This lady is more of a lecturer than an elocutionist. Her description of travels in Hawaii with talk on customs of the people was quite interesting. Catherine Campbell and Sandy McDonald, the juvenile Scottish singers from Port Elgin, were obliged to almost exhaust their repertoire in responding to recalls. Home talent assisting included Miss Netta Johnston, a quartette of boys—Abbie Stanley, L Cargill, Allan and Fred Shoemaker, in patriotic songs, and a double quartette of men voices.

The Late Mrs Cameron

On Wednesday of last week there was called to her last rest another of the two or three remaining pioneer women who came in their youth to the wilds of the 12th of Bruce and eventually realized many of the hopes that prompted them to leave old Scotia and venture forth to this land of forest. Mary McCormick was born and grew to womanhood in Argyleshire, Scotland, her home being on the Island of Mull. In 1862 she married Neil Cameron, and very shortly thereafter the twain sailed for Canada, and became settlers on lot 30, con 12, Bruce Tp. Those among whom she lived in that neighborhood for forty-two years bear testimony to her worth. She was an energetic, thrifty, kind and hospitable person, who won the esteem of friends and acquaintances, and always did her share in cheering the homes of others in times of sickness or distress. The weary or hungry never left her door without being treated and provided with food. To her husband she was a true and strong helpmeet—assisting him in the struggles that were necessary to make the establishing a home in those days. Her life was rendered more difficult by the death of Mr Cameron in 1889, but after that she carried on the business of the farm with the assistance of her younger sons, displaying marked business ability and caution in the management thereof. She played the part of a kind, affectionate and persevering mother throughout, and was in turn much loved by her family. For the last few months she was a helpless invalid, and received unbounded care from her daughters at home. She was an active member of the congregation of St Andrew's church, Saugeen, where her husband was for many years an elder. The whole family of five sons and three daughters are living: Colin, in Vancouver; Malcolm, in Victoria; John, in Dawson; Archie, in Saugeen; Neil, in St John's, N B; Jessie, Euphemia and Margaret at home. The funeral was held on Friday forenoon, service being conducted by Rev Mr Little, of Knox church. Interment was made in Port Elgin cemetery beside the remains of her husband.

Meets Soldier's Death

L-Corp. Frank S Boyle

Last week we stopped the press to insert a brief intimation of the fate of another of our soldier boys on the battle ground in France. Frank Boyle was the son of Mr R F Boyle, of Paisley. He left Paisley about twelve years ago, and was employed with St Thomas and Tillsonburg firms prior to donning the khaki. At the latter town he was given a banquet and royal send-off before leaving for overseas. He enlisted with the 71st Batt at Tillsonburg in December last, crossed overseas in April, 1915 went to France in June. In England he was transferred to the 4th Batt. Like many other Paisley boys, Frank was a good marksman, winning high honors at target practice, and he was first assigned duty as a sniper for a period after going to France. He won his first stripe a few weeks ago, and was a lance-corporal at the time he fought his last fight. Being descended on the maternal side from one of that small body of men who rebelled against the Canadian governmental wrongs in 1837, it was quite natural that the fight against Kaiserism should appeal to Frank Boyle. He was a grandson of the late John Stewart, of Paisley, who in 1837, while a resident of Halton Co, took up arms in the MacKenzie rebellion. Frank was rejected upon first making application for enlistment, on account of a cold which threatened to develop into asthma, but recovering from this, and restored to his normal fitness he again presented himself at the recruiting

office and was accepted. Light hearted and sociable in disposition, Frank was very popular among his friends, and all mourn his loss here. Besides his father, the deceased is survived by three sisters—Mav, of the public school staff, Jennie and Mrs Rock (Maggie), of Elkington, Alta, also his aunt, Miss Stewart, who has tenderly cared for and was devotedly attached to her sister's children since their mother's death 25 years ago. The family and friends have the deepest sympathy of everyone in their bereavement.

A memorial service was held in Knox church on Sunday evening, which was attended by people of all denominations, all the other churches being closed for the evening. The sermon, a very appropriate and impressive one, was delivered by Rev G C Little, B A, pastor of the church. The singing was led by a male choir.

The deceased was a member of Abiram Lodge, I O O F, and the brethern attended the memorial service in a body.

His Last Letters Received at Home

Somewhere in France
Oct 17th, 1916

DEAR PEOPLE—Well, as there is a lull in the storm I think I will drop you a few lines. We certainly are having a lively time of it now. Have no trenches to speak of—just a continuation of shell holes and then dig yourself under the bank. Last week we lay three days and three nights straight with old Heinie pounding us. It is some experience to be lying between two lines of guns—our own and Fritz's. We were out for 48 hours and are back in again. Have just finished my dinner in a hole dug under a bank. We cannot have a fire to cook anything on as it will draw attention, so I melted a candle in a tin and put a piece of sock in it and made some tea in my mess can. Had some hard army biscuits and canned beef. That is our meal. For supper we have dry biscuits, jam and water. I have been lucky so far. Had some close calls, but one cannot tell when he is going to get it. There are lots of souvenirs here, but we cannot send anything unless we see someone going on leave. There are hundreds of German rifles, helmets, bayonets, water bottles and all kinds of things lying around, but we cannot carry any more than we have now. We have to make our movements in the dark and carry as little as possible. I was close to where Spot Ralston was camped the other day, but did not get a chance to see him. I am getting along O K since I received my stripe. It makes one take more interest in things, and I am going to try to get along the best I can if I have the luck. I think this will be all this time. My hands are so black you will hardly be able to read it. Tell Aunt Jean not to worry. Bye-bye. Remember me to all the people.

Oct 23rd, 1916

DEAR PEOPLE—Just a line to say I am O K. Have not heard from you for a week or more. I suppose you will have seen by the papers the push we gave Heinie the day before yesterday. The boys sure did good work. We have been back two days and expect to go up any minute. Our guns sure take the fight out of them, and the prisoners seem tickled to death to get captured. There is not much to write about just at present. Will likely have more news in a day or two, if I am lucky. We certainly have got the best artillery in the world and plenty of ammunition to back it up. I was near to Spot the other day but did not see him. Some of the boys did. Hamilton, Purdy and Shaw are near here. Saw Hamilton when I came out. The other night I dropped into a Y M C A for a hot drink and ran across him. He did not know me for mud. It had been raining for two days, and our trenches were awful, but we stuck it out. If we get Heinie back a little further we will have higher ground and take his trenches. It is much easier than digging them. Inclosed you will find a German coin I got off a dead Heinie. It does not look as if we will be home for Christmas this year. Perhaps we may next. Love to Aunt Jean, and remember me to all the people.

Yours lovingly,
L-CPL F S BOYLE

Pte Thornton Fear

In the list of casualities on Wednesday there appeared the name of Thorton Fear, who was employed at McLachlan's bakery for about a year, and left here just a year ago to enlist. He also joined the 71st Batt. He was only 18 or 19 years of age, of splendid physique and soldierly appearance. Among the young people of Paisley he made numerous warm friends. His father, Rev Ezra Fear, is a Methodist minister, late of Teeswater, but now stationed at Wheatley.

A STOPPED WATCH

—one that will not go AT ALL—does not cause as much bother as one that runs now fast, now slow, in an erratic fashion.

The first you don't pretend to depend upon—the other is a constant source of annoyance.

Most people can afford a watch, but no one can afford an uncertain fast and slow one.

And when our Repair Department is so close at hand there is really no excuse for carrying anything but an accurate time-piece, no matter what the first cost was.

Consult us about any watch troubles that may arise.

I. SHOEMAKER
Jeweler and Optician

The Difference

TENNYSON or Longfellow could take a worthless sheet of paper and write a poem on it and make it worth $65,000—that's genius. There are some men who can write a few words on a sheet of paper and make it worth $5,000,000—that's capital. The Dominion of Canada can take half an ounce of silver and stamp upon it a "crowned head" and make it worth fifty cents—that's money. A mechanic can take material worth $3.00 and make it into watch springs worth $1,000—that's skill. There is a man in Toronto who can take a fifty-cent piece of canvas, put a picture on it and make it worth several hundred dollars—that's art. A lady can purchase a hat for seventy-five cents, but prefers one that costs $27.00—that's foolishness. The author of this could write a cheque for $50,000,000, but it wouldn't be worth a cent—that's tough. There are tailors who will say they can serve you as well as Irwin at less—that's nerve. Every man who is posted and wants the best deals with Irwin—that's common sense

recently appointed Japanese Ambassador to the United States. The newly appointed Ambassador, who is a baseball fan, brought from Japan to the United States a message of peace, good-will, and desire for continued friendliness through the ages.

BRITONS ARE LEANER.

Hard Work and Plain Living Reduce John Bull's Girth.

The medical experts are telling us that the British, since the war began, have become leaner, says the London News. Generally speaking, John Bull, owing to hard work and plain living, is now able to take in his belt three holes.

The well-known vendor of a "figure reductor" for self-conscious persons, questioned on this by a Daily News interviewer, admitted a decline in sales.

A test case was obviously "Twenty Stun Bill," who used to loiter, fairly actively, at a corner where bus horses assembled in South London, and still haunts the place. "Old Bill?" queried a motor-bus driver. "Not so right? Not 'arf. No treating nah. Not so much beer." Food for thought there.

A panel doctor, in a large way of business, confirmed the general statement of a leaner Britain. "I don't think there's either loss or gain in it. Many people are thinner because they are in poor condition, owing to worry, or high food prices, or both. Nothing knocks the tissues about like worry. And then a large number of well-nourished people are working so much harder than usual that they've lost a good stone in the past year. But they're the better for it, like the sound man who gets lean in his army training—if that isn't overdone or barried, as I fear it is, however, in not a few instances."

BABY'S OWN TABLETS USED TEN YEARS

Mrs. C. E. Stilwell, Winthrope, Sask., writes: "I have used Baby's Own Tablets for the past ten years and have found them so good for my little ones that I always keep a box in the house." Mrs. Stilwell is one of thousands of mothers who always keep the Tablets on hand. Once a mother has used them for her little ones she would use nothing else. They are absolutely free from opiates and injurious drugs and cannot possibly do harm to the youngest child. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

CONCERNING CRUISERS.

This Class of Vessel is Called "the Eyes of the Fleet."

The cruiser has to perform perhaps more varied functions than any other class of warship in the Fleet.

It is her business to stop and fight when the circumstances are, from her point of view, favorable, and also to possess a high speed to enable her to run away when the position is unfavorable.

The cruiser is admirably termed the policeman of the Fleet, for her capacities of mobility and long passage-making without replenishing her bunkers are her chief attributes.

Although the introduction of wireless telegraphy has somewhat lessened the responsibility placed upon the cruiser for scouting work, she is still regarded as the "eyes of the Fleet."

For the object of scouting work there is a special type of scouting cruiser in existence.

The armored cruiser's advent has almost extended that class of ship to be considered to come within the scope of the battleship. Indeed, in some cases they are so perfectly equipped in aggressive policy as to be deemed competent enough to lie in the battle-line with the "capital ships."

Human Nature.

"But you will at least admit that there are two sides to every question, and——"

"I admit nothing of the kind," interrupted J. Fuller Gloom. "As far as I am concerned, there is only one side and a lot of confounded foolishness!"

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances.

A Free Prescription You Can Have Filled and Use at Home.

LONDON: Do you wear glasses? Are you a victim of eye strain or any eye weaknesses? If so, you will be glad to know that Dr. Jackson's Sons have a real hope for you. Many whose eyes were failing say they have had their eyes restored through the simple use of this wonderful free prescription. One man says: "After trying it I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they are fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now throw them in a reasonable time and multitudes more will be able to strengthen their eyes and so be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules.

Here is the prescription: Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time.

Note: Another prominent Physician to whom the above article was submitted, said: "Bon-Opto is a very remarkable remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. The manufacturers guarantee it to strengthen eyesight 50 per cent in one week's time in many instances or refund the money. It can be obtained from any good druggist and is one of the very few preparations I feel should be kept on hand for regular use in almost every family." The Valmar Drug Co. Store 6, Toronto, will fill your orders if your druggist cannot.

Pa's Revenge.

"Isn't it funny?" said Gladys curiously to her chum Phyllis. "Father has promised to give me a pair of diamond earrings if I will stop having music lessons. I wonder why?"

"That's strange!" agreed Phyllis. "But you've never worn earrings, have you?"

"No, I shall have to get my ears pierced."

"That explains it," said Phyllis, an innocent smile curving her ruby lips. "He wants to pay you back in your own coin."

The Folly Of Taking Digestive Pills

A Warning to Dyspeptics.

The habit of taking digestive pills after meals to overcome dyspepsia of many thousands of men and women because artificial digestants, drugs and medicines have practically no influence upon the excessively acid condition of the stomach contents which is the cause of most forms of indigestion and dyspepsia.

The after dinner pill merely lessens the sensitiveness of the stomach nerves and thus allows a false sense of freedom from pain. If those who are subject to indigestion, gas, flatulence, belching, bloating, heartburn, etc., after eating would get about an ounce of pure bisurated magnesia from their druggist and take a teaspoonful in a little water after meals, there would be no further necessity for drugs or medicine because bisurated magnesia instantly neutralizes stomach acidity, stops food fermentation and thus insures normal, painless digestion by enabling the stomach to do its work without hindrance.

Unfeeling.

Romantic Bridegroom (on the honeymoon)—Suppose we had never met!

She—Oh, I should simply have married another man.

"SUMMER THROUGH THE WINTER" IN CALIFORNIA.

Get away from the cold, disagreeable winter. California temperature is from 60 to 75 degrees the year round. It is not expensive to spend the entire winter there. Round trip rate from $33.00 per month, up.

Special Winter Tour Fares. The famous Los Angeles Limited, a fast, refined and exclusive through train from Chicago to Los Angeles, leaves Chicago 10.00 p.m. and arrives at Los Angeles 4.30 p.m. the third day—less than three days en route.

Write to H. H. Bennett, Gen. Agt., Chicago & North Western Ry. 46 Yonge St., Toronto, Ont. He will send you descriptive literature and train schedules, help you plan your trip, and make reservations for you clear through to the Pacific Coast.

For Universal Peace.

Willie—I wonder if there will ever be universal peace?

Gillis—Sure. All they've got to do is to get all the nations to agree that in case of war the winner pays the pensions.

Minard's Liniment Cures Colds, &c.

Court of Domestic Relations.

Mrs. Justwed—We hadn't been married a week when he hit me with a piece of sponge cake.

The Judge—Disorderly conduct. One dollar and costs.

Mrs. Justwed—And I'd made the cake with my own hands.

The Judge—Assault with a deadly weapon. One year.

MOTHER'S REMEDY FOR BRUISES

Children's Bumps, Sprains and Minor Hurts Quickly Relieved by Sloan's Liniment.

It is the very nature of children to hurt themselves—to come crying to mother with little fingers bruised, with heads bumped, with sprained ankles and wrists.

They are painful hurts, too. But their pain and sting can't survive the gentle use of Sloan's Liniment. A single application of Sloan's Liniment and the little fellow's bravely kept back tears give way to smiles. His hurt is relieved.

In every home where there are children a bottle of Sloan's Liniment is a necessity.

Aching muscles, rheumatism, lumbago, stiff neck, backache, chilblains etc. can be effectively relieved with Sloan's Liniment. Cleaner than mussy ointments or plasters.

Sloan's Liniment can be obtained at all drug stores, 25c., 50c. and $1.00.

Sloan's Liniment
KILLS PAIN

In Exalted Company.

One of the members of a committee of inspection on its tour of a certain penitentiary found himself in conversation with one of the convicts. The latter was disposed to be confidential, and thus unburdened himself.

"It's a terrible thing to be known by a number instead of a name, and to feel that all my life I shall be an object of suspicion among the police."

"But you will not be alone, my friend" said the visitor consolingly. "The same thing happens to people who own automobiles."

Toronto Fat Stock Show.

Farmers who have choice stock to market shortly would do well to enter in Toronto Fat Stock Show, Union Stock Yards, Toronto, December 5th and 8th, 1916, and secure some of the big premium offered in addition to market price of their animals. This show has been coming to the front very rapidly and carries the best and largest exhibition of fat butcher stock in Canada, and this year promises to be better than ever.

Patent Love Charm.

A young woman who thought she was losing her husband's affection went to a seventh daughter of a seventh daughter for a love powder. The mystery woman told her:

"Get a raw piece of beef, cut flat, about an inch thick. Slice an onion in two and rub the meat on both sides of it. Put on pepper and salt, and toast it on each side, over a red coal fire. Drop on it three lumps of butter and two sprigs of parsley, and get him to eat it."

The young wife did so, and her husband loved her ever after.

Relics of Shakespeare.

Of the few genuine relics of Shakespeare preserved in his native town, the most interesting are his signet ring, with the initials "W.S." on it, and the desk at which he sat in the grammar school at Stratford. Over 23,000 people visit the poet's home every year, numbers of them traveling many thousands of miles for this express purpose.

Minard's Liniment Cures Diphtheria.

Like Herself.

Mrs. Youngbride (in fish store)—Haven't you any lobsters that are riper? These look so green.

Minard's Liniment Co., Limited.

Gentlemen,—In July 1916 I was thrown from a road machine, injuring my hip and back badly and was obliged to use a crutch for 14 months. In Sept., 1906, Mr. Wm. Outridge of Lachute urged me to try MINARD'S LINIMENT, which I did with the most satisfactory results and to-day I am as well as ever in my life.

Yours sincerely,
his
MATTHEW x BAINES.
mark

It's An Ill-Wind—

"I see that there's a great scarcity of paper."

"Glad of it! My creditors may have to stop sending me bills."

Minard's Liniment Cures Distemper

Duration of War.

A proper man is young always, Herr Foschwitz, aged 50 years, and captain in the Landwehr, married about the time the war began a wife not yet 20. Since the war has been dragging on and he has continued at the front, he has spoken often to his comrades about a matter very near his heart.

"If this fighting business keeps up much longer," says he, "when it is over I'll find myself tied to an old woman."

DODD'S KIDNEY PILLS

CURES RHEUMATISM BRIGHT'S DISEASE BACKACHE DIABETES
NUMBER 23 THE PROPRIETORS

PEAKS 11,000 FEET HIGH.

Made Accessible by Kootenay Central Branch, C.P.R.

The wonderful icefields and eleven-thousand-feet-high peaks of the Purcell range, which the construction of the Kootenay Central branch of the Canadian Pacific Railway has rendered accessible to mountain climbers, are described and illustrated by Mr. C. W. Stone in the Canadian Alpine Journal for 1916. The approach to Mount Ethelbert, a peak which arrests the attention at Spillimacheen Station, seems almost to have overwhelmed the writer with its beauty. "Before us," he says, "lay a lake of exquisite blue color resting like a jewel in a setting between two rugged peaks, which mirrored in the clear water, rose abruptly thousands of feet on either hand like grim guardians of a lovely treasure. Beyond the lake the lifted eyes rested on a terrace stretched across the valley like a giant curtain eighteen hundred feet above the lake, down whose verdant slopes two gleaming cascades traced their foaming course and filled the whole amphitheatre with the sounds of falling water. Still farther and higher in the background, great snow crests appeared, inscrutably looking down upon us."

Three considerable parties of Alpine climbers, numbering nearly forty in all, mostly from the United States, made ascents in this region during the past summer on the invitation of Mr. A. H. MacCarthy, an enthusiastic member of the Canadian Alpine Club, who has a fine ranch at Wilmer in the Windermere district. Under Mr. MacCarthy's leadership important explorations have been made up the various creeks, piercing the eastern slopes of the Selkirk and Purcell ranges, Mr. MacCarthy being of the opinion that for interest and variety and spectacular beauty this mountain region is without rival on the North American Continent, and as soon as roads and trails are built will attract many tourists who have hitherto been content with the more beaten path of the C.P.R. main line.

How to Get Rid Of Catarrh, Catarrhal Deafness or Head Noise.

If you have catarrh, catarrhal deafness or head noises caused by catarrh, or if phlegm drops in your throat and has caused catarrh of the stomach or bowels you will be glad to know that these distressing symptoms can be relieved in many instances by the following treatment which you can easily prepare in your own home at little cost. Secure from your druggist 1 ounce of Parmint (Double Strength) and get it mixed with one pint of hot water. Take this home and add to it 1 pint of hot water and 4 ounces of granulated sugar; stir until dissolved. Take one tablespoonful four times a day. A decided improvement is sometimes noted after the first day's treatment. Breathing becomes easy, while the distressing head noises, headache, dullness, mental thinking, etc., gradually disappear under the influence of the treatment. Loss of smell, taste, defective hearing and mucus dropping in the back of the throat are other symptoms which suggest the presence of catarrh and which yield to this simple, effective treatment. Nearly ninety per cent of all ear troubles are said to be directly caused by catarrh. Therefore, there must be many people whose hearing can be restored by this simple home treatment.

Japs Abroad.

About 358,000 Japanese subjects are living abroad. In the United States are 86,000, Hawaii 90,000, Philippine Islands 5,000, China 112,000, Australia 6,000, Canada 12,000, France 129, Great Britain 478, and Germany 434.

Minard's Liniment Cures Garget in Cows

No Gift.

A business-like man stepped into a butcher's shop.

"A piece of beef for roasting," he ordered, briskly.

The meat, mostly bone, was thrown on the scales.

"Look here," remonstrated the man, "you're giving me a big piece of bone."

"Oh, no, I ain't," said the butcher, blandly, "yer payin' fer it."

Trapping a Slacker.

He had no stomach for the army, but had presented himself for examination with a "sure trick" up his sleeve to "work his ticket." He was physically perfect, but his eye-sight was shocking—so bad, indeed, that the sergeant thought the doctor should see him.

"First class physically," pronounced the doctor, but when the medical man applied the eye tests the would-be recruit's sight appeared much worse than when the sergeant had him in hand.

"No, no, my man; with sight like that you're no use for the army," said the medico. "But you ought to get glasses. Stay, I've a pair like microscopes and if you see with them you can have them."

The spectacles were produced and fitted on, the recruit at once cried, "Oh, I see splendidly!"

"Do you now?" said the doctor, with sarcasm. "Take him along, sergeant, and get him sworn in. There's no glass in the spectacles."

A girl seldom kicks when an old man lays his fortune at her feet.

If your wife had it to do over again the chances are she wouldn't marry you.

EDEN GROVE

News in the Grove this week is something like the freckles on a young lady's face this time of year —pretty scarce.

Miss Francis Seiler, of Walkerton, enjoyed the week end at her home, King st east.

On Monday Lieut Gordon Connell gladdened the hearts of some of his old friends in the Grove by sending them interesting letters from Whitley Camp, England. The boys evidently had a fine trip across the pond.

Miss Mae Fordyce visited Paisley friends Monday.

Mr Richard Connors injured his ankle while working for the G T R at Port Colborne last week and was laid up for a few days. Dick looked quite at home with his gold-headed cane.

We might just mention there will be service next Sunday morning at 11 o'clock in case you should forget.

The many friends of our neighbor, Mr Clancy, the genial G T R agent, Cargill, will be sorry to hear of his leaving for the south, although pleased to hear of his promotion. Jimmy always took a great interest in everything going on in the Grove for a good cause, and his pleasant smile will be greatly missed at our social gatherings. All wish him success in his future home.

Coal is a scarce article in the Grove at present.

Mr Ed Bailey injured his hand when loading logs Saturday and is laid up at present.

"Hi! what you doing up that telephone pole, Joe?" "Keep quiet, mother. I think I see a load of coal heading for the Grove."

Mr Seiler has received word that his son Abbie is on his way home from the west.

Mr Len O'Reilly visited friends in Millduay and Clifford on Sunday.

Sunny Jim and his sister-in-law called on Cargill friends last Wednesday.

This is the kind of weather that makes a young fellow wonder what he did with his summer's wages.

Miss Mattie Desmond returned to Toronto Saturday.

A number from here took in the Red Cross entertainment at Cargill Saturday evening.

Sleighs were out for the first time this season on Monday.

A young man with horse and rig was caught trying to steal geese from a farmer Sunday afternoon. The fellow must have been a goose to try to steal in daylight.

Messrs Wm Todd, W Fair and R Bailey, of Palmerston, Sundayed at their homes in the Grove.

Jack Frost was out for a good time Saturday night, but didn't do much damage.

Mr and Mrs Pearson and son spent Sunday with Cargill friends.

Wonder if the fellows who wouldn't buy the ice cream in the summer will come around and help burn up dad's coal these cool evenings.

Rev W Almack was in town Friday making pastoral calls.

This weather feels more like Christmas than a fellow's pocket-book.

The Epworth League will meet at the Parsonage in Cargill this Thursday evening. All members should try and go over.

Miss A Fraser left for Welwyn, Sask, on Tuesday morning.

Wakes the ladies from the West to get Sunny Jim out early in the morning.

GLAMIS

The annual thank offering of the Women's Mission Circle of the Baptist church was held on Friday. Rev Mr Buckkurrough, of Port Elgin, gave the address of the evening. Revs Reith and De Mille were also present and spoke along the line of missions. Music was furnished by different members of the congregation. Considering the weather there were a good number out.

Miss Dewar, of Kincardine, Sundayed with her friend, Miss Flossie McLennan.

Mrs Henry Purdy, who spent the last two months in Toronto, has returned to her home.

Miss L Cunningham went to Stratford on Thursday of last week to attend the Library Institute.

John H MacIntyre and his father John C McIntyre spent Saturday with friends on the 4th of Bruce.

Miss Alexia Fraser, who has spent all her life in this community, left on Monday for the west, this time to stay, as she expects to enter the matrimonial state when she arrives in Winnipeg. All her friends here wish her every success and happiness.

Mrs McDermid received official word from Ottawa that her son Dan was wounded again. This is the second time. No particulars have been received to date.

The marriage of Mr Sandy Carr and Miss Sawyer took place last week at her home on the 10th of Greenock.

The Women's Missionary Society of St Paul's church held a thank offering meeting on Tuesday of last week. Rev Mr Mason, of Harriston, gave an address. Music was furnished by the choir. Lunch was served in the basement of the church.

J H MacIntyre and his sister M A spent Sunday afternoon on the 2nd of Bruce at the home of Alex Kippen.

Miss Margaret Campbell, of Harriston, spent a night at her home here.

(Intended for last week)

Mrs Woodstock has gone to spend the winter with her friends, the Pearsons, in Kincardine Township.

Rev Mr Ecker is going to assist Rev Mr DeMille in special meetings in the Free Methodist church.

Pte Clyde McKeeman returned to London after spending a few days at his home here.

Mr Atkins, of Toronto, who spent some time at Mr Graham's, has returned to his home.

Mr J H MacIntyre of Edmonton, is visiting his parents Mr and Mrs J C MacIntyre.

Mrs Reith and Louise have returned from Toronto, where they spent some time with friends.

Miss Emma Howson left on Saturday to visit friends in Clifford and Toronto.

PINKERTON

Mrs Albert Pinkerton is visiting her sister, Mrs (Rev.) Walker, in Owen Sound.

The lecture and limelight views given here by Rev Mr Hilts of Chesley on Friday evening in aid of the Red Cross was very well attended considering the disagreeable weather, and the sum of $19.30 was realized.

Miss Myrtle Garland spent Sunday with friends in Paisley.

The Pinkerton Red Cross shipped to the head office in Toronto the following articles: 88 pillow covers, 47 surgical shirts, 152 handkerchiefs and 2 washcloths, 10 suits pyjamas, 31 pairs socks, 3 pillows, 2 old blankets, 2 old sheets for hospital use, 2 quilts. These articles were all made since August 18th.

WALKERTON

The race for the Surrogate Office here rendered vacant by the death of Mr Matthew Coets, has closed with Dr Clapp of Mildmay landing the plum. The announcement of his appointment will occasion general satisfaction throughout South Bruce, where he has long been a prominent figure both in political and professional life. The office, as before said, is one of the best in the Court House Square and includes the Surrogate Court Clerkship, Registrar of the High Court, and the Clerk of the County Court, the triple position being enhanced with a yearly remuneration of something over $3,000. That the Dr will "make good" in his new appointment is the belief of his many friends.

Now that the heirs to the famous $200,000,000 Baker Estate in Philadelphia are growing to such proportions in Toronto that over two hundred of them gathered in the city court room on Tuesday, and some of whom grew so clamorous for the cash they had to be put under arrest, it is interesting to know that while Walkerton hasn't so many claimants to the fund, yet what we have got here were probably nearer and dearer to the deceased millionaire than the whole crowd of city "heirs," who are reaching so strenuously for his cash. Mrs A H Stephens, an aged resident of Walkerton, claims the dead capitalist is none other than her only bachelor brother. Prior to her marriage she was known as Miss Caroline Baker, and as a child romped around with her brother, Jake, on the old American homestead. Mrs Atchison, mother of Mrs A W Robb, formerly of Walkerton, was another sister and she, too, played with Jacob on the Yankee farm. The family grew up and separated and Jake went off to the civil war. He returned and bought the farm on which a wealthy part of Philadelphia is now built. Dying intestate, he left many hundreds of millions to be divided among the heirs if they could be found. Through Mr Sam McKay, a former Walkerton lawyer, the claims of the two Walkerton sisters were strongly pressed some twelve years ago, and we are informed that word was then received that they had put in the best bid for the cash that had been received. Mrs Daniel Kramp of town also claims to be a distant relative of the deceased, and although none of the Walkerton claimants have yet handled any of the coin, still they hope to get in on the golden shower yet.—Herald and Times.

ELORA ROAD NORTH

The Elora Road Red Cross Society is finally organized with Miss Lizzie Armstrong as president and Mrs R McGill as secretary-treasurer.

Messrs Ian Ewing and Neil McArthur, jr, were in Walkerton on jury duty last week.

We are sorry to hear that Mrs David Bryce is suffering with sciatica.

Messrs Duncan McNeill and Isaac Beech are back from the West.

Mr Arch Bryce bought a bunch of young cattle from Mr D Porter of Saugeen.

Mr Jas Bryce of Paisley has been cutting wood on his brother's farm at Dunblane.

Mrs Clarence Fraser has received the sad news of the death of her brother, Alex Campbell, at Nanton, Alta.

"I HAD ALMOST GIVEN UP."

Sarnia, Ont.—"About 27 years ago I was taken very bad, my blood, too, was in bad shape. I got so I had to go to bed and I was there for over three months. I could not eat and suffered untold agony. I had three of the best doctors I could get but it just seemed nothing was going to help me. I had almost given up. I thought I would never be any better and was willing to give up and die rather than suffer as I was. A neighbor of mine told me of Dr. Pierre's wonderful remedies and I decided to use them. My husband bought me six bottles of 'Favorite Prescription.' I had not taken it long until I felt better. In less than six weeks I was out of bed, and in less than six months I was cured and have been well ever since. Do all my own work. I have raised three daughters, two are married and have children. They have used it and they are healthy, so are their children. I am sure it was all on account of my having been use the medicine.

"I keep all of Dr. Pierre's medicines in the house. Have 'Favorite Prescription,' 'Golden Medical Discovery' and 'Smart-Weed'—anything prepared by Dr. Pierce is good. I also have a copy of the People's Common Sense Medical Adviser, which I have had 28 years; it has been very valuable to me."—Mrs. J. War, 232 Ontario St., Sarnia, Ont.

If you are a sufferer, if your daughter, mother, sister need help, get Dr. Pierce's Favorite Prescription in liquid or tablet form from any medicine dealer to-day. Then address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., and get confidential medical advice entirely free.

A most valuable book in any home is Dr. Pierce's Common Sense Medical Adviser. A splendid 1008-page volume, with engravings and colored plates. A copy will be sent to anyone sending fifty cents in stamps, to pay the cost of wrapping and mailing *only*, to Dr. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets are the original little Liver pills, first put up nearly 50 years ago.

Auction Sale of Cattle and Pigs

R. C. PEARCE, Auct.

Estray Cattle

CAME on the premises of the undersigned, Lot 31, Con. 8, Bruce Tp., about the 15th, the head of one cattle. The owner is requested to prove property, pay expenses and remove the animals. PAUL HUGG, Paisley P.O., R.R. No. 2.

CANTIRE

Cantire forms the great divide between the towns of Paisley and Chesley, and loyal hearts from these two places joined with those of this community to do their bit to swell the funds for the Red Cross at the box social given in the school here on Friday evening last. The weather was disagreeable, but the crowd was large enough to be comfortable. The chair was occupied by Mr. W. McDonald, M.P.P., in his usual able manner. The programme was above the average. The choruses by the school children were much enjoyed and showed the pains taken by our popular teacher, Miss Keith. The quartette by Paisley boys, a song by Miss McInnes of Paisley, a recitation by Miss Jean Cameron, a double male quartette from Chesley, all pleased the audience. Four dialogues by the young people of the neighborhood were exceptionally well given. Instrumental music by Reid Bros. interspersed the programme. Auctioneer Pearce then got busy and disposed of the well filled boxes which vied with each other in beauty. The total proceeds amounted to almost $105, which will be divided between the local Red Cross societies of Paisley and Chesley.

SAUGEEN COUNCIL

All the members of Saugeen council were present at their meeting on Nov 4th. Accounts amounting to $830 70 were ordered paid, chiefly gravel and gravel contracts.

A resolution of sympathy with the friends of Wilbur Lyness, lost in action in France, was passed, and a copy ordered sent to Mr and Mrs Lyness, accompanied by cheque for $25 entitlement grant which was overlooked at proper time.

The council agreed to furnish tile for drain across road at Bell's.

Deputy returning officers and poll clerks were appointed as follows: Div No 1, R Webb and W Smith; No 2, Alex Bell and J R Ross; No 3, Alex Lamont and N Glagsich; No 4, A J Lamont and F McRae; No 5, John Scott and A J Rowand.

Council adjourned to meet Dec 13th.

F W ELLIOTT, Clerk

Notice to Creditors

In the matter of the estate of Ella Stark, of the Village of Paisley, in the County of Bruce, spinster, deceased.

NOTICE is hereby given pursuant to Section 56 of chapter 121, R.S.O. 1914, that all persons having claims or demands against the estate of the said Ella Stark, deceased, who died on or about the 16th day of September, A.D. 1916, are required to send by post prepaid, or deliver to the undersigned C. J. Mickle, solicitor for the executors, Chesley, Ontario, on or before the 8th day of December, 1916, their christian and surnames, addresses with full particulars in writing of their claims, and a statement of their accounts and the nature of the securities, if any, held by them, duly verified by statutory declaration.

AND TAKE NOTICE that after the said 8th day of December, A.D. 1916, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice, and the said executors will not be liable for the said assets or any part thereof to any person or to persons of whose claim notice shall not have been received by them at the time of such distribution.

Dated the 8th day of November, A.D. 1916.

Cows for Sale

A Ayrshire or a Jersey, both pedigreed, young, giving milk and each in calf to her kind. J. C. GIBSON.

—The Lomond, Alta., Press says that on Hallowe'en "all the ghosts and goblins this side of Bruce county were let loose in Lomond. Everything about town that was movable was carried onto the front street and deposited in doorways, on the sidewalks, etc. On Wednesday morning main street presented the appearance of a circus day. Happy to report, no damage was done, but a very busy day for the business men before they could entertain any customers." THE ADVOCATE has some recollection of goblins being abroad in old times about this part of Bruce on Hallowe'en, along the concessions and sideroads inhabited by the Elves and other families when boys were raised in groups. Some of them (the boys, and likely the goblins, also) are now in the Lomond region of Alberta.

A LEX D. McFAUL, ARTIST, 96 Second Ave East, Owen Sound. Portrait painting, photo or life specialty. Soldiers Individual Certificates and hand painted portrait, oils, water colors, water etc. Write for prices. Local agent wanted.

—Everything raised on the farm is an enormous price now and can be turned into cash any time. We have protected your interests in manufactured goods by contracting and taking deliveries long before required, and can supply nearly all your requirements for this winter and next winter at last winter's prices. It is therefore only reasonable to ask payment of all accounts especially those before July last, to be paid in cash before 1st December next. Please attend to this now. Paisley Mercantile Co.

—Adrian Hunt of Palmerston, is visiting at Mr Jas Hay's.

—Pte Chris Parker was home from Stratford over Sunday.

—Printing Invitations is part of THE ADVOCATE'S business.

—Miss J Sutherland, of Guelph, was up visiting her mother, Mrs Saunders, for a few days.

—Mr W Teeple and Mr Roscoe Teeple went to Galt on Friday to attend the funeral of a sister of the former.

—Mr W T Stewart, of Greenock, attended the Library Institute at Stratford, representing the Paisley public library board.

—The deer carcase lying in Ollmer's butcher shop came from Meaford, and was sent to Miss Cesare McDougall by her mother.

—Rev Jos W Stewart, of Drew, was up recently on a few days' visit at the home of his parents, Mr and Mrs W T Stewart, 14th con Greenock.

—Mr Hugh McKerracher is back from Bjelgrow, Sask., where he and his brother, Mr Duncan McKerracher of Walkerton, have been attending to the harvesting and threshing of the crop on their farm lands. The crops were good in that district, but help was scarce.

—Mr W S Mitchell, of Paisley, is now filling a position as night inspector of 3-inch shrapnel shells in a Toronto munition works. He is still a member of Battached Co of the 7th Fusiliers of London, with which he enlisted, and is relieved of military duty only while employed on munitions. Until the war is over, W S says, "I will be either the King's uniform or grind ammunition."

—Anniversary services of the Paisley Baptist church will be conducted by the Rev. W. W. Wylie, Durham, moderator of the Owen Sound Association, next Sunday, Nov. 26th, at 11 a.m. and 7 p.m. Monday, Nov 27th at 8 p.m. the pastor, Rev. M. Neilson, will give his interesting talk on Italy. As the pastor was associated with these people for five years he can speak with knowledge concerning their habits and customs. As this country is one of our allied nations, this talk will be of much interest at the present time. A programme will be provided. Free-will offering. Every body welcome.

—Dr. Hunston arrived home on Friday from New York City, where he had been adding to his professional knowledge by taking some post graduate courses. Being in Gotham at the time of the elections, the Dr was interested in feeling the political pulse of our neighboring nation. In this instance the great metropolitan city failed to register the pulsations accurately, as it favored strongly the man who was left at home in the Presidential contest. The biggest campaign event witnessed was the Hughes pre-election procession, in which 6,000 supporters marched through the streets to the blare of numerous bands. The average American citizen is strongly pro-Ally in sympathy but neutral in action.

Advocate Late

Our bundles of paper for this week's issue are lost in transit, so we are a day late in getting our issue printed.

160th Soldier Killed by Auto

Pte Wesley Haug, of Tiverton, met his death a few days after the 160th arrived in England. He was killed at Bramshott on Nov 10th when run over by a motor truck. The deceased was 23 years of age, and an estimable young man. The remains were buried at Bramshott.

Horses Lost in Well

Strachan Brothers, of the 12th con Bruce, met with a serious loss on Thursday last, when their team of horses broke through the top of a well on the Geo Fullerton farm, 8th con, and went to the bottom. Neither the animals nor the harness can be taken out without considerable repair, as the stone curbing caved in on top of them. It was seemingly a case of getting into a hole and pulling the hole after them. The Strachan boys were moving into the vacant house on the Fullerton farm when the accident happened.

Ellengowan Entertainment

At the box social in Ellengowan school on Tuesday evening of last week the sum of $57 was raised for the Red Cross Fund. The excellent talent of the section provided almost the whole programme. Dialogues, recitations, drills, marches and patriotic chorus were given by the school children, trained by the teacher, Miss Mary Kerr. Little Mary Spong danced the Highland Fling. A recitation was given by Miss Ruth McDougall, a former pupil, now of Elora road north. Messrs J D and Everett Thornburn, J M and W T Hopper rendered vocal quartettes and trios. The chair was occupied by Mr P C Ryan, of Paisley.

THE ADVOCATE will be a most welcome gift to absent ones of your family, whether in Canada or away to the fighting front in France.

Stock Tonics, &c.

A quantity of **Glauber Salts**, while they last, at 10 lbs for 25c.

Elderslie Boy an Artist

The work of Mr Alex W McPaul, the local artist, is well worthy of attention of citizens, says the Owen Sound Sun. He is devoting his attention to portrait painting, and is turning out some excellent pictures of many of the Owen Sound boys at the front.

Collection of Old Paper, Rags, etc., for Red Cross

On Saturday, Nov 25th, at the Gibson store, Paisley, deliver your old papers, magazines, scrap paper, cardboard, rags, rubber, etc. If every house in Paisley and surrounding country will help a large sum can be raised, and it will cost us one a cent. Save every scrap of paper, woollen or cotton rags, rubber, etc, put in separate bundles if possible, but bring them in, anyway, on Saturday next. Some one will be at the Gibson store all day to receive delivery. All will be sold in the highest market and the proceeds given to Red Cross Fund.

Health Regulations re Chicken-pox

While the Health Act does not call for placarding for chickenpox, it does require isolation. Those having the disease should be kept in one compartment and not allowed to mingle with other inmates of the house until they are fully recovered. The time required is 14 days or until free from all scabs. Where this regulation is carried out other children of the household will be allowed to attend school. When, however, the above regulation is not adhered to all children from homes where the disease exists will be debarred from school. The health offices or sanitary inspector should be notified when any house having had the disease to clear, as the Health Act requires the premises to be disinfected. H E GAGE, M O H.

Was Shot Through Head by a Sniper

The following letter from an officer gives particulars of the death of L-Corp Frank S Boyle:

France, 31st Oct, 1916

MR E BOYLE

Dear Sir—It is with great regret that I have to report the death in action of your son, Frank Boyle. I presume you have already received an official intimation but I am sure you would like to receive further particulars. Your son was killed on the morning of Oct 25th in an attack this battalion was making on a corner of the Regina trench on the Somme front. He was shot through the head by a sniper's bullet while awaiting the order to advance, and died instantly. Frank was not very long in my platoon, but from what I saw of him he would certainly have been promoted very soon above the rank of lance-corporal which he provisionally held. I often wondered why he had not received stripes in the battalion he came over with, and have been informed by some of his friends that he did not wish promotion while in England. He was well liked by all the men in the platoon and well thought of by all the officers. He was a brave man and died like a man in the face of the enemy doing his duty. We all extend to you and family our deepest sympathy. Any personal belongings of his will be forwarded to you through the official channels in due course.

Yours faithfully,

J MUNRO, Lieut.

44th Can Inf, B E F

Frank's chum, Pte P L Mara, also wrote, as arranged between them in case anything should happen. "Much to my sorrow," he says, "it came sooner than I expected, and I will carry out his wishes." He states that Frank was loved and respected by all with whom he made acquaintance, and he did his part as nobly as any brave soldier could. He and I were always together, in the trenches and out, and I certainly have lost a good friend. All the boys join in deepest sympathy to you.

Give the "Kiddies" All They Want of

CROWN BRAND CORN SYRUP

It is one of the delicious "good things" that has a real food value.
A slice of your good homemade bread, spread with "Crown Brand", forms a perfectly balanced food, that is practically all nourishment.
So—let them have it on biscuits and pancakes, and on their porridge if they want it.
You'll like it, too, on Griddle Cakes—on Blanc Mange and Baked Apples. And you'll find it the most economical sweetener you can use, for Cakes, Cookies, Gingerbread and Pies.
Have your husband get a tin, the next time he is in town—a 2, 10 or 20 pound tin—or a 3 pound glass jar.

THE CANADA STARCH CO. LIMITED
MONTREAL, CARDINAL, BRANTFORD, PORT WILLIAM.
Makers of "Silver Gloss" Laundry Starch.

Our new recipe book, "Desserts and Candies", will show you how to make a lot of really delicious dishes with "Crown Brand". Write for a copy to our Montreal Office.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XV.—(Cont'd).

"It concerns your man," said Leicester. "I found him eavesdropping near the laurels by the terrace last night."

"No!" exclaimed the captain, with a look of shocked indignation. "The villian! I hope you thrashed him."

"Well," said Leicester, "I am sorry to say that I did strike him. I regret it; though I think it may prove a salutary chastisement."

"The villain," said the captain, with grave displeasure. "I will discharge him this morning! I'll pack him off! Drunk or not, he shall go. I could not have a fellow about me whom I could not implicitly trust."

"Well," said Leicester, "you must do as you think fit; yet I hope you will let the man plead his defence. There are two sides to everything."

The captain shook his head angrily.

"No; he shall go, the rogue," he said, and as he spoke he rose, with a light in his eyes which would have proclaimed to any one who knew him that he had scored a point in his game. "No; he shall go, rest assured. I would not keep him for the world after what you have told me. Are you going on to the Park?"

"No," said Leicester, "if you will make my excuses. Good-morning."

"Good-morning," said the captain, and he shook hands impressively, looking after Leicester's tall, stalwart figure as it passed under the stone archway, with a pleasant smile.

"Oh, yes, he shall go, Mr. Dodson, and all the world shall know that Captain Murpoint discharged his man Jem at the instigation of Mr. Leicester Dodson!"

After breakfast he caught Jem as he was slowly mounting the stairs.

"Go into my room," he whispered.

Jem obeyed, and the captain, following, closed the door.

"Jem," he said, "don't be surprised at anything that happens and remember that I have promised not to throw you over. I am going to discharge you this morning."

Jem started and turned pale.

"Not really, you stupid fellow; only in pretense. Leicester Dodson" at that name Jem scowled "Leicester Dodson has made formal complaint and I cannot do anything else but get rid of you. I shall blackguard you well and pack you off before all the servants. Of course you won't leave the village and equally of course I will continue your salary to enable you to keep there. What you must do is to take a room at the inn—say you are going to enjoy yourself on the savings of your salary."

Half an hour afterward every soul in the village knew that Leicester Dodson had got Mr. Starling discharged from his situation.

CHAPTER XVI.

As usual the captain was in the best of spirits; the homeward journey was as enjoyable for Mrs. Mildmay as the evening which had preceded it.

Violet was asleep, or feigning it, in the corner, so that the captain had Mrs. Mildmay to himself.

"That is an old-fashioned locket," he said, motioning to one, which was suspended by a chain to Mrs. Mildmay's neck.

"Yes," she said, with a sigh; "my brother gave me that when I was a little girl. A very long time ago that, Captain Murpoint!"

"Not very, indeed!" said the captain, with subdued gallantry. "It contains his portrait, I suppose?"

"No. I am sorry to say that it does not. I have no miniature of poor John," she replied, with a sigh. "I would give anything for one painted while he was alive!"

"Would you?" said the captain, with a current of interest. "Then I think I hope you may be nearer obtaining your desire than you imagine."

"Indeed!" said Mrs. Mildmay; "how so, Violet, we have awakened you?"

"No, mamma," said Violet, whose eyes had opened and whose face was pale with earnestness and painful interest.

"Some years ago," said the captain, leaning forward and addressing both ladies, but keeping his eyes upon Violet's face, "my dear friend promised that he would have his portrait painted in water colors so that I might wear it. At that time we were staying at Calcutta. In the market-place there was a wonderful miniature painter he may be there still, in all probability he is—and dear John commissioned him to paint his portrait. He sat for it two or three times, and the man finished it."

"Was it a good—a truthful portrait?" asked Mrs. Mildmay.

"A wonderful portrait," said the captain. "It was John Mildmay, living and breathing in a miniature, so to speak. He gave it to me on my birthday. I kept it, I wore it on my watch chain for years, until we started for our home voyage. Then he took it from me."

"Why did he do that?" asked Violet, in a faint voice.

"It was in a locket," said captain, "in a double locket. The space opposite was empty, and my dear friend took the trinket from me, saying that there should be another portrait in it one fitting to face his. Can you guess whose, my dear madam?"

Mrs. Mildmay glanced at Violet, who had sunk back into her seat.

"Yes," said the captain, expressing a deep tenderness with his voice, "it was her's his dearly loved child's." And he drew out his pocket handkerchief and hid his eyes for a moment. "I gave him the locket reluctantly, I admit; for I was loth to part with it for so long a time, as that required for his voyage home and back again. But I gave it to him, for I was anxious to possess the other portrait, that I might have the face my dear friend loved better than his life next his own."

He paused and sighed deeply.

"From the first moment of my parting with the locket I have regretted it."

"Regretted it—why?" asked Mrs. Mildmay, in a low voice.

"Because, my dear madam, I never saw it again."

Violet's hands clasped tightly, and he went on more quickly:

"No; I see what you dread, but I am not going to harrow your hearts by recalling that great sorrow. No, John returned to me at Madras, and before the first hour had passed I asked him for my treasure. With a look of dismay and a laugh of annoyance he told me that he had forgotten it."

"Forgotten it!" said Mrs. Mildmay, deeply interested.

"Yes, that he had left it at home, at Mildmay Park. I asked him to write for it; but he laughingly assured me that no one could find it."

"Did he not remember where he had put it?" asked Mrs. Mildmay. "For I do hope we shall find it."

"No, he had not forgotten where he had put it, but he assured me that he had placed it where no hand but his could find it."

"And where was that?" asked Mrs. Mildmay.

"In the secret drawer of his writing table," replied the captain, in a low voice.

There was a long pause of deep silence.

He had placed it there,' continued the captain, sinking back and looking at Violet with half-closed eyes, "he had placed it there on the day of his arrival in England, and was so taken up with one thing and the other that he had forgotten it. He promised me that he would, on his next visit to England, have the portrait of Violet painted and bring the locket out to me. But man proposes and Providence disposes. Heaven willed it that he should never see England again."

Violet's hands clasped, and her face grew deadly white.

Oh! how she longed for the miniature.

Captain Murpoint had never hit upon a more brilliant device for gaining his end than that which he determined upon as the lever by which his plot should be raised.

"He never reached England, and I never saw him or the locket again," he resumed, in a low voice. "He, my best, my dearest friend, lies at the bottom of the sea, and his portrait is buried in the secret drawer of the old bureau."

"Hush!" said Mrs. Mildmay, as a low, suppressed cry of agony came from Violet's corner.

"You say it is all like my father?" she said, "and that he placed it there?"

The captain inclined his head.

"Then then," she breathed, painfully, "the room must be opened. I said," she added, with a shudder, "that it never should be! But if the portrait—his portrait—is there, it must be, for I must have it! I must have it!"

"It is an old bureau," said the captain. "For he assured me that his own hands placed it there. But wait until you are stronger."

"No," said Violet, "I am strong enough. I must have it at once—to-morrow!"

* * *

Jem Starling had been commanded to refrain from strong drink and to remain sober, and he had kept sober up to the day upon which the captain, with a slight lapse from his usual foresight, discharged him.

On that day he had aired his grievance among the fishermen, who sympathized with him, and, of course, had aired it in the public house.

There were plenty to stand treat, and Jem had drunk heavily.

At ten o'clock he emerged from the "Blue Lion," leaning upon Willie Sanderson's arm—or rather, supported by it—in that state which might be described as desperately intoxicated.

A small crowd of fishermen were round him, and they were all more or less hilarious or excited.

"Hold up!" said Willie to Jem, who was staggering about upon the big young fisherman's arm. "Hold up!"

"Here," said one of the others, the carrier, old Nat, coming forward, "I'll give you a hand with him. We'll take him down to my cottage and let him sleep there to-night. He's had a rare skinful."

Then he turned to the others and said:

"Willie and me 'ull take care of this chap. You get home quickly. There's work to do to-morrow, you know," he added, significantly.

The boys returned a hearty "Ay, ay," and, after an exchange of mutual and noisy adieus, turned down to their cottages by the beach.

Nat and Willie went straight on down the village street, at the end of which, and a little retired from the road Nat's cottage lay.

As they passed down the street, with Jem rolling and shouting and singing between them, he saw a gentleman in the starlight, coming along the slope toward them.

It was Leicester, who, disgusted and dissatisfied, had turned out for a walk. He saw the group of three, and was about to pass on without recognizing them, but Willie's figure, stalwart and huge, was too well known to pass unrecognized, and Leicester, with his usual kindness, said, gravely:

"Good night, Willie! Good-night."

This was just what the two men dreaded. At the sound of the voice which he hated as well all the drunken man started and threw up his head.

"Who's that?" he snarled, hoarsely, staring before him with thick and bloodshot eyes. "Who's that? That's his voice, I'll swear."

"Come on," said Nat, giving him an angry jerk, "come on and don't make a fool of yourself. That's not—"

"I shan't," said Jem, with an oath. "I will stop and have it out with him. I'm a dog, I am, but a dog can look at a king ah, and bite, too. D'you hear that?" he shouted out to Leicester, who had walked on with the greatest indifference. That same indifference seemed to madden the miserable Jem, and, by a sudden jerk, whose very unexpectedness gave it greater force, he wrenched himself away from his keepers and sprang into the path after Leicester.

(To be continued).

Conservation of Manure.

While manure is only a by product on the farm, it is the farmers' greatest asset in the maintenance of soil fertility. That it is not properly valued and given the care that is deserved is strikingly shown by the results of the Agricultural Survey of the Commission of Conservation in 1915. Seventy-seven per cent of the 400 farmers visited in Ontario were exercising no care to prevent waste of manure, twenty-two per cent claimed to be exercising some care, while less than one per cent claimed to be exercising really thorough care of the manure. Only one and one half per cent were saving all the liquid manure, which contains more actual plant food than the solid excrement. The annual loss amounts to millions of dollars and it can be readily seen that our system of farming is not on a sound basis if this waste is allowed to continue. Any farmer who knows these facts, but takes no steps to prevent the waste, commits an injustice against himself and his country, and, in preparing to leave to succeeding generations a heritage of poverty.

This loss can be prevented in several ways. Now, at the beginning of the stabling season, prepare a supply of litter to absorb the liquid manure. As the straw crop is short this year, it is advisable to store a quantity of leaves, dry rush or saw dust for this purpose. Where circumstances permit, it is a good plan to draw the manure to the field as made. If it has to be piled see that it is piled so as to prevent heating and leaching. Mix the cow manure and horse manure together and keep the pile compacted and level on top. A concrete floor in the barn yard is a paying investment, although it may seem expensive. Have tight floors in the stable to prevent loss of the liquid, and, if there is not enough litter to absorb it, drain it off into a cement pit or some kind of a receptacle from which it can be used easily taken and spread upon the land. Don't waste it.—F. C. S. in Conservation.

enjoy, in your own home, as smooth, clean and comfortable a shave as the city man, or as anyone else in this broad Dominion? Why shouldn't you own and use the keenest, speediest, most convenient shaving tool in the world—the

Gillette Safety Razor

The thin Gillette Blades, electrically hardened, honed with diamond dust, stropped in wonderful automatic machines, *carry an edge whose uniform, lasting keenness has never been matched.* The curved Gillette head holds them rigid—guarded—adjustable by a turn of the handle for a light or close shave.

With the Gillette there's no need for honing, stropping, or careful working round the chin or angle of the jaw! There are no preliminaries—*the razor is ready for business*—you just pick it up and shave, with the easy angle stroke, in five minutes or less.

The Gillette "Bulldog", "Aristocrat" and Standard Sets cost $5—Pocket Editions $5 and $6—Combination Sets $6.50 up. At Hardware, Drug, Men's Wear and Jewelry stores. 220

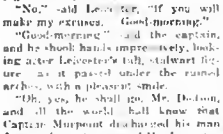
Suicide Decrease.

The number of suicides in the city of Paris has decreased 15 or 20 a week since the war began. It has been suggested that this disease is due to curiosity, every one being so anxious to see what the outcome of the war will be that they refrain from taking their own lives, hoping for a French victory.

— GOOD DIGESTION —
When your digestion is feeble, weakness and pain are certain and disease is invited.



Mother Seigel's Syrup corrects and stimulates the digestive organs, and banishes the many ailments which arise from indigestion.

About the House

Useful Hints and General Information for the Busy Housewife

Meat Dishes.

Little "Turkeys."—Split pork tenderloins lengthwise, but do not quite separate them. Fill them with a good bread dressing, seasoned to taste; fasten the sides together with sharp toothpicks, then bake the "turkeys" for twenty-five minutes in a pan in which there is enough water to cover the bottom. Serve them with a gravy made from the liquor left in the pan.

Smothered Sausages.—You may use either fresh or cured sausages. If you use the cured ones, remember to prick them before you place them in the pan. If you use fresh sausage meat, mould it into small, flat cakes and place them in the bottom of a greased baking pan. Add a layer of seasoned mashed potatoes. Then cover all with two well-beaten eggs, dash with fine bread or cracker crumbs, and bake the dish in a moderate oven for half an hour.

Jugged Rabbit.—Wash and dismember the rabbit, then wipe each piece dry. Into a stone baking dish slice one large onion, and add half a teaspoonful of salt, a sprinkling of black pepper and a little Cayenne. Put the rabbit into the dish, add two tablespoonfuls of cider vinegar, and cover the meat with small pieces of bacon. Now pour over it enough hot water to cover it well, cover the dish, and let it remain in a slow oven. When you are ready to serve the rabbit, pile it in the centre of a deep platter, thicken the gravy and pour it round the meat.

Beef Rolls.—Cut a thin slice of round steak into six strips, lay each piece on the meat board and cover it with a strip of thinly sliced bacon. Add a seasoning of salt, pepper and sweet herbs or onion juice. Roll up each strip and tie it securely; then dredge it in flour. Put a teaspoonful of butter in the frying pan and when it is very hot lay the rolls in it. Fry them until they are brown, then add three quarters of a glass of hot water. Cover the pan and cook the meat slowly until the beef is very tender. Serve the strips hot with the gravy poured over them.

Baked Calves' Hearts.—Wash the hearts thoroughly inside and out, then fill the cavities with a dressing made of stale bread crumbs, melted butter and hot water, seasoned with salt and pepper. When you have filled the cavities fasten the openings with thread. Dust the hearts with salt and pepper, and arrange them in a baking dish, in which there is a cupful of hot water. Sprinkle over the surface of the water one cupful of minced celery and green pepper. Cover the hearts and bake them slowly, basting them frequently with the water. The flavor is added by the celery and green pepper is delicious.

Capon of Pork.—Have a prime leg of young pork boned. Fill the cavity with equal parts of finely chopped apple and celery, then sew it up and tie it carefully. Plunge it into well-salted boiling water. Add the outer stalks and leaves of a head of celery, two bay leaves, and one cupful of cider vinegar. Let the meat boil gradually until the skin begins to crack, then remove it from the water, peel off the skin and press into the fat two dozen whole peppercorns. Cover all the fat and lean part of the meat with a paste made by mixing together one cupful of flour, two thirds of a cupful of brown sugar, four tablespoonfuls of evaporated horseradish, and sufficient cider vinegar to make the mixture stiff. Then place the meat in a rather slow oven, fat side up, and bake it until paste and fat are browned through. Serve it either hot or cold.

Unusual Potato Recipes.

You may feel altogether like having potatoes at two meals out of three during these days of sharpened appetite, but, of course, you don't want them served in the same way. No, not even the homely changes of boiled, baked, mashed or fried are sufficient if you eat potatoes often enough. There is no reason why you should not have the wholesome, substantial tuber regularly and frequently. When ordinary serving of potatoes begins to pall, try some of these recipes:

Cheese Potatoes.—Scrub the potatoes and cut them in half. Spread each half with a little butter, sprinkle with pepper and salt and place a slice of cheese on top. Put on a slightly greased pan and bake in a hot oven until soft and nicely browned.

Stuffed Cream Potatoes.—Make a potato case by peeling and slightly hollowing out some potatoes of even size. Boil them in salted water until tender, when they can be drained and stuffed. Fill either with hot buttered peas, beans, chopped anchovies or forcemeat, as desired. Then pour over a dressing consisting of hot cream seasoned with salt, pepper and a dash of paprika.

Potato Dressing.—One cupful of tomatoes, one-half cupful of shredded pimentos, one-half cupful of mushrooms, two tablespoonfuls of chopped onions, two tablespoonfuls of flour, two tablespoonfuls of butter, salt, pepper, paprika. Boil tomatoes, mushrooms, pimento and onion together, then add seasoning and thicken with the flour and butter rubbed to a cream. Stir until smooth.

Sweet Potato Soup.—Two cupfuls of milk, two cupfuls of stock, one mashed sweet potato, one tablespoonful of flour, one-half tablespoonful of butter, one-half teaspoonful of onion juice, one-half teaspoonful of salt, one-half teaspoonful of pepper, one small stick of cinnamon. Mix butter and flour in double boiler, add milk, stock and seasoning and stir over fire until it thickens. Then add sweet potato. Strain into soup dishes and serve with a sprinkling of parsley and a dash of nutmeg.

Household Hints.

Cakes without butter require a quick oven.

Medicine stains can be removed from linen with strong ammonia.

Never move a cake in the oven until the centre is thoroughly set.

Ginger cookies are improved if mixed with coffee instead of water.

French-fried potatoes dipped in cornmeal before frying are excellent.

To make perfect tea, remember—good tea, boiling water and a hot teapot.

When mixing a cake, never beat the butter, sugar or eggs in a tin basin.

A bit of vaseline will remove mildew or stains from any kinds of leather.

Toothbrushes should be dried in the open air and the sun should shine on them.

A pinch of salt in the whites of eggs will make them beat much more quickly.

The important point about making good coffee is to use the water at the first boil.

Milk will not boil over if the sauce pan is buttered on the upper part and edge.

Cane chairs can be cleaned by sponging them until soaked with soap and hot water.

White paint is best cleaned with a cloth squeezed out in hot water and dipped in a little bran.

Iron garments which have buttons by laying them face down on a thickly folded sheet or Turkish towel.

To make a faded dress white, boil it in two gallons of water in which a half-cupful of tartar is dissolved.

Apples, cored and filled with chopped dates or figs, then baked, make an excellent breakfast dish.

When washing real lace, let the final rinsing be in skim milk, if you would give it a soft, creamy tone.

Always butter the saucepan macaroni is to be cooked in. This will prevent it sticking and burning.

Do not use the best cuts of meat for stews and hashes. Shin of beef and neck of mutton are the best for these.

It helps greatly on ironing day to have two or three sizes of irons, including a tiny one to get into the gathers.

When making tea the quality of the tea will be improved if the tea pot is rinsed with hot water just before using.

When using stale bread for stuffings or puddings, always soak it in cold water, not hot, and squeeze it dry as possible.

When putting the paper or oilcloth on pantry shelves, use thumb tacks instead of the ordinary tacks and you will make a better job of your work.

Half a pound each of soft soap, sand and whitening, simmered gently in a pint of water for half an hour and kept in a jar, is handy for scrubbing boards and pans.

Rusty flatirons can be cleaned by covering the rusty parts with sweet oil and powdered quick-lime and allowing them to stand a few days, then washing them with hot water and plenty of sal soda.

Remember, reducing the meat bill doesn't mean eliminating meat entirely from your bill of fare, but rather using wisely a little in combination with less expensive foods and making it go a long way.

While eggs are so dear and the cheaper ones so unreliable, a butter may be used for all frying purposes. Mix flour and milk smoothly to the consistency of very thick cream, season with a little salt and pepper, then coat whatever is to be fried with this, and then with breadcrumbs. Fish should always be dried thoroughly in a cloth before cooking, either with egg or batter, and a little flour dusted on before the batter is applied will cause it to adhere better.

Getting Their Goat.

The useful but pugnacious goat could be bought in Germany before the war for a sum varying between 20 and 25 marks ($4.75 and $5.95). Now would-be purchasers have to part with 200 marks ($47.60) before they can obtain their favorite article of diet. In this connection a Berlin newspaper cites the case of a person who advertised that he had a goat for sale on war terms. The next day he received 46 postal orders for 200 marks, but when the "lambs" called at his house they found neither goat nor vendor.

A loss of dollars sometimes brings the spendthrift to his senses.

McDONALD IS NOW MAJOR "FOGHORN"

CANADIAN PRIVATE AT 53 WINS PROMOTION.

One of the Big Human Personalities of War Turns Up in London.

"Foghorn" McDonald admits he's as "Scotch as oatmeal," but what he doesn't have to admit is that he is beyond doubt the best known man in the wonderful army Canada has sent over to fight for the mother country, writes an Associated Press correspondent from London. The rawest rookie in the rearmost ranks of the Dominion forces proclaims it on the fighting line and looks up to this world wandering scion of the clan McDonald as a shining example of what a lowly "buck" can do in trying times like these.

For "Foghorn" came over as a private himself just two short years ago. Some of his home folks told him he was a "darned old fool" to enlist at 53, but "Foghorn" had been a miner all his days. He had hit the Western trail from sun-baked Batopilas in the wilds of Mexico to the snow shrouded valleys of the Yukon, and he knew what perseverance and pluck and courage and sacrifice could do.

He knew he would "make the grade," and so did a great crowd of his friends who gathered a day or two ago to "wet" that new third stripe and crown on the cuffs of his khaki army jacket. He was back from the front to receive this latest promotion, and he was toasted a major of his Mal[illegible] Force.

Voice Is a Low Rumble.

"Foghorn" was born Neil Roderick McDonald, but there are comparatively few who know him by that distinguished name. It's just plain "Foghorn" nowadays from one end of the trenches to the other, and one earful of that low rumbling, window shattering, rock shivering voice explodes all possible doubt, as to the derivation of the nickname.

There are plenty of Germans who know "Foghorn," too. In the days of the deadlock, when trenches crept closer and closer together, he was one of those who burrowed beneath the earth and set off great mines under the enemy. He had not been a mining engineer in vain. Often his voice would go booming across "No Man's Land" hurling picturesque invectives at the Germans.

"Not to know "Foghorn" McDonald is to miss one of the big human personalities of this war. It is not difficult to realize what a tower of encouragement and strength he is to the soldiers at the front.

"He is the sort of officer whose men would follow him to the gates of hell itself and walk in laughing," declared Major "Eddie" Holland, a long-time friend and a "V.C." of the South African war.

"And speaking of hell," he added, "there may or may not be something in the fact that Foghorn belongs to the Black Devils."

That is the name the Germans have given the Eighth Battalion, Canadian infantry, and the battalion has adopted as its insignia a small black imp dancing in glee. They were delighted with the appellation and are living up to it according to all reports from the Somme.

He's Not Afraid of Any Man.

It has been said of Foghorn that he's not afraid of any man—and very few women." His home is in the great American West. He has lived much in the United States and almost every province in Canada can claim him as her own. His heart is as big as the world in which he has lived, and he has a way of calling a superior officer "Bill" or "Jim" or "George" and referring to a corporal as a "brother officer" that is quite baffling to the Englishman's idea of discipline. Some one spoke to "Fog" about it.

"Well, sir," he explained, "it's a man's war, sir, and I respect every mother's son who's out there doing his bit. I was a full fledged 'buck' myself once, and I know what they have to go through."

"Foghorn" has been serving for some time as transport officer of the "Black Devils" and has been riding about the front lines on what he describes himself as "a mighty fine boss." Where he got the horse he will not tell you. "It wouldn't be passed by the censor," he says.

A good transport officer tries to keep his losses at a minimum and to make the deficiencies good as quickly as he can. "Foghorn" had his men in the Black Devils trained to the minute in that respect.

"One night," he said, "we were taking some loads of ammunition away up in front. It was blacker than the ace of spades and if you struck a match you'd get your eye shot out. But in the midst of this blackness and the shelling we were getting, I heard one of my men say to his partner: 'Keep your eye out for a good boss, Bill; this ought to be a good night to get one.'"

Served in Spanish War.

"Foghorn" served for a time as an officer in the United States army—the Third Volunteer Cavalry of the Spanish war.

"I think the officer commanding our regiment had fifteen or twenty million dollars," said "Foghorn"; "I had $1.15 myself."

A day or two ago a staff Colonel, fresh from Canada, walked into the Savoy "Club."

"Hello, Foghorn," he called out; "I heard you a couple of blocks down the street and came in to see you. Do you remember me?"

"Remember you?" repeated "Fog," "why bless your brass-hatted old soul, I'd know your hide in a tan yard."

A "brass hat" is the army name for all staff officers, and it comes, of course, from the abundance of gold braid they wear on their caps.

Some one asked how things were going at the front.

"Going?" said "Fog," "why the boys are getting so gay out there one of our battalions came parading up to the front line trenches the other day with a brass band playing for all it was worth. They were right where you could get killed any minute, too, and even my old hoss thought they were crazy.

"Guess I'll be getting back to the front soon myself," he concluded with a sigh; "this quiet life of London is getting on my nerves."

Appealed to Her Weakness.

Jack—So at first Miss Bargira refused you. How did you manage to win her?

Tom—I told her I knew of a minister who would perform the ceremony for $4.98.

Devotion.

Alice—Why are you taking up botany?

Kitty—Because my fiance is interested in a plant of some kind and I want to be able to converse intelligently with him about his business.

A man who trusts no one doesn't know what real disappointment is.

The Recruits—From the Sergeant-Major's Point of View.
—London Bystander.

THE FASHIONS

It is especially true this autumn that variety is one of the greatest charms of the styles. Although those who have been looking for revolutionary changes in the fashions have, no doubt, been disappointed, they will certainly admit that the diversity in the present styles more than makes up for the absence of anything that might be called radically different. Fresh interest is always being aroused by the clever variations of the present straight, full silhouette that meets the eye at every turn.

Although the general rule is full, straight-hanging skirts, there are dozens and dozens of skirts of this type which differ widely one from the other. One of the most noticeable features which accounts for some of the differences is the uneven hem advocated by many of the Parisian houses. In some skirts the effect is obtained by a gradual lengthening at the back. In others, panels at the front and back or at the sides hang several inches below the hem of the skirt. When fur is used to edge skirts of this type, it may be placed at the edges of the panels or the sides of the skirt, but not all around; and this is another means of varying the placing of fur banding of skirts. Some of the French designers who lay particular stress on the uneven hem are Callot, Bullot, Agnes and Beer.

Not only skirts but coats, too, are marked by the uneven hem. Not a few droop at the sides, while the front and back are even, and some coats with full, rippling peplums are a good deal longer in the back than in the front.

Another theme which has had no end of variations is that of the pocket. Through the long life of the pocket, it has been truly amazing to watch the resources of the designers, who have never lacked in bringing out something novel in this direction. And, still, new treatments are seen every day, for large and small pockets are still the vogue on garments of every kind and for very occasion, from the simple, tailored waists and skirts to the most dressy frocks and suits.

In afternoon frocks, a most charming effect is the soft side drapery on skirts, falling like a cascade. This style is exceedingly graceful in soft satins, silks, chiffon velvets and even

7431-7441

Afternoon Dress of Satin with Draped Shirt

in the pliant serges and other soft woolens. The dress shown here illustrates this pretty mode. It is fashioned of soft satin with a collar of fur cloth and a bandine of fur around the edge of the skirt. The waist is in jumper effect outlined with braid, and there are extensions at the sides which end in little pockets.

Flat braid is one of the new dress trimmings, and the lacquered braid is one of the prettiest novelties in this line. It has a dull polished finish.

Some New Sleeves

There are several new fashions in sleeves, and among them the most striking are those that are quite full at the elbow and fit snugly below it. The leg-o'-mutton is being brought forward again, and sleeves with cop cuffs are very popular. Quite a novel idea in sleeves was noticed in a blue serge dress trimmed with muskrat fur at the collar, hem and pockets. It had tight-fitting sleeves, the upper part of which was of fur and the deep cuff of blue serge.

There are few coats without pockets. All are very snug and comfortable, especially the all-enveloping top coats buttoned to the neck and covering the entire dress. The coat in the illustration is of heavy velours with large bone buttons and very large gathered pockets. Few women will be satisfied without one of these practical coats, which may be used in all kinds of weather.

Children's Fashions

Children are not neglected, by any means, by those who set the models. A great deal of attention is given to these clothes, which to a certain degree follow the fashions of their elders.

The Russian blouse style is frequently employed for youngsters, both for school and afternoon frocks. Both plump and slender girls can wear this style becomingly.

To vary the long coat, which is always an essential item of the girl's wardrobe, smart little coat suits are now being worn as well. For dressy wear these are of velvet, wool velours and duvetyn, and for general use they are of serge, gabardine, checks and mixtures.

Embroidery in colored silks, wools and beads is as popular for young

7467

A Heavy Coat For All Kinds of Weather

girls as for women. They also have as wide a choice in dress materials and colors. Green, dark brown, deep red, and blues, of all shades, are used for their coats and frocks.

These patterns may be obtained from your Local McCall Dealer or from the McCall Company 70 Bond Street, Toronto, Ontario. "Dept. W."

KRUPP'S NEW SCHEME.

Plan to Make Germany the First Shipping Power.

Mr. C. W. Brett, managing director of Barimar, Ltd., scientific welding engineers, writes as follows in the London Chronicle:

Germany's intention to obtain an initial advantage in the fight for the world's trade is plainly seen in the social and economic reconstruction that has been proceeding throughout the Fatherland side by side with the country's gigantic efforts on all the war fronts. In nothing is this idea of Germany more plainly seen than in the latest scheme announced, by which the great armoring firm of Krupp, with its scores of thousands of mechanics, is to be linked up with the North German Lloyd Steamship lines. The Essen firm has now purchased an interest in the steamship company, and one of its directors is to have a seat on the board.

This adroit move is not a mere private commercial transaction. It has a much wider significance of which we, in this country, should take due note. While Teuton submarines have been busily engaged sending to the bottom as many British ships as possible, existing German craft have been safely interned in home or neutral ports. Meanwhile German shipbuilders have been steadily building new vessels for the mercantile marine, some of them of 20,000 tonnage.

It is Germany's ambition to emerge from the war, even if beaten, as the first shipping power in the world, and the new link forged between Essen works and Bremen ships is another move in a well-matured plan to realize this aim.

FATHER OF 10 OUT OF NAMES.

Mayor Refuses to Let Him Christen Baby "Verdun Salonica."

Children's names in France can only be chosen from the calendar (which contains all the saints) and from ancient history, except by special permission to be obtained from the State Attorney.

At Nice the Guardian of the cemetery wished to registrar his latest child, a son, as "Verdun Salonica," but the Mayor refused to accept such a name, as being contrary to the law. The father urged patriotic grounds and was able to plead he had fifteen children to name, ten being still alive, and so names were somewhat exhausted in the family.

The Mayor was obdurate and the father determined. He took the case to the Procureur of the Republic (the Public Prosecutor) and obtained a decision in his favor.

There are a thousand good talkers in the world to each good thinker. How happy we might be if the order was reversed.

The Paisley Advocate

PAISLEY, NOV. 22nd, 1916

—That all pensions be paid, irrespective of rank, officers and men to receive the same, is the recommendation passed at the Eastern Ontario Liberal conference held at Ottawa on Friday last. THE ADVOCATE would like to see not only the Liberal party, but the Conservative party also adopt such a line of policy in regard to pensions. This Dominion must treat this question of pension for soldiers and their dependents with a liberality that will be commensurate with the sacrifices made when men go out and lose their lives or earning capacity while fighting for us. And an officer's life or an officer's family should not be considered any more than that of the man who fought in the ranks.

—Many men who enlisted for overseas service and were, after months of training, found unfit for actual warfare, have not been allowed to resume their former occupations, but transferred to branches of the home service. The wives and families of these men have been denied the relief and assistance given by the various patriotic funds. Many of the men are still away from home and might as well be overseas, so far as their families are concerned. Their rate of pay is not more than the overseas man, so is not sufficient to support a wife and family. It does not seem right that the allowance from Patriotic Fund should be cut off in the case of men who enlisted with the intention of going overseas.

—The patriotic ratepayers of Greenock are confronted with an exasperating situation in their endeavor to get through a municipal grant for the Red Cross Fund. At a meeting of ratepayers held at Chepstow on Oct. 24, attended by a very fair representation of the best citizens of the township, a resolution was passed that the council should be asked to make a special levy of one mill on the dollar for Red Cross, instead of going to the trouble of organizing and carrying out a house-to-house canvass for subscriptions. This resolution was submitted to the council meeting on Monday of last week, and, considering the weight of sentiment behind the document, the outcome was most disappointing. The council actually passed it over without doing anything. At the ratepayers' meeting referred to, Reeve Phelan and Councillors Campbell and Sawyer were present, none of them voicing any opposition to the resolution, which was carried by the unanimous standing vote of the meeting, and declared so by the chairman, Senator Donnelly. If any or all of this trio of municipal men were opposed to the action of the meeting, why did they not dissent then and there? And if they were in accord with the resolution why did they not manifest their attitude by presenting a motion before the Council and recording their votes for it? Even if, after quietly counting noses, it was found impossible to carry the motion for a grant, the motion should have been tabled, anyway. It looks like a deliberate insult to the ratepayers' meeting to ignore their resolution in this manner. This was an occasion calling for action of some kind on the part of the Council, unless they are utterly indifferent as to how their state of inactivity may appear in the eyes of Red Cross sympathizers. Had the men of Belgium lain down like this before the advance of the German army in August, 1914, and France done likewise, what position would Britain and Canada be in now or a few years hence? Quite probably under the yoke of Prussian militarism and slavery, as parts of Belgium and Poland are to-day, for had the Belgians and French been disposed of at the outset, the Kaiser's enormous war machine would be irresistible to a smaller alliance of nations than is now slowly demoli-hing it. Not all the fighting for the cause of freedom must be done in Europe. The proper sentiments must be asserted at times right here in Canada to keep us in possession of what civil rights have been won for us. With so many Canadian soldiers in need of Red Cross assistance, it is absolutely unpatriotic, downright mean and altogether intolerable that the fertile and wealthy township of Greenock should not be listed as a generous contributor to the Fund at this time. The parsimonious councillors may pose before the ratepayers as careful economists, but that won't down with men who have a spark of loyalty in their constitution. Money for Red Cross now means a saving of lives. This is no time for withholding grants on the plea that it is municipal economy.

WHY SOLDIERS NEED MORE SOCKS

The following letter, received by Robert, son of Mr and Mrs Geo Fullerton, of Paisley, fully explains itself, and also tells why the continued call of more sox for the soldiers should be responded to. The letter should not only be an encouragement but a stimulous to the knitting brigade at home:

ON SERVICE,
Oct 26th. 1916.

MY DEAR BOY—In a bale of socks I found your letter, so I take the first opportunity to answer it. Please tell your mother that her kindness is much appreciated, and that the men are very thankful, indeed. You can understand that out here we cannot send our washing to the laundry, consequently our clothes get very dirty, and the only thing we can do is to do the best we can by wearing them as long as we can and then putting clean ones on. If we cannot get clean ones we must go without. Socks are especially welcome now as the weather is wet and the mud is awful and soaks through the boots so the socks get wet and used up very quickly. If the men cannot have dry feet they catch cold and get sick. Our reinforcements comes from Victoria, on Vancouver Island, but we have many eastern Canadians with us now. I am a C Q M S. You can try and find out what that is. One of my duties is to share out to the men of my company their clothes, and finding your letter I thought I would write to the name of the company, so you can have the thanks of all of them for the kind thoughtfulness of your mother and her friends, and you yourself in writing. I thank you very much for your kind wishes for our welfare, but I am sorry to say many (far too many) of our best and bravest will never see Canada again. It cannot be helped, of course, in this terrible struggle, for such things must be, but it is sad, nevertheless, and all we can hope is that we shall give these wretched Germans a complete smashing up in a short time. I cannot send you anything in return for your splendid gifts except a few flowers picked on the fields of France where the Canadians have given their lives in the cause of justice, freedom and right. Our men are quite cheerful and fully determined to finish the business in hand, and as we have the superiority in artillery and man power it is only a matter of time till it is driven home to the German nation that the British Empire has countless loyal sons all over the world, and that those from Canada are among the bravest and best. This is written in a dugout, and the guns are sending their shells into the German lines night and day, and soon you will hear of a great advance. The 65th Pioneers will find me if you care to write, though it may take a long time to find me. So again thanking your mother, her friends and yourself for the kindly sympathy and generous help in the great cause.

Believe me,
Yours gratefully,
WM GALPIN BRICK
C M S, A Co.

BORN

PICKARD—At Paisley, on Nov 21st, to Mr and Mrs R H Pickard, a son.

SCHMIDT—In Bruce Tp. on Nov 20th, to Mr and Mrs Jas Schmidt, a daughter.

NOTED MUSICIAN OF MONTREAL

Advises The Use Of "FRUIT-A-TIVES". The Famous Fruit Medicine.

MR. ROSENBURG

589 Cangrain St., Montreal.
April 20th, 1915.

"In my opinion, no other medicine in the world is so curative for *Constipation and Indigestion* as "Fruit-a-tives". I was a sufferer from these complaints for five years, and my sedentary occupation, Music, brought about a kind of Intestinal Paralysis—with *nasty Headaches*, belching gas, drowsiness after eating, and Pain in the Back. I tried pills and medicines of physicians, but nothing helped me. Then I was induced to try "Fruit-a-tives", and now for six months I have been entirely well.

I advise any one who suffers from that horrible trouble—Chronic Constipation with the resultant Indigestion, *to try "Fruit-a-tives"*, and you will be agreeably surprised at the great benefit you will receive". A. ROSENBURG.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

N. Bruce Sunday School Convention

The annual convention of North Bruce Sunday School Association was held in Knox church, Paisley, on Tuesday of last week. Owing to the unfavorable weather and bad roads, there was only a small representation in attendance from other places in the district. The addressing given were helpful and inspiring to those engaged in this branch of christian service.

Rev Mr Watt, of Burgoyne, pointed out that no one has such opportunities for the religious care of children as the parents, but the S S teachers have their place, too. How many homes where the Bible is never opened? There are about 50 per cent without family religious instruction. Working with the home is ideal, but in homes where no religious instruction is given, the S S teaching may mean very much in these young lives.

Mr Otter of Toronto, delegate from the Provincial Association, urged teachers to take their charge as S S workers in dead earnest, with Christ as their centre of prayer and service, represented by the child. Seek to see the possibilities of the child's spirit and develop it day by day. The speaker gave statistics showing that only 27 out of every 100 Protestants in N Bruce are connected with the S S, and not three fourths are connected with the church. Home department work has led to establishment of family worship in many homes. Organized adult classes means training for leadership. Graded lessons may be adopted as means of giving the child what is needed for its development. Train leaders in christian service and thus develope the latent talent in our schools.

At the evening session Rev Mr Prudham of Wiarton was the first speaker. The S S is one organism in which Protestant bodies are united, he said. It shares with home the religious training of the children. What is wanted in S S work to day is efficiency of service, as in any other department of life's work. Skilled and specialized workers are wanted. Nowhere in religious work is special training needed more than in the S S department. There should be teachers' training classes in connection with every S S, and that is the aim for next year. It requires the skill of a master artist to shape the plastic human material that comes into the hands of those who undertake to develope and build character in the young. A study of psychology, that is a knowledge of human nature, is necessary for the S S teacher of to-morrow, as the child is greater than the lesson, also graded lessons or graded instruction, and a knowledge of the Truth as it is found in that great text book, the Bible.

Mr Otter discussed "The Life we are Working With." There is the selfish instinct of the child that must be dealt with—made selfish for a purpose, that they may take unto themselves that which they stand in need of. Then there is the age of activity, and the age when the child is the most impressionable. The different periods of the development of child growth, physically and mentally, all require special attention. A programme should be provided that will cause them to develop so that, while growing in stature and wisdom, they will grow in favor with God and with man, as did that humble Nazarene who became the Great Example for child and adult. The S S teacher should be able to give inspiration as well as instruction, and take an interest in the things that boys and girls are interested in, directing them with the aim to have them form right habits. Boys and girls are naturally religious, and to best develop the spiritual best it is advisable to form them into congenial groups, giving them service to do for their fellows and for Christ. Among the mysteries of life are the influences that touch the young life and greatly shape their future for good or for ill. If we are to raise our boys and girls to the highest perfection, we must not only play upon the emotions, but must get them into action, and in the habit forming years is the time to do that. Character seems to be caught like the measles and chickenpox by the child coming in contact with a virulent character. The world is to day being re-constructed, and in all lines of life new conceptions of our problems are being formed. The world is becoming more complex, and the church must measure up to the greater needs. The crucial point of the church's work is where it exerts its influence upon the young in the Sunday School.

The officers of the Association for the ensuing year are: President—M A Halliday, Chesley; Vice-Pres—H B Putnam, Paisley; Sec-Treas—Rev Mr Prudham, Wiarton; Supt of Secondary Division—F B McLachlan, Paisley; Elementary Div—Miss J B Scott, Paisley; A B Class—Rev J B Hogg, Southampton; Home Dept—R Sayles, Port Elgin; Teacher Training Rev W B Daniels, Tara; Temperance—W McDonald, M P P, Chesley; Missionary—Miss Nellie Williamson, Chesley; Auditors—W McDonald Jos McNeel, Chesley.

The next convention will be at Wiarton during the first week of October. The township conventions are to be held as soon after the 15th of June as possible.

SIMCOE POULTRY CO., Agents

VESTA

A stirring event took place at the home of Mr and Mrs Wm Shouldice on Monday evening, Nov 13th, when about 80 friends and neighbors gathered to do honor to the old couple before their departure for their new home in Walkerton. Mr David Walks was chairman. After singing the national anthem, Mr and Mrs Shouldice, Belle and Ida were called forward and the address was read by Miss Eliza McCurdy, while the presentation of two handsome rocking chairs was made to Mr and Mrs Shouldice, and the girls each received a purse of money. Mr Shouldice made a suitable reply thanking their friends for the gifts. Following this was a ladies' chorus, "We'll never let the old flag fall." After the presentation dancing was indulged in till the small hours of the morning. A good lunch was served at midnight. Everybody went home delighted with the evening spent in honor of the old couple. The address is appended :

TO MR AND MRS SHOULDICE, BELLE AND IDA :

Having learned that you are going to depart from among us we your friends and neighbors have taken the liberty of meeting here to spend a social evening with you before your departure. You will be greatly missed around here because you have been constantly with us. You were always willing to lend a hand in the time of need, and many pleasant hours have been spent with you both in your own home and in others'. We feel we cannot let you depart without some token of remembrance, and ask you to accept these chairs and purse not for their value but as a memento of our friendship. We hope you may be spared to enjoy these presents in your future home. We also hope you will not forget the people of the old town line and will come back to visit us at your first opportunity. Signed on behalf of your friends and neighbors, JOHN MCCAW, STEWART MCCAW.

What Is Uric Acid ?

THE CAUSE OF BACKACHE, RHEUMATISM, GRAVEL AND SUDDEN DEATH.

Ever since the discovery of uric acid in the blood by Scheele, in 1776, and the bad effect it had upon the body, scientists and physicians have striven to rid the tissues and the blood of this poison. Because of its over-abundance in the system is causes backache, pains here and there, rheumatism, gout, gravel, neuralgia and sciatica. It was Dr. Pierce who discovered a new agent, called "Anuric," which will throw out and completely eradicate this uric acid from the system. "Anuric" has proved to be 37 times more potent than lithia, and consequently you need no longer fear muscular or articular rheumatism or gout, or many other diseases which are dependent on an accumulation of uric acid within the body. Send to Dr. Pierce, of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., for a pamphlet on "Anuric," or send 10 cents for a trial package of "Anuric Tablets."

If you feel that tired, worn-out feeling, backache, neuralgia, or if your sleep is disturbed by too frequent urination, go to your best drug store and ask for Dr. Pierce's Anuric Tablets. They are put up in 50-cent packages.

Doctor Pierce's reputation is back of this medicine and you know that his "Golden Medical Discovery" for the blood and his "Favorite Prescription" for the ills of women have had a splendid reputation for the past fifty years.

Doctor Pierce's Pellets are unequaled as a Liver Pill. *One tiny Sugar-coated Pellet a Dose.* Cure Sick Headache, Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels.

Don't forget the place—**the Big Fall Bargain Sale.**

L. C. SPOFFORD

THE FARMER AND LIFE INSURANCE.

The farmer of Canada is rightly said to be the backbone of the country, but we wonder if he is taking advantage of the many opportunities to better himself. Year after year there is being perfected labor-saving devices and machinery which ultimately cause not only a saving of expense in the management of his farm and the husbanding of his crops, but also makes life easier and more pleasurable.

It has been said the farmer does not take advantage of new inventions as quickly as a manufacturer, and there may be a good reason for this. In the first place, if a manufacturer sees some invention which may be of advantage to him in his business, and has not the ready cash, he can often go to his banker and ask for additional credit, explaining what he needs the money for.

The farmer, on the other hand, who has truly made his money by the sweat of his brow, does not as a rule, know much about banking except as a place to deposit his savings in. He seldom asks for credit, and as a result often goes without things which in place of being a luxury are a real necessity. His great aim has been to build up not only a competence for his old age, but also to lay aside something for his wife and family.

Should he be one of our progressive farmers, he is forced to have good buildings not only for himself and family, but it is equally necessary to have good barns and stables for his stock. This often necessitates a considerable capital expenditure, and the usual source of getting this (if he has not the capital himself), is by placing a mortgage on his property. Should you live, and should the years be profitable, you will no doubt pay off the mortgage. On the other hand, should there be a succession of bad crops and should you die, what is to come of your wife and family?

If you are a modern and progressive farmer you should give this the same consideration as a modern business man. To-day you are the brains of the farm, matters run smoothly under your guidance; should you be taken off who is to assume your responsibilities and pay off the mortgage? Is your wife or children capable of taking your place at once, or must someone be hired to take it? If so, this means an additional outlay.

The Good Book tells us that "a contented mind is better than riches," and no doubt your mortgages or other outstanding obligations are a source of worry to you, but modern business methods has found a way to meet just such worries as yours, and few, if any, of our modern business men have failed to take advantage of it.

Every person recognizes the uncertainty of life, so, if this is one of your worries in accumulating a fortune, why not make provision against it? It can be done by taking out a policy in one of our Canadian Life Insurance Companies. The moment you pay your first premium you have created an estate to the full value of your policy. A life policy is nothing more than a savings account, with protection added. Should you die after the first payment your estate will receive the full value of your policy, and there will be no delay in payment. So soon as your death claim papers are received, a check will at once be sent.

Sickness and death entail heavy expense, and ready cash is often hard to secure, but the prompt payment by a life insurance company means ready cash, which will enable your estate to pay your debts, lift your mortgage, and, if your policy is large enough, give them something to go on with. While it will not soften their grief at your loss, it may make you more kindly remembered and it will certainly make their path through life smoother.

MAETERLINCK IS NOW VERY BITTER

GREAT BELGIAN CALLS DOWN CURSE ON GERMANY.

And Also for Poland—Sacrifices of the Dead Must Not Have Been in Vain.

Maurice Maeterlinck—mystic and optimist—has never written with bitterness or hate. He has never in anything that he has written wished evil to any man. In "The Wrack of the Storm" he rises to a passion of malediction. He has one essay in the present volume that is like Emile Cammaerts' unforgettable "New Year's Wish for the German Army." And the passion is, of course, the same. Maeterlinck here is the voice of Belgium. And—though he does not use the word—he curses Germany.

Yet bitterness and hatred form but a small part of his book. Even the heartbreaking catastrophe that has overwhelmed his country (we cannot use the word tragedy in connection with magnificent, heroic Belgium!) does not crowd out the expression of other things—things striving, as comforting, or triumphant. Speaking himself for his country, Maeterlinck sounds notes of ultimate victory. There is nothing easy-going in his war-time philosophy; he believes, on the contrary, that his country and her allies are fighting against material destiny, against "the will of earth"—and man has not conquered destiny before. His optimism is a vigorous battle-cry toward the triumph that shall come. But he believes that it must come—not merely the victory over Germany, but the victory of man over destiny, over adverse forces without and within.

Maurice Maeterlinck.

This faith he gives to his country in his exquisite invocation for Belgium's Flag Day.

A New Poignancy.

Maeterlinck's philosophy of death has long been familiar to us—ever since a wondering child cried out, "There are no dead!" And it has formed the subject matter of his last two books. But in "The Wrack of the Storm" the faith that "the dead do not die" has a new poignancy; and he has expressed it in strange and haunting ways of comfort and of loveliness. There is much in the volume that cannot be more than touched upon in a brief review; Maeterlinck pleads for the rescue of the four beautiful cities still left in Belgium, as apparently doomed in the great German retreat; he urges that justice be granted at last to Poland in the name of this just war; he writes with exquisite beauty of the heroism of his people and with vibrant pathos of their suffering. His book is a passionate response to facts and conditions that the war has brought. But he keeps with us the thought of what should come after. Then, man's spirit must have conquered force.

Here are two passages from his book:

"We are nothing, we are no better than our enemies, we have no title to deliver millions of innocent men to death, unless we stand for justice. The idea of justice alone must rule all that we undertake, for we are united, we have risen, and we exist only in its name. At this moment we occupy all the pinnacles of this justice, to which we have brought such an impulse, such sacrifices, and such heroism as we shall perhaps never behold again. . . . There are dead whose energy surpasses death and recovers life; and we are almost every one of us at this moment the mandatories of a being greater, nobler, graver, wiser, and more truly living than ourselves. . . . And all the sacrifices which they have made for us will have been in vain—and this is not possible—if they do not first of all bring about the fall of the lies on which we live, and which it is necessary to name, for each of us knows his own and is ashamed of them and will be eager to make an end of them. They will touch us, before all else, from the depths of our hearts, which are their living tombs, to love those who outlive them, since it is in them alone that they wholly exist.

RUSSIA MIGHTY NEXT YEAR

GERMANY WILL BE DOWNED, SAYS GEN. BRUSSILOFF.

Roumania Will Be Saved This Winter and Next Year Will End War.

Russia will save Roumania from the Teuton menace this autumn and winter, and next spring will have the strongest army she has had since the war began. General Brussiloff told Stanley Washburn, the London Times' correspondent at Russian headquarters on the Carpathians front recently. Brussiloff commands all the Russian armies that made the great surge into Galicia in the summer.

"I speak with authority when I say that from the common soldier up, the united sentiment of Russia is that Roumania should be protected, helped and supported in every possible way, he said. "The Roumanians must feel faith in the great heart of the Russian people. They must know that in the efforts we are making to save them this sentiment is the dominant factor, not merely a question of our own self-interest to protect our left flank.

Defeats Are But Incidents.

"Roumania is now feeling for the first time the pressure of war and the bitterness of defeat, but Roumania must realize that defeats are but incidents of a greater campaign. Behind her stand great Russia, who will see that her brave little ally, who came into the war for a just cause, does not ultimately suffer for daring to espouse the cause for which we are all fighting.

"The war is won to-day, though it is merely speculation to attempt to guess how much longer will be required before the enemy is convinced that the cause for the sake of which they have drenched Europe in blood is irretrievably lost.

"Personally, never since the beginning have I believed that the enemy had a chance of winning. While they are able to continue successful offensives it is difficult for them to realize that they are not approaching a successful peace. This summer's operations mark a definite period of defeat. That period dates from the time when the allies, co-ordinating their programmes, seized from the enemy the capacity for continuing the offensives and dictating their strategy to us.

Russia Not at Zenith.

"If there remain any Germans who are still hopeful of their cause let them realize that to-day when the Central Powers already have lost the initiative and are finding difficulty in refilling their ranks, Russia has not yet reached the zenith of her power. Surely, no intelligent German can expect victory. It is simply a question of how long they are willing to continue the war, of which the end is absolutely foreshadowed to-day.

"Russia's full power will only be approached next year, when we shall have the largest and best army since the beginning of the war. Even this year we have been obliged to conduct our offensive with an inferiority of material and heavy guns. Next year we shall have material in equality with the enemy, and a superiority in human resources which will steadily increase as long as the war endures.

Morale of People Rises.

"The morale of the Russian people has been slowly rising for two years. It is my absolute personal conviction that if it were possible to take a vote of the entire population, 99 out of 100 Russians to-day would demand the continuation of the war to a definite and final victory, regardless of its price. Our new levies each year are equal to the best troops. I believe they are far superior to anything which the enemy can find to send against us in the next year's campaign.

"The recent temporary reverses of Roumania must not be considered as having the slightest significance. The enemy's trifling advance in the Dobrudja, though a regrettable incident, will have no bearing upon the greater issues of the war. It would have been serious had the Germans been able to pierce the Carpathians and enter Roumania, but I believe this last attempt of theirs to regain the initiative somewhere is doomed to perish as all other attempts of the summer campaign have perished."

EARLY MARRIAGES.

The Record Set Up in Scotland Last Year.

There were more marriages in Scotland last year, in proportion to population, than in any year since 1855. The total was over 36,200, and a feature of the ceremonies was the youth of many of the contracting parties.

4 were boys of sixteen.
60 were boys of seventeen.
209 were boys of eighteen.
695 were boys of nineteen.
1,328 were boys of twenty.
In all 2,286 were married before the age of 21. There were 6,330 brides of less than 21.
11 married at fifteen.
102 married at sixteen.
542 married at seventeen.
1,328 married at eighteen.
2,124 married at nineteen.
2,623 married at twenty.
In both cases records were set up, says the Registrar-General, who also records the number of births at 114.-181 (the lowest rate since 1869) and the deaths at 81,631 (the highest figure, with four exceptions, since 1855).

She Needed Aid.

"See that man over there? He is a bombastic maut, a windjammer nonentity, a false alarm, and an ostentatious brance of the earth!"

"Would you mind writing all that down for me?"

"Why in the world . . ."

"He's my husband and I should like to use it on him some time."

Hard on Uncle Joseph.

"Bertie," said the fond mother, "how would you like to be a banker like Uncle Joseph when you grow up?"

Bertie looked critically at his Uncle's red face and unwieldy figure.

"Couldn't I be a banker," he asked anxiously, "without being like Uncle Joseph?"

THE TRUE STORY OF "BILL."

We will call him "Bill," but that isn't his real name. We will say his story ends on a farm near Acton, but it really ends somewhere else. Bill's is a typical story; such lives are found by the hundred in Toronto. There should be hundreds of stories like Bill's, ending on the farms in Ontario.

* * * * *

While Bill was yet a baby his father died. Two years ago his mother died. It was very sudden, this death of Bill's mother. There were burns looking suspiciously like carbolic acid on her lips, but nobody told Bill what they meant. The next day a distant relative came and took Bill away. She had received a note from his mother and did not inquire about the cause of her death.

In his new home Bill found himself regarded as an intruder. His unwilling foster mother had a brood of her own that was already too large for her to manage, and the family income left much to be desired, even before Bill was added to the load.

Poor Bill felt the situation keenly, but he could see no way to fix it. His only other relatives were two brothers who had gone to France with the Princess Pats and disappeared from his life. Bill felt dimly that, if they only knew, these hero brothers of his would help him, but he didn't know how to find them, and no one else seemed to care.

It is no wonder, therefore, that Bill made his real home on the streets. There was real life. There was adventure. An empty coal bin in an alley made a dandy pirate den, and any of the gang could swipe cookies from home and so keep the larder supplied.

Bill's membership in the gang was the only bright spot in hi ' it involved a great difficulty. ' feel at liberty to swipe cookies at home. With the other boys it was different. Their homes were their own, and swiping what your own mother baked for you isn't much of an offence; but when you are living in another fellow's home, and the other fellow's mother doesn't love you and doesn't want you there, you don't feel at liberty to swipe their cookies. Bill explained the matter to the gang, and they generously agreed to overlook it, but Bill felt himself under a constant and growing obligation.

Now, if you go in back of Dago Tony's fruit store, you will find a little window in the back wall close to the ground. If you look into that window you will find that Dago Tony has his cellar hung full of bunches of green bananas. When he wants them to ripen he hangs them in the sun in front of his store, but when he wants them to stay green he keeps them down cellar, and that cellar window is unlocked. Bill thought there would be nothing easier than to swipe a bunch of bananas and hang it up in the den, and thus at one stroke pay all his obligations. Tony would never miss just one bunch. Tony is rich. He must have in that cellar as much as a hundred bunches of bananas.

When a boy is twelve years old he doesn't spend much time on reflection. When a thing needs doing he does it. And so the morning after Bill found Tony's window unlocked; there was a large bunch of green bananas hanging in the den, and Bill found himself the hero of the gang.

The fellows had always supposed that the location of the den was a profound secret. Knockers (policemen), however, have a habit of poking their noses into places where they are not expected, and one of them occasionally locked into the den when he knew it was vacant. When he found the bananas, and put the liklest member of the gang through the third degree, he readily learned what had happened. So Bill and the "knocker," and Bill's foster mother had a session with Judge Boyd of the Juvenile Court.

Bill's relative, thinking she could thus get rid of him, painted his character in lurid colors and demanded that he be sent to the reform school. But she found the Juvenile Court to be a different sort of place than she had expected. Judge Boyd remembers well when he was a boy, and he has had many years of experience since then. He knew that Bill was not really bad. His soul is too recently from the hands of his Maker to be very much contaminated. If Bill appears bad it is his environment that is the cause of the trouble, and not Bill himself. And as the woman found from the trend of the Judge's questions that the tables had been turned. Instead of being prosecutor she was the defendant. As the guiding influence in Bill's environment she had failed. There was no penalty, though, for her failures, and for Bill's sake it was decided that, if possible, he should have another home.

The Big Brother Movement is a group of big-hearted men, each one of whom agrees to look after a fellow like Bill. Their secretary, Mr. Jack Maughan, attends the Court sessions. It is his particular business to find friends for boys who need them.

There is one of "nature's noblemen" living with his wife on a farm near Acton. Their children have grown up and moved away, and so, as they put it, the home is "rather going to waste." They believe in the religion of love and helpfulness and wanted to put it into practice. They realize, too, that in this time of national sacrifice it is especially important that the boyhood of the country should be saved. These good people, therefore, wrote Mr. Maughan to learn if they could be of service, and thus Bill found his new home.

Bill is making good at Acton. The same enterprising nature that led him to steal the bananas leads him also to take a most lively interest and active boy's part in everything connected with the farm. His new parents find that in him they are living their youth over again.

Only those who have watched the development of boy lives in the city can appreciate what is being done for Bill. Had he been left with the "gang" and with no friend to guide him, a jail sentence within ten years would be a reasonable probability. As it is, he will develop into a useful and respected citizen. Bill's new parents are taking the raw material of a criminal and diverting it to an honorable career. They are cheating the Devil and saving Bill's soul.

There are many boys, and girls, too, in Toronto, whose story, starting like Bill's, have not found such a propitious ending. Anyone who will write Mr. J. H. Maughan, Sec'y Big Brother Movement, City Hall, Toronto, will be told specifically where their help is most needed.

Small Pigs.

In travelling through the country at this time of year a great many pigs weighing not more than 50 to 70 pounds are seen in the feed lots and pastures.

To be marketed at a price anywhere near the top, these pigs must be carried through the winter, at least until January or February. When one considers the additional cost of gains made through the winter months when no green feed is available, one is led to wonder whether it would not be more profitable to have these pigs larger at this time of year. That it is more profitable to have the pigs larger at this time of year, at least in most cases, is proven by the fact that the most successful hog raisers see to it that their spring pigs weigh at least 110 to 125 pounds by the end of September. Should one undertake to criticise a man with 60 pound pigs and tell him that his pigs should be larger, an argument immediately follows. The average farmer knows that his pigs should be larger at this time of year to be profitable. His problem is how to get them larger. Wherever small pigs are found at this time of years severe shortcomings can be located in the management the pigs have had. The first is that inferior, underaired breeding stock has been used, the second is that the pigs were farrowed late in the spring, and the third is that they have gone through the summer on pasture, but with too limited a grain ration. The first essential in raising big, growthy pigs that can be marketed in the month of November at a weight of 175 to 200 pounds, is that big, heavy-boned breeding stock must be used. For some reason or other a pig farrowed in March or early in April always seems to grow faster than one farrowed in May or June. The second essential to rapid growth of the pigs is that they be farrowed early. March is the month selected as the most successful farrowing month by the best hog growers. It is true that it takes something of a building and a little care to farrow the pig crop in March, but it pays. In order that pigs may make a rapid growth through the summer months they must have a combination of good pasture and a suitable grain ration. It has been proven a good many times that pigs will make rapid growth when running on good pasture and getting their grain from a self-feeder. However, this has not always proved the most economical method of making gains. In the work at this Station covering several years, good gains have been made when growing pigs were pasturing on alfalfa and receiving a grain ration of 3 pounds per day, 100 pounds live weight of pigs.—W. H. Peters, North Dakota Experiment Station.

A Mixed Marriage.

The types will often play pranks with what a reporter tries to say—as, for example, in this extract from an English newspaper:

"The bride who was given away by her father, wore a dress of pale bridegroom. She was attended by the hat, and carried a bouquet the gift of the pink taffeta silk and a large dark-blue bridegroom's two little nieces."

No wonder, says London Opinion, the large dark-blue bridegroom turned pale!

The Flavor Lasts---

In the making of Grape-Nuts there is added to the sweet, rich nutriment of whole wheat, the rare flavor of malted barley, a combination creating a most unusually delicious taste. The palate never tires of it.

People everywhere have found that

Grape-Nuts

is the most nutritious and delicious cereal food known. Every table should have its daily ration of Grape-Nuts.

"There's a Reason"

FLASH LOCATES BULLET.

Pocket Instrument Used on Wounded In War Hospitals.

Every hospital in the war zone has some electrical equipment for locating the bullets in wounded men, but a German has recently invented a pocket instrument for this purpose. It consists of a two-pointed probe connected by insulated wires to a pocket electric lamp. When the probe comes in contact with a bit of metal a closed circuit is formed which lights the lamp. Flashes from the bulb also indicate when the probe is approaching or receding from a bullet or bit of shrapnel, for these latter are more frequently the cause of wounds than bullets.

What We Give, We Get

In 1915 and 1916 Ontario contributed more to the Canadian Patriotic Fund than she drew from it, the surplus going to assist those western provinces whose contributions, although exceedingly liberal, did not equal the heavy demands caused by the large enlistment from these provinces. For 1917 the situation will change. The demands from this province on the Fund are estimated to reach six million dollars, and the committee has decided to ask Ontario to raise that amount—in other words, to make provision only for its own people.

The total represents about one million dollars above the contributions for 1916, and therefore there can be no weariness in well-doing on the part of Ontario's patriotic people so far as the Fund is concerned.

Not Guilty.

Little Charlie had been spanked by his mother for stealing cookies. His cousin, who was present, wishing to comfort him, said: "Poor Charlie! You have my sympathy." Looking up through his tears, he protested: "I have not! I didn't touch it."

SUMMER THROUGH THE WINTER IN CALIFORNIA.

Get away from the cold, disagreeable winter. California temperature is from 60 to 75 degrees the year round. It is not expensive to spend the entire winter there. Bungalows rent from $25.00 per month up.

Special Winter Tour Fares. The famous Los Angeles Limited, a fast, refined and exclusive through train from Chicago to Los Angeles, leaves Chicago 10.00 p.m. and arrives at Los Angeles 4.30 p.m. the third day—less than three days en route.

Write to D. H. Bennett, Gen. Agt., Chicago & North Western Ry., 46 Yonge St., Toronto, and he will send you descriptive literature and train schedules, help you plan an attractive trip, and make reservations for you clear through to the Pacific Coast.

Growing.

Friend—I understand that your practice is getting larger.

Young Doctor—That's true. My patients has gained nearly ten pounds in the past few weeks.

FELL FROM LOFT; HURT; THEN WELL

How a Man Who Landed On Wood Pile and Was Sore From Head to Foot Found Quick Relief.

Once upon a time Edwin Putnam, who lives in the quiet, pretty hamlet of Wendel Depot, Mass., climbed up into a loft to get some building material just as many another man living in the country must often do. Suddenly he slipped and fell. Ten feet below was a pile of wood, knotted and gnarled. It was a nasty jumble, and Mr. Putnam was injured painfully in the back, he was covered with bruises, and was sore from head to foot.

The next day he bought a bottle of Sloan's Liniment which had been recommended to him. Within a very few hours the soreness had vanished and the lameness had disappeared. He was an active man once more.

Sloan's Liniment can be obtained at all drug stores. 25c., 50c. and $1.00.

Sloan's Liniment KILLS PAIN

SCOTS NOT FIRST PIPERS.

Before 15th Century Harps Were Highlanders' Instruments.

Neither Scotland nor Ireland can claim to have invented the bagpipes, says the London Chronicle. Greeks, Romans, Assyrians and Chinese all played bagpipes of sorts long before the time of Christ, and the instrument actually figures on one of the coins of Nero, who may have played it. The Breton bignon, the Calabrian zampogna, the German sackpfeife and the French cornemuse are all bagpipes under different names.

It was actually a Scotsman, and no less a man than the lord advocate of the time, who publicly declared fifty years ago that "the bagpipe is an English instrument, essentially English; the English were the original bagpipers." He pointed out that, while Shakespeare often speaks of bagpipes, he never does so in "Macbeth," and that it is in Lincolnshire and Yorkshire that he localizes the pipes. To Chaucer and Spenser also they are English. James IV., and other Scottish kings, paid for "Inglis pyparis" at their court, while Edward I., Edward III., Henry VI. and Henry VIII. seem to have had native pipers. The Highlanders never used the pipes in war before the fifteenth century; the harp was Scotland's instrument.

A TALK ON RHEUMATISM

Telling How to Actually Cure This Common and Painful Malady.

This article is for the man or woman who suffers from rheumatism who wants to be cured, not merely relieved—Not actually cured. The most the rheumatic sufferer can hope for in rubbing something on the tender, aching joints is a little relief. No lotion or liniment ever did or can make a cure. The rheumatic poison is rooted in the blood. Therefore rheumatism can only be cured when this poisonous acid is driven out of the blood. Any doctor will tell you this is true. If you want something that will go right to the root of the trouble in the blood take Dr. Williams' Pink Pills. They make new, rich blood which drives out the poisonous acid and cures rheumatism to stay cured. The truth of these statements has been proved in thousands of cases throughout Canada, and the following cure is a striking instance. Mr. Henry Smith, St. Jerome, Que., says: "For upwards of a year I was a victim of rheumatism in a most painful form. The trouble was located in my legs and for a long time I was so bad that I could not walk. The suffering which I endured can only be imagined by those who have been similarly afflicted. Doctors treatment did not help me and then I began trying other remedies, but with no better results. Finally I was advised to try Dr. Williams' Pink Pills, and although I had begun to lose faith in medicine, I finally decided to give the pills a trial. I am very grateful now that I did so, for after taking eight boxes of the pills the trouble completely disappeared. I was free from pain and could walk as well as ever I did in my life. I have since taken the pills occasionally as a precautionary measure, and I cannot speak too highly in their favor."

Dr. Williams' Pink Pills cure all the troubles due to weak, watery blood or broken down nerves. You can get these pills through any dealer in medicine, or by mail postpaid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

"ENOCH ARDENS" IN ENGLAND.

Odd Case of Society Woman Who Married Second Time.

Each month brings the ever-growing number of Enoch Ardens, whose unexpected returns are received sometimes with joy, and many times, it is to be feared, with the reverse emotion, says a London despatch:

Men, both officers and privates, who have been officially reported killed, are continually finding themselves, either in some foreign hospital or else in a German prison camp. A case in point occurred only a few days ago when Mrs. Barry Bingham, who was one of last year's brides, was suddenly told that her husband, whom she had thought killed in the Jutland naval battle, was actually alive and well in one of the German prisons. But this was one of the happy resurrections.

I heard of a tragic one the other day. The husband of a very popular and well-known woman was taken prisoner in the early days of the war. He was sorely wounded, and after a lapse of time was reported as having died in a German hospital. Everything pointed to the correctness of the statement, and the pretty young widow mourned his loss for close on a year, and then, after a brief courtship, married a man who in the years before her first wedding had been her warm friend and admirer.

Months elapsed, and suddenly one day a letter came from the Prisoners of War Society advising the lady that a soldier who had apparently lost his mind had been returned from Germany as totally unfit. The only thing that was distinguishable in his conversation was a name and address that had formerly belonged to his wife. She visited the ward where he was lying, and then discovered that he was her first husband. He had been very badly treated, and his mind affected in consequence. No notice had been taken of his rank, and he had been sent back among a batch of exchanged prisoners as an ordinary Tommy.

The husband that she thought dead was alive, practically a lunatic, and entirely broken in health—her second husband, whom she had married in all good faith, also alive and a distinguished officer fighting the foe in France. The poor girl had the man whom she recognized removed to another hospital, and so far she has not disclosed his identity; but she is torn now between her duty to the man whom she once loved and the man to whom her allegiance is now due.

TO END CATARRHAL DEAFNESS AND HEAD NOISES

If you have Catarrhal Deafness or head noises go to your Druggist and get 1 ounce of Parmint (double strength), and add to it a pint of hot water and 4 ounces of granulated sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Any one who has Catarrhal Deafness or head noises should give this prescription a trial.

MODERN PHILOSOPHIES.

Seeds Planted by Sower Whose Identity Is Sunk to Memory.

Sometime, somewhere these paragraphs were gleaned from the same forgotten source. Author and place are gone, but they remain grist for the mill of thought.

Character talks when we are silent.

Seriousness simon-pure is a residual state into which one relapses when one has nothing better to do or say.

A physical element should enter into all affection. Even to clasp hands should always be a pleasure.

Your best friend strikes thoughts and deeds out of you that you never knew were in you, and that truly were not full formed in you till your friend woke them to life.

In love, as in work and in play, give-and-take is the great source of novelty, of creativeness, and so of miracle.

The more degraded a man is, the more he is hurt by our contempt.

Successfully married people have more news to tell each other and more capacity to hear it eagerly than any less closely, less durably united couples can have.

Everybody wants to be understood by somebody; but in the natural course of events everybody is more or less misunderstood or distortedly understood by most of his friends and acquaintances. Marriage gives us the best chance in sight to grasp our share of complete mutual comprehension. Any benedict among us, the "pick and shovel" man, the shipping clerk, the plumber, or the railroad magnate is more apt to be understood by his wife than by any other human being.

How many in whom we least suspect it are longing to pray! How many who hardly suspect it themselves! The craving to sing is but a partial and imperfect image of the craving to pray. What song is to prosy speech, that prayer is to song. It is the supremely personal and direct utterance for which creation longs, for which paid toil prepares.

Oriental Confectionery.

It is acknowledged that the Chinese are very skilful in making confectionery and possess the reputation of having many secrets. They are able to empty an orange of its pulp entirely, then fill it up with fruit jelly without one being able to find the smallest cut in the rind or even a tiny hole. Indeed they even empty an egg in this manner and fill it with a sort of almond nugget without one being able to find the slightest break or incision in the shell.

Any smoker who wishes to quit the habit can do so by knocking the live ashes of his pipe into a keg of blasting powder.

HAS GERMAN DYE SECRET.

British Hosiery Trade Builds Hopes on Possession of Formula.

Manufacturers of fine cotton hosiery in England have high hopes of capturing the bulk of the world's fine hosiery trade because they finally have succeeded in applying the Hermsdorff process, long a secret of German manufacturers.

The Textile Mercury says this German secret was obtained by a persistent British manufacturer a short time before the outbreak of the war, and now it has been applied in the Sketchley Dye Works.

The British Ministry of Munitions has sanctioned the erection of large dye works at Basford, near Nottingham. German manufacturers of fine black cotton hosiery enjoyed practically a monopoly of this trade in the world's markets, and the secret of their ascendancy was in the Hermsdorff black dye—which, like most other "named" products, was a jealously guarded secret.

Dyspeptics Should Avoid Drugs And Medicines

Try a Little Magnesia Instead.

Some people instinctively shun their eyes to danger, and it must be that instinct, or caution, or habit causes them people to take drugs, patent foods and medicines, artificial digestives, etc.

But closing the eyes does not banish the danger, and it is certain that neither drugs nor medicines possess the power to destroy the harmful excessive acid in the stomach, which is the underlying cause of most forms of indigestion and dyspepsia. They may give temporary relief, but ever increasing quantities must be taken, and all the time the acid remains in the stomach as dangerous as ever.

Physicians know this and that is why their advice so often to sufferers from digestive and stomach trouble is: "Just get about an ounce of pure bisurated magnesia from your druggist and take a teaspoonful in a little water immediately after every meal. This will instantly neutralize all the harmful acid in the stomach and stop all food fermentation, thus enabling you to enjoy hearty meals without experiencing the least pain or unpleasantness afterward.

A Distant Relation.

During the course of a trial in Chicago a witness by the name of Francis Dooley was asked, concerning the defendant:

"Are you related to Thomas Dooley?"

"Very distantly," said Francis. "I was me mother's first child—Francis was the tinth."

Minard's Liniment Cures Distemper

Failure.

A steel magnate, anxious to get on the right side of Andrew Carnegie, once attacked him in his well-known soft spot, namely, his love for the bard of Tam O'Shanter.

"Mr. Carnegie," said the wily magnate, "I see you've got several fine editions of Burns on your shelves. Georgie Burns! Dear old Georgie Burns! He's my favorite poet."

Carnegie glared.

"Georgie Burns!" he snorted, 'Jimmy Shakespeare,' Harry Dickens! Billy Carlyle! Get out with ye, man!"

I was cured of terrible lumbago by MINARD'S LINIMENT.
REV. WM. BROWN.

I was cured of a bad case of carache by MINARD'S LINIMENT.

Naturally.

Ethel—Poor Jack! When he proposed to me he acted like a fish out of water.

Marie—Why shouldn't he? He knew he was caught.

Minard's Liniment Cures Diphtheria.

World's Highest Chimney.

The tallest chimney stack in the world will be completed shortly at the Kuhara refinery, Saganoseki, Japan. The stack, when completed, will be 567 feet high and 26 feet in diameter at the top. At present Japanese papers claim the highest smokestack in the world is another belonging to the same company at Sukegawa, which is 517 feet high, the second highest being the chimney at Great Falls, Mont., which has a height of 508 feet.

Minard's Liniment Cures Colds, &c.

PERVERTED WORDS.

Some of Them Mean the Reverse of What Is Intended.

There are quite a number of words in the English language which have become so perverted by usage that to-day they are taken to mean exactly the reverse of what the dictionary definition of them asserts to be correct.

If, for instance, you ask people if they have seen to-day's newspaper, they may answer: "Oh, we just scanned it," meaning to imply that they have only "glanced" at it, while the word "scan" really means "to examine minutely or carefully. Other people will say they will give you a "moiety" of such and such a thing, or a reward, meaning to offer a little bit, while the true definition is "the half—one of two equal parts."

To-day the word "parlous" is used in the sense of a person being in a serious way of ill-health, or a business very low in finances, and yet its real meaning is "bright, witty, and sprightly," and was used in that sense in the days of Shakespeare.

CHILDREN OF ALL AGES

When sick the newborn babe or the growing child will find prompt relief through the use of Baby's Own Tablets. They are absolutely safe for all children and never fail to banish any of the minor ills from which little ones suffer. Concerning them Mrs. Arthur Sheasby, Adanac, Sask., writes: "I have used Baby's Own Tablets and think they are splendid for children of all ages." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

About Due.

Mrs. Cassidy, thinking her husband was rather late in coming home on Saturday with his pay, went to the police station to inquire if he was there.

"Is my Pat here?" she asked.

"No," replied the desk officer; "but sit down, we're expecting him every minute."

Boy readers can earn a little Christmas money by winning special classes limited to boy feeders at the Toronto Fat Stock Show. This show also carries classes limited to farmers. The Secretary will be glad to mail Prize List on application.

The Indian Mutiny.

During the Indian Mutiny only 586 British soldiers were killed in battle or died of wounds, but many thousands of English people were massacred by natives.

Minard's Liniment Cures Garget in Cows

No Use.

"When that bad boy threw stones at you why didn't you come and tell me instead of throwing back at him?" said the good little boy's pious mother.

"Tell you?" said the good little boy. "Why, you couldn't hit a barn door."

Some men are so mean that they even refuse to let their wives have the last word.

HOW I CURED MY CATARRH
TOLD IN A SIMPLE WAY
Without Apparatus, Inhalers, Salves, Lotions, Harmful Drugs, Snake or Electricity.

Heals Day and Night

It is a new way. It is something absolutely different. No lotions, sprays or sickly smelling salves or creams. No ointment, or any apparatus of any kind. Nothing to smoke or inhale. No steaming or rubbing or injections. No electricity or vibration or massages. No powder, no plasters; no bother ing in the house. Nothing of that kind as

all Something new and different, something delightful and healthful, something instantly successful, something that will save you time and money and pay out a lot of money. You can stop it at once. It will go right to the sore spot—WHERE I am not a doctor and this is not a so-called doctor's prescription—but I am cured and my friends are cured, and you can be cured. Your suffering will stop at once like magic.

I Am Free—You Can Be Free

My catarrh was filthy and loathsome. It made me ill. It affected my stomach. It poisoned my blood. It caused me to have miserable headaches and bad breath and disagreeable dizziness. It affected my throat and lungs. It caused me to cough and raise and spit. It affected my nerves. It caused me to have pains in the back and stiff joints sometimes. I knew that in time it would bring me to untimely grave, because I knew that catarrh is a disease that grows and grows and never stops by itself.

But I found a cure, and I am ready to tell you about it FREE. It has me promptly.

RISK JUST ONE CENT

Send no money. Just your name and address and a postal card. Don't wait. Write me today and let me know you cured your catarrh and how I can cure you. I want all you need to say is, I will understand, and I will write to you with complete information. It will cost you only a penny. Send postal card or write me a letter today. Don't think of turning this page until you have sent for this wonderful remedy that can do for you what it has done for me.

EDEN GROVE

Well, Susan, and how did the young winter catch you?

Mrs Fair and Mrs Allan called on Cargill friends Monday.

The box social at Dunkeld brought the young men and the sleigh bells out with a belle stowed away in the cutter. Everybody reports having a good time.

The many friends of the late Lieut Leslie Young were greatly grieved to hear that he had been killed in action. Leslie was a general favorite in this neighborhood, having at one time attended our public school. The bereaved family have the sincere sympathy of their many friends at the Grove and vicinity in the loss of their brave young son and brother.

Mr and Mrs Pearson invited a few gentlemen friends to their home on Quality Hill Thursday evening in honor of Mr Jas Clancy, to spend a social evening previous to Mr Clancy's departure for his new home in Wellerton, where he has been appointed G T R station agent. A very pleasant time was enjoyed in social chat, games, &c.

Rev and Mrs Almack and son, of Cargill, were the guests of Mr and Mrs J Seiler, King St east, last week.

On Friday Mr Desmond's team walked away. One of our young men with great presence of mind climbed onto the sleigh when going at two miles an hour and stopped them before any damage was done.

Miss Myrtle Elder, of Cargill, is visiting friends in town.

On Friday evening Mrs Pearson received the sad news of the death of her father which occurred suddenly at the home of his son in Toronto. Mrs Pearson left Saturday afternoon to attend the funeral at Cannington on Monday. The deceased was well and favorably known in this place, having frequently visited at the home of his daughter here.

Miss Lena Pinkerton, of California, was the guest of friends in the Grove last week.

Church services—S S, 10 a m, service, 12 a m. Still room for a few more.

It used to be that the women would tie the men's tie and get them out to church. Now it looks as if the men assisted the fair sex in getting out Sunday morning.

Miss Gallenger spent a week with Walkerton friends.

The Red Cross Society forwarded boxes of Christmas cheer to each of the boys from this vicinity on Thursday. We hope they arrive safe and that the boys may enjoy the treat from lady friends of the 160th.

If you want to purchase a good sensible Xmas present call on Alex.

Leap year is going fast, ladies. Are you still burning up dad's coal? You want to get a move on.

Mr and Mrs A McKeeman visited Paisley friends Friday evening.

Children Cry
FOR FLETCHER'S
CASTORIA

GLAMIS

Rev D Allan, of Hamilton, District Elder of the Free Methodist church, assisted Rev DeMille with the quarterly meetings.

Mrs Jos Cunningham gave a tea on Tuesday and realized quite a nice sum for the Red Cross work.

Mrs Jas Begg left on Saturday to visit friends in Buffalo.

Miss Laura Cunningham spent a few days at Mr and Mrs Allan McKinnon's at North Bruce.

Miss Emma Howson has returned from visiting friends in Toronto and Clifford.

The sudden death of Mrs Joseph Perris came as a shock to her friends. She was in her usual health until a few minutes before she died. Heart trouble was the cause. The deceased was in her 71st year, and leaves a husband, four sons and three daughters to mourn her loss.

Jas McLeod, of the 2nd, has gone to Niagara Falls for the winter.

Miss Christy McDonald, of Detroit, spent a few days with friends. Her mother, who has spent some months visiting her daughters, returned with her to Detroit.

Miss Lizzie Ferris, of Toronto, came up on Tuesday to attend her mother's funeral.

J H MacIntyre and sister Sara spent a few days with friends in Kincardine and on the 10th.

Miss Emma Kirktown left on Wednesday of last week for Toledo, Ohio, to train as nurse in a hospital there.

Captain Pete McKinnon is home from the lakes.

Mrs Catherine McKinnon was called to the bedside of her daughter, Mrs McKinnon, of Lucknow. The latest report is that the patient is improving.

Mr and Mrs Allan McKinnon, of the 8th Bruce, drove over for evening service.

GRESHAM

Mr Alex Shipley's little son is very ill at present.

Rev Mr McRae, of Kincardine, preached in Underwood and Centre Bruce churches on Sunday.

Mr Henry Dent spent Sunday of last week at his old home here.

Mrs Geo Locking and her two sons, of Rmo, are visiting at the home of her parents, Mr and Mrs Geo Brown.

Mr Alex Shipley made a business trip to Port Elgin last week.

Mr Lawrence Mawhinney is home from the West. We are pleased to see him back.

Mr and Mrs Jas A McKinnon, accompanied by Mr and Mrs McKinnon, sr, motored down to Sarnia recently and visited friends there.

Mr Wm Parker is erecting a new slaughter house.

Cyclist Jos F Brown, of Toronto was home over Sunday week, returning Monday morning on the early train.

The many friends of Mr Tom Curry are pleased to see him out and around again.

Miss Jessie Ross is spending vacation at her home on the 10th.

Mr Geo Pace purchased a car lately.

Mr Augus Annes has considerable repairing to do on the phone line on the 2nd con.

Mrs A Wood visited her sister in Clifford lately.

Miss Agnes Brown and her cousin, Miss Brown of Tautallon, Man, are down on a visit to friends in Bruce.

On Monday evening of last week a large crowd gathered at the home of Mr and Mrs Geo Brown, for the purpose of presenting their son James F, of the Cyclist corps, and Pte Dan Roppel, eldest son of Mr and Mrs Menno Roppel, 6th con, with wrist watches. These boys are fine specimens of young manhood who voluntarily enlisted to serve their King and country. As neither could be in attendance upon this occasion, the gifts were presented by proxy, the mother of each receiving them. The following addresses were read:

TO PTE JAS BROWN

Dear Friend and Brother—We, your friends and neighbors, have met here tonight as we have learned that you are about to leave for overseas. We will all miss you very much, as you were born here and grew up amongst us. We admire the noble and patriotic stand you have voluntarily taken to fight for King and country. In you we see many noble traits of character—an obedient son, a diligent and successful student at public and high school, and a consistent member of the Presbyterian church here. You have been presented by your pastor in behalf of the S S teachers with a beautiful copy of God's word, which shows the very high esteem in which you are held, and we feel confident that in you we have a representative of whom we may be justly proud. We ask you to accept this watch as a token of our esteem, and as it records the passing hours may it bring to your remembrance your home and friends and the many prayers that are constantly offered for your preservation and safe return to our midst. Signed on behalf of your friends and neighbors—T R CURRY, I. MCLEAN YOUNG, WM NELSON, IRWIN REPTKE.

TO PTE DAN ROPPEL

Dear Friend and Brother—Your many friends and neighbors are proud to know you have developed your young manhood to the cause of right and justice. You have voluntarily responded to the urgent call of king and country, and we feel confident that in voicing you a soldier of whom we can be justly proud. We will miss you very much, but we know that your bright cheery disposition will in the future as in the past gain for you many friends, and that your unweariedness and bravery will win distinction and honor at whatever post you are assigned. Your ability as a soldier is very great, and although it is hard to part from our loved ones we must make the sacrifice before we can hope to secure an honorable and permanent peace. We ask you to accept this watch as a small token of love and esteem, and when you hear it ticking away the passing moments remember your home and friends who are praying for your safety and speedy return to our midst, where you will receive a joyous welcome. Signed on behalf of your friends and neighbors, T R CURRY, I. RAPTKE, WM NELSON, MCLEAN YOUNG.

Speeches, songs and recitations, principally of a patriotic nature, were given by a number of those present. Lunch was served and a pleasant time spent.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

UNDERWOOD

Mrs John Drummond, of Kincardine, is spending a few days renewing old acquaintances here.

Miss McKay, of Kincardine, spent the week end with her friend, Miss Lena Wittig, at the latter's home on the 4th.

Many of the farmers here are taking advantage of the high price of wheat and are hauling their season's crop to town.

Many of the Oddfellows here attended the memorial service held in the Methodist church on Sunday evening for the late Pte Wesley Hang.

Pte Angus Russell was home last week for a short visit at his home on the 6th.

WITH the new Diamond Point Reproducer and New Enlarged Tone Bar all Edison Records. The clear, sweet tone reproducible in its purity is simply a translation of human music into your own home. Unless you have heard the newest Edisons you have no conception of their wonderful mellow quality. You never realized that such beauty could be applied to sound. Through the thousands of records for these phonographs the whole world of music, past and present, is open to you. Ball Pianos and Organs. Small musical instruments and Sewing Machines.

R. C. PEARCE, Auct.

Estray Cattle

CAME on the premises of the undersigned, Lot 24, Con 6 Bruce Tp, about Oct 10th, two head of young cattle. The owner is requested to prove property, pay expenses and remove the animals. PAGE HIGG, Paisley P O, R R No 2.

SECOND CON ELDERSLIE

Miss Savage spent Sunday week with her friend, Miss M Green.

Mrs V Addison and her daughter, Miss Dina, are visiting friends and relatives on this con.

Mrs A McGregor, sr, spent last week visiting at the home of her son Alex.

A prayer meeting will be held on Tuesday evening in Manley's school.

Miss Webb, teacher at Vesta, visited Mrs T Pepper on Sunday week.

The cement work is completed at Dawson's mill dam. When the mill is repaired and everything put in shape, which will likely take a couple of weeks yet, we expect to hear the hum of the saw again.

Miss Craig visited her cousin, Mrs J McCullough, on Sunday last.

Mrs A McGregor, jr, spent last week at the home of her parents, Mr and Mrs Tulloch, 8th con Brant.

Line 7 of the South Elderslie telephone has been undergoing considerable repairs.

Blain Fortune has invested in a gasoline engine, a milking machine and a sawing machine. Milking machines are a scarcity in this neighborhood, and we think to make it a profitable investment he will need to

"Feed the cows on the finest hay
And milk them forty times a day."

Ha, ha, ha! between you and me,
Chuck goes the milking machine,
Dont you see!

Minto Jackson has purchased Fred Schilling's farm for the sum of $4,500. Mr Jackson is to get possession in March.

CANTIRE

The recent heavy snow fall caused a ruffle of excitement for those who had cattle pasturing at a distance. For the time being those who had prophesied three months of open weather are in hiding.

A number from here took in the auction sale of Brown Bros' cattle and sheep on the farm of Mr Jas Cass last Friday. A good sale was had, Hunter, and soon disposed of stock to the value of $3000. Sheep brought all the way from $30 to $40 a pair.

Our esteemed neighbor, Mr Henry Winch, who for the past few months has been living all by his lonesome, became tired of baching and in a quiet way, which is characteristic of Henry, he hied himself to Port Elgin and returned with a partner (nee Miss Janet Gore) to share life's joys and sorrows. The nuptial knot was tied by Rev A G Howat, of Salem. The Cantire scribe joins with the host of friends in wishing Mr and Mrs Winch every happiness and prosperity.

Mr Neil McCalder, a native of Gillies Hill, and well known in this vicinity, paid a flying visit to his aunt, Mrs Jas Bell, after visiting his mother, Mrs Don McCalder at Salem. Neil learned the blacksmithing trade at Dobbinton and has spent the past 15 years in the west. He was one who answered the country's call to duty, went overseas as a blacksmith, but thing of this he found his way to the trenches where he was wounded and sent back to recuperate. Although he is still handicapped by his wounds he received a telegram to report for duty, and along with a party of eleven others is now en route to Ottawa and thence overseas again. Neil saw some times, but does not relish to speak much about it.

Gillies Hill Presbyterians are having their anniversary services one week earlier this year on account of similar services taking place at Williscroft. The preacher this year will be Rev W A Amos, of Brussels. The rev gentleman comes as a stranger to this neighborhood, but has preached on several occasions in Geneva church, Chesley. His pulpit ability is highly spoken of by those who heard him, and doubtless a treat is in store for those who will come to Gillies Hill on Dec 3rd.

RUBBERS!

Now is the season to buy Rubbers. Our line for this season is better than ever. New lines and new lasts have been added so that we can fit any shoe made.

Notice to Creditors

In the matter of the estate of Ella Stark, of the Village of Paisley, in the County of Bruce, spinster, deceased.

NOTICE is hereby given, pursuant to Sec 56 of chapter 121, R.S.O. 1914, that all persons having claims or demands against the estate of the said Ella Stark, deceased, who died on or about the 10th day of September, A D 1918, are required to send by post, prepaid, or deliver to the undersigned C J McKIE, solicitor for the executors, Chesley, Ontario, on or before the 8th day of December, 1918, their christian and surnames, and addresses with full particulars in writing of their claims, and statement of their accounts and the nature of the securities, if any, held by them, duly certified by statutory declaration.

AND TAKE NOTICE that after the said 8th day of December, A D 1918, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto having regard only to the claims of which they shall then have notice, and the said executors will not be liable for the said assets or any part thereof to any person or persons of whose claim notice shall not have been received by them at the time of such distribution.

Dated the 8th day of November, A D 1918.

The Trusts & Guarantee Co, Limited, Jennie Mary Bell, Annie Stark shaw, Executors, per C J McKIE, Their Solicitor, Chesley, Ontario

MOUNT HOPE

A pleasant evening was most delightfully spent at the hospitable home of Mr and Mrs James Rushton, 15th con Elderslie, on October 31st, when the friends and neighbors of Mount Hope assembled to welcome the home-coming of their son Arthur and his bride from Waskada, Man. The bride wore her wedding gown of georgette crepe, lace and pearl trimmed, and her manner was most affable. A number of beautiful presents were presented to the bride that evening. A hot fowl supper was most appetising and well served by pretty young girls who were daintily attired, after which the sacrament of baptism was given to the granddaughter of Mr and Mrs Jas Rushton, and daughter of Mr and Mrs Ernest H Grant. Then followed a choice and unique programme in charge of Rev R L Ockley, when singing and speeches made everybody glad.—Leader.

After Oil at Hepworth

Mr McKillop, a practical oil driller who has been very successful in the oil fields of Lambton near Oil Springs and Petrolea, is making another attempt to locate the valuable fluid at Hepworth. Fourteen years ago he sank the well there from which a fairly good flow of gas was obtained. He feels certain of a "strike." The first hole will be sunk 1500 to 1800 ft.

Our stock of

Christmas Candies, Nuts and Fruit

will be as complete as in former years, and prices very reasonable.

Special on Our Bargain Table—A few dozen Odd Dinner and Tea Plates which we are selling at 50c per dozen as long as they last. You know this is a genuine bargain.

We are continuing to make **THAT WHOLESOME BREAD**, and getting new customers. They use the long distance phone to have Paisley Bread shipped to other towns. 'Phone us your orders. We will be glad to deliver same.

F. S. MacLACHLAN

Wide Awake

Yes, he is. His whole appearance indicates a live, alert readiness to cope with emergencies.

You realize, of course, that clothes are largely responsible for the impression you make on others. Our clothes are the first choice of chaps who know what they want and intend to get it.

We would be glad to have you call and see our new styles and fabrics now ready for the Christmas holidays.

Special Attention to Ladies' Tailoring

I. S. CRUICKSHANK

—The blacksmiths at Ripley, Bervie, Kinloss, Kinlough, Pine River, Tiverton, Underwood, Arnnow, Lochalsh, Glamis, Amberley and Kincardine held a union meeting at Kincardine this month and decided to raise the rates on woodwork and blacksmithing on Dec 1st, 1916. This step was found necessary owing to the increased price of raw material.

—As December draws near, remind yourself that it will soon be too late to do your Christmas shopping early. The early shopper gets the pick of the stock and the best attention of the sales force, and avoids the crush that comes later. He also lightens the burdens of salespeople, clerks, delivery boys and postal authorities.

ADVERTISING RATES

Subscription Price—$1 50 per annum in advance. To United States subscribers $2.00 per year in advance.

—Mr Duncan Graham and son Peter, of Gillies Hill, are home from Lloydminster, Sask. They intend returning to the west in the spring.

—Mrs Ann McGillivray, of Port Elgin, who celebrated her 90th birthday recently, is enjoying good health and takes pleasure in knitting socks or assisting at making garments for soldiers.

—Paisley's contribution to the Red Cross Fund was $773.42, after deducting the small expenses in connection with the collection on Oct. 19th. This amount has been duly acknowledged as received at headquarters.

Red Cross Collection of Old Papers, &c.

The Gibson store will be open every day for two weeks for the convenience of country people who will bring in their old papers, magazines, rubbers, rags, &c, for Red Cross shipment.

Soldier Has Appendicitis

Word has been received here that Pte Jas Forrester, of the 160th machine gun section, is laid up in hospital in England. He was operated upon for appendicitis on Nov 10th, and is now progressing favorably.

Honor Roll Unveiled

The honor roll of Knox church was unveiled on Sunday at the evening service, the pastor being assisted in the ceremony by two little girls, Greta Fleming and Meryl McGregor. The roll containing the names of 38 young men and women, some of whom are engaged in nearly every branch of the service.

Now an M.D.

The name of Robt J Tucker, of Paisley, appears among the list of 56 students of Queen's University who have graduated at the close of the extra war session Montreal these graduates will enter the Canadian and Royal Army Medical Corps at once. Dr Tucker served a year on hospital work in Egypt.

Bruce Tp. Politics

Municipal affairs may remain quiet in the Tp of Bruce, but there is a feeling that there will be a general election for 1917. The voters have not marked before for opposition for some years, the members of the board having been returned by acclamation, even when there was a contest at times for the honor of filling the presiding officer's chair. According to precedent Reeve Jas Johnson is due to retire now, but whether he will or not, is not yet definitely known. Should he be determined to try conclusions with all comers, he may have an opponent in Deputy-Reeve P Dobson and ex-Deputy-Reeve Geo Brown. In the event of Reeve Johnson stepping down and out, then in all probability it will be Dobson and Brown for the contest.

—20c crash toweling at Spofford's for 14c yd. Don't miss it.

—For footwear of all kinds we think we lead. Come and see. Ballachey, Laidlaw & Co.

—Intelligent boy wanted to learn the printing, or girl to set type. ADVOCATE Office.

—Try Spofford's 6 lb Monarch blend tea in black, green and mixed at 25 lbs for $1 00.

—Wanted at once—Good plain cook, also housemaid. Good wages. Apply to Mrs Geo Walker, 23 Carleton St, Guelph, Ont.

—The largest assortment of fancy teapots ever shown in Paisley, ranging in price from 10c to $2 50, at F Carter & Son's.

—Just ask to see Spofford's $1 00 bleached damask tabling at 75c. It's a beauty.

—LOST—Between Wm Rowand's and North St, on Saturday night, Nov 18th, a dark robe. Finder please leave at ADVOCATE office.

—Everything raised on the farm is an enormous price now and can be turned into cash any time. We have protected your interests in manufactured goods by contracting and taking deliveries long before required, and can supply nearly all your requirements for this winter and next winter at last winter's prices. It is therefore only reasonable to ask payment of all accounts especially those before July last, to be paid in cash before 1st December next. Please attend to this now. Paisley Mercantile Co.

Stock Tonics, &c.

A quantity of **Glauber Salts**, while they last, at 10 lbs for 25c.

Goods Delivered — Both 'Phones

From the French Red Cross

Mrs Wm Minto, of 10th Bruce, received the following note, written in French, from the General Secretary of the French Red Cross:

Headquarters, Paris
Oct 17th, 1916

MADAM—I have the honor to inform you that the Canadian Red Cross has forwarded to us the pillows you sent us through their agent. I hasten to convey to you my deep gratitude for this gift, which will be exceedingly useful to us. I beg you to accept, madam, respectful appreciation.

Sent to Mimico Industrial

Two village brothers of 12 and 13 years were brought before magistrates last week on complaints that proved they were beyond parental control, and were committed to the Industrial School for a term. This institution seeks to be exercising a really good corrective effect upon those who have got out of hand at home. A former Paisley boy who was sent there for a course of training is now, after being released, settled down to an industrious life, and is conducting himself in such a way as shows that he is going to be an honorable and creditable citizen of the province.

Three for Reeve of Arran Tp.

That there will be a lively municipal election campaign in Arran at New Year's is about as much of a certainty as there can be in speaking of local election matters a month ahead. Reeve Sinclair is retiring at the end of the year, and is not being pushed out either. He has been an acceptable municipal officer, and would be an still did he choose to remain at the head of the council. The three candidates who are coming along are Howard McFadden, Andrew Morrow and Jos Johnston. The first two have had three years experience in the council, and the last mentioned two years. Here's to the big man in the south of the township.

—Printing Invitations is part of THE ADVOCATE'S business.

Old Paper, Rags, &c., for Red Cross

The townspeople are requested to have all their old papers, magazines, cardboard boxes, rubbers, rags, &c, ready for Saturday morning, when the Women's Patriotic League will have boys call for them.

McCullough—Thompson

A very pretty wedding took place at the home of Mr and Mrs G H Thompson, 647 Ossington Ave, Toronto, on Wednesday, Nov 15th, at 6 p m, when their daughter Miss Emma was united in the holy bonds of matrimony to Mr John McCullough, of Stamford, Connecticut. Rev T E Powell, of St Barnabas church, officiated. The bride was attired in a lovely gown of brown satin with trimmings of georgette crepe and lace and carried a bouquet of bridal roses, lily of the valley and maiden hair fern. She was was assisted by her cousin, Miss Margaret Acton, who wore a beautiful gown of green satin with a bouquet of pink roses, lily of the valley and maiden hair fern. The groom was assisted by Mr S Montgomery. The groom's gift to the bride was a handsome set of mink furs, to the bridesmaid a diamond pendant and to the best man a set of royal arch cuff links. After congratulations were extended all went to the dining room, which was tastefully decorated, and took part in a delicious dinner. The presents were both numerous and costly and included many cheques. Among them was a cabinet of silver from the T Eaton Co and from the bride's department a beautiful cut glass water set and mirror. The young couple left on the 11.45 p m train for their new home in Stamford, Connecticut, the bride travelling in a handsome suit of navy blue broadcloth with hat to match. They were accompanied to the union depot by many friends and relatives in special autos.

ALEX B. McPAUL, ARTIST, 286 Second Ave West, Owen Sound. Portrait painter, photos or life requisite. Crayons, Individual Certificates and hand painted portraits, water colors, velvet, etc. Write for prices. Local agent wanted.

"A VERY GALLANT GENTLEMAN."

The jangle of the old-fashioned door-bell stirred May Dundas from her reverie. The door of the room was opened, and a maid stepped in a pace or two.

"Lieutenant Fraser has called, Miss May," she said. "Shall I ask him to come up?"

May nodded.

Left alone, she turned towards a brightly-polished silver shield which hung over the mantelpiece, and served as a quite efficient mirror.

Satisfied that she was presentable, she seated herself again, and was just picking up a book when she heard the creak of the door-handle.

Twisting round in her chair, and letting the book slip from her fingers, she saw Alan Fraser.

Bronzed, athletic-looking, frank of face, and wearing the Service kit of the Strathmore Highlanders, he came into the room with a swing, and walked towards the girl. The door closed softly behind him.

Halting beside May's chair, Alan took the hand that she put out, and held it firmly. For some moments there was silence; but in the searching eyes of each lay a score of mysterious questionings, tender, unborn speeches, aching fears.

It was the man who spoke first.

"I'm glad I found you alone, May. I was hoping for that luck. Your aunt is out?"

"Yes. Sit down, won't you, Alan? We want to talk."

She lowered her eyes then, and did not look at him again for some moments.

Then: "Any news yet?" she asked, her voice not quite steady.

He nodded happily.

"Yes; we are striking camp in a day or two. We hope to be at the front in a week from now."

A little, half-crushed sob came from her, and a strange mistiness clouded her eyes.

"So soon?" she said, in just above a whisper.

"Yes; and, May, that's why I'm going to say something now that maybe I wouldn't have had the courage to say for a long time, if we had kept in this country. Look at me, dear. I want to see if there's any hope for me in your eyes."

Slowly her head was raised. She met his gaze, and a glow, half-awing in its power, but very sweet to her, surged through her being. She scarcely heard his words; there was no need.

"I don't know why I've never told you before, dear. You've had my heart all the time, but I never told you because I couldn't think it possible that you could care. I'm such a poor sort of thing compared with you. My love—my little, grave-eyed sweetheart!"

Stooping, he put his strong arms about her, and in their shelter she lay trembling, but happy beyond belief; and, with her mouth on his, knew that the glory of love had come to her for all time.

Half an hour later they said their brave good-bye.

"You will come back to me, Alan," she whispered, her small, hot hands on his shoulders. "Before so very long you will come back? Say it, Alan—say it!"

"Of course I'll come back," he answered, his voice cheery. "Maybe by Christmas-time—who knows? But, anyhow, I'll come back. But, May—"

"Yes?"

"There's just one thing I want to say. It's about Ray Davidson."

"Oh!"

"You mustn't mind my mentioning him; I've got to. I know how he's been trying to win you. Everybody here knows it. I don't trust him, May. Once I'm out of the way he'll some pestering you. I know it. Quite possibly he'll ask you to marry him."

She laughed—a broken, pathetic, little laugh.

"There's only you in the world," she managed.

"Roy is nothing. I could never like him—never."

Alan leaned towards her.

"It is not good-bye, sweetheart," he said slowly. "It's only au revoir."

Four or five minutes later May was alone, and sobbing quietly. It was a harder matter to be brave than she had thought.

* * * * * *

When the Strathmore Highlanders had been gone from the great home camp some ten days, and the sunshine of early autumn was still bright, Roy Davidson, choosing his hour carefully, called on May and asked her to marry him.

At first the surprise of the thing rendered the girl wordless. Then, with cheeks aflame, she faced the handsome, rather dissipated-looking man at her side.

"You! How can you dare to ask me that?" she exclaimed. "Don't you know that it is an insult?"

His eyelids narrowed and a nerve in his cheek started throbbing.

"An insult?" he repeated. "What d'you mean, May?"

"You don't think that you are insulting me by asking me to marry you, when you know that I am engaged to another man?"

There was a tense silence, and she noted with a dim wonder how the other's hands clenched and unclenched where they hung at his sides.

"You—are engaged!" he said, in a sort of husky mutter. "I—didn't know. It's to Alan Fraser, of course?"

"Yes."

"And you love him?"

"Yes."

"Would I have had a chance if he hadn't asked you first?"

She shook her head. Gentle as a rule, she felt no gentleness towards this man, of whom she had heard much that was evil and but little that was good.

"No," she said. "There would never have been a chance. I could never have cared for the type of man who skulks at home in safety while his brothers are giving their lives for their country. You have no ties to keep you from joining the Army, and yet you don't join. You are a coward—a coward!"

His face was dark with a sudden, bitter resentment, with a passionate hatred of his rival. His hands were twitching then to be at Alan Fraser's throat.

"So I am a coward!" he said, his voice hard. "Well, perhaps! But God grant that Fraser and I may come face to face some day! Pray, then, girl, that I may be a coward!"

Dazed, and with a numbing pain in his heart, he went from the house, and back to the little estate where for the past six months he had been laird.

For a week May heard nothing of him, then got this brief note:

"Dear May,—Having now no fear at all of German bullets, I have joined the 2nd Battalion of the Strathmores as a private, and have been lucky enough to squeeze into a draft which is to go to the front at once to make good wastage in the 1st Battalion. I've escaped weary training by this, and I'll be meeting our friend Fraser soon. He will be my superior officer, but that won't matter. I don't quite know which is the stronger — my hatred for him or my love for you.—Yours,

"The Coward."

With the torn pieces of this note in her hand, May stood staring dully in front of her, a new fear in her heart —a fear for Alan Fraser. Far more bitter than any German would be the enemy whom he would have in his own battalion—perhaps in his own company.

It was not until some weeks later that May heard from Alan, and then his letter contained news, the receipt of which she had dreaded.

"A little while ago," Alan wrote, "I had one of the surprises of my life. A draft came out to us, and one of the privates joining my company was Roy Davidson. It won't be news to you that he is at the front. But imagine his being in my company! We quarrelled, of course. That was bound to happen, and rank and so on was forgotten. I expect we'd been mad enough to come to blows, but — there wasn't time. A little dose of shrapnel wakened me to the fact that I was there to fight my country's battles, not my own.

"Davidson has been in action three times with us already, and I'll say this—he has been recklessly brave. He doesn't seem to care what he does with his life. These are the sort of fellows who win through. Nothing ever seems to touch them. Yes; he's a good fighter—Davidson—and a good hater! He and I will have to settle things some day—"

This was not all of the letter, of course; but the rest was for May alone.

Day after day she scanned with eager, fear-touched eyes the dread list in the daily paper, where every soldier's name meant the broken heart of some woman who had waited hopefully, helplessly at home. And then one day—it was just at the beginning of December—this item in the "Scotsman" caught her eyes:

"OFFICERS.

"Wounded.

"Fraser, Lieut. Alan J., 1st Batt. Strathmore H."

She did not faint when she read that, nor cry out. Tears did not come to her wide eyes. She just sat holding the paper crushed between cold hands, gazing deep, deep into the core of the leaping fire. He was wounded, they said! To-morrow maybe there might be that awful phrase: "Since died of wounds."

How could she live until she knew? How could she face the grey days of torture ahead?

* * * * * *

Two days before Christmas Alan Fraser, with an empty sleeve to tell of sacrifice made for Britain, was brought by May's aunt to the door of the room where the girl was waiting.

"She is expecting you," Miss Dundas said. "It was far better to warn her. Just go in, Alan."

Five minutes later the magic joy of reunion was over. The first soft tears shed upon her hero's empty sleeve, May sat listening to him while he spoke.

"There's something I want you to know to-night—now, dear," he said gravely. "I'm alive and back here with you because another gave his life for mine. I'm not going to give you details of that engagement when I went down; they're too ghastly. But just this you must know—the man who saved me, who, while he was wounded himself, carried me a half-mile under fire into our own lines and then died, was Roy Davidson. May, don't start like that. You must be brave, too.

"I thought we were both done for then, but he had strength enough to whisper, and I had strength enough to hear, his words.

"'It's for her I did this,' he told me. 'I loved her, and I've saved you for her. Love was stronger, after all. She'll understand. You'll see her again, Fraser; I won't. Tell her——

"That was all. I can't say any more. I'm not able. I can't forget his eyes."

Long moments passed, and she drew near to him so that her wild heart-beats thrilled him. Something wet was shining upon her cheek.

At last:

"He died for me, then," she said, so faintly that he could scarcely hear. "He died for our happiness."

Looking past her to the fire, Alan nodded.

"Yes; he died for us. God rest his gallant soul!"

Then he bowed his head, and, with his lips, stopped her starting tears.—London Answers.

HOW TO INVEST YOUR MONEY.

No person with any sense disputes the wisdom of depositing money in a savings bank and earning three per cent. per annum, but what a good business man cannot understand is, why it should be allowed to remain there and left to accumulate at that rate.

Money to-day is certainly worth more than that, but the difficulty is, the average person does not know how to invest it safely. There is a way open to every healthy person to invest his money without any risk, which may bring him or his family a thousand per cent., and no matter what the result, cannot bring him less than three per cent. interest, and that is by taking out an endowment life insurance policy in the Crown Life Insurance Company of Toronto. The moment you pay your first premium you create an estate of the full value of your policy. Should you die within a year your estate will receive a thousand per cent. on your investment; if you live to the maturity of your policy you will have returned to you more than principal and three per cent. interest.

Can there be any comparison between leaving your money on deposit in a savings bank or buying a policy in the Crown Life? Write the Head Office at Toronto for literature.

WAR IS PREFERABLE.

Former Clerks at the Front Dread Return to Civil Life.

The life of a soldier compares favorably with the pre-war existence of a London clerk, says a man who worked in the office of a great business house before he entered the service. He writes home:

"I am going into the line again in an hour or so for a few days' rest. It's a great life, except for the war, and I say in all sincerity that, after seven months of it, I have really enjoyed it.

"Think of the time saved, for instance, by lying down fully clad, even to one's boots, and the time saved by getting up fully dressed. No need to wash or shave—no water to manage it in. A good, open-air life, plenty of excitement and humor, no worry in the world; why, I fear that I shall feel like a poor stranded jelly-fish when I get back to business and a full drawer of orders."

WEDDINGS IN LONDON.

There Were Over 58,000 of Them Registered in 1913.

Marriage rate—Highest on record. Birth rate—still falling.

These are among the most interesting points brought out in the report for 1915 of Dr. W. H. Hamer, Medical Officer of Health for the County of London, England.

The number of marriages registered in London was the highest ever recorded—58,145, as compared with 43,573 in 1914 and 41,409 in 1913. The increase over 1914 is 34 per cent., but as the corresponding increase for the rest of England and Wales is only 20 per cent., there is reason for thinking that a considerable number of these marriages may not properly belong to the London population.

The estimated "civil population" cannot be used for calculation of the rate, since the males married include a number of men on service, but taking the probable population of 4¾ millions the rate would be 25.0 per 1,000. There has been a slight annual increase in the marriage rate since 1903, but the bulk of last year's increase must be directly attributed to the war.

The birth rate shows a further fall from 25.0 in 1909-13 and 24.3 in 1914 to 23.6.

The increasing tendency to marry later in life is another factor which is examined. "The effect of postponement of marriage has hitherto been considered mainly from the point of view of its relation to the duration of marriage," Dr. Hamer says, "and insufficient allowance has been made for what might be termed the physiological effect."

The London Chronicle comments as follows on conditions:

"It may be urged that if the decline in the European birth rate be largely attributed to emigration, the countries to which the emigrants go should show high birth rates. It may be noted that the United States have received nearly 20 millions of young adults from Europe during the last 10 years, and, as H. P. Fairchild notes, 'the high birth rate of our now large foreign-born population is notorious; moreover, the years of this great exodus are precisely those of the declining birth rates throughout Europe.

"One curious effect of the war to which Dr. Hamer draws attention is the arrestment of building activity, the result of which has undoubtedly been to check the outward movement of the populations which has been going on for some time, more particularly north of the Thames."

GERMANY USING CRIMINALS.

Put Into Most Dangerous Service at the Front.

D. Thomas Curtin, writing in the London Times, says: Throughout the war Germany has used every scrap of material in the Empire to help to win. To one who knows Germany, therefore, it does not come wholly as a surprise to learn that she has heeded the demands from some quarters to put criminals in the most dangerous service at the front, where they are driven to their work. I have heard it stated on excellent authority that some of them have actually been chained to the machine guns and been given this terrible chance to fight for their lives. This is a radical departure from former German boasts that no man with a criminal record was allowed to serve.

Mamma—That's just like his father. He made his money in the grocery business.

MOST NAKED FORM OF PROFITEERING

BAD POTATOES SOLD TO POOR IN GERMANY.

Tricked by Government Into Buying Food That Sickened Pigs.

D. Thomas Curtin of Boston entitles his article on German conditions published in the London Times "The Potato Trick; Rich Against Poor." It charges that the poor of Germany have been sold rotten potatoes with Government connivance.

"The difficulties of the cynical group who are the real rulers of Germany have increased," he writes. One of the countless sources of anxiety has been the harvest of the very important potato crop, now an integral part of the Austrian and German bread.

"The handling of this crop exhibits the most naked form of profiteering to which the poor have been subjected by the rich.

"Slowly the food situation in Germany has grown worse month by month. I would ask my readers not to build false hopes. This is an accurate statement; nothing approaching actual starvation exists in any part of Germany. Thus far I have discovered no child without milk. I believe the infant death rate is less than in time of peace. No German is without a sufficiency of some kind of nourishment to carry on existence.

Weak and Delicate Suffer.

"The weak and delicate are suffering, and there is a great amount of national irritability caused by low diet, but everybody is settling along somehow—the army and navy extremely well.

"No people are more easily and continuously bluffed by their Government than the Germans. Lincoln's dictum about not fooling all of the people all of the time does not apply to them.

"An abominable deception was practised upon the public with the first potato supply. For many months potato tickets had been in use, when suddenly official notices appeared saying that potatoes could be had for a few days without tickets.

"The unsuspecting public ordered great quantities, and the agrarians thus got rid of all their bad potatoes, selling them to the mass of the people. In many cases they were rotting so fast that the purchaser had to bury them, and it was found that they produced illness when given to swine. What other people in the world but the Germans would have stood it?

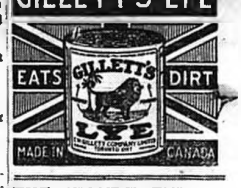
"Food Dictator Batocki has been unable to make the agrarians put the potato crop now gathered upon the market even at the maximum price allowed by the food commission. They are holding back the supplies until they have forced up the maximum price, just as a year ago many agrarians allowed the potatoes to rot rather than sell as millings to the city at the price fixed by law.

Won't Agree to Fair Price.

"In any other country in a state of siege the Government would commandeer the supplies. As the industrial classes until recently resisted the war taxes, so the Prussian Junkers snap their fingers at suggested fair laws for food distribution. What state of mind does this produce among the people?

"Outside Germany there is an idea that every German is working at top speed, the spirit of the fatherland leading him on like a flame. That was the spirit witnessed in the early days of the war. Now there is a great bluff in circulation throughout the world.

"The revelation that an angers them is that it is a lie, that all is going fairly well in Germany and that there is no longing for peace. In certain rural districts there is an intense longing for peace, not merely a German peace, but any peace. This feeling arises not only from military reasons, but from the utter weariness of the rule of the profiteers."



The writer declares that the last potato crop was poor, rye was good, wheat was fair, oats and barley excellent. He refers to the great efforts of the Germans to get oil, nuts, berries and poppies, but says the people are apathetic, as the Government has taken the crops at prices already set. He ends:

"The conquest of Rumania may yield foodstuffs and oil, and smuggling by neutrals will help the army and munition works, but if the blockade is strengthened Germany can be defeated."

A Job for a Versatile Man

According to a London paper, the Lady's Magazine for 1789 contained the following comprehensive advertisement: "Wanted, for a sober family, a man of light weight who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join in household prayer, look after horses, and read a chapter in the Bible. He must rise at seven in the morning, obey his master and mistress in all lawful commands, and if he can dress hair, sing psalms, and play at cribbage, so much the better. Wages, fifteen guineas a year."

GILLETT'S LYE

THE WONDERFUL FRENCH ARMY

REVIEW OF ITS WORK SINCE THE WAR BEGAN.

British Tribute to Accomplishments and Sacrifices of the Nation.

Is it possible to praise the work of the French army too highly? asks the Manchester Guardian. It began badly, for its plans of campaign were unsound, and, in addition, the Germans had an immense lead in numbers, in their mobilization arrangements and in most important branches of the mechanics of war. But after the opening passages it recovered with amazing rapidity. The strategy of the Marne was in subtlety the finest thing in the war, and on the Nancy front the French, under Gen. Castelnau, were about the same time exhibiting qualities of stubbornness in defence that we sometimes like to think of as distinctively British. Then followed during the winter a period of drastic army reforms which showed the patriotism of the new French army at its best, for nothing puts such a strain on it as to cashier one's friends, as General Joffre had to do at this time in the highest interest of the country.

The French army last year over-estimated its power by forcing the enemy's position, and it suffered very heavily in consequence. But for all that, in spite of its failures, what a magnificent record it has, with two tremendous offensives in Champagne, one in the spring and a second in the autumn, the first real breach in the enemy's lines by the conquest of the Labyrinth near Arras, to say nothing of fighting in Alsace and away to the north of Ypres!

Surprised Her Enemies.

And, in spite of all France's losses, she was still equal to a campaign in the Dardanelles, and after that to a leading part in the defence of Salonica. One does not know which to admire most—the loyalty to her ally Serbia in distress, the profusion of her sacrifice to the common cause, the clear, penetrating vision (strategical situation, or the stoical calm—so different from the ideas of the Frenchman—with which she has borne losses and the postponement of her hopes. But, great as France was last year, she has risen to fresh heights this year. Verdun, after the shock of the first few days, was magnificently done, and, so far from being weakened to helplessness by her losses, as the Germans had hoped, they have stirred her to fresh efforts. Her energy in the Somme battle is beyond praise and is now reaping a splendid reward. She has in General Foch perhaps the finest tactician in Europe, and her staff work and technical organization have now reached the highest pitch of efficiency. But these things would have counted for comparatively little after all that France has gone through if it had not been for the indomitable energy and the lofty pride of her people. Well may we be proud of such allies.

The ocean of life is filled with breakers; that's why so many men go broke.

ACHING TEETH RELIEVED AT HOME

Sloan's Liniment Robs Toothache of Its Terrors. Pain Vanishes in a Few Minutes.

No need to pace the floor all night with the agony of a throbbing tooth. Sloan's Liniment will quickly relieve the pain and give you rest.

A single application and the pain usually disappears. Sloan's Liniment gets right to the root of the trouble. Like a warming balm it relieves congestion, and in a few minutes toothache is relieved.

To soothe the throb of a tooth that pains with neuralgia, apply Sloan's Liniment externally. Aching muscles, rheumatism, gout, bruises, sprains, lumbago, chilblains, sprains and stiff neck can also be most effectively treated with Sloan's Liniment. Cleaner than musty plasters or poultices.

Sloan's Liniment at all drug stores in 25c., 50c. and $1.00 bottles.

Sloan's Liniment

KILLS PAIN

Think of It===

People cut out tea or coffee before retiring when these beverages interfere with sleep. In the morning they drink freely of them, strangely overlooking the fact that at whatever time of day the cup is drunk the drug, caffeine, in tea and coffee is irritating to the nerves.

More and more people are turning to

Instant Postum

the drug-free, nourishing, comfortable cereal drink.

The Reason.

Vicar—I was glad to see how quiet and still you were, my lad, during the sermon.

The Boy—Well, you see, I was afraid of waking father.

Minard's Liniment Co., Limited.

Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of Inflammation.

Yours,
W. A. HUTCHINSON.

Punishment.

Ethel—I'll back out and let you marry the wretch.

Marie—Why do you do that?

Ethel—He proposed to both of us and I want to see him punished.

Minard's Liniment Cures Distemper

Useless Work.

A Scotch farmer, on hearing that the ministry was making munitions on week days, remarked: "Munitions made by ministers are of no use; they have been making them all the week during the past two thousand years and firing them at the de'il o' Sundays, and he's aye to the fore yet."

Guard Your Baby's Health

Cheerful, Chubby Children Make the Home Happy

Weak, puny babies are a constant care to tired mothers and are subject to many diseases that do not affect healthy children.

Keep your children in good health. See that their bowels move regularly especially during the teething period. This is a distressing time in the life of every child and the utmost precaution should be taken to keep them well and strong.

By the consistent use of

Mrs. Winslow's Soothing Syrup

it is possible to avoid many childish ills now so prevalent.

It is a corrective for diarrhœa, colic and other infantile ailments. It soothes the fretting baby and permits the child to sleep well and grow healthy. It brings comfort and relief to both child and mother.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Is absolutely **non-narcotic**. It contains no opium, morphine nor any of their derivatives. It is soothing, pleasant and harmless. For generations mothers in all parts of the world have used it and millions of babies have been benefited by it.

LOYALISTS TO KAISER IN U.S.

500,000 Lamp-posts Ready to Hang Them, Gerard Says.

Herbert Bayard Swope, recently returned from Germany, writes as follows in the New York World:

How strong Germany believes herself to be in America can be seen in any of the political maps issued by the Pan-German League, on which a great blob of pink indicates the residence in America of the nine million of German birth or parentage. Those making up this number are claimed as indirect members of the league, who are, or ought to be, as the Pan-Germans see it, ready at all times to do Germany's bidding. It is the belief of these Pan-Germans that through their far-flung membership some day German "Kultur" will dominate the world.

On the day I left Berlin, only a few weeks ago, I was informed by a member of the general staff that Gen. Hindenburg had sent word through his Chief of Staff, von Ludendorff, to Col. Kuhn, our military attache, and Commander Gherardi, our naval attache, that neither would be permitted to go to the front nor have opportunities for observation, although these privileges are regularly extended to all other neutral countries. This is official, and has been made the basis of representations.

Not only does Germany believe that her political strength in this country is great enough to make the American Government take it into consideration, but the belief goes further. One prominent member of the Government told the Ambassador that America would not risk a break with Germany, because "there were 500,000 trained Germans ready to bear arms in the United States against the American Government."

"There may be," was his quick response, "but there are 500,000 lamp-posts in America ready to string them up on if they ever try it."

JUST THE THING FOR LITTLE ONES

Baby's Own Tablets are the best medicine a mother can give her little ones. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; relieve colds and simple fevers and make teething easy. Concerning them Mrs. Herbert Johnston, Maymont, Sask., writes:—"I have used Baby's Own Tablets for the past four years and find them just the thing for babies and young children." They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

CLIMATE LESS SEVERE.

What Study of Larger Glaciers in B. C. Has Revealed.

Dr. Charles D. Walcott, secretary of the Smithsonian Institution, and Mrs. Walcott have just returned to Washington after several months' field work in Canada. Accomplished by only a packer and cook, they spent most of the summer and early fall on the continental divide, which forms the boundary line between Alberta and British Columbia, south of the Canadian Pacific Railway, studying the cambrian rocks, containing the fossil remains of the earliest animal life.

Owing to the heavy snowfall of the previous winter, and the fact that most of the geological formations which they wished to examine were in the deep snow about the timber line, little progress was made in July, In August, however, sections were examined and measured in the Mount Assiniboine region, and from there northwest to the celebrated Kicking Horse pass, where the Canadian Pacific Railway has bored a double loop through the mountain in order to obtain a feasible grade on the western side of the pass.

Some years ago Dr. Walcott found a remarkable fossil fauna in boulders which had been carried into Kitching Horse canyon by glaciers that have long since disappeared. This season he located the source of these boulders high up in the mountain cirque, where a portion of what must have been a great hanging glacier is still active.

Mrs. Walcott, formerly Miss Mary Vaux, of Philadelphia, who has studied glaciers for several years, and is well known as an Alpinist, visited Glacier, British Columbia, where she measured the position of two large glaciers, and determined that the front ice foot in each case had retreated at the rate of 100 feet a year during the past two years. Steel plates were placed on the ice on the present surveyed boundary lines. The plates will be buried beneath the winter's snows, but, since their positions are relatively low as to altitude, the snow will be melted off next summer, and their locations then will indicate the amount of forward flow of ice during the year. Mrs. Walcott's studies prove that the ice has been steadily retreating during the past six years. Her measurements agree with observations made in Alaska, and indicate that the climate is not as severe as on the Pacific side of the continent as it was a decade ago.

During the field work a large number of photographs were taken, including a dozen or more panoramic views, exposures being made on continuous films eight feet in length. Besides being of great scenic interest, these photographs form valuable pictorial records showing the general localities visited and definite locations of certain strata and fossil beds.

The party broke camp at Banff, Alberta, September 30, which proved a fortunate move, as the next day a heavy fall of snow covered the entire region.

London's Many Marriages.

The number of marriages registered in London in 1915 was the highest ever recorded—56,345, as compared with 43,373 in 1914 and 41,409 in 1913. The increase over 1914 is 34 per cent., but as the corresponding increase for the rest of England and Wales is only 20 per cent., there is reason for thinking that a considerable number of these marriages may not properly belong to the London population.

THE DOOR TO HEALTH

Is Through the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

The blood is responsible for the health of the body. If it is good, disease cannot exist. If it is bad, the door is shut against good health, disease is bound to appear in one form or another. One person may be seized with rheumatism or sciatica, another with anaemia, indigestion, heart palpitation, headaches or backaches, unstrung nerves, or any of the many other forms of ailment that comes when the blood is weak and watery. There is just one certain, speedy cure—Dr. Williams Pink Pills. They make new, rich blood, and this good blood strengthens the whole system and brings good health and happiness. Thousands owe their present good health, some, life itself, to the pills. Miss Devina Laliberti, St. Jerome, Que., says:—"Last year I seemed gradually to grow weak and run down. I did not sleep well, had a poor appetite, and grew pale and generally languid. I consulted a doctor who told me I was anaemic, and gave me a tonic. This I took faithfully for some time, but it did not help me, and I appeared to be growing worse, and finally I was hardly able to go about the house and almost wholly incapacitated for work. While in this condition a friend advised me to try Dr. Williams Pink Pills, and I got several boxes. It was not long after I began their use when I could see an improvement, which just manifested itself in an improved appetite and better rest at night. From this on the improvement was rapid and I was not long in regaining perfect health. I think Dr. Williams Pink Pills are a real blessing for all weak girls."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

COMMANDERS WITH MEN.

Went Over Parapets Side by Side at Signal of Battle.

When the big push on the Somme was about to begin and the French and British armies were on the keen edge of expectation, the battalion commander on the extreme right of the British forces sent word to the battalion commander on the left of the French forces and asked him where he would be in the attack.

"I shall be over the parapets with the first wave of my troops," was the French commander's reply.

"So shall I," was the British commander's return message; "keep an eye out for me."

So, when the troops were jammed in the forward trenches waiting for the enormous mine explosions under the German communicating trenches, which were to be the signal for the assault, the British commander worked his way to the end of his furthest trench, and there he found the French commander. They stood there waiting, side by side, until the terrific explosions tore the German trenches to pieces, then one with an "En Avant!" and the other with "Charge!" leaped over the parapets, automatics in hand, and led the charge into the German lines.

Luckily, both escaped unhurt, and the story of their unusual action has run through two great allied armies on the Somme.

The English Face Altering.

Professor Keith has told the British Association that the English face is altering. "The most definite changes in the modern skull are in the jaws, gums, palate, and teeth. In every tenth modern woman and in every fifteenth modern man are deficiencies in the development of the jaws, contractions of the palate, and irregularities of the teeth, which did not become common until quite recent centuries. A minute comparison of skulls shows that the English face has become narrower and longer.

Minard's Liniment Cures Garget in Cows

The Name.

"Louis Barthou, the French statesman," said a consul of France, "is going to make a bitter war against alcohol after the war is finished.

"Barthou has and facts and funny facts to show the ravages of alcohol in France. One of his funny facts is about a Breton peasant who was asked in a law court:

"'What is your name, witness?'

"'Malguenar,' the peasant answered.

"'Your full name,' the judge said.

"'It's the same, your honor,' said Malguenar, 'full or sober.'"

Struggling to get rich quick keeps many a man poor.

COMPLEXION EVERY WOMAN LIKES

to preserve her complexion, and she finds this an easy task, if she uses Zam-Buk. This herbal balm not only keeps the surface skin smooth and soft, but penetrates to and feeds the underlying tissues. It stimulates the cells to healthy action, and produces vigorous circulation, which by carrying away all impurities creates a permanently clear complexion. How much more satisfying than a temporary completion produced by powders and cosmetics! 50c. box, all druggists or Zam-Buk Co., Toronto.

ZAM-BUK

DRINK HOT WATER FOR INDIGESTION

A Physician's Advice

If dyspeptics, sufferers from gas, wind or flatulence, stomach aciders, nervous, gastric catarrh, heartburn etc., would take a teaspoonful pure calcined magnesia in half a glass of hot water immediately after eating, they would soon forget they were ever afflicted with stomach trouble, and doctors would have to look elsewhere for patients. In explanation of these words a well known New York physician stated that most forms of stomach trouble are due to stomach acidity and fermentation of the food contents of the stomach combined with an insufficient blood supply to the stomach. Hot water increases the blood supply and liberated magnesia instantly neutralizes the excessive stomach acid and stops food fermentation, the combination of the two, being physiologically successful and decidedly preferable to the use of artificial digestants, stimulants or medicines for indigestion.

The Authority.

Bluejacket (to Chinese ship's steward)—Now look 'ere, Oswald. You can't teach me anything about China, I know, 'cos I've been there.

Minard's Liniment Cures Colds, &c.

Fixing the Blame.

Mrs. Jones had just punished her little boy, Tom. After crying for a few minutes he turned to his mother and asked:

"Mamma, did your mamma whip you when you were little?"

"Yes, when I was naughty," was the reply.

"And did her mamma whip her when she was little?" continued the little boy.

"Yes, Thomas," replied the mother.

"And was she whipped when she was little?" further questioned the boy.

"Yes!" answered Mrs. Jones.

A few seconds elapsed. Then Tommy exclaimed:

"Well, who started it, anyway?"

Schools for scandal are somewhat crowded.

THE BIGGEST COAL OWNER.

Lord Joicey Pays Out $7,500,000 in Wages Yearly.

No fanciful heraldic design adorns the coat of arms of Lord Joicey. The foremost items on his escutcheon are a couple of honest pick-axes and two pit ponies. It was typical of Lord Joicey, the world's richest coal-owner, that when he was raised to the peerage in 1906 he should have chosen this design for a crest, for he is proud of the fact that his immense fortune rests on the pit pony and the pick-axe which his father used to wield in the depths of the mine.

Born in the atmosphere of collieries and brickworks at Tanfield, in Durham, Lord Joicey as a boy grew up in the "black environment." His father, who at one time worked in a Tyneside colliery, was a man of serious thought, foresight, and shrewd common sense. He saw the future of the engineering side of mining, and earned a reputation as a clever engineer. Ultimately his son went to Newcastle to work for a wealthy uncle.

Thrifty and energetic, young Joicey saved every penny he could while learning all he could; and although for a time he was only earning the modest wage of £2 a week, he was able to save enough to invest in some mining enterprises.

With the money he inherited from his uncle Lord Joicey judiciously negotiated various deals. Some idea of the extent of his resources may be gathered when it is mentioned that some years ago his firm took a lease of Lord Durham's pits for £1,100,000, the capital expenditure being paid out of the profits within two years.

A further illustration of Lord Joicey's vast interests is contained in the remark which he made in a speech when he was presented with a portrait of himself in 1913 at the Newcastle Chamber of Commerce to celebrate his fifty years of commercial life.

"Business life," he said on that occasion, "is a good life, and to preside over a concern which spends £1,500,000 a year in wages and supports thousands of families is a thing to be proud of."

For Catarrhal Deafness and Head Noises

Here in America there is much suffering from catarrh and head noises. American people would do well to consider the method employed by the English to combat this insidious disease. Everyone knows how damp the English climate is and how dampness affects those suffering from catarrh. In England they treat catarrhal deafness and head noises as a constitutional disease and use an internal remedy for it that is really very effective.

Sufferers who could scarcely hear a watch tick tell how they had their hearing restored by this English treatment to such an extent that the tick of a watch was plainly audible seven and eight inches away from either ear.

Therefore, if you know someone who is troubled with catarrhal deafness or head noises, cut out this formula and hand it to them and you will have been the means of saving some poor sufferer from total deafness.

Nasalditch can be easily prepared at home for about 75c and is made as follows:

From your druggist obtain 1 oz. of Parmint (Double Strength), about 75c. worth. Take this home and add to it 4 pint of hot water and 4 ounces of granulated sugar; stir until dissolved. Take a teaspoonful four times a day.

Parmint is used in this way not only to relieve the toxic action, the inflammation and swelling in the Eustachian Tubes, and thus to equalize the air pressure on the drum, but to correct any stasis of secretions in the middle ear and the results it gives are usually remarkably quick and effective.

Every person who has catarrh should give this recipe a trial and thus free themselves from this destructive disease.

Allied Aeroplanes Superior.

British preparation has secured a decided advantage over German preparedness, in putting into the air about double the number of aeroplanes that the Germans can muster. The Germans have grossly misdirected their energies in building the great cumbersome Zeppelins, which have so far been of no military use whatever. The result is that now when a German aeroplane rises above the lines on the Somme for the purposes of observation, something like a half-score of Allied aeroplanes immediately appear for attack and pursuit. The German commanders are, therefore, left as badly off for information as in the old days a commander was, whose cavalry could not keep the field against the enemy's.

Minard's Liniment Cures Diphtheria

Hermits in Italy.

There are still hermits in Italy who live solitary lives in mountain caves, and they number no fewer than nine hundred and ninety. Among these recluses there are sixteen who are over ninety-five years of age and three centenarians, while all the others have passed the age of fifty.

Killing the Calves

—All sorts of excuses are offered for the high price of beef, the most plausible being the alleged demand for veal—"the killing of calves which should be allowed to grow into regular beef." You cannot have beef if you eat it as "veal," but you can have Shredded Wheat Biscuit which contains more real nutriment than beef and costs much less. Shredded wheat biscuit is the whole wheat steam-cooked, shredded and baked. Make it your "meat" for ten days and see how much better you feel. Wholesome and strengthening for any meal with milk or cream or in combination with fruits.

PAISLEY, NOV. 29th, 1916

THAT GREENOCK RED CROSS RESOLUTION

At the last meeting of Greenock Tp Council, held at Chepstowe on Nov 21st, the following communication was read :

GENTLEMEN —At a public meeting held this day at the call of the Reeve, the question of making a grant to the British Red Cross Fund was considered, and after a full discussion it was moved by H G Clark and seconded by W Megraw and carried unanimously, That it is the wish of this meeting that the Greenock Council at its next regular meeting grant to the British Red Cross Fund a sum equal to the levy of one mill on the dollar on the total assessment of the Township of Greenock.

J J DONNELLY, Chairman
J G CARTER, Sec'y of Meeting

Dated Chepstowe, Oct 24th, 1916.

The township clerk, Mr Thos H Purdy recorded and reports "No action taken" on the above communication. Yet Councillor Campbell writes to the Walkerton Herald and Times stating that the resolution had the unanimous endorsement of the Council, and the will of the ratepayers with reference to this Red Cross grant will be faithfully carried out by the Council. Mr Campbell also would assure the public that "the Greenock Council is just as patriotic as any other body of loyal subjects." THE ADVOCATE and a lot of Greenock people, as well as the public generally, will be glad, indeed, to give the council credit for a loyal action when they have passed that grant for $1800.

Wounded by Accident

Gunner Dan Roppel, son of Mr and Mrs Ed Roppel, 6th Bruce, writes home informing his parents that he is now in an English hospital. He was wounded while on duty in France, his thumb and first finger of the left hand being blown off at the first joint from the knuckles, by the accidental discharge of a detonator he had in his hand. It happened down at the Somme. His present address is Gunner Dan Roppel, No 368867 18th Battery, C F A, Ward 20, 2nd Birmingham War Hospital, Northfield, Eng. He is getting along fine there.

Anniversary and Lecture

Anniversary services were held in the Baptist church on Sunday. Rev Mr Wylie of Durham occupying the pulpit both morning and evening and preaching very able and inspiring discourses. On Monday evening the pastor, Rev M Neilson, delivered an admirable and most interesting lecture upon his experience of five years as a missionary in the Isle of Sicily. This beautiful island, the garden of the Mediterranean and the granary of Rome, is part of Italy and under the same government. The church of the people is that of Rome, but missionaries of the Protestant denominations are laboring at different points. Mr Neilson was stationed at Palermo, the beautiful capital of Sicily, which is a city of 300,000. Nine-tenths of the Sicilians are illiterate, and the industrial conditions are so low that slavery actually exists in connection with the working of the extensive sulphur mines on the island. Working men in other occupations earn at the highest 30 cents a day. Brigandage was common up to the time of Mr Neilson's residence there, and he had the experience of being made a prisoner for three days, but circumstances permitted his escape before demand of ransom. Notwithstanding all the unattractive sides to life among them the speaker said he learned to love and admire the people. They are highly artistic, as demonstrated in the superior kind of their paintings, pottery, sculpture and fine architecture. They are also very excitable and exceedingly polite. Honesty does not abound among them, but they would go through anything for one they deem a friend. The lecture was replete with incidents as to the legendary and romance, religion, customs, habits and characteristics of the people. The lecturer well deserved the vote of thanks accorded on motion of the three local ministers of the town. Mrs Neilson having been with her husband in the sunny isle, added to the interest of the lecture by singing a familiar hymn in Italian words, and relating incidents of their experience at the mission. Solos were sung by Mr Art Pfaff and by Rev Mr Wylie, who occupied the chair.

AN IMPORTANT LETTER FROM NIAGARA FALLS.

Niagara Falls, Ont.—"I was miserable, tired out and dragging around. My legs could scarcely support me. My husband had read about 'Favorite Prescription' and he got me to use it. I used four bottles and the results were surprising. I got stronger, was less nervous, my appetite improved and I felt like a new person. It is the best medicine for women I have ever heard of." —Mrs. A. C. Brown, 39 Clifton Ave., Niagara Falls, Ont.

There is nothing that will bring comfort and renew hope to the invalid so surely as good news. When the vital forces are at a low ebb and everything seems useless, a ray of joy and assurance will stimulate the weary body to new effort and energy. A letter from a loved one has turned the tide in many a siege of sickness.

Doctor Pierce, of the Invalids' Hotel, Buffalo, N. Y., has good news for every suffering woman. Write him to-day and tell him your troubles, and he will send you just the right advice to restore you to health and bring back the roses to your cheeks, all without charge. His "Favorite Prescription" has been the means of thousands of suffering women. Many grateful patients have taken Dr. Pierce's advice.

Mothers, if your daughters are weak, lack ambition, are troubled with headaches, lassitude and are pale and sickly, Doctor Pierce's Favorite Prescription is just what they need to surely bring the bloom of health to their cheeks and make them strong and healthy.

It is not a secret remedy because its ingredients are printed on wrapper. Sold in either tablet or liquid form.

Soldier's Trip to the Heathered Highlands

Armed with a pass good for eight days' leave, Piper Harold McLeod, of Paisley, started out from Bramshott Camp, England, and travelled over the borders and into the Highlands of Scotland as far as Oban. In a voluminous letter written to his mother, Mrs N D McLeod, Harold gives a detailed account of his perigrinations, which is very interesting, indeed, but altogether too much to reproduce in our limited space. We can take only a few excerpts. Glasgow he found to be a very busy city of about 1,250,000 people, and men are so scarce there that some of the street cars are run wholly by girls. The shipbuilding industry and the big departmental stores are two of the chief features of life in Glasgow. Loch Lomond is 23 miles from there, and the trip is made by street car all the way. Rowing up the river Leven and into Loch Lomond, he and a soldier companion obtained a grand view of the majestic heaths covered hills that tower thousands of feet up into the morning mists. The water in the loch is said to be as deep as the mountains are high. The loch is dotted with 24 islands, the largest of which is used as a sheep run and is in charge of a shepherd. There is an old castle on this island, and from the top of the ruins they got a fine view of grand Ben Lomond. Steamers run up the loch 23 miles, also gasoline launches. The land is owned by the Duke of Montrose. Rob Roy and Robert the Bruce are supposed to have slept and taken meals on the island. On the way back to Glasgow a stop was made at Dumbarton and its famous castle built in the 12th century. Among the points of interest between Glasgow and Oban is Robroyston, where Sir William Wallace was betrayed. Here the big steel works are now located. Falkirk, Linlithgow; the field of Bannockburn (the road the English came down was pointed out); Stirling and Stirling Castle which is upon a hill commanding a lot of country; Bridge of Allan, which is considered the nicest town in the Lowlands; Callandar, a dandy spot, and the beginning of the Highlands; Loch Lubnaig, the town of Strathgle; Balquhidder, where Rob Roy is buried. Here the railway is high on the mountain side and enters gloomy Glen Ogle, a wild rocky valley, whereas descent of 600 feet is made in less than six minutes' run; Killin Junction, Killin town and Loch Tay. From Glen Dochert Ben More could be seen, 3,813 ft high; Loch Dochert, Calanlarich station, and through Strathfillan and the valley of Dalrigh, where Bruce lost the Brooch of Lorne, now at Oban; Tyndrum and Glen Lochy, with high heathered hills upon which sheep and lambs are grazing, and running water forming numerous pretty falls. Flowers growing at stations along the way made the road nicer than through England. Dalmally, at the head of Glenorchy, "is the loveliest town in that lovely glen." Next saw Loch Awe, and Ben Cruchan (3,689 ft). In the famous Pass of Brander the hills take a steep drop of 1000 ft in many places. At the pass of Loch Awe are a lot of cairns that are monuments of many a fierce fight between the MacNaughtons and the McGregors. Next we saw the mansion house of Inveran, from where the Argyles went out to plunder many an estate. Barcaw station, where one acre miles into the hills, Achnacloichs, Connell station, Glen Creitten, and then Oban, which is certainly a nice town, with mountains at the back of it and mountain inspired islands in the bay acting as a shelter. With hills all around, the town is in a circle, and the bay runs almost to the hills right in the middle of the town. Oban is an old town, but did not grow until the steamboats arrived, and now it is the heart of the Highlands. A poet says of it :

"To there the steamboats drive about,
My tongue is no deceiver,
Out and in and in and out,
Like shuttle of a weaver,
To now to Mull and now to Skye,
And now to mouth of Clyde, ait,
Like magic aloud and ancling speed,
They pass the purple tide, air."

"I went to the Sailors' and Soldiers' Rest for tea, and was made welcome by the ladies there. They called me 'a great lad' to venture alone to Oban when I did not know a soul. One of the ladies was wife of Sheriff Wallace. When I told them my grandparents came from the Lewis, they wanted to know my name and I asked them to guess it. Mrs Wallace struck it right offhand, and wanted to know if I had any relatives in Skye. I stayed at Maxton's Temperance House, just a boarding place. Oban is a summer resort. Wealthy people come in from Glasgow, and the place is filled with Englishmen in summer. From the top of a mountain called 'Cranraig-a-Minintia' I had a view of the whole town, the bay and the islands." Oban has the finest harbor in Scotland, protected by islands. A party of four went out sightseeing, and the first place was Dunnolle Castle, dating back to the 12th century, and some parts of it believed to have been built in the 9th century. This was the seat of McDougall of Lorne, and was a royal place in its best days, as the Lornes were almost as good as kings. The McDougalls still own it, descendants of the original builders. They lost the castle in a scrap with the Argyles, and hold now only the title of Dunnolle, the Argyles wresting from them the title of Marquis of Lorne. McDougall lives in a mansion house at the rear of the castle, and it is here that the "Brooch of Lorne" is kept. The castle is all in ruins except a part of the main tower, and the whole is overgrown with ivy. The remains of moat, drawbridge, gate, etc, can be seen. On a farm in the glen near here there is the old-style building-house, barn and stable all in one. Another old ruined castle is Dunstaffnage, away out on a promontory in Loch Etive. There they have some guns taken from a ship of the Spanish Armada, which was sunk at Tobermory. Dunstaffnage is the burial place of the Campbells. Flora McDonald was a prisoner here for a time. Here, too, the famous "Stone of Scone" reposed for a while. Up the hills on the other side of Oban they passed Lochavullin, now city and used as a playground. Glenshellah, where the MacKelvie hospital is; Soroba Lodge; and from the top of the glen had a view of Ben Cruichan and the Glen Etive Hills. From the top of hills on Kerrera Island they saw the Islands of Lismore, Seil, Scarba and Mull, and the Pass of Zura. On a clear day Colonsay and Islay can be seen from there. On Kerrera Island is Gylen Castle, built after the expulsion of the Normans, and was the main stronghold of the McDougalls. It was destroyed in the 17th century by Leslie's army. Near the castle is a field known as Dalreigh, "the king's field," where Alexander II. was killed. By small steamer a trip was made to Port William, 38 miles from Oban, passing among others the Island of Lismore, "the Great Garden." On the hills is one of the smallest cathedrals in Scotland, it being only 60 x 30 ft. A call was made at the little village of Aupin, where the Stuarts come from. Loch Leven, a bay which was entered by the steamer, is described as the most picturesque spot the writer has ever seen. Hills high on all sides, and with only a hundred yards of green cultivated lands at the water's edge. From Ballachulish, a port at the entrance to Loch Leven, just before arriving at the pier the entrance to Glencoe could be seen. It was farther up the glen, to the pass of Glencoe, that the historic massacre took place. Fort William was built by Cromwell. Very little of the fort is standing to day, as it had to be wrecked to allow the railroad to come in. The Gaelic is heard a great deal at Fort William. Ben Nevis, 4,406 ft, the highest mountain in Britain, is quite near, but time would not permit going to it. While on the boat we had a view of the top of Ben Nevis, a very rare thing. One man on the boat had been there 20 times, and this was the first time he had ever seen the top. Glen Nevis is near the town, and the party walked up that road a short distance and rested there a while. Loch Ell, a short way by boat from Glen Nevis, is in the very heart of Lochaber. Loch Eil is owned by the chief of the clan Cameron of Lochiel—the original Camerons (Cam-shrons, crooked nose), who have always held it. The Camerons are of the same race as the MacDonalds, and the chief of Lochiel is known as "the MacDonald Dhu," and he always signs himself "Lochiel." The Lochiel of today raised a battalion of "Lochiel's Own" Cameron Highlanders at the outbreak of the war. He was their colonel until a short time ago, when he was wounded at the head of his regiment. At Lochieldale is where Prince Charlie posted a notice, offering a reward for the capture of George II, and near Loch Shiel in 1745 the standard was raised by Charlie's clans. This point on the return trip to Oban was about the end of the historic sight-seeing by the writer on this furlough, as the following day he began his return journey to London. He was very sorry, indeed, to leave "The Oban." Right-seeing in London, though interesting in a way, was evidently a formal proceeding after being in the Highlands.

THE TONIC THAT BRINGS HEALTH

"Fruit-a-tives" Builds Up The Whole System

Those who take "Fruit-a-tives" for the first time, are often astonished at the way *it builds them up and makes them feel better all over*. They may be taking "Fruit-a-tives" for some specific disease, as Constipation, Indigestion, Chronic Headaches or Neuralgia, Kidney or Bladder Trouble, Rheumatism or Pain in the Back. And they find when "Fruit a tives" has cured the disease, that they feel better and stronger in every way. This is due to the *wonderful tonic properties* of these famous tablets, made from fruit juices.

50c a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

—Wiarton Boy Scouts made the second highest marks for rifle shooting in Ontario, being second only to Ottawa.

—The Department of Agricultural has issued a bulletin relative to poultry raising, in which a warning is given, particularly as to selling off pullets, also marketing birds that are not fat. The pullets are needed for egg production, and the lean fowl are reducing the price of poultry. Profitable poultry raising should be the aim of those keeping flocks, and those who get rid of their pullets now will likely miss the best egg selling period of the century.

Prosperity Not Everything

The prosperity of Ontario farmers is a matter for legitimate thanksgiving, but occasionally one finds the kind of man who is so tied up to the dollars and cents side of life that he has no consideration for many things a man cannot afford to forget. A farmer of this type was on the C P R train between Mt Forest and Harriston one day recently and he was holding forth to his neighbor on the great benefit derived by the farming fraternity from the war. He was of the opinion that if the war just kept up a year or two longer the farmers would be right on their feet financially. A quiet looking little old lady overheard the farmer's remark. Thinking of her two sons doing their bit somewhere in France, she compared their action with the worldly selfish outlook of the talkative farmer. It made her so angry that she bounced into the aisle, approached the farmer and broke her umbrella over his head. She told him she would listen to no man talk as he had done, and her with two sons facing death in the trenches to keep him in safety.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XV.—(Cont'd).

"But," he said, with a troubled face, "you ain't going into that beastly room, captain?"

"I am, and so are you," said the captain. "No words; remember your blow and your revenge. You work for it to-night while you obey me."

Jem caught up the lantern with desperate bravado and lit it.

Meanwhile the captain exchanged his coat for a pea-jacket, and drew a thick pair of stockings over his boots.

Jem, following his instructions, did likewise, and then waited for further orders.

"You could pick locks," said the captain, "one thing, Jem; have you forgotten the art?"

Jem grinned.

"Not quite. I dare say I could manage it."

"Good," said the captain. "Have you got the tools."

"I never goes without 'em," said Jem, "they're very simple, and they don't take up much room, and no gentleman should be without 'em." And as he spoke he drew from his pocket a small piece of steel and a stout piece of wire bent at the end in the form of a hook.

The captain nodded approvingly.

"Quite right, Jem," he said, "and now for the deed. If you feel nervous take a sip of this," and he poured out a glass of brandy.

Jem tossed the dram down eagerly, but, fiery as the liquid was, it did not diminish his dislike and horror of the task before him, and when the captain in his stealthy way opened the window the strong ruffian shuddered.

But spurred on by his new motive—the thirst for revenge—he obeyed the signal from his master and lowered himself from the window without hesitation.

When Jem had reached the broad window ledge he loosened the rope from his waist, and the captain, feeling it slacken, prepared to descend by it in his turn.

It was a perilous attempt, no doubt. Every step had to be taken with the greatest nicety.

At last, after what seemed a terrible time and amount of exertion, he heard the short, spasmodic breathing of his accomplice, and stretching out one hand he felt about until he touched something.

It was Jem's leg, and so suddenly had the captain clutched it that Jem, whose nerves were strained to their utmost pitch, uttered a sharp cry of alarm.

"Hush," said the captain, sternly. "Quiet, you idiot. It is only I! One such another cry and we are lost. Utter a word and I'll drag you down!"

Then, exerting all his strength, he drew himself up to the ledge, and, panting for breath, seated himself beside his accomplice.

"Phew!" he said. "But that was tough work! Turn on the light."

"It is exactly as I imagined it," muttered the captain; "and made for my purpose." Then, after glancing through into the dusty window for a few minutes, he tried to push the lower sash up.

But the window was locked.

Without a moment's hesitation the captain tied his handkerchief round his hand, quickly broke the pane nearest the fastening, then he inserted his hand and pushed the catch back.

"Now, Jem," said the captain, "drop in carefully, and when you reach the floor remain motionless until I am by your side. Remember not to move a step until you get the word from me. It is of the greatest importance, as you will see."

Very suitenly, and with compressed lips as if he were keeping back his fear and horror with great difficulty, Jem dropped into the room, remaining on the spot which his feet had first touched.

The captain followed his example.

"Now," he said, in a low, firm whisper, "attend to me and pay particular attention. Walk to that bureau in as few steps as possible. You can stride it in three steps. When you reach the bureau stand with your face toward the lock without moving."

Jem, nodded, and lighted by the lantern which the captain held, he strode to the bureau.

The captain followed him, taking care to tread in the same footprints.

"Now," he said, "I will hold the lantern while you try the lock with this bunch of keys. If you can't manage it, it must be picked."

Jem took the bunch and, selecting a skeleton key of the size required, tried it. But the lock was a good one and defied all his efforts.

Then he went on his knees and in a workmanlike manner picked the lock.

Then the captain commenced searching within the bureau.

"I am looking for a secret drawer," he said.

"Why didn't you say so, then?" said Jem. "There it is," and he touched a spring concealed in a part of the beading. "I knows where they are, right enough. All these old-fashioned 'uns is much alike. Why, dang it!" he added, with a deep disgust, "it's empty!"

But the captain's smile was anything but one of disappointment.

"So it is, Jem, and suppose we put something in it?"

And as he spoke, he took the parchment from his pocket and laid it carefully in the drawer.

Jem stared.

"That is a rum go, cap'n," he said, "to go and take all this 'ere trouble, in risking our necks and running the chance o' meeting all sorts o' nasty things for the sake of putting a piece of paper in this old concern."

"My good Jem, don't worry yourself about what you cannot understand," retorted the captain. "Now go back, step by step, in the same footprints. Mind, go as slowly as you like, but make no more marks."

Jem obeyed, grumbling and wondering, but he was a little easier when he saw the next step in the captain's movements.

Carefully guarding against stepping into fresh places, he stooped down and shook from his dredger a regular and equal quantity of dust on to the handmarks and footprints which they had made.

Then Jem understood the use of the flour dredger.

Spot by spot the captain pursued his task until he had reached the window, against which Jem leaned, stolidly watching him.

"Where," whispered the captain, pointing to the polished floor, which presented an unbroken surface of dust. "If you were obliged to swear that the room had not been entered—that the floor had not been walked across for five years, would you have any objections to say so?"

"Not I, cap'n," retorted Jem, quickly. "Not that that signifies, because I'd swear to anything, but it's right enough. Anybody 'ud say this room hadn't been looked at for years. At least," he added with a shudder, and in a lower voice, "not by human critturs. There's other sort I have heard don't make no footprints nor no noise, so they don't count."

The captain smiled.

"All right," he said, "I don't care for ghosts, Jem, they only frighten such fools as you. Get up on the sill and shake the dust down on these bare parts."

Jem laid his hand upon the sill and was about to draw himself on to it when he was conscious of a sudden stream of soft blue light in the room.

Without turning round he whispered, warningly:

"Don't turn the light on so full, captain. Somebody might be about and see it at the window."

"What light?" said the captain, who was bending down with his face to the window, powdering the spots from which their feet had removed the dust. "I have turned no light—hah!"

The exclamation which broke the sentence caused Jem to turn his head with a vague sense of alarm.

No sooner had he done so than he fell to the ground in a paroxysm of fear.

There, on his knees, motionless as a statue, and his dark face upturned, was the captain, staring at a misty blue light which seemed growing out of the side of the room.

Jem uttered a groan of dismay and horror as there slipped or rather floated into the room the dreadful figure which he had seen at the cruel window.

It was the White Nun!

Slowly, and with a floating, gliding motion, the figure advanced.

Then it seemed to see them, for it moved its skull slightly in the direction of the men and stopped.

The captain, shaking off the horrible influence of dread, sprang to his feet.

He was about to advance to the horrid thing, but the blue light suddenly disappeared, the figure glided out of the stream of light flowing from the lantern and all the captain saw was the fiery eyes and the dull gleam of the white, ghostly drapery.

"Ghost or no ghost," he hissed, "you shall not escape me!" and he sprang forward.

But before he could clutch the apparition it drew back with a gliding motion, and seemed to vanish through the wall.

With a bewildered and daunted air the captain glared around.

The two human beings were once more alone.

White and trembling, the guilty schemer turned to the window and grasped Jem's arm.

"Come," he said, hoarsely. "We've been dreaming."

Without a word, and trembling in every limb, the pair descended one after the other, the captain remaining last, and shudderingly expecting to feel the ghostly hand of bone upon his throat.

But the vision did not appear again, and, exhausted with exertion and horror, the two men stood in their own room staring at each other's white faces.

Notwithstanding the lateness of the hour at which he had retired to rest, the captain was up early in the morning and with his cheroot in his mouth, strolling in the Park.

Whistling his favorite air, he leaned the old fence which divided the neatly kept rosary of the modern garden from the cold, waste little courtyard of the ruined chapel, and with cautious feet and watchful eyes, entered the broken and crumbling cloisters in the search for more evidence of the apparition which had so startled him on the preceding evening.

Next the cloisters was the chapel, or what remained of it.

The captain stumbled to the middle of it and looked up through its roofless height to the sky above.

In the center of the facade was the large oriel window.

A portion of the old organ-loft clung to it, and was lost on either side in a mass of ruined, moss-covered stone, which was the remains of a flight of stone steps.

"No one but a ghost," muttered the captain "could walk along there."

With an emphatic exclamation he turned his attention to the wall next the house.

He feared that he could distinguish the dark outside of a door, but, by the aid of a small opera-glass which he had brought with him, he made out that the ivy had grown over it to such an extent that egress or exit by it was impossible.

He did not believe in ghosts, and yet if the figure he had seen were a human and alive how did it reach the deserted room?

While he pondered a footstep sounded behind him—so suddenly that he turned face to face with Leicester Dobson.

The meeting was so unexpected that both men were, so to speak, off their guard.

For a moment only was the captain's face naked, next he had resumed his mask, and held out his hand.

"Good-morning; you startled me! This is a place for ghostly meetings, and though the hour is inappropriate, a little surprise is allowable."

All this with a genial smile.

Leicester just touched the hand and nodded.

"I am glad I met you this morning, and so early, Captain Murpoint," he said, in his grave, clear voice, "for I have some unpleasant information for you."

"Indeed!" said the captain, glancing up at his face for a moment, then raising the opera-glass to his eyes. "Indeed, I am sorry for that. Of what nature?"

(To be continued).

MOTHER
SEIGEL'S
SYRUP

The proof of Mother Seigel's Syrup is in the taking. That is why former sufferers whose vitality was being sapped by Indigestion, say it is *just excellent* for stomach, liver and bowel troubles. Thanks to Mother Seigel's Syrup, they are now strong and well.

IS EXCELLENT FOR

If you are afflicted by Indigestion or other disorders of the stomach, liver and bowels take Mother Seigel's Syrup regularly for a few days; long enough to give it a fair chance to make its beneficial influence felt. Then note the improvement in your appetite, your strength, your general condition. 2013

HEADACHES, BILIOUSNESS
CONSTIPATION
INDIGESTION.

That bottle of Syrup contains three times as much as the 50c size.

ON THE FARM

The Gas Engine.

Few practical farmers would listen to a salesman who offered them, at any price, a hand-power feed grinder. The same men will go to town, purchase a washing machine so large that it would almost stall a one-half horsepower engine to run it. Do they think where the power to run this machine is to come from? (True it is that some men run them, but not always). No, they take it for granted that it is so far ahead of the old method that the wife or hired girl should be satisfied to turn the the crank, or work it back and forth in whatever the prescribed method may be.

The pumping of water for the stock in the barn has always been considered one of the most important uses to which a gas engine could be put. What about some labor-saving device that would pump water to the house? Then the vegetables could be easily washed by turning a faucet and letting the water do the work, the butter could be easily washed, the Blue Monday would be a thing of the past.

Electric light is another convenience which this source of power makes possible. These are some of the more common labor-saving devices, but let us look at some others that are possible.

Let any man watch a woman preparing a meal and he will see the energy she expends is mostly in doing countless little things which tire her more by their monotony than by actual work. A dish washing machine will relieve the hour-e-wife of the most disagreeable of all tasks. Why should the country woman not have a vacuum cleaner? Without the engine a small shaft driven by hand could give power to a food chopper, knife cleaner, coffee grinder, etc., and do many other tasks in the kitchen.

The housewife will insist that the engine must be clean and easy to start. She does not want one that will spatter oil all over. Many reliable engines are on the market and do excellent work when used intelligently. Labor is scarce and often hard to get along with; hence like a possible solution.

Many of our readers will say these ideas are just notions and sound very nice but are not practical. In the older-settled districts in this new country many are contemplating building large modern houses, while many have done so already, and this question should be given every consideration. It will pay the outlay many times if so much of the drudgery that rightly drives girls off the farm will be eliminated. Most men will gladly help to do their part if there is a demand for something like this, so be sure and let them know your wishes. Then we will be able (1) to do things we had not the time to do in the past; (2) to do work better than is possible by hand; (3) to find more time for the development of a higher form of culture.—Farmer's Advocate.

Calf Food Must Be Right.

The raising of a really good dairy cow depends very greatly upon the way she is fed when she is a young calf. Most important among the details is the temperature of the foods. The most careful experiments prove that some milk is necessary for the calf before she reaches the age of eight weeks. The food value of this milk may be greatly reduced or even destroyed by feeding it cold.

Feed milk warm always, whether it be whole milk or skim-milk. The nearer it is to the temperature of the cow, 102 deg., the better. The calf's stomach curdles the milk, the same as in a cheese-vat in which rennet (a portion of the calf's stomach) is placed, provided the milk is properly warmed. With correct temperature and favorable precipitation of the curd in the calf's stomach, injurious gasses will not be formed. But if it is otherwise, poisonous gasses are generated and putrefaction, more or less severe, often prevails in the intestines.

Thus it is that cold milk fed twice a day injures instead of building up, and the calf shivers, humps her back, her coat stares and her paunch is painfully distended. As a result her future usefulness as a cow is impaired.

THE desolation and hardships of war, and the worst of winter weather, cannot damp the spirits of our Canadians when the Christmas boxes arrive from "home".

As you plan the parcel for HIM who is dear to you, don't forget that Gillette shaving equipment is just as keenly appreciated on active service as are sweaters, mitts and "eats". If he already has a

Gillette Safety Razor

send him a generous supply of Gillette Blades, for probably he is sharing the razor with his pals who are not so fortunate.

Clean shaving is in high favor among our troops—because it is sanitary—because it makes the dressing of face wounds easier—*but most of all because of its bracing effect.* The Gillette is best for the job—and the man who has one is most popular in his platoon.

Whatever else you put in his Chriatmas box, be sure there's a Gillette Safety Razor or a supply of Blades. You can buy from your Hardware Dealer, Druggist, Jeweler or Men's Wear Dealer—"Bulldogs" and Standard Sets at $5.00—Pocket Editions at $5.00 and $6.00—Combination Sets at $6.50 up.

Gillette Safety Razor Co. of Canada, Limited
Office and Factory—THE GILLETTE BLDG., MONTREAL.
317

The coat of a thrifty calf should be smooth, close and shiny; not staring and dull. Success with young animals comes from correct and sufficient feeding, and it must be carried on with persistent regularity.

Butchering Directions.

Never kill an animal that is losing flesh is a maxim of good butchers, for the meat is growing tougher and dryer. But it is possible to have pigs too fat.

Give the hogs water but no feed a day before killing. Be sure the bleeding is done before scalding or the skin may be left too red. Scrape it as quickly and rapidly as possible after scalding. A cold carcass is hard to scrape well. Keep the hog movin a barrel. If the animal is left pressed against the barrel the hot water can not get at that part of the the carcass. Scraping is easier when a shovelful of hardwood ashes, a lump of lime, some concentrated lye, or a handful of soft soap, has been added to the water. Scald when the temperature of the water is between 140 deg. and 160 deg.

After scalding and scraping off the hair, hang up the carcass, carefully remove all internal organs, strip out the leaf lard. Hang where there is a circulation of cool dry air, until all animal heat is out—from twenty-four to thirty-six hours after slaughtering.

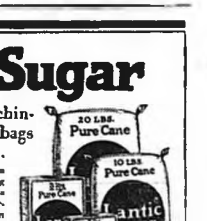
There are two methods of curing meat—the brine and the dry cure. For a warm climate the brine may be safest, but for the highest quality and finest flavor the dry cure is preferred, for brine destroys some of the soluble protein in meat, which gives its flavor. A piece of meat that has been soaked, or even wet, is not so good as before.

Healthy Hogs Resist Cholera

Hogs are not as resistant to disease at this season of the year as they are in the spring when getting an abundance of green forage, and having access to a wide range. It is necessary, therefore, to give them more attention and better care to offset seasonal conditions and danger from new corn.

Do not feed in the same lot, or on the same acre of ground, day after day. This contaminates the feeding places, and also attracts crows, pigeons, and sparrows which may have been feeding with cholera infected herd. Throw the feed out in a different spot each day, thus giving the pigs a clean "plate" from which to eat.

The water supply is of much importance to the health of the hogs at this time of year. Old mud wallows are never good, but are not so bad if the hogs can have pure water to drink, but if forced to bathe and drink in the same "tub" serious trouble can be expected at any time.



Lantic Sugar

is packed by automatic machinery in strong white cotton bags and cartons at the refinery.

This is far safer and more sanitary than sugar packed by hand in a weak paper bag which breaks at a touch. No hand touches LANTIC SUGAR until you open it yourself. *Just cut off the corner* of the carton and pour out the sugar as you need it.

About the House

Useful Hints and General Information for the Busy Housewife

Economical Dishes With Ham.

No matter what the vegetarians may say, and no matter how earnestly we may be assured that meat is unnecessary and that it is one of the most expensive forms of food, we all keep on eating it and, incidentally, growling about the price, so maybe we may find some consolation and some profit in the consideration of the capabilities of a ham.

We can almost hear you exclaim: "But ham is dear"; it is, but it is economical, because there is not a single bit of waste about it. Every particle of the meat can be used and hambone makes the most delicious flavoring for soup. It is true that a whole ham is a big proposition for a small family to handle, but it is possible to buy a half, or if you have bought the whole, there is no need to eat it all in a week, for it keeps well and can be served in so many ways that there is no danger of it becoming monotonous.

It is a good plan to leave a ham steeping in cold water for a few hours before boiling, so as to make it more delicate in flavor by removing some of the brine. Then put it down in cold water and bring slowly to the boil, keeping it simmering gently until cooked; but be sure not to let it cook too quickly, or it will be tough and hard. If the cabbage is to be cooked with the ham, the meat should be put on thirty minutes earlier than otherwise and taken up before the vegetable is added to the water, because the water must be boiling rapidly for the vegetable, and that would spoil the ham. Keep it boiling until the cabbage is cooked, then draw to one side and put in the meat again to get quite hot. When ham is properly done the skin can be pulled off easily, and it should then be dredged with flour and browned in the oven. While it is being browned, the cabbage should be drained, chopped finely and arranged round a very hot dish, the ham being placed in the center. If you want to serve the boiled ham cold, it ought to be allowed to get cold in the water in which it was cooked.

A two and one-half inch thick slice, which is to be broiled or baked, should be treated as follows, and served with caramel sauce:

Trim and wipe the slice of ham with a damp cloth and put in a pan with enough cold water to barely cover it. Boil very gently for forty minutes, then take out and stick five or six cloves into the fat. Put into a baking tin and dust very lightly with pepper, and cover with two tablespoonful of flour mixed with one-half a cup of brown sugar. Bake in a very hot oven for thirty minutes, adding a cup of cold water as soon as it begins to brown and basting once or twice. When quite tender, take out, put in a border of mashed potatoes and keep hot while making the caramel sauce.

Caramel Sauce.—To the contents of the baking pan add a cup of cold water, 1 tablespoonful of vinegar, 1 tablespoonful of flour blended with a little cold water and 1 tablespoonful of caramel. Boil all this together for about three minutes and serve in a separate sauce boat or pour over the ham. With the shank end of the ham you can serve braised ham and sausages, and with the other slices creamed ham and hominy.

Braised Ham.—Put the ham in lukewarm water and soak over night. Then remove the bone carefully and put in a saucepan with enough cold water to cover it, together with 1 carrot and 1 onion, clean and chopped, and 6 peppercorns and 1 teaspoonful of mixed herbs, tied together in a bit of cheesecloth. Simmer gently for two and a half hours, when the ham should be quite tender. Chop up 1 shallot and fry in one-half ounce of butter, not allowing it to get brown. Pour this over the ham and cook for another twenty-five minutes, then take up, cut into fairly thick slices and arrange around a dish, each slice overlapping the other, and put in the oven to keep hot while preparing the sausages to go with this dish.

Par boil one pound of sausages, cut them into rounds, brush with the yolk of an egg, dip in bread crumbs and fry. Then pile a mound of mashed potatoes in the center of the ring of ham slices, dot the sausage rounds neatly over the potatoes in the interstices of the ham and serve very hot.

Ham Pastry.—Mince six ounces of cooked ham and mix with one-half cup breadcrumbs and seasoning. Add enough milk to make a stiff paste. Line a greased dish with short pastry or with mashed potatoes, put in the ham mixture and bake in a hot oven. Boil two eggs hard, separate the yolks and whites, chop separately and then sprinkle the pie with them, putting the yolks in the center and the whites around the edge. Cover with a well-greased paper and put back in the oven just to heat through and serve.

Savory Pudding.—Make a paste of four ounces of finely chopped suet, one-half of flour, a pinch of salt and enough water to make a stiff dough. Roll out, and in the middle put one-half pound cooked ham, minced finely, and mixed with one-half teaspoonful of mixed herbs, and 1 well beaten egg. Fold the paste over, wet the edges to make them stick and boil in a well-floured cloth. Be sure the water is boiling when you put the pudding in and keep it boiling for one and a half hours. If you use a gas stove this is not a very economical dish, as it takes a long time for cooking, but if done in a steamer at the same time as the vegetables the one burner does for all, and it is not then extravagant.

Four Good Receipes for Cake.

One-Egg Cake.—¼ cup butter, 1 cup sugar, 1 egg, 1 2-3 cups flour, 1½ level teaspoons of baking powder, ½ cup milk. Cream the butter, add gradually the sugar and then the well-beaten egg. Mix and sift the flour and baking powder. Add alternately with the milk to the first mixture. Bake thirty minutes in a moderate oven.

Cocoa Cake.—1 egg, 1 cup sugar, ½ cup of lard, 1 teaspoon salt, 5 teaspoons cocoa, 1 cup sour milk, 2 scant cups flour, 1 teaspoon vanilla, 1 teaspoon soda. Mix together in order given and bake in a slow oven. Frost with icing of confectioners' sugar, cocoa and milk mixed to a thick paste.

Molasses Cake.—1 egg, ½ cup sugar, 2-3 cup lard, 1 cup molasses, 1 cup sour milk, 3 scant cups flour, 2 teaspoon soda, 1 teaspoon cinnamon. Mix together in order given and bake in a slow oven.

Apple Sauce Cake.—Cream together one-half cup lard and one cup sugar. Add one cup raisins, one-quarter teaspoon each of salt and nutmeg, one-half teaspoon of cloves and one teaspoon each of cinnamon, lemon and vanilla. Dissolve one teaspoon of soda in two tablespoons of boiling water, then stir it into one cup of tart apple sauce. Combine with creamed mixture, beat in two and one-half cups of flour and bake in a moderate oven.

Use For Old Papers.

1. If the soles of boots are thin, a few layers of paper will protect the feet wonderfully.

2. A soft newspaper will polish windows and lamp chimneys better than cloth.

3. Layers of newspaper, folded evenly and placed under the stair carpet at each tread, may cheaply be made to take the place of felt.

4. A damped newspaper torn in bits and scattered over a dusty carpet will take up dust and dirt better than salt or tea leaves.

5. Paper folded and placed over the chest is a great protection on a cold drive.

6. Paper is preferable to cloth for removing black from the outside of pots and pans. The paper can then be burned.

7. A newspaper under the churn will keep milk off the floor when churning.

8. The range may be kept bright and clean by rubbing with soft newspapers after each meal.

Spread a paper on the kitchen table when doing any mussy work or when dishing the dinner. It is a great help in keeping the table clean.

Things Worth Knowing.

It is harmful to silk stockings to iron them.

Mud stains should be soaked in kerosene.

Oysters are better fried in oil than in lard of butter.

A good cook is known by her clever use of left-overs.

Anything placed in cold water will cool more quickly if salt be added to the water.

When a bottle of milk sours, seize the opportunity to use it for doughnuts.

A cut lemon will remove the mark made by striking matches on white paint.

Always use bread crumbs in preference to cracker crumbs when frying oysters.

The housekeeper should bring all the sunshine and fresh air into the home that she possibly can.

Save all the scraps from the table for the chickens. They enjoy them and it gives variety for them.

Bread made from the true and undenatured whole-wheat flour is a true nerve, blood and bone food.

To do away with the sound of a watch or clock in the sickroom, place it under a tumbler of a bowl.

Keep a pumice stone near the kitchen sink. It is excellent for cleaning scorched spots off cooking utensils.

A slice of potato in an excellent thing to clean white oilcloth which has become disfigured by hot cooking utensils.

When the cake in the oven is ready for a final browning, a newspaper tucked into the fire will do the work.

When boiling vegetables never allow them to stop boiling until they are done, or they will be soggy and heavy.

Starched clothes must be dried quickly if they are to retain their stiffness, and flannels if they are not to shrink.

If soft-boiled eggs remain from breakfast, boil them hard at once; then they are ready to use in salads or fish sauces.

A good way of keeping one's coats and dresses slightly scented is by tying small bags of lavender at the ends of clothes hangers.

If your umbrella handle comes out, instead of gluing on the handle try winding a thread around the stick and then screwing on the handle.

When brushing carpets have a basin of warm water handy, and dip the brush into it occasionally. This prevents the dust from rising, and makes the colors look clear and bright.

The peel of potatoes, after being dried in the oven, will light the fire quickly instead of using wood, thus saving expense, and being more healthy than if allowed to stay in the dustbin.

For a shabby umbrella take half a cupful of strong tea and two tablespoonfuls of sugar, open the umbrella and sponge well. The tea will revive the color and the sugar stiffen the material.

An old sponge which is almost worn out and falling to pieces can be made to last almost as long again if a bag is crocheted with some soft knitting cotton, and the sponge placed in it, the ends being crocheted together.

As the cane chair seats get out of shape, turn up the seats, and with hot water and soap, wash the cane work until thoroughly soaked, and leave the chairs to dry upside down in the air, when the seats will become firm and tight again.

The tip of a kid glove finger may be stretched over the knob on the lid of pots and pans. This to prevent burning fingers when they are lifted from the stove. And you can use the same "stunt" for the handle of the coffee or tea pot.

To remove a blood stain made by a pricked finger on any silk material, place about four inches of white sewing silk in the mouth and moisten. Then roll into a ball and rub the spot gently, and the stain will disappear as if by magic. Just try it and see.

DISABLED CANADIAN SOLDIERS.

What is Being Done to Restore Their Ability and Usefulness.

The Military Hospitals Commission at Ottawa informs us that 2,081 soldiers, were under its care at the beginning of this month. Of these, 426 were at Sanatoria for tuberculosis, and 1616 at Convalescent Hospitals, 682 of the latter being out-patients, while 39 members of the force were in asylums for the insane. Of the 426 cases of tuberculosis, it may be added, almost exactly half were discovered in time to prevent them from leaving Canada for the seat of war.

According to a statement prepared by the Militia Department, up to October 5th 1916, the number of soldiers sent back to Canada because of medical unfitness was 6,208. Of these, 961 were suffering from wounds, shell-shock, or the effects of gas; 122 were insane; 245 were afflicted with tuberculosis; while the remainder, 4,880, were suffering from other diseases and disabilities.

All Canadians ought to know what is being done by the Military Hospitals Commission, acting on behalf of the whole body of citizens, for the restoration of their wounded defenders to a position of self-support and independence.

Every disabled soldier is medically examined on arriving at Quebec. If he is no longer in need of hospital treatment, he is sent home free of expense and discharged with a pension or gratuity according to the extent of his disability. If he needs further treatment, he is taken to the hospital or sanatorium where the treatment most suitable to his case is available, and, if possible, to that which is nearest his home. Men who cannot resume their former work on discharge from hospital are advised and enabled to take special training for new occupations. This is provided free of cost; and while the men are being trained the Dominion Government maintains them and their families. Men needing artificial limbs are taken to Toronto, where these limbs are made and supplied without charge. Men with serious nerve disorders are treated specially in the Ontario Military Hospital at Cobourg.

Each Provincial Government has appointed a Commission to help discharged men in securing steady and remunerative work. The Dominion Government, and other authorities and employers, systematically give preference to returned soldiers when filling vacant positions.

The public can and should co-operate heartily in this urgently necessary work, by encouraging the men to take fullest advantage of the curative and educational opportunities given them, and afterwards by seeing that they get work. Local committees have been formed for this purpose in many towns, but much more has to be done in this way.

The treatment, most carefully carried out in accordance with the latest discoveries and the proved results of medical experience, includes many forms of strengthening exercises, often requiring special and costly apparatus; the scientific use of electricity, massage, and continuous baths for affected limbs; with wise dieting and fresh air as a matter of course.

Occupation is often as necessary and beneficial as rest itself, in its curative and strengthening effect on body and mind. Classes are therefore held at the hospitals, for instruction and practice in many arts and industries, such as carpentry and wood-carving, metal and leather working, typewriting and book-keeping, mechanical drawing and elementary engineering, gardening, bee-keeping and poultry-raising.

These all help to increase the capacity of the patients, and to lessen the effect of any injury they have received, by getting them into practice for such industries as they can profitably undertake. The medical and educational officers try first to discover what each man is most likely to succeed at, and then to fit him for it as thoroughly as possible.

It has been wisely decided that no man shall forfeit any part of his pension on account of his industry and enterprise in improving his own financial position.

Let our readers write without hesitation to the Secretary of the Military Hospitals Commission at Ottawa, or to the Provincial Commission at the Provincial capital, asking any further information they may desire, or giving any practical suggestion resulting from thought or experience.

PEOPLE HAVE TWO BRAINS.

One Minister to Body and Serves in an Emergency.

Nature, according to a new theory, has given us two brains just as she has given us a pair of eyes, hands and ears, which help each other to do the work of the body.

Everyone has two brains, but he only uses one for intellectual purposes. If a man is right-handed he uses the left brain. The left-handed one uses the right brain. Which brain we are going to use is therefore decided by which hand we make use of first when we are babies.

The brain which is not being used for the intellect helps the other to minister to the body. It also serves as an emergency brain in case of disease or accident. Sometimes memory or speech is destroyed by accident, and if the second brain is trained it may do the work of the other which has been destroyed. It is easier to train the brain in this way if the patient is under thirty years of age.

Seeing Stars by Day.

Although it is an old belief that the stars can be seen in daylight from the bottom of a deep mine, well, chimney or other shaft, the Rev. W. F. A. Ellison maintains that it has no foundation in fact. Writing in the Journal of the British Astronomical Association, Mr. Ellison says that the invisibility of the stars in the daytime is caused by the glare of the atmosphere illuminated by the rays of the sun; and that there is no reason why a chimney or other shaft should sensibly diminish the glare. Even with a telescope the visibility of stars and planets in the daytime depends greatly upon their color. Red or yellow stars are much more easily seen than white ones, and the telescope must be very carefully focused, or even a bright star will be invisible in the bright sky. The planets Venus and Mercury, on the other hand, can be seen better in daylight than in the dark, but most of the planets are less visible in daylight than the stars.

An army rifle is to-day effective over a range of 2600 yards, whereas in 1870 the range was only 400 yards.

A woman doesn't look so attractive in the morning, we admit, but at that she looks a whole lot better than the man who has just tumbled out of bed.

QUEEN ANSWERS AN OBJECTOR

REPROVED FOR ATTITUDE ON COMPULSORY SERVICE.

Wilhelmina of Holland Says Every Man Must Defend Hearth and Home.

A young Dutch artist, M. J. Hagemeyer, recently addressed a letter to Queen Wilhelmina on compulsory military service, to which he said he had a conscientious objection. Reminding the Queen of the words which, he said, her Majesty had sung as "hurled into the world, "Christ avant tout," he maintained that this Christian standpoint was incompatible with military service. He asked her Majesty to clear up what he regarded as a contradiction between her words, "Christ before all," and her action as ruler in summoning him to the colors for service in killing his fellow-men.

Queen Wilhelmina caused the following reply to be addressed to M. Hagemeyer:

No Contradiction.

With reference to your letter of August 29 last, addressed to her Majesty the Queen, I am authorized briefly to reply to you.

I must be clear to you on any reflection that refusal of service, under whatever form and for whatever reasons, can never have the approval of the Head of the State, and that the Head of the State can never find mitigating circumstances for refusal of service. The words quoted by you were "hurled into the world," as you say, but these words were inscribed by her Majesty on a portrait which her Majesty presented to the Argentine lady who presented a reproduction of a beautiful statue of Christ from the Andes to the Palace of Peace. It was thus an entirely private act.

In my view there is absolutely no contradiction between these words and the making oneself ready, if necessary, to be able to defend one's own people and home. On the contrary, it appears to me that from Bible history one must learn from beginning to end that the most sacred duty of man is to defend wife and children, hearth and home, as indeed, is innate in every animal through an instinct given it by God. All nature is based thereon.

"Do Your Duty."

Let me give you good practical counsel, young man! Do not allow yourself to be misled by theatrical words and thoughts. Have confidence in those who have to lead you, even if you cannot understand it. Consider quietly and calmly the duty, which not Government alone, but all nature and your own manly feeling impose on you, to be prepared to be able to defend your people. And fix yourself firmly on that alone. Do your duty and try to serve Christ by observing always in your nearest surroundings as much love, devotion, and self-sacrifice as possible, but not by theatrical words or deeds. Once again listen to my advice. There is no contradiction.

The letter is signed by Jonkheer van Geen, the Queen's private secretary.

The Point of View.

"This man," exclaimed the lawyer during the course of a trial in the West, "is not insane, and never has been." To keep him in an asylum is a blow directed against human rights, an assault upon the sacred institution of liberty, and—"

"But," interposed the court, "did you not prove some weeks ago, when the defendant was on trial for murder, that he has been from birth an insane person?"

The lawyer smiled in a superior way:

"Surely," he said, "your honor would not have it believed that this court is on the intellectual plane of that jury."

Be a dreamer if you will, but get up and hustle when the alarm clock jingles.

REALIZE THAT THE WAR IS LOST

THE GERMANS ARE NOW FIGHTING FOR PEACE.

Hope to Crush Roumania and Annoy Britain Into Ending Conflict.

The Stockholm correspondent of the London Chronicle sends the following: The facts with regard to the official German attitude on the present position of the war, together with an outline of the course to be pursued, have been told to me by a distinguished neutral who is a resident in Berlin and who for a few days has been visiting in Sweden. My informant speaks with the knowledge that he is not a casual foreigner in Berlin, but one whose business brings him in touch with public life and public men there, and who has special facilities for knowing the minds of political leaders. I present his narrative as nearly as I can in his own words:

Realize War Lost.

"I left Berlin about a week ago. It may be taken as quite definite that the authorities realize the war is lost. Two facts stand out quite clearly to Germans in power. The first is that while Germany still retains the power to manufacture munitions at a large and formidable rate, the output of the allies is now in advance of the German output.

"The second point is even more important. It is recognized that the reserves of man power are not sufficient to allow Germany to conduct the war to a victorious issue. The offensive on the Somme is a crucial thing. They have no illusions about this. They believe they can impede the allies, hold them back for a long time, but they realize they cannot do it indefinitely. It is privately acknowledged that sooner or later the allies must break through. More than this, the Germans have calculated the limit of time they can effectively withstand attacks on the western front at twelve months. They know, however, the allies may get through before.

Seeking "Honorable" Peace.

"With these facts in mind they have framed their future course of action. They are seeking for a peace which shall not brand them as defeated, and to get it they will make considerable sacrifices. The whole of their new plans will be co-ordinated toward that end. Whatever may be their fears of the future they still have at their command vast fighting forces of various kinds. They are going to use them to bring about this peace which they want so badly.

Smash Roumania First.

"First of all they have made up their minds to smash Roumania completely, not only for the sake of the material advantages, but also for the moral effect on them. Then they are going to throw discretion to the winds with reference to submarines. They are going to use undersea vessels to annoy and hurt Great Britain as much as possible. They will be quite careless of the feelings of neutrals. The visit of Ambassador Gerrard to America is undoubtedly connected with this coming submarine campaign.

Peace Within a Year.

"The general idea is not to conquer but by annoyances, losses and perils to increase the desire for peace which they are sure exists among some sections of the population already. The more hateful the war is made for Great Britain, the more easily will she come into line with regard to peace proposals and Germany must have peace by a year from now. The latter is not stated in so many words, but that is what the position comes to."

V.C. MAN SELLS PAPERS.

Won Decoration for Killing Enemy Machine Gun Company.

Private George Wilson, of the Highland Light Infantry, who won the Victoria Cross for great gallantry on Sept. 14, 1914, is now selling newspapers on the streets of Edinburgh, Scotland, with the much-coveted decoration pinned to his vest.

He has a pension of $4 a week, which includes $1 a week for winning the V.C., but Wilson said recently this is not enough to live on. He therefore has resumed selling papers, his occupation before joining the colors.

The Official Gazette described Wilson's deed of valor which brought him his decoration, as follows:

"For most conspicuous gallantry on Sept. 14, near Vernull, in attacking a hostile machine gun, accompanied only by one man. When the latter was killed he went on alone, and shot the officer and six men working the gun, which he captured."

The Bombardment.

"Bang!" went the rifles as the manoeuvres.

"Oo-oo!" screamed the pretty girl—a nice, decorous, surprised little scream. She stepped backward into the arms of a young man.

"Oh," said she, blushing "I was frightened by the rifles. I beg your pardon."

"Not at all," said the young man. "Let's go over and watch the artillery."

EDEN GROVE

The wind blew through a fellow's whiskers alright on Saturday and Sunday.

Mr Frank O'Reilly returned from the west last week, and Mr Abole Seller this week. Both speak of the west in glowing terms.

Cheap fares to Guelph Winter Fair—$3.40 good going Dec 1st to 5th, returning Dec 9th. Now is your time to see big roosters.

The Messrs Holley, from Ripley, visited friends in the Grove on Sunday.

Mr and Mrs Greenway and family, of Cargill, moved to town this week and intend residing on Railroad are north of station.

Wonder if the young lady who missed the train Thursday afternoon played "It's a long, long way to Tipperary" when she saw the train pull out.

Mr Thos Desmond and Mr A McKeeman were business visitors to Paisley this week.

Rev Mr Crighton, of Paisley, delivered an illustrated lecture in the Methodist church here on Tuesday evening which was well attended and appreciated. A liberal collection was given for missions

On Saturday when the noon train arrived quite a reception was tendered to Lieut Harold Pinkerton, one of our returned heroes. Senator J J Donnelly, Rev R M Gale and several other prominent men from Pinkerton, along with a goodly number of the fair sex, took part in the reception.

Mr P O'Reilly shipped another car of Irish canaries on Tuesday.

Miss Jessie Alexander visited county town friends last week.

Mrs Reynolds, of London, after spending a couple of months visiting her brother-in-law in town, left Wednesday for the south for the winter months.

A few Pinkerton friends attended the Red Cross meeting here Thursday afternoon.

Mrs Todd called on Paisley friends on Monday.

What about our Indian summer? This feels more like sqeuwly winter at present.

Miss McCurdy visited Walkerton friends last week.

Our local agent advises that freight rates on general merchandise to and from Toronto, Hamilton, London, &c, will advance about 5 cents a hundred on Dec 1.

Did you notice the days getting shorter? Some are getting up in the middle of the night these mornings.

Miss Mae Prettyce left on Tuesday morning for Kincardine.

Turkeys are scarce, but there are plenty of geese moving around. Alex is paying 24c cash and 23c trade for turkeys dressed.

The electric plant went wrong Monday night. It was so dark on the streets you couldn't see your hand behind your back.

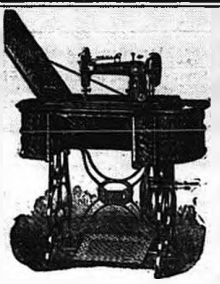
FOR FLETCHER'S
CASTORIA

ELORA ROAD NORTH

Mr Neil Pollock, of Victoria, B C, is visiting friends here.



We are sorry to hear that Mrs Angus McIntyre is very low at present.

Mr S Winch has been busy sawing wood for his neighbors.

Mrs Neil McArthur spent last week with her daughter, Mrs Rob: McKinnon, of Bobbitston.

Mr Roger Dawson is working in Elmsley.

Some of our farmers have been unable to get their turnips in and are naturally feeling rather blue these days.

We hand'e the Gendrich, Raymond, New Williams, White, Singer and Standard—all the very latest models. Bell Pianos and Organs, Edison Phonographs and Records.

PETER McKINNON, Agt., Paisley
Ross Street

GLAMIS

A memorial service was held in St Paul's church on Sunday morning in memory of Wendal Russell, son of Mr Robt Russell, of the 9th of Kincardine, who was killed in action in France on Nov 11th. Rev Mr Reith took for his text "Greater love hath no man than this, that he lay down his life for his friends." The church was draped in black. A choir of young men led the singing, Mr Duncan McLennan presiding at the organ. Mr Jack McKeeman sang very feelingly "He wipes the tear from every eye." The Baptists dispensed with their morning service and joined their Presbyterian friends.

We are pleased to report that Mrs Neabitt, who has been ill, is improving.

J H MacIntyre, who has been visiting his parents, returned to the west on Thursday.

Mr Thos Farquharson, of Manitoba, is visiting his father.

BRADLEY

Wedding bells have rung here lately. Sleighing was the order for a few days.

Mr Andrew Porter has about finished piping the water to his barn. Andy has a great chance to start a skating rink now if this weather would only continue.

Don't forget the Bradley hen social on Dec 8th, as it is sure to be the best of the season.

Mr Wm Wangler is a most enthusiastic Red Cross helper, and there has been quite a bit collected for that cause around here lately.

Miss Irene Stanley is working for Mrs Isaac McPadden.

We are sorry to know that Mr Harvey Neilly intends leaving this vicinity, as he has purchased a farm on 12th Bruce. Harvey will be much missed around here.

MARRIED

WOELFLE—NEEDHAM—At the Rectory, Walkerton, on Nov 17th, by Rev R Perdue, Mr Thos D Woelfle, of Greenock, to Miss Ellen Needham, of Pinkerton.

RUBBERS!

Now is the season to buy Rubbers. Our line for this season is better than ever. New lines and new lasts have been added so that we can fit any shoe made.

Waterproof Boots and Shoes

of staple lines for Men, Women, Boys, Misses, Youths, made of the best of leather that can be bought. We can sell these at reasonable prices, as they were bought before leather advanced.

H. PFAFF & SON

TURNER'S

Mr and Mrs McKinney spent Sunday at Geo Schell's.

Mr Neil Pollock, of Vancouver, is here on a visit to his mother, Mrs John Pollock, and many other friends.

The many friends of Mr Geo Schell will be sorry to hear of him being in poor health.

Mrs Thos. of the 8th of Bruce, spent a few days with Mrs Robt Pollock.

A telegram was received from Calgary last week announcing the death of Meister Diar. Much sympathy is extended to the sorrowing family.

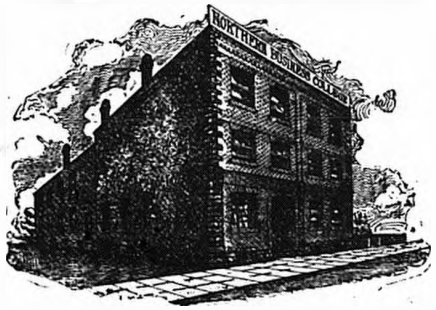
8,000 Students Trained for Business

Northern Business College

OWEN SOUND, ONT.



A School with a Record of Useful Service

On November 1st, 1881, the Northern Business College was established by the present Principal, C. A. Fleming, at Owen Sound, and its record of 35 years of faithful training of young men and women for business life is unparalled in Canada. Since the opening over 8,000 students have been in attendance and each year the sphere of usefulness is extended. Graduates are occupying responsible positions in the commercial life of every important business centre of Canada and the United States, while men and women in every walk of life have found the instruction received at the Northen Business College an asset and an advantage.

From a school started in a very small way 35 years ago, the Northern Business College grew rapidly until it is recognized as a leader in the Dominion. Each year the courses of study have been revised and every approved modern method of business included. The school is equipped with the latest appliances and systems, with which the student is made familiar. It has always been the policy of the Northern Business College to be abreast of the times; that is to teach the student exactly what he or she would have to do in an up-to-date office.

Principal C. A. Fleming, who personally directs the courses of instruction, is a Fellow of the Institute of Chartered Accountants and is known throughout Canada as one of the leading men in the profession. He is author of eight standard business works, used in scores of schools and thousands of offices throughout the Dominion. Every student benefits by his wide business experience. He has been particular in his selection of teachers and has surrounded himself with a staff of experienced specialists, each experienced not only in teaching but in office work. The instruction at the Northern Business College is "the best," and to it is credited the splendid success of the students of the institution for over a third of a century. No other school in Canada has at the head of its Faculty a Fellow of the Institute of Chartered Accountants, and is assisted by instructors of as wide experience.

The management of the Northern Business College many years ago realized the need of first-class accommodation and proper environment in order to do the best work. The three storey building has been fitted up expressly for school purposes and has one-third of an acre of floor space, eighteen rooms lighted by sixty windows, on a quiet street within two minutes' walk of the Business Section. The steam heating is extra good, and ventilation is secured by electric exhaust fans which keep fresh air constantly in the rooms. With the latest sanitary arrangements, including sanitary oiled floors, the Business College premises are unequalled in Canada. There is plenty of room for proper grading and classification and the accommodation is such that students can do their best work. It is the best building and equipment that enterprise can suggest and capital obtain.

Special War-time Course for Young Women

Young women may "do their bit" by preparing for positions in offices, banks, etc., and thus be in a position to take the place of any young man who is willing to go to the front. Such a training may be obtained at the Northern Business College, Owen Sound, where a special War-Time course of study has been arranged to enable young women to prepare quickly for office work. A thorough training is given every business pursuit, and actual practice in the required duties. Many young women are now in attendance and there seems to be no limit to the opportunities for young women in filling positions in offices at the present time. The school is open the year round and the students may enter any day as the instruction is largely individual.

Preparatory Course

This is a special course of study for those whose early education has been neglected, and includes Reading, Arithmetic (from the simplest principles to advanced work), Spelling and Meaning of words, Composition and Correspondence, Measurements.

Approved by Chartered Accountants

The Institute of Chartered Accountants of Ontario recognized the excellence of work of the Northern Business College, and admitted it into affiliation. In other words the thorough courses of instruction of the N. B. C. have the approval of the Institute of Chartered Accountants.

Courses of Study

Business Course:

Under the supervision of a Chartered Accountant, the education offered in this department is peculiar, in that it is intended for every class of business man and woman. Some may have the impression that the Business Course at the Northern Business College is simply to train Bookkeepers. Were this true there would be little use in its existence. The work is broad and practical; to enable the student, no matter what business or profession he intends following—Farming, Manufacturing, Teaching, Selling, etc., etc.,—to grasp every business opportunity, to transact all business intelligently, to have confidence in your own ability, and to gain a knowledge of the principles of business law and practice; to secure you from fraud and imposition.

The following subjects are included in this course :—

Bookkeeping. — including Business Practice, Loose-Leaf Systems, Cost and Joint Stock Accounting, Bill and Charge Systems.

Calculation
Commercial Arithmetic
Banking and Finance
Correspondence and Salesmanship
Commercial Law
Bonds and Debentures
Mensuration
Manufacturing and Cost Systems
Joint Stock Company Work and Cost Accounting
Spelling
Writing
Adding Machine Practice
Counterfeit Money
Forgery and Disputed Handwriting

Stenographer's Course:

The special course for stenographers embraces the following subjects :—

Shorthand (Isaac Pitman System)
Writing
Rapid Arithmetic
Spelling
Typewriting—Touch System, including Billing and Manifolding.
Correspondence and Salesmanship, including Letter Writing, Punctuation, Filing, Follow-up Systems and Indexes. Letter Copying, (Press and Rapid Roller).
Practical Office Work—Adding Machine, (Burroughs' and American) Beck Duplicator, Mimeograph, Rotary Neostyle, Dictating Machine, etc., Remington Wahl Adding Typewriter, Billing and Statement Work.

DAY OF ILLUSIONS IS NOW OVER

CONFIDENCE IS NOW OVER IN GERMANY.

An Observer Notes Sad, Anxious Faces in the Streets of Berlin.

"No one who has studied the German press lately could fail to be struck by certain indications of the progress made during the first month of the third year of the war toward the final disillusionment of the German people."

Thus writes the correspondent who from month to month has supplied the Pall Mall Gazette of London with a review of the internal affairs of the Central Empires in his summary of the economic situation in Germany during August.

Reference is made to crowded meetings in various parts of the empire, at which resolutions in favor of "a speedy peace without any annexations" are enthusiastically adopted. The underground political controversy directed against the Government, it is asserted, is becoming increasingly bitter, the attacks on the Food Dictator grow more and more violent as his failure to achieve the impossible becomes clearer, and considerable latitude is now allowed to the Socialist press in discussing the causes and effect of food scarcity. There is also a spread of revolutionary tendencies.

Confidence Waning.

A neutral diplomatist of strong pro-German sympathies has written a letter in which he remarks that "the sad and anxious faces one meets in Berlin make one think that happiness has fled from the world." After admitting that the confidence in victory is no longer what it was, he concludes his letter:

"They are still putting a good face on things, and some even believe that Verdun will be taken soon, but all the same, my impression is that the morale of the German soldier has become weakened, and that he has no longer his old confidence in the utility of the efforts demanded of him. Germany's strength can grow greater, but has reached its apogee."

Hunger For Peace.

A Dane who has resided in Berlin for six or seven years writes:

"There is little talk now of the final victory. The military authorities say, of course, that they will fight to the last man, but the common people hunger after peace, as also do most of the soldiers.

"Robberies and plundering are common, and would be much more so were it not that many of the shops are empty; in fact, about half the shops are closed, and the smaller restaurants also. Rioting is of daily occurrence, both in the city proper and the suburbs. Crimes are increasing rapidly, murder, robbery and assault are common, also suicide. It seems as if the town were struck with madness."

Being Starved Out.

An American doctor who has been studying in Berlin for some years describes the growing difficulty of obtaining the necessaries of life, even when one possessed the money to pay for them. "Till September, 1915," he writes, "there was no hardship, but then the thumbscrews began to tighten, and now the people of Germany are slowly but surely being starved out. . . . It is a riddle to me how the poor families have managed, and conditions must be much worse now."

The wheelbarrow tone of documents found on recently-captured prisoners is amazing. They tell of hunger being rife, of the impossibility of obtaining sufficient food, of the scarcity and exorbitant cost of clothing and boots, of the countless food tickets, of the long waits in the food queues, of the frequent failure of supplies, especially of meat, fat, and potatoes. There are constant allusions to growing discontent among the masses, to strikes and riots, and to collisions with the police.

Suffering is Real.

Many of the writers express the opinion that things cannot last much longer as they are, and there are ominous murmurings against the rich and the "food usurers." That the suffering among the masses is real no one who reads these letters can doubt, and the knowledge of this suffering cannot fail to exert a depressing influence on the soldiers at the front.

The entrance of Roumania into the arena, of course, must have a most serious effect on Germany. It is possible that the full effect of the cutting off of Roumanian supplies may not be apparent at first, in view of the German harvest, but before the end of the winter Germany's position should again become critical. The yield of the harvest, however, is a good average one.

The entry of Roumania into the war will also deprive Germany of her principal supply of mineral oils.

Facing Bankruptcy.

"What the result of failure in the war will be on the finances of Germany," says the correspondent, "I hesitate to prophesy, but others far better qualified to express an opinion than I are unable to see any outcome of the present financial position in Germany other than bankruptcy in some form or other."

There is good evidence, he adds, that our strangle hold on the throat of Germany is far more effective than it was a year ago in preventing supplies of food coming in from the outside. We may look forward with certainty to an even intenser food crisis next spring than we have witnessed during the past few months. "That this crisis will reach the proportions of a famine that will force Germany to sue for peace I still do not believe, but, on the other hand, the enthusiasm and confidence which supported the people through earlier privations have disappeared, and given way to widespread depression, and the powers of endurance of the people have been proportionately diminished.

MEETING THE WOUNDED.

How the Injured Heroes Are Received at London Stations.

Among the myriads of ways in which the English people try to repay a little of the gratitude owing to their soldiers, and not the least trifling, is that chosen by the workers who have charged themselves with the duty of meeting the trains of wounded at main stations to convey the broken soldier in comfort and security to a hospital.

They call themselves the London Ambulance Column, and they owe their existence to the fact that when the war broke out few means for taking soldiers to hospitals were available.

When the first [illegible] of wounded and sick from the front arrived in London the whole of the transport facilities at the command of the Column were two motor ambulances and a couple of private motorcars lent by their owners. The wounded, other than those exceedingly bad cases, which the motors dealt with, were taken in stores carts to various hospitals.

So the organizers of the Column borrowed vehicles and were presented with others until at present they have 110 private cars at their disposal and fifty ambulances, which have been presented to them.

Many cars are driven and kept in repair by the owners themselves, and they also undertake to supply all the petrol necessary for their running; other owners have lent their cars and their chauffeurs to the Column, while still other cars are lent without drivers.

The entire ambulance transport of the London district is in the hands of the Column, and this not only includes meeting the trains from the front, but the removing of patients from the various hospitals and taking them for special treatment, as well as running them to the various specialist hospitals outside the London district proper.

And it should be realized that not a single worker in the Column is paid—all are voluntary. Chiefs, nurses, office staff, organizers of stores, chauffeurs—each is doing his or her bit cheerfully, glad to be allowed to do something for those who have done so much for them already.

HIGH COST OF IMPURE WATER.

Its Toll in Disease and Death Represents a Large Sum.

A recent report by George A. Johnson, water supply expert, exposes some very interesting facts respecting water filtration. The great benefits and, in many cases, the urgent necessity of filtering the water supplies to communities is clearly recognized, but its vital importance can only be realized by a thorough investigation, supported by the convincing data contained in this paper.

The figures given are for the United States, but with due regard to proportion, apply with equal force to Canada.

Mr. Johnson states that if the urban population of the United States were supplied with filtered or equally pure water 3,000 lives would be saved annually and 45,000 cases of typhoid fever prevented, representing in vital capital some $22,500,000 annually, or the interest on an investment of $375,000,000. In the United States an urban population of 30,000,000 persons is still supplied with unfiltered water; the cost of supplying filtered water to these, including fixed charges and operation of plants, would not be more than $12,000,000 per year, or about one-half the present annual loss in vital capital due to non-filtration.

Twenty-million people are now being supplied with filtered water at a cost not exceeding $8,000,000 or 40 cents per capita per year, and the results of water purification always show a big balance on the right side of the ledger.

In the United States, 300,000 persons suffer annually from typhoid fever and 20,000 die of it. Valuing the human lives lost at $3,000 each, and allowing for lost wages and medical attention $200 for each case of the disease, the annual toll from typhoid alone amounts to $120,000,000.

Ships as Part Indemnity.

At the end of the war the enemy should be made to replace the tonnage sunk by piratical methods, says the chairman of the Ericsson Shipping Co. of England. The question ought to be considered whether the whole of the German merchant tonnage should not be taken as part payment of the indemnity.

BUSINESS BOOM AMAZES LONDON

MONEY SPENT IN STORES FAR ABOVE NORMAL.

War Is Proving of Immense Benefit to the Middle Classes of Old Country.

Notwithstanding greatly increased cost of living on account of the war and the need for economy and saving, business in Britain is apparently booming. Whatever is going to happen to trade after the war all the indications are that speaking generally, it is just now considerably above the normal level, writes a London correspondent.

Business lessened noticeably during the first few months of the war, but recovered at the end of 1914, and since then has, it is said, been constantly improving. The betterment has been particularly noticeable since July, when the great battle which still rages in Picardy began.

"The Somme battle has been the best tonic that the business of this country has had since the war began," was the recent remark of the head of one of the largest business establishments in London, and this reflects the general opinion of the directors of the big stores catering to the general public.

The shops were never more crowded, nor did money ever change hands more freely. The shopping scenes in such business thoroughfares as Oxford Street and Regent Street recall the palmiest days of peace time. Managers of stores admit that the enormous access of business amazed them.

Receipts in Stores Big.

A milliner's shop on Regent Street took in $945 in cash in one day, which constitutes a record for the establishment. At nearly all the big middle class retail stores the figures are considerably in excess of the receipts before the war, although the spring of 1914 was one of the best seasons ever experienced in the history of the retail drapery trade.

The explanation everywhere given is the same. The middle classes are making money out of the war and are spending it. A great part of the millions which the nation is spending on the war in this country is finding its way into the shops. Money is circulating so freely that even with shorter shopping hours the receipts are much heavier than normal.

The explanation given by the manager of a leading London department store shows the rise and fall of business during the twenty-six months of war as follows:

July, 1914—Business normal.

October, 1914—Business fell 20 per cent; money reported tight and purchases confined mainly to indispensable commodities.

December, 1914—Business normal again. The recovery due to the newly created prosperity among the middle and working classes set up by the munitions industry.

May, 1915—Business 20 per cent. better than normal; money plentiful, due to the rapid expansion of the munitions industry.

July, 1916—Business 30 per cent. better than normal; middle and industrial classes spending the large wages which they are earning, and the number of these wage earners seems to be rapidly increasing.

October, 1916—Business 40 per cent. better than normal; to the plentifulness of money is added the cheerfulness that comes from the sense of victory. The Somme battle makes people as bright that they feel more like spending money than ever.

No Foolish Spending.

The head of one great store explains that while there is this tremendous shopping boom it cannot by any stretch of the imagination be termed a foolish expenditure of money.

"The people who are spending money to-day are spending it on useful articles and demanding their money's worth," he says. "They are not wasting it on showy articles of little value. As they have always had in the past to consider every penny they spent, so now the same discriminating instinct bids them consider well each purchase. For instance, if they buy jewelry they do not buy trashy jewelry but jewelry which will always bring them a fair percentage of their outlay in case they have to dispose of it.

"Where they buy furs they do not buy imitation sable or imitation fox or imitation marten, but genuine fur."

Inquiry shows that the businesses which are chiefly benefiting as the result of the trade boom are drapers, milliners, piano dealers, middle class jewelers, shoemakers—in fact, every business that is catering to the needs of the two prosperous classes to-day is doing well.

Shoemakers are making fortunes. For every $2.50 pair of shoes they sold in peace time they are selling a $4.50 pair; for every pair of $4 high topped kid boots a pair at $8, and so on.

Girls Go To Work.

Apart from the tonic effect on business of the Somme victories and the prosperity of the munitioners there is the increased income of thousands of households due to daughters previously at home having gone out to work, permitting a weekly expenditure which in peace times would have been regarded as impossible.

The girl in business earning from $7.50 to $10 a week thinks nothing of spending $4.50 weekly on dress.

Some curious examples of the way the present wave of prosperity is yielding an unsuspected class of customer to the big shops is furnished by the manager of a large retail store on Oxford Street.

"During the week," he says, "a woman of the rooster type came into our shop and ordered a seal coat with collar and cuffs of sable and a wide border of the same fur round the bottom of the coat, to be made specially for her. She also insisted on a black velour hat costing $10.50, trimmed with the largest feather I could obtain for her.

Wanted That Feather.

"I explained as gently as possible that feathers were not worn, but she was a determined sort of woman and I soon judged it better to let her have her own way, especially as she had the money in her hand.

"One of the girls who had formerly been in our workrooms and was now making munitions came in the other day and spent $25 on a small ermine necklet. 'I've always wanted a bit of real ermine,' she explained. I noticed that she was wearing one of the latest velour shapes with an osprey in it that must have cost at least $7.50. On her engagement finger she had a single stone diamond ring that I could not help but admire.

"It is no uncommon thing for a mother and her three or four daughters to come into the shop on a Thursday or Friday morning and spend $100 before leaving, although I should imagine that in peace time that same family made their clothes at home."

At another store credit for a great part of the trade boom is given to increased number of marriages that are taking place owing to the war. The money, generally speaking, is not spent on furnishing homes, for the couples as a rule are not setting up housekeeping, but on presents and the bride's trousseau, which in some cases is all the more elaborate owing to the fact that she does not have to set aside any sum for house linen, the bride's usual contribution to the new menage.

Hundreds of thousands of dollars a week are still spent in comforts and gifts for relatives at the front, ranging from pipes to reading matter and delicacies in food. According to the bookstall manager of one store hundreds of Bibles and prayerbooks are sent to the front every week, the men having expressed a desire for religious literature.

An important fact in the increased trading receipts of the big stores is that the cost of each article is in most cases 20 per cent. more than it was before the war.

SOME QUEER CURES

Victim of Shell Shock Recovers Speech While Playing Cards.

Nearly every day the English papers contain a paragraph stating that some victim of shell shock has suddenly recovered his speech, and the variety of the methods is curious. Here are a few:

1. Grew excited over a game of cards.
2. Fell downstairs.
3. Had a tooth pulled out at the dentist's—without anesthetic.
4. Choked through inhaling cigar-ette smoke.
5. Underwent a flashlight photo-graph.
6. Put the wrong end of a lighted cigarette in his mouth.

The card cure, on the whole, seems the least painful.

Just Like Reporting.

"What do you do after business hours?"

"Ain't no such occasion with me," the druggist replied.

The Kamerad Step

It is understood that the famous Goose Step no longer enjoys its old vogue in the German army, while the new Kamerad Step, which is not inferior to it in ponderousness and includes some interesting play with the hands, becoming more and more popular. Its features have been admirably caught by Signor Sacchetti, the famous Italian caricaturist.—London Daily Mail.

ANECDOTES OF THE FAMOUS

TELLING HOW FRENCH TRAITOR WAS PAID.

Lloyd George's Humor—Length of Russian General's Absence From Home

Alexandre Dumas contributed to the "Curieux" an anecdote told him by Henri Didier, who was a deputy under the Second Empire.

Didier's father was secretary to the Ministry of the Interior of the time when the Duchesse de Berri was arrested at Nantes at the end of her attempt to rouse the country against Louis Philippe and in favor of her son, the Count de Chambord.

The traitor Deutz agreed to sell to the Government the secret of her hiding place for 500,000 francs, and it was the elder Didier's duty to pay the scoundrel for his dirty work. He took his son Henri into the office and said: "Look well now at what passes, and never forget it. You will learn what a traitor is, and the method of paying him."

Deutz was then brought into the room where M. Didier was standing behind his desk, on which were placed two packets, each of which contained 250,000 francs.

As Deutz neared the desk M. Didier made a sign to him to stop. Then, taking a pair of tongs, he extended the packets, one after another, into the hands open to receive them. Not a word was spoken, and, when the transfer was effected, M. Didier pointed to the door.

Lloyd George Witty.

Mr. Lloyd George is nothing if not witty.

Recently a highly-placed individual called at the War Office, and took up nearly half an hour of his valuable time in small talk.

The Secretary for War was wondering all the while how he could manage to get rid of him, when his caller, all unwittingly, gave him the cue.

"I can't imagine," he said, "how you and Sir William Robertson manage to divide between you, equally and without friction, the work of your department."

"Well," said Lloyd George, smiling that inscrutable smile of his, "the truth of the matter is that Sir William transacts most of the actual departmental business; and you need not tell anybody," he went on impressively, drawing his chair up closer and speaking in a lower tone of voice, "I entertain the bores."

Away 24 Days.

General Kuropatkin, the famous Russian soldier who has recently been driving the Germans and Austrians before him on the Riga front, is said to be partial to what Scotsmen call "a wee drappie."

The story goes that when he was getting ready to leave Petrograd in order to succeed Russky, his youngest son asked him how long he was to be away.

Kuropatkin replied that he did not know. At that moment a servant came in to inquire how many bottles of Cognac were to be packed up in his master's luggage.

"Twenty-four," was the answer.

"Ah, papa," cried out the "terrible infant," "now I know how long you are to be from home—twenty-four days."

Flip Stenographer.

Merchant—Can you spell correctly?

Applicant—Yes, sir, C-o-r-r-e-c-t-l-y.

Some folks have an idea that the world not only owes them a living, but it owes them its luxuries, too.

WHEN A FATEFUL MESSAGE COMES

TRAGIC SCENE IN H. G. WELLS' NEW NOVEL.

Oldest Son's Death Brings Better Understanding Between Husband and Wife.

The most tremendous scene in Mr. H. G. Wells' new story, "Mr. Britling Sees it Through," is that which occurs when the news comes that the first-born, Hugh, is dead on the battlefield.

"The telegram was brought up by a girl in a pinafore instead of the boy of the old dispensation. . . .

"He had been thinking of this possibility for the last few weeks almost continuously, and yet now that it had come to him he felt that he had never thought about it before, that he must go off alone by himself to envisage this monstrous and terrible fact without distraction or interruption. . . .

"He drew the telegram from his pocket again furtively, almost guiltily, and re-read it. He turned it over and read it again. . . .

"'Killed!'

"Then his own voice, hoarse and strange in his ears, spoke this thought.

"'My God! how unutterably silly.

"Why did I let him go? Why did I let him go?

"Mrs. Britling (his second wife, and not Hugh's mother) did not learn of the blow that had struck them until after dinner that night. She was so accustomed to ignore his incomprehensible moods that she did not perceive that there was anything tragic about him until they sat at table together.

The Tragic News.

He seemed heavy and sulky and disposed to avoid her. But that sort of moodiness was nothing very strange to her. She knew that things that seemed to her utterly trivial, the reading of political speeches in the Times, little comments on life made in the casual way, mere movements, could so avert him. She had cultivated a certain disregard of such fitful darkenesses. But at the dinner table she looked up, and was stabbed to the heart to see a haggard white face and eyes of deep despair regarding her ambiguously.

"'Hugh!' she said, and then with a chill intimation, 'What is it?'

"They looked at each other. His face softened and winced.

"'My Hugh,' she whispered, and neither spoke for some seconds.

"'Killed,' he said, and suddenly stood up, a umpering, and fumbled with his pocket.

"It seemed he would never find what he sought. It came at last, a crumpled telegram. He threw it down before her, and then thrust his chair back clumsily and went hastily out of the room. She heard him sob. She had not dared to look at his face again.

"'But what can I say to him?' she said, with the telegram in her hand.

"Then with a gesture of despair she flitted along the corridor to her own room.

The Understanding.

Her mind was beaten to the ground by this catastrophe, of which to this moment she had never allowed herself to think. She had never allowed herself to think of it. The figure of her husband, like some pitiful beast, wounded and bleeding, filled her mind. She gave scarcely a thought to Hugh. 'Oh, what can I do for him?' she asked herself, sitting down before her unlit bedroom fire. . . . 'What can I say or do?'

"She came and stood beside him. She ventured to touch him very softly and to stroke his head. 'My dear,' she said, 'my poor dear!'

"Suddenly the real woman cried out from her.

"'I can't reach you!' she cried aloud. 'I can't reach you. I would do anything. You! You with your burnt half broken.

"She turned towards the door. She moved clumsily, she was blinded by her tears.

"Mr. Britling uncovered his face. He stood up, astonished, and then pity and pitiful understanding came storming across his grief. He made a step and took her in his arms. 'My dear,' he said, 'don't go from me.'

"She turned to him, weeping, and put her arms about his neck, and he, too, was weeping."

Crown Prince Fights Brother.

It is stated in Holland that the Crown Prince of Germany and his brother, Prince Eitel Frederick, recently had a violent quarrel. They are said to have even come to blows. The heir to the German Throne has always acted the tyrant and bully towards his brothers; but when he tried to lay down the law to Prince Eitel the other day, the latter turned upon him and said he didn't wish to hold conversation with a common thief.

Skin of the Eel.

One of the strangest industries known is that of the preparation of the skin of the common eel for articles of commerce. The skin, when prepared, closely resembles leather, but is more pliable and gelantinous.

"A VERY GALLANT GENTLEMAN."

The jangle of the old-fashioned door-bell stirred May Dundas from her reverie. The door of the room was opened, and a maid stepped in a pace or two.

"Lieutenant Fraser has called, Miss May," she said. "Shall I ask him to come up?"

May nodded.

Left alone, she turned towards a brightly-polished silver shield which hung over the mantelpiece, and served as a quite efficient mirror.

Satisfied that she was presentable, she seated herself again, and was just picking up a book when she heard the creak of the door-handle.

Twisting round in her chair, and letting the book slip from her fingers, she saw Alan Fraser.

Bronzed, athletic-looking, frank of face, and wearing the Service kit of the Strathmore Highlanders, he came into the room with a swing, and walked towards the girl. The door closed softly behind him.

Halting beside May's chair, Alan took the hand that she put out, and held it firmly. For some moments there was silence; but in the searching eyes of each lay a score of mysterious questionings, tender, unborn speeches, aching fears.

It was the man who spoke first.

"I'm glad I found you alone, May. I was hoping for that luck. Your aunt is out?"

"Yes. Sit down, won't you, Alan? We want to talk."

She lowered her eyes then, and did not look at him again for some moments.

Then: "Any news yet?" she asked, her voice not quite steady.

He nodded happily.

"Yes; we are striking camp in a day or two. We hope to be at the front in a week from now."

A little, half-crushed sob came from her, and a strange mistiness clouded her eyes.

"So soon?" she said, in just above a whisper.

"Yes; and, May, that's why I'm going to say something now that maybe I wouldn't have had the courage to say for a long time, if we had kept in this country. Look at me, dear. I want to see if there's any hope for me in your eyes."

Slowly her head was raised. She met his gaze, and a glow, half-awing in its power, but very sweet to her, surged through her being. She scarcely heard his words; there was no need.

"I don't know why I've never told you before, dear. You've had my heart all the time, but I never told you because I couldn't think it possible that you could care. I'm such a poor sort of thing compared with you. My love—my little, grave-eyed sweetheart!"

Stooping, he put his strong arms about her, and in their shelter she lay trembling, but happy beyond belief; and, with her mouth on his, knew that the glory of love had come to her for all time.

Half an hour later they said their brave good-bye.

"You will come back to me, Alan," she whispered, her small, hot hands on his shoulders. "Before so very long you will come back? Say it, Alan—say it!"

"Of course I'll come back," he answered, his voice cheery. "Maybe by Christmas-time—who knows? But, anyhow, I'll come back. But, May—"

"Yes?"

"There's just one thing I want to say. It's about Roy Davidson."

"Oh!"

"You mustn't mind my mentioning him; I've got to. I know how he's been trying to win you. Everybody here knows it. I don't trust him, May. Once I'm out of the way he'll come pestering you. I know it. Quite possibly he'll ask you to marry him."

She laughed—a broken, pathetic, little laugh.

"There's only you in the world," she managed.

"Roy is nothing. I could never like him—never."

Alan leaned towards her.

"It is not good-bye, sweetheart," he said slowly. "It's only au revoir."

Four or five minutes later May was alone, and sobbing quietly. It was a harder matter to be brave than she had thought.

* * * * * *

When the Strathmore Highlanders had been gone from the great home camp some ten days, and the sunshine of early autumn was still bright, Roy Davidson, choosing his hour carefully, called on May and asked her to marry him.

At first the surprise of the thing rendered the girl wordless. Then, with cheeks aflame, she faced the handsome, rather dissipated-looking man at her side.

"You! How can you dare to ask me that?" she exclaimed. "Don't you know that it is an insult?"

His eyelids narrowed and a nerve in his cheek started throbbing.

"An insult?" he repeated. "What d'you mean, May?"

"You don't think that you are insulting me by asking me to marry you, when you know that I am engaged to another man?"

There was a tense silence, and she noted with a dim wonder how the other's hands clenched and unclenched where they hung at his sides.

"You—are engaged!" he said, in a sort of husky matter. "I—didn't know. It's to Alan Fraser, of course?"

"Yes."

"And you love him?"

"Yes."

"Would I have had a chance if he hadn't asked you first?"

She shook her head. Gentle as a rule, she felt no gentleness towards this man, of whom she had heard much that was evil and but little that was good.

"No," she said. "There would never have been a chance. I could never have cared for the type of man who skulks at home in safety while his brothers are giving their lives for their country. You have no ties to keep you from joining the Army, and yet you don't join. You are a coward—a coward!"

His face was dark with a sudden, bitter resentment, with a passionate hatred of his rival. His hands were twitching then to be at Alan Fraser's throat.

"So I am a coward!" he said, his voice hard. "Well, perhaps! But God grant that Fraser and I may come face to face some day! Pray, then, girl, that I may be a coward!"

Dazed, and with a numbing pain in his heart, he went from the house, and back to the little estate where for the past six months he had been laird.

For a week May heard nothing of him, then got this brief note:

"Dear May,—Having now no fear at all of German bullets I have joined the 2nd Battalion of the Strathmores as a private, and have been lucky enough to squeeze into a draft which is to go to the front at once to make good wastage in the 1st Battalion. I've escaped weary training by this, and I'll be meeting our friend Fraser soon. He will be my superior officer, but that won't matter. I don't quite know which is the stranger — my hatred for him or my love for you.—Yours,

"The Coward."

With the torn pieces of this note in her hand, May stood staring dully in front of her, a new fear in her heart—a fear for Alan Fraser. Far more bitter than any German would be the enemy whom he would have in his own battalion—perhaps in his own company.

It was not until some weeks later that May heard from Alan, and then his letter contained news, the receipt of which she had dreaded.

"A little while ago," Alan wrote, "I had one of the surprises of my life. A draft came out to us, and one of the privates joining my company was Roy Davidson. It won't be news to you that he is at the front. But imagine his being in my company! We quarrelled, of course. That was bound to happen, and rank and so on was forgotten. I expect we'd been mad enough to come to blows, but—there wasn't time. A little dose of shrapnel wakened me to the fact that I was there to fight my country's battles, not my own.

"Davidson has been in action three times with us already, and I'll say this—he has been recklessly brave. He doesn't seem to care what he does with his life. These are the sort of fellows who win through. Nothing ever seems to touch them. Yes; he's a good fighter—Davidson—and a good hater! He and I will have to settle things some day——"

This was not all of the letter, of course; but the rest was for May alone.

Day after day she scanned with eager, fear-touched eyes the dread list in the daily paper, where every soldier's name meant the broken heart of some woman who had waited hopefully, helplessly at home. And then one day—it was just at the beginning of December—this item in the "Scotsman" caught her eyes:

"OFFICERS

"Wounded.

"Fraser, Lieut. Alan J., 1st Batt. Strathmore H."

She did not faint when she read that, nor cry out. Tears did not come to her wide eyes. She just sat holding the paper crushed between cold hands, gazing deep, deep into the core of the leaping fire. He was wounded, they said! To-morrow maybe there might be that awful phrase: "Since died of wounds."

How could she live until she knew? How could she face the grey days of torture ahead?

* * * * * *

Two days before Christmas Alan Fraser, with an empty sleeve to tell of sacrifice made for Britain, was brought by May's aunt to the door of the room where the girl was waiting.

"She is expecting you," Miss Dundas said. "It was far better to warn her. Just go in, Alan."

Five minutes later the magic joy of reunion was over. The first soft tears shed upon her hero's empty sleeve, May sat listening to him while he spoke.

"There's something I want you to know to-night—now, dear," he said gravely. "I'm alive and back here with you because another gave his life for mine. I'm not going to give you details of that engagement when I went down; they're too ghastly. But just this you must know—the man who saved me, who, while he was wounded himself, carried me a half-mile under fire into our own lines and then died, was Roy Davidson. May, don't start like that. You must be brave, too.

"I thought we were both done for then, but he had strength enough to whisper, and I had strength enough to hear, his words.

"'It's for her I did this,' he said me. 'I loved her, and I've saved you for her. Love was stronger, after all. She'll understand. You'll see her again, Fraser; I won't. Tell her——'

"That was all. I can't say any more. I'm not able. I can't forget his eyes."

Long moments passed, and she drew near to him so that her wild heart-beats thrilled him. Something wet was shining upon her cheek.

At last:

"He died for me, then," she said, so faintly that he could scarcely hear. "He died for our happiness."

Looking past her to the fire, Alan nodded.

"Yes; he died for us. God rest his gallant soul!"

Then he bowed his head, and, with his lips, stopped her starting tears.—London Answers.

WEDDINGS IN LONDON.

There Were Over 58,000 of Them Registered in 1915.

Marriage rate—Highest on record. Birth rate—still falling.

These are among the most interesting points brought out in the report for 1915 of Dr. W. H. Hamer, Medical Officer of Health for the County of London, England.

The number of marriages registered in London was the highest ever recorded—58,345, as compared with 43,373 in 1914 and 41,409 in 1913. The increase over 1914 is 34 per cent., but as the corresponding increase for the rest of England and Wales is only 20 per cent., there is reason for thinking that a considerable number of these marriages may not properly belong to the London population.

The estimated "civil population" cannot be used for calculation of the rate, since the males married include a number of men on service, but taking the probable population of 4½ millions the rate would be 25.0 per 1,000. There has been a slight annual increase in the marriage rate since 1908, but the bulk of last year's increase must be directly attributed to the war.

The birth rate shows a further fall from 25.0 in 1909-13 and 24.3 in 1914 to 23.6.

The increasing tendency to marry later in life is another factor which is examined. "The effect of postponement of marriage has hitherto been considered mainly from the point of view of its relation to the duration of marriage," Dr. Hamer says, "and insufficient allowance has been made for what might be termed the physiological effect."

The London Chronicle comments as follows on conditions:

"It may be urged that if the decline in the European birth rate be largely attributed to emigration, the countries to which the emigrants go should show high birth rates. It may be noted that the United States have received nearly 20 millions of young adults from Europe during the last 40 years, and, as H. P. Fairchild notes, 'the high birth rate of our now large foreign-born population is notorious; moreover, the years of this great exodus are precisely those of the declining birth rates throughout Europe.'

"One curious effect of the war to which Dr Hamer draws attention is the arrestment of building activity, the result of which has undoubtedly been to check the outward movement of the population which has been going on for some time, more particularly north of the Thames."

GERMANY USING CRIMINALS.

Put Into Most Dangerous Service at the Front.

D. Thomas Curtin, writing in the London Times, says: Throughout the war Germany has used every scrap of material in the Empire to help to win. To one who knows Germany, therefore, it does not come wholly as a surprise to learn that she has heeded the demands from some quarters to put criminals in the most dangerous service at the front, where they are driven to their work. I have heard it stated on excellent authority that some of these have actually been chained to the machine guns and been given this terrible chance to fight for their lives. This is a radical departure from former German boasts that no man with a criminal record was allowed to serve.

WAR IS PREFERABLE.

Former Clerks at the Front Dread Return to Civil Life.

The life of a soldier compares favorably with the pre-war existence of a London clerk, says a man who worked in the offi cefaoaergswaftwa worked in the office of a great business house before he entered the service. He writes home:

"I am going into the line again in an hour or so for a few days' rest. It's a great life, except for the war, and I say in all sincerity that, after seven months of it, I have really enjoyed it.

"Think of the time saved, for instance, by lying down fully clad, even to one's boots, and the time saved by getting up fully dressed. No need to wash or shave—no water to manage it in. A good, open-air life, plenty of excitement and humor, no worry in the world; why, I fear that I shall feel like a poor stranded jelly-fish when I get back to business and a full drawer of orders."

MOST NAKED FORM OF PROFITEERING

BAD POTATOES SOLD TO POOR IN GERMANY.

Tricked by Government into Buying Food That Sickened Pigs.

D. Thomas Curtin of Boston entitles his article on German conditions published in the London Times "The Potato Trick; Rich Against Poor." It charges that the poor of Germany have been sold rotten potatoes with Government connivance.

"The difficulties of the cynical group who are the real rulers of Germany have increased," he writes. "One of the countless sources of anxiety has been the harvest of the very important potato crop, now an integral part of the Austrian and German bread.

"The handling of this crop exhibits the most naked form of profiteering to which the poor have been subjected by the rich.

"Slowly the food situation in Germany has grown worse month by month. I would ask my readers not to build false hopes. This is no accurate statement; nothing approaching actual starvation exists in any part of Germany. Thus far I have discovered no child without milk. I believe the infant death rate is less than in time of peace. No German is without a sufficiency of some kind of nourishment to carry on existence.

Weak and Delicate Suffer.

"The weak and delicate are suffering, and there is a great amount of national irritability caused by low diet, but everybody is getting along somehow—the army and navy extremely well.

"No people are more easily and continuously bluffed by their Government than the Germans. Lincoln's dictum about not fooling all of the people all of the time does not apply to them.

"An abominable deception was practised upon the public with the first potato supply. For many months potato tickets had been in use, when suddenly official notices appeared saying that potatoes could be had for a few days without tickets.

"The unsuspecting public ordered great quantities, and the agrarians thus got rid of all their bad potatoes, selling them to the mass of the people. In many cases they were rotting so fast that the purchaser had to hurry them, and it was found that they produced illness when given to swine. What other people in the world but the Germans would have stood it?

"Food Dictator Batocki has been unable to make the agrarians put the potato crop now gathered upon the market even at the maximum price allowed by the food commission. They are holding back the supplies until they have forced up the maximum price, just as a year ago many agrarians allowed the potatoes to rot rather than sell at shillings to the city at the price fixed by law.

Won't Agree to Fair Price.

"In any other country in a state of siege the Government would commandeer the supplies. As the industrial classes until recently resisted the war taxes, so the Prussian Junkers snap their fingers at suggested fair laws for food distribution. What state of mind does this produce among the people?

"Outside Germany there is an idea that every German is working at top speed, the spirit of the fatherland leading him on like a flame. That was the spirit witnessed in the early days of the war. Now there is a great bluff in circulation throughout the world.

"The revelation that so angers them is that it is a lie, that all is going fairly well in Germany and that there is no longing for peace. In certain rural districts there is an intense longing for peace, not merely a German peace, but any peace. This feeling arises not only from military reasons, but from the utter weariness of the rule of the profiteers."

The writer declares that the last potato crop was poor, rye was good, wheat was fair, oats and barley excellent. He refers to the great efforts of the Germans to get oil, nuts, berries and poppies, but says the people are apathetic, as the Government has taken the crops at prices already set. He ends:

"The conquest of Rumania may yield foodstuffs and oil, and smuggling by neutrals will help the army and munition works, but if the blockade is strengthened Germany can be defeated."

A Job for a Versatile Man.

According to a London paper, the Lady's Magazine for 1780 contained the following comprehensive advertisement: "Wanted, for a sober family, a man of light weight who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join in household prayer, look after horses, and read a chapter in the Bible. He must rise at seven in the morning, obey his master and mistress in all lawful commands, and if he can dress hair, sing psalms, and play at cribbage, so much the better. Wages, fifteen guineas a year."

A WARNING NOTE.

What the German Submarines Might Do to the United States Navy.

The absolute secrecy with which the merchant submarine "Deutschland" and, later, the fighting submarine U-53 made their way into the Chesapeake and Narragansett Bays, should serve as a note of warning to the United States, says the Scientific American.

Whether or not the German Government sent this fighting submarine across for the express purpose of showing the United States that she was capable, if she so wished, of running amuck among our shipping, the instant it ventured beyond the three-mile limit, is a matter for conjecture. But this much is certain, that after these visits, it will be our own fault and not Germany's if we fail to realize that what she did to merchant shipping off our coasts, she could just as easily do to the naval and merchant shipping within our own dockyards and harbors.

To be more explicit, we mean that if we should get into further controversy with Germany over this U-boat raiding, and the discussion should reach the critical phase of an impasse, it would be an easy matter for Germany to repeat the silent entrance into our harbors, not with solitary submarines but with flotillas of them, one for each port, and make a clean bag of our whole fleet in the Atlantic.

Why not? This would be merely letting war itself make its own declaration of war, as the Japanese did in their surprise destroyer attack at Port Arthur. And if such a raid were made, say by a dozen submarines, the loss of our whole first fighting line of twenty-one dreadnoughts in the brief space of fifteen or twenty minutes would be a perfectly reasonable possibility.

If a reader should exclaim "Impossible!" we invite him (bearing in mind how perfect a surprise visit U-53 was able to make in broad daylight) to consider how simple a matter it would be for a couple of flotillas, say a dozen boats in all, to creep, during the night, into Narragansett Bay, and line up ready for attack just as soon as there was sufficient light for periscopic vision.

But what would there be to attack? Well; Narragansett Bay is the rendezvous for our Atlantic fleet, during the Summer season; and there are times when practically our whole first-line fleet is anchored in line formation within the Bay. If any attack were to be made it would take place as unheralded as was the visit of U-boat 53. And if the two flotillas moved down between the lines of our ships, steering a zig zag course so as to bring bow and stern tubes to bear alternately, can it be denied that, among the one hundred torpedoes which the flotillas carried, there would be a sufficient number find the mark at such short range as to put our whole fleet at the bottom of the Bay?

Last year a book was published in this country under the title "America Fallen," which showed how perfectly possible it would be for enemy submarines to make a simultaneous attack, unpreceded by any declaration of war, upon our various unsuspecting dockyards, and naval stations. The scholastic and swift sinking of ships, as portrayed in the book, was criticized at the time as being a visionary and impossible feat.

But this visit of U-boat 53 proves that, granted the existence of an international quarrel impassible of adjustment, such a raid, followed by disaster of the first magnitude, would be the chief among the dangers to which our unpreparedness exposes our first line of defense.

Would it not be well for a joint Army and Navy Board to elaborate a scheme for netting the entrances to our ports and dockyards as a matter of reasonable security?

Hundreds Seek Freedom.

The number of Russian war prisoners who try to escape to neutral countries in the hope of reaching their fatherland increases steadily, but very few of the fugitives manage to get out of the German Empire, says a Berlin despatch. Most of them are caught before they reach the frontier. When captured they all give the same explanation for their attempted flight —they are homesick and want to see their families again.

4,500,000 Pieces of Mail Daily.

The French soldiers' correspondence now amounts to nearly 4,500,000 pieces per day. They receive an average of 4,000,000 ordinary letters, 700,000 registered letters, 30,000 postal and telegraphic money orders, and 50,000 newspapers. It keeps a busy staff of more than 2,000 special employes at the central postoffice in Paris.

Immaterial.

"Scientists are now generally agreed that drunkenness is a disease, and that the man who drinks should be treated by a physician."

"Oh, well, most men who drink don't care who treats them."

Modest Request.

Salesman (in music department)—What can I do for you, madam?

Lady—"Sing Me to Sleep," please.

Mamma—That's just like his father. He made his money in the grocery business.

THE WONDERFUL FRENCH ARMY

REVIEW OF ITS WORK SINCE THE WAR BEGAN.

British Tribute to Accomplishments and Sacrifices of the Nation.

Is it possible to praise the work of the French army too highly? asks the Manchester Guardian. It began badly, for its plans of campaign were unsound, and, in addition, the Germans had an immense lead in numbers, in their mobilization arrangements and in most important branches of the mechanics of war. But after the opening passages it recovered with amazing rapidity. The strategy of the Marne was in subtlety the finest thing in the war, and on the Nancy front the French, under Gen. Castelnau, were about the same time exhibiting qualities of stubbornness in defence that we sometimes like to think of as distinctively British. Then followed during the winter a period of drastic army reforms which showed the patriotism of the new French army at its best, for nothing puts such a strain on it as to cashier one's friends, as General Joffre had to do at this time in the highest interest of the country.

The French army last year overestimated its power by forcing the enemy's position, and it suffered very heavily in consequence. But for all that, in spite of its failures, what a magnificent record it has, with two tremendous offensives in Champagne, one in the spring and a second in the autumn, the first a real breach in the enemy's lines by the conquest of the Labyrinth near Arras, to say nothing of fighting in Alsace and away to the north of Ypres!

Surprised Her Enemies.

And, in spite of all France's losses, she was still equal to a campaign in the Dardanelles, and after that to a leading part in the defence of Salonica. One does not know which to admire most—the loyalty to her ally Serbia in di tress, the profusion of her sacrifices to the common cause, the clear, penetrating vision into a strategical situation, or the stoical calm—so different from the vulgar idea of the Frenchman—with which she has borne losses and the postponement of her hopes. But, great as France was last year, she has risen to fresh heights this year. Verdun, after the shock of the first few days, was magnificently done, and, so far from being weakened to helplessness by her losses, as the Germans had hoped, they have stirred her to fresh efforts. Her energy in the Somme battle is beyond praise and is now reaping a splendid reward. She has in General Foch probably the finest tactician in Europe, and her staff work and technical organization have now reached the highest pitch of efficiency. But these things would have counted for comparatively little after all that France has gone through if it had not been for the indomitable energy and the lofty pride of her people. Well may we be proud of such allies

Farm Notes.

In Jamaica a kicking horse is flagged with a red ribbon on his tail. A good idea.

Little salt in the manger for the cows, less money in the pocket for the man and his family.

The fewer straps you have dangling about the legs and body of your colts the less apt they are to get scared and to make trouble.

Never fight with one of your animals. It will be the victor in the end, for even if you kill it it has conquered you. It is out of trouble and you are out of pocket to the amount of the value.

If you are starting into farming and do not know all there is to be known about cows, it is better to put the money into three really good ones than into a dozen animals that must be fed, but which make you no promises. From the three you can raise a dairy worth having.

Sometimes a neat cow habitually lies down in the stanchion as far forward as possible, so as to keep clean. Then when she rises she has trouble, and somebody says she is old and stiff or rheumatic. Try giving her a new place where the platform is three or four inches longer, and see.

When you cut the halter ropes for any animals, try making them a foot or two longer than you actually need at first. The end next the snap always wears and rots off before the rest of the rope is worn a bit. Then when it breaks, or nearly breaks, the rope can be shortened a few inches and still be long enough.

You may carry skin disease from one animal to another on the brush you use. When you have one animal that is affected this way, never touch the brush or comb you use on him to any other creature. We have seen cases where we even had to tear out the woodwork of a horse stall and put in new before it was safe to stable another horse there.

The ocean of life is filled with breakers; that's why so many men go broke.

The Paisley Advocate

PAISLEY, DEC. 6th, 1916

LOCAL AND DISTRICT NEWS

Critical Operation

Zena, the fourteen-year-old daughter of Mrs H Grant, Goldie St east, was taken ill with appendicitis last week, and Dr Lacy, of Guelph, was called to operate. It proved to be a very critical case, but the patient has since been progressing favorably towards recovery.

Going Overseas

Norman Allen, son of Dr and Mrs A H Allen, is home on last leave before going overseas. Norman joined the Divisional Signal Co in September and was training at Ottawa, but recently got a transfer to the dental corps, with which branch he will be connected overseas, with the rank of sergeant.

Saugeen Soldier Dies in Toronto

Pte Roy Reany, of the 2nd Army Service Corps, died at Toronto on Wednesday last. Deceased is a son of Mr J W Reany, of Saugeen, and enlisted only about two months ago. The remains were brought home from Toronto by the young man's father, and the funeral took place on Friday to Port Elgin cemetery.

Well Done, Port Elgin!

From Trafalgar Day, 1915, to Trafalgar Day, 1916, Port Elgin raised $8,000 in subscriptions and cash contributions for Red Cross and Patriotic Funds. This, says the Times, does not include the work of women, who have raised large sums of money and done much knitting and sewing. This is a fine record for a town of 1,330 population.

Red Cross Shipment

The Red Cross workers of No 15 Bruce received from all sources since Feb 24th, 1916, $498. Of this sum $105 was granted them by the township council. Their shipments to date are: 249 pairs socks, 182 flannel shirts, 139 hospital shirts, 19 pyjama suits, 33 pillows, 41 pillow slips, and a large number of mouth wipes, washcloths and old linen for hospital uses. Cash on hand, $59.58. Officers - Miss N MacGillivray, Pres; Mrs Wm Minto, Vice-Pres; Miss Lizzie Barnes, Sec-Treas.

More Stringent Enforcement Needed

We are of the opinion that the medical health officers of this burg also those of surrounding townships, would have the endorsement of citizens should he compel a more rigid enforcement of the regulations regarding infectious diseases. We have come through a series of epidemics during the past year or so, and while the regulations as to quarantine, isolation and fumigation were formally in force, the results were such as to indicate that the precautions essential to preventing a spread of the contagions were not observed. Nobody was protected by the procedures, as sooner or later all the kiddies became victims of each of the maladies in turn. Those families who really did their duty in the matter found that it was of no efficacy so far as the other part of the public was concerned, for while their children were tied up tight for the stipulated time, much to the inconvenience of the household, other families were scorning all precautions and allowing their youngsters to attend school or otherwise mingle with their fellows so that the germs of the prevalent disease were promiscuously flung about and readily "caught" by those coming in contact. If this open indifference to the regulations is to be allowed and condoned, the municipality might about as well dispense with the formality altogether. We have been under the impression that people were becoming more enlightened as to the effects of these diseases upon child life, but it seems not, after all. Well, if we are still to "have 'em all," what's the matter with just passing 'em around as quickly as possible and have done with it. We are not seriously advocating this policy, but we might do one thing or the other. The one thing has been done up to the present. Now we'd like to see the other tried out. To our mind it would be advisable for one people to do their part by reporting the first outbreak of a new epidemic and stopping it up short.

Died Suddenly

Mr Jas Irwin, of con 10, Elderslie, passed away very suddenly on Saturday night. The deceased had felt a slight pain in his chest for two or three days before, but was around as usual. On Saturday evening he did his customary work, went for the mail at the concession corner, and after coming home read the papers. After retiring he felt the pain more severely, and Mrs Irwin went over to Mr J Bannerman's to ask them to telephone for the doctor. She returned hurriedly, but found that the angel of death had called during her brief absence, and borne the soul of her husband to the great beyond. The late Mr Irwin was born in Raphael Tp, Halton Co, but his parents removed to Pilkington Tp, near Alma, when he was only a child. From there he came to Elderslie over thirty years ago, and since resided on lot 10, con 10. He married Jane Gillies, of Esquesing, who survives him. Their only child, a daughter, died at the age of 13 years. Mr Irwin was a quiet, home-loving man, much respected by his neighbors and friends. He was a Presbyterian in religion and a Liberal in politics. The funeral took place on Tuesday afternoon, and the remains were laid to rest in the family plot in Stewart cemetery. Rev A L Howat conducted the funeral services. The widow has the sympathy of all in her bereavement.

"I FEEL LIKE A NEW BEING"

"FRUIT-A-TIVES" Brought The Joy Of Health After Two Years' Suffering

MADAM LAPLANTE

85 St. Rose St., Montreal, April 4th.

"For over two years I was sick and miserable. I suffered from *constant Headaches, and had Palpitation of the Heart* so badly that I feared I would die. There seemed to be a lump in my stomach and the Constipation was dreadful. I suffered from *Pain in the Back and Kidney Disease.*

I was treated by a physician for a year and a half and he did me no good at all. I tried "Fruit-a-tives" as a last resort. After using three boxes, I was *greatly improved* and twelve boxes made me well. Now I can work all day and there are no Headaches, no Palpitation, no Heart Trouble, no Constipation, no Pain or Kidney Trouble and *I feel like a new being*—and it was "Fruit-a-tives" that gave me back my health".

MADAM ARTHUR LAPLANTE.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

First Impressions of England

Pte R H Mills of the 160th, wrote from Witley Camp, Oct 31st. We have had a rough and dangerous trip. We had one of the worst storms in years, besides being chased by submarines a couple of times. It was so rough one day that we could not keep the dishes on the table long enough to eat. I was only seasick one day, supposing I didn't eat anything for nearly seven days and nights. Now the army cooks can't feed me enough to satisfy me. Well, this is sure some country over here. There is some beautiful scenery, but everything is old looking in a way. All the houses are built low down, and are of red brick. Of course no barns, as they stack everything over here. I did not see a frame building or many trees until I got to the camp grounds here, where our huts are all built of wood and are very comfortable. There are over thirty of us in a hut, but they are plenty large enough. We keep the coal stove burning day and night, for although it isn't as cold here as it is in Canada, we feel it, for it is raining nearly all the time. You should see how they farm over here. Carts instead of wagons, wooden plows, pigs instead of buggies, and mostly mules for work. We see an odd cow and horse. They keep a lot of goats. All they drive is one horse in everything on the farm, and when they plow with two they have one ahead of the other. The same if they have four or five hitched. It sure looks odd to us Canadians. Aeroplanes are more plentiful here than automobiles in Canada. The first day that we were on land (Saturday, Oct 28th) we saw over one dozen. The trains are only half as large as those in Canada, but they travel three times as fast—50 or 60 miles—and they never whistle, as the main roads run under the railroad tracks. We came through a tunnel at Liverpool which is nearly three miles long, also some short ones on the same road. We were twelve hours on the train, and were glad to get to camp. We were out for a route march to-day and my legs are aching, from walking on the macadamized roads, which are as smooth as glass and are more tiresome for walking than the ground. But we never get mud on our shoes. We have to keep our shoes shined as if we were going to a wedding or some-hing all the time. Am writing this at the Y M C A. I have seen some of the boys I knew from around home - Ross Woods and Wm Johnston from Greenock, Jas McIntyre, Vallie Cottrill from Port Elgin, and another named McDonald, a half brother of Alex and Neil McDonald, who was asking about them.

From Bramshott Camp

Under date of Nov 10th, Pte Wm Stafford, son of Mr Hilman Stafford, Bruce Tp, wrote to his aunt, Mrs Neil McArthur, of Paisley. The Paisley boys all had $3 taken off their wages for staying over their pass on last leave, so our pay here was mighty small. We were all given six days off to see London or Scotland, and most of them went to-day. I am not going as I had all my money swiped before leaving Canada. But I will get six days off at Christmas. One of the pictures we had taken before leaving Carling Heights has been received here and hangs in our cookhouse, which is bigger than the Paisley skating rink. One of our 160th boys (Pte Haig, of Tiverton) was killed to-day, run over by a transport. I think the war is just getting nicely started and it won't be long until we are into it. This has been a great trip coming over here. From Montreal to Halifax, I think, is as nice scenery as man could see. It is 850 miles from Montreal to Halifax. The farms are very pretty, all frame houses nicely painted. I don't think they grow much crop, as their barns are small, and have no stacks. Our train stopped at a place called Rosalie for over an hour. There were a lot of people came up to see us, but we couldn't understand their French. Some could speak English. At Moncton they gave us a good reception. The city band was at the station to meet us. We paraded up the main street of the city eight abreast. The girls ran beside us giving us slips of paper with their address, also candies, &c. Halifax is the dirtiest looking place I ever saw. The wagons they use there are only a foot off the ground, with one horse in them, and look very old-fashioned. We had three storms during the ten days we were crossing the Atlantic. The gunner on the ship told me one was the worst storm in 16 years. I didn't feed the fish any, but didn't feel well. I saw big fish jump out of the water during the storm and fall from a wave fifty feet high. Saw one wrecked ship. That storm helped us to reach England safely, as submarines cannot work in such a storm. As soon as we got off the boat we were marched up to a train. The coaches looked like street cars, and when the 160th was in led the train looked as long as last pay. After travelling on the train all day we got off at eight o'clock at night and marched four miles to camp. Well, England sure is a pretty place. People in Canada don't know they are living. Words can't explain it all. But Canada for mine. They grow enough there to eat. We never get butter over here, but get a substitute twice a day. The tobacco is no good either. I thought the town line was hilly, but this has everything beat. The first week over here we had a route march every day. Gee! but those hills make one smile. Witley Camp, where we were first was a nice dry place. Here it is mud to the eyebrows. Last Sunday I saw Lieut McConnel, who was our officer in Paisley last winter. He is still a lieutenant in the flying corps. I am in the pink of health, and hope this finds you all well.

Christmas Cooking

This means appetising odors and delicious flavors in the kitchen. It also means extra trouble and care in selecting Choice Spices and Fruits, both on your part and on ours.

Raisins and Currants

Spices and Peels

Flavoring Extracts

Icing Sugar and Prepared Icings

Nuts and Candies

Sugars and Syrups

All these things and dozens of other lines of choice eatables we are selling at close prices, in many cases (owing to fortunate purchases) actually under wholesale prices.

Top Prices for Produce and Poultry. We want your poultry, and have good market connections.

The Late Melzer Dier

The death of this former Saugeen resident, which occurred at Calgary, was due to pneumonia. He was operated on for appendicitis a few weeks ago, and after recovering from that was seized with the fatal attack of pneumonia. The deceased was 33 years of age. He was well known and well liked by all who knew him. He came to Saugeen when a boy, with his parents, from Perth. When he reached manhood he followed farming. A few months ago he disposed of his farm at Aberdeen and went to Calgary, where he engaged in carpentering. He is survived by his wife, who was Miss Kidd, of Saugeen, who has the sympathy of all in her great loss of a loving husband. His aged mother, four brothers and two sisters also survive—Albert, in Saugeen; Henry, in Keppel Tp; James and William, in the west; Mrs Thos Stanton and Mrs Jas Moore, Saugeen.

Red Men Doing Their Bit

A despatch from Ottawa indicates that in the present big struggle the Canadian red man is certainly doing his bit. No fewer than 1200 Canadian Indians have enlisted in the Empire's service. Of these 65 are in Bruce County Battalion, hailing from Cape Croker where the entire male population between the ages of 21 and 65 years is only 138. Indians at the front have proven themselves excellent riflemen and possess great powers of endurance. To the war funds last year the Indians contributed over $1000, while Indian women have knitted a great many socks, mufflers and other comforts. It is a noteworthy fact that the first man from Brant County to fall at Langemarck was Lieutenant Cameron Brant, a great-great-grandson of Joseph Brant, the famous Indian who rendered such service to the British in 1776.

$1800 Would Be Cheap!

Reeve Phelan, of Greenock, seems to consider that the grant to Red Cross, recommended by the public meeting on Oct 24th, is too large and liberal. Ex-councillor H G Clark reasons it out to the reeve as follows in a letter to the Herald and Times: "I wish to remind Mr Phelan that the 160th Bruce Battalion is now overseas and will no doubt be in the front ranks very shortly and will, I am sure, give as good account of themselves as any men who have ever taken up arms in defence of the British Empire. Does he ever think that these boys are fighting for liberty, truth and righteousness? Does it appeal to him that some of these boys will, if necessary, make the supreme sacrifice as others from Bruce have done? Does he ever think of Lieut Reid and Pte Hanley from Greenock, each of whom paid the great price, and there may be others that I know not of. Does he ever think that some of our boys may be wounded in action? Does he know that if found the British Red Cross will care for them, and does he know that the same society will care for our enemies if found in a destitute or disabled condition, or does he put a commercial value on those young men when he says $1800 is too much for Greenock to grant for their protection. Cheap, cheap. Yes. Even commercially that amount would be a small price to pay to save the life of one boy. What would grant cost Mr Phelan at one mill on the dollar of his assessment? Possibly $2.00. Not having the assessment roll to hand to get the exact figures, I presume $2000 would be a fair estimation of the value of his property. I am informed that Mr Phelan is going extensively into the growing of onions for commercial purposes. If so, it would take less than one bushel to pay his share of tax, or if council met at Chepstow his day's pay, including mileage, would amount to $2.60 which, if he took his meals at home, would pay tax and have about one over. I am sorry to state that Reeve Phelan is not the only one in Greenock who thinks grant too large. I say to such tightwads, loosen up your purse strings. Don't think because your son is not in the ranks that you have no right to help. Your son, if you have one, is no better than your neighbor's. If you have none just think of that fine young man across the way who is fighting your battles for you and then—well, is one mill on the dollar too much to pay for his protection? (No! No!)"

Debentures Well Sold

The committee appointed by the Bruce County Council to sell the $40,000 debentures, being the balance of the $90,000 patriotic issue for this year, opened the tenders at the County buildings here on Friday last. Fifteen tenders were received, all of which were above par but one. The highest bid, which was accepted, was $42,436.00 by Mulholland, Bird & Graham, brokers of Toronto. The debentures bear 5½ per cent interest, and as the offer was considerably above par, shows the strong standing that Bruce County has in the financial world.—Herald and Times.

PRACTICAL FARMING

Live Stock.

What are we as farmers doing toward increasing either the quality or quantity of production, in order to meet the enormous present demands for foodstuffs? How can we meet the great after-war trade demands? Are we systematically preparing against possible dull markets which may follow? In other words, have we, as business men, taken a careful survey and inventory of our live stock operations with a view of increasing production at a decreased cost, by stopping waste in every farm and utilizing our all too limited capital and labor to better advantage?

Feeds.—Every pound of feed should be carefully [illegible] and fed to obtain its maximum value. Where roughages are of [illegible] feeding value greater care and intelligence must be used in preparation to make these more wholesome, palatable and more easily digested. Variety is one of the great secrets of feeding. Waste no good straw; it is more valuable than low-grade hay and should be fed either cut and mixed with other roughages or fed long once daily, or the animals given free access to the straw as a supplement to the supply of better roughage, fed with a well balanced grain ration. In the absence of sufficient succulent, a good substitute such as molasses, beet pulp or an extra supply of grain must be provided. The stock must be kept thrifty, else they are not extracting the most value from the feeds consumed.

Mill feeds should have been purchased, co-operatively, in mid-summer when prices were low. However, if not yet purchased, buy at once. It will save at least a dollar per ton to buy in carload lots. Remember the best grade of feed is in every way the cheapest, costing less per pound of protein and usually being more digestible.

Horses.—The horse market is steadily improving and promises to show continued strength. Never less, greater care is needed in breeding, rearing and feeding a better class of horse which will be more suitable to Canadian markets and command higher market prices.

Horses becoming thin from underfeeding during the winter are losing money. More feed is required to put these horses in shape for the hard work of summer than would be a good maintenance ration during the whole idle season. Horses over-fed during the winter are subject to digestive troubles, become over-fat and soft, and are not in good shape for hard work in spring. The idle work horse may be maintained in weight and condition during the winter months on a ration composed of 1 pound hay, 1 pound straw and 1 pound carrots, mangels or turnips per hundred pounds live weight. All changes in feeds, feeding and management must be made gradually.

The colt of good quality, which is growing must rapidly and kept in thrifty condition but not too fat, will make the largest horse, which will command the top market price.

All the good mares should be bred to meet future market demands. Fall foals may be reared as satisfactorily and in many cases more economically than spring foals. It is not too late to catch the mare which has not yet been bred. It is, however, advisable not to breed at all if a good stallion is not available.

Dairy Cattle.—Good calves of good breeding, well reared to the first calving, are by far the most profitable animals. Varying with the feeds available, prices of feeds and individuality of the animal, it costs at least $60 to $65 to raise a heifer to first calving (28 to 32 months of age). Other things being equal, the poorer the bull used the nearer the dairy farmer is to bankruptcy, and the better the bull the nearer prosperity. The best available pure-bred bull is the only animal which may profitably be used. He will pay for himself in one crop of calves. Can we not see the personal and national loss in the scrub bull, or must await legislation regarding the registration and elimination of the scrub bull before we stop this tremendous loss.

Canadian farmers are losing millions of dollars annually by milking poor cows and rearing poor calves from them, by worthless bulls. The cost of rearing and maintaining, in feeds, labor, and interest on buildings and equipment, is the same for the profit-making cow and the cow losing from $10 to $30 per year. Why not give every cow and heifer a good chance through good feeding and management, then let the boarder go to the butcher? Milk records must be kept to discriminate between good and poor cows. Free milk and feed record forms may be had at this office.

In the absence of sufficient labor, rather than go out of dairying or dry the cows off permaturely, it will be found more profitable to install a good mechanical milker.

Beef Cattle.—Are we making the most beef from our feed? Are we raising, feeding and marketing small, weak, thin-eshed steers, which are consuming as much as the thick, good steer which tops the market? A good beef-bred bull of the right type is the only sire which can leave the most profitable feeding steer.

Are we winter feeding our store cattle most economically? Do not lose the thrifty condition of the yearlings or 2-year olds which are held for finishing on grass. A good winter ration is here suggested: Hay (alfalfa or clover if available), 10 to 12 pounds; roots, 40 to 50 pounds; corn ensilage, 25 to 40 pounds, or a mixture of equal parts roots and ensilage, 50 pounds; clean oat straw, 5 pounds; grain, if necessary, 2 to 4 pounds of a mixture composed of oats and barley equal parts. Lack of quality in the hay or insufficient succulent feeds—roots and ensilage—must be replaced by more and richer grain.

Sheep.—Are you feeding ticks and lice this winter? It is not too late to dip the sheep and thus save a half of your feed and produce thrifty ewes, which can only drop and rear good lambs.

Only the very best breeding rams of good size and quality, showing particularly a heavy, good quality fleece and a strong back and leg, will produce the best feeding lambs and the most wool.

The lambs had best be separated from pregnant ewes during the winter months and fed grain as needed. Pregnant ewes during November and December require approximately: clover or alfalfa hay or unthrashed pea straw, 2 to 3 pounds; roots, or ensilage and roots, 2 pounds, per head daily. Grain should be fed only to the thin ewes. Supply water and salt regularly. During January and February, previous to lambing, grain, 1 to 3 pounds daily, should be added.

Swine.—The money wasted in the swine industry is enormous. Overfeeding of breeding and feeding stock is one of the main sources of loss. Over-feeding of breeding stock will almost invariably produce small litters of weak, unthrifty pigs and a high mortality.

Under-feeding is less common, but is an equal source of danger. The under-feeding of sows and boars produces low vitality and resulting weak, small pigs in the litter. The lack of a proper balance of the ration produces disastrous results more quickly with swine than larger stock. Lack of sufficient ash and protein in the feeding of sows produces litters weak in bone, often lifeless, blind or dead at birth. Lack of exercise is another source of most fatal losses.

The use of poor boars lacking in size, quality and the desirable type, produces annually a high percentage of pigs which are poor feeders and finally take an inferior finish and in every way are less profitable. The pig which is not gaining rapidly is losing money for the feeder.

Farm Buildings. — Ill-ventilated, dark, uncomfortable, foul stables are the cause of loss annually of one-third of the winter feed given to our live stock, and are also the cause of the thin, unthrifty animals so commonly found therein. Such conditions also are responsible for the rapid spread of such diseases as tuberculosis and contagious abortion, which annually cause the loss of millions of dollars for Canadian stockmen. Building new barns or remodelling old buildings without a definite, good plan usually is wasteful, for the desired results are not acquired, and all too soon other remodellings must be made. The modern barn is not necessarily extravagant. Use more cheap sheds and cabins for idle horses, colts, yearling heifers, steers, sows and the sheep, but for the other stock provide reasonably warm, well ventilated, comfortable buildings. Conveniences for handling feeds and live stock in a building will save much labor. The Animal Husbandry Division may be able to assist you with building plans free.—E. S. Archibald, Dominion Animal Husbandman, Ottawa.

Cereals.

Seed Grain.—Early attention should be given to the seed grain which is to be sown next spring. If no special fields for seed purposes were grown last summer, next season's requirements may be met by very careful re-cleaning of the main crop harvested last autumn. One can never afford to sow weed seeds, and one can seldom afford to sow grain more or less mixed with other types. The fanning mill should furnish plump seed free from weeds. If other grains are present, such as oats in wheat, or barley in oats, it will be necessary, and quite worth while, to hand-pick two or three bushels during the winter so as to have a field of an acre or two to furnish pure seed for the following year. Hand-picking may appear too laborious to any one who has not tried it, but by devoting to it an hour or two at a time a great deal can be accomplished in the course of a few weeks and without undue strain on the eyes.

It there is any doubt about the vitality of the seed, a test should be made before the winter is very far advanced.

While the laboratories of the Dominion Government are always available for farmers who desire to have an official report on their grain, any one can make a test for himself without delay by placing about two hundred seeds between layers of blotting paper or cloth, and keeping them damp for a few days. An ordinary dinner plate is very handy for this purpose, with another plate set on it in reversed position.

The grain after being moistened must not be allowed to become dry, and must not be exposed to frost. After about six days the sprouts from the seed of strongest vitality will be sufficiently developed. Seeds which take an unusually long time to sprout generally give weak plants. If less than about ninety per cent of the seed produces strong sprouts, it will be necessary to sow such an increased quantity as will bring the strongly vital kernels up to the usual number per acre.

Change of Seed.—The best advice in regard to change of seed is this:—Change only when you are sure you are getting something superior to your old stock. The new grain should be true to variety and free from weed seeds. A very great danger in obtaining seed from a long distance is that it may contain new and dangerous weeds.

If you have reason to believe that the returns from your fields are less than they should be, considering the character and fertility of the soil and the time given to its preparation, it might be advisable to test some new variety of grain from the list of varieties recommended for your district. For the first season the new sort should be sown beside the old, and a careful comparison made of their relative merits.

Purchase of Seed.—If new seed is to be purchased, inquiries should be made early in the winter from those who have grain for sale. No large purchase of seed should be decided upon without first seeing a sample and obtaining a statement as to its germination, and as to the quantity of other grains present. To intending purchasers of seed grain the Dominion Cerealist will be glad to furnish information as to possible sources of supply of the varieties they desire. Farmers who have seed grain for sale are requested to communicate with us.

Free Distribution of Samples.—A free distribution of samples of seed grain will be made from this Farm for the season of 1917. Farmers who desire to test some other variety than those they are already familiar with may obtain a free sample in this way. The quantity of [illegible] supplied is 5 pounds in the case [illegible] wheat, barley and peas and four pounds in the case of oats. Only one sample of grain will be sent to each farm. For an application form, write to the Dominion Cerealist at Ottawa. No postage is required.—C. E. Saunders, Dominion Cerealist, Ottawa.

Adding Fibre to the Soil.

Everyone who has had experience in breaking up new land has noticed how soon the rich black mould disappears after the soil has been brought under cultivation. The reason for this is that the vegetable matter in such soil has been reduced to humus of a very unstable condition. It is readily attacked by bacteria and broken down so that soon not a trace of it is to be found. The exclusive growing of grain crops, so general on new land and by which but little vegetable matter is returned to the soil, hastens this process of depletion. The process is also most rapid in soils that are naturally rich in lime, a thing neutralizes the acids formed by the decay of humus and provides ideal working conditions for the organisms that break down organic matter.

In restoring humus to the soil by the growing of legumes, the plowing down of green crops and the application of manure, vegetable matter of a more fibrous nature than that which is found on the forest floor, is added. This is not readily reduced to humus. It contains considerable cellulose or woody matter, which offers considerable resistance to the attacks of the bacteria of decay. This fibrous matter, when added to the soil, provides a store of vegetable matter, which is broken down into humus and finally into available plant food very gradually. Vegetable matter from this origin does not disappear from the soil as rapidly as the humus found in newly cleared land. Permanent productivity in soil demands a supply of this fibrous material.

The Farm Home.

A time will come when enlightened farmers will realize that the farm household is the source of all energy, enterprise and intelligence that makes farming a success and life on the farm possible. It is the indefatigable farmer's wife that makes the farm home; altogether too often she makes it a real home in spite of her husband rather than as a result of his co-operation with her. He, to his shame be it said, too often has by far a greater appreciation for hogs, cattle, grain and hay and their proper housing and care than the equipment and environments that make practicable the proper rearing of his own children. Yet he will complain that the young people will not stay on the farm.—American Lumberman.

Abundant Coal Supply.

One comparatively small strip of the coal fields that have been discovered in the Antarctic continent is estimated to contain as much fuel as all the unworked fields of Great Britain.

Rubber Supply Steady While Leather Gets Scarcer

This Explains Low Price of Rubber Footwear in Spite of Increase in Cost of Chemicals, Fabrics and Labor.

The war is using up enormous quantities, both of leather and rubber. At the same time it is seriously restricting the output of the former, much of which came from Russia—while rubber production keeps pace with the demand. From the great plantations now reaching maturity in Britain's tropical Dominions will come this year 150,000 tons of raw rubber—75% of the world's production, and an increase of over 40,000 tons over last year.

Thus, thanks to the British Government's foresight in encouraging these plantations, the Allied armies have been abundantly supplied with all the rubber products they need—Germany and her allies have been cut off—and the price to the world at large has actually been reduced. Meanwhile leather has been getting scarcer and more expensive—80% higher than in 1914—and the end is not yet.

At normal prices a pair of good shoes cost about four times as much as a pair of rubbers—and would last twice as long if rubbers or overshoes were worn to protect them. Or a pair of heavy rubbers for the farm cost much less than heavy shoes, and would stand much more wear in bad weather. So even before the war rubbers were a mighty good investment, to say nothing of their prevention of wet feet, colds and doctors' bills.

Now, when leather costs so much more in proportion, the saving from wearing rubber footwear is so outstanding that no one who believes in thrift will think of doing without rubbers, overshoes, rubber boots, or whatever kind of rubber footwear best suits his needs. Nor will he who is anxious to help win the war, for by wearing rubber he conserves the leather that is so scarce, yet so absolutely necessary to the soldiers.

Wear Rubbers and Save Leather for our Fighting Men!

A Very Merry Christmas

The Gift That Gets A Smile—

because it guarantees unequalled service—from Christmas to Christmas—over and over again—is

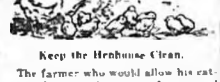
The Gillette Safety Razor

It's the "safest" gift you can select, for every man shaves, and knows that in the Gillette you are giving him the best equipment that money can buy. His appreciation will be SURE and LASTING.

Christmas Gillette displays will be in the windows of all the hustling Gillette dealers—Drug, Jewelry, Hardware and General Stores—everywhere—in a dozen styles or more—priced from $5 to $25.

Gillette Safety Razor Co. of Canada, Limited

Office and Factory—GILLETTE BUILDING, MONTREAL.



THREE VITAL QUESTIONS

Are you full of energy, vital force, and general good health? Do you know that good digestion is the foundation of good health? Pales and sallow complexions, lack of energy, and a run down condition, are the result of indigestion. Mother Seigel's Syrup, the great herbal remedy and tonic, will cure you.

AFTER MEALS TAKE MOTHER SEIGEL'S SYRUP. AND BANISH STOMACH TROUBLES

Small Dose, or direct on receipt of price, 50c. and $1.00. The large bottle contains three times as much as the smaller. A. J. WHITE & CO. LIMITED, Gold Street, Wool, Montreal.

POULTRY

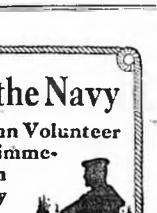
Keep the Henhouse Clean.

The farmer who would allow his cattle or horse stable to go for several days without cleaning would be considered slovenly by his neighbors, and yet the men who are very particular about keeping their main stable clean allow the henhouse to go for months without removing the litter and exercise ment. It is not necessary that the henhouse, where no dropping-board is used, be cleaned every day, but it should be done once a month at least. Give it a thorough cleaning in the fall. Sprinkle a little lime over the floor, which tends to disinfect it, and it does no harm to whitewash the interior. This can be applied either with the brush or a spray pump. If carbolic acid, Zenoleum, cresilin, or some other disinfectant is used it will aid in destroying the vermin. No one can afford to keep hens that are infested with lice or mites. Fresh straw should be placed on the feeding floor every month; it should be from six inches to a foot deep in order to give the hens plenty of exercise searching for their grain feed. There is no better way of getting the blood in circulation and heating the bird's body than by vigorous exercise in the morning. Consequently, many poultrymen make a practice of sprinkling grain in the litter after the birds have gone to roost, to that they are induced to scratch, the first thing in the morning. This straw becomes cut up and more or less dirty in a few weeks' time, which necessitates a cleaning of the pen. If the droppings are left to accumulate underneath the roost, they commence to heat and the moisture given off is not good for the birds. Clean the pen in the fall, and aim at keeping it clean all winter. It is as important as keeping the main stable clean. Poultry will not do well in filth any more than will other live stock.—Farmer's Advocate.

Vegetables for Poultry Feed.

In gathering the garden stuff the hens should not be forgotten. Immature cabbage make excellent winter feed. They should be pulled and put in a convenient place and covered with straw and earth, or even coarse manure. They will freeze somewhat under such covering, but not enough to injure their feeding value. Mangels or other beets also make excellent chicken feed. They can be put in a corner of the cellar and covered lightly with sand or earth to keep them fresh and crisp. A convenient way to feed them is to cut them in halves and nail them up where the birds can reach them; or if they freeze too quickly that way, they may be chopped fine. When chickens acquire a taste for beets they will eat a great many of them, and they are very good feed.

His Preference.



Tramp—Have you any work for me to do, mum?

Lady—What kind of work do you want?

Tramp—Work fer me jaws, mum, fer choice.

Men Wanted for the Navy

The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy

Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.

PAY $1.10 per day and upwards. Free Kit. Separation allowance, $20.00 monthly.

Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

IT ALWAYS BRINGS RELIEF

Skin irritations of all sorts yield to

Vaseline

(Consolidated)
1880 Chabot Ave. Montreal

WHEN YOUR FOOT SLEEPS.

Pressure on the Sciatic Nerve Is the Cause.

If we sit for some time with our legs crossed our foot "goes to sleep." We are really pressing on the sciatic nerve, which supplies nearly all of the nerves of the leg and foot, says London Answers. The nerve is elastic, and is flattened by pressure just like a rubber hose. The fibres which make up the nerve are sensory, that is to say, they carry sensations to the brain.

Motor nerves carry sensations from the brain to the body. The only ways to stop a nerve carrying sensations are by cutting it or by pressure, which pushes apart the soft nerve matter, which is covered with a sheath, just as the water is pushed apart if you press a hose.

When the pressure is on the nerve messages cannot pass backwards and forwards. If the pressure is released the nerve matter returns to its place and does its work.

Minard's Liniment Cures Colds, &c.

CUT BULLET FROM HEART.

French Surgeon Tells of Unique and Delicate Operation.

Dr. Maurice Beaussenat, who had already extracted a piece of grenade from the right ventricle of a man's heart, told the French Academie des Sciences recently of a second similar operation performed with success.

A corporal wounded at Eparges had been treated for peritonitis and then had been operated on for appendicitis. He continued to suffer in various ways for more than a year, when a radioscope revealed the pressure of a shrapnel ball, moving in time to the beatings of the heart. Supposing this to be in the pericardium or sac about the heart, Dr. Beaussenat "went in," as the surgeons say, and saw that the ball was actually in the right ventricle, near the lower end.

The heart was drawn out; its wall was cut open between two loops of wire; the ball was removed and the heart was sewn up again. Six months later the heart had healed so perfectly that there was not a sign of irregularity about its pulsations.

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book at the Eye Free ask Druggists or Murine Eye Remedy Co., Chicago

In for a Blowing Up.

Minard's Liniment Cures Distemper

All Made in One Factory.

Ever since the year 1396 all the fine porcelain used in China's royal palaces has come from the King Teh Cheng factory. The factory was partly destroyed and many of its choice designs were divided among certain leading revolutionists. Recently the ancient factory has received a grant of $20,000 and will again produce the rare and beautiful porcelain for which it is noted.

Hon. Walter Runciman.

head of the British Board of Trade, which department of the Government will handle the food question.

WEATHER KIND TO ENGLAND.

Rain Has Twice Decided Battles in Favor of the British.

Weather, which is again hampering the operations of our armies, has in all times influenced the course of battles, observes the London Chronicle. Its effect, however, has generally been one-sided, and some past examples form a hopeful precedent. At Crecy, for instance, the "great rain," which Froissart records, rendered useless the bowstrings of the Genoese archers, but the English bows, being kept in cases, were not affected. At Pinsney, too, a heavy shower of rain damaged the enemy's powder to such an extent that his fire slackened, and Clive was enabled to avenge the massacre of the Black Hole.

Bad weather materially contributed to the failure of Napoleon's expedition against Russia; and the Austrians, in the retreat at Solferino, were saved from annihilation by a hurricane so fierce that, according to the Moniteur of that day, "nothing could any longer be distinguished on the field of battle."

A FINE TREATMENT FOR CATARRH

EASY TO MAKE AND COSTS LITTLE

Catarrh is such an insidious disease and has become so prevalent during the past few years that its treatment should be understood by all.

Science has fully proved that catarrh is a constitutional disease and therefore requires a constitutional treatment. Sprays, inhalers, salves and nose douches seldom if ever give lasting benefit and often drive the disease further down the air passages and into the lungs.

If you have catarrh or Catarrhal deafness or head-colds, go to your druggist and get one ounce of Parmint (double strength). Take this home and add to it 1 pint of hot water and 4 ounces of granulated sugar; stir until dissolved, take one tablespoonful 4 times a day.

This will often bring quick relief from the distressing head-noises, clogged nostrils should open, breathing become easy and mucus stop dropping into the throat.

This treatment has a silent, local action which makes it especially effective in cases where the blood has become thin and weak. It is easy to make, tastes pleasant and costs little. Every person who wishes to be free from this destructive disease should give this treatment a trial.

WHEAT WISDOM.

Wheat-growing in Egypt Traced Back to 3359 B.C.

The statement that "wheat will end the war" may need qualification, for there are other factors; but the assertion holds much truth. Wheat, in the form of bread, is absolutely necessary to each of the nations engaged in the present war, Japan excluded. There are no substitutes "just as good."

There is evidence that the Chinese cultivated wheat nearly 5,000 years ago, regarding it as a direct gift from heaven. The Egyptians attributed it to their god, Isis; the Greeks to Ceres. Concerning the latter, it was believed that when she had taught her favorite, Triptolemus, how to till the soil and make bread, she gave him her chariot, and in that he traversed the world, distributing corn to all nations. Wheat-growing in Egypt can, by the evidence of a grain found imbedded in the brick of a pyramid, be traced back to 3359 B.C.

9 Varieties of wheat are legion. A French firm in their trial seed grounds had over six hundred varieties growing, and since then "crossing" has increased the number.

HARD WORKING WOMEN

Will Find New Strength Through the Use of Dr. Williams' Pink Pills.

It is useless to tell a hard working woman to take life easily and not to worry. Every woman at the head of a home; every girl in offices, shops and factories is subjected to more or less worry. These cannot be avoided. But it is the duty of every woman and every girl to save her strength as much as possible, and to build up her system to meet unusual demands. Her future health depends upon it. To guard against a breakdown in health the blood must be kept rich, red and pure. To keep the blood in this condition nothing can equal Dr. Williams Pink Pills. They strengthen the nerves, restore the appetite, bring the glow of health to pallid cheeks, and renewed energy to listless people. Women cannot always rest when they should, but they can keep up their strength and keep away disease by the occasional use of Dr. Williams' Pink Pills. Mrs. N. E. Tennett, Ottawa, Ont., writes:—"For several years I suffered terribly from nervous debility and was scarcely able to do a thing. During that time I consulted several doctors, and many medicines without getting any help, and I began to think that I would never get better. One day I saw Dr. Williams' Pink Pills advertised and thought I would try them. After taking four boxes I was much better, but I continued using the pills for several months when I was again in the best of health. When I began taking the pills I weighed only 100 pounds. While under their use with my renewed health I now weigh 140. I recommend Dr. Williams' Pink Pills to every one whom I know to be ailing."

You can get Dr. Williams Pink Pills from any dealer in medicine, or by mail at 50 cents a box, or six boxes for $2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

SIKH BOY WON FAME.

Queen Victoria Gave Silver Cup to Ram Singh, Indian Artist.

The story of Sirdar Bahadar Ram Singh, whose death occurred recently, is that of a Sikh boy, born in humble circumstances, who rose to honor and distinction by his own merit and endeavor and who remained, in spite of that distinction, unspoiled, a kind-hearted, modest, genuine man to the end. "I..." writes in the Spectator.

Ram Singh, as a lad, attracted the attention of Lockwood Kipling, father of Rudyard Kipling, and under the auspices of the famous Anglo-Indian artist the young son of a Punjabi cultivator became almost equally widely known as a designer. Later he succeeded to Mr. Kipling's post as principal of the Mayo School of Art at Lahore.

In 1891 Ram Singh was ordered to proceed to England to design and supervise the decorations of the Durbar Hall at Osborne House. The new room was to be in Indian style, and the work was executed with remarkable beauty and effect. The Queen took great personal interest in the work during its progress, and much admired it on completion. Ram Singh might have obtained many commissions in England after that, but he was a singularly unambitious, modest man. He loved his work, but in the strange surroundings he was often homesick, and in 1892 he returned to the Punjab with the treasured possession of the silver cup given to him by Queen Victoria.

UPSET KAISER'S RECORD.

Crown Prince Sceptical About His Father's Bag of Deer.

The Kaiser and the Crown Prince have always been more or less at daggers drawn, and an amusing story of the Crown Prince's "cheek" on one occasion is told in London Tit-Bits. They were out shooting with a party. At the end of the day it was announced that, as usual, the Kaiser had "beaten all records."

The deer we had "shot" were laid before him on the ground in a long line. The photographers began to get busy. "Sixty-four head, your Majesty," announced the head keeper dutifully in the meanwhile.

The Kaiser made no comment or contradiction, but suddenly the Crown Prince chimed in scornfully, "Sixty-four head? That's rather funny, considering you had only sixty cartridges, isn't it, father?"

"Father" became black with fury, but the mischief had been done; a goal many of the party had overheard the remark, as the Crown Prince had meant they should.

IF FOOD DISAGREES DRINK HOT WATER

Whenever food lies like lead in the stomach and you have that uncomfortable, distended feeling, it is because of insufficient blood supply to the stomach, combined with acid and food fermentation. In such cases try the plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure bismuted magnesia in half a glass of water as hot as you can comfortably drink it. The hot water draws the blood to the stomach and the bismuted magnesia acts just as you can tell you instantly neutralizes the acid and stops the food fermentation. Try this simple plan and you will be astonished at the immediate feeling of relief and comfort that always follows the restoration of the normal process of digestion. People who find it inconvenient to take two or three five-grain tablets of Bismuted Magnesia after meals to prevent fermentation and neutralize the acid in the stomach.

THE CONNAUGHT TUNNEL

Construction Work Rapidly Approaching Completion.

One of the greatest of the achievements of the Canadian Pacific Railway is the Connaught Tunnel. This great work—through the lofty Mount MacDonald—amongst the Selkirk Mountains, is nearly six miles long and double tracked. The excavation has been made at a cost of over $12,000,000 to the great transportation company. But the C.P.R., which has spent from $25,000,000 to $35,000,000 per annum on the development of the West previous to the war, does not even in times of a conflict affecting the greater part of the world, spare expense where the public convenience makes an urgent demand. The opening of the tunnel will greatly facilitate traffic, will open a new route, and will do away with many miles of snow sheds.

The Connaught Tunnel will save the Canadian Pacific the lowest grade of any transcontinental railway running through the Selkirk Mountains. It was bored in less than three years under the supervision of Mr. J. G. Sullivan, Chief Engineer of Western lines, and it is claimed that no undertaking of similar dimensions was ever completed in such a short time. In the excavation of the tunnel many engineering difficulties had to be overcome. But mighty rocks gave way and the roots of a gigantic mountain crumbler before the advance of human skill. At various points along the pass there is an eighteen inch concrete wall lining.

During the recent trip to Western Canada, Lord Shaughnessy, accompanied by Chief Engineer Sullivan, took a tour through the tunnel. Lord Shaughnessy was well pleased with what he saw. The construction work is now rapidly approaching completion. Two miles of steel rails have yet to be laid on one side of the track. It is expected that the formal opening will take place during the first days of December. Since its inception the C.P.R., it is reckoned, has spent over $200,000,000 in the development of the West. The latest expenditure is as popular as any that had previously been made.

When His Royal Highness the Duke of Connaught and party took a trip through the tunnel on July 17th, the Duke expressed in eloquent words the gratification it gave him to be associated with the pioneer work of the Canadian Pacific, and he complimented the company on the splendid strides it was making in the development of the country. Then His Royal Highness, baptising the new work, christened it the Selkirk Tunnel. Some weeks later, at the request of Lord Shaughnessy, His Royal Highness consented to have the tunnel called after him. Henceforth it is to be named the "Connaught Tunnel," a fitting commitment to the excellent services which the Duke of Connaught gave to the Dominion during his term as Governor-General.

MY FOUR LITTLE ONES USED BABY'S OWN TABLETS

Mrs. Albert Nie, St. Brieux, Sask., writes:—"I have been using Baby's Own Tablets for the past seven years and they have done my four little ones a great deal of good." The Tablets always do good—they cannot possibly do harm—being guaranteed by a government analyst to be absolutely free from injurious drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Double Proof.

A tramp knocked at a farmer's door and called for something to eat.

"Are you a Christian?" asked the good-hearted countryman.

"Can't you tell?" answered the man. "Look at the holes worn in the knees of my pants. What do they prove?"

The farmer's wife promptly brought out the food and the tramp turned to go.

"Well! Well!" asked the farmer. "What made those holes in the back of your pant-?"

"Backsliding," replied the tramp as he hurried on.

The Last Act.

The 4-year-old had just been served at the table. He continued to talk cheerfully, though unanswered by father. After some minutes of soliloquy he turned to mother and remarked:

"Your husband doesn't talk very much this noon, does he, mother?"

A quiet wedding may be but the calm before the storm.

HIS FRIEND HURT; HE HELPED HIM

Injured Man Laughed When Simple Treatment Was Suggested, But He Thanked His Comrade Later.

Once upon a time word came to Henry A. Woehl, of Plainfield, N.J., that a friend had been injured, and full of anxiety he visited the afflicted man, who was suffering from a sprained ankle.

It was so sad that the leg had turned black," said Mr. Woehl in relating the story. "I told him I would have him out in a week and he laughed at me. But I took him a bottle of Sloan's Liniment, and he put some on and noticed the ankle felt better. I told him to use it every day, and in three days he spoke to me gleefully and in four days he was working. He gladly admits that Sloan's Liniment "put him on his feet."

Sloan's Liniment can be obtained at all drug stores. 25c, 50c and $1.00.

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home

London—Do you wear glasses? Are you a victim of eye strain or other eye weaknesses? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. Many whom were even facing the fact that they had to wear glasses have been entirely relieved through the principle of the wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using the prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them, and that thousands more will be able to strengthen their eyes so as to spend the needs had eyesight of ever growing glasses. For hundreds of ... descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any ... drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in ½ fourth of a glass of water and allow to dissolve. Wash the eyes in this solution two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them before it is too late. Many people have been entirely relieved by this prescription, and it is one of the very few preparations I feel should be kept on hand for regular use in the home. The Bon-Opto Co., Dept. ..., Windsor, Ont., sells it for 50 cents a box, and will fill your orders through your druggist if you cannot obtain it locally.

EDEN GROVE

Old Santa started on his annual trip Monday with a good supply of fireworks.

Miss Seiler, of Walkerton, spent the week end at her home here.

Miss Gertie Alexander left last week to spend some time in the Queen City.

Abbie should give a lecture on the northwest. He certainly travelled and saw things during the time he was there.

Mr W Alexander and daughter Jessie are spending a week with Royal City friends and taking in the winter fair.

When the lightning entered the telegraph office on Monday with a loud crash, burning the instruments out, "Sunny Jim" just smiled and said it put him in mind of when he used to go to see Sarah Jane and her little brother would set a bunch of firecrackers off under the sofa.

Mr Jas Wilson, of the 16th, visited at the home of his sister, Mrs McKeeman, on Saturday.

The kiddies are busy practising for the Christmas festival.

Miss Lily Alexander and Miss Blanche Powell called on Paisley friends on Saturday.

The postmaster has a new alarm clock, but so far Alex has forgotten to wind the alarm part.

Mr and Mrs Robt Gallinger, of Hanover, were the guests of Mr and Mrs Alex Gallinger, Spring Valley Farm, over Sunday.

Mr Thos Desmond has installed a gasoline engine in his elevator at the station, so will be able to handle more grain than ever.

There was a drop in fish, alright, when a keg of trout fell off a Glamis merchant's rig on Monday.

Messrs Mack and Geo Scott were business visitors to the county town on Saturday.

Mr and Mrs Hopper are spending a few days with Guelph friends.

Sir Thomas has introduced us to forty-seven varieties of taxes, but we don't mind. A feller wants to be introduced to something.

Mr John Belbeck called on Walkerton friends on Monday.

The Epworth League will reorganize on Thursday evening, after the regular meeting. The pastor will have the topic. A good attendance is desired.

Messrs Mike Driscoll and Morris Cottrill are among those who went to see the hens lay by electricity at the Guelph Fair this week.

There is quite a lot of dressed poultry coming in just now.

Miss Angeline Fair, of Paisley, spent the week end at her home on King st.

Mr R Perdue shipped two hundred pounds of turkey to a Fort William firm to be distributed among their employees for Christmas.

Mrs McKeeman visited Paisley friends on Thursday.

The new Grand Trunk superintendent, Mr R H Fish, was in town on Thursday. We noticed that "Sunny Jim" had his shoes polished.

Miss Nadina Gregg, of Paisley, was the guest of her friend, Miss Mona Todd, at the Masonic Temple on Saturday.

This is a funny country up here—sleighing in November and thunder storms in December. Santa will not know which to use, runners or wheels.

Pte Dan Desmond, of the 118th, enjoyed a few days' leave visiting friends in town and vicinity.

If you want something good and know what you are getting, buy from your home town merchant.

The Grand Trunk is giving single fare Dec 23, 24 and 25, returning 26th.

It will be a race from now until Christmas for which are studied most, the Bible or the catalogues, with odds on the latter.

Miss Florence Godson, of Paisley, was the guest of Mrs Tennant last week.

Now is your time to decide where you will pick the turkey bones at Christmas.

Mr Cook, of Michigan, is visiting at the home of Mr Arthur Reed, Mountain View farm.

Mr Proud left for Toronto and Aurora on Monday.

Misses Clara Stansal and Viola Kerry, of Walkerton, enjoyed the week end at their homes here.

This is the second week in the last month, girls. Only a couple more weeks to take a leap year leap in the dark.

Children Cry
FOR FLETCHER'S
CASTORIA

GLAMIS

Miss Sarah Jackson, of Detroit, is visiting her mother.

Miss White, from Saskatchewan, is visiting friends here. She is a granddaughter of Mrs Woodstock.

Mr Alex McSweyn had the misfortune of losing one of his horses last week.

Mr Robert Jackson spent a few days at his mother's.

Rev Mr Gilmour, of Ripley, gave a very instructive address in the Baptist church on Tuesday night of last week in aid of the Red Cross Society, which was very much appreciated. Mr Gilmour has been to England, Ireland and Scotland recently, and was able to tell us of things that came under his own observation in connection with the war. Although he spoke an hour and a half no one seemed to lose interest. A union choir of both churches, Presbyterian and Baptist, gave two patriotic choruses. There was a good crowd out considering that the night was very dark.

PINKERTON

Senator J J Donnelly was up to his lumber camp at Trout Creek last week.

Court Auburn No 62, our local lodge of the Canadian Order of Foresters, tendered a banquet on Tuesday evening to Bro Harold Pinkerton, recently returned from the battle front.

Messrs Arthur Alexander and Neil Murray returned from the west on Saturday.

Mr Howell, of Toronto, under the auspices of the Canadian Brotherhood, gave a very interesting and instructive address on the needs of the Belgians, in the Presbyterian church on Sunday afternoon. The congregation, which was not a large one, responded nobly to the appeal, giving $300, which sum, Mr Howell informed them, was the largest given from any one congregation in western and central Ontario.

SECOND CON ELDERSLIE

Mrs W Tully and Miss Susie Tully visited friends on this con last week.

Mrs Klock, of Ottawa, who came to visit her mother, the late Mrs Geo Greaves, returned to her home on Friday.

Mr and Mrs J McCulloch, of Queen Hill, visited friends here on Sunday.

W J Allen went to Toronto on Saturday with a car each of cattle and lambs.

Miss Jean Campbell leaves on Wednesday to make her home with her brother Gillies, at Port William. Before leaving she was presented with a stylish little purse from members of the 2nd con S S as a small token of the esteem in which she is held by residents here, who wish for her prosperity in her new home.

The ladies of school sections Nos 2 and 12 have united together and formed a Red Cross Society to be known as "South Eldersalie Willing Workers." The officers are: Pres, Mrs Wm Young; Vice-pres Mrs Chas Smellie; Secy-treas, Miss Mary Green.

Death has again visited this section and taken away another of its oldest residents, in the person of Mrs Geo Greaves, who passed peacefully away on the morning of Nov 27th, at the age of 77 years and 6 months. Deceased was a native of Ireland, being born near Dublin. She came as a child with her parents to Canada, living at Brockville until her marriage, when she with her late husband moved to lot 13 on this con, where she resided until her last summons came. Deceased was of a quiet, unassuming nature, and she was dearly loved by those who were intimate with her. Her husband, the late Geo Greaves, predeceased her four years ago. She leaves to mourn her loss a family of one son and four daughters—Mrs Pfohl, of Carnduff; Mrs Klock, of Ottawa; Henry, Matilda and Stella, at home. The remains were laid to rest on Tuesday last in Paisley cemetery. The relatives have the sympathy of this neighborhood.

The administrator's sale of the late Thos Pepper's goods was held last Friday, and was largely patronized. Stock and implements both sold well.

A large number from this con attended the Scotch supper in Geneva church, on St Andrew's night.

Mr Geo Jackson is home from the west on a visit to friends and relatives here.

A prayer meeting will be held on Tuesday evening at the home of Mr and Mrs J B Allen.

Children Cry
FOR FLETCHER'S
CASTORIA

GRESHAM

Very much sympathy is extended to Mr and Mrs Alex Shipley in the recent bereavement they suffered by the death of their little son, Edward Archie, in his fourth year. Everything was done that human skill could do to save the life of this very bright, intelligent child, but after two weeks' illness he passed away. He was attended by a trained nurse and daily visited by the doctor. The funeral on Thursday to Stark Vale cemetery was largely attended. The services were conducted by Rev Mr De Mille, of Glamis, assisted by Revs Ecker and MacNab.

CANTIRE

Those who attended anniversary services at Gillies Hill on Sunday last are unstinted in their tributes to the preacher's eloquence.

Jimmy Lowe, who went west on the harvest excursion, has decided to remain for the winter. Jimmy's friends hope the change of climate may cure his rheumatic troubles.

Miss Olive Hetherington, of Chesley, is the guest of Miss Sarah Eason.

Master Maurice Gowanlock has been suffering from a veritable thorn in the flesh. About three weeks ago, while cleaning up a rubbish heap, a thorn entered his knee-cap, which became inflamed and very painful. He has been kept in the house with it, but will soon be out again.

A quiet wedding was solemnized at the Manse, Chesley, on Wednesday, Nov 29, Rev Mr Hills officiating, when Miss Elma Hildred, youngest daughter of Mr and Mrs John Johnston, was united in marriage to Mr Neil McAllister, of Gillies Hill. The happy couple are away on a honeymoon trip to Toronto, returning on Saturday. They will reside in Paisley. Both are well and favorably known here. The town of Paisley is gaining desirable citizens in Mr and Mrs McAllister. Cantire scribe joins with their host of friends in tendering this estimable young couple hearty congratulations.

Rev Mr Amos was the guest of Mr and Mrs Angus Bell during his stay here.

CHRISTMAS MESSAGE

The Hospital for Sick Children

COLLEGE ST., TORONTO.

Dear Mr. Editor:—

Thanks for the privilege of appealing through your columns on behalf of the Hospital for Sick Children, the great Provincial Charity.

Our need of money is measured by the children's need of help, and you can judge how great that need must be when last year 3,046 sick little ones were treated as in-patients, and as will be seen from the 1916 figures, 592 patients were admitted from 242 places outside Toronto.

Last year 871 in-patients were treated for deformities, such as club feet, bow-legs, knock-knees, Pott's disease of the spine, lateral curvature of the spine, dislocations, infantile paralysis, tubercular disease of knee, hip, ankle.

Is the Hospital for Sick Children to take dollars out of your pocket, or is death to take babies out of their cradles? That is the question.

One gift more to the Hospital's treasury means one coffin less in the LITTLE WHITE HEARSE.

The Hospital must be digging up help for little children from the soil of human kindness, or sextons will be digging graves for little children in the soil of many a cemetery.

The Hospital for Sick Children can only volunteer its mercy in so far as you friends of little children volunteer your money for service in the Hospital's never-ending battle for the lives of the little ones.

Let your money fight in the trenches of some mother's trouble and rescue some little child from the dugout of pain, disease and death.

Can the Hospital leave children to die because the fathers of those children have left home to fight for liberty on the British battle line, and can the Hospital help the children of Canada's soldiers with its care unless you help the Hospital with your cash?

You have money enough to help every other war fund without keeping back a dollar from the Hospital's war fund—the fund that helps the Hospital save the lives of little children, including the soldiers' little children.

Do not let the little children pay, in the loss of the Hospital's care, the contribution that should be given and must be given to the war funds.

Your money can send a message of cheer to some father in the trenches—yes, send that message from the cot where the Hospital nurses some little child back to life, the child of the father who is fighting your battle in the trenches.

Every dollar kept from the Hospital's power to serve the little children is a weight added to the burdens and a grief added to the sorrows of this war.

You can bear to have your pocket emptied of a little money easier than some mother can bear to have her home emptied of a little child.

Will you send a dollar, or more if you can, to Douglas Davidson, Secretary-Treasurer, or

J. ROSS ROBERTSON,
Chairman of the Board of Trustees.

TRAINING FOR BUSINESS

For 25 years the NORTHERN BUSINESS COLLEGE, Owen Sound, has been a leader among the institutions specially set to training for commercial pursuits. The interest of this enthusiastic every subject of use in conducting business. Actual practice is given in required degree.

Special courses for young ladies who wish to qualify for office positions during the war.

Winter term begins Jan 2nd, but students may enter any time. Write for Catalogue.

C. A. FLEMING, F.C.A., Prin.

SUFFERED FROM BACKACHE RHEUMATISM, DROPSY.

Dear Mr. Editor—I wish to tell you of a recent experience I had when suffering from backache, weak back, rheumatism, dropsy, and congestion of the kidneys. I tried a new medicine called "Anuric," which has recently been discovered by Dr. Pierce, of whose medicines and Surgical Institute, in Buffalo, N. Y., you have no doubt heard for years. This medicine acted upon me in a wonderful manner. I never have taken any medicine so helpful in such quick time. I do wish anyone in need of such a remedy would give it a trial.

(Signed) G. H. HERR.

NOTE: Folks in town and adjoining counties are delighted with the results they have obtained by using "ANURIC," the newest discovery of Dr. Pierce, who is head of the INVALIDS' HOTEL and SURGICAL INSTITUTE, in Buffalo, N. Y. Those who started the day with a backache, stiff legs, arms and muscles, and an aching head (worn out before the day began because they were in and out of bed half a dozen times at night) have appreciating the perfect rest, comfort and new strength they obtained from Dr. Pierce's Anuric Tablets. To prove that this is a certain uric acid solvent and conquers headache, kidney and bladder diseases and rheumatism, if you've never used the "Anuric," cut this out and send ten cents to Doctor Pierce for a large sample package. This will prove to you that "Anuric" is thirty-seven times more active than lithia in eliminating uric acid—and the most perfect kidney and bladder corrector. If you are a sufferer, go to your best druggist and ask for a 50-cent box of "Anuric." You run no risk for Dr. Pierce's good name stands behind this wonderful new discovery as it has for the past half century for his "Golden Medical Discovery" which makes the blood pure, his "Favorite Prescription" for weak women and "Pleasant Pellets" for liver ills.

FAMINE IN BUDAPEST.

Food in Hungary Is Now Practically Non-Existent.

The Hungarian Government, frightened by the spectre of famine, is seeking to appoint a food dictator, but can find nobody to undertake the job and dictate with regard to food which has no existence, writes a Swiss correspondent. He says the commonest sight in Budapest is that of little crowds, mainly women, who wait wearily outside the shops for food which they cannot get.

Mr. Tabody, in the Presti Napolo, tells that "women have to stand one or two hours to get a few potatoes; from two to three hours if they want a bit of sausage, from three to four hours for a quarter of a pound of sugar and from four to five hours for a bit of lard or fat. A woman who wants to get something to eat for her children every day must spend at least five or six hours waiting in the queues."

People in Budapest are tired of grumbling about the prices of necessaries. Within the last month they have again risen from fifty to one hundred per cent., but even the prices would not matter so much if only the food could be obtained. Budapest is like a town besieged, and the people will soon have to follow the example of the Parisians in 1870 and eat rats and mice. The principal trouble is that the Prussians are taking away nearly everything, and what they leave is seized by the Austrians.

The Important Question.

"Oh, papa, Jack says my love for him makes him feel strong enough to move mountains."

"Yes, but is he strong enough to go to work?"

Mother's Idea.

"Did you meet any nice men while you were away?"

"Yes, mother. Lots of them."

"Lots of them! There aren't that many in the whole world."

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XVI.—(Cont'd).

Leicester heard him coming, and turned round ready to receive him.

With a snarl Jem sprang at him.

Leicester raised his hand and knocked him down.

The next instant Willie and Nat were down upon him and holding him down where he lay struggling and blaspheming, shouting out oaths and threats.

"You ain't hurt, Mr. Leicester?" asked Willie.

"No," said Leicester. "He has not touched me. There is no harm done, if he has received none."

"Not he," growled Willie. "The fool's drunk."

"So I see," said Leicester. "I am not likely to resent the conduct of a drunken man, but I must and I will defend myself against any attack he may make or any annoyances he may give when he is sober."

"Ay, ay," said Willie. "That is right enough."

"Perhaps you will give him to understand that when he is capable of understanding anything," said Leicester.

"Ay, ay, I will," said Willie.

"Good-night," said Leicester.

"Good-night, Maester Leicester," and the two men, or rather shouted it, for they had to make themselves heard above the mad ravings of their companion.

Leicester, calm and unconcerned, gravely walked on.

The two men exchanged glances as they looked at the dark mark of the last blow upon the drunken man's face and grinned appreciatingly.

The captain wrote that evening to Mr. Thaxton, requesting him to be kind enough to come down to Mildmay Park as soon as he could conveniently do so, as Miss Mildmay wished to see him on a matter of business.

All the evening he was as good-tempered and as amusing as usual, and there was not a shadow upon his face when he wished the unsuspecting women good-night, though already in anticipation he was tasting the horror of an ordeal which he had determined to go through.

As usual, he waited until all was quiet, then he lit his cigar and with an outwardly calm bearing smoked it and enjoyed it.

When it was finished and after another term of loitering, he took a cloak and muffled himself up.

It was an old-fashioned riding-cloak, and he could pull it over his head and face and still have a greater part of his legs covered.

In the pocket he slipped the dark lantern.

Then from his bureau he took his revolver and a short, deadly life-preserver, the thong of which he tied round his wrist.

Thus armed, he smiled, with a serene feeling of security, and, as an additional help to his courage, he poured off a glass of brandy.

It was his intention to leave the house, and here a question arose for him which was the better means of exit.

He decided upon that which he had used formerly, and with practised dexterity he fastened his rope, leaped on the sill and rapidly descended.

Cautiously, and looking round him with vigilant eye, he entered the dark cloisters, and forcing his way, crept on tiptoe to the nook on which Leicester had surprised him three mornings since.

In a few moments he was groping on again, and at last reached what seemed to be his destination, a doorway protected from observation by a pillar, up which had grown a thick mass of ivy.

From that point he commanded a view of the whole of the chapel and of the window of the deserted room.

With a slight sigh of satisfaction he seated himself upon a stone and revolver in hand, waited and watched.

How long he could have withstood the influence of that dreadful place and time it is impossible to say, but as the clock chimed the quarter to one his nerves, strung to their farthest, received a shock which dispelled all memories of the past, all hopes and guilty ambitions for the future.

Before him in the darkness and up in the deserted room was the faint light, dimly burning.

A shudder crept through his frame. His hand grasped the revolver, his gaze was chained to that spot.

The light grew more intense, slowly was transformed as he had seen it before, and there, plain and distinct, at the window stood the horrible, fearful White Knight.

For a while the figure remained motionless at the window, then it turned and he knew instinctively that it was coming in the direction of the oriel window.

It so it would in a few minutes be above him. He waited, and his eyes turned to the window.

For a moment he lost consciousness, the next, by a strong effort, he regained something of his old dare-devil courage, and he bit his lip to keep himself awake as the horrible figure approached with floating motion toward him.

Its face was turned from him as it came, but a bird flew out of the ivy with a wild shriek of terror, and the skull face and gleaming eyes followed the bird's flight.

More horrible still, it welcomed it with a dry, hollow laugh, which chilled the watcher to the immortal soul.

Slowly it neared where he stood.

It was opposite.

Then it turned its head, and at that moment, calling up all the courage which he possessed, the captain sprang, with a hoarse, guttural shriek in his dry, hot throat, upon the figure.

Instantly the light disappeared.

He felt to his astonishment, even in his terror, his hands grasp something firm, and then he knew that the ghost's bony hands were round his neck.

But the reckless courage born from very despair filled him, and he exerted his tremendous strength as if he was using it against a human being.

He clasped the figure in his muscular arms and threw his whole weight upon it, forcing it gradually but surely.

Inch by inch, the figure gave way; the floor was reached; the captain with a cry of mad excitement forced it backward upon the stone, then raised his life-preserver and aimed a deadly blow at the skull face.

Then there arose a shout of warning and an oath from the white, skinless lips, and a man's voice came through them hoarsely and panting:

"Hold hard, I give in!"

The captain staggered back with petrifying astonishment.

The next moment he had hauled the figure to the ground, had planted his knees upon its chest, and, leveling his revolver at its head, hissed out:

"Move an inch, speak a word, and I will shoot you like a dog."

Then with the other hand he tore off the skull mask, flung it aside and glared down with a smile of triumph and malice upon the weather-beaten face of Willie Sanderson!

CHAPTER XVII.

The captain drew a long breath, shifted his knee a little on the chest of the prostrate man and smiled.

That smile was a study of malignant triumph and conscious power.

"So!" he said, between his teeth, and weighing the revolver in his hand with its barrel still pointed to the prostrate man, "so you are the ghost, my fine fellow? You are the White Nun who terrifies honest people out of their wits?"

Willie struggled for breath and grinned with daring audacity.

"I give in, captain—give me a little more breathing room," and he groaned.

The captain rose, released his prisoner, and, seating himself complacently, with the revolver still conveniently levelled, watched keenly the huge Willie rise, shake himself and draw a long breath of relief.

"Whew!" he breathed, "that's better. You are uncommon strong, captain," he remarked, coolly eyeing the little figure of his conqueror with looks of admiration.

"I am," said the captain. "Stand there. No," he added, quickly, as Willie was about to slip off the white robe and paraphernalia which constituted his disguise. "No, don't take anything off. I may want to shoot you yet, and your costume would explain everything. Stand there, on second thoughts, you may sit down."

Willie Sanderson, with a shrug of his shoulders, threw himself down beside the captain and eyed the ground sullenly and expectantly.

"Now," said the captain, "I must know the whole truth and nothing but the truth. Answer my question straightforwardly and without prevarication, or I——" and he finished up the sentence by glancing at the revolver.

"Stop," said Willie, driven to desperation by the captain's consummate coolness. "I'll tell ye; I suppose I must."

The captain nodded.

"I saw you the other night," he said; "I was walking in the garden and saw your light. My man and I climbed to the window and were looking for you. We should have caught you then, but were afraid of raising the house."

Willie Sanderson grinned.

"Beggin' your pardon, captain, you didn't see me."

The captain scrutinized him.

"No," he said, "you are right; it was a smaller-made man."

Willie nodded.

"What was he—what were you doing in that room?" said the captain. "Were you on the same errand?"

Willie nodded.

"We was, captain. But we didn't want anything in those rooms, and more by token we wouldn't touch so much as a candle in it, fer the sake o' him as is dead. Maester Mildmay was a good friend to all o' us boys, captain, and we'd guard anything o' 'is rather nur interfere wi' it. The room and all as is in it will be all right for us."

"I understand," said the captain. "You pass through the room to some other part of the house."

"Wrong again, captain," returned Willie, laughing grimly. "The house and all in it be sacred for us. We don't touch aught as belongs to the Mildmays; we'd go many a mile for the pretty miss."

"Then," said the captain, "there's a secret passage from that old room. Where does it lead?"

"To the cliffs," answered Willie, reluctantly.

A light broke upon the captain.

"To the cliffs," he returned, quietly, though his heart beat fast. "To the cliffs and from the cliffs to the beach. What do you want there?"

Willie made a gesture of annoyance.

"What should we want there?" he asked, sullenly.

"I see," said the captain, composedly and slowly. "I see. You are a party of smugglers, my fine friends, and you run your cargo from the cliffs under Mildmay House. So! so!"

Willie nodded sullenly.

"And now, you've got it, captain, what be you going to do?"

"That depends," said the captain. "I must know more. Turn so that I may see you in the light. What is that on your arms and hands?"

"That's canvas," he said. "Job he clever at painting, so he rigged up a skeleton suit. Painted it all black, ye see, and marked out the bones in white paint. Clever, ain't it?"

"Very," said the captain, sarcastically. "And how do you manage the ghostly light?"

"So," said Willie, pointing to a small lamp. "That be filled with some spirit as Job knows on, and when that he set light to, it sets a flame all round."

"I see," said the captain, amazing his will, as he thought how easily the deception was worked.

"There be sulphur round my eyes and on my arms, and my feet wrapped in list," said Willie, holding up one huge foot so inclosed.

The captain started suddenly.

(To be continued).

Choice of Perils.

"This dog," said the fancier, "will protect you from burglars."

"Yes. But I'd rather take my chance with a burglar than with the dog."

CANADIANS

WANTED FOR THE ROYAL NAVY

Two thousand Canadians are wanted for the Royal Naval Canadian Volunteer Reserve towards manning the new ships of the Imperial Royal Navy. Immediate overseas service. Only men of good character and good physique accepted.

OTTAWA

Dog Is Globe Trotter.

Mitch, a Scotch terrier, was rescued from the sea three years ago by Capt. Haines of the steamship Somerset. Since then the dog has been around the world twice, through the war zone and the shadow of the revolutions of Mexico and Hayti. Whenever he sights a vessel, if his master is not on deck, he runs to his cabin and barks or paws at the door.

PAINS AFTER EATING

WIND IN THE STOMACH—ACIDITY, BLADACHES—CONSTIPATION

ARE SIGNS OF INDIGESTION.

Indigestion—the complete or partial failure of the digestive processes—frequently throws out of gear the whole machinery of the body. You can't enjoy the vigour and vitality of good health unless your stomach, liver and bowels do their work regularly and efficiently.

MOTHER SEIGEL'S SYRUP

As a digestive tonic and stomachic remedy, Mother Seigel's Syrup is esteemed in tens of thousands of homes, wherever the English language is spoken. If you suffer much or little from disorders of the stomach, liver or bowels, try the effect of taking 15 to 30 drops of this famous remedy in water, after meals, for a few days and note its beneficial effects.

ASSISTS DIGESTION

The new 10-dose container (here shown at actual size) sold at 25c per bottle.

British Plantation Rubber Is Saving Canada Millions

Low Prices of Rubbers and Overshoes Due to Britain's Control of Situation

Here in Canada many of us have fallen into the truly Anglo-Saxon habit of considering the "Mother of Parliaments" slow and a bit behind the times. The present price of rubber, when its cause is revealed, affords one of the many proofs that such an opinion is awry.

Thanks to great rubber plantations established, in the face of criticism and ridicule, many years before in her tropical Dominions, Great Britain at the outbreak of war held a firm and tightening grip on the world's supply of raw rubber—a grip reinforced by her dominating navy. From 60% in 1914, the production of these plantations has grown this year to 75% of the whole world's output, leaving only about half the requirements of the United States alone to come from all other sources.

The result has been that the needs of the Allies, enormous though they are, have been plentifully supplied, while Germany has been reduced to registered mails and the "Deutschland" in desperate attempts to mitigate her rubber famine. Neutrals have been allowed all the rubber they want, at prices actually lower than before the war, so long as they prevent any of it from reaching the enemy, while Canada and other parts of the Empire have an abundant supply at equally favorable Government regulated prices.

In this foresight and generosity of the British Government lies the reason why rubber shoes, of all the great staples, has not gone up in price—why rubber boots, rubbers and overshoes are as inexpensive as ever, while leather shoes are costing several dollars a pair more. Wearing rubbers or overshoes through this winter to protect these expensive shoes, or rubber farm shoes to replace them, is more than practical thrift—it is grateful patriotism, for in thus saving leather we make it easier for the Government to secure the absolutely necessary supplies of this alarmingly scarce material for our soldiers.

Both Thrift and Patriotism Point to Rubbers!

16

FIVE ROSES FLOUR

FOR BREADS—CAKES PUDDINGS—PASTRIES

About the House

Useful Hints and General Information for the Busy Housewife

Selected Recipes.

Soft Gingerbread.—Six cups of sifted flour, three cups of molasses, one cup butter or lard, one cup sour milk, one teaspoonful soda, two teaspoonfuls cinnamon, one teaspoonful ginger, pinch salt. Bake in a loaf. Half of this quantity can be used.

Bran Muffins.—Perhaps your readers would like to try it: One pint bran, one pint entire wheat, one heaping teaspoonful baking powder, three tablespoonfuls molasses, one teaspoonful salt; mix with sweet milk rather stiff; bake in hot oven.

Egg Cooped in Onion.—Take two or three large onions, slice them very thin, fry till a nice brown. Have ready three or four hard-boiled eggs cut in slices and a cupful of nice gravy with a little flour of arrowroot mixed with it. Add the eggs to the onions, then pour in the gravy, and stir in all till the gravy has thickened.

Delicious Spanish Cake.—Take butter, eggs sugar and flour of equal weight. When the butter is beaten to a cream add the eggs, sugar and flour in the order named. Heat and stir for twenty minutes or more; then drop it in small mounds on a sheet-iron pan dusted with flour. Place a preserved cherry in the center of each cake and bake in moderate oven.

Macaroni With Grated Cheese.—Break half of a small box of macaroni in short lengths. Have a large kettle of water boiling briskly. Salt it and drop in the macaroni, which should have been rinsed in cold water. Boil hard until the macaroni is tender. Turn into a colander, pour cold water over it and then hot water. Season with salt, pepper, butter, a little minced green pepper and one-quarter pound grated cheese, stir lightly, turn into a hot vegetable dish and pass more grated cheese when serving it.

Apple Dessert.—Pare half a dozen apples, cut in quarters and remove seeds, then boil gently in one cup of water with two cups of brown sugar. When soft strain off the juice and put apples in dish from which they will be served. In another pan melt one tablespoonful of flour and one cup of cream (milk will do). Let this get hot, then add apple juice, allow the mixture to come to a boil and simmer for five minutes, stirring all the while; pour this over the apples and you will have a delicious dish.

Lady Fingers.—Make regular spongecake batter, turn it into a pastry bag with a tube in the end and squeeze it out the shape of lady-fingers. Dredge with powdered sugar and place in a very moderate oven. They must not spread or swell. If the former the oven is too cool; if the latter the oven is too hot. When baked remove them carefully from the pan, put the two flat sides together and place them on a sieve to cool. Pans indented in the shape of lady-fingers are much less troublesome to use than the pastry bag.

Jellied Chicken Consomme.—1¼ level tablespoonful granulated gelatine, 1 quart chicken stock, carefully strained and all fat removed; juice of 2 lemon, beaten white and crushed shell of 1 egg, salt to taste. Remove all fat from the chicken stock, add beaten egg, the crushed shell and lemon juice to the stock, place it over the fire and stir until it boils. Boil 2 minutes, then simmer for 10 minutes and strain through cloth wrung from cold water. Dissolve the gelatine in the hot strained stock, add salt, pour in a shallow dish and put it aside until set. When it is firm and chilled, beat the jelly with a fork to break it up, then fill bouillon cups and serve.

Squash Delicacies.

The squash and the pumpkin deserve a frequent place on the menu outside of the traditional pie. It is true that they are both rather insipid vegetables by themselves, but as an accompaniment to some more spicy dish, or prepared properly, they are both delicious and a welcome change from the more common vegetables.

For example, baked squash—cut in strips like a watermelon and bake until a light golden brown—is a delightful change from the baked potato or other starchy vegetable addition to meat.

Squash Souffle.—Two cupfuls of steamed mashed squash, one cupful of cream, two eggs, salt and pepper. Add the seasoning to the mashed steamed squash then add cream and the well-beaten whites of eggs, turn into a buttered baking dish and bake in slow oven.

Steamed Squash.—Cut in pieces, remove seeds and membrane and steam until tender—about thirty minutes. Mash, season with salt, a dash of sugar, mace and a lump of butter. Serve very hot.

Squash Pudding.—Three cupfuls of steamed mashed squash, two-thirds cupful of sugar, one teaspoonful of salt, three-quarters teaspoonful of cinnamon, two and one-half cupfuls of milk, two eggs. Mix sugar, salt and cinnamon and add to squash. Add well-beaten eggs and milk, turn into buttered pudding dish and bake in moderate oven until firm.

Baked Squash.—Cut a squash into strips of about two inches square, dust with salt and pepper. Place in baking dish and add one-half teaspoonful of butter and one-half teaspoonful of molasses for each piece. Bake in moderate oven until soft.

Squash Breakfast Biscuits.—One-half cupful steamed, mashed squash, one-quarter cupful sugar, one-half cupful scalded milk, one-quarter cupful butter, one-half teaspoonful salt, one-quarter yeast cake, one-quarter cupful tepid water, two and one-half cupfuls flour. Dissolve seasonings, yeast and butter in milk and water. Then add squash, cover and let rise over night. In the morning shape into biscuits, let rise and bake.

Cheese Luncheon Dishes.

Cheese Souffle.—Cook together in a saucepan two tablespoons each of butter and flour. When they are mixed pour over them one-half pint of milk. Stir to a smooth white sauce and into this put eight tablespoons of grated cheese, a little salt, dash of paprika and a pinch of baking soda. Beat four eggs, the whites and yolks separately. Remove the cheese mixture from the fire and beat in it the yolks of the eggs, then fold in the whites. Turn the mixture into a pudding dish and bake in a steady oven until it is a golden brown. Serve immediately.

Cheese Straws.—To a half pint of prepared flour add two ounces of grated Parmesan cheese. Moisten with the yolk of an egg and enough milk to make a paste that can be rolled out. Roll into a thin sheet and cut into narrow straws. Bake in a delicate brown. Remove from oven and sift grated cheese over them.

Things to Remember.

Fish is not fresh unless the flesh is firm.

Eggs may not be more than a week old and yet be stale.

All foodstuffs eaten raw should be washed before being served.

Toast is more delicate if the crust is removed from the bread.

Have you tied up little bags of lavender to rest among your linen?

Never put woollen underwear on the baby and he will never need it.

A soured sponge needs to be hung two or three days in strong sunshine.

Save the water in which rice is cooked for a soup foundation.

Stale cake can be soaked in milk and made up into gingerbread.

With a vegetable dinner it is permissible to serve a dessert rich in eggs and cream.

If the chicken is old, the best way to cook it is on casserole, and to make it juicy add milk.

The housekeeper with respect for the digestion of the family avoids cooked-over meats.

Macaroni and oysters baked and mixed as macaroni and cheese make a good winter dish.

Rice and meat cooked together in any one of many ways make an excellent luncheon dish.

When you cream butter and sugar for a cake a little cold water will make the creaming easier.

Always open doors and windows of the dining room, if possible, before breakfast, so as to give the room a thorough airing.

A piece of clean chamois leather wrung out of cold water is the best duster for velvet or plush furniture.

To renovate leather that has become dull and shabby looking rub over with the white of an egg well beaten.

When cleaning brass knobs the surrounding paint may be kept clean if a piece of cardboard is fitted around the knob.

To make meats or a fowl of doubtful age tender add a teaspoonful of apple juice to the water in which they are boiled.

To prevent mould from forming on top of the liquid in which pickles are kept put in a few pieces of horse-radish root.

Place pieces of flannel or of blotting paper between fine china plates. This will prevent them from being scratched.

To prevent linoleum from cracking after it has been rolled and put away place it before a fire a few hours before unrolling it.

When pouring boiling milk or water into a tumbler or glass dish, stand the tumbler or dish on a knife, and the glass will neither break nor crack.

Just a slight shake of salt in the coffee pot will improve the flavor, but it must be a very slight shake, as a trifle to much will spoil the coffee completely.

His Part.

"You admit you overheard the quarrel between the defendant and his wife?"

"Yis, sor, I do," stoutly maintained the witness.

"Tell the court, if you can, what he seemed to be doing."

"He seemed to be doin' the listening."

She Could Cook.

"Can you cook?" Mrs. Worried asked the applicant for a job in the kitchen.

"Can I cook?" the girl repeated scornfully. "Why, madam, with me cooking your meals your husband 'll stay home every night to be sure o' being up in time for breakfast I'll get him."

She got the job.

WINTERING HORSES CHEAPLY.

Brief Article By One of the Officers of the Department of Agriculture.

Below are given some results obtained at the Experimental Station, Cap Rouge, Que., in the cheap wintering of idle horses. The methods followed and the feeds used were such as to make the plan applicable to, and worth a trial in, practically all parts of the Dominion.

Help is scarce, high-priced, and oftentimes unreliable, so that large implements and more working stock have to be employed. It is not always possible to buy a good team at a reasonable price in the spring, while it is often hard to get a decent figure for the same animals in the autumn. It would thus seem advisable, when the ground freezes, to lay aside, as it were, for the winter, all horses which are not absolutely required and to feed them as cheaply as possible without impairing their future usefulness.

To gather data upon this subject, an experiment was started at the Cap Rouge Station in 1911 and has been continued during five consecutive winters, with mares and geldings, some nervous, others quiet, aged five to eighteen years. It has been found that they fared well on a daily ration of one pound mixed hay, one pound oat straw, and one pound carrots or swedes for each one hundred pounds of their weight. Not only did they gain an average of twenty-nine pounds during the five months of the test, but they showed, the following season, that they had lost no vitality nor energy.

The rule generally followed was to gradually cut down the work, also the feed, from November 1 until November 15 when the animals under test were placed in box stalls. They never went out, during the winter, with the exception of an occasional drive of a mile or so. On April 15, easy jobs were given to them and a small quantity of concentrates was allowed until by May 1 they could be under harness ten hours a day and were on full feed. These are important points not to be forgotten to lower and raise the ration little by little, and to leave the horses practically idle.

If horses, due to a hard season's work, are in low condition, they should be fed up to their normal weight before being left aside for the winter, and enough exercise should be allowed during that period to prevent stocking. Another good thing is to give a purgative so as to clean out the system before the long rest. One should also remember that some animals are more restless than others and dissipate more energy, which means that more food will be required, so that the above mentioned quantities should be be increased or decreased slightly, according to circumstances.

Mixed hay, for this purpose, can be of any grass or weed which horses will eat, must not be musty, and should not be worth more than half of timothy. Roots may be carrots, mangels or swedes, though the first are always liked, and the two latter are sometimes refused at first, which requires skill on the part of the feeder to have enough eaten; if roots are not given, bran should form part of the ration, as animals at rest will soon get restive and will not thrive very well on dry roughages alone. Oat straw should be used, as it is more palatable than other sorts.

It would probably be well to chaff at least half the hay and straw, but as the idea is to lower expenses, there seems no doubt that the cost of cutting these roughages would be greater than that of the extra feed necessary to supply the energy used in masticating them. The roots were sliced, most of the time, for the experiments, and it seems better to give them thus, though it is not absolutely necessary, as long as they are not of such sizes as to be swallowed whole, when there may be danger of choking.

It was noticed at Cap Rouge that the legs of horses kept in box stalls, and fed as previously described, did not stock up. If there is no box stall, it is advisable to turn the animals out every day, when the weather permits, so that they may take some exercise. In this case, it is probable that somewhat more feed will be needed, to make up for the lost energy and heat. As to the number of times to feed, it seems that twice a day is sufficient, and that about the same quantity can be given both morning and evening.

IN THE OLD DAYS

Commanders of Armies Were Counterfeiters.

Many ideas have been adopted for supplementing the currency of the different countries engaged in the present war, but it is doubtful if our commanders will be forced to the expedients that were often essential in the old days.

For example, prior to Napoleon's 1812 campaign, the Paris gendarmes one night made a raid on a house in the Plaine Montrouge, and discovered quite a fine manufactory of false notes. There was quite a stir next day when the Police Minister made the announcement that the manufactory had been started "by order of the Emperor." The false notes, which were Austrian and Russian, instead of French, were intended for use against the enemy on the Russian Expedition, but the bulk of them came to grief during the great retreat.

Wellington was responsible for a similar stroke of business during the Peninsular War. Being badly in need of gold when about to invade France, he conceived the queer idea of hunting out some counterfeit couriers from the ranks. Quite a number of these gentry were forthcoming, so strangely constituted was our Army in those days, and these were ordered by the duke to exercise their evil art by transferring his English sovereigns into louis d'or and napoleons.

Our troops at present on the Continent, however, are being paid in English money, the French Government having issued a proclamation to all bankers and traders to give change at the rate of twenty-five francs to the sovereign.—London Answers.

MOTTO STILL STOOD.

Bomb Destroyed Church, But "Love" Command Remained.

The following is a little story which appeared in a recent issue of the Churchman:

One of the bombs which fell on a town in the North Midlands of England exploded over a little Wesleyan chapel 100 years old. The building was completely wrecked. Only one wall remains standing, and on that wall is painted in decorated red and blue lettering the text, "This commandment I give unto you, that ye love one another." The words can be read fifty yards away, and they were murmured by thousands of people who came to gaze at the tumbled pile of bricks and woodwork which sprawled over the site of the chapel.

The Duchess of Devonshire and Lady Anne Cavendish.

The Duke and Duchess of Devonshire have arrived in Canada to take up the great charge just relinquished by T.R.H. the Duke and Duchess of Connaught. To follow those who have made themselves so universally beloved is no easy task, but it is prophesied in England that the new Governor-General and his charming wife will quickly win our hearts. The Duchess of Devonshire, as a daughter of Lord Lonsdowne, does not come to Canada as an entire stranger, since her distinguished father was Governor-General from 1883 to 1888, and then went on to India as Viceroy, as did the late Lord Minto.

THE FASHIONS

Little did our grandmothers dream when they sat together and worked and gossiped at their quilting-bees that the quilting they did then would furnish inspiration for dress trimmings for the women of to-day!

Certainly, the quilting trimming is a very novel idea from the fertile brain of our modern designer. It is generally used in bands at the lower edges of skirts and suit coats and is also used as a decoration for collars, cuffs and pockets. The work is done in machine-stitching and usually the same color silk as the background is used.

The sketch above illustrates the conventional diamond-shaped design but other designs of a less conventional character are also utilized. In this attractive one-piece frock of satin, the belt and the lower edge of the skirt are quilted. Some suits of satin and silk have been seen with quilting on the collar, cuffs and pockets.

Imitations of the quilting idea have also been carried out in heavier materials. For instance, a very good looking full length coat was worked with heavy navy blue silk in the diamond shaped quilted design on a mustard-color background. The large square pockets were entirely covered with this work, a touch of it was on the cuffs, and the collar also had some of it. Mustard is one of the very popular colors for separate coats. Numbers of them are seen at present, some unrelieved by any trimming, and others with collars of Hudson seal or other black furs. Some of them also have bands of fur at the edge of the sleeves or of the coat itself.

The Present Styles Very Youth-Giving

The woman who has not invested in a one-piece frock this season must feel very much out of the swim of fashion. As the days go by, more and more of these frocks are seen in serge, broad-cloth, wool jersey, velours, velvet and velveteen. When a top coat is not necessary, a shoulder cape of fur is the usual accompaniment. Straight lines continue to be the most approved in this type of dress, for the fashion these days is to be slim, and no better way of obtaining this effect is to be had than by wearing dresses cut on these lines. Fashion dispenses these youth-giving styles most liberally at present, and it is no wonder that women have taken so kindly to them for they make them look young and slender.

7401

A Satin Dress with Quilting on Belt and Skirt

For producing straight effects, nothing gives better results than the long unbroken panel and consequently the panel is now enjoying its day of popularity. A smart effect is shown here in the dress of black velvet with a satin panel extending from neck to hem. The bulging pockets add to the style of this dress and do not detract from the slender effect. Panels are not all stitched down like this one. Some of them hang free over the dress and are known as floating panels. A dress which has been specially admired was of dark blue crepe meteor with long straight panels back and front in the form of an overdress. These were in a lighter shades of blue crepe meteor. They extended from shoulder to hem and were confined at the waist by a loosely-tied cord. The top of the front panel was embroidered in silver across the front.

New Russian Blouses

Russian blouses are gaining a stronger hold day by day and they have become so universally popular that the name now stands for almost any kind of a blouse that has a peplum. The high collar and side closing which once typified the Russian blouse are no longer symbols of it, for this blouse has taken on manifold new forms. Many of them slip on over the head or are opened in front revealing a contrasting vest; and as to the high collar, it has been quite usurped by the flat rolling collar.

Some very dainty models are of Georgette in the prevailing suit colors trimmed with gold or silver thread embroideries. The peplums are sometimes finely pleated, sometimes gathered, and very often they are adorned with little fancy pockets. Blouses of this type are made up for dressy wear and they are not only in self-toned Georgettes and chiffons but in flowered and Oriental designs in these sheer fabrics. They are worn with suits or separate skirts.

Black satin and black velvet are very smart for separate skirts. Some pretty striped velvets with colored stripes on a black background are also used for skirts, and they are wonderfully attractive.

The Panel Is Enjoying Popularity These Days

These patterns may be obtained from your local McCall Dealer or from The McCall Company, 70 Bond Street Toronto. "Dept. W"

DEPLETING POULTRY FLOCKS.

Overloading of the Market Reducing the Price of Chickens.

Judging from the unprecedented heavy deliveries of poultry on the central eastern markets so early in the season, it would appear that farmers and producers generally are not only depleting their flocks unwarrantably but also rushing them to the market in an unfinished condition. As a result, the current price of chickens is much below normal value at the present time, in comparison with the prices of other meats. This is directly due to the overloading of the market.

With the brisk inquiry for Canadian poultry from Great Britain, it is expected by exporters that the demand for well-finished, good quality stock will be very keen during the coming winter. Besides, there will be a good demand for home consumption. The price for well-finished birds continues firm, but with so much poor stock arriving wholly unsuited for either storage or export, many buyers have recently reduced their quotations for all low grades.

The presence of pullets and young fowl has also been noted in many shipments. This is most unfortunate considering the price of eggs. The very firm prospect for the profitable marketing of all poultry products points to the necessity of conserving in every possible way all suitable laying and breeding stock. Unless this is done, there will be but little poultry left in a short time on the farms in the central eastern portion of the country. Even though feed is scarce and high, it would pay farmers well to finish the birds before offering them for sale and spread their deliveries over a longer period.

Current receipts to date have consisted mainly of live poultry. The season is now sufficiently advanced, however, to warrant more liberal shipments of dressed poultry. In light of the fact that there will be a considerable movement of Canadian poultry to Great Britain, it is of the utmost importance that all poultry killed on the farms, in addition to being well-finished, be properly killed and dressed. The British market, in fact, all large markets prefer poultry bled in the mouth and dry picked. While killing by dislocation may be preferred by some, the presence of blood in the neck and the resultant discoloration make it unsuitable for storage or export purposes.

Proper and complete bleeding is essential. Sometimes the arteries of the neck are not completely severed, the bird fails to bleed properly, with the result that the carcass takes on a reddish appearance. With proper attention to details, a useful reputation for Canadian poultry can be established on the British market this year. It is of the greatest importance, therefore, that all poultry marketed be well-finished, well bled and dressed and packed in the most attractive manner possible.

The Paisley Advocate

PAISLEY, DEC. 13th, 1916

LOCAL AND DISTRICT NEWS

Red Cross Paper Collection

Next Saturday will be last day for receiving deliveries of old paper, rags, rubbers, etc, at the Gibson store for Red Cross shipment. Bring them in that day or before.

Red Cross Tea Room

The Patriotic League will serve tea in the Gibson building on Friday and Saturday before Christmas. Friends of the cause are requested to donate, as heretofore, supplies for tea room and other articles for sale.

Santa Claus at McArthur's

Yes, old Santa will have his headquarters at our store this year as usual, so have your orders left here. Toys, Fancy Goods, Stationery, Books, Bibles, Games, Sporting Goods, Musical Instruments, Sleighs and Dolls of all kinds. These are some of our special lines for Christmas buyers. Christmas tree committees can get all they need here on special terms. D MCARTHUR'S BOOKSTORE.

Good Christmas Beef

There were some fine young Christmas beef animals sent from here to the show at Toronto stock yards last week. Although none got into the prize list, the stock from Paisley locality brought gilt edged prices on the market. Mr Job Turner sold a steer 13 months old, weighing 1040 lbs. for $136 at 13c a lb. Mr S Winch sold a yearling steer at 9½c a lb, netting $130. Also a calf at 9c a lb. Mr Chris Parker, of Greenock, had another fine baby beef that fetched 13c a lb. Mr Wm Smart, of Vesta, had a top notcher that sold for 12c a lb.

Bruce To Boy Wounded

Sergt Neil McGillivray, second son of Mrs Don McGillivray, 12th Bruce, was among the casualties reported last week. The family received an official intimation on Friday which stated that Sergt McGillivray had suffered a gunshot wound in the scalp on Nov 30th, and was admitted to the B.n Stationary Hospital at Wimereaux, France. Neil enlisted in British Columbia, and was in the 7th Battalion. He went to France on Good Friday.

Says Capt. Dugald McLean Was Killed

Capt J A Reid, son of Mr and Mrs Adam Reid, of Pinkerton, is confined to a military hospital in London, Eng, suffering from rheumatism. Capt Reid has had a strenuous time on the Somme offensive, and with the added strain of grief and anxiety over his brother, Lieut Ernest Reid, he has been forced to take a rest. In Capt Reid's last letter home he mentioned having met Capt Geo McIntyre of Paisley in London, and he also mentioned that the late Capt Dugall McLean, had been decorated for bravery only ten days before he was killed. Thus is the first news received here direct from the front as to the fate of Capt McLean.

The Late Pte Hugh Megraw

It was on Nov 18th that this former Greenock boy was killed in action. Pte Megraw was over the military age, as he would have been 53 years old on Monday last. On that account it was only after repeated attempts that he was accepted for overseas service. But he had learned soldiering in the old 33rd Regt of Bruce. He signed up when quite young as a private in Paisley company, became a qualified sergeant, and in 1899 was promoted to be sergeant-major of the regiment. The following year he went west, however, and that ended his career as a militiaman. But when this war broke out he at once took an active interest in the military preparations. At Bridgewell, B C, he formed the local home guard organized. When these men enlisted for overseas services, their officer desired to do the same, but was turned down. Eventually he did get into the usual fuss, and shortly after was drafted into the 54th, and went overseas with that unit in Nov, 1915. He was a carpenter by trade, but of late years had been prospecting for minerals in B C. He was a son of the late John Megraw, who was a Fenian Raid veteran, and is survived by three brothers and four sisters—Robt John, of Loring, Muskoka; Ainsley, of Vernon, B C; Wallace, on the homestead in Greenock; Mrs McVeety, of Burgoyne; Mrs Henderson, of Superior, Wis; Mrs Sinclair, of Loring, Ont; and Mrs Hamilton, of Hedley, B C. The bereaved ones have the sympathy of their many old friends in the loss they have sustained by the death of their brave brother.

Nothing is More Appreciated than Jewelery for

Christmas Gifts

WE invite you to see what we have for this season's holiday trade.

HERE ARE A FEW SUGGESTIONS

Ladies' Gold Watches, Gents' Gold Watches
Lockets, Fobs, Necklaces

ADMISSION - 25c.

If You're in Your Usual Xmas Dilemma

LOOK OVER THIS LIST

It Will Help You Out!

For the Old Lady of Your Acquaintance

A pair Black Silk Mitts, 2.00
A Soft Tie, from 10c to 75c
A pair of Warm Slippers, all sizes, 75c to 1.50
Woollen Hood for Driving, from 50c to 1.00
A box of Peppermints, a pair of Side Combs or any other article of personal comfort.

For the Old Gentleman:

A supply of Linen Handkerchiefs, with any initial, at 25c each
The "Makings" of a Good Smoke
A Warm Muffler. We have them from 25c up to 1.50
Overshoes for outdoor use, from 1.65 to 3.00

For the Housewife:

A China Tea Set, from 4.00 to 7.50
Nice Linen is always acceptable. We have separate pieces from 10c to 50c. Every taste can be suited.
House Slippers—for tired feet—from 75c to 1.50
A Warm Sweater or Hug-Me-Tight, 1.25 to 5.00
A pair of Kid Gloves. We still have a good stock of these scarce goods.
New Collars, Pins, Blouses or any one of the hundreds of articles you will find here for the house or for personal use.

For the School Girl:

Hair Ribbons, Mitts, Woollen Tam-o'-Shanters, Velvet Slippers, Handkerchiefs, Knitted Scarfs.

For the Mere Man:

Something to wear is always appreciated.
A Fur Coat—warm and durable—from 22.00 to 85.00
Good Driving Gauntlets, 1.00 to 5.00
Neck-Ties, the ever present help in time of trouble.
A Club Bag or Suit Case, from 1.50 to 8.00
Underwear, Sweaters, Shoes or anything else you might happen to think of.

For Baby—the Ruler of the Household:

A Fur Rug for his sleigh, 2.00 to 4.00
A Warm Cap or Coat
An Embroidered Padded Silk Coverlet, 1.65
Woollen Mitts, Bootees, Veils, Bibbs, and many other articles which his Kingship demands.

For the School Boy:

Fancy Braces, 25c to 50c; a Box of Candy, Warm Gloves or Mitts, Buckskin or Horsehide Moccasins, Woollen Toques.

This Christmas

Let us Give Moderately to Each Other and Generously to the Soldiers' Families

Nineteen hundred and sixteen years ago came the very first Christmas, and for all these centuries there has recurred the Great Anniversary with its message of good will to men.

And so we give gifts.

Men and women of Ontario! We who stand for good will among men and nations; we whose men fight that there may at last be real peace on earth—let us make this a Christmas worthy of the day it commemorates—let us lay aside a generous proportion of our Christmas money for the families of those who are fighting the good fight.

Give to the Canadian Patriotic Fund

the fund that guards the soldiers' families from want.

Great as the result will be among the families of our soldiers, greater yet may the blessing be among us the givers. Christmas will have a more vital meaning for us than perhaps ever before and us for the children, who can measure the impression they will receive and keep of that Christmas Day when they shared their Christmas with the loved ones of the men who saved their country!

Let each Canadian boy and girl get a lesson from this historic Christmas which will go with them all through life.

Good men and women of Ontario! Can the need of our soldiers' families cry in vain for the relief which this Fund alone makes possible! Can we—can we, in the face of it all, again give lavishly among ourselves? Shall we not this year, with hearts full of the spirit of Christmas, lay aside a generous proportion of our Christmas money for the cause which so urgently needs it?

"Somewhere in France" he is fighting the good fight.

Somewhere in Ontario all that he holds dear is depending upon our decision.

Truly "It is more blessed to give than to receive."

Ontario will be asked in January to assure the Canadian Patriotic Fund that it can depend on having six million dollars in 1917 for the families of Ontario's soldiers.

Four million of these dollars must be secured from individual subscriptions. If there is no Branch of the Fund in your town or county send your subscription direct to the Head Office, Canadian Patriotic Fund, Victoria street, Ottawa.

Lecture a Novel Surprise

Comedy, education and religion were blended in perfect harmony in an original manner when a live-wire in the person of Rev A J Creighton, of Paisley, struck the Epworth League of Eden Grove and Purdy's Methodist churches last week. The Leagues were bent on rallying their forces for another winter's work. They enjoyed an unexpected treat. Mr Creighton showed us how to see the invisible. As we viewed the wonders of the "infinitely little" under a high-power microscope; as we learned how this instrument had proved the blood on a man's shirt sleeves to be human blood and not pig blood, and so had brought the murderer to the bar of justice; as we saw with our own eyes that "little fleas have lesser fleas, and so on infinitum;" as we are learned, too, how this instrument has brought disease germs out of darkness into light, our faith in God was enlarged while our funny-bones and cheek-muscles were simultaneously exercised. Fleas, bald-heads, glass eyes, w——'s tongues and contankerous husbands were subjects of quite original jokes. The freshness and vivacity of this rev. gentleman's style may be traced to his marked abundance of originality. Comedy, education and religion combined in one social evening which could be well worth a visit for any enterprising society to put to the test. The power of the microscope demonstrated on stereopticon slides is an education to the educated and a splendid antidote to insipid frivolities. Mr Creighton is to be congratulated on his discovery of another worthwhile social evening.—COM.

—THE ADVOCATE office has a splendid stock of wedding stationery and calling cards on hand, also the most beautiful styles of type, so we are able to turn out the finest lines of wedding invitations, announcements, cards, etc. We can do work fit to invite the best of people to a wedding, so why pay two or three times as much to city printers or engravers?

Useful Gifts will be most popular this year, and what is more useful than Furniture

Rockers, Arm Chairs, Tables, Couches, Cabinets, Desks, Pedestals

A COMPLETE STOCK, Suites or single pieces. The finest grades made, at the lowest possible prices. It will pay you to see what we have before spending your gift money. If we have not what you want we can get it for you on reasonable notice.

COUNTY COUNCIL

The December session of the County Council of the County of Bruce was held at Walkerton, opening on the 4th inst.

There was, as usual, little new business offering at the session, this being the clean-up session of the year, and the finance committee was left busy auditing and passing accounts.

The committee appointed to sell the debentures issued to raise money for patriotic purposes, $40,000, reported that the debentures had been sold for over $500 above par. The credit of the county of Bruce is evidently high.

A large number of committees appointed in January and June sessions to look after bridges, etc, reported the completion of the work.

Several delegations addressed the council in connection with different parts of patriotic work, and council passed resolutions requesting that at all recruiting meetings some one should advance the claims of the navy for recruits. They also endorsed the formation of "The Associated Kin of Canadian Expeditionary Forces," believing that if the relatives of those now at the front were united they would have a great influence in stimulating recruiting and would also be able to assist largely in providing employment for returned soldiers.

The report of inspector for houses of refuge on the Bruce House was read. The inspector found the House very efficiently managed and everything in good order, but recommends that the heating system be improved and that a trained nurse be employed to assist the matron.

The county of Stormont is petitioning the government to compel every auto to carry "dimmers" on the headlights and that all vehicles carry some light. The council endorsed the petition.

Wm J Henry, of Kincardine, was appointed high school trustee for unexpired part of term of J H Kaake, deceased, and at the request of the town of Wiarton it was recommended that the chief constable of Wiarton should be appointed a county constable.

The chief item of business was the question of adopting the Good Roads system. The discussion of this took up considerable time and brought out much valuable information for the members. It was pointed out that many thought it was a very expensive system, but it really was not, and in the end is a much better and cheaper way than the present, that it is much easier to keep a good article in repair than a poor one. To the objection that the government borrowed the money they gave towards it and the people of Bruce had to pay it, Reeve Ross neatly replied that that was one of his objections to the present system. The government had already borrowed the money for good roads, the county of Bruce was paying its share but the counties who went in on the good roads movement were getting all the money and Bruce got none. The system of dealing with towns and villages and with those townships who may not get as much work done as others and see therefore compensated by grants, was explained. After a thorough discussion many who before had been rather opposed to it thought the system might be alright, but it was decided to leave it over until the January session for further consideration.

A strong resolution was passed urging the Government to take some action whereby the slacker would be compelled to come forward and do his bit, instead of holding back at the expense of the willing and taking advantage of the increased chances of making money.

Warden McNab entertained the members at the Young Ladies' Tea Rooms, and the members took advantage of the occasion to present the Warden with a gold headed cane in token of their appreciation of his services.

UNDERWOOD

Mrs Geo Locking, of Elmo, spent a few days at the home of her cousin, Mr Thos Brown.

Mr Chester Gilson was taken ill with pneumonia on Friday and is confined to his bed.

Mr Angus McKay is home for the winter after a very successful season's sailing on the lakes.

Mr W G Cole is taking advantage of the mild weather to finish his gravel contract on the Goderich road.

Mac McDougall is around again.... We hope he may be able to discard the sling soon.

GRESHAM

Miss Kate McKenzie is spending vacation at Guelph and other points.

Miss Bell Young, of Toronto, is spending vacation at her home here.

Councillor Jas A McKenzie has arrived home from a three months' visit to the West. He is favorably impressed with the West. We hope to see Councillor McKenzie become a candidate for deputy-reeve of our township for next year.

Miss Locking was a delegate to the convention in Toronto.

Mr and Mrs Thos Fullerton, of Greenock, visited at Mr Alex Wood's last week.

Mr Wm Parker has erected a slaughter-house, the first one in this vicinity.

Quite a number took in the Bradley box social, and report a good time.

THE ADVOCATE will be a most welcome gift to absent ones of your family, whether in Canada or away to the fighting front in France.

—The question as to whether a soldier who loses his life in battle has won eternal salvation has been widely discussed by theologians. Many sorrowing hearts may find comfort in this choice contribution to the world's literature made by Cardinal Mercier, Archbishop of Malines, Belgium, in his first Christmas pastoral after the war began in 1914:

"If I am asked what I think of the eternal salvation of a brave man who has conscientiously given his life in defence of his country's honor, and in vindication of violated justice, I shall not hesitate to reply that without any doubt whatever Christ crowns his military valor, and that death, accepted in this Christian spirit, assures the safety of that man's soul. Greater love hath no man than this, said our Saviour, that a man lay down his life for his friends. And the soldier who dies to save his brothers, and to defend the hearts and altars of his country, reaches the highest of all degrees of charity. He may not have made a close analysis of the value of his sacrifice; but must we suppose that God requires of the plain soldier in the excitement of battle the methodical precision of the moralist or the theologian? Can we who revere his heroism doubt that his God welcomes him with love? Christian mothers, be proud of your sons. Of all griefs, of all our human sorrows, yours is perhaps the most of veneration. I think I behold you in your affliction, but erect, standing at the side of the Mother of Sorrows, at the foot of the Cross. Suffer us to offer you not only our condolences, but our congratulation. Not all our heroes obtain temporal honors but for all we expect the Imperial crown of the elect. For this is the virtue of a single act of perfect charity. It transforms a sinful man into a saint."

IRON GATES OF BLUE DANUBE

BEAUTIFUL PICTURE OF GENTLY SLOPING HILLS.

The Famous Defile Derives Its Name From Dangerous Rocks.

The Iron Gates, the last great defile of the Danube in its course to the Black Sea, and the first point at which the Austrians launched an offensive against their new enemies, the Rumanians, is described in the following war geography bulletin which the U. S. National Geographic Society issued:

"Contrary to the general belief of readers to whom the term 'Iron Gates of the Danube' is familiar, this famous defile of the chief waterway of Hungary, Rumania, Bulgaria and Serbia does not derive its name from precipitous walls of rock through which the waters dash in a narrow channel, as at the Kazan defile, but from the dangerous boulders that fairly litter the river bed for a distance of nearly two miles, beginning at the once strongly fortified island of Ada Kaleh, which was captured by Hungary in 1878 and is still inhabited by a picturesque colony of 500 Turks. Opposite this island, on the left bank of the Danube and at the mouth of the inconsequential Bachina River, which here forms the Hungarian-Rumanian boundary, is the attractive little Rumanian customs village of Verciorova on the Budapest-Bucharest railway, 237 miles west of the latter city.

Dangers Removed.

"It was not until 1890 that work was begun in a definite and comprehensive manner to rid the Iron Gates of some of its gravest dangers to navigation. In that year a Hungarian engineering company undertook the task of removing nearly a million and a quarter cubic yards of stone from the watercourse. Eight years after the enterprise was inaugurated the canal which had been hewn from the solid rock on the Serbian side of the river was ready to be thrown open to the steamers which ply the Danube from Budapest to the Black Sea. The canal was designed to provide a year-round channel 10 feet deep, whereas the original course of the river was not navigable for more than nine months out of every twelve.

"The opening of the waterway was the occasion for a great celebration in which three monarchs participated —Emperor Francis Joseph of Austria-Hungary, King Alexander of Serbia, and King Carol (Charles I.) of Rumania. The festivities of the day were somewhat marred by the discovery that the current through the canal was so swift that while steamers could rush through it in their downward journey, they could not make the trip upward, so that the old river course had to be used for westward-bound traffic.

Terrifying Sight.

"When the water is high the rocks of the Iron Gates are completely submerged, but they are only a few feet beneath the surface and the boiling, churning waves present a terrifying sight to the timid passenger as his steamer fights its way to the calmer reaches in the vicinity of Orsova (pronounced Orshova), the first town in Hungarian territory, five miles above the rapids and a 10 hours' journey by boat below Belgrade, the peace-times capital of Serbia.

"Instead of the gloomy gorge which most travellers expect to find, the banks on each side of the Iron Gates present a beautiful picture of gently sloping hills, bountifully wooded. In the early summer these woods are a fairy land of flowers and the winds are fairly weighted with the fragrance of wild blossoms in countless variety, while a short distance from the river the huntsman finds deer, wild boar, bear and other game in abundance. Enhancing the charm of the scene are the songs of myriad birds which make their home in the forests.

"As the river progresses eastward into Rumania, the wooded hills disappear and are succeeded by barren sand ridges."

BITTER PILL FOR GERMANY.

Thirty Million Dollars Wasted in Rumania in "Diplomacy."

Germany made strenuous efforts to prevent Rumania joining the allies, and is said to have spent thirty million dollars in this direction, according to Herbert Rayard Swope, special staff observer in Germany for the New York World. Rumania refused not to German gold or promises, and the pill was a bitter one for the Huns to swallow, particularly as the present King of Rumania is a member of the elder branch of the Kaiser's family. The Germans are sick of the whole Balkan question, believing there would have been no war had it not been for Balkan intrigue. Failing to wipe the Balkans off the map, the suggestion is made in Germany that the people should be taken in hand and civilized so that the Balkans will no longer be the "powder barrel" of the world. It is charged in Berlin that the German Government spent about thirty million dollars among the officials, civilians and native press of Rumania in "diplomacy" which failed.

It is said in Berlin that German diplomacy was more successful in Greece, but the allies are starving the Greeks into submission.

"Turkey is fighting with an ally she dislikes for a future she fears," says Mr. Swope, as this was the only alternative left to the Turks, who realized that Turkish retention of Constantinople was doomed in any event, but might be prolonged by a German alliance during the war.

War as a Wonder Worker.

War is a rare wonder worker, says the London Chronicle. Less than ten years ago the proposal to establish a municipal milk supply for London was supported only by the more daring progressive candidates. All the rest shrank from it in horror, and all over the metropolis moderates denounced it as rank socialism. Now—with considerable additions—it is coolly and unanimously put forward by a commission on which all political parties are represented—and no one seems horrified

The Cure

The Baron de Mordiane slowly descended the broad staircase of his club. His fur-lined overcoat for the moment was unbuttoned, for the atmosphere of the rooms seemed to him to be like an overheated conservatory.

And so it came about when the great outer door closed behind him the keen night air pierced him with an intense cold, and he gave a sudden shiver—a shiver that seemed to bring with it a feeling of vague dejection.

He set forth homewards, and all at once there came to him a vision of his valet asleep in the ante-chamber, of his huge bed-room, of his large bed, antique and sepulchral-looking. And as he thought of these things a sadness weighed down his heart, and a coldness seemed to seize him, body and soul, more biting than the freezing air of the night.

For several years past he had gradually begun to feel more and more the burden of his solitary life, that melancholy solitude which so frequently oppresses lonely old bachelors.

Formerly he had been energetic, alert, gay, devoting all his days to sport, all his evenings to pleasure. But now time hung heavy on his hands, and he had become indifferent to amusements.

The monotony of his evenings, the same friends always found in the same place, the club, the same parties at cards, the same discussions on the same subjects, the same feeble wit from the same mouths, the same scandal about the same people, all these things revolted him now.

At length he found himself unable any longer to endure this mode of life so regular, so empty, so banal, so dignified, yet at the same time so depressing. He longed for an existence which should be more restful, comforting, and satisfying, although he did not quite know in what way he would secure it.

True, he had no thought of marrying. He did not feel he had the courage to condemn himself to the melancholy servitude of wedded life, to that odious existence of two beings, who, always together, become so accustomed to one another's ways that not a word can be said, a gesture made, a thought, desire, or an opinion expressed by the one that has not already been anticipated by the other.

And so, from time to time, the baron's thoughts reverted to an individual whom he had come to look upon as his godson. In fact, for the past year he had thought of him incessantly, experiencing a strong, almost an irritating, desire to see and to know him.

He had interested himself in the boy many, many years ago in circumstances more or less dramatic and tender. In those far-off days the baron had been young and impressionable, and but for a generous lover's quarrel the boy might perhaps have been his own son. However, the lady married someone else, and when next he heard of her and her husband they had both died in straitened circumstances, leaving a little fellow of twelve months to the uncertain mercies of a poor relative who lived near Marseilles.

It was then that the baron generously undertook to pay for the child's upbringing, and, later, his college education and the fees and necessary private income incidental to his "godson" becoming articled to an architect.

All this was managed by a discreet attorney, who served as intermediary without ever divulging the identity of the young fellow's benefactor.

Thus, on this particular evening when the baron felt more than usually gloomy and dissatisfied, his mind dwelt more intently than ever on the little son of the sweet woman he had loved. He had not seen the boy since he was two years old, all he knew was that the child, having grown up, lived in the outskirts of Marseilles, had the reputation of being a most intelligent and well-bred person, had married the daughter of an architect, to whose business he had succeeded, and that he was further reputed to be earning a large income.

Why not go and visit his protege? Then, without betraying his identity, he could study him well and ascertain if perchance there might be in the near future a pleasing prospect of his taking a place in their delightful family circle as a welcomed guest and member. Thus speculated the baron.

Day by day he had pondered the matter over until at last his desire to set out for the South became almost uncontrollable. He felt, too, a strange glow of tender yet almost selfish interest at the thought of the cosy, smiling abode by the seashore where he would find the hostess, young and pretty, where her little children would hold out their arms to him, and their handsome father perhaps bear a gentle likeness to the charming, beloved woman of the days of long ago.

With his head sunk in the collar of his fur coat, the baron walked along, thinking all this over, and then suddenly he made up his mind. Hailing a passing fiacre, he directed the coachman to drive him home. As soon as his half-awakened valet had opened the door he said:

"Louis, we start to-morrow evening for Marseilles. We shall remain there perhaps a fortnight. Make your preparations accordingly."

* * * * *

As the train glided along the Baron de Mordiane awakened after a night of slumbering, took a look at himself in the little mirror of his dressing-case. The clear atmosphere of the South revealed to him wrinkles, crows'-feet, and other signs of waning years, hitherto quite unsuspected in the half-lights of Parisian apartments.

"H'm!" he said to himself dolefully. "Certainly I cannot claim to look particularly young. On the contrary, I believe I'm beginning to look a bit old!"

And his desire to spend the rest of his days tranquilly with the family of his protege forthwith increased.

Towards one o'clock in the afternoon he arrived in a landau hired in Marseilles at one of those country houses approached through an avenue of trees, and possessing walls of such dazzling whiteness that they make one's eyes blink.

He smiled as he walked along the avenue, and said to himself:

"Very neat—very pretty!"

At that moment a little boy of five or six years ran out from a shrubbery and stood stock still on the edge of the pathway, staring with wide-open eyes at the smiling stranger.

"Good-day, my little man!" observed the baron, pausing up to him.

The youngster made not the slightest reply.

Then the baron, bending down, took him in his arms to embrace him; but, almost stifled by an odor of garlic, of which the child simply reeked, he put him down again abruptly, murmuring to himself:

"Oh, it must be the gardener's child!"

Then he proceeded towards the house. To his surprise he perceived washing hanging from a line in front of the door—aprons, dusters, shirts, table-napkins, and what not—while a smaller line, bearing a festoon of stockings, was stretched across an upper window like a string of sausages at a pork-butcher's.

The baron knocked at the door. A servant appeared, a true servant of the South, in soiled dress and apron, and with unkempt hair.

"Is Monsieur Duchoux at home?" inquired the baron. "Please tell him that Monsieur Merlin would like to speak to him."

The girl looked astonished, and replied:

"Ooh, I say! All right, come on in, if you want to see him!" And then called out: "Hi, master, you're wanted!"

The baron entered, and in a large room, darkened by partly closed shutters, he indistinctly perceived people and things all bearing a most slovenly appearance. Standing in front of a table, overloaded with all kinds of objects, a little man was tracing designs on a large sheet of paper. In interrupting his work, he came forward a couple of steps.

His open waistcoat and rolled-up sleeves indicated he felt very warm; his muddy shoes revealed the fact that it had rained some days ago.

"To whom have I the honor of speaking?" he asked, in a strong Southern accent.

"Monsieur Merlin," replied the baron. "I wish to consult you about the purchase of some building ground."

"Ah, very good! Josephine, bring a chair."

This instruction was addressed to his wife, who sat with her knitting in the gloom.

The baron then noticed a young woman of untidy appearance. She possessed a fine head of hair, thick and black, but extremely tousled.

She politely offered the visitor a chair, first considerately removing from it a child's frock, an empty flower-pot, and a greasy plate.

The baron seated himself, and then noticed that on Duchoux's work-table there were, in addition to books and papers, two freshly-gathered lettuces, a hair-brush, and several unwashed teacups.

The architect noticed the baron's glance, and remarked, with a smile:

"Sorry the room is rather untidy, but it is all the fault of the children." And bringing his chair closer to his client, he continued: "I presume you are seeking a little estate somewhere near Marseilles?"

His breath carried an odor which the people of the South exhale on the flowers do their gentle perfume.

"Was that your son I met in the avenue just now?" the baron inquired.

"Yes, the second. I have three, monsieur—one a year." And Duchoux beamed with pride.

"Well," reflected the baron to himself, "if they all give off the same scent their nursery must be a veritable conservatory."

But what he said aloud was:

"Yes, I want a pretty little place near the seashore."

Duchoux, in reply, assured him that he had ten, twenty, fifty, a hundred or more such properties at all prices, to suit all tastes. He spoke like a running fountain, smiling, self satisfied, and unmercifully nodding a round, bullish head. And the vision of a delicate little fair-haired woman, with a delightful figure and a musical voice, flitted before the baron's eyes.

Yes, true the son resembled his mother, in intonation, gestures, and vague general mannerisms, yet somehow the baron bitterly thought that the resemblance was much as a monkey might resemble a man. And he felt irritated and exasperated and disturbed, as though by a nightmare.

Duchoux was saying in metallic tones:

"I can show you a property that is an exceptional opportunity."

The baron stammered:

"When can we inspect it together?"

"To-morrow, if you wish?"

"Yes, to-morrow. What time?"

"One o'clock?"

"Yes, that will suit me."

The baron stood up. He was seized with a violent desire to rush away. Duchoux walked with him towards the door.

"This one is your own property?" asked the baron.

"Yes, monsieur; I bought it recently, and I am very proud of it. I have risen from extreme poverty, and I make no secret of it. All that I have achieved has been resolutely by myself."

"Till to-morrow—one o'clock," said the baron.

* * * * *

The landau rolled along the white road.

"Coachman, to the station!"

The next evening, on entering his club, an old friend remarked to him:

"Why, we haven't seen you for quite three days! Have you been ill?"

"Yes, a fearful headache. I suffer that way sometimes. But one soon gets over it with the proper treatment." Translated from the French for London Answers.

THE PATRIOTIC FUND.

How the Women of Vancouver Influence Subscriptions.

The truth of the old adage that "Union is Strength" has been rediscovered by the soldiers' wives of South Vancouver, B.C. In this suburb there are 724 families being helped by the Canadian Patriotic Fund. The soldiers' wives and mothers have formed, among themselves, an association. They meet regularly for social intercourse. They contribute time, service and money to patriotic causes. They stand by one another in trouble. They restrain any member of their group who may be inclined, by extravagance, to bring discredit on the Patriotic Fund. This body of women are just beginning to find what power they can exert. Their combined monthly cash income amounts to about $50,000. Not satisfied with the way in which the South Vancouver merchants are contributing to the Patriotic Fund, they have determined to use their power to enlarge the shopkeepers' horizon. They have recently had printed a small window card intimating that Mr. Storekeeper is giving to the Patriotic Fund. Where this is the case, the card is put in his window and the soldiers' wives spend money where the card appears. Acting on the principle that "One Good Turn Deserves Another" the soldiers' wives of South Vancouver have become an important influence in swelling the receipts of the Patriotic Fund.

Three thousand women are employed in English coal-mines.

Matter Out of Place.

Officer: "Sergeant, stop those two men quarrelling. We don't want any of these beastly fighting men here!"—London Bystander.

WORK URGED FOR GERMAN CHILDREN

A HUN STATESMAN WANTS THE SCHOOLS MOBILIZED.

To Gather Nettles, Nuts, Berries and Other Wild Products Now Wasted.

Baron Schmoller, a Privy Councillor and President of the Senate of the district of Hamm, contributes an article to the German press on "A War Work for the Schools," which has attracted wide attention. His suggestion that the national schools in town and country should be mobilized for the collection of wild fruits, berries, and other products of the field and forest, is made with an earnestness, and even solemnity, which throws a remarkable sidelight on the present situation, and reveals the discomfort and inconvenience which Germans are already suffering from the scarcity of food and fodder.

The baron recognizes that much has been already accomplished in gathering in wild natural products, but infinitely more might be done. Take the case of nettles. Were all the nettles in the Fatherland collected enormous assistance would be rendered to the starved textile trade. The Government appealed to grown-up people to collect these valuable plants, but little attention was paid to the appeal. Then the Landsturm men were ordered out to gather nettles, but little progress was made. And now the time has passed for harvesting them. Had the matter been attended to, says Baron Schmoller, Germany might have possessed thousands of tons of nettle fibre which has been deliberately thrown away.

But much has been done, and Herr Schmoller gratefully acknowledges the progress made in substituting the berries of the white thorn for coffee beans, the lesser sloe blackberries, strawberries, and raspberries for tea, mushrooms and other forest fungi for meat. Still more grat-ful is he for the ingenuity displayed in utilizing beech and linden nuts, sunflower seed, acorns and horse chestnuts, which have either helped as fodder or have been ingeniously employed in increasing the supplies of oil.

Gathering Wild Nuts.

Germans now know that out of close admirable fruit syrups may be made, that southernwood supplies food for poultry, that bracken leaves make excellent bedding, and that elderberries, crab apples, and numerous other gifts of God in the woods are available for food and nourishment.

The appeals which the authorities have hitherto addressed to the nation have largely fallen on deaf ears, simply because they appealed to the wrong people. Adults are already burdened with war work of some kind or other, and their leisure hours they need for rest and recreation. There ought now to be an earnest appeal issued to the children, for now is the moment for gathering in mushrooms and other edible fungi, sloes, beech nuts, hawa and other berries, and the useful fronds of the bracken.

Baron Schmoller considers that this is the sort of work which appeals to the youth of both sexes. German boys and girls, moreover, are all inspired by a wish to do something practical and tangible for their country. If the authorities would only consent to the employment of the children in this work they would have at their disposal the magnificent organization of the schools, and in the disciplined and patriotic staff of teachers the best qualified overseers and directors of this national enterprise.

Change School Plans.

It will do no harm either to the children, or to the wider interests of the country, to suspend educational work until this harvest of the woods and fields is garnered. The existence of the Fatherland, he states, is of greater importance than that children should have uninterrupted instruction in German literature and arithmetic. The children can afterwards catch up what they now miss, but the fern leaves and berries and nuts, if not gathered at once, will be lost for ever.

Chimney Fires.

For a chimney fire a few pounds of salt thrown in at the top is probably the best handy extinguisher; but a pail of sand, earth, ashes, or even coal, will be very helpful. If a fireplace connects with the chimney, the latter materials are not desirable to use, since they are liable to scatter the burning soot into the room where the fireplace is located.

WARDING OFF FROSTBITES.

How Italian Troops in the Alps Are Protected.

One of the more pressing problems of the Italian army is the prevention of frostbite among thousands of men exposed to the Alpine winter. A British weekly describes the following experiment:

A soldier, whose feet had been well smeared with sterilized fat, put on a double sock of cotton, having an interlining of paper also prepared with fat, and over this an ordinary woollen sock. He then stood in a pail of ice for forty minutes, and at the end of that time his feet are said to have been normal in appearance, nor did he complain of any unusual sensations.

Another foot covering that is proving of great value in resisting cold is a square of linen, prepared in a solution of salicylic acid and sterilized fat, over which the soldier wears either a woollen or a cotton sock. The prepared squares are packed in small waterproof envelopes, and are thus easily carried in the pocket. Thousands of these squares have been sent to the front.

Minard's Liniment Cures Colds, &c.

Careful of His Complexion.

With a sigh in his voice, the applicant for a meal and some old clothes had told his story and the kind-hearted woman had helped him.

Now, as he sat eating a hunk of bread and cheese she thought it wise to get in a little good advice. So she began:

"Don't you think that—er—it would be better for yourself if you used soap and water occasionally?"

The tramp sighed dolefully.

"I would, ma'am—I would," he answered eagerly, "but the truth is that there's so many different kinds of soap, and it's so hard to know which is injurious to the skin that I'm afraid to take any risks."

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust or Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c., for Book of the Eye, ask Druggists or Murine Eye Remedy Co., Chicago

What They Missed.

"My ancestors were people of great prominence in their day."

"Lucky they died."

"What do you mean?"

"They missed seeing a lot of their poor relations."

Minard's Liniment Cures Garget in Cows

Exceptional Circumstances.

The sympathetic prison visitor went from cell to cell interviewing the inmates. To one penitent-looking individual she put the usual question: "What brought you here?"

"Borrowing money, lady," was the reply.

"But, good gracious!" she exclaimed, "they don't put people in prison for borrowing money."

"Not ordinarily," said the man, "but I had to knock a man down three or four times before he would lend it to me."

With few exceptions, it is illegal to export from Great Britain any articles which might be required for the purposes of war.

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

London—Do you wear glasses? Are you a victim of eye strain or other eye weaknesses? If so, you will be glad to know that according to Dr. Jeeves there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of the wonderful *free prescription*. One man says, after trying it: "I was almost blind, could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using the prescription for three days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them. A druggist here has recently said he will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. The ingredients of many prescriptions may be accurately procured by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a tumbler of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time.

Note: Another prominent Physician to whom the above article was submitted, said: "Bon-Opto is a very reliable remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. . . . The manufacturers guarantee it to strengthen eyesight 50 per cent in one week's time or it will cost you nothing to refund the money. It can be obtained from any good druggist and is one of the very few preparations I feel should be kept on hand for use in almost every family." The Wilson Drug Co., Toronto, will fill your orders if your druggist cannot.

WAR CROSSES.

They Were First Awarded in the Year 1757.

War crosses are far older than war medals; the latter are, in fact, a comparatively modern innovation.

The oldest of these decorations is the Austrian Cross of Gold, and curiously enough it bears a similar inscription (but in Latin) to our Victoria Cross. The first Gold Cross was awarded by the Empress Maria Theresa in 1757.

The next oldest European battle cross is the Russian Cross of St. George, which is of gold with a fine medallion of St. George slaying the dragon. It was founded by the Empress Catherine II. in 1769.

The French Cross of the Legion of Honour was instituted by Napoleon in 1802, at the time when he was First Consul.

Germany's famous—or infamous—Iron Cross was instituted by Emperor Frederick William III. of Prussia in the year 1813. The cross is of iron, but is rather heavily edged or bordered with silver.

ARMY WON'T TAKE HIM.

English Giant is Eight Feet Two and a Half Inches High.

If you were eight feet two and a half inches high, weighed 250 pounds, and could throw two men around, wouldn't you think the army would be glad to have you?

So thought a young Wiltshire, Eng., innkeeper with these specifications. But he thought wrong.

The ordinary Tommy's equipment wouldn't fit him. He would have to have everything made to order. His boots are size 24. He can't get into an ordinary railway car seat and has to travel with the baggage.

So the military authorities, after wrestling with the problem, have decided to let the giant keep on tending his inn. He is twenty-two years old and is still growing.

A FINE TREATMENT FOR CATARRH

EASY TO MAKE AND COSTS LITTLE

Catarrh in such an insidious disease and has become so prevalent during the past few years that a reliable treatment should be much appreciated by all.

Science has fully proved that Catarrh is a constitutional disease and therefore requires a constitutional treatment. Sprays, inhalers, salves and nose drops are seldom if ever give lasting benefit and often drive the disease further down the air passages and into the lungs.

If you have Catarrh or Catarrhal deafness or head-noises, go to your druggist and get one ounce of Parmint (Double strength). Take this home and add to it 1 pint of hot water and 4 ounces of granulated sugar, stir until dissolved, then take one tablespoonful 4 times a day.

This will often bring quick relief from the distressing head-noises, clogged nostrils should open, breathing become easy and many stop dropping into the throat.

This treatment has a slight tonic action which makes it especially effective in cases where the blood has become thin and weak. It is easy to make, tastes pleasant and costs little. Every person who wishes to be free from this disagreeable disease should give this treatment a trial.

NOT BIRDS OF A FEATHER.

Rumanians Say They Are Superior to Other Balkan Peoples.

The present King of Rumania is a nephew of King Carol, the nation's first King. His wife is the granddaughter of Queen Victoria, and, therefore, a cousin of most of the reigning heads of Europe.

Under the new era initiated and carried down to the present by the Hohenzollern dynasty, says a writer in the National Geographic Magazine, Rumania has gone far ahead of her neighbors of the Balkan region, and the visitor to Bucharest early finds that the people resent the idea of being classed with the Balkan States. They feel that they are the superiors of the Serbs, the Bulgares, the Montenegrins and the modern Greeks, and that their country is superior, just as the people of A B C South America feel that their nations are not to be confounded with the remainder of Latin America.

Rare.

Dealer in antiques—Here is something interesting, sir—a brace of revolvers that were carried by Christopher Columbus.

Customer—What! Revolvers weren't invented in Columbus's time.

Dealer—I know. That's what makes them so rare.

HARD WORKING WOMEN

Will Find New Strength Through the Use of Dr. Williams' Pink Pills.

It is useless to tell a hard working woman to take life easily and not to worry. Every woman at the head of a home; every girl in offices, shops and factories is subjected to more or less worry. These cannot be avoided. But it is the duty of every woman and every girl to save her strength as much as possible, and to build up her system to meet unusual demands. Her future health depends upon it. To guard against a breakdown in health the blood must be kept rich, red and pure. To keep the blood in this condition nothing can equal Dr. Williams Pink Pills. They strengthen the nerves, restore the appetite, bring the glow of health to pallid cheeks, and renewed energy to listless people. Women cannot always rest when they should, but they can keep up their strength and keep away disease by the occasional use of Dr. Williams' Pink Pills. Mrs. N. E. Tomsett, Ottawa, Ont., writes:—"For several years I suffered terribly from nervous debility and was scarcely able to do a thing. During that time I consulted several doctors, and many medicines without getting any help, and I began to think that I would never get better. One day I saw Dr. Williams' Pink Pills advertised and thought I would try them. After taking four boxes I was much better, but I continued using the pills for several months when I was again in the best of health. When I began taking the pills I weighed only 100 pounds. While under their use with my renewed health I now weigh 140. I recommend Dr. Williams' Pink Pills to every one whom I know to be ailing."

You can get Dr. Williams Pink Pills from any dealer in medicine, or by mail at 50 cents a box, or six boxes for $2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

OFFER TO SELL ESTATES.

Titled Britons Find War Tax a Heavy Burden.

The Duke of Sutherland is advertising in American newspapers an offer to sell the northern part of his Scottish estates, including about 283,248 acres. While he is the largest land owner in England, possessing almost 1,500,000 acres, he is only one of many titled men who are eager to sell part of their holdings because of the heavy war tax now levied on land.

The young Duke—he was born in 1888—inherited vast holdings in England, Scotland and Canada. Despite the fact that he has an income of a couple of million dollars annually, because of the war tax he undoubtedly is being pressed to meet the levy.

The Duke announces that the estate in Scotland includes "all round sporting properties, varying from 16,000 to 44,000 acres, and embracing some of the best deer stalking, grouse and other shooting, salmon and trout fishing in Scotland."

Not long ago the Duke presented to the Government 12,000 acres of land in Scotland, which he requested to be divided among wounded soldiers. There was much criticism of the gift, however, because some of the newspapers contended that the land is worthless and that the Duke was giving it away in order to escape taxation.

Minard's Liniment Cures Diphtheria.

The Heart Lived In.

Faber has said, "A man's heart gets cold if he does not keep it warm by living in it." Love to others is not a matter of mere out-flowing impulse. It must be purposeful and steadfast if there is to be real warmth in it. Only the heart that is lived in and used draws others close to its hearth fire.

An Obvious Explanation.

In the cavalry service it frequently happens that, by reason of death, desertions and discharge, the number of men in a troop is less than the number of horses on hand. A troop captain not long since had occasion to send a requisition for ordnance stores, including among other things "sixty-five nose bags."

After the usual long interval this requisition was returned from the military depot with the indorsement, "Respectfully returned to Captain —, —th Cavalry. The returns of his troop show that he has only fifty-six men, and explanation is desired as to why he requires sixty-five nose bags."

The captain's indorsement in reply was as follows: "Respectfully returned. The nose bags are required for my horses, and not for the men."

NEW USE FOR FALSE LIMBS.

Soldier Packs Luggage for Week-end in Artificial Leg.

Resourcefulness practised in the trenches does not desert our heroes when they leave the army, says a London Exchange.

A lance corporal of the Kensington Battalion, London Regiment, had his right leg amputated in France, and later was fitted with an artificial limb.

When going away for the week-end the other day he met a friend. "It is unnecessary for me to carry a bag when I go away now," he remarked. "I have packed all the luggage required in my artificial leg. It holds a hair brush, bottle of hair oil and shaving requisites very well."

IF FOOD DISAGREES DRINK HOT WATER

When food lies like lead in the stomach and you have that uncomfortable distended feeling, it is because of insufficient blood supply to the stomach, combined with acid and food fermentation. In such cases try the plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure bisurated magnesia in half a glass of water, as hot as you can comfortably drink it. The hot water drives the blood to the stomach and the bisurated magnesia, as any physician can tell you, instantly neutralizes the acid and stops the food fermentation. Try this simple plan and you will be astonished at the immediate feeling of relief and comfort that always follows the restoration of the normal process of digestion. People who find it inconvenient at times to secure hot water and travelers who are frequently obliged to take lunch in poorly prepared places should always take two or three grain tablets of Bisurated Magnesia after meals to prevent fermentation and neutralize the acid in their stomach.

THE CONNAUGHT TUNNEL.

Constructing Work Rapidly Approaching Completion.

One of the greatest of the achievements of the Canadian Pacific Railway is the Connaught Tunnel. This great work—through the lofty Mount MacDonald—amongst the Selkirk Mountains, is nearly six miles long and double tracked. The excavation has been made at a cost of over $12,000,000 to the great transportation company. But the C.P.R., which has spent from $25,000,000 to $35,000,000 per annum on the development of the West previous to the war, does not even in times of a conflict affecting the greater part of the world, spare expense where the public convenience makes an urgent demand. The opening of the tunnel will greatly facilitate traffic, will open a new route, and will do away with many miles of snow sheds.

The Connaught Tunnel will give the Canadian Pacific the lowest grade of any transcontinental railway running through the Selkirk Mountains. It was bored in less than three years under the supervision of Mr. J. G. Sullivan, Chief Engineer of Western lines, and it is claimed that no undertaking of similar dimensions was ever completed in such a short time. In the excavation of the tunnel many engineering difficulties had to be overcome. But mighty rocks gave way and the roots of a gigantic mountain crumbler before the advance of human skill. At various points along the pass there is an eighteen inch concrete wall lining.

During the recent trip to Western Canada, Lord Shaughnessy, accompanied by Chief Engineer Sullivan, took a tour through the tunnel Lord Shaughnessy was well pleased with what he saw. The construction work is now rapidly approaching completion Two miles of steel rails have yet to be laid on one side of the track. It is expected that the formal opening will take place during the first days of December. Since its inception the C.P.R., it is reckoned, has spent over $200,000,000 in the development of the West. The latest expenditure is as popular as any that had previously been made.

When His Royal Highness the Duke of Connaught and party took a trip through the tunnel on July 17th, the Duke expressed in eloquent words the gratification it gave him to be associated with the pioneer work of the Canadian Pacific, and he complimented the company on the splendid strides it was making in the development of the country. Then His Royal Highness, baptising the new work, christened it the Selkirk Tunnel. Some weeks later, at the request of Lord Shaughnessy, His Royal Highness consented to have the tunnel called after him. Henceforth it is to be named the "Connaught Tunnel," a fitting compliment to the excellent services which the Duke of Connaught gave to the Dominion during his term as Governor-General.

MY FOUR LITTLE ONES USED BABY'S OWN TABLETS

Mrs. Albert Nie, St. Brieux, Sask., writes: "I have been using Baby's Own Tablets for the past seven years and they have done my four little ones a great deal of good." The Tablets always do good—they cannot possibly do harm—being guaranteed by a government analyst to be absolutely free from injurious drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Facial Measurement.

A teacher one day asked her class if they knew which was the longest word in the English language. A small hand waved frantically.

"Well, Johnny, what is the longest word?"

"Smiles," promptly answered Johnny.

"But that has only six letters!"

"Yes'm. I know it, but it's a mile between the first and last one.

Friendly Criticism.

Kathryn—How do you like my new suit?

Kittye—It looks all right as far as I can see. Turn around and I'll tell you where it doesn't fit in the back.

His Own Choice.

She—I wonder which most men prefer—dark-haired girls or light-haired girls.

He—Light-headed girls.

HIS FRIEND HURT; HE HELPED HIM

Injured Man Laughed When Simple Treatment Was Suggested, But He Thanked His Comrade Later.

Time upon a time word came to Henry A. Vonhil, of Plainfield, N.J., that a close friend had been injured, and full of anxiety he visited the afflicted man, who was suffering from a sprained ankle.

It was so bad that the leg had turned black, said Mr. Vonhil in relating the story. "I told him I would have him out in a week and he laughed at me. But I took him a bottle of Sloan's Liniment, that night he put some on and rubbed the ankle full better. I told him to use it every day, and in three days his ankle was practically well. In four days he was working. He gladly admits that Sloan's Liniment "put him on his feet."

Sloan's Liniment can be obtained at all drug stores 25c., 50c. and $1.00

TURNERS'

Mr R McKechnie, had a great yield of fine clover seed in his threshing last week. The crop yielded five bushels to the acre.

Councillor Atkinson had some of his fine oats at Guelph last week.

Mr John C Pollock, of Port Elgin, spent a few days with friends here.

Mr Joe Hyde, of the 4th of Bruce, spent a day last week with his mother here, Mrs Hyde.

Rev Mr Wolstencroft and Mr Saunders are here for a few days for the purpose of selling the church.

Mr Geo Schell died in Walkerton hospital. On Friday afternoon, Dec 8th, the sad message was sent to his home here that he had passed away. For some time he had suffered from stomach trouble and had gone to have an operation performed. Besides his wife there are four sons and two daughters living who will miss the tender care of a loving husband and father. To them the deepest sympathy will be extended. The funeral was held Tuesday afternoon to Port Elgin cemetery.

PINKERTON

Lieut Harold and Miss Kathleen Pinkerton went to Niagara Falls last week. They will visit there and in Toronto for a few days.

Many from this village attended the memorial service for the late Lieut Leslie Young in Cargill Presbyterian church on Sunday afternoon.

The banquet given in honor of Mrs Harold Pinkerton by the Foresters last Tuesday was largely attended. A feature of the evening was the presentation of a gold headed cane to Mrs Pinkerton.

GILLIES HILL

(Intended for last week)

The weather on the anniversary services held here last Sunday was all that could be expected for the first week in December, and those who were fortunate enough to avail themselves of the opportunity of coming to the sanctuary on this occasion were well repaid for the effort. The preacher, Rev Mr Amos, formerly minister at Alvinod, was clear, forcible speaker, and his words seem to carry conviction. His remarks in the morning were based on Luke 9:62. "No man having put his hand to the plow and looking back is worthy of the kingdom of God." He said that in order for the plowman to have a straight furrow he must have the love a clear of the eye. Looking back was sure to make deviations. If we are to fulfill any good purpose in life we must not spend any time looking into the past and miss the goal. Farmers know well the hard, baked unfavorable condition of the soil in the year 1918, brought about by an overabundance of moisture. In like manner our fall condition for the past number of years had enjoyed unprecedented prosperity, which had made people quite independent, also indifferent and careless of spiritual things. The great war came, we find a plow to stir up the rich soil and a different attitude, and a genuine cry was a hard one. In his own locality he knew young men by the dozen going around with creeping drivers and rubber tired outfits, and when the call came these same men answered and left all like liberty. Although the price was high hand it would end in blessing. In the evening the text was Exodus 13: 17, 18. He portrayed the wanderings of the children of Israel in the desert. According to man's calculations five days' march was sufficient to bring them to the land of Canaan, but instead it took forty years. God was their leader, but the people would not understand the divine purpose. Only five days' round have taken the Israelites out of Egypt, but it took forty years to take Egypt out of the Israelites. Their wanderings were an educational. It was not an easy, easy path, and hard on that, said the preacher, God's ways are never the short cuts. In one day the short week to fame, to wealth, to power, that next week after are often in the end bitter, as those who have been carried away by wildcat investments have found to their sorrow. Should the rev gentleman visit this community again a goodly sized congregation is surely awaiting him. The food supper on Monday night was surely attended by full weather, and a great many who were expected to take part in the programme were unable to be present. However, a goodly number gathered and feasted on the usual food and other dainties which the good ladies of Gillies Hill have the reputation of providing in abundance. Mr D C Pyper filled the chair so admirably that the opinion was he should confer in life have decided to have Hes played before his name. The programme consisted of several selections by Sandercock's octette from Ubrale, who were encored time and again and never failed to respond; solos by Mr D Leitch, duet by Mr and Mrs Leitch, song by Pat Cryan, recitations by Mrs Isabel McKay and Mr Harry Stevens. The surplus of food and culinary products was auctioned off by Mr Pearce at good prices. The total proceeds, including Sunday collections, amounted to about $160.

WILLOW CREEK

Mr D Wittle was in Toronto on business last week.

A class of boys has been organized in the Evangelical S S. The officers are: Pres, V Schmaim, Vice-Pres, Harold Kopas; Sec-Treas, Ben Hilker. Texas Harvey Heising Teacher, P Schnittker.

Mr Lewis Belsse and bride (nee Miss Hattie Gregory of Detroit), have been visiting the latter's parents here.

Taxed $100 for Being Drunk

Two young Bruce Township men appeared at an auction sale in Saugeen while they were intoxicated, and were prosecuted by Inspector White for being drunk in a public place. The Port Elgin magistrates before whom the case was heard imposed fines of $100 each and costs.

EDEN GROVE

This is more like old time Christmas weather. We always begin with the weather. When a fellow goes to see his girl, if mother or dad happen to be on the scene, the weather is the topic until they move off the map.

Miss Gertrude O'Reilly, graduate nurse of Guelph, is home for her Christmas vacation.

Miss Mary Wilson, from the 16th, visited at the home of Postmaster McKeeman over Sunday, prior to her leaving for Michigan.

Mrs J Metcalfe, of the 16th, left Monday morning for Michigan.

Yes, Malinda, did you notice the fine-looking man with the fur coat? Well, that is the coming reeve for Brant, Mr David Willoughby. Having served faithfully as deputy-reeve, he should be the right man for the office. Now it's up to the people in the east not only to nominate him but make his election sure by supporting him on election day. The present reeve having served two terms, it's time to give Dave a chance and see what he can do.

Sunny Jim called on Cargill friends Wednesday evening.

Mr Cook, who has been visiting at the home of Mr and Mrs A Reed, left for his home in Michigan Monday.

Wonder what we will get for Christmas. All I want is a hair cut.

A large number of friends of the late Lieut Leslie Young attended the memorial service held in Cargill on Sunday afternoon.

Mr Morris McCarthy, of the 13th, intends leaving shortly for California.

Have you a friend from Bruce living at a distance? Send them a weekly letter in the shape of one of our county newspapers for Christmas. Just think, fifty-two times the kids and mother will be tumbling over each other to get hold of the paper first. More fun than an oyster can full of monkeys.

Mrs Connors called on Paisley friends last week.

Missionary meeting Thursday evening Don't forget your nickels.

Let us have a good hot election this year and make things lively.

Miss Emery attended the Forester's banquet held in Pinkerton last week.

Look out for the fellows who want to shake hands between now and the New Year. It's your vote they're after.

Trade is picking up. Our merchants are busy doing up fruit for the Christmas cakes and puddings.

A large quantity of grain is coming in to the elevator.

Sunday the minister took for his text, "Love your enemies." How would it be to put a present on the Christmas tree for them?

GLAMIS

The marriage of Mr Hector McNeilly to Miss Annie Gilchrist took place in Port Elgin on Wednesday of last week. They expect to make Detroit their home.

Mr John Groves, of Kernobert, Sask, arrived on Saturday, and will spend the winter with his parents.

Miss Sarah Jackson spent a few days with friends on the 3rd.

Rev Dr Mille, assisted by Rev Ecker, is holding special meetings on the 4th.

Mr Albert Swain, jr, who was taken to Guelph hospital to have his broken ankle treated, is doing as well as can be expected.

The name of Corp C F Russel appeared in last Thursday's casualty list as killed in action. Corp Russel was well known in Glamis, as he was leader of St Paul's choir for two years. He left here to join a Hamilton battalion. He leaves an unwaled widow and two small children.

Mr Jim McCormick, of Edmonton, who is attached to the Royal Navy, spent a few days here with his parents on his way to Halifax. He has two brothers serving overseas—Tom, who enlisted with the Hamilton battalion, and Archie, who is running a motor ambulance.

ChristmaS GiftS

Your Christmas Gift perplexities will be solved by seeing our splendid range. Look over this list. It will help you to solve the problem.

About the House

Useful Hints and General Information for the Busy Housewife

How to Prepare Cereals.

When the colder weather comes it is well to remember that one of the best ways to economize on fuel (an important consideration when we remember the present price of coal) is by arranging the diet so as to include as many heat-giving elements as possible, and among these we must not forget the morning cereal.

It is not only because of this property that cereals deserve a high place in our menu, but also because they rank high as both economical and healthful, containing a large quantity of protein. Some have also a good percentage of fat, and all contain both starch and mineral matter, and they are comparatively inexpensive—that is if we use the uncooked cereals, not the ready-to-eat, which are only economical when the cost of cooking is high and the time of the housewife of considerable money value.

In the preparation of cereals the great point is to see that they are thoroughly cooked, for few things can cause more trouble in the way of indigestion, headache, irritability and nervousness than a porridge which has not been cooked long enough to soften the tough outer coat of the grain.

In Ireland and Scotland people do not seem to tire of oatmeal porridge, or "stir-about," for breakfast—even for supper—year in, year out, but here we require a greater variety, and the skilful housekeeper will not find very much difficulty in ringing the changes and keeping from too frequent repetition. Here are a few recipes to help in the task, and we will begin with the plain boiled oatmeal or porridge, which is so seldom had in perfection, and which is the richest of all cereals in fat and consequently the best for the sharp winter mornings.

Oatmeal Porridge.—Put one and one-half pints of water and a half teaspoonful of salt into a saucepan and bring to a quick boil. Then, taking one cupful of oatmeal in one hand and a wooden spoon in the other, sprinkle in the meal and stir briskly the whole time, so as to keep the meal from lumping. For this reason, too, the meal must not be added too much at a time, but should any lumps form, draw the saucepan to the side of the fire and crush them out with the spoon. When all the meal is in, let it boil up again, and then keep simmering in a double boiler. The longer you leave the porridge cooking the better, but it should never be served without at least an hour's simmering.

Porridge for Wee Children.—Porridge can be cooked in large quantities and reheated as required by adding a small quantity of boiling water each time and, stirring well. For very little children plain oatmeal is not always advisable, but a very safe and palatable mixture can be made with equal parts of oatmeal, barley meal and wheat meal. Allow one cup of meal to two pints of slightly salted boiling water and cook in exactly the same way as ordinary porridge.

Oatmeal Jelly.—To each pint of water allow one heaped teaspoonful of coarse oatmeal. Dissolve half a teaspoonful of salt in the water and stir in the oatmeal. Cover and leave for at least twelve hours. Turn into a saucepan and boil for twenty to thirty minutes. Pass through a fine sieve and pour into a wetted mold. When cold, the jelly will turn out and it is delicious eaten with stewed fruit, cream or milk and either salt or sugar.

Rice and Barley Porridge.—Ingredients: One-quarter pound of rice, two quarts of water, one-quarter pound of barley, salt to taste. Boil the salted water and stir in the rice and barley mixed together. Cook very slowly for about three hours in a double saucepan until the grains are soft. Next morning add a little cold milk and reheat.

Rice Milk.—Ingredients: ½ pound of rice, one and a half pints of fresh milk, one quart of salted water. Cook the rice gently for one hour and a half in the salted water. Next morning add the milk and cook for half an hour. Serve with syrup, sugar or fruit.

Oatmeal and Apples.—Ingredients: One pint of prepared cold porridge, two ounces of sugar, six apples, peeled, cored and cut in rings. Line a mold with apple rings and fill up with alternate layers of apple sprinkled with sugar and porridge. Cover with grease-proof paper and steam till the apples are tender. Serve hot or cold with milk or cream.

The Art of Making Cocoa.

All children, and most grown-ups like the chocolate flavor, and, indeed, where tea and coffee disagree, prefer it to these beverages. Its richness is what makes chocolate an unsuitable accompaniment to a substantial meal. But it is possible to obtain the much-desired chocolate flavor without having to partake of the fatty, heavy components of chocolate by the right preparation of cocoa.

Cocoa, as most people know, is simply the residue of chocolate, after the fat has been removed. The bitter chocolate which we use for icings and candy making is the pure chocolate—the solidified ground bean. Sometimes, in the manufacture of chocolate for beverages, starch is added, and this, of course, contributes considerably to its heating quality.

But cocoa can be made to give all the chocolate flavor so pleasing to the palate minus the overrichness. Many people believe that because cocoa is less rich then chocolate a great deal of milk must be used in its preparation. On the contrary, in order to get the value for which we buy cocoa instead of chocolate, we need to use less milk and more water, and then it can be consumed like any lighter beverage. Here is a simple recipe that makes exceedingly good cocoa:

Two tablespoonfuls of sugar, two tablespoonfuls of cocoa, a few grains of salt, three cupfuls of water, one cupful of milk, one-half teaspoonful of vanilla. Mix sugar and cocoa together and boil with water until it becomes a little syrupy, then add milk and scald, but do not allow to come to a boil. Just before serving add a few drops of vanilla and the salt, and beat with an egg-beater for a few minutes. This makes it light and more appetizing.

Cocoa can be served in this way, and those who like it a little richer can add whipped cream to it.

On the other hand, if you keep a supply of cocoa and once in a while wish to make cocoa that will have the "rich, chocolaty flavor" of real chocolate, you can do so simply by adding cornstarch yourself, instead of paying for cornstarch in some of the manufactured chocolates. The recipe follows:

Two tablespoonfuls of cocoa, two tablespoonfuls of sugar, a few grains of salt, one teaspoonful of cornstarch, two cupfuls of milk, one cupful of water, one-half teaspoonful of vanilla. Boil one cupful of water and scald, but do not boil the three cupfuls of milk. Mix cocoa, sugar, cornstarch and salt with boiling water and boil for five minutes, then pour into the hot milk, add vanilla and beat with an egg beater for a few minutes.

Some people who like the chocolate flavor find that neither chocolate nor cocoa agrees with them. In this case it is still possible to get the flavor without the use of either chocolate or cocoa, but of "cocoa nibs" or "cocoa shells," as they are sometimes called. These are simply the shells of the cocoa bean, and can be purchased for about six or eight cents the pound. They are prepared just as one prepares tea or coffee, and are similarly thin and watery. But they have a very agreeable chocolate flavor, and are, indeed, more wholesome than tea or coffee. As the shells naturally contain no oil whatever, they are especially adapted to young children or persons whose digestion is weak.

Household Hints.

To prevent rust forming in a teakettle, keep an oyster shell in it.

When a cake is done it should be turned out gently on a sieve or cloth.

New mattresses should be turned often, else they will wear unevenly.

Turpentine will prevent the moths from eating the felts inside the piano.

A nickel wall towel rack is a handy thing fastened on the end of a kitchen table.

Never allow a mirror to hang in the sunlight, or the backing will become clouded.

Wear glasses whenever they don't interfere with your work if you would have nice hands.

Stains on mirror glasses can be removed with a flannel cloth dampened with spirits of camphor.

When beating butter and sugar to a cream a perforated spoon will be found more convenient than a fork.

If you boil hooks and eyes in strong soda water before sewing them on garments it will prevent their iron molding in the wash.

For apple snow, bake seven large apples, rub through a sieve, add quarter-pound sugar, a little essence of vanilla and the whites of two eggs well beaten.

A teaspoonful of ammonia mixed with half a cup of cold tea is said to be excellent for cleaning black felt hats or men's black coats. Apply with a bit of cloth.

Remember that butter, milk and eggs, are very apt to absorb strong flavors, so keep them right away from such things as cheese, apples, smoked fish or onions.

For dirty boot or sticky markaks on a carpet, use ammonia; if it should seem to fade the color, this is easily restored by rubbing with chloroform. A cloth wrung out of salt and water brings up the colors after sweeping.

No Sentiment For Jack.

Not everyone is imbued with sentiment, as this story teaches: Mr. Fred Jane, the writer on naval subjects, used to tell of an old gentleman, an enthusiastic member of the Navy League, who visited Portsmouth and looked at Nelson's Victory lying in the harbor. A bluejacket passed. The old gentleman seized him and pointed to the Victory.

"D'you know what that ship means, my man?" he exclaimed.

"Rather," replied the bluejacket. "It's the old tub they hold courts-martial in!"

It isn't at all likely that a woman will ever discover that she's beautiful if she waits for another woman to tell her.

PRODUCE MORE EGGS.

By F. C. Elford, Dominion Poultry Husbandman.

Canada wants eggs and more eggs. Never were the prospects for a bigger demand and better prices more promising than right now.

In spite of this, with the cost of grain high and the prices for poultry meat good, the tendency will be for farmers and poultrymen to sell stock that should produce the high-priced eggs this winter. The fear is that eggs cannot be produced at a profit, but, though a good price can be obtained for the meat at present and high prices will have to be paid for the feed, eggs will be correspondingly high and eggs can be produced at a profit even with the high prices of grain, if proper conditions are supplied.

Cost to Produce a Dozen Eggs.

Last winter at the Experimental Farm a pen of 100 pullets whose per cent. egg yield by months ranged from 5 per cent in November to 50 per cent. in April, an average of 27 per cent. for the six months, produced eggs at a cost of 34 cents per dozen. The percentage of egg yield determines more than anything else the cost of production, for instance, when the egg yield was 20 per cent. the cost was 24 cents per dozen, and at 40 per cent. yield the cost was only 16½ cents per dozen.

This pen was selected as it was thought to be equal in production to an average farm flock. The average dozen eggs sold for 20 cents more than the cost of feed required to produce it.

Each hen gave 93 cents over cost of feed in the six months, which, though not large, shows that even at the high price of feed, eggs can be produced at a profit. The prices paid for grain were local Ottawa prices and were high. The price received for the eggs was 44 cents per dozen. This was not as high as the local market and no higher than many farmers obtained during the same time. But the farmer in addition might cut down cost, for he has table scraps, milk and other feeds that may be used which were not available here. To make a profit this year, business methods must be adopted and a few suggestions that may help follow.

Kill All Non-producers.

Keep only the best pullets for eggs and the best year old hens for breeding. For good chicks must be produced next spring as well as eggs this winter.

More than ever will it be advisable to get rid of everything that does not produce. Market pullets not matured enough to start laying before next winter. Sell all the hens that are more than two years old, also all cockerels that are not intended for breeding purposes. If the cockerels can be kept until later and well fed, a bigger price will be obtained, but better sell all now than take up space required by the early pullets.

Housing.

See that the house into which the birds go is suitable. Have plenty of sunlight and fresh air. Keep all draughts out and be sure it is dry. See that the front of the house, from eighteen to twenty inches above the floor, has glass and cotton, one-third glass to two-thirds cotton. Make these windows so that they can be opened up every day if desired. Shut up all holes in every part of the house that might cause a draught. Double line the north side so as to give the hens greater protection while on roosts. If the house is inclined to be damp, more ventilation helps. It is also a good plan to put in a straw loft. If this cannot be arranged, because of the nature of the roof, tack slats below the rafters then stuff straw in between. See that the house is perfectly clean and free from mites, then get the pullets in at once.

Do not overcrowd. Give an average of five square feet of floor space to each bird of the heavy varieties and four to the lighter or Leghorn type. If there are too many pullets for the available space cull out the poorer ones. Fifty pullets with sufficient accommodation will give more egg than sixty in crowded quarters.

Feeding.

The question of feed is the hardest one to solve this year because practically all feeds are high. It will pay to feed the pullets well from the start, though the hens might be fed more lightly till the middle of January. Where possible, use feed grown on the farm. Good wheat screenings, shrunken wheat, barley, oats, or buckwheat, all make suitable feed. Clover and milk cover a multitude of feeds and cut down the cost. If these can be fed, animal foods such as beefscrap may be curtailed or dispensed with. High-priced mashes may be eliminated and cheaper ground feeds such as bran substituted. Two or more of the grains may be mixed in equal proportions for the grain rations. The mash may consist of ground barley and oats, or bran may be added. If grain has to be purchased cracked corn is as cheap as anything and makes a suitable addition to any ration. Bran is as cheap a feed as one can buy for the mash.

The mash can be fed dry in a hopper or mixed with milk and fed moist once a day. Any table scraps should be used in the mash. If milk is not available, beef scrap or other animal food should be fed in the mash. In a good heavy litter, feed a mixture of the grain eating morning and night, allowing the hens sufficient grain so that they will always have some in the litter, but not so much that they can get a crop full without scratching for it. In the Prairie Provinces, there is considerable shrunken wheat available. Shrunken wheat, if it is dry, is as good a poultry food as wheat fit for milling purposes. Care must be taken that it is not damp or otherwise spoiled. Shrunken wheat alone, if there is no other grain, will answer for the grain feed. For the mash use bran, middlings, or chopped oats. Elevator screenings, free from black seeds, make a good feed for either grain mash. If alfalfa or clover can be had, by all means give the leaves to the hens.

In Central Canada, Ontario and Quebec, grain is scarce and it is likely some will have to be purchased. If there is feed wheat from the west available, it should be used. Cracked corn may be purchased and other farm grains which may be on hand or purchased locally, such as barley and buckwheat, might be used. Bran can be used in mash feed and the good crop of clover in Ontario and Quebec will do much to cut down the cost of the ration. The clover may be fed dry or steamed and used in a mash.

In the Maritime Provinces where grain is usually purchased for the poultry, the same advice may be given as that for central Canada, not forgetting the clover and milk. If small potatoes can be had for poultry feed they may be boiled and fed in the mash.

In every case grit and shell should be before the layers at all times. In some localities the grit can be secured from the local gravel pit and in other cases sufficient lime can be secured to do without the commercial shell. If neither of these is available they should be practised and as much green to the birds as they will eat.

It does not pay to stint the layers. If they do not get the feed they will not lay the eggs. As a rule, a laying hen will not get too fat. Therefore, feed the pullets well. If green cut bone is available and there is no milk, the former may be fed to the pullets at the rate of about half an ounce each per day. The proportion of grain and mash usually eaten is from two to four of grain to one of mash.

From the Chestnut Tree.

"Willie, don't hug that dog."

"Why not, ma?"

"Mange!"

"Aw, no danger! He's got it already."

That, Too.

"Everything has gone up since the war started."

"Yes; including the time I worked for."

A woman does not like pleasures before marriage, and after marriage her husband does as she pleases.

The Crisis Over.

Minister: "Is your poor father's wound any better, my dear?"
Little Girl: "Oh, yes. He's so much better that muvver's stopped prayin' for him, and gone to jawin' him again!"—"Judge," New York.

END OF WAR BY SHORTEST WAY

SOLDIER SUPPLY OF THE GERMAN NATION.

Winston Churchill Writes of the Difficulties of Decisive Operations.

An article by the Right Hon. Winston Churchill, published in the New York Times, following his comments upon the war from a naval standpoint, deals with the war in the European battlefields.

To try to quell machine guns with the bare breasts of men or to oppose the torpedo and the mine by the unprotected bellies of ships is to seek paths of ruin, says Mr. Churchill. Theatres of decisive action, no doubt, exist both for fleets and armies, but they are not necessarily those in which the main strength of the nations is at present concentrated. At this time it is too early to attempt to measure or appraise the results of the tremendous five months' battle which has been raging on the Somme since the first of July.

For Effect, Not Territory.

The reclamation of a hundred square miles of French territory (itself permanently devastated in the process of recapture) out of a total of nearly twenty thousand in the hands of the invader in France and Belgium, could never be regarded as an object in itself worthy to be counted for a moment against the precious lives and sublime sacrifices which its purchase has required. It is to the effects produced upon the German armies, and the consequent reactions on their plans, that we must look for the rewards of this most wonderful and terrible manifestation of human valor.

Terrific Power of Artillery.

"I have called attention recently," says Churchill, "to some of the conditions and limitations of the latest form of the artillery attack—how overwhelming it was upon the troops and area subjected to it; but how ponderous and slow moving in application and how local in action; and how considerably it could be mitigated by an elasticity of defence which allowed for a certain limited cession of ground. I have shown also that it reaches its maximum intensity in cases where the defenders, as at Verdun, are resolved not to yield an inch, but where, by continual counter-attacks and the pouring in of new troops, they strive with the utmost desperation to hold and regain their fixed positions. No one must underrate the terrific power of the artillery development as a new means of offense; but neither must they forget its limitations. For the rest, there is only the bravery of the soldiers and the ruthless character of the war.

Shortening the Line.

"It is usually assumed that the Germans will be able to relieve the strains of pressure in the west and reduce the strain by what is called 'shortening of the line.' The struggle in the west is between 2,500,000 Germans and 3,000,000 French and British. These immense armies are locked in conflict with each other. They can bring their maximum power to bear upon each other equally well on a 350-mile front as on a 150 or 500-mile front. If the Germans, by 'shortening the line,' save 100,000 men, the same process will liberate at the same time about 700,000 French and British troops who are now opposite them. These 700,000 men would be pressed into the attack on one of the existing battle fronts, or alternatively a new battle front will be opened, and the 500,000 Germans who had been 'saved' will be required to meet their old antagonists in somewhat different circumstances.

Germany's Man Power.

"Here are the sharp prongs of might: Either an effective method whereby three men can advance constantly against two, or a war of sheer extermination. Every year 600,000 German youths reach the military age. Until this annual increase has been consumed—and every life costs at least a life—no progress has been made toward the final exhaustion of the capital. It is only the excess less above the annual increment which constitutes definite progress toward the end. It is necessary, therefore, if the extermination plan is followed that the pace of the struggle should be urged to the extreme in order that the period may be shortened.

"For instance, if the war so languished that not more than 600,000 Germans were destroyed or disabled in any one year there would be no reason why their supply of men should ever run short.

Find the Shortest Way.

"The Verdun blunder, the victories of Brusiloff, the entry of Rumania, the tremendous pressures of the Somme offensive have extorted these new intense exertions and increased expenditure from the enemy. And it should not be supposed even if the allies can find no better way of winning than by the crude processes of exhaustion and extermination, that they are not able and not ready to tread that terrible road. But the obligation to seek better methods is imperative on the chiefs of the allies. Is generalship content only with ordering cannon to fire and infantry to charge? Is science bankrupt when she has made shells? Let search be made, let wits be used, let risks be dared by those who have the power to find the shortest way."

A VERSATILE PRINCESS.

Beautiful Wife of Prince Arthur of Connaught.

Princess Arthur of Connaught, the beautiful and charming consort of the Duke of Connaught's heir, is one of the most versatile of princesses.

The elder of the two daughters of the Princess Royal and the Duke of Fife, she has a distinction unique in the annals of English history, for the Fifes having no son, Princess Alexandra succeeded to the dukedom and is our only duchess in her own right.

The Princess, besides being an accomplished musician and linguist, is a firm believer in open-air life and physical exercise, being a good horsewoman, swimmer, and all-round gymnast. She fishes well, too, and enjoys nothing better than a long fishing excursion. Since the war she has worked unceasingly in the cause of our heroes. In appearance she is tall, slim, dignified, and bears a remarkable resemblance to her grandmother, Queen Alexandra. Her marriage to the "handy man of the royal family," as Prince Arthur has been called, was quite a surprise. Yet no betrothal could have been more popular, for both the Prince and Princess have gained the love and respect of all classes by their generosity and simple tastes.

Before their engagement the royal couple were subject to much harmless prophecy as to whom they would marry. Gossipers "in the know" talked about the coming engagement of the Duke of Rutland, and rumors were rife that Princess Alexandra would marry King Manuel of Portugal.

It is very interesting to note that the Princess stands considerably nearer the throne than her husband. She is eighth from the succession. Those who come before her are the six children of the King and her own mother.

The couple are extremely well off. Prince Arthur will inherit a considerable fortune from his father, and the Princess is one of the richest women in England, for her father left a fortune somewhere in the region of a million sterling. The couple are very fond of society, and it has been said that once a friend of the Connaughts always a friend.

THE SOUND OF GUNFIRE.

Heard at Long Distances and Not Heard at Short Distances.

Under certain conditions the sound of gunfire can be heard at great distances. The firing at Waterloo is said to have been heard in Kent, England, one hundred and thirty or more miles away. In 1864, when the Alabama was sunk off Cherbourg, the sound of the guns was heard in Somerset, one hundred and twenty-five miles distant. During the present war, artillery actions in Flanders have been audible in the south of Holland, in southeastern England and at places far inland. But more remarkable than the fact that cannonfire can be heard at such long distances is the fact that sometimes it cannot be heard at short distances. All observers near the western battle front remark the absence of the sound of the guns only a short way in front. Mr. Charles Davison, who discusses the subject in the Quarterly Review, says that on one occasion in 1901 not a sound from the Spithead guns could be heard in the neighboring towns, and that the nearest place at which any report was recorded was fifty miles away, in Surrey. Similar phenomena have been observed in volcanic eruptions. Professor Omori, in Japan, finds the sound area of the Asamayama, a very active volcano, to consist of two zones entirely detached from each other. Mr. Davison furnishes an ingenious explanation of the way in which the sound waves may be lifted by contrary winds over the heads of observers and afterwards, by favorable winds, brought down to the level of other observers far away. Experiments, too, on the curious sensitiveness of birds, especially pheasants, to the sound of guns at a great distance. The North Sea battle in which the Blucher was sunk caused great excitement among the pheasants of Yorkshire and Cumberland, at points more than two hundred miles distant from the guns.

LAND RUINED BY WAR.

Scientist States Battlefields Will Have Chalk Surface.

Land is actually being destroyed, at least its usefulness is at an end, by reason of the gigantic struggle in France. This is the conclusion of Sir Herbert Matthews, who had just made a tour of the Albert and Fricourt districts, as a representative of the English committee which has been collecting money to help in reinstating the small farmers in the countries of the allies.

He says that the general displacement of the earth by intrenching shell pits and mine craters has so churned up soil and subsoil that levelling will leave a surface mainly of chalk.

How long nature will take to cover this with enough soil to sustain vegetation is difficult to say, but, in Sir Herbert's opinion it does not appear commercially feasible to redeem this area.

The Passing of Peter

The Quaich brawled merrily in the summer sunshine in the peaceful valley of Glen Gollach; but for here and there a wounded hero in khaki hobbling down the village street and the Sunday bulletin displayed in the window of the little post office, there might have been no war within a million miles. True, provisions were rather dearer than of yore, but Glen Gollach was largely self-supporting, every cottar had his garden and his hens and his pig, and most grew a modest boll or two of oats, which was ground into the staple oatmeal by Andy Greig, the miller, at a price but little exceeding that of pre-war days, and, moreover, there was no got rich quick willingly at your poor neighbor's expense in that bonny glen.

It was early August, and one night Peter Tamson sauntered by the Quaich with Tinny McTavish, Peter shouldering his old .12-bore, for he was after a rabbit for supper, and Tinny bore his big greenheart in the dubious hope of ensnaring a stray salmon. As the keepers had gone to the war, Lord Peat had given permission to these two to shoot and fish for him, with the proviso that they might retain for themselves every fourth salmon and every tenth grouse, the rest to be duly left at the "Hoose" for his lordship.

The twain sat and watched the fish rise in the Fir Park Pool and smoked the pipe of peace.

"Aye, Tinny, am hopin' the Arch Sinner is geyan near the end o's tether and the Grand Push will hurl they barbarian devils back tae their ain country, aye and emite them there. By God, I'd gie me ither leg tae mairch intae Berlin wi' the Allies, an' I'd make nae peace that didna include that mairch. Weel, weel, there's a fish risin' heed an' tail. Aws an' pit yer eagle ower him, an' I'll up tae the whinny brae for a rabbit an' jine ye in the gloamin'."

Peter limped away, and when he reached the whinny brae found rabbits scurrying in all directions. He shot two right and left, and as cartridges were dear in these days, shot no more. He sat down and filled his pipe. As he sat there reflecting on many things he felt a curious uneasiness, a sort of semi-prescience that something important—he could not tell what—was about to happen, and almost unconsciously slipped two fresh cartridges into his gun. All was still save for the gentle murmur of the Quaich, and the occasional call of the cock grouse. He puffed away at the old clay pipe, listening—he knew not for what. The light was failing a little. Presently he heard a whirring sound far, far away in the distance, and thought he could see over the purple hills a birdlike thing moving quickly.

"What wud an aireyplane be doein' here—it canna be! By gum, it is though," for the whirring got louder and more insistent, the birdlike object became larger and more distinct. "There's something wrang wi't, he's hahbling terrible. Whare on airth can he be tryin' tae gang tae? Mayhap he's lost his wye. God, he coulna, surely, be a German in Glen Gollach; but feg, ye never ken what'll happen neist noodays. I'll just hide a wee an' no scare him aws an' we'll see."

Suiting his action to his words, he lay down under some broom bushes and watched. Nearer and nearer came the aeroplane, for so it was, hirpling along in a lame duck kind of fashion, now falling like a stone hundreds of feet, then soaring a little, but it was evident that it could not keep aloft much longer, betokening either shortage of petrol or genuine trouble of some kind. Was it German or British? At that moment I think Peter would have given all he had to know as he lay there still as a stone, gripping his gun fiercely in case it should be the war engine of the Hun.

Down it planed; then the whirring ceased altogether—the engine had stopped. It must come to earth, and quite near to Peter. As it was but a hundred feet up, he heard the guttural accents of the pilot, and knew it was the hated enemy. If ever Peter cursed his wooden leg he did so now.

Gracefully the aeroplane glided down and touched earth fifty yards from where Peter sat. The pilot and observer clambered out and began gesticulating wildly and jabbering to each other in a language which not even Peter could mistake for anything but German. He now cautiously rose and approached the enemy. When within fifteen yards of them they saw him, and instantly whipped out their revolvers and covered him. But he was too quick for them and, believing in the adage of shooting first and reckoning afterwards, he aimed at the right arm of the taller, and a well directed shot put number one out of action with a shattered arm and a peppering of No. 6 shot in the ribs. His companion fired, but fired too low, and Peter, who rocked and fell, gurgled out "Good luck, it's my timmer leg," and, firing quickly, brought down number two with a shot from his left choke barrel which silenced the enemy's right hand. Peter hopped up after quickly reloading, and handicapped thought he was by his wooden leg, managed to secure both their revolvers.

By this time Tinny, attracted by the firing, had arrived on the scene, and Peter shouted to him to hurry up.

"Hae ye a bit 'tow' on ye, Tinny?"

"I hae that, Peter," gasped the astonished tinsmith, and shaking with fright though he was, produced a bunch of thick cord.

The Germans were meanwhile nursing their wounded members and cursing Peter volubly. "You damn fool, why you did shoot us, you had not shoot we give you much gold for petrol."

"Ye damn'd scum, I'm nae traitor tae my country; an' I'm in two minds whether I'd no' better jeest settle ye here an' now. Gold" (with ineffable scorn), "gold, d'ye think there's a Scotchman in the land would touch yer dirty gold? Here, Tinny, help me tie up the pigs an' gyne awa tae the village for twa or three stout men an' the policeman, an' we'll hae them tyed' in a twinklin'."

"But they'll maybe harm ye, Peter," said Tinny, only too anxious to depart.

"Harm me!" roared Peter. "God, they're welcome if they can dae't — nwa wi' ye."

Tinny needed no second bidding, and raced off down the riverside.

"We bleed, you pig of a Briton," quoth the Huns rather feebly.

"Pigs yersels an' ye can damn weel bleed. I'd no trust ye wi' a baubee. Bleed till ye faint, an' syne I'll tie yer wounds up—ye'll no die that wye. Nae dout yer maister, the De'il, has something else in store for ye."

To make assurance doubly sure Peter fired a couple of shots into the planes of the machine. He did not believe in taking any chances. He kept an anxious eye on the riverpath for the aid he sought and another on the captives bound. Presently he saw the relief party running up the glen.

Tinny and Robbie Dunn, Sandy Glen, and old John Ferguson, the supernumerated policeman who had come to the glen to take the place of a younger man taken for the war, came dashing up and none too soon.

The bullet which shattered Peter's wooden leg had in its course struck the stump and, tearing it open, he had bled freely without noticing it during the excitement of the capture. But now, faint from loss of blood, he was collapsed on the ground, and one of the Huns had crawled to him and seized the revolver Peter had confiscated with the intention of putting him out of action. Luckily, the aged policeman was in time, and a well-directed blow on the head nearly finished the representative of Kultur.

Tinny was now despatched for a cart, and eventually the party reached the village, the three combatants much the worse for wear. The whole village turned out to greet the arrival, and Peter was tenderly carried home and laid on the big bed in the kitchen, while the doctor was summoned to attend. He dressed Peter's wound, a nasty jagged one, and then proceeded to the police station to attend to the wounds of the Germans.

Peter was once more the hero of the day. Representatives of the Press came to interview all concerned, and photographs of the starwart Highlander who had done so bravely appeared in all the illustrated papers. The King graciously sent a telegram, which delighted Peter's heart, for he was a King's man and his country's to the backbone.

Days passed and weeks, and Peter's wound did not heal. A great specialist was sent for by Lord Peat, and wrung his lordship's heart when he said, quickly: "There is no hope; gangrene has set in. He has lost so much blood that amputation higher up is impossible owing to his weakness."

Peter realized all this and knew his time had come.

The doctor came late one night, and Peter asked him to send the Rev. John McGollach to him at once. The Rev. John came quickly and went into the kitchen.

"Aye, weel," said Peter, in a tired voice, "it's nearin' the end noo, an' but for Janet I'm no sorry. Man, I'm jeest tired, tired; my pair auld body's fair worn out. Noo ye'll see to Janet. Little Peter a'll no see, for he's ower in France dein' his bit; but jeest tell him frae me that his feyther, auld Peter, died game. Man, it's queer lyin' here and kennin' that in an hoor or twa I'll see what like man must are some day; what'll it be like up there? We talk lichtly o' the Great White Throne, but when we come within reach o' 't we wunner what things 'll be like. I would like fine tae be able jeest tae look doon whiles on this bonny glen an' nathing in't, and wha kens but I'll be allooed tae dae't. Now, John, I'm slippin' away, an' I must have a wee talk wi' Janet. Cual her in."

Poor Janet, distraught and tearful, came in and knelt by the bedside, taking the now white but gnarled hand in hers and pressing it gently to her heart. "Oh, Peter, ma' man, if we could jeest take the road thegither I wudna care; but, dear, I'll hae a lonely wind tae dree, an' a'll miss ye sair."

"Janet, dinna greet, we'll meet again. See far as I cud, I've dean ma duty, and nae mair's expecit o' ony man. I'm jeest wunnerin' if things up there'll be ony like in this bonny glen. Tae me there's nivver been ony place on God's airth like it, the heather an' the hills, an' the music o' the Quaich, an' the bit wild floowers — Janet."

The grand old man raised himself on his elbows. His eyes expanded in wonderment. He saw at that moment more than earthly eye could see. A peaceful smile came over his face. He gripped Janet's hands tightly in his, and with no further word sank down on her breast.

The sun shone bravely as the simple coffin was carried to its last resting place in the little grey stone walled kirkyard by the side of the river. Today the music of the sun-kissed Quaich was hushed and gentle, the trees droned drowsily as the minister with throbbing heart and eyes bedimmed with tears pronounced the last solemn words of the burial service. The glen had lost its best beloved man. No one would ever fill his place —Peter had passed.—J. L. Dickie in Country Life.

THE FAT MAN'S WATCH.

Those Belonging to Heavy Men Invariably Gain Time.

A watch is a very delicate piece of machanism—far more so than the average watch-owner realizes. For instance, the balance-wheel vibrates at the rate of five beats to the second, or 18,000 to the hour. The wonder is, then, not that watches lose or gain, but that so many keep such good time as they do.

Consider the jarring which all watches have to put up with. Their wearers run, jump, ride, and take all sorts of violent exercise, and the action of the body of the wearer is found to influence the delicate machinery of his timekeeper.

It is notorious that watches belonging to big, heavy-footed, weighty men invariably gain, while those worn by women and light-footed or quietly-moving men usually keep good time.

A watch should always be wound in the morning. By so doing the spring will exert its strongest power during the day. When a watch is wound at night it has only a weakened spring to offer as resistance to the jars and jolts of the daytime.

The pocket in which you keep your watch all day averages a warmth of 97 degrees Fahrenheit. On a winter's night the temperature of the table by your bedside will probably be from 40 to 45. How can you possibly expect so sensitive a machine as a watch to stand a sudden drop of between 30 and 40 degrees?

Your motor car will not go without oil. Nor will your lawn-mower or your sewing machine. A watch, though to some extent air-tight, also requires oil. At least once in two years you must take it to the watch-maker's for cleaning and oiling.

No watch is completely dust-proof. Particles of dust work in, they mix with the oil, and presently begin to act like emery-paste, and wear out the working parts. When you consider that a watch ticks 432,000 times a day you can compute the gigantic nature of the task which it performs in a year, and realize how necessary are regular cleanings and oilings.

The best watches of to-day are so made that they are proof against ordinary magnetic influences; but the average watch will be entirely upset if worn during a visit to a power-station, and even the magneto of an ordinary motor car may affect its working and time-keeping.

BRITISH FOOD DICTATOR.

Lord Faringdon Is Chairman of Committee of Inquiry.

The Rt. Hon. Lord Faringdon, better known as Sir Alexander Henderson, who has been appointed chairman of the British commission to enquire into the food problem, has long been known as an enterprising railway magnate. He has been chairman of the Great Central Railway for the last 17 years, and under his guidance the officials of the Great Central Railway have acquired a reputation for keenness and business acumen which they thoroughly deserve.

Born in London nearly 70 years ago, his father and mother were natives of Dumfries, Scotland, and after receiving a private education he entered the office of Messrs. Deloitte & Co., the accountants of the Great Western Railway. Having acquired a thorough grounding on the commercial side, he went through the engineering shops. Young Henderson was destined for a brilliant career, and his pertinacity and unceasing energy soon brought him to the top of the ladder of success. In 1894 he was elected a director of the Great Central Railway.

Not only is Lord Faringdon a remarkable organizer, but he is also a clever financier, and he greatly assisted in raising the large amount of capital required for the London extension. This new route gave the public much better facilities and advantages when traveling up to the Midlands and the north.

Lord Faringdon was made a baronet at the Coronation of King Edward VII., and was honored with a barony this year. He is a keen politician, and his Parliamentary career dates back to 1892, when he was elected member for the west division of Staffordshire in the Conservative interest. Subsequently he represented St. George's, Hanover square, until his elevation to the peerage.

Besides his great interests in railways, chiefly in South America, he is closely connected with the coal and iron industries of this country. His heir, Major H. G. Henderson, M.P., is a well-known sportsman, and is married to a daughter of the Earl of Carnwath.

A Chinese philosopher says there is an ounce of wisdom at the root of every gray hair.

GERMANY HAS 4,500,000 MEN

THEY ARE ABLE TO CONSERVE THEIR STRENGTH.

Military Writer Says Allies Must Strain Every Nerve Next Year.

The military correspondent of the London Times writes as follows, on the question of the man power of the allies and the Central Powers: "Germany's wise economy of her young contingents and her constant re-examination of the medically unfit and the refusal to consider the claims of the 'conscientious objectors' and also of the civil service, her success in restoring to the colors a high proportion of the German wounded, the use of prisoners in factories and on farms, the forced labor of the population of the occupied territories and finally the trap she has baited to catch the Poles, all enable her to maintain in the field units of full strength much longer than any one would have thought possible.

National Discipline.

"These successes are due to national discipline and complete subordination of the interests of the individual to those of the state. The militarization of the entire nation represents a remarkable achievement. By a well organized system of substitution Germany is already able to take for her armies two batches of half a million men each and is in the course of taking a third from the munition works, mines, railways and other essential national industries.

"She has been able to build up 200 field divisions and cannot now safely be credited with less than 4,500,000 men in her field armies. On lines of communication, guards and reserves generally, owing to the measures Germany is taking, she cannot even now be reckoned to have less than 2,000,000 men.

Allies Must Work Hard.

"The situation broadly is that the allies are faced with the necessity of attaining every nerve to place in the field next year every man, gun and shell that all the countries can produce.

"We allies are quite able to make this effort, and to overmatch Germany. We in these islands have still between three and four million men of military age in civil life, not counting men over forty-one. We are in far better position than Germany to maintain the war. Our gallant dominions have still large reserves of man power. Russia has still ample reserves and will produce larger armies each year the war lasts. Italy increases and improves the quantity and quality of her armies monthly and France has been most successful in drawing more men from civil employments. She now excels in the art of accomplishing great things in the field with relatively slight losses."

German Compulsion.

The Berlin Lokal Anzeiger quotes a Frankfort telegram to the effect that all German citizens in good health are to be summoned compulsorily to do work of national importance. Berlin newspapers published an urgent official appeal to the women to apply at the war factories for work. War brides are accused of leaving factories on their marriage and taking separation allowances and refusing to continue work. A proclamation by the general commanding the Munich district threatens that selfish idle persons who refuse to take work and forego amusements will be forced to do so in the end.

SIGNALLING BY SUNLIGHT.

The Method Is More Than Two Thousand Years Old.

The heliograph, although largely superseded by wireless telegraphy, is still largely used on the frontiers of India and in South Africa, where the air is clear and signals can be seen over long distances.

Botha's men are using it, and so are his opponents, though perhaps they seldom think this method of signalling by means of flashing reflections of the sun's rays is more than two thousand years old, being invented by Tacitus. The shields of soldiers, grouped in a pre-arranged manner, were used, but, of course, the system was very primitive and transmission slow, only the simplest expressions being possible.

Under favorable conditions a heliograph signal can be read for very long distances, seventy miles being not at all uncommon; while fifteen years ago Major Home, on the staff of General French, managed to send messages for ninety-two miles—for long a record.

More recently this has been outdone, and the same officer was able to read quite clearly signals which were flashed from a distance of 120 miles. Captain Sadler, of the Carabiniers, using a 5in. heliograph from Compass Beg, talked to Major Home on the Cockscombs Mountain, near Ulundhage—a record which remains unbeaten.

Hope and advice never yet satisfied a man's hunger.

WAR BRINGS NEW DISEASES

ARE NOW BEING INVESTIGATED BY COMMISSIONS.

Dr. Hugo Cabot Tells of "Trench Fever" and "Trench Nephritis."

The horrors of war have been augmented by two new diseases—"trench fever" and "trench nephritis," the latter somewhat similar to Bright's disease—according to a report received at Harvard University from Dr. Hugo Cabot, who is in charge of the Fourth Harvard Surgical Unit at the front.

Both diseases are subject to investigation by commissions appointed by the British Government.

Eight thousand wounded and sick soldiers cared for and only nineteen died in the record of this unit during its threo months of service at its semi-base hospital "somewhere in France," Dr. Cabot says.

More Wounded Than Sick.

The contingent, consisting of 34 physicians and surgeons and 55 nurses, was established last June at its hospital, which was principally under canvas, though several corrugated iron "huts" were available for the most severe cases. The contingent was just in time to share in the work of caring for the wounded from the Somme region, which necessitated an increase of beds in the hospital from 1,340 to 2,280.

"A most striking percentage of modern warfare," says the doctor, "is the high percentage of wounded as compared with sick. In most former wars the proportion of sick to wounded has been at least four or five to one, whereas during the summer in this war the proportion of sick to wounded is one to five-six, and in the winter one to one and one-half."

Proof of Effective Fire.

Speaking of the character of wounds, the doctor says: "Rifle and machine gun bullets, on account of their steel jackets and high velocity, cause relatively clean wounds, and the same is true of shrapnel. Interestingly enough, during the early part of July, at the beginning of the 'Somme drive,' we had a large proportion of machine gun bullets, due to the fact that the German trenches were at least partially intact; were still in three well developed lines arranged that one regiment would enfilade the other. Thus a section of a regiment having entered a second line German trench on the 6th of July was literally wiped out by an enfilading machine gun fire from both sides. Later, after the three lines of permanent trenches had been blotted out by the extraordinary accurate fire of the British heavy artillery, most of the wounds were produced by fragments of high explosive shells and bombs, and were therefore ragged, tearing injuries, removing two or three inches of the great bones of the thigh or lower leg and producing most hideous wounds.

Steel Helmets Save Many.

"The universal use of steel helmets has much reduced the importance of wounds in the head. Though not an absolute protection, they either deflect the course of the projectile so as to produce only a stunning injury, or break the force of the blow with the production of a badly bruised or devitalized wound, but often without penetrating the skull.

"Of abdominal wounds we saw nothing in their early stages, since, if these injuries are to be successfully dealt with they must be operated upon within six hours. Special hospitals for the purpose have been established immediately behind the firing line. During the first year of the war these injuries were almost universally fatal. To-day between 40 and 60 per cent. of the cases operated upon recover.

"A most important part of the work of the unit has concerned itself with the management of the dreadful wounds of the face involving mouth and jaws. This department is under the management of Dr. Kazanjian, whose work has been of such a high order that all cases of this kind in the whole army are placed under his care. In this department, probably more than any other, the Harvard unit has contributed to the efficiency of the Royal Army Medical Corps.

Nearly All Wounds Infected.

"Practically all wounds are infected, but the most serious and important of these infections is the so-called gas grangene, caused by a gas-producing bacillus. From 80 to 90 per cent. of the wounds are infected with this organism, in which, in rapidly developing cases, the tissues about the wound crackle under the fingers on account of the minute collections of gas under the skin. More important, however, are the collections of gas deep in the tissue, where it spreads rapidly to the soft parts literally melting away in this neighborhood and thus producing the most startling and most serious complication, secondary hemorrhage."

Speaking of the work at a semi-base hospital, Dr. Cabot continues:

"Work is light or heavy in very direct relation to the activity of the fighting in that section of the front they drain. For this reason there were periods of relative calm during which it was possible to carry on more or less scientific investigations into the new problems presented by this war.

"Shell Shock."

"One of the most interesting problems was the condition known as 'shell shock,' more closely allied to the so-called traumatic neuroses seen in civil practice than to any other condition with which we are familiar.

"Just as in civil life traumatic neuroses have been a cloak for deception, so in military operations 'shell shock' has become a potent source of malingering. In the most severe cases of 'shell shock' the men are deaf and dumb, show gross shakiness and tremors, and in some instances various grades of paralysis of arms or legs. All the symptoms are easy to counterfeit, and when it became generally known that men with so-called 'shell shock' would be sent to the base the strain proved too much for a considerable number of men."

GRASSHOPPER AND ANT.

An Irish Soldier's Experience in the Boer War.

It was during the Boer War that an Irish soldier in South Africa, gingerly removing from his stew as much as he could find of a large, unwelcome grasshopper, was heard to remark, with praiseworthy resignation to the ways of Providence:

"The dhrumsticks of the baste is still in it, worse luck! But if I ate them I murt, thanks be to hivin that kapes the crayturs smaller than a hin!"

Mr. J. P. Kay, writing recently of his experiences "With Botha's Army," supplies a present-day pendant to the anecdote. He was visiting the lines of the Natal Field Artillery when, as he records, he almost tripped over a philosophic son of Erin eating his dinner.

"He was Irish, and he sat upon an upturned soap box and toyed with a dish of something that sounded like camp stew. There was a sudden noise that makes a grown-up say to a child, 'You should put your hand before your mouth when you do that,' and I heard rather than saw the superphilosopher clear his mouth of some objectionable morsel. I looked round, and his pale eye clused with mine.

"'Praise the saints!' he said. 'Thim ants have no bones into thim!'"

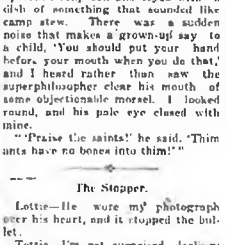
The Stopper.

Lottie—He wore my photograph over his heart, and it stopped the bullet.

Tottie—I'm not surprised, darling; it would stop a clock.

Not at Work.

Employer—John, I wish you wouldn't whistle at your work.



Boy—I wasn't working, sir; only whistling.

The Paisley Advocate

PAISLEY, DEC. 20th, 1916

LOCAL AND DISTRICT NEWS

Foot Cut Off

George Atkinson, son of Councillor Wm Atkinson, of Sangeen, had his left foot taken off in his father's clover threshing machine, which was working at their own barn on Saturday afternoon. The young man was on top of the separator at the time, sweeping it off, and got his foot caught in the cylinder. He is about 18 years of age.

Archer's Wyandottes Win Ribbons

In a very large class of exhibits in the poultry department at the Guelph Winter Fair, Mr W A Archer's pen of Wyandottes was awarded 6th place. Single birds of his flock also were among the prize winners. His best cockerel was much admired by the fanciers and an offer of $75 was made for his purchase, which was not accepted.

Generous to the Belgian Relief Fund

Mr. T. Howell occupied the pulpit of Knox church on Sunday morning and the Methodist in the evening, also spoke at Gillies Hill church in the afternoon and at a public meeting in Paisley town hall after church services, his addresses all being in interest of the relief fund for Belgian refugees outside the German lines. Mr Howell's word pictures of the plight of the people who have fled from that little buffer kingdom to escape the German oppressors, and his appeal for assistance met with a hearty and generous response. The total amount of the contributions received in Paisley is $675, of which the congregation of Knox church gave $490. Although there were only twenty people at the Gillies Hill meeting the collection was $15.

Greenock Council Decides on $1800 for Red Cross

At the financial meeting of Greenock Up on Friday, the question of making a grant to Red Cross work was wrestled with in earnest, and the township legislators did not finish their session until one o'clock Saturday morning. Some ratepayers who favored and advocated a grant were present and discussed it with the council. We understand that Councillors Campbell and Sawyer made a motion to grant $1800, the full amount requested by the public meeting on Oct 24th. Councillors Symon and Kreepin brought in an amendment to grant $1000, which was supported by Reeve Phelan and carried. Although under ordinary procedure the voting of such a sum at this meeting would have been illegal, special permission is given by the provincial authorities in regard to grants for patriotic purposes, so the action of the council cannot be amended. Councillors Campbell and Sawyer deserve credit for their endeavors to carry out the wishes of the ratepayers' meeting, and none of the council can be charged with disloyalty hereafter. The fair name of the township has been saved from everlasting reproach.

Home from the Battle Front

Capt (Dr) Geo. McIntyre, who has been in France for a year as a member of the Medical Corps, arrived here last week on a visit to his mother, Mrs J C McIntyre, and other friends. Dr McIntyre was on the front line as medical attendant, and has probably seen more good, red human blood flowing in that time than will again come under his gaze even if he continues active practice as a surgeon for the balance of his days in this peaceful part of the earth. Although not participating in the fighting and slaying, while on duty he was a great deal within the actual danger zone, and had some very narrow escapes from being among those who have made the great sacrifice. Once while in a dugout a German shell almost as large as himself came crashing through and half buried itself in a corner of the small excavated space but did not explode else he would not be here to answer any inquiries as to the truth of this tale of the war. Amid all these dangers the young doctors who went to add their fighting fellowmen are encouraged in a truly wonderful work, and nobly doing a part in demonstrating the efficacy of science and skill in saving life where the first object of the conflict is to destroy.

Continuation School Promenade Concert

The teachers and students of Paisley Continuation School entertained quite a large number of their friends at a concert and promenade held in the school on Friday evening last. Invitations were issued, and all who accepted spent a very enjoyable time under the roof of our institution of learning, where hitherto the offering curriculum schedule had been the sole programme. The holding of this social function is an innovation, and will be looked upon as a fixed precedent for periodical events of the same enjoyable character. All work and no play makes Jack a dull boy, and it may be as much a truism to say that unremitted plugging for examinations, whether successful or not, does not constitute a complete course of education for the youth. There is much to be said in favor of the school entertainment. The programme was held in the vacant 8th room, which makes a very convenient assembly hall. Principal Mark presided. The programme was comprised of patriotic choruses by students, solos by Ruth McDougall, Blair Foster and Ina Allen; duet by Nellie McBride and Jessie Young; readings by Anabel Blue and Beulah Rudolph; recitations by Inez Bell and Jean Cameron; music by a boys' orchestra. Miss Gladys and Velma Winch were the pianoaccompanists. Following this part was a programme of promenades in the hallways which were all lighted with Chinese lanterns. Another enjoyable feature was the lunch served.

With the Signallers in England

Part of the first letter from Spr Elroy McKenzie to his parents was written at sea, Sept 19th: "Just a week ago today we were in Ottawa, Canada. To night we are nearing the shores of another land, one that hitherto I have only read about. It's quite a distance from here to dear old Paisley, but when we look at it in another way, not so far after all, as modern ladies' trains are fast and steel ships do not take long to plow their way from shore to shore. The old world is not so large as one might imagine. I have seen many notable sights since I was home, but I suppose our right seeing has just begun." Writing from Liverpool, Nov 9th: The journey from Witley to Halifax was greatly enjoyed, with the grand scenery viewed while passing through New Brunswick, by mountains and, of course can be seen nearly all the way. Arrived at Halifax at 10 45 pm and sailed into the city harbor by rays around the head of the bay, and from the train could be seen the lights gleaming all along there. The signallers marched up from the station to the barracks, at the fort, where we slept that night, and next day marched down to the dock and boarded the transport, the Olympic, which lay in the harbor until the afternoon of the following day before sailing we were afforded many boats to admire the fine view of the city, the harbor and the surrounding country. The voyage on this great ship was uneventful, but was made in fast time—only five days from Halifax to Liverpool. Escaped sea-sickness, only felt squeamish that the first day out. Met Jack McArthur of the 12th, and Clarence Blair of a Toronto Battalion. Eric Harrower of Winnipeg was on board, but did not see him. There were 7,000 soldiers on board, besides the crew, which represents the population of a good sized town. There was not more than three hours sunshine while we were on the sea. Sighted the coast of Ireland on the 7th and continued to see land nearly all that day. The shore was only about two miles away at times, and the "Emerald Isle" looked fine, as the grass was very green, just like summer. Passing the coast of Scotland we saw Ailsa Craig, a solid granite rock in the Firth of Clyde, about 50 miles from Glasgow. As escort of two fast destroyers picked us up and accompanied us to Liverpool. The ship was anchored a short distance in the Mersey river before going to the dock. Fog and smoke were so thick that the shore could hardly be seen. At night searchlights on both sides of the river threw their brilliant, dazzling white rays high into the fog and slowly, constantly swinging for enemy air craft. It is quite a wonderful sight, and just shows us that Britain is always watching for the enemy both on land and sea. Oh, the navy, the British navy! It is the greatest world in its real sense. Only the U S A could see how this navy protects and safeguards all ships at sea and all shipping entering her harbors, probably the American people would realize that they too are living under the protection of the British navy as well as Canadians and other people are. Did not see much of Liverpool, but it must be a great city. The shipping is tremendous. On train trip from Liverpool to Crowborough camp, Kirey notes the very nice picturesque scenery, made up of hills and valleys, steep cliffs, or a rather rolling country, interspersed with flat areas. Houses are the brick generally used in the country seen in many towns and districts, grouped corresponding. Near the close both are crowded, with the houses built in rows no narrow streets and anything but adaptable to motor traffic. Many things in England that sounds big are so very different to Canada—the cities but specially trains, the disciplines in the army, &c. At Crowborough Camp the signallers are quartered in comfortable wooden huts—or huts. The meals are as good, if not better, than at Ottawa camp. In closing his letter Elroy says, "We are getting six days leave. Walt and I are going to Edinburgh and Glasgow, also probably Wales and London. I am quite well. Don't worry. Soon I will be O K and will put along line."

AUTOINTOXICATION OR SELF-POISONING

The Dangerous Condition Which Produces Many Well Known Diseases.

HOW TO GUARD AGAINST THIS TROUBLE

"FRUIT-A-TIVES" — The Wonderful Fruit Medicine — will Protect You

Autointoxication means self-poisoning, caused by continuous or partial constipation, or insufficient action of the bowels.

Instead of the refuse matter passing daily from the body, it is absorbed by the blood. As a result, *the Kidneys and Skin are overworked*, in their efforts to rid the blood of this poisoning.

Poisoning of the blood in this way often causes Indigestion, Loss of Appetite and Disturbed Stomach. It may produce Headaches and Sleeplessness. *It may irritate the Kidneys* and bring on Pain in the Back, Rheumatism, Gout, and Rheumatic Pains. It is the chief cause of Eczema — and *keeps the whole system unhealthy* by the constant absorption into the blood of this refuse matter.

"Fruit-a-tives" will always cure Auto-intoxication or self-poisoning — as "Fruit-a-tives" acts gently on bowels, kidneys and skin, strengthens the bowels and tones up the nervous system.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

WHY DOES THE CANADIAN PATRIOTIC FUND REQUIRE SO MUCH MONEY?

This question is often asked, by persons and by municipal councils, when the matter of liberal giving to the Fund is brought before them.

They are entitled to the most complete answer, for the Fund is the people's. They created it, and it is they who must maintain it.

Now for the reasons. There are 149,230 of them.

The Fund asks for so much money because Canada has given her men so lavishly to the Great Cause. Between 300,000 and 400,000 have volunteered. If their families need help, this Fund provides it. In October 53,693 families did need it. These families comprised 149,230 persons, nearly all either mothers, wives or children. Is it any wonder that so Great a Need requires so Great a Fund?

HOW GREAT IS THE NEED OF MONEY?

The sum expended in October, 1916, was	$891,814.00
The average payment to each family was	16.29
The average payment to each person was	5.73
The cost of administration was	15,461.00

(In above averages, sums paid for broken periods not included.)

Pay special attention to the figures concerning cost of administration—including expense of campaigns for raising money. It is the ambition of the managers of the Fund to keep the cost of raising and disbursing it below that of any voluntary fund ever created in Canada. Their aim is to hand to the soldiers' families as nearly as possible one hundred cents for every dollar subscribed. They succeed in handing 99¼ cents. The sum received in October as interest on moneys in banks was about $11,500. Take this from the cost of administration. The remainder is $4,000. And that, therefore, is all that had to be deducted from sums paid in.

That is to say, of every $100 paid by generous givers, $99.46 reached the families.

Is not that economy which should give confidence to every subscriber?

Does the magnitude of the Fund, as well as its importance, begin to impress you, Mr. Citizen-who-is-being-asked-to-subscribe-$100, or you, Gentlemen of the Municipal Council, who are being urged to vote $100,000 for 1917? Does the REQUEST look as large as it did now that you know something more of the NEED?

Since the war began the people of Canada have subscribed to this Fund	$16,495,000
For 1917 they will be asked to give—and will give	12,500,000
Of this sum Ontario is being asked to guarantee—and will guarantee—at least	6,000,000

This is one million more than in 1916, but every dollar will be required for Ontario's families. Not much chance for individuals or counties to economize by cutting down their contributions, is there? On the contrary, the giving must be on a scale more generous than ever. And why not? If we can't FIGHT, isn't it a Privilege rather than an Obligation to PAY?

ONE WORD MORE:

No man should ignore his personal responsibility towards the families of those who are fighting for him, simply because his Municipal Council is taxing him slightly for the same object. He owes these people far more. Perhaps he is too poor to pay more. If not, it is up to him to give a generous cheque to his local Patriotic Fund Committee, or mail it to

THE CANADIAN PATRIOTIC FUND, VITTORIA STREET, OTTAWA

SOME OF THE 149,230 REASONS WHY THE FUND NEEDS SO MUCH MONEY

MARRIED

McRAE—FOWLER—At Rivers, Man., on Dec. 2nd, Mr Fraser R McRae, son of Mr. Alex McRae, Paisley, to Miss Beatrice Fowler, of Rapid City, Man.

Elderslie Nomination Meeting

A MEETING of the ratepayers of the Township of Elderslie will be held in the Town Hall, Chesley, on Friday, Dec 22nd, 1916, at the hour of 2 o'clock, p.m., for the purpose of nomination for the office of Reeve and four Councillors for 1917. Should more than the required number be nominated a vote will be taken on the following Monday, Dec 25th, at the hour of nine o'clock in the forenoon and the polls will be kept open until five o'clock in the afternoon of the same day.

R. C. PEARCE, Tp Clerk.

Greenock Politics

Reeve Phelan and all the old council are expected to stand for re-election. We hear the names of Messrs George Gilchrist and And Porter mentioned as probable new candidates. One of these gentlemen may be induced to take the field.

From Bramshott Camp

Pte J Nicholls, of A Co. 160th Batt., in a letter to his young brother at home in Greenock, dated Nov 23rd, says; "It is snowing here like everything, and the ground is covered two inches deep. Quite a few of our fellows are away on pass. There was a draft went away to France the other day (but not of the 160th) and our sergeant told us that in another month or so some of the biggest and best of our fellows would be going, too. They pick out the ones that are the best shots and are physically fit. The lads who were in London and saw the King say he looks pretty poorly. So our band lads agreem with us better than his subjects. This is a fearful country here—raining one day, snowing the next, and then freezing. One can't be out fifteen minutes before he is soaking wet. When Canadians go to buy anything here we have to pay three times the price, and that is one reason why we don't care for the English. The Australians are also very bitter towards them. The English ways are very much different to those in Canada. It takes me all my time to make out what they say, also the names of their money. We started to work the other day, and it makes us feel better, as we were getting too lazy to get up for our breakfast. We get up at 6 30, breakfast at 7, physical drill from 7 45 to 9 30, fifteen minutes off, and then squad drill till 12. We work from 1 30 to 4 45 p m at musketry, and have supper at 5 15. When night comes we have to cover the windows of our huts with blankets, put on coal, and we are snug. They were giving us a lecture on the gas helmet to-day, and we are supposed to get them to-morrow. We have to be trained to put them on in seven seconds. We have had some trench digging and barb wire entanglements to put up. When we have had some practice we have to put up and take down the wire entanglements in pitch darkness, also charge over the trenches with pack and gas helmets on. Some of the work is very interesting. I suppose, Geordie, you sit by the fire and munch apples galore. They are four cents apiece here, so I don't get many. Wishing you all and my friends a Merry Christmas and a Happy New Year."

WELL-KNOWN ONTARIO WOMAN SPEAKS.

Welland, Ont.—"I am most pleased to say that Dr. Pierce's Favorite Prescription has proved itself a first-class remedy. I was run-down, weak and played out, and needed a woman's tonic. I have just finished using one bottle. I feel much stronger and better. Can eat better and am less nervous. You may say that 'Favorite Prescription' is just the medicine for tired-out, worn-out women. It does wonders for them."—Mrs. Geo. Flanigan, E. Main and State Sts., Welland, Ont.

THIS PRESCRIPTION IS FOR YOU

If you suffer from hot flashes or dizziness, fainting spells, hysteria, headache or nervousness you are not beyond relief.

Dr. Pierce's Favorite Prescription is directed to the real cause and promptly removes the disease, and therefore brings comfort in the place of prolonged misery.

It has been sold by druggists for nearly 50 years, in fluid form, at $1.00 per bottle, giving general satisfaction. It can now be had in sugar-coated tablet form. Sold by all medicine dealers or Trial box by mail on receipt of 50 cents in stamps.

Every sick woman may consult us by letter, absolutely without charge.

Write without fear as without fee, to Faculty of the Invalids' Hotel, Dr. V. M. Pierce, President, 663 Main St., Buffalo N.Y.

Dr. Pierce's Pellets are unequaled as a Liver Pill. *Smallest, easiest to take. One tiny Sugar-coated Pellet a Dose.* Cure Sick Headache, Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all derangement of the Liver, Stomach and Bowels.

Toys and Games are a Scarcity This Year

the war having nearly stopped all importations. A Canadian inventor has brought out the

New Charlie Chaplin Bowling Game for Christmas

Which will be sent you by mail for $1.25. Will last for years. A five-year-old child can play and win. It creates the intense excitement necessary to every good game. Its mechanical operation appeals to every boy and girl, or adult. Where one game is sold it sells dozens more. If your local store hasn't got it for sale send to the

GILLIES HILL

This touching little poem, written by Mr Ira Leitch of Chesley was recited by Miss Ina McKay at the recent church anniversary at Gillies Hill:

MOTHER'S SOLDIER BOY

He won't be home for Christmas, and mother sighs and sighs;
And looks out of the window, his letter in her hands.
She tries to hide her feelings, and I—well, here it goes.

A look'n at the paper and haven't read it yet,
The headlines of the war news is jumbled every way.
He can't be home for Christmas "it is all they seem to say.

I know what mother's thinkin'—she's looking down the lane
And middin' how he kissed her as he left her at the train.
Her anxious thoughts and prayers followed him the ocean O'er;
Then long the wire the message came, "Your wife an England's shore;

I'm living in an armed camp with thousands khaki clad;
I can't be home for Christmas, I'll think of you and dad."

He was the brightest of the party at the happy Christmas tide,
When the merry sleigh bells jingled while they had their jolly ride.
He laughed and shouted "Hello" to all the boys in town,
And many a girl's eye glistened and the silent tear crept down.

I wonder what he's doing, is he foremost in the fray?
He won't be home for Christmas—we'll miss his winning way.

But he won't be home for Christmas. Ah! nevermore will he;
His bravery had earned for him the coveted V.C.;
For, maimed and bleeding, from the field they bore his battered frame,
He lingered long enough to bless his mother's name.

He gained his heavenly laurels, a crown of glory there;
He won't be home for Christmas—he's waiting mother there.

THE ADVOCATE will be a most welcome gift to absent ones of your family, whether in Canada or away to the fighting front in France.

ELDERSLIE COUNCIL

Gillies Hill, Dec 15, 1916

Council met on above date. Members all present. Minutes of last meeting read and adopted.

Lewis—Fraser—That following parties be appointed deputy-returning officers and poll-clerks, and that a by-law be passed providing for same.—Carried:

D R O	POLL CLERK
No 1—Minto Jackson,	W P Patterson
2—Jas B McBride	A Mitchell
3—W Harris	W Cruickshank
4—D A McIntyre	W T Thompson

On motion of Councillors Allen and Thompson, orders were issued for accounts passed at this meeting, all of which will appear in the financial statement.

Lewis—Fraser—That this Board do now adjourn to meet again on Friday, Dec 22nd, at 11 30 o'clock a m, and that the time for receiving the collector's roll be extended until that time.—Carried.

R C Pearce, Tp clerk.

GLAMIS

Mr and Mrs J Morrison (nee Jessie Harrison) who were married on the 12th in Chicago, are spending a day and a night at the home of her uncle, Mr Jos Cunningham, and renewing old acquaintances here. Mrs Morrison was born and brought up in Glamis. Her father, the late R W Harrison, was for years in the mercantile business here, and also had the post office. Her many friends wish her every happiness. Mr and Mrs Morrison will make their home in Winnipeg.

Miss Sarah Jackson, who spent two weeks with her mother here, returned to Detroit on Saturday.

Sleighs are running now, and it's nice to hear the jingle of the bells.

Mrs Jas Begg has returned from visiting friends in Buffalo and Rochester.

CANADA

NATIONAL SERVICE

PUBLIC NOTICE is hereby given under the authority of the "War Measures Act, 1914," that during the first week in January, 1917, an inventory will be made by the Post Office Authorities, of every male between the ages of sixteen and sixty-five, residing in Canada.

National Service Cards and addressed envelopes for their return to Ottawa have been placed in the hands of all Postmasters for distribution amongst the persons required to fill in such cards. Every male person of the prescribed ages is required to fill in and return a card enclosed in an envelope within ten days of its receipt.

Any person who fails to receive a card and envelope may obtain the same upon application to the nearest Postmaster.

R. B. BENNETT,
Director General.

Ottawa, 15th December, 1916.

GOD SAVE THE KING.

NATIONAL SERVICE WEEK : 1st to 7th JANUARY.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XVII.—(Cont'd).

"But," he said, "how do you manage with the foot-marks on the floor of the room? Do you leave them?"

Willie shook his head.

"No," he said, "not we. That wouldn't be safe, captain. We shake dust down from a saucepan wi' holes in the bottom."

"There are clever people as well as myself," thought the captain. "One thing more," he added, rubbing his finger along the barrel of the revolver to remind his captive that he was still on guard. "I watched you come out of the ivy in the chapel, and descend from the roof. How did you manage that?"

"That's th- easiest part, captain," he said. "I can walk along the ledge, as ain't very broad, 'tis true, but so much down here narrower than it be— —"

"I see," said the captain. "But the descent—how is that arranged?"

"By a wire and a spring," said Willie. "There's a big spring bid up in that ivy, and when I swings off that ledge the spring lets the wire down; when I let go, up goes the wire—not up to the roof, you know, but just enough to keep it out of sight. Wire's a difficult thing to distinguish in the light of this place, and it ain't thick, like rope."

"I have it all," said the captain. "Clever, very clever. There are other heads behind yours, my friend," he muttered.

"And now what be you going to do, captain?" asked Willie, anxiously. "I've behaved honorable and answered up true and straight, like an honest man. What be you going to do?"

"I will think," said the captain.

"I should think you'd never be so hard as to interfere with an honest man's living, captain?" pleaded Willie, gruffly. "It don't make no odds to you if we do give the customs a slip now and then and run a small cargo."

"A small cargo," said the captain, significantly. "You have been rather busy, lately, if I mistake not, my friend?"

"Well, we have so," admitted Willie, candidly, "we have so, and," he added, desperately, "there be a cargo waiting for us now, captain."

"Now?" asked the captain.

"Ay, this very minute," assented Willie. "I've been down to see if it be all clear, and was going down to fetch the boys when you caught me—may the devil take yet—and if it's there long we'll lose it and get the ship owners into trouble most like."

"Give the signal," said the captain. "I have a proposal to make."

"Stand behind that pillar, then," then," said Willie. "If the boys was to come up suddenly and see us like this they might think as I played them false, and drop us both without so much as 'did' or 'didn't ye?'"

The captain concealed himself behind the pillar and Willie gave forth that screech which Jem and the captain had mistaken for the owls.

In three minutes dusky shadows came thronging from all parts of the chapel and in five minutes about a score of strong, stalwart men were pressing round Willie, eagerly asking questions.

The captain knew that Willie was communicating his recent startling experiences, and smiled to himself as he realized what consternation the intelligence of their secret having been discovered would produce.

Presently Willie came up to where he was hidden and said:

"Come out, captain; but, I warn you, speak them fair, for they're mighty desperate and ready for anything."

"I am not afraid," said the captain, but, nevertheless, as he stepped forward he held his revolver tightly, and was quite prepared to act manfully if his reception was too warm.

There was a buzz and murmur, threatening and emphatic, as his well-known figure came within the gleam of light from the lantern.

But some one from their midst stopped the noise from growing more distinct by a warning "Hush!"

Then this same one came forward and the captain recognized the dapper figure of Job.

"Well, captain," he said, speaking in a low, clear tone, and without a particle of fear, "you've spotted our little game, it seems, and for us at a most orkard moment. What be you going to do?"

The captain looked hard at the man.

"I have seen you before," he said.

"Most like," said Job, calmly.

"I saw you the other night," said the captain, "and in this disguise."

"You did," said Job, "and I saw you."

It was an anxious moment for the captain.

How much had the man seen?

There was a queer twinkle in his light gray eyes. Had they seen the whole of that secret drawer business?

The captain endeavored to discover by a question.

"If I had been a moment sooner I should have caught you," he said. "As it was, you took me by surprise. However, I have you to-night, all of you. Ay, you need not look so fierce, my boys; I have you all, and you know it. I can name you one by one, from Job there to Tommy Lawn. Keep back. There are six barrels here, and all loaded. If you think to frighten me, you are much mistaken. You are also self-deceived if you imagine that I shall consent to be catechised as to my intentions."

"Come, come," said Job, "don't be unreasonable, captain. We're twenty and more to one. What's to prevent us from giving you an inch of lead and sending you across the main in the ship that's at anchor yonder? Many a man has been put away quietly and none the wiser."

"I'll tell you," he said, "because you all know the difference between murder and smuggling, and because there's no necessity to kill a man who means you no harm."

"No harm," said Job, coolly. "They're fine words, captain, but what do they mean? Give us your word as a gentleman that you won't split."

"I will do more," said the captain, slowly and with quiet deliberation. "I will join you."

The men looked at each other half incredulously.

Job alone remained, with his hand on his hip, calm and unmoved.

"You will join us?" he said. "On your honor?"

"As a gentleman," said Captain Howard Murpoint, with fine irony. "If you want to feel secure, show me how I can be a gainer by the enterprise, and you may feel perfectly certain that I shall remain faithful. If you mean to test me, you can do so at once."

"How?" asked Job.

"You say," returned the captain, "that a cargo waits running home. I'll help you to clear it. I shall have become an accomplice, a participator in the offense, and what peril you run I shall share in."

"True," said Job. "You're right, captain. You've got brains."

Job, instantly changing his manner from a calm to a half-excited eagerness, said:

"Get down, boys, to the beach; the boats and nets are ready. Captain, you come with me. Willie, take charge of the boats."

The men were lost in the darkness almost instantaneously, Willie, as he went, tossing the ghostly disguise to Job, as he ran off.

"Where to?" asked the captain, quietly.

"By the secret way," said Job, "if you've pluck enough."

The captain smiled.

"Question that when you see cause, my man," he said. "Until then give me credit for some courage, remembering that I have made my own terms with you, twenty to one."

"Right," said Job. "I didn't mean to offend. Put one o' those white cloaks on, and rub the sulphur over your face. There'll be two White Nuns to-night in Mildmay Park!"

Job made his way, with the captain at his side, to the center of the chapel, the sulphur on both their faces gleaming ghastly and horrible in the darkness.

In the center stood a tomb with the half-moldered effigy of a knight lying full length.

Job sprung upon that and motioned the captain to imitate his example.

"Now," said Job, in a whisper, "stand on tiptoe till you feel the wire."

The captain did so.

"Got it? Pull it down and climb."

The captain, without hesitation, did as he was commanded, and as his feet left the tomb felt the wire drawn up.

Slowly and carefully, for it was a perilous undertaking, he ascended, helped thereto by the knots and projections which had been made in the slender rope.

When he had reached what seemed to him a terrific height, he heard Job's voice below.

"Hold tight, and when your feet touch, give way."

Then the rope, moved by some agency over which Job had control below, commenced to swing to and fro, and the captain, with one leg extended, felt his feet touch the narrow ledge.

Presently he heard Job beside him, and the man's cool, audacious grin in his ears.

"It beant a lady's staircase, be it?" she said; "but it answers the purpose," and cuts off the communication. Now follow me, steady, and remember that a false step is death."

At last, by the glimmer of the lantern which Job had now unmasked, the captain saw among the ivy a small door.

"Here we go in," said Job. "Stand back a bit; it opens outward."

"But," said the captain, now driven to desperation, "it is impossible. A step back is death."

"Cling to the ivy, then, and don't look down," retorted Job, coolly.

The captain took the advice, and Job opened the door.

With a spring, the captain landed beyond the threshold beside Job, and wiped the cold sweat from his brow.

Job grinned.

"A hard bit, beant it? But it's nothing when you are used to it. I've done it, off and on, three times a week for the last three years. Now see: In front of ye is the master's study. This old door, by a whim of his, was left behind the bookcase; the bookcase opens out to it, and it was through that, ye see, we came t'other night. Look'ee here."

He touched a spring as he spoke, and passed through the opening bookcase into the study.

The change of scene from the dark horror of the narrow ledge and its abyss below to the dust-covered room with its modern furniture was striking and extraordinary.

"Now step carefully," said Job.

The captain, who had practiced that manoeuver, obeyed, and the two men cleared as narrow a strip of dust as possible.

"That will be all right when we come back," said Job.

As he spoke he diverted the captain's attention for a moment, and in that moment touched the spring of the opposite bookcase.

The bookcase drew back and a gust of air, damp and chilly, rose from the aperture.

It was that chilly, moist atmosphere which the captain had noticed when the ghost disappeared.

"Subterranean," he said.

"Ay," said Job.

He threw the light down the dark, deep hole.

"A rope ladder," said the captain.

"Ay," said Job. "Get down."

Job closed the door carefully, and stepped on to the ladder, following close upon the captain.

"Careful!" he warned. "Some of the steps be gone."

The warning was not unheeded, for as he spoke the captain's feet slipped through one of the missing links, and the ladder swayed to and fro.

After a silent descent for some moments he felt his feet touch the ground once more. He waited until Job came with the light, and then saw that he was standing in a small apartment cut out of the solid rock, and with only two means of egress apparent—the one by the ladder down which he had descended, and the other by a round hole just large enough to admit the body of a full-grown man.

(To be continued.)

ON THE FARM

Cereals.

Seed Grain.—Early attention should be given to the seed grain which is to be sown next spring. If no special fields for seed purposes were grown last summer, next season's requirements may be met by very careful recleaning of the main crop harvested last autumn. One can never afford to sow weed seeds, and one can seldom afford to sow grain more or less mixed with other types. The fanning mill should furnish plump seed free from weeds. If other grains are present, such as oats in wheat, or barley in oats, it will be necessary, and quite worth while, to hand-pick two or three bushels during the winter so as to have a field of an acre or two to furnish pure seed for the following year. Hand-picking may appear too laborious to any one who has not tried it, but by devoting to it an hour or two at a time a great deal can be accomplished in the course of a few weeks and without undue strain on the eyes.

If there is any doubt about the vitality of the seed, a test should be made before the winter is very far advanced.

While the laboratories of the Dominion Government are always available for farmers who desire to have an official report on their grain, any one can make a test for himself without delay by placing about two hundred seeds between layers of blotting paper or cloth, and keeping them damp for a few days. An ordinary dinner plate is very handy for this purpose, with another plate set on it in reversed position.

The grain after being moistened must not be allowed to become dry, and must not be exposed to frost. After about six days the sprouts from the seed of strongest vitality will be sufficiently developed. Seeds which take an unusually long time to sprout generally give weak plants. If less than about ninety per cent of the seed produces strong sprouts, it will be necessary to sow such an increased quantity as will bring the strongly vital kernels up to the usual number per acre.

Change of Seed.—The best advice in regard to change of seed is this—Change only when you are sure you are getting something superior to your old stock. The new grain should be true to variety, and free from weed seeds. A very great danger in obtaining seed from a long distance is that it may contain new and dangerous weeds.

If you have reason to believe that the returns from your fields are less than they should be, considering the character and fertility of the soil and the time given to its preparation, it might be advisable to test some new variety of grain from the list of varieties recommended for your district. For the first season the new sort should be sown beside the old, and a careful comparison made of their relative merits.

Purchase of Seed.—If new seed is to be purchased, inquiries should be made early in the winter from those who have grain for sale. No large purchase of seed should be decided upon without first seeing a sample and obtaining a statement as to its germination, and as to the quantity of other grains present. To intending purchasers of seed grain the Dominion Cerealist will be glad to furnish information as to possible sources of supply of the varieties they desire. Farmers who have seed grain for sale are requested to communicate with us.

Free Distribution of Samples.—A free distribution of samples of seed grain will be made from this Farm for the season of 1917. Farmers who desire to test some other variety than those they are already familiar with may obtain a free sample in this way. The quantity of seed supplied is 6 pounds in the case of wheat, barley and peas and four pounds in the case of oats. Only one sample of grain will be sent to each farm. For an application form, write to the Dominion Cerealist at Ottawa. No postage is required.—C. E. Saunders, Dominion Cerealist, Ottawa.

Adding Fibre to the Soil.

Everyone who has had experience in breaking up new land has noticed how soon the rich black mould disappears after the soil has been brought under cultivation. The reason for this is that the vegetable matter in such soil has been reduced to humus of a very unstable condition. It is readily attacked by bacteria and broken down so that soon not a trace of it is to be found. The exclusive growing of grain crops, so general on new land and by which but little vegetable matter is returned to the soil, hastens this process of depletion. The process is also most rapid in soils that are naturally rich in lime, a this neutralizes the acids formed by the decay of humus and provides ideal working conditions for the organisms that break down organic matter.

In restoring humus to the soil by the growing of legumes, the plowing down of green crops and the application of manure, vegetable matter of a more fibrous nature than that which is found on the forest floor, is added. This is not readily reduced to humus. It contains considerable cellulose or woody matter, which offers considerable resistance to the attacks of the bacteria of decay. This fibrous matter, when added to the soil, provides a store of vegetable matter, which is broken down into humus and finally into available plant food very gradually. Vegetable matter from this origin does not disappear from the soil as rapidly as the humus found in newly cleared land. Permanent productivity in soil demands a supply of this fibrous material.

Fire Pail Protection.

Useful articles to have on the farm are buckets of water properly distributed around the barn. Fire buckets, with rounded bottoms, which, on account of their shape are inconvenient for general use, can be placed in a round hole cut in a shelf or bench; they should be covered and inspected regularly to assure their being kept full. To prevent freezing two pounds of fused calcium chloride per pail may be used. The buckets should be painted red as this that they will be more conspicuous, a constant reminder of the danger of fire.

Some women are as flighty as some men are cranky.

Rubber Supply Steady While Leather Gets Scarcer

This Explains Low Price of Rubber Footwear in Spite of Increase in Cost of Chemicals, Fabrics and Labor.

The war is using up enormous quantities, both of leather and rubber. At the same time it is seriously restricting the output of the former, much of which came from Russia—while rubber production keeps pace with the demand. From the great plantations now reaching maturity in Britain's tropical Dominions will come this year 150,000 tons of raw rubber—75% of the world's production, and an increase of over 40,000 tons over last year.

Thus, thanks to the British Government's foresight in encouraging these plantations, the Allied armies have been abundantly supplied with all the rubber products they need—Germany and her allies have been cut off—and the price to the world at large has actually been reduced. Meanwhile leather has been getting scarcer and more expensive—80% higher than in 1914—and the end is not yet.

At normal prices a pair of good shoes cost about four times as much as a pair of rubbers—and would last twice as long if rubbers or overshoes were worn to protect them. Or a pair of heavy rubbers for the farm cost much less than heavy shoes, and would stand much more wear in bad weather. So even before the war rubbers were a mighty good investment, to say nothing of their prevention of wet feet, colds and doctors' bills.

Now, when leather costs so much more in proportion, the saving from wearing rubber footwear is so outstanding that no one who believes in thrift will think of doing without rubbers, overshoes, rubber boots, or whatever kind of rubber footwear best suits his needs. Nor will he who is anxious to help win the war, fee by wearing rubber he conserves the leather that is so scarce, yet so absolutely necessary to the soldiers.

Wear Rubbers and Save Leather for our Fighting Men!

17

The Gift That Gets A Smile—

because it guarantees unequalled service—from Christmas to Christmas—over and over again—is

The Gillette Safety Razor

It's the "safest" gift you can select, for every man shaves, and knows that in the Gillette you are giving him the best equipment that money can buy. His appreciation will be SURE and LASTING.

Christmas Gillette displays will be in the windows of all the hustling Gillette dealers—Drug, Jewelry, Hardware and General Stores—everywhere—in a dozen styles or more—priced from $5 to $25.

Office and Factory—GILLETTE BUILDING, MONTREAL.

THREE VITAL QUESTIONS
Are you full of energy, vital force, and general good health? Do you know that good digestion is the foundation of good health? Pains and depression in stomach and chest after eating, constipation, headache, dizziness, are symptoms of indigestion. Mother Seigel's Syrup, the great herbal remedy and tonic, will cure you.

AFTER MEALS TAKE MOTHER SEIGEL'S SYRUP. AND BANISH STOMACH TROUBLES

At all Druggists, or direct on receipt of price, 50c. and $1.00. The large bottle contains three times as much as the smaller. A. J. WHITE & Co. LIMITED, Cedar Street West, Montreal.

Men Wanted for the Navy

The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy

Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.

PAY $1.10 per day and upwards. Free Kit. Separation allowance, $20.00 monthly.

Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

"Faulty Nutrition and Elimination"—these are the cause of the most of the ailments that afflict human beings. Too much indigestible food and lack of power to throw off the poisons that come from indigestion—these lead to a long line of distressing disorders. Avoid them by eating **Shredded Wheat Biscuit**—a simple, elemental food that contains all the body-building material in the whole wheat grain, including the bran coat which keeps the intestinal tract healthy and clean. Delicious for any meal in combination with sliced peaches or other fruits.

Made in Canada

SHALL WE HAVE PEACE SOON?

By Chas M. Illee. Denver, Colo.

We have in the United States what is called a "peace league," which has been putting forth every possible effort to stop the great war which is not only beggaring Europe, but is fast draining the world's resources into its insatiable maw.

Recently the German Chancellor, von B. Hollweg, made a speech in the Reichstag, cautiously, but encouragingly, approving the general principle of the league to enforce peace. It had already been approved, with caution, by Sir Edward Grey, but more thoroughly, by Lord Bryce.

We have reason, therefore, to congratulate ourselves upon the reception accorded to the proposal by the two chief combatants in the present struggle.

We need not inquire into the motives that may have actuated this favorable consideration. It is sufficient to know they have done so and have gone on record to that effect.

That these great diplomatists see in each other grounds for distrust for the motives of the other, is only natural. The atmosphere of enmity, and we may say, suspicion, hangs too heavily over Europe to permit of unprejudiced approach to the ultimate issue of peace; but there is this to hearten all who hope for a happier solution of the problem, that in both London and Berlin the outcome of the war is now being discussed in world terms instead of terms of purely national or racial interest.

This of itself is a notable mark of progress towards a more rational point of view, for it implies the relinquishment of Germany's "world power" foolishness. When peace is considered in the light of the world's welfare, rather than as an opportunity for extending frontiers, there is ground for hope that sanity is beginning to assert itself.

Germany, we all know, has been exasperatingly slow in coming to this, nor does she now assume it with such indications of whole-heartedness as might be wished; but that she has come to it at all is certainly very encouraging, as it shows that neutral opinion is having its effect.

Chastened and "cuffed" for her high ambitions with which she boldly threw down the gauntlet to Europe in the start, she is now ready to listen to wisdom.

But it should not be assumed that because of the utterances of these two leading men, that the war is to cease. Both sides are convinced that the war must be waged to the bitter end, the Entente powers expect victory, and are preparing to join with the neutral world in preserving peace for the future, at all hazards; while the Central Powers, still professing a hope of victory, are preparing to join with the neutral world in preserving peace against what they deem British aggressions. Each side regards the other as a menace that must be suppressed, and, of course, as long as that feeling exists, the war will continue until one or the other is conquered.

It is extremely important that the powers on both sides have been brought to recognize the justice of the neutral proposals, and have relinquished the ambition of extending their borders.

HOUSES FOR SOLDIERS.

What the C.P.R. Is Doing for Returned Heroes.

The houses which the C.P.R. is building in the west for the returned soldiers will cost them about $1,000 each, with out-offices. They will consist of four rooms each—two bedrooms, dining room and kitchen. Each farm will consist of 160 acres and there will be 80 additional acres which may be availed of in the course of time, and as the settler concludes that he can work it. The C.P.R. has several designs for homes which will be submitted to the intending settlers. These offer a variety of design to suit different tastes and different pockets, it may be said. The settler can choosee a house which will cost him $2,000 but the payments will be made exceedingly easy. In all there are probably 8,000,000 acres of land held by speculators in the West; but, apart from that, there are literally hundreds of millions of acres of cultivable land lying idle over the West—not close to the tracks, of course, but good land which many have longed for so ardently that they have sat on the steps of the land office all night to be the first in the morning to get their application in. The C.P.R. is going on on its own account with the colony homes; but it expects that the Government will shortly outline a plan of a comprehensive nature which can be generally applied to the situation.

THE ONLY WAY TO CURE RHEUMATISM

Must Be Treated Through the Blood and the Poisonous Acid Driven Out.

The twinges and tortures of rheumatism are not due to cold, damp weather as so many people suppose. Rheumatism comes from poisonous acid in the blood. This is a medical truth that every rheumatic sufferer should realize. There is only one way to cure rheumatism—it must be treated through the blood. All the liniments and rubbing and so-called electric treatment in the world will not cure rheumatism, and the sufferer who tries them is not only wasting money, but is allowing the trouble to become more firmly rooted in the system and harder to cure when the proper remedy is tried. Dr. Williams Pink Pills have had remarkable success in curing rheumatism because they go right to the root of the trouble in the blood, driving out the poisonous acid, releasing the stiffened joints, clearing away the torturing pains, and giving the victim renewed health and ease. Mr. Vincent Brow, Havre Boucher, N. S., says: "For two years I was an almost constant sufferer from rheumatism, the trouble being so bad at times that I could scarcely get about. The trouble seemed to bring with it anaemia, and altogether I was in a very bad condition. I used doctor's medicine for almost a year without relief. Then on the advice of a friend I decided to try Dr. Williams Pink Pills. I think I took altogether about a dozen boxes, with the result that I am again enjoying perfect health."

You can get these pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

FORCE KAISER TO ASK PEACE.

Big German Business Interests to Force Issue, Say Financiers.

That the Kaiser will be forced to seek peace in 1917 is the opinion expressed in well-posted French circles, writes a Paris correspondent. By next summer the Entente allies will have reached the summit of their offensive capacity, and Britain will have blossomed to her full strength in men, guns, shells, and all the appurtenances of war. Germany attaches great importance to the threatened loss of the Balkans, and is doing her utmost to avert it. Another year of the war can bring Germany nothing more than a more or less successful resistance, with nothing ahead but a war of patience, with the scales heavily weighted against her because of the sea blockade. The opinion is expressed in high financial circles that the big business interests of Germany would no longer tolerate such a situation, and an irresistible movement would be launched against allowing the military party to attempt to resist the process of military and economical exhaustion.

The allied Somme offensive will continue through the winter, pinning to Picardy as many German reserve divisions as possible, and seeking to deprive Hindenburg of the offensive on any other front. Even should Germany be able to send enough men to the west to man efficiently the whole line from the sea to Switzerland, she will be forced to a big retreat from the huge Noyon salient once the allies armies seriously menace St. Quentin and Cambrai, and they are heading that way now, and going strong.

Mr. Isaac Ward, well known at kept far from the door.

The cheerful feeling you possess after a drink of something hot and flavory should be only the beginning of your satisfaction.

For this very reason more and more people are turning from tea and coffee to

Instant Postum

A lessened tendency to such annoyances as nervousness and sleeplessness repays them.

A ten-day trial of this delightful flavory hot drink has assisted so many to health and comfort that your friend, the Postum drinker, will tell you it's well worth while.

CHRISTMAS MESSAGE

The Hospital for Sick Children

COLLEGE ST., TORONTO.

Dear Mr. Editor:—

Thanks for the privilege of appealing through your columns on behalf of the Hospital for Sick Children, the great Provincial Charity

Our need of money is measured by the children's need of help, and you can judge how great that need must be when last year 3,046 sick little ones were treated as in-patients, and as will be seen from the 1916 figures, 692 patients were admitted from 242 places outside Toronto.

Last year 271 in-patients were treated for deformities, such as club feet, bow-legs, knock-knees, Pott's disease of the spine, lateral curvature of the spine, dislocations, infantile paralysis, tubercular disease of knee, hip, ankle.

Is the Hospital for Sick Children to take dollars out of your pocket, or is death to take babies out of their cradles? That is the question.

One gift more in the Hospital's treasury means one coffin less in the LITTLE WHITE HEARSE.

The Hospital must be digging up beap for little children from the soil of human kindness or nations will be digging graves for little children in the soil of many a cemetery.

The Hospital for Sick Children can only volunteer its mercy in so far as you friends of little children volunteer your money for service in the Hospital's never-ending battle for the lives of the little ones.

Let your money fight in the trenches of some mother's trouble and rescue some little child from the dugout of pain, disease and death.

Can the Hospital leave children to die because the fathers of those children have left home to enlist for life duty on the British battle line, and can the Hospital help the children of Canada's soldiers with the care unless you help the Hospital with your cash?

You have money enough to help every other war fund without keeping back a dollar from the Hospital's war fund—the fund that helps the Hospital save the lives of little children, including the soldiers' little children.

Do not let the little children pay, in the loss of the Hospital's care, the contribution that should be given and must be given to the war funds.

Your money can send a message of cheer to some father in the trenches—so, send that message from the cot where the Hospital nurses some little child back to life, the child of the father who is fighting your battle in the trenches.

Every dollar kept from the Hospital's power to serve the little children is a weight added to the burdens and a grief added to the sorrows of this war.

You can bear to have your pocket emptied of a little money easier than some mother can bear to have her home emptied of a little child.

Will you send a dollar, or more if you can, to Douglas Davidson, Secretary-Treasurer, or

J. JOHN ROBERTSON,
Chairman of the Board of Trustees

The Middle Name.

Little Robert rushed into the kitchen one day and asked his mother what kind of pie she was making.

"Lemon meringue pie," she answered.

The little fellow disappeared, but presently returned. "Mother," he said, "what did you say is the pie's middle name?"

RHEUMATISM MAKES YOU FEEL OLD

Pains and Aches Yield to Sloan's Liniment, The Family Friend.

When your joints become stiff, your circulation poor, and your suffering makes you irritable, an application of Sloan's Liniment gives you quick relief—kills pain, starts up a good circulation, relieves congestion. It is easier and cleaner to use than mussy plasters or ointments, acts quickly and does not clog the pores. It does not stain the skin.

You don't need to rub—it penetrates.

Certainly fine for rheumatism, stiff neck, sciatica, lame back, toothache, etc.

For sprains, strains, bruises, black and blue spots, Sloan's Liniment reduces the pain and eases the soreness.

Its use is so universal that you'll consider Sloan's Liniment a friend of the whole family. Your druggist sells it in 25c., 50c. and $1.00 bottles.

Sloan's Liniment
KILLS PAIN

SOAP SCARCE IN RUSSIA.

Poor People Will Get Laundry Done at Public Places.

Because the price of soaps and such necessities for washing as starch borax, and the like has increased in Russia beyond the reach of the poor people, it is proposed to establish in Vilna a number of "commercial laundries" for patronage by those who cannot afford to pay dearly for cleanliness. Just how much the local inhabitants have been able to do for themselves, through the agency of 25 "Achiever societies" or institutions of brotherly help, is indicated by the six months' report of the main organization just issued. According to this report, the 25 branch societies in all the portions of Vilna took in during the past half-year just over $15,000 and expended a little more than $16,000 in helping a total of 50,000 persons.

Sore Eyes

Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye free write Murine Eye Remedy Co., Chicago

No Hope.

Doctor—Remember, nurse, you must keep the patients cheerful, and not let them get downhearted.

Nurse—But what can I do, doctor? Six of them have proposed to me already this morning!

I was cured of painful Goitre by MINARD'S LINIMENT.
BAYARD McMULIN.
Chatham, Ont.

I was cured of Inflammation by MINARD'S LINIMENT.

Walsh, Ont.

I was cured of Facial Neuralgia by MINARD'S LINIMENT.
Parkdale, Ont. J. H. BAILEY.

Quite Enough.

"Please, sir," piped the tiny customer, whose head scarcely reached the counter, "father wants some oak varnish."

"How much does your father want, my little man?" inquired the smiling shopman.

"Father says you was to fill this," replied the little fellow, handing over a pint jar.

It was duly filled and handed back. "Father will pay you next Saturday," said the recipient, casually. Then the face of the shopman grew dark.

"We don't give credit here," he said. "Gimme back the jar."

Meekly the small boy handed back the jar, which was emptied and returned with a scowl.

"Thank you, sir," he said. "Father said you'd be sure to leave enough round the sides for him to finish the job he wants to do, and you 'ave, sir."

In the Trenches.

"Do the Germans ever leave anything valuable behind them in the trenches?"

Veteran—"Never a drop, mum!"

Minard's Liniment Cures Colds, &c.

A Frightful Expense.

"My darling," she murmured, "you were so grand, so noble, when you proposed to me that day in the motor-car! Shall I ever forget how touchingly you spoke of your future, of the sacrifices you would make for me? It must have cost you something to speak those words." "It did, Mabel," replied the young man, a shadow creeping over his face. "It cost me about two weeks' salary for that car hire."

Appropriate.

"Chilton is having the interior of his new house decorated with a rather ornate frieze."

"That's appropriate; he made his money in the ice business, you know."

Minard's Liniment Cures Garget in Cows

FIRST USE OF SIEGE GUNS.

Employed by the Turks in Capturing Constantinople.

A campaign surpassing in invention and resource any that went before was that waged by the Turks against Constantinople in 1452-3. Its culmination not only brought the Turk into Europe, but it brought into warfare the use of artillery as a means of reducing fortified cities. Oddly, then as in the present great war, it was German skill in the handling of cannon that aided the Turks.

One Urban, a Wallachian reared in Germany, who had seen service in the armies of Germun, Hungarian, and Greek before he attached himself to the Sultan's forces, devised the cannon that for fifty days battered the walls of the eastern capital of the Roman Empire. On the recommendation of Urban, the Sultan, before he began his campaign against Constantinople, erected a foundry, and in it was cast a gun with a mouth exceeding two and a half feet in diameter and capable of projecting to the distance of about a mile a missile of six hundred pounds in weight. Other guns of a smaller calibre were constructed under the supervision of Urban.

The Folly Of Taking Digestive Pills

A Warning to Dyspeptics.

The habit of taking digestive pills after meals makes chronic dyspeptics of many thousands of men and women because artificial digestants, drugs and medicines have practically no influence upon the excessively acid condition of the stomach contents which is the cause of most forms of indigestion and dyspepsia.

The after dinner pill merely lessens the sensitiveness of the stomach nerves and thus gives a false sense of freedom from pain. If those who are subject to indigestion, gas, flatulence, belching, heartburn, etc., after eating would get about an ounce of pure bisurated magnesia from their druggist and take a teaspoonful in a little water after meals, there would be no further necessity for drugs or medicines because bisurated magnesia instantly neutralizes stomach acidity, stops food fermentation and thus insures normal painless digestion by enabling the stomach to do its work without assistance.

Presence of Mind.

"Oh, John!" shrieked Mrs. Dorkins. "The baby has swallowed a silver piece."

Mr. Dorkins took a handful of change out of his pocket and looked it over.

"Calm yourself, Maria," he said. "It was that counterfeit quarter I've been trying to get rid of."

Minard's Liniment Cures Diphtheria.

History from the Nursery.

Miss Smith, the teacher, was hearing the history class. The pupils seemed unusually dull on that particular occasion, and in vain did the teacher try to get them to give correct answers. At last she looked at the child who was her star pupil.

"Now, Elsie," she said, "Mary followed Edward VI, didn't she?"

"Yes, ma'am," replied the little girl.

"And now, who followed Mary?" asked the teacher, hopefully.

All was silence for a moment, and then Elsie raised her hand.

"Yes, Elsie?" queried the teacher. "Who followed Mary?"

"Her little lamb, teacher," said Elsie triumphantly.

True.

"My boy, remember this."

"What?"

"The young man who comes straight home always comes home straight."

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

London—Do you wear glasses? Are you a victim of eye strain or other eye weaknesses? If so, you will be interested to learn that according to Dr. Jackson there is real hope for most all. He says many may have had their eyes restored through the principle of this wonderful free prescription. Blue Mon says, after trying it: "I was almost blind; could not read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The strongest recommendation I can give is that after using the prescription for a few days everything seemed clear. I can easily read fine print without glasses." It is believed that thousands who wear glasses now discard them in a few weeks time and multitudes more will be able to strengthen their eyes so as to be spared the burden and expense of ever getting glasses. The wonders of many prescriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in ½ a bottle of water and allow to dissolve. With this wash the eyes and use as often as from three to four times daily. You should notice your eyes clear up nearly right away. If inflammation is present you should bathe the eyes two times as directed. Even if your eyes are not bothering you, even a little, take steps to save them now and escape the handicap of poor eyesight later on. Many folks have saved a lot of money and trouble by following this plan. Another prominent physician to whom the above acts as an endorsement said: "Optopto is a very remarkable remedy. In cases that I have seen where it was used as directed, the results have been prompt and satisfactory. In fact, I have never prescribed anything in my practice that has given such universal satisfaction. I feel it my duty to advise my patients to use it." Bon-Opto is sold by druggists everywhere under a guarantee to benefit or refund the money. It is not a secret remedy, as the manufacturers are perfectly willing that you should know its composition. It is believed that thousands of people will now be able to dispense with glasses entirely as a very few preparations have been found to help so many people as Bon-Opto has in so short a time. Even if you do not wear glasses, you will find Bon-Opto helpful to your eyes.

"The Useful Present Is Always the Most Welcome"

H. PFAFF & SON

EDEN GROVE

Have you had a sleigh ride yet? This is real Christmas weather that puts life into a fellow and makes him wish for plum pudding on Christmas, only he hasn't got the dough.

Mrs And Watson and Miss Martha Elphick, from the north-west, were the guests of Mr and Mrs R Alexander at Clearview Farm last week.

Golliee! I wonder what I'll get for Christmas.

Miss Eva Keyes, graduate nurse, left for New York on Monday to resume her duties.

Meet me at the Christmas festival Thursday evening, Emma.

Miss Gertie O'Reilly visited Walkerton friends last week.

The small boy and his handsleigh are having their innings at present.

Mr and Mrs Pearson called on Dunkeld friends on Monday.

The minister who says he can dress and be downstairs in six minutes should enlist in the hook and ladder company.

It's quiet to be so near nomination day.

Single fare on railways Saturday and Monday, returning Tuesday. Fare and one third Dec 26 to 28, returning Dec 29th.

Leave a list of your Christmas visitors at the post office with Aleck, or if you go away. Better to read your name in the paper while alive than after you're dead.

Mr Herb Allen was a visitor with county town friends on Tuesday.

We notice the farmer ladies are just tossing the baskets of eggs out on the counter same as in the good old summer time. If they dropped a basketful now they would be broke, and if we bought a couple of dozen we would be in the same boat.

We notice the G T R has presented "Sunny Jim" with a new cap for Christmas.

Charlie Greenway has been appointed caretaker of the school. Charlie is going to save up and buy a farm with the change.

Mr Jim Alexander, of the Royal Bank staff, and Misses Marjorie, Jean and Irene Hood and Mabel Clancy, of Cargill, called on friends in the Grevson Sunday. Looks like Christmas, Jimmy.

Cheer up, kiddies. Only a few more days and your teacher will be homeward bound for the holidays.

Dressed geese (dead) and turkeys are getting scarce. You want to order your Christmas dinner early.

Some people can never get enough of a good thing. We noticed a man from Cargill driving into town on Saturday with two cutters.

Mrs Seller, sr. who has been spending a few months visiting friends out of town, has returned for the winter.

The shortest days of the year are this week. Still they seem the longest to the kiddies waiting for Santa.

Mr J Cunningham, postmaster at Glamis, was in town on Monday.

Cheer up some friend with a greeting card if nothing else, although this will be said Christmas in many a Canadian home. There will be fewer home re-unions than ever before.

There will be no Epworth League meeting this week, as the festival comes on Thursday.

Here's wishing the brave soldier boys overseas and all the readers of this great family home paper a very joyous Christmas.

PINKERTON

Miss Alma Reid attended an operation for adenoids at Paisley last week.

Miss K Pinkerton returned from Stiegars last week.

Mr and Mrs Wes Caswell and baby arrived here on Saturday from success, Sask. They will spend the winter at the home of her mother, Mrs S Garland.

At a large meeting here on Saturday night the beef ring decided to erect a new slaughter house, and have engaged Mr Wm Reed as butcher.

The last council meeting of this year was held in the hotel here on Friday. It proved to be a lengthy and interesting one, but they eventually voted $100 to the Patriotic Fund.

CANTIRE

Mrs John McDonald has donated a Christmas cake to the Red Cross at Chesley. The tickets are only ten cents and are selling like hot cakes. The holder of the lucky ticket will have the privilege of naming the soldier who is to receive the gift.

Great flocks of pigeons have been flying from here to barn and lately threatened to make it a lean year for Jack Eson's cattle by stripping all the grain off the top of his silo and a surprise one day last week when they were visited by our ain Geordie Stewart who learned to shoot in Bonnie Scotland, as well as foul the game keeper. With the first shot they came down in fours. The game were pronounced to be in fine condition and Geordie has since been living high on pigeon pie.

Inspector McCool paid a visit to the school recently and gives a highly satisfactory report, which shows that the trustees made no mistake in engaging Miss Keith.

Mrs John A McIntyre spent last week at her old home at Arkwright.

Mr and Mrs Archie McAllister of Earl Grey, Sask, are paying a visit at the home of the latter's parents, Mr and Mrs John Johnston.

—Mr J H Watson, Kincardine, is offering to establish a new furniture factory in that town if he is given a loan of $15,000, with exemption from taxes, etc.

Farm for Sale

THE EXECUTORS of the will of Patrick O'Hagan, deceased, offer for sale the west halves of lots 19 and 20, con II, Kildalton, 100 acres. This is a desirable grain farm situate about three miles from Paisley. For particulars apply to PATRICK O'HAGAN, Executor, Chepstow, or D. FORRESTER, Barrister, Paisley.

SHORT COURSES

In Agriculture and Domestic Science

AT UNDERWOOD

Jan. 9th to Feb. 2nd
Jan. 22nd to Feb. 2nd

Agricultural Course—Jan. 9th to Feb. 2nd — Subjects: Stock Judging, Feeding and Breeding; Soils and Fertilizers; Poultry; Dairying, Seed Testing; Cement Construction, etc., etc. Some of the best authorities in Ontario have been secured as special lecturers on certain days. Diamonds for Grand Opera Stars

BASE metal is not the setting for the golden voice of a great singer. So—in the new Edison Diamond Amberola the Reproducing Point is a Diamond.

This gem is a permanent part of the instrument—doing away with metal needles that must be changed with every record. With

The NEW EDISON DIAMOND AMBEROLA

the liquid, melting, thrilling tones of the glorious grand opera voices come to you in all their ravishing richness and clarity.

To hear Anna Case and Thomas Middleton—Alice Verlet and Arthur Middleton—Christine Miller and Albert Spalding—is a treat indeed—and they are heard at their best with the New Edison Diamond Amberola.

It has the diamond re-producing point, unbreakable and long playing records, superior motors and construction, concealed horns, and the cabinets are made in true Period styles, in perfect harmony with the finest furniture.

Remember, you have a standing invitation to call and let us play for you any Record, or any number of Records, that you care to hear.

PETER McKINNON, PAISLEY, Ont.

—Sixteen Walkerton boys and men between the ages of 15 and 35, enlisted for the navy this month.

—Three Kinloss Tp. men were convicted of being drunk in a public place and fined $10 each and costs.

The People's Popular Store

Nineteen-Seventeen

¶ Under the conditions existing in the world at the present time it is not to be expected that many homes will have a Happy New Year, but in this part of the British Empire the ensuing year will be a prosperous one, as in addition to the half-million soldiers being sent overseas, the primary needs of the hour in Britain are more food and more munitions, and when the shadows of this terrible war are lifted a New Canada will be born of its sacrifices and services. It is, therefore, up to everyone to assist in some way to Britain's needs, and it is up to this store, as a distributing point to the wants of the people in the surrounding country, that they get a proper selection of goods at as reasonable prices as possible.

¶ Months ago we anticipated that there was bound to be a scarcity in many lines of goods and the possibility of the war continuing for a long time and the desire of speculators to corner the markets and horde up goods, made it absolutely necessary to place orders far in advance of actual requirements in order to keep our prices within the reach of all. We are therefore offering you a very fine selection at very much below market prices to-day.

¶ It is, therefore, absolutely necessary that all accounts up to the end of 1916 be paid in cash or note before the 15th of January. One of the big resolutions you should make for the New Year is to start with a perfectly clean sheet.

Deserved Recognition

At the Methodist S S entertainment on Friday evening (at which a splendid programme was rendered) Mr H B Putnam was made the recipient of a handsome gift in the form of a large easy chair, as a slight tangible recognition of his services in the position of superintendent of the Sunday School, which he has filled most efficiently and acceptably for 35 consecutive years.

Death of an old Resident

Miss Hester McNeill, who died on Saturday morning after an illness of only a few days, was an old resident of Elderslie. She was born in Prince Edward Island and came to Ontario when she was a young woman, living at Goderich a short time before coming to Elderslie about 1854. For ten years past she has lived on Cambridge st. with her nephew, Mr John Munn. The funeral took place on Sunday afternoon to Rusk's cemetery, the services being conducted by Rev M Neilson.

DIED

McNEIL—At Paisley, on Dec. 23rd, Hester McNeil, aged 69 years.

MORRAN—At Tara, on Dec. 16th, Ellen Morran, widow of the late Thos Morran aged 84 years, 3 weeks and 2 days.

THE ADVOCATE will be a most welcome gift to absent ones of your family, whether in Canada or away to the fighting front in France.

—We are again obliged to hold over some news and correspondence for next issue.

—Mr Jas. Munro is here from the west at the home of his parents, Elora road south.

—Mr Al Giles, of Munson, Alta, is visiting his old friends on the Elora road north.

—The Women's Patriotic League will meet in Putnam's Hall, on Friday, Dec 29, at 3 o'clock p.m.

—Archie McClure, of Detroit, is here on a two weeks' visit at the home of his aunt, Mrs Jas Beaton.

—Mrs Bain and grandson Glen Sinclair have gone to Toronto, where they will remain for the winter.

—Mr Ernest Bryce is down from Manitou, Alta. on a visit at the home of his parents, Mr and Mrs Thos Bryce, Paisley.

—Pte John McGillivary of Vancouver, B. C., formerly of the 16th of Bruce, spent Xmas at Mrs D. McGillivary's, 12th of Bruce.

—The Church of Ascension Sunday School had their annual sleighride, supper and entertainment on Tuesday afternoon and evening.

—Mrs Wm Scouton (nee Miss Nancy Mahon) from Inkster, N D., is here on a visit at the home of her sister, Mrs Wm Walker. It is 25 years since Mrs Scouton's previous visit.

—Mr John Ewing of Reaklue, Alta, is down on a visit among his relatives and old friends in this locality. He is a brother of Mr. Alex Ewing, Flora road north, and a brother-in-law of Mr. A. D. McKay of Elderslie.

—Mr Geo A Thompson, son of an ex-reeve of Elderslie, arrived home this week on a two months' visit. It is seventeen years since this enterprising young man left here, and is that time he has seen a great part of the western provinces. He has a big threshing and plowing outfit of 130 horse-power, with which he does a lot of work for farmers in the Bassano section of Alberta.

Red Cross Lunch and Sale

On Saturday afternoon and evening, Dec 30th, the ladies of the Flora road south will open a lunch room in the town hall, also hold a sale of produce and baking. Come in and make a purchase, also stay for lunch. Reserve what orders you can for the Red Cross sale.

Knocked out by Bursting Shell

Serg't Neil MacGillivary writes concerning the wound he received Nov. 25 "A mine had been sprung in the German lines and our boys were building the crater. In the counter attack the Germans strafed our support with their trench mortars. I had taken the platoon into a sap for protection. A shell burst over the entrance and as I was next to it and the sap being a bit too crowded, the force of the explosion spent itself on my head. It stunned me, but my steel helmet once more saved my head from a worse wound. The Corporal next me was slightly wounded but the other boys were alright. Expect to a few days to be sent back to the base and from there to rejoin the battalion. The scalp wound is healing nicely, so it was not very severe.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XVII.—(Cont'd).

"We are now just under the house, captain," said Job, turning the lantern. "Up above us they be comfortably asleep in their beds—rum, beau't it?"

With the lantern suspended to his neck, he commenced crawling through the hole and the captain, whose courage was pretty severely tested, followed.

Dark and dank, the way seemed interminable.

At last the roof gradually widened. The men raised their heads and so eased their rigid necks; and presently Job stood upright and threw the light upon a large cavern.

Their way lay now over the natural bed of a series of caverns, and as they proceeded the boom of the sea came plainly to their ears.

At last a gust of exquisite, fresh, briny air blew upon them, and Job, as he masked the lantern said:

"We're close upon the open sea. Give us your hand, captain."

So guided, the captain passed over the slippery rocks, and presently heard Job's feet plash into the water.

Here Job paused and said:

"I'll let you into another secret, captain. From here there is another outlet, and a more comfortable one. We can't use it, not we rough men, because it's too near the house; but you can, because if you're found near the entrance, why, there'll be no questions asked."

"I see," said the captain. "I can say that I am taking a midnight stroll and a cigar."

"Will you have one?" asked Job, taking a bundle of cigars from a hole in the cave. "They're choice, they are; you can't buy 'em under five pounds a pound," and he paused.

"My share of the booty at present," said the captain. "I will light it when we get outside."

Job went to a corner and scraped some chalk from a small hole. He then inserted his hand in the hole and pulled out an iron rod like a bullpull.

This opened a small door a few feet further along the chalk road, and Job nodded to it.

"Here you are, captain. It's a better road than the other; not so back-breaking. You'll want a light," and he held out the lantern.

"Thanks," said the captain.

He took the lantern, trimmed it, and passed into the passage.

"Good-night," he said; "you may shut the door."

The door slammed to swiftly, cutting off the sound of the men's voices, and the captain proceeded on his weird and ghostly way.

Before the door was a large round bush, which effectually concealed it from observation.

Pushing the bush aside with some difficulty the captain looked out and saw that he was in a portion of the disused garden nearest the house.

With a thrill of delight he extinguished the flickering flame in the lantern and pushed his way through the bush, taking care to replace the disturbed branches.

Then he lit his cigar, and with his hands in his pockets, sauntered on, preoccupied, and was somewhat startled by a footstep and a sudden sensation of some one's hands at his throat.

Before he could realize the situation he was on his back.

With an exclamation deep and low, he threw up his arms and struggled with his assailant.

In a moment he had regained his feet and there the advantage was lost again, for the assailant pinned him to the wall of the house, and in a stern voice inquired:

"Who are you, fellow?"

"What!" exclaimed the captain, as the familiar tones smote his ear, "what! Leicester Dodson!"

"Captain Howard Murpoint!" exclaimed Leicester, for it was he, dropping his grasp from the captain's arm and staring in the dim light.

The captain shook himself and glared with an evil hatred at the stalwart figure.

"You are late, Mr. Dodson, and pugilistic."

"You are late," said Leicester, utterly ignoring the latter part of the speech, and speaking in a stern and suspicious tone. "You are out late, and if there is any excuse for my attack, that, and the fact of a man's figure prowling round the house at such an unwonted hour must supply it."

"Prowling!" exclaimed the captain. "Prowling is a strong term to apply to the stroll a gentleman may take at any hour in the grounds of the house at which he is a guest. It is not so strange or unwarrantable a term to apply to the uninvited and unwelcome presence of a comparative stranger."

There was reason in the retort, but Leicester disregarded it or willfully misunderstood it.

"I saw you come from behind that bush," he said, pointing to the bush which concealed the door and in vain striving to get a clear idea of the expression on the captain's face.

"Not that, but another," said the captain readily, "I had been to light a cigar, the wind preventing it here in the open. I cannot recognize your right to put these questions, and I cannot understand your ground for doing so. May I ask, and I ask as the friend of Mrs. Mildmay and as John Mildmay's friend, what business brought you here so late; here in the private grounds of the park, and so close to the house?"

Leicester remained silent for a moment.

"It is a fair question," he said, at last, "and I will answer it. You cannot be ignorant that an interest attaches to these premises," and he glanced at the ruins. "There is something there to excite the curious. I may have come to see the ghost."

The captain smiled grimly.

"Have you seen it?" he asked.

"I have," said Leicester.

The captain was almost guilty of a start.

"You are more fortunate than I," he said. "I have not seen it. It is true that I have been walking on the wrong side of the house. I am particularly the unfortunate party, for if I am not mistaken, your fingers have left their marks on my arms and chest."

"I am very sorry," said Leicester. "I beg you will impute all you have suffered to my excess of zeal for the protection of Mrs. Mildmay's property. To be candid, I took you for a burglar."

"Burglars do not go about their work with a cigar," said the captain, quietly.

"Or worse," said Leicester. "Either a burglar or one of the villians who for some purpose of their own are playing the ghost trick."

Thee captain smiled, and eyed Leicester keenly.

"You think then," he said, "that the ghost is a trick of some of the village boys?"

"Or villians," said Leicester. "I am sure there is some trickery at the bottom of it, and I cannot conceive a man playing it for so long without an end in view. However, this is not the time for a ventulation of the subject. I am sorry I made the mistake, and I apologize."

The captain bowed.

CHAPTER XVIII.

Leicester had spoken the truth when he had said, in answer to the captain's inquiry, that he had been out to see the ghost.

But he had another object.

Since the morning when he had come upon the captain seated in the ruined chapel he could not rid himself of the suspicion that the captain was implicated in the eavesdropping of his servant Jem, and that the astute and plausible master was the prime mover and director of some plot, while Jem was only the machine or tool.

Thereupon, not being able to sleep, party from his unhappiness concerning Violet, and his disquietude born of his suspicion, he had sauntered out and made his way to the park.

While there he had caught a glimpse of the ghost flittering past the ruins.

He was about to pursue it when he saw the captain emerging from behind the bush.

Instantly suspecting that it was one of the gang, he bore down upon him, as we have seen.

And now he told himself he was as far from the truth as ever.

Like the captain he sank into a chair and gave himself up to thought, with this result:

"Why should I waste time and energy on a futile object? It is like a horse turning a mill to grind wind! Violet Mildmay will marry Lord Fritz, the intellectual and the talented! She has made up her mind to marry a coronet," he murmured, bitterly, "and she would not marry Leicester Dodson, the tallow-maker's son, if he remained hanging at her apron strings until doomsday. As for Captain Howard Murpoint, he may be an honest man and he may not. I was not born to solve the problem or to bring him to justice. Let the world wag on its way; as for me, I will arise, shake off this infatuation, for it is nothing better, and seek fresh fields and pastures new. I shall have something to do in Africa, and I shall forget her."

He took from the drawers a quantity of necessary articles of clothing and packed them in the portmanteau. When it was filled he locked it and attached a label addressed, "To be taken in the yacht to the Isle of Man, where the skipper will put in until I come."

"I'll go overland," he muttered, "to cut the journey short, and they hall pick me up there."

Then he carried the portmanteau into his dressing-room and placed it where his valet could see it.

The man was used to acting on such curt and sudden instructions, and would convey the portmanteau, with its terse command, to the skipper of the yacht the first thing in the morning.

Having made his arrangements so far, Leicester slowly undressed and got to bed.

"I must wake early," he thought. "Bertie is going to-morrow, and must know of my intended flight or he would feel hurt."

But the morning came and he was sound asleep when Bertie knocked at the door.

"I'm going, old fellow," he called, through the key-hole. "Don't get out of bed. Good-by; I shall be back in a couple of days."

"Good-by," said Leicester, drowsily, half asleep and half awake, and Bertie was gone.

Could either have foreseen even for twenty hours how different would have been the parting of the friends.

When he came into the breakfast-room he found his mother, fond and thoughtful ever, waiting at the table to see that he had his breakfast comfortably.

"Has Bertie gone?"

"Yes," said Mrs. Dodson, with a little laugh. "He and your father went off together; and I was almost glad to get rid of them, for Mr. Fairfax fidgeted dreadfully."

After breakfast, Leicester, who felt anything but cheerful and high-spirited, strolled out to the cliff.

He looked down at the sea and missed the yacht from the harbor directly.

"Sailed," he thought. "All the better. I will wait until Bert comes back, and then hurrah for Afric's golden sands."

He might say 'hurrah!" but he did not feel very jubilant.

With a not altogether unaccountable heaviness he sauntered down to the village.

All was going on as usual, and as he passed the "Blue Lion," he saw the usual little knot of idlers collected at the bar.

Among the voices he could distinguish that of Jem Starling's raised in turbulent tones.

Then he passed down the street to the beach.

The fishermen were busy with their nets, and old Job, the carrier, stood with pipe in mouth, looking on.

(To be continued).

PRAYERS FOR WARRIORS.

Londoners were surprised to observe walls all over the city covered recently with huge official posters exhorting Englishmen to pray daily for their country, for its soldiers and sailors.

Admiral Beatty's words are displayed prominently: "Until a religious revival takes place at home, so long will the war continue."

They are followed by General Sir William Robertson's message: "A serious determination on the part of the nation to seek Divine help would undoubtedly furnish valuable help to our soldiers and sailors."

The poster ends with the following words, printed in large type: "Will you join those who every day at noon, and at family prayers at home, pray for our country, our sailors and soldiers?"

Use Rubber To Save Leather —It Is Needed In The War!

Rubber Supply Is Ample— Leather Is Scarce and Very High

Leather is being worn out faster today than ever before in the history of the world, while production is considerably less than a few years ago. While the consequent shortage is keenly felt by the civilian who has to pay half as much again for his own and his family's shoes, it is even more serious for the Government, which must supply hundreds of thousands of soldiers.

Rubber, too, is being used in enormous quantities on account of the war—one British manufacturer, for instance, is working on a rubber boot order for the army which will take 14,000,000 pounds of rubber, fabric and chemicals. But the supply, thanks to the great rubber plantations in Britain's tropical Dominions, is easily keeping up with the demands, and raw rubber, despite a war tax of 7½%, is actually cheaper today than before the war. So, though the fabric and chemicals used cost nearly double, rubber footwear has not gone up very much in price.

These conditions naturally are leading thoughtful, thrifty, patriotic Canadians to save leather just as much as possible by wearing rubbers, overshoes, high rubber boots and heavy farm rubbers. In addition to the very substantial saving in cost, rubber footwear has decided advantages for wet or cold weather around the farm or in the woods. The men like its warm, dry comfort under all conditions, and the women like the way it sheds the dirt instead of bringing it in to melt and track around the house. For the children, too, particularly if they are walking a long way to school, rubbers and overshoes mean a great deal in warmth, comfort and protection against colds.

"Doing Without" Rubbers or Overshoes Is Simply Thoughtless Extravagance

"Yes; the last."

AN IDEAL TONIC

When your head is dull and heavy, your tongue furred, and you feel done-up and good for nothing, without knowing what is really the matter with you, probably all that is needed to restore you to health and vigour is a few doses of a reliable digestive tonic and stomachic remedy such as Mother Seigel's Syrup. Take it after each meal for a few days and note how beneficial it is in action upon the stomach, liver and bowels—how it restores tone and healthy activity to these important organs, and by so doing enables you to gain new stores of vigour, vitality and health.

The Christmas Card That Travelled

Half the boys of Miss Hathaway's school were gathered in an eager group at the foot of the steps. Miss Hathaway had been giving them a little talk on Christmas presents that afternoon.

"I've got fifty cents, and I'm going to spend it all," announced one.

"I've got a bank, and I shall take all there is in it," cried another.

"I shall give my dolls and half my bean-bags; I'm tired of dolls anyhow, chimed the third.

"I shall give something I'm fond of," said a black-eyed girl, with a toss of her head. "I sha'n't give any old cast-off things!"

"Well, I shall," retorted a boy on the edge of the group. "It's all I've got to give someone that didn't have so much as we did; and I'm sure folks like that won't mind it if things aren't brand new!" And he turned and went whistling down the street.

It was the beginning of a general breaking-up; and by twos and threes the rest went their various ways, laughing, and calling merrily back to their comrades. There was one, however, that did not laugh, chatter or call back. It was Carrie Austin, walking all alone down a side street.

Carrie was puzzled, and not quite happy. What was there, indeed, that she could give? Anything new was out of the question—she had no money to pay for it; and as for old things—one headless doll, a few torn books, a broken hoop; surely none of those could she give for a present. Yet it had seemed so easy that afternoon while the teacher was talking—so easy to make some one happy that was poorer than she.

All through the week before Christmas, Carrie puzzled over the question; but not even so much as a bit of ribbon could she find that was fresh enough to give away.

On the twenty-third of December the postman brought her a letter, and in the letter was a bright new Christmas card with a sparkling, snow-covered house in the corner.

"Oh!" cried Carrie. "Isn't that lovely!"

Then she propped the card up on the mantelpiece and stood off to admire it.

"Mother, just see how it shines!" she exclaimed exultingly, as a stray sun-beam came through the window and lighted up the diamond-dust on the card.

"But your letter, dear—you haven't read your letter," reminded Mrs. Austin with a smile.

"Sure enough!" laughed Carrie, picking up the letter which bore the postmark of a neighboring town; and this is what she read:

Dear Pussykins: I saw this card in a window to-day and thought of you—you do so love things that sparkle. Keep it or give it away—just which you like.

Love and merry Christmas from

Brother Will.

Carrie laughed gleefully.

"That's just like Will," she cried "the minute he's got a spare cent in his pocket off it goes for something for us! 'Give it away,' indeed!" she added scornfully—then stopped short. She suddenly remembered that for a whole week she had longed for something to give away.

Carrie did not speak again for some time. She wandered restlessly from room to room only to come back every few minutes and look at the Christmas card on the mantelpiece.

"It isn't enough to give away, anyhow," she told herself; then something seemed to answer:

"You know better, Carrie Austin. It is big enough for you to like, and if you like it some one else would!"

At night she put the Christmas card in an envelope and sent it to Nellie Randall, the girl who sat two seats in front of her in school, and who never brought much for luncheon except dry crackers and bread without butter.

It was the next morning that Nellie Randall rushed breathless into her mother's room.

"Mother, mother, see!" she panted. "Some one has sent me the loveliest Christmas card! Now I can do what the teacher said; now I can send something to one one poorer than I am! But who shall have it, Mother? Mary, Tom, Henry or Jack?"

It was a weighty question. Nellie and her mother could not decide it at once. Mary was poor, certainly, but Tom Henry had a sick mother and no father; while Jack—poor Jack—was crippled himself and could not run and play like the other lads.

At last it was decided; and with shining eyes Nellie hurried away for an envelope and a stamp.

That afternoon on the first mail, Jack Talbot received a bright new Christmas card with a sparkling, snow covered house in the corner.

"Humph!" grunted Jack. Then he scowled and tried to look as if he were not pleased.

Jack was not a favorite at school. At first the scholars had tried to show how sorry they were that he could not join in their games; but he had met their advances with sullen looks and short words, so that gradually his schoolmates had come to leave him pretty much to himself.

Jack was not able to be at school every day, but he had been there on the afternoon that Miss Hathaway had given her little talk on Christmas presents and many times since then he had thought of it.

"Pooh! Just as if there could be anybody poorer than I am!" he would mutter to himself sometimes; and then almost always he would remember Mrs. Murphy, the little old woman on the floor below who took in washing.

For some time after the Christmas card came Jack sat looking at it.

He picked it up and tilted it from side to side that he might catch the glint of the diamond dust.

"'Tis kind of pretty," he said aloud, almost grudgingly. "Humph! I wonder what Mrs. Murphy would say to this? Guess she'd think 'twas a little bit ahead of that old postal card picture she came toting home last week; and she thought that was fine even if it was all torn!"

After a time he arose and limped stealthily down stairs. He paused at Mrs. Murphy's door and was just taking something from under his coat when the door opened and Mrs. Murphy herself appeared.

"Bless you, boy, how you startled me!" cried the little old woman.

"D-did I?" stammered Jack, hastily thrusting something under his coat and stumbling on down the stairs.

Ten minutes later, after walking once around the square, Jack slowly climbed the stairs and stopped once more at the washerwoman's door.

"Hi there, Jack! I was just looking for you," called a boy's voice; and again Jack thrust something hastily out of sight.

"W-were you?" he stammered. Jack seemed to be doing a good deal of stammering that afternoon. "Well, here I am!" And he limped boldly [illegible] thout so much as a glance toward the washerwoman's door.

Long after dark that night, however, when the house was quiet, Jack crept downstairs and tied something to Mrs. Murphy's door-knob.

It was on Christmas day that Carrie Austin's mother answered a timid knock at her side door.

"Why, good morning, Mrs. Murphy," she said pleasantly to the bent old woman on the doorstep. "A merry Christmas to you!"

"And it's just that, ma'am, that I've come to say to you," returned Mrs. Murphy, in an eager, quavering voice. "It's always you who have been doing things for me—potatoes and tea, and a bit of warm flannel—and never a thing could I do for you. But now, ma'am, I've got something you'd like—something I'm sure you'd like. I found it hanging on my door-knob this morning, and when I seen more than set my two eyes on it how I said, 'Sally Ann Murphy, you've got it now; that's just the thing to give good, kind Mrs. Austin and Miss Carrie.' And here 'tis, ma'am, and a merry Christmas to you!" she finished, handing out a flat, brown-paper parcel.

"Thank you, thank you," called Mrs. Austin, as the little old woman hobbled joyfully down the walk.

"Why Mother!" cried Carrie in amazement a little later, as Lee wrappings fell away from Mrs. Murphy's gift and disclosed a bright new Christmas card with a sparkling snow covered house in the corner. "Why Mother that's my very own card that I sent to Nellie. I remember that little black mark on the back."

It was some days before Carrie understood the mystery; then she overheard Nellie Randall say:

"O, yes, I sent something. It was a Christmas card that some one sent to me—such a pretty card, all snow and sparkles! I sent it to Jack Talbot."

"And Jack Talbot lives just over Mrs. Murphy!" cried Carrie under her breath, as she hurried home. "Mother!" she cried, bursting into the house, only think! First Will sent that Christmas card to me, then I sent it to Nellie Randall and she sent it to Jack Talbot. And what did Jack do but take it down to old Mrs. Murphy's and tie it on her door-knob, and then Mrs. Murphy brought it to us. My! how that Christmas card has travelled!" she finished, as she hurried over to the mantelpiece to examine with new interest the wonderful card with its sparkling, snow-covered house in the corner.

Where the Card Came From.

The stingy young man approached the flame of his passion.

"Did you receive many Christmas cards, Miss Buzzer?" he asked, by way of a beginning.

"Oh, yes! And there was one—unsigned—that I thought particularly dainty and artistic. I'm sure it came from you!"

"Indeed!" exclaimed the delighted gentleman. "And what makes you imagine so?"

"Why," replied the maiden sweetly, "because I sent it to you last Christmas!"

At An Armory.

The head of a great gun and armor-making establishment said to the agent of a foreign Government:

"Then, sir, I am to understand that you want us to make you an armor plate that no projectile can pierce? We are producing armor plate like that daily."

"No," replied the military agent, "you mistake me. I want to know if you can make a gun that will pierce any armor plate manufactured?"

"Certainly, sir, certainly," was the prompt answer; "we do that sort of thing every day."

WHEN CHRISTMAS TIME COMES ROUND

S. E. KISER

When Christmas time comes round it seems
As though the long, long years
Roll back and take away our cares
And dry up all our tears.
I don't know why it is, but when
The great day comes along
I get to feelin' young again,
And kind of turn to song.
And whistle and go on just like
A boy would. I'll be bound,
The old world seems to brighten up
When Christmas time comes round.

I'm tickled at the Jumpin' Jack
And all them kind of things;
I like to watch the toys that play
By windin' up the springs,
And somehow—don't know why it is—
Love seems to fill the air,
And I forget I've enemies
Or troubles anywhere;
And every little while I sort
Of listen for the sound
Of voices that have long been still,
When Christmas time comes round.

I wish that I was Santa Claus
And had a magic sleigh,
To visit all the children who
Look forward to the day.
The orphans and the couples and
The poor folks everywhere—
All children that are good and kind
And don't forget their prayers;
I'll bet you that they'd all be glad
When they got up and found
Their stockin's fairly bustin' out,
When Christmas time come round.

Oh, happy time of jinglin' bells
And balls all white with snow;
Oh, joyful day that takes us back
To care-free long ago
I wonder if up there above
Where happy angels roam
They do not get to thinkin' of
The happy times at home,
And turn, in fancy, back once more
To listen to the sound
Of voices that have long been still,
When Christmas time comes round?

MAKING CHRISTMAS A BURDEN.

A Worried Mother Writes the Following Protest.

"With the approaching Christmas season cannot a word of protest be uttered against the custom of exchanging gifts between pupils and teachers? The writer was present at the closing of a school term last year, and saw a teacher open gift after gift piled up on her desk. It was easy to single out those who had not brought presents by their distressed and unhappy faces, their sensitive little hearts feeling as if they were under a ban for not being able to do as the others. A sorry beginning for so joyous a season. Even if the gifts are not brought to the school, but sent direct to the teachers' or scholars' homes, would it not be better simply to have the good wishes of the season exchanged, without the expense and formality of a present?

"I know of one family where the three children expect to take a gift to each of their different teachers. They are asked also each year to bring something for a donation from the class as a whole. The same thing is repeated in the Sunday school, each child giving to each teacher, and each one also expected in addition to contribute to some special charitable object. The father and mother of these three children each have sunday school classes, one of seven scholars, the other of five. If they pursue the same method in their own classes and give a remembrance to each pupil, and also contribute to the special object chosen by each class, the grand total of the presents given by this one family would reach the extraordinary number of twenty-six, aside from the immediate relatives and friends.

"Is it any wonder, therefore, that Christmas becomes a great financial and nerve-exhausting strain? This is especially the case when the burden falls upon the tired mothers, who have to select the gifts. An overdoing of anything, however good of itself, ceases to be desirable. In the needless multiplication of Christmas gifts have not many of us lost the spirit of joyousness and true thankfulness? In our absorption in "much giving" do we not often forget to thank our Heavenly Father for the Gift of gifts, whose advent we are supposed to be celebrating?"

"A Mother."

To this we would like to add a word for the teacher, longing to remember each little one, and without time or money to spare for such a purpose. Let love and loving wishes take the place of all this strain.

Christmas Giving and Christmas Living

It was Annis Crosby, in her pathetic black dress, advertising the recent loss of her mother, who startled them all by coming to the first meeting of the Christmas sewing-club with a large darning-bag. We had hardly expected her to have the courage even to think of Christmas this year.

"It isn't only that we don't feel very Christmassy at our house this year," she said, drawing a boy's thick, ugly ribbed stocking over the darning-egg, "but I've been doing a lot of thinking lately, especially about Christmas. For one thing I've come to the realization that we've all grown fanatical over giving instead of living—and maybe over getting, too—but with most of us here, present-making has become a regular vice."

"Why, Annis," expostulated Marion, the most ardent and elaborate giver of all "giving things is the very essence and spirit of Christmas!"

"Giving, yes—but not altogether giving things, Marion," replied Annis, quietly. "I don't know quite how to express what I mean without seeming to lecture—but don't you think there are gifts more important than the material ones, and, too, better selections to be made when it comes to the actual gifts themselves? None of us ever count the cost of all our Christmas preparations. I thoroughly believe, for instance, that we could choose a few more 'boughten' presents and use the time and effort we expend on Christmas sewing to better advantage. If I'm not mistaken, Marion spent her Christmas holidays in bed with the grippe last year," she added with a faint smile, "just because she was tired out and her resistance was low when the grippe germ roamed in her vicinity—that's one kind of unrecorded loss, but not exactly what I mean, either."

She stopped, hesitating.

"Go on, go on!" urged several of the girls. The group of eight busy teachers had formed a little club which met once a week from the first of October for the laudable purpose of working on their Christmas gifts. Of course nobody accomplished all her Christmas sewing to the accompaniment of tea and cake and much talk; in fact, each of the eight had somehow to manage seven presents for the other members entirely outside of the club meetings, to say nothing of gifts too cumbersome to carry about. But the club furnished the impetus for a vast amount of energetic Christmas labor, so that eight pairs of eyes, already tired by the close work of correcting papers and writing reports and plan-books, were taxed after the school day for many a long hour; nerves, taut and tense from the classroom noises, were put to final strain by the confinement of sewing; eight intelligent brains centered frantically for weeks on producing tea-aprons, ornamental traveling-cases, embroidered shirtwaists, fancy pincushions and coat-hangers, hemstitched tablelinen, tatting, crocheting, and sheer and fragile dress-accessories dear to the feminine heart.

Annis cleared her throat. "After Mother died I gradually began to notice how everything fell on me—how the younger ones were off about their own affairs all the time, and nobody had time to help. Right there I sat down and asked myself how much time I, personally, had been giving Mother when she was with us. I counted up the hours and minutes, and the sum total was a pitifully little. I used to think it was a fine of me to work hard and let Mother use most of my money; but I know now that money isn't everything, and that there were lots of little matters I might have attended to, but mostly there was so much time I might have spent with her that I can never have now.

"Take this Christmas sewing-club—we've had it for six years. If it was just the one afternoon a week, I'd say it was a fine thing—bringing us all together, having a good, jolly time and forgetting other work. But that's the smallest part of Christmas. After we leave here we all spend every spare minute sewing on a lot of unnecessary things that don't do the people who get them any good, and all that precious time might be spent being with people we love, doing things for them, making life easier. There is a little tinge of selfish indulgence in the way some of us concentrate on the pleasure of making Christmas things."

"But what," asked Clara in bewilderment, "are we going to do about the presents? I think it's all true about too much giving, and over in our school we all joined the 'Spugs' to prevent collections for the principal and officers, but home giving and your friends are different—you wouldn't feel right, not to remember them."

"We could begin right here in this meeting by pledging ourselves to omit all gifts to each other, couldn't we?" suggested practical Elsie.

"Or limit it to a card of greeting or a letter or camera picture," put in Millicent.

"I suppose," said Dorothy, slowly, "my mother would have more actual satisfaction if I brought her darning-bag to these meetings instead of making her this centerpiece I've started. I believe I'll do it, Annis. I just love to embroider and I hate to darn—but what shall I do for a Christmas present for her, something she'll really like?"

Annis considered. "We've been thinking at home that our so-called Christmas presents to Mother weren't really personal gifts at all. One year three of us clubbed together and bought her a lamp—and Mother rarely had a chance to use it at all because we usually monopolized its light. The traveling-bag Don gave her he used himself, and we all walked over the new rug—Mother simply kept it clean. This year we're going to put our savings into a few substantial things the house needs. It's our home now, and even when she was here, it wasn't just Mother's exclusively. We'll have councils over the purchases, and committees, and the kind of celebration Mother would have liked over the installation. Any one who still wants to cultivate the individual feeling can do so in a separate small gift to the house—an egg-beater or a new book or a sofa pillow or anything else we can all get some satisfaction out of.

"Then for our friends, letters and greeting-cards and 'service-promises' will be all. We don't—"

"Please, Annis," interrupted Marion, "what do you mean by 'service-promises?'"

"Why," smiled Annis, "if Dorothy should hand her mother a note saying that her Christmas present was a contract to darn stockings or do mending for two hours once a week, that would be a 'service-promise.' The Dorothy's mother could have the fun of embroidering centerpieces instead of doing the less interesting work. If Marion should decide to give Myra Conway all the time she is putting into that baby-jacket, taking care of, the other children, for instance, while Myra rests or gets out for a change without the children, that would be a service-promise. And without wanting to criticize, it's been the experience of most of my friends with babies that the practical 'boughten' things, like hot-water bottles and diapers and rubber bath-tubs are far more needed than the fancy garments. I've thought of lots of 'service-promises' for my own family—helping Roy with his mathematics, taking one of Edna's settlement classes off her hand. There are really lots of uses for time if you count up how much there is and what you can do with it."

"Do you believe in giving people clothes for presents, Annis?" demanded Dorothy. "I don't. Every year Ted gives Jack a necktie and me a pair of gloves, and Jack gives Ted silk socks and me silk stockings—and secretly nobody likes what the other has chosen. And if I want to invest in a new party-dress in October, Mother says, 'Wait and see what Santa Clause does for you'—most likely forgetting and giving me underwear when the time comes! I can't see much present about something you have to have anyway!"

"In families where there are children you can't banish gifts—they always expect toys," protested Anna, the youngest member.

"Yes, they do," Annis agreed, "but usually they get too many and very few well-chosen ones. As long as children are at the expectant age, give them playthings with which they can make or do something. Good tools, building-blocks, the various kinds of wood and metal building-toys, scissors, knives, paints, electric motors, sewing-outfits, crayons, raffia—things like that. After a while they will learn to make things for others, and finally come to the household-gift idea, outgrowing personal anticipations."

"We've always devoted the day before Christmas to making our own candy," Clara said. "We've done it for years, and everybody helps. Beforehand we make or buy pretty boxes and the children fill them to give to their friends. When the candy's put in cornucopias on the tree, they eat too much, and get at it surreptitiously.

"Our Christmas plum pudding is made a month beforehand," remarked Millicent. "It's another family institution. We all seed raisins and cut citron till our arms ache. Then it's boiled and hung in a bag in the attic to season. It comes on the Christmas table blazing all around."

"Wouldn't it be a fine thing," Annis said, "if families could get together once a year and talk over their income and expense-budget frankly? Decide how much each ought to spend for clothing, for example, and let each spend it wherever he or she wished—take birthdays for the really individual gifts, the little luxuries, and turn Christmas into a day of broader thought, good will to all? Have the whole family unite in whatever fun or celebration there is—such as installing a new phonograph or a big chair or an electric light or a beautiful set of best linen—and then try to have the day one of 'peace on earth' instead of confusion and—commotion? The big Christmas dinner's all right—the family feast belongs to the traditions that ought to be kept alive—but the work of it shouldn't fall on one member of the family."

"We can't give up our Christmas tree," said Clara, "but we could certainly adopt some of these other suggestions that make Christmas a day for all the family to think about loving and serving each other better and doing things in unison."

Featherstone: "I wonder if your sister realizes, Willie, that during the last two months I have given her ten dollars' worth of sweets and flowers?" Willie: "Of course she does. That's why she is keeping her engagement with Jim Gurling a secret."

The Paisley Advocate

PAISLEY, DEC. 27th, 1916

Municipal Nominations

PAISLEY

For Reeve—S Ballachey, J H Steele: for Councillors—Dr Hounsom, J A Logie, Dan Sparrow, Albert Pearce, J S Nicholls, A A Sinclair.

Retiring nominees were: For Reeve—Geo Grant, J S Nicholls; for Councillors Alex Fraser, T H George, Geo L Carter, John McKay.

For School Trustees—Rev L W Diehl and D McKenzie (secs), J P Fisher, Dr Hounsom and F Carter were also nominated but retired. This leaves a vacancy on be School Board.

BRUCE TP.

Old council by acclamation—Reeve—Jas Johnson; Deputy-reeve—P Dobson; Councillors—Jas McKenzie, Geo Baker, M McNeill.

In all there were 26 nominations made, the full slate at close of the legal hour being as follows: For reeve—Jas Johnson, Arch McLean, Peter Dobson, A Mowbray, Geo Brown, Jas Farrell; for deputy-reeve—Geo Baker, Jas McKenzie, M McNeill, P Dobson; for councillors—The old councillors and Jas Donaldson, D J McFadden, Silas Haney, M Avis, M E Bahmer, Wm Gilchrist.

Geo Gilchrist	Thos Fullerton	A M Porter
D Pinkerton	H J Nelson	W T Stewart
Jas D Campbell	N Lang	Jos Amdett
Thos Sawyer	Alex Carr	W D Bell
Jas Collison	Jas Connors	D Kinloch

There was quite a large representation of ratepayers at the nomination meeting at Chepstowe, and township affairs were freely discussed. The debtures were left pretty much in the dark however, owing to the fact that the printshop entrusted with the township contract had failed to have financial statement for the meeting. Clerk Purdy was appointed to preside over the afternoon's proceedings.

Reeve Phelan said that in taking the printing to Teeswater the council were working in the interests of the ratepayers. He didn't think the papers would have turned them down in the matter of publishing the minutes, or the council might have done differently. There were no heavy contracts in the township this year, and the roads and bridges account is some $2000 less than last. About $550 had been paid out on the Kaake ditch at Riversdale. Expenditure on Matrie job had been well spent money. With regard to the Red Cross grant, Mr Phelan thought he was working in the ratepayers' interests by taking the stand he did. Claimed township is not wealthy, a lot of poor land and poor farmers. Thought $1000 enough just now. Said council agreed at their first consideration of the matter that they would make a good grant, but speaker did not consider it so urgent that immediate action be taken. Quoted figures showing grants by other municipalities and stated that Greenock council did their full duty in comparison with others. In the County Council Mr Phelan had voted against the good roads proposition, which is now laid over to next January session. It might be 10 years before the Tp would be receiving any benefit, although paying for others outside of Tp. Provision had been made for payment of Red Cross grant, but there would not be more than a couple of hundred dollars left in the treasury.

Councillor Jas Campbell—Said he had always done the best he could in connection with the tp work, but still there were those who find fault. He had always ordered pathmasters to grade roads not less than 30 feet wide. Had a great deal done on 10th con. Printing had been awarded to lowest tender. The Times had offered to publish minutes at 10c a line. Mr Campbell considered the request of grant of one mill on dollar a very fair one, and supported that in council. Had served five years in council, was urged to stand for reeve, but wouldn't consider that as he is not in a position to assume the duties of that office. Would stand for councillor again. Mr Phelan had offered to drop out if he would take the reeveship.

Thos Symons—Considered that on any work he let, the Tp had got good returns for their money. Did not feel that a grant of $1500 should be given to Red Cross considering state of treasury. Those interested in Kaake ditch would have to pay all the costs in connection therewith.

Councillor Thos Sawyer gave out the information that the Wynne bridge cost $850, Church St bridge at Paisley $950, and the culvert on base line $250.

H G Clark, nom for reeve—In absence of statements he could not accuse the council for much. He finds that road account had raised about a thousand dollars. Thought there should be a better road system than under statute labor. Halton Co had done away with statute labor, and now levies a commutation tax of $1 per day. Commissioners employ men to do the work, and those employed must do a certain amount of work for their hire. Good thing for Greenock council to adopt a similar plan. Advocated dividing tp into wards and electing representatives from each ward, which would prevent bunching of councillors as sometimes occurs, also elect councillors for two year terms. There are probably 300 dogs in the tp from which there should be $450 in dog taxes. This tax should be kept in a separate fund. In five years past fund should amount to about $1250, and only paid out about $160 up to 1915. The balance, which is considerable, should be put to credit of fund for paying damage for sheep. Legislature might consent to payment of Red Cross out of this fund. Council should have acted on recommendation of public meeting as to Red Cross grant, but felt satisfied with the grant that has been given. Hoped council would not be so backward in making another grant.

Michael McNab intimated his acceptance of nomination for reeve. Had served three years in the council. If elected would serve faithfully and in the best interests of the township. The boys at the front are fighting in our interests, and should be given every support by us at home. Would have given Red Cross grant at first meeting.

Mr D Pinkerton—Felt that his hands are pretty well tied at present, and would not ask the ratepayers to elect him to office. Will not be a candidate this year.

Mr Geo Gilchrist—Stated that if his name is seen on the ballot, would ask for support of electors, and would do his very best for the tp.

Mr Jas Collison thought the council had acted very wisely in their general course during the year, but there was one thing he criticized very severely, their actions in connection with the Kaake drain at Riversdale. He had advised the council to throw out the petition for this drain, and he characterized the handling of the job as the biggest mess the council had ever got into, involving large expenditures for costs. The assessments in connection were not made fairly, and courts of revision were held in secret.

Reeve Phelan, in replying to criticisms, stated that the petition for Kaake drain was a legal one that had to be dealt with. The council was not responsible for assessments. He had not expected to find his friend Mr McNab to be his opponent. He felt that possibly he had been allowed to hold the office for a longer time than he was worthy of the honor, but he had given better service each year, always looked after their interests, and was often ashamed of the concessions he secured from county council. He had served the township for eight years, and would ask the support of ratepayers once more.

FELT LIKE A NEW PERSON

After Taking Only One Box Of "Fruit-a-tives"

EAST SHIP HARBOUR, N. S.

"It is with great pleasure that I write to tell you of the *wonderful benefits* I have received from taking "Fruit-a-tives". For years, I was a dreadful *sufferer from Constipation and Headaches*, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried "Fruit-a-tives" and the effect was splendid. After taking one box, I feel like a new person, to have relief from those sickening Headaches".

MRS. MARTHA DEWOLFE.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Doing Our Bit

All of us cannot fight. All of us—men, women and children—can do something towards winning the war. Are we seeking that "something," or are we evading it? Are we looking for the "bit" we should do, or trying to forget it?

Take the Canadian Patriotic Fund. It has been created to care for the families of our soldiers in those cases—and those only—where need exists. Experience has shown that this means in two families out of three. Up to December 1, 1916, the people of Canada have given $16,500,000 to the Fund.

That is generous giving, isn't it? But the country is still at war; our armies are still growing; the soldiers' families are still in need; the Fund still must be maintained. And what do we find: in every part of the country men crying that they have given enough to the Fund—that Government should now take the burden.

Given enough! When the Canadian lad in the trenches is dead-tired, ready to drop in his tracks, does he chuck his job, declare he has given enough, and call on Government to get another man? Given enough! Is there a man in Canada has given enough if women and children are in need while he, the stay-at-home, has a dollar to spare?

No! This Fund, above all funds, has a claim on every citizen who is not himself a pauper. The fact that Government has not assumed responsibility for it is the fact that makes every man responsible for it—even if he thinks the Fund should be maintained by Government moneys.

Are YOU helping to insure this home against need?

GOVERNMENT SHOULD NOT CONTROL, BECAUSE—

1. Government would have to treat all alike. The Fund helps only those in need. If Government paid the families of each soldier the average sum paid by the Fund the extra burden on the country would be between eight and nine million dollars yearly.

2. By paying the average sum those families in districts where cost of living is low would receive more than they need; those in high-cost areas would be paid too little.

3. Costs of administration would be enormously increased. This work is now done, for the most part, by willing workers without cost. Of every hundred dollars subscribed, Ninety-nine Dollars and Forty six Cents go to the families! Never was a voluntary fund so economically administered.

4. The work would suffer. There would be no more of the friendly, almost paternal, relation now existing between the administrators of the Fund and the families. Government works automatically. The Fund's visitors are friends in need, therefore friends indeed.

5. Taxation would be unequal, for some counties and some provinces are already taxing their people for this Fund. Are they to be taxed again by the Federal authority?

6. The richer classes would be relieved of work they are cheerfully doing. They are now bearing, and bearing because they have the financial power and the patriotic willingness, the larger share of the burden. Why take from them this task, and give it to all, rich and poor?

7. The Fund blesses him that gives. It is a vehicle for public spirit—a channel for patriotic endeavor. The work of administering it has uncovered unknown reservoirs of unselfishness and sacrifice. Men and women have thrown themselves into this work because they found in it the "bit" for which they looked—their contribution to winning the war. Why stay their hand and stifle their enthusiasm?

8. Last, but not least: Government control means raising the money by selling Government bonds. Government bonds mean future taxation. And that means that the returning soldiers will pay, through long years, a large share of the cost of caring for their families—a cost we, the stay-at-homes, pledged ourselves to bear.

MEN AND WOMEN OF ONTARIO:

Bend your backs once again to this burden. If you live in the rural districts see to it that your county councils make grants worthy of the counties and of the cause. If in the towns, start campaigns for individual subscriptions. And personally, taxed or not taxed, give as you can afford, give as your conscience tells you is your duty, your wartime part, in this day of national sacrifice.

The Fund requires $12,500,000 for 1917. Of this Ontario is asked to raise $6,000,000, being the estimated requirements of Ontario's families. If there is no local Fund to which you can subscribe, send your gift direct to the Canadian Patriotic Fund, Victoria Street, Ottawa.

VILLAGE COUNCIL

Council met 15th Dec, 1916. All present. Minutes of last meeting read and adopted. Communications read: From D Forrester, requesting an adjustment of the late Adam McGill's business tax; from Neil Sinclair, denying liability of Mary Sinclair to income tax.

By-laws 661 appointing Murdoch Leitch an officer to enforce the provisions of the Ontario Temperance Act; 662, providing for nomination and election of municipal officers for 1917, and 663, extending the time for the return of the collector's roll, were read a first time, and on motion of Messrs F B More and D Sparrow were read a second and third time, passed and executed.

More — Sparrow — That the clerk is hereby instructed to procure an injector for the fire engine.—Carried.

George—Nicholls—That the Adam McGill estate be refunded one half of his business tax, J C Gibson 50c and John McMillan $1 re assessment.—Carried.

Accounts were ordered to be paid, all of which appear in the financial statement issued.

For Councillor of Paisley

To the Electors :

Ladies and Gentlemen—Having been nominated for the position of Councillor for the Village of Paisley, I wish to solicit your vote and influence in my behalf. After eight years' service on the School Board, I feel justified in asking the electors for higher favors. If elected, I am willing to make any sacrifice necessary for the improvement of the village.

Respectfully yours,

P. J. F. Houston

For Councillor of Paisley

To the Electors :

Ladies and Gentlemen—Having in my absence been nominated for Councillor, I wish to announce that I am a candidate. As it will be impossible for me to make any personal canvass owing to being out of town, I would respectfully ask you to remember me when marking your ballots and to use your influence in my behalf.

Respectfully yours,

John A. Logie

For Councillor of Paisley

To the Electors of Paisley :

LADIES AND GENTLEMEN — Your vote and influence respectfully solicited in behalf of the undersigned as a councillor for 1917. Should you honor me by election, I shall do my utmost to serve your best interests in every way. Wishing you a Happy New Year.

Yours respectfully,

Albert Pearce

For Councillor of Paisley

To the Electors :

Ladies and Gentlemen—Having been nominated for Councillor for the Village of Paisley, I wish to thank my friends for the confidence thus placed in me. If elected to office I will at all times have the interests at heart. I stand for efficiency and progressive management in all municipal affairs. Soliciting your vote as Councillor, I am,

Respectfully yours,

A. A. Sinclair

For Councillor of Paisley

To the Electors :

Ladies and Gentlemen—After serving you as a Councillor for 1916, I have again been honored with nomination, and am before you as a candidate for re-election. I have endeavored to do my share in conducting your municipal business, and believe I have done so in a manner that has met with your approval. If re-elected I shall again do the best I can to further your interests.

Yours respectfully.

D. Sparrow

NEW STRENGTH FOR LAME BACK.

Has Taken Long Period for Prescription.

Dear Mr. Editor — I suffered form my back constant tired, run-out feel... times I was able to stand erect and scarcely able to get around. It would usually come on at first with a crick in small of my back. I took one box of Dr. Pierce's Anuric Tablets and my back commenced to get better soon after I began to take them. I did not fail to walk doubled over as I did before using the "Anuric." It is the only remedy I have ever taken for what it is intended to relieve.

I hope those who are in need of such a remedy will give the "Anuric Tablets" a trial.

(Signed) A. G. DRAKE.

NOTE: Up to this time, "Anuric" has not been on sale to the public, but the persuasion of many patients and increased demand for this wonder-working tablet, Doctor Pierce has finally decided to put it into the drug stores of this country within immediate reach of all sufferers.

Simply ask for Doctor Pierce's Anuric Tablets. There can be no imitation. Every package of "Anuric" is sure to bear Doctor Pierce's. You will find the name on the package just as you find Dr. Pierce's Favorite Prescription, the ever-famous friend to ailing women, and Dr. Pierce's Golden Medical Discovery, proven by years to be the greatest general tonic. Send 10 cents to Dr. V. M. Pierce, Buffalo, N. Y., for a trial package.

If any rate don't give up hope of relief of your malady until just a dozen of "Anuric" have proven what it will make you feel like a brand person.

Editor — Please insert this letter in your conspicuous place in your paper.

AFTER a year of stress and anxiety in every walk of life, it is our sincere wish that everybody will have

PAISLEY BOARD OF HEALTH

Board met 15th December, 1916. Members all present. Minutes of last meeting read and adopted.

The Medical Officer of Health, Dr Gage, filed his report for 1916, reading as follows: "In presenting the annual report of the health department for the past year I have much pleasure in being able to state that no epidemic of a serious nature has visited us. Early in the year an epidemic of measles visited us, and while stringent measures were employed to combat the disease it nevertheless spread and most of the children who had not previously had the disease were attacked. During the months of November and December a number of cases of chickenpox have occurred. In dealing with these our efforts have been more successful as the disease has not spread in a general way. Some local sanitary improvements have been made, one of which has been the building of a new closet in our town hall. This has filled a long felt need. A sample of drinking water taken from the school well and analyzed showed some contamination. The well was cleaned and put in proper condition. Generally speaking, our milk and water supply is abundant and good. Our village scavenger cleans all the dry earth closets once a month during the warm weather and on alternate months during the winter. A slaughter house within the village limits that was not built within the requirements of the law has been closed and a new one built outside of this corporation. Signed, H H Gage, M O H."

Payments were ordered as follows: Dr Gage $25, the secretary $10, F B More $3 47.

Report of Secretary of Board of Health for 1916: "With the exception of what may be called the annual outbreak of measles and chickenpox amongst our juveniles no other communicable or infectious disease has appeared in this municipality. Of measles 59 cases were reported, which seem to have included the whole generation of our youngsters. Of chickenpox 7 cases were recorded. The first case of measles was believed to have been contracted by contact with visitors. No deaths from either of these diseases occurred. The number of deaths during the year was five, three of which were from old age, one from pleurisy and one from cancer. The number of births was thirteen — sons grown. J C Gibson, Secretary.

TRAINING FOR BUSINESS

For 33 years the NORTHERN BUSINESS COLLEGE, Owen Sound, has been a leader among the institutions specializing in training for commercial pursuits. The course of study embraces every subject of use in conducting business. Actual practice is given in required duties.

Special courses for young ladies who wish to qualify for office positions during the war.

Winter term begins Jan 2nd, but students may enter any time. Write for Catalogue.

THE MARK OF THE BEAST.

Inability of Germans to Understand Meaning of Humanity.

There is something almost pathetic about the vain reachings of the Germans for neutral sympathy, says the New York Tribune. They murder neutrals, they sink neutral ships and they violate neutral rights, and then in their desire for neutral approval, they buy newspapers in neutral capitals and eagerly reprint the comments appearing in the purchased columns. Thus it is that for the latest Belgian outrage Berlin finds warrant in the comment of Copenhagen and Stockholm newspapers.

And yet the most astonishing thing about the whole war is the complete inability of the German to understand the rest of the world. He sent his troops into Belgium; he permitted, he commanded them to murder, burn, rape; under his orders children were slain and women violated, cities were destroyed and homes ruined, and then the German professed a hocus-pocus of documents discovered in Brussels to defend his course, to justify not merely his offences against Belgian neutrality, but his offences in Belgium against all humanity.

And from the outset of the war the Belgian episode has endured as a final damnation of Modern Germany. It is one thing about which there is no argument in America. It is one phase of the war which is settled, not for the duration of the war, but for the lifetime of men and women now alive. We are numb with the horrors of this war, we are deafened with the charges and counter-charges, but in the matter of Belgium our minds remain clear and fixed.

It is not surprising that the nation which murdered Belgian women and children is now enslaving Belgian men. It is not surprising that the nation which is responsible for what was done, not merely in Louvain, but in all the villages from the frontier to Dinant, through which the troops passed, should now be invoking the methods of African slave traders in the conquered regions.

The true meaning of this Belgian episode is that there can be no peace while the spirit which is responsible for it dominates Germany. Europe cannot make peace with such statesmanship of murder as rules in Berlin. To do this would be to recognize the spirit itself. A native village might as well make terms with a man-eating tiger which by night preyed upon its children as could France, for example, make peace with a neighboring Germany in its present mood.

Tooth powder is excellent for cleaning jewelry. Rub it on with a nail brush and then rinse off with scalding water

"Artificial Lambs"

The Farmer's Wife and the Wounded Soldiers

A leading Toronto daily paper, describing the work of restoring the injured soldier's working power, says: "Where necessary, artificial limbs will be furnished."

"That's great," says a farmer, who possesses both a sense of humor and a flock of sheep. "I guess that's the sort of lamb that always knows its own mother from the start, and never has anything the matter with its little insides, and grows into a ewe that has twins or triplets every time. I see Mr. Grisdale is advising returned soldiers to go in for sheep-raising. Artificial lambs will be the very thing for them.

"I guess what that newspaper man meant to say was artificial limbs. And that's all right. A neighbor of mine lost a hand, monkeying with a buzz-saw or something, and he thought his farming days were done. But they weren't, not by a long shot. First off, he got a hook fixed on to the stump. It was great, when he wanted to scratch his head, and a few odd chores like that. But some things used to give that hook the hold-up; so he got a special attachment for gripping a hay-fork, and another for clutching the plough-lever, and so on. There's scarcely a thing that a one-armed man can't do nowadays, seems to me.

"As for artificial limbs, there have been times when I'd have been thankful for one myself, when the real thing lost its dam and kicked at the bottle. But I reckon Grisdale's all right. A sheep's a nice and easy thing to handle or drive compared to a hog, and don't need a lot of grain raised for it."

The farmer's wife sat and listening in silence—because she had come to the heel of a sock she was knitting for a soldier-boy, and had to count the stitches; by this time the heel was turned, and she could knit and talk both together.

"Artificial lambs is what some folks think the soldiers ought to be themselves," she said, "and it's not reasonable. There's Mrs. Flummery, she that talked so big about all she would do for the poor dear boys, and got up a public reception for the five that came back wounded. And now, because one of them took more than was good for him before the bars were shut up, and another talked a bit contrarious, and broke up herself, and won't go near them.

"It's not reasonable, I say. They've had a hard time to begin with, and then a long spell of doing nothing, and the two together—well, John, when you were getting over the typhoid you were no lamb. You may not remember, but I do.

"I saw quite a bit of the lads in the convalescent hospital when I was staying with Maggie in town. Some of them came from the regiment my boy's in, and they got to talking as free and open as if I was their own mother, bless 'em. I soon got to see how they didn't want slobbering over, or patting on the back. It felt good to them at first, but a little of it went a long way, as Charlie Green said. They didn't feel much like settling down to business, at first, but when they'd thought it over and talked it over with people that could enter into their feelings, they said they knew it was right.

"One man had a pretty bad leg, so he had a pretty good excuse for taking things easy; and that's what he did, and he was getting no better. He didn't seem to take an interest in the carpentry or the type-writing, or the chicken-raising—it's wonderful how many things they have to interest the lads and help them to make a real good living when they come out.

"Well, at last something seemed to strike him. It was a piece he read about a blind soldier doing wonders at type-writing, and even doing short-hand with some new machine they've got. He didn't believe it at first, but when he found it was true he was sort of ashamed. He wasn't blind, and he'd no use for short-hand; but he buckled up and went in for poultry as if there wasn't anything else worth living for. He learnt more in a week than he had in three months before; and the most astonishing thing was—though it's natural enough after all—that his health got better, and even his leg didn't give half the trouble it had. He told me he was going to put every ounce of brains he'd got, and anything else he could lay his hands on, into chickens and turkeys and ducks and geese, and make every bird so much better than ordinary that he could get the top price even when markets were bad for common grades. He'll do well, that lad, if he sticks to it.

"But there's one thing I will say is wanted. If a sensible woman or couple (only they're harder to find) that want to help wounded soldiers, would make friends with just one man and stay his friend after he quits hospital, and keep track of him, and just help to boost him along quietly—well, both they and he would be the better for it, and I don't know which would gain the most.

"The Government gives them pensions, and limbs if they've lost any, but a Government can't be the same as a private friend. It's up to all of us, I reckon, to see that the lads do well when Government's done with 'em. They want to do well, but any man'll do better for a little encouragement. They're human beings, and nobody in his senses can expect them to be lambs, artificial or otherwise."

THE RURAL PROBLEM.

One of the Chief Reasons Why Boys Leave the Farm.

Mr. W. C. Good, of Paris, Ont., addressed the Empire Club of Toronto recently as a practical farmer and also a student of the economic problems underlying agriculture in Canada. He pointed out that agriculture is not merely an occupation which individuals follow for profit, but it is a great national interest, determining in a dominant way the fortunes of this nation and the opportunities and character of our population; hence the improving of agriculture affects the status of Canada, its outlook and destiny. He made a comparison between agriculture and manufacturing as to profits, showing that if five per cent. were allowed on the capital investment of the farmers there would be a deficit in the year's operations of $110,000,000, the value of their annual product being estimated at 1,000 millions. The manufacturers had a surplus of $260,000,000 on their year's business, in addition to the five per cent. on capital invested. Thus is revealed one of the chief reasons why boys leave the farm. Yet agriculture is the most important industry which contributes to man's welfare, besides being the one which supplies leaders in all other lines of life; city life in a few years would become extinct without the constant stream from the country. The seed-bag of the whole population is the rural life—including farming, lumbering and mining—because these occupations have a monopoly of fresh air and sunshine, and the farm affords the very best opportunity for an abundant supply of good food. In the life of the growing generation these three things are of supreme importance. Again, agriculture as an industry might be called domestic—the entire family co-operating in carrying on the work; little children having opportunity to assist parents, and through these operations learning how to do things and how to think, thus establishing right habits of life. In these respects farming contrasts sharply with city life. Again, farm work is seasonal, and the farmer must work with Nature, and be governed largely by weather conditions, hence his work is very varied, and calls for an unusual degree of adaptability, initiative and resourcefulness. It thus contrasts with routine work of the city. Country life is also quiet, and promotes continuity of thought and strength of character. Man needs, for his highest welfare, to get away to the mountain-top and there commune with his Maker. Lastly, the continuance of democracy is largely dependent on agriculture. The perpetuation of a sturdy and independent yeomanry is one of the best guarantees we have for the perpetuation of democracy, which is the only thing that is destined to last; it may have its faults, but it is the only system of government which contains within itself a continuity of life. From that point of view, the maintenance of an independent and intelligent class in the rural districts is of vital importance to any country. Canada especially needs strong agricultural interests in order to maintain its financial credit and progress. Mr. Good quoted from Sir George Paish, the financial expert, showing that the burden of interest on the enormous cost of railways in Canada, which are sufficient to deal with at least twice, if not three times, the present output, will be enormous until the productive power of the country is greatly increased. The welfare of the Canadian people, individually and collectively, depends absolutely on the rapid increase of the agricultural and mineral output, hence land must be tilled to capacity.

THIEVES' INSURANCE.

London Members of Underworld Organize Fund to Pay Fines.

Recently there has been brought to light in London a widespread form of insurance against police court fines inflicted on thieves. The scheme was discovered by Mr. Cecil Chapman, the Tower Bridge magistrate, who told a London Daily Mail representative that "it all arises from the prosperity which had been apparent on the surface during the last year or so prompting a great many previously honest people to pilfer.

"Seeing plenty, they have succumbed to the temptation to take some for themselves. At some docks, warehouses, and other places the volume of pilfering has increased threefold. This has led to what can only be described as thieves' insurance societies, in which both honest and dishonest men club together to form a fund from which the fines inflicted on those convicted of thieving are paid.

"They appoint an official called 'the banker,' who collects the money, and it is his duty to attend the court and pay the fines. In one case a few days ago a youth caught stealing had on him a card showing subscriptions to the amount of £2 for use in paying the fines of friends found guilty of thieving. An even stranger case was that of a person charged with stealing 7s. 6d. He had been entrusted with 15s. subscribed by friends, to pay the fine of a pilferer. The fine was only 7s. 6d., and the 'banker' kept the balance."

Nurses Wanted

THE TORONTO HOSPITAL FOR Incurables affiliated with Belleview and Allied Hospitals, New York, offers a Three Years' Course to women wishing to enter the Nursing Profession. Applications will be received by the superintendent, Miss Cook, 130 Dunn Avenue, Toronto.

FEAR MAKES GERMANS BEHAVE

ARE TAKING BETTER CARE OF THEIR CAPTIVES.

More German Prisoners in England Better for the English in Germany.

D. Thomas Curtin contributes another of his articles on his ten months' stay in Germany to the London Daily Mail. He writes:

Since the Germans began to find the war going against them; since in particular the English and French made large captures of Prussian Guards and other corps de elite soldiery, a number of really excellent camps have been arranged, to which neutral visitors are taken.

Before describing a visit to one of these great towns of prisoners, for that is what they are, I should like to repeat my conviction that now you have a balance of German prisoners here Germany will, for fear of reprisals, treat your men better than in the past.

Worst Jobs for English.

It is common knowledge throughout the German Empire that the most loathsome tasks of the war in connection with every camp or cage are given to the English.

Conversations that I have had here in London about your prisoners give me the impression that the British public does not exactly apprehend what a prisoner stands for in German eyes.

Firstly, he is a hostage. If he be an officer, his exact social value is estimated by the authorities in Berlin, who have a complete card index of all their officer prisoners, showing to what British families they belong, and whether they have social or political connections in England. Thus when someone in England mistakenly, and before you had sufficient German prisoners in your hands, treated certain submarine marauders differently from other prisoners, the German Government speedily referred to this card index, picked out a number of officers with connections in the House of Lords and House of Commons, and treated them as convicts.

Fear Reprisals.

Now that you have in your hands a great number of officers, some of them of distinguished German families, and also with royal and political influence, you can get better terms for your officer prisoners by the application of ordinary common sense in dealing with the German authorities.

The other German view of the prisoner is his cash value as a laborer. I invite my readers to realize the enormous pecuniary worth of the two million prisoner slaves now reclaiming swamps, tilling the soil, building roads and railways, and working in factories for their German taskmasters.

Some of your military writers leave these prisoners out of their calculations when estimating Germany's man-power. If you had two million prisoners you would probably be able to release two millions of your own people for military service.

The most numerous body of prisoners in Germany are the Russians. They are to be seen everywhere. They have greater freedom than any other prisoners, and travel unguarded in many cases by rail or tramway to and from their work.

Hate Propaganda.

The English, of course, are much the smallest number in Germany, but much the most highly prized for hate propaganda purposes.

"More difficult to manage," said one unter-offizier to me, "than the whole of the rest of our two million." It is, indeed, a fact that your thirty thousand prisoners, though the worst treated, are the gayest, most outspoken, and rebellious against tyranny of the whole collection.

Mr. Curtin says the great prison camp at Soltau, with its 31,000 inmates, is the best conducted in Germany. The physical comfort of the prisoners is well looked after in the neat and perfectly clean dormitories. The only complaints are of food shortage, but parcels from England are allowed to come through uncontrolled.

Sweat Wears Out Coin.

In the latest report of the British mint, Sir Thomas K. Rose, a well-known metallurgical expert, calls attention to the effect of grease derived from the sweat of the fingers, or from other sources, in accelerating the wear of coins, which is usually attributed entirely to abrasion. Sir Thomas says that the fatty acids of the grease have a corrosive action upon the metal. Copper, in particular, even if present only in small quantity as an alloy for gold or silver, is converted into an oleate stearate or other salt.

From the Ocean Shore

BITS OF NEWS FROM THE MARITIME PROVINCES.

Items of Interest From Places Lapped By Waves of the Atlantic.

A St. Mary's, N.B., woman was charged with supplying liquor to a squaw.

Truro was visited by a $40,000 fire. The Kemp building was totally destroyed.

An aged man and his two grandchildren were burned to death at Port Williams.

The Union Depot at St. John has been renovated, and now presents a cleaner appearance.

The police of St. John's are obliged to do extra duty at night owing to so many hold-ups being made.

The Fredericton police pulled off another successful Scott Act raid, securing $100 worth of liquor.

Miss Myrtle Garrison, of Peggy's Cove, N.S., was fatally injured by an auto at Worcester, Mass., U.S.A.

F. W. Sumner of Moncton has left for London to resume his duties as Agent-General of New Brunswick.

One thousand dollars has been the response of the New Brunswick children for the Belgian Children's Fund.

John McCormack, of Maple Glen, a suspected thief, broke his leg and was captured. He is now in Newcastle jail.

The contributions to the British Red Cross fund from Halifax and the rest of the province amounted to $42,921.31.

A 14-year-old Glenville, N.S., lad was killed whilst hunting. He attempted to climb a tree, when his gun exploded.

A large steam roller crashed into the Maritime Rug Works, St. John, and several people narrowly escaped death.

Locomotives worth $1,000,000 were in danger when fire destroyed the interior of the "Old Brick Shop" at Moncton.

A delegation waited upon the Premier in North Sydney, requesting enforcement of the Temperance Act in Cape Breton County.

Owing to the great demand for coal and lumber in and around Malpaque, it is stated that a company is about to be formed there.

A C.P.R. official visited the New Brunswick Apple Exhibition at St. John, and stated they were the best apples he ever saw.

The Bathurst Lumber Co. is willing to start a shipbuilding yard to build wooden vessels if the Dominion Government will give a bonus.

A Chinaman of Moncton testified that a woman sold him opium at three dollars a can, and that five hundred more tins were expected from her.

The liabilities of the Thomas B. Calhoun Lumber Co., of St John are $10,000 more than the assets. Inspectors will dispose of the property.

The steamer "Helen W. Montague," which was driven ashore on a mud bank near Queenstown, during a heavy gale, was a regular trader to St. John.

The Fredericton Lodge, Knights of Pythias, have received word that the motor ambulance donated by the Maritime Lodge, Knights of Pythias, is being used in France.

There is much speculation in Sydney Mines as to the attitude the miners will take as regards the Workmen's Compensation Act, which becomes effective early next year.

TRAINED TO RESIST GAS

British Fighting Men Take Gas and Tear Shell Courses.

The war has developed many institutions, but none more indispensable than the big training camp in France, which perfects the British fighting man in the warfare he engages in once he goes to the fighting line, says J. W. Grigg, in the New York World. I have visited this vast school, where thousands at a time of the men who are to meet the Germans in sanguinary combats are given their final period of training. The officer in charge is an alert man of much resources. His staff of instructors is not entirely a permanent one, for with each new innovation which is introduced at the front some adept becomes a member of the teaching force in this big outdoor war academy. The men here, as is the case with the French in their counterpart of this institution, are put through gas as well as lachrymatory or tear-shell courses.

Injustice.

Colonel South was under the painful necessity of administering a sound thrashing to his son, Samuel. After he had completed his labors he said sternly to his suffering victim:

"Now, tell me why I punished you."

"That's it," sobbed Sammy. "You nearly pounded the life out of me and now you don't even know why you did it."

A Versatile Musician.

An Irish vicar, having advertised for an organist, received the following reply:

"Dear Sir. I notice you have a vacancy for an organist and music teacher, either lady or gentleman. Having been both for several years, I beg to offer you my services."

WINNIPEG TORONTO, ONT. MONTREAL

THE SUN NOT A BALL OF FIRE.

Scientist Modifies Conception of Source of Sun Heat.

In a paper on "The Utilization of Solar Energy," in the Smithsonian Annual Report, A. S. E. Ackerman of England says that the sun is no longer regarded as a monstrous ball of fire, at a temperature of several hundred thousand degrees centigrade, for, great as is its mass, it would be comparatively rapidly consumed if such combustion were taking place. The temperature of the surface of the sun has been determined as about 6,000 C., far too high to permit the formation of most chemical compounds, without which the production of heat by combustion is impossible. Such a temperature decomposes nearly all compounds into their elements and prevents their reuniting and the consequent production of heat.

Mr. Ackerman says that scientists are by no means certain how the sun's heat is produced; one theory being that it is due to radio-activity, and another that the energy to keep up the radiation could be supplied by a relatively microscopic contraption of its volume, but this theory is not a complete success, as it implies that the sun is only about 17,000,000 years old, or less than the age of the earth.

As to the structure of the sun there is also doubt, but the inner portion may be spoken of popularly as the nucleus and the outer portion as the atmosphere. When the outer layers of the atmosphere get relatively cooler they sink to a lower level, their place being taken by hotter layers, thus actuating a continual circulation of the sun's atmosphere. The author states that the weight of an average cubic foot of the sun is only one-quarter of that of an average cubic foot of the earth. The density of the sun being so small, it has been concluded that it can still continue to contract, getting hotter all the time instead of cooler, as is popularly supposed, making it a hopeful future for utilizers of solar energy.

The great glowing surface which the sun presents to us, even considered as a flat disk, has the enormous area of 585,750,000,000 square miles, each square foot of which emits the tremendous amount of about 12,500 horse-power, and the radiant energy received on the surface of the earth at noon on a clear day is about 5,000 horse-power per acre.

"Meat Prices Will Not Come Down" is the cheerful news from the Department of Agriculture. Meat prices will not worry the man or woman who knows that a **Shredded Wheat Biscuit** will supply more real body-building nutriment than beefsteak or eggs and at much less cost. Shredded Wheat remains the same price, the same high quality, supplying all the nutriment a man needs for a half-day's work. Two shredded wheat biscuits with peaches and cream or other fruits make a complete, nourishing meal at a cost of not over five cents.

Made in Canada

THE DEATH OF FRANCIS JOSEPH

By Chas M. Bice, Denver, Colo.

The once great house of the Hapsburgs has lost its most distinguished representative in the recent death of Francis Joseph, the aged ruler of Austria.

This distinguished race of kings takes their name from a famous ancient house in Switzerland, but is not the name of the occupants. The place of origin in this case, having superseded the residents, the name has clung to the descendants through all subsequent history.

The aged monarch, whose funeral rites at Vienna will soon be observed in a manner befitting a king, ascended his throne in the midst of revolution, and it is only fitting that he descend from it as he has, while the nation is wrapped in gloom of treacherous war, that forbodes national disaster to his confiding subjects.

His kingdom is yet in the balance, and no matter who wins, his dominions are almost certain to be dismembered. The dual monarchy is doomed, however the struggle may end.

Francis Joseph, emperor of Austria, and a sort of apostolic King of Hungary, reigned but did not govern during the latter period of his life.

He supinely placed himself in subjection to the will of another and much greater sovereign—the Kaiser.

The spectacle presented of the life of the titular head of the dual monarchy would have been a fit subject for the world's greatest dramatist himself, and were he now living, we would be presented with another Richard or a Henry to take the place of the ephemeric twaddle written by so-called court historians.

His was a life in full consonance with Hapsburg traditions—full of tragedy, bloodshed and revolt.

Upon high authority the Emperor of Austria-Hungary was the recognized libertine of Europe, and if his unvarnished story were written out, it would scarcely be a fit subject for school study.

But then, you know, we are Puritanical on such subjects, and have much to learn of the ways of continental Europe.

One thing is certain, that in Austria, Francis Joseph was accepted with all his grossness and grievous lapses, as a kind-of god. Whatever the world may say of his amours, he was a brave soldier and the idolized emperor of his people, and that settles it so far as they are concerned.

It is questionable whether history shall blame him for this great world-wide horror, through which we are passing, as he was more the creature of destiny, the clay in the hands of the potter, than the initiator or instigator of this great misery.

The Sarajevo tragedy, when the Crown Prince lost his life, and one among many in his long reign, was the excuse ostensibly for the war, but it was not the cause of it, for that had been long brewing. The double assassination of his nephew and his consort, was unquestionably political, but without this the outbreak could not have been suppressed much longer.

In fact the emperor was not much in love with the prince. The heir-presumptive was thoroughly "Prussianized," which was the true reason of his tragic end.

But with the emperor, it was merely a choice of Germany or having his empire pass from him. The Slav peril, so-called, was not created by him, yet he did little to arrest the slow-moving iceberg of Russian dominion, and hence his empire was unstable at best. Unfortunately it was made up of elements that were never destined to properly fuse.

It is inconceivable that his death will have any material effect upon the great struggle, for new elements are sure to arise and surround the throne, but his going at this time may be used by Hungary to break her chains against which she has so long chafed.

THANKFUL MOTHERS

Thousands of thankful mothers throughout Canada—many of them your own neighbors—speak with the greatest praise of that splendid medicine, Baby's Own Tablets. Many mothers would have no other medicine for their little ones. Among these is Mrs. Albert Nie, St. Brieux, Sask., who says: "I have been using Baby's Own Tablets for the past seven years and they have done my four children a world of good. I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

THE "ANNOTATED GUIDE."

An Interesting Volume Issued by the C.P.R.

No publication issued by the Canadian Pacific Railway is better known all over the world than the "Annotated Guide," describing every station along the line. Issued originally at the suggestion of Sir William Van Horne, it has passed through many editions and is now a fair-sized book owing to the great increase in the extent of the railway system. It is interesting to look over the early issues to see how Canada has progressed. In 1888, for instance, Winnipeg had a population of only 25,000, Fort William 1,400, Regina 800, Calgary 2,400, Lake Louise had not been discovered, and Vancouver was proud of its 5,200. Indian Head was famous for the Bell Farm, of which the "Annotated Guide" remarks: "The furrows on this farm are usually ploughed four miles long, and to plough one furrow outward and another returning is a half day's work for a man and team. The work is done with an almost military organization, ploughing by brigades and reaping by divisions." Toronto is described as "distinctly Western in its activity and energy."

TOOK TOOLS FROM HUNS.

Then Machine-Gunned Working Parties Out of Existence.

A wounded machine-gunner, now in hospital in England, tells a remarkable story of how a party of British Tommies recently adopted a clever ruse which made Frits look foolish. It is a characteristic incident of British methods on the western front, says the London News.

Our men learned that it was the intention of the Huns to place more barbed wire in front of their lines that night. So about 15 left the British trench and formed links of a human chain reaching to the German lines, which were only about a hundred yards away. The enemy, who naturally wished to carry out their plans unobserved, were sending up no star lights, so that the Tommies, with a subaltern in charge of them, were able to crawl into position quite unnoticed.

They had scarcely completed the formation of their chain before the Germans began to throw out of their trench on to the ground in front the various tools and materials they would require. First of all a number of iron stakes were pitched out. The first man in the British chain grabbed them, passed them back to the man behind him, who in turn handed them on until they were safely landed in the British trenches. Everything put out by the unsuspecting Huns was disposed of in the same way. When the leading man in the chain concluded there was nothing more to come he stealthily crept back with his comrades.

By the time they had reached their trench the German working party was in the open and the men were busily employed searching for the missing wire and tools. Suddenly a rocket hissed up from the British lines and, revealed by its pitiless light, the entire party was practically wiped out by a stream of lead from a machine gun. Later during the same night a second German party attempted to get to work, with equally disastrous results.

At dawn a notice board appeared over the British trench bearing in German, the words: "If you want your wire, come and fetch it." The crestfallen Germans did not accept the invitation.

ALCOHOL AND OPIUM HABITS.

Problems of the Drug Habit in the Far East.

The traffic in alcohol, opium and cocaine in India, Ceylon and China has more than a sentimental importance, says the London Times. The trade with India amounts to nearly one-third of the trade of the United Kingdom, and the supremacy of the Empire depends upon the preservation of that trade from the competition of other European nations. The traffic in intoxicants and narcotics was sapping the efficiency of the nation, and Government control cannot by itself keep sober a nation that wishes to be drunk. The Indian Government sacrificed a revenue of four million sterling when it put an end to the export of opium; and as it brings the traffic in alcohol under control the consumption of opium and cocaine increases, while in China as the importation of opium is reduced the sale of intoxicants increases.

FOR ALL KIDNEY DISEASES

CURES RHEUMATISM & BRIGHT'S DISEASE & BACKACHE DIABETES

NUMBER 23 THE PROPRIETORS

EGGS DEAR IN LONDON.

Four to Six Shillings a Dozen —Economy Urged.

Owing to the scarcity of eggs in France, the available supply is being entirely reserved for the wounded. But however limited the supply across the Channel, eggs are more plentiful there than in England, and the Weekly Dispatch suggests that if the British military authorities were to issue a notice that eggs in England should also be reserved for the wounded, the public would respond as readily as the French civilian population.

The cheapest fresh eggs in London are priced at 4s. a dozen, but in West End shops as much as 6s. a dozen is demanded. Despite the complacency of Ministers, food prices are ever on the upward grade, and the best butter is now 2s. 2d. a pound. Not unnaturally, people are inclined to think that the soaring food prices are not altogether to be explained by the normal influence of war. Faulty organization of supplies and undue indulgence by people to whom price is no object are, in the general belief, important contributory causes. Mr. Lynch, M.P., is suggesting the suppression of the menus of official banquets.

DRINK HOT WATER FOR INDIGESTION

A Physician's Advice

"If dyspeptics, sufferers from gas, wind or flatulence, stomach acidity or sourness, gastric catarrh, heartburn, etc., would take a teaspoonful of pure bicarbonated magnesia in half a glass of hot water immediately after eating, they would soon forget they were ever afflicted with stomach trouble, and doctors would have to look elsewhere for patients. In explanation of these words a well known New York physician stated that most forms of stomach trouble are due to stomach acidity and fermentation of the food contents of the stomach combined with an insufficient blood supply to the stomach. Hot water increases the blood supply and bicarbated magnesia instantly neutralizes the excessive stomach acid and stops food fermentation, the combination of the two, therefore, being marvelously successful and decidedly preferable to the use of artificial digestants, stimulants or modifiers for indigestion.

SEA BEAUTY.

By Arthur L. Phelps.

Lone on a coral island,
In an opal sea,
Lingered a sea nymph lovely
Making melody.

Her voice was as the moonlight,
With all wild moon lure,
Her brow more white than storm spray,
And her breast more pure.

Smoother than snowy marble
Her white shoulders were,
And passioned as purple dusk
Her lips and her hair.

Oft have earth men seen sea nymphs,
Oft; but ne'er before
Loved as I loved and followed
To the green sea floor.

—From "The Canadian Magazine" for December.

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

London—Do you wear glasses? Are you a victim of eye strain, or other eye weaknesses? If you are you should lose no time in following Dr. Lewis' three to read books for you. Many whose eyes were rather say they have had their eyes restored through the principle of the wonderful free prescription. Just mix as says, after trying it: "I was almost totally blind and now can read all day. Now I can read even the ordinary glasses and my eyes do not water any more. At night they would pain dreadfully as if they had been at it all the time. It was like a miracle to me. I had given up all hope. The first application gave me help and within a week I threw away my glasses, but after using the prescription for three more weeks everything seemed clear as crystal. I can read the finest print without glasses. It is believed that thousands who wear glasses may soon discard them as the prescription is simple and can be had from any druggist. Those who have poor eyesight are no doubt anxious to try this, as it is said to be a harmless one to be used at home. Those who have used it report wonderful benefits. Many who were constantly using their eyes for reading, sewing, etc., say they have had their eyesight restored to such an extent that they have discarded their glasses entirely. Many cases of cataracts have been cured by it. It is said that thousands who have poor eyesight could have been saved if they had only used this prescription before their eyes had gone too far.

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye free ask Druggists or Murine Eye Remedy Co., Chicago

SECOND CON ELDERSLIE

Mrs Jas Vanclae is able to be out again after being confined to her home with a very severe cold.

Blain Fortune has sold his farm to Ezra Priebi for $6,000. Mr Priebi has been engaged with Mr H Ankerman for some time past and is well and favorably known in this section.

Mrs Geo Addison visited Owen Sound friends last week.

Mr and Mrs Nicoll, of Stratford, are spending Xmas with their son here, Thos Nicoll.

Mrs T Pepper and Sam Patterson both had successful wood bees last week.

Pete Kirkwood has been engaged by Mr H Ankerman to work his farm for the coming season.

Messrs D and A Lillico of Toronto, and Miss Mabel are all spending the holidays under the parental roof.

Mrs Jas Vanclae and Master Allen, Mr and Mrs W J Allen and family all drove to Keady to spend Xmas with friends there.

The many friends here of Miss Gertie Case will be pleased to know that she had a pleasant trip across the Pacific, and safely landed in Korea some time ago.

At the close of the Sabbath school on Dec 24th the members of the 2nd con school presented their supt, Mr C J Halliday, with a fountain pen and a volume of Plooket's Lesson Notes for 1917, as an appreciation of his work in the school.

On Dec 6th a quiet wedding was solemnized at the home of Mr and Mrs J A McDonald, when their only daughter, Miss Carrie, was united in marriage to Mr Henry Priebe. Rev A B McDonald, uncle of the bride, was the officiating clergyman. The young couple spent a short honeymoon with friends in Toronto, and have returned to reside on this con. Their many friends here wish them a happy and prosperous voyage through life.

GLAMIS

The annual Christmas tree entertainment of St Paul's Sunday school came off on Tuesday, the 19th, and was a success. The children all did well and were all remembered when the presents were distributed.

Mr and Mrs Geo Clark of Bervie spent Wednesday afternoon at Mr Jos Cunningham's.

Mr Edgar Pickard, of Toronto, is here spending the holidays at the home of his sister, Mrs J K McLennan.

Mrs Colwell and children, of London, are at the home of her father, Mr S Stevenson, for Christmas.

Those from a distance who are home for holidays: Chas McKinnon, of Wallaceburg, Clyde McKeeman of London, Will Greer of Toronto, Misses Minnie McNally of Lapeer, Mich, Nora of Toronto, Wilber of London, Nellie Gunn, Mabel and Alberta Kirkham, Mary Webb.

Mrs McDermaid is visiting her daughters in London.

Mr McCauley spent Christmas with his parents at Yara.

Miss Minnie Rowson went to Paisley to spend a few days with friends.

Mr and Mrs Jas Coward, Mrs Frances and two daughters, from Toronto, came on Saturday to spend a few days with their friends. Mr and Mrs Murdoch McKay bid Mr Angus Campbell.

Rev Mr Beker, who assisted Rev Mr De Mille with special services, left for his home on Friday.

Miss Bertha McGregor, of Sedgwick, Alberta, is down from the west and will spend some time with her uncle and aunt, Tom and Bell McGregor.

Miss Phoebe McLennan, accompanied by her cousin, Mr Will Bradley of Saskatoon, left on Saturday to spend Christmas with friends in Detroit.

Mr Joe Patterson is home from Cargill for a few days.

Logs Wanted

HIGHEST cash prices paid for logs delivered at Rake Stanbury's, lot 8, con 1, Elderslie Custom sawing done at lowest rates. Good work guaranteed. GEO ANDERSON, R R No 6, Chesley. Tel No 8111.

Wood Wanted

TENDERS will be received by the undersigned up to Jan 6th, 1917, for 30 cords of green body maple wood, 20 or 22 inches long (20 preferred), cut from live trees, fresh fallen. Delivery to be made before spring of 1917. A H ALLEN, Paisley.

PINKERTON

Miss Merrie Donnelly and her brothers Frank and Clare of Toronto are spending the holidays with their parents here, Senator and Mrs Donnelly.

Messrs Walter and Russel Birrell and two friends, Messrs. Kilbure, of Toronto, are spending their holidays at Mr. T. Birrell's,

Corp. Harold Pinkerton returned from Toronto on Monday.

The Xmas Tree entertainment here on Friday evening was well attended. An excellent entertainment was given by the children and Santa Claus appeared at the end of the programme. A nice sum was realized for Sunday school supplies.

Mr and Mrs N Neilson and Miss Clara Clark of Manitoba and Miss Lenora Clark of Toronto, are visiting at the home of Mr Jas. Clark.

Mrs. Elliot and daughter Miss Grace and Mr Neil Murray are visiting at Molesworth.

Miss Sadie Colwell spent Xmas at her home in Kincardine.

Rev. Mr and Mrs Gale and Misses Hattie and Gladys spent Xmas at their former home in Alma. They were accompanied home by their son Mr Jas Gale.

Miss Mary McKee of Stratford spent Xmas at her home here.

Mr Leslie Garland of the G T R staff, Paisley, spent Sunday and Monday at his home here.

To the Electors of the Township of Elderslie

LADIES AND GENTLEMEN:

(1) As an election is to take place in Elderslie and on account of the small attendance at nomination, the electors not expecting and the majority not wanting an election, accounting for the small turn out, in a brief manner I wish to lay before you some of the questions that were discussed and first we will take the question of the wash-out at Scone.

In 1905 Mr W J Fortune was Councillor of Elderslie Township and commissioner for that part of the road through which this flume ran, spanned by a wooden bridge. It had become out of repair, so the council undertook to build a new bridge. The concrete work was let to Mr M A Halliday, and the wooden part to Mr Anderson. It had a wooden top. That there was no grant about it was a clear case of the township building the bridge and paying for it, and if there was any doubt as to the township's liability for maintaining a bridge at this point before it was now settled beyond all doubt. Regarding the building of this bridge: Mr Fortune has claimed all the credit for the three abutments he had built there, telling me some years ago that concrete work was costing too much when we were getting it done for $3 50 to $4 per cubic yd, but was that all? Now, the first and most essential part is a good foundation, but what about these abutments? They were set right on top of a quicksand bottom. Now these abutments should not have moved if they had properly anchored, but the floods of water came and beat upon those abutments and they fell because they were founded upon a sandy foundation, causing an extension originally 22 feet, now 100 feet. Such was the state of affairs on the morning of the 17th day of June, 1916. The council had then to deal with the matter. In a few days we took the matter up with Mr Halliday. He said that as this race had now ceased to be of any use as a head race he would move his power house up to the dam and convert this into a tail race. What did this mean to the township? That a bridge 100 feet long would have to be built. After going into the matter we decided that we had better secure the services of an engineer, and I recommended that we engage Frank Barber who has been doing some work for the county of Bruce. He is engineer for the county of York and is a good man professionally. He visited the site and looked the situation over, and then sent his assistant to take all levels and measurements and made a report. His estimate for the bridge was $6,950 including piling. The engineer suggested a pier to Mr Halliday by which he might put his power house on a different part of the dam and use the river for a tail race. Mr Halliday consulted other engineers in the matter and then decided the scheme feasible. The council then took up the matter in regard to the bill with Mr Halliday. He asked $1,700, the estimate of our engineer was $1760. We finally agreed on $1400, making a saving to the township of $5,550, as between bridge and fill-in, and an altogether better solution to the problem—for problem it was. And right here I want to give Mr M A Halliday the largest share of the credit for the satisfactory way in which the matter was settled. He could do the work cheaper than anyone else. He had the material for filling right at hand. He had put a pipe through this fill-in at his own expense. The township retains 20 per cent of the cost of the work until next spring when any depression in the roadway will be adjusted and he guarantees it for 10 years. So much for this part.

(2) Now as regards good roads. I might say that I am in favor of a system of good roads in Bruce county. In brief I might outline it as follows: The Provincial government pays 40 per cent of the cost of good roads built on a county roads system, including all bridges no matter what length, 20 per cent of the upkeep till the permanent road is built, 30 per cent for maintenance after it is built. All engineering in connection with bridges or wherever engineering services are required, is done without cost by government engineers. The Government also pays 40 per cent of the cost of all machinery. A share of this money belongs to the people of Bruce county, and why should we not take advantage of it? One source of revenue that goes to make up this fund is the automobile licenses. The good roads scheme won't take up all roads, but if we get help on some of our main roads which are the hardest to maintain, we will have more money to spend on the others.

(3) I have gone into the matter pretty thoroughly. I attended a meeting of the Good Roads Association last winter, and am convinced it is a good thing. These roads are just good common sense roads, but uniformly built with the proper road machinery which one municipality could not afford to buy. The by-law comes up for final reading at the January session of the county council in 1917.

Mr Fortune said at nomination that he was in favor of a Good Roads Scheme for the 15th sideroad of Bruce. That was the road he mentioned. I have no doubt he would be. He lives on the extreme south side of our township and has relatives in Walkerton. He visits there quite frequently. This is the road he goes and he wants it the very best. He never mentioned Elderslie. I want good roads in Elderslie, the township I have represented in the County Council for the past three years.

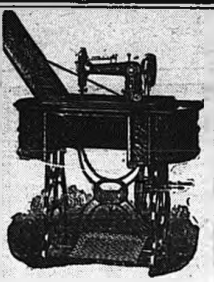
My friend W J takes a considerable interest in Brant affairs. He talked as though he found fault with the Board of Health in Elderslie in regard to his brother's family having the measles, in that they did not all take them at the one time. In the first place, Mr Fortune's brother lives in Brant, over which Elderslie Bd of H has no control, and secondly that is the one thing that the Municipal Health Act does not cover. Children can take the measles any old time at all. This is something that ought to be attended to.

Thanking you, Mr Editor, for this valuable space in your paper, and extending the compliments of the season to all the ratepayers of Elderslie, and those of my supporters in Chesley and Paisley.

I remain, yours truly, JAS H CASS.

For Reeve of Greenock

To the Electors:



Ladies and Gentlemen—I have been nominated for Reeve of Greenock for 1917, and having accepted, would ask for your support at the polls. If elected I shall first and last consider the interests of the municipality and the ratepayers in every item of the township's business and endeavor to honorably discharge the duties of the office in every way.

Yours respectfully,

M. McNab

Farm for Sale

THE EXECUTORS of the will of Patrick A. O'Hagan, deceased, offer for sale the west half of lot 18 and E. ½ lot 19, con B, Elderslie—100 acres. This is a desirable grain farm situate about three miles from Paisley. For particulars apply to PATRICK O'HAGAN, Kemnay, Chesley, or D FORRESTER, Barrister, Paisley.

We handle the Goodrich, Raymond, New Williams, White, Singer and Standard—all the very latest models. Ball Pianos and Organs, Edison Phonographs and Records.

PETER McKINNON, Agt., Paisley
Rose Street

Central Business College, Stratford, Ont.

WINTER TERM OPENS JAN. 2

We have Commercial, Shorthand and Telegraphy departments and the course are thorough, up-to-date and practical. The instructors are experienced and we place graduates in positions. We are receiving scores of applications for trained help we can't supply. Write at once for particulars.

D. A. McLACHLAN, Principal

For Reeve of Elderslie

To the Electors:

Ladies and Gentlemen—As there is to be an election in Elderslie this year, the undersigned desires to solicit your vote and influence in his behalf for Reeve, for which office I have been nominated. On the strength of my record of several years as a councillor, I would ask you to judge whether I am a qualified candidate for the higher office. Should you honor me with election I shall be pleased to devote myself to giving you my most faithful attention to the duties of the position. Wishing you the compliments of the season.

Yours respectfully,

W. J. Fortune

For Reeve of Elderslie

To the Electors:

Ladies and Gentlemen—I am again a candidate for the Reeveship of Elderslie, and if entrusted further with the care of your municipal business, it will be my ambition to merit such a renewal of confidence, also to continue to make the best of everything for the township as a whole, showing no special favors to any particular section. With my past record before you, I leave it to the electors to decide whether I am again entitled to their support in this contest. Thanking you for past favors, and wishing you all a prosperous 1917.

Yours respectfully,

Jas. E. Cass

For Councillor of Elderslie

To the Electors:

Ladies and Gentlemen—I hereby offer myself as a candidate for re-election to the Council for 1917. Your vote and influence will be much appreciated. Wishing you all the compliments of the season.

Yours respectfully,

W. J. Allen

For Councillor of Elderslie

To the Electors—

Ladies and Gentlemen—Having several times been honored with nomination for Council, I come before you now as a candidate for election. I trust that you may see fit to give me such a measure of support as will elect me, and if returned I shall do my utmost to warrant that support.

Yours respectfully,

A. Clement

For Councillor of Elderslie

To the Electors:

Ladies and Gentlemen—Having again been nominated for the Council, I beg to announce that I am a candidate, and would ask for your influence in my behalf, as well as your vote at the polls. I have endeavored to promote the interests of the township to the best of my ability, and if re-elected will continue to do so. Wishing you a Happy and Prosperous New Year.

Yours respectfully,

Clarence A. Fraser

For Councillor of Elderslie

To the Electors of Elderslie:

Ladies and Gentlemen—Having again been nominated for councillor, I am before you as a candidate. Should you favour me with re-election I shall endeavor to serve you to the best of my ability.

Yours respectfully,

Jas. A. Lewis

For Councillor of Elderslie

To the Electors:

Ladies and Gentlemen—Having received and accepted nomination for the Council again after being honored with a seat at the Board for four years, I would respectfully solicit your vote and influence in favor of my return at the polls for 1917. Thanking you for past support, and wishing you the compliments of the season.

Yours respectfully,

Jas. Thomson

¶ We take this opportunity to thank our many friends and customers for their business during the past year and to wish them

A Happy and Prosperous New Year

H. PFAFF & SON

N. C. MacKAY, Dept. of Agriculture, Walkerton

What's the Use of Missing So Much Pleasure that you Could Have?

YES, you can live without music and brightness and happiness and friends. But why should you, when these things cost so little and mean so much?

Lots of people, who said they "could do without an Edison Phonograph" before they owned one, now say they "could not do without it"—it has brought so much pleasure into their lives.

The appeal of the New Edison is universal. To those who love good music—to those who enjoy most the old airs—to those who prefer instrumental music—to the younger set and even to the children—the New Edison is a daily source of pleasure and recreation.

Great singers—famous actors and entertainers—bands, orchestras and instrumentalists—are ready to entertain you when you will.

And the prices for Edison Phonographs and Edison Records are so moderate—the variety is so great—that there can be no question as to our ability to suit you. What's the use of missing so much pleasure? Get
